Mr. Kingsmill then said that taking everything into account he thought their present position was very far from being unsatisfactory. On the other hand, considering all thinga, they had great reason to be satisfied with the result. There was one thing to which the Chairman had alluded in his address and it was, that the directors had not put anything aside for their remuneration for the current half year, but were waiting to see the result of the year's transactions before doing so. It was very well known what position he (Mr. Kingsmill) had taken up on this matter at the last meeting of shareholders. He was pretty much to the front on that occasion, but without egotism he thought he could now fairly and honestly say before that meeting, and it would not come badly from him, that in his opinion the directors had shown great judgment, great tact, and a certain amount of graciousness in having the question of their remuneration postponed until the end of the year. But at the same time, he must also say that in his opinion the directors were entitled to remuneration. He did not want to speak disrespectfully of anyone, but two directors who were on the board in the times when the evil was done, drew their full salary without scruple or hesitation, and then left as soon as the Bank got into hot water. The present directors, however, had had no bed of roses ; their task had been a very troublesome one, and the results now showed that they had acted with great judgment and prudence. That was one reason why he thought the directors were entitled to their remuneration. But there was another reason. When a Corporation like this, with a capital of $5,000,000, commenced to haggle about a few thousand dollars for directors' remuneration, it looked bad, and seemed to outsiders as if they could not afford it. At the same time it was right to pay especial tribute to one of the directors for his action in the matter. He (Mr. Kingsmill) had heard on very good authority that there was one director (Mr. Belilios) who had not drawn his remuneration on the 31st December last, and he wished to ask the Chairman if this was correct ? The Chairman said that one of the directors had not drawn his remuneration for the half-year ending 31st Dec. last. Mr. Kingsmill said, without in any way reflecting on the other directors, that the action of that gentleman had been most generous, and he certainly deserved the gracious abknowledgments of the shareholders. Since the last half-yearly meeting he (Mr. Kingsmill) had been put in possession of the knowledge of many matters, and he could now speak fairly on the subject. He had one or two other questions to ask. The first was, had the directors reconsidered, or did they intend to reconsider, the resolution which the Chairman at the last meeting said had been come to, namely, that $20,000 was to be expended on the furniture for the Bank's premises at Shanghai ?

The Chairman said that after consultation it was decided that good substantial furniture for the premises in Shanghai should be procured in London by Mr. McLean, and he was requested to state that it must be laid down in Shanghai at a cost not exceeding £2,500. Mr. Kingsmill said that was very satisfactory. He had another question to ask, and it was to the advantage of the Bank's employés that he should do so. Had any bonus or any remuneration of any kind, in addition to the regular salary, been granted to any one servant, manager or otherwise, of the Bank within the last half year ? The Chairman said such a thing was not customary with the Bank, and it had not been done. Mr. Kingsmill asked was it a fact that the manager received as part of the arrangement under his employment or otherwise any addition to his salary—any reward or bonus, or anything of the kind ? Was there anything went to the Bank's manager other than his salary ? The Chairman : No. Mr. Kingsmill then asked if the Chairman could form any idea, in consequence of what had since transpired, what the losses estimated by Mr. McLean would really be ? The Chairman said that since Mr. McLean had left the Colony, they were certain that half the amount of $299,000 would be saved.

The Chairman said if there were no other questions to ask he had much pleasure in moving that the report and balance-sheet be adopted. Mr. Burrows seconded. The motion was put and carried unanimously. The Chairman said the next business was the confirmation of the election of a director. Mr. Forbes proposed that the election of Mr. McIver as a director be confirmed ; Mr. Burrows seconded. The motion was put and carried unanimously. Mr. F. D. Sassoon then proposed that Mr. H. B. Gibb be appointed an auditor ; Mr. Kingsmill seconded. The motion was passed unanimously.

The Chairman said there was no other business before the meeting. Mr. Kingsmill, after congratulating the directors upon the satisfactory state of things, moved that a vote of thanks be accorded to them. The Chairman having acknowledged the compliment the proceedings terminated.

PHILIPPINE ISLANDS.

MANILA.

On the 12th July last, the exact date fixed upon by a Spanish naval officer for the occurrence of a typhoon among the Philippines, a typhoon actually took place in the China Sea, which is thus referred to in the *Comercio* :—"The steamer *Butuan* brings us intelligence of a British vessel having arrived at Ilo Ilo from

Digitized by Google

Hong Kong, after encountering a typhoon in the China Sea. We have also been informed that three laden vessels which left Ilo Ilo had to put back; one of them with damage to her rigging. At Ilo Ilo, too, bad weather has prevailed, but no damage has been done nor has any accident happened."

The bad weather prevailing at Manila from the 12th July became a storm of such severity on the 20th that no doubt was entertained that it was the tail-end of a typhoon. The departure of the mail steamer *Pasig* from Manila to Singapore was delayed in consequence until the following day. But relatively little damage was done at Manila, but several coasting craft were wrecked, and lives were lost.

JAVA.

—o—

BATAVIA.

The following particulars of the bombardment of Sambelangan on the Atchinese coast, lately announced by telegram, are translated from the Batavia *Algemeen Dagblad*:—

"The latest naval news is the bombardment of the principal campong of the petty State of Sambelangan, on the North Coast of Atchin. Some time ago, stricter orders were received regarding the checking of the fisheries carried on by the people of the petty States of Sambelangan and Murdoo, and cruising off the coast of the latter was consequently actively proceeded with. Whenever a fishing prahu ventured outside, the cruiser, by means of musketry or easy shot, compelled her to stop her occupation, and to return to the river. At length one of the men-of-war succeeded in attacking a number of fishermen so unexpectedly that they had to leave a large net behind and to flee to the beach. From there they endeavoured to draw in the net. A boat which had been despatched towards it was, however, too quick for them, and brought the net on board. Whilst this was happening several armed men arrived on the sea shore and fired upon the boats and the ship, but without effect. The man-of-war continued her course, and again arrived off Sambelangan two days afterwards. When she had sailed past the campong, and was off a dyke which stretched along the beach for a very great distance, she was received with a well kept up fire. Hundreds of armed men occupied this dyke, and the whole coast to the west was covered with onlookers. Of course the musketry from the shore was not left unanswered; a reply was soon given, not only by a similar fire, but also by shells and case shot. Firing upon the occupied dyke was stopped after about two hours, and the ship steamed to Gighen to inform the commander of the station of the event.

The consequence was that on the morning of the 19th July H.N.M.'s steamers *Citadel Van Antwerpen*, *Schouwen*, and *Palembang* steamed from the roadstead of Gighen towards the east, and having arrived near Sambelangan, they took up a position off the campong. At about nine o'clock the *Citadel Van Antwerpen* opened fire, which example was immediately followed by the other vessels, whereupon a shower of shells was, as it were, thrown as well into the campong as behind the dyke. The campong was soon set on fire, but the enemy had the good luck to extinguish the flames. Their joy was short, for scarcely half an hour afterwards it again caught fire, this time at two places, and so fiercely that extinguishing it was no longer possible. The red flag which so proudly floated above the roofs soon fell also a prey to the flames. At twelve o'clock the bombardment was stopped until two in the afternoon, when it was again continued. At five o'clock the chastisement was considered sufficient, and the ships returned to the roadstead of Gighen. The campong was burnt to the ground. We could not however, ascertain the effect of our fire upon the men, because they were able so to retire behind the dyke that we did not see whether the shells and case shot proved effective. The fire was, however, kept up the whole day in such a lively manner, and the shells burst for the most part so accurately above the dyke, that the number of killed and wounded must have been great."

The *Dagblad* says:—According to a telegraphic despatch from the Resident of Palembang, dated the 10th August, a vessel, the name and nationality of which are unknown, but which has been abandoned by her crew and is partially burnt, has stranded on the Sumatra coast near Tanjong Slakar, off Pulu Nangka. This vessel is probably the French ship *Comête*, which lately caught fire in Banka Straits. A small portion of her cargo, consisting of pepper and kawang tallow, has been saved.

The *Batavia Handelsblad* publishes the official report on the Government chinchona culture in Java for the second quarter of 1875. During the period named the weather was favourable for the collection of bark, 720,000 kilogrammes of which were at its close ready for exportation. In the same quarter 10,978 plants of the ledgeriana and 18,150 of the officinalis variety were put into the prepared ground.

On the 14th August the wreck of the M.M. steamer *Neva* was sold by auction at Batavia for f.16,900.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 28th August; the French mail from London July 30 arrived out on the 28th August. We take the following items of intelligence from the *Straits Times*:—

The question of cheap Summary Civil Suits, which was last year debated in our Legislative Council, has been set at rest by the issue, under the amended law, of a largely augmented scale of fees for the Summary Court. The new Schedule of Fees does away entirely with all hope of cheap justice in the Colony. This question was discussed at some length in the Legislative Council last year, when the Courts' Ordinance was brought up, in order that the Schedule of Fees which had been tacked on the original Bill, and so passed into law, might be struck out. The Hon. Thos. Scott contended for the retention of the low scale of fees, as a part of the understanding by which the members were induced to consent to the reconstitution of the Courts; but he was overweighted, and the schedule was struck out, leaving the Judges to amend the scale of fees whenever they saw fit. The consequenceis, that, the Government, finding the new Court establishment expensive, wants the suitors to bear the burden of, it; hence the augmented scale of fees, which are very much the same as those formerly levied in the Court of Requests,—the cost of entering plaint being graduated on a progressive scale of 10 per cent. on every $5 up to $50, 10 per cent. on every dollar from $50 up to $250, and 5 per cent. on every dollar above $250. When to the cost of entering plaint, which must be prepaid by the suitor at the outset, is added the cost of summons, subpœnas, and the other fees necessary to be paid before the case is disposed of, it will be found that before obtaining process to compel payment of a debt of say $50, a suitor will have to advance out of his own pocket $10 or $12,—possibly more,—with the chance that he may not recover even his costs from the debtor. To the few Europeans who have occasion to resort to the Court for the recovery of small claims like this, the outlay may not seem large; but to natives, who are the chief litigants in the smaller cases, the sums they are obliged to expend press very heavily; and where, as often happens, they lose their cause through ignorance of the law, or fail to recover from their debtors even sufficient to pay their costs, the fees will be a heavy tax.

The detention for sixteen days of the British steamer *Bentan* at Rhio for an imaginary breach of the Dutch passenger regulations should receive the attention of our Government, in order to protect our shipping interests in neighbouring ports. Owing to the exclusive policy of the Netherlands Indian Government, the privileges of British ships at ports in Java are so few that we cannot afford to part with any of them, and every effort should be made to secure to British shipping the full measure of those few concessions to which under the treaty and local regulations they are entitled, and to guard against loss to shipowners from the compulsory detention of their vessels through misapprehension of the law, or over-zealousness on the part of some subordinate official, possibly entailing, as in the case of the *Bentan*, an enormous expense, for which the owners have no remedy. The facts of the detention, so far as we can learn, are, that the steamer cleared at Cheribon and Samarang with passengers for this port, the number of passengers being correctly stated in the port clearances granted by the marine officers at those ports; but on reaching Rhio, she was detained by the authorities of that place on the plea that, notwithstanding the tacit sanction of the Dutch Government, through the officers of the ports she had just left, she carried more passengers than their regulations allowed. She was compelled to remain there sixteen days pending the decision of the Procureur-General, to whom the question was referred; that officer deciding that the vessel had been guilty of no breach of law, and therefore was not amenable to seizure or fine. She was then accordingly released; but her owners have had to maintain a well-found steamer in idleness for sixteen days, within a few miles of the conclusion of her voyage, with no hope of redress, unless through a vexatious and expensive appeal to the law of a foreign State, in which the probabilities are strongly against their success. Of course, our remarks are founded upon the assumption that the grounds of detention are as stated; but if so, we think the matter clearly one requiring action on the part of our Executive, in order that the Netherlands India Government may be induced to issue such instructions to its officials in the various ports as will effectually prevent the recurrence ofsimilar difficulties.

Our readers will remember that some three or four weeks since we inserted an article in our columns giving a full description of the visit which Sir William Jervois had paid to the Eastern Coast of the Malay Peninsula, and stating that we were of opinion that great results would accrue therefrom, both commercially and politically. We are now glad to hear that the anticipations which we then formed have commenced already to be realised. Some days ago a boat arrived at Singapore from Tringanu, after a voyage of twenty-three days. This boat contained two messengers from the Sultan of Tringanu with a letter to his Excellency, expressing a great wish to visit Singapore and to improve his acquaintance with the British, and stating that if a ship was sent for him he would start for Singapore at once. This letter, as it happened, came in the very nick of time. The *Pluto* was to start almost immediately for Pahang to bring back the party who had been surveying the Muar and Pahang rivers, and thus fixing the first line across the Peninsula. Tringanu is only twelve hours run from Qualla Pahang, so that Sir William Jervois, seeing the policy of acceding to the Sultan's wish, gave directions that the *Pluto* should combine both services. The Sultan will accordingly arrive here in three or four days, and will be attended by his wives, sons, grandsons, and even

Digitized by Google

great-grandsons ; also, doubtless, by many of his followers. This visit may possibly lead to very important results. We have on a former occasion remarked how rich, both in mineral and vegetable productions, is this State of Tringanu. A very large revenue might under a proper system of management be obtained by developing these resources and furthering trade; and by meeting the Sultan in the same friendly spirit which he himself is evincing towards us, the greater portion of this trade would possibly find its way to the Singapore market.

A general order issued by the Inspector-General of Police announces the appointment of Mr. C. H. Ord as an Inspector of Police, on probation for twelve months, and Acting Head Inspector at Singapore, with the remark that "Mr. Ord as Head Inspector is senior to all other Inspectors, and will be obeyed as such." The appointment as Acting Head Inspector is "*vice* Mr. R. O. Maxwell, resigned." Nobody had heard of the latter gentleman's appointment, he having never assumed the duties, but we learn that it had been made and accepted and afterwards resigned. There could be no serious objection to Mr. Ord's selection as a simple Inspector, but the interests involved in the acting appointment tacked on to it are so weighty, affecting as it does every member of the community by its influence on the *morale* of the entire police force, that we can only regard it with the utmost astonishment. We do not know who is chargeable with this palpable piece of nepotism, but we think the matter of so grave importance that it is time steps were taken by the public to put a check upon this description of generosity with the public money, that has become too much the fashion in the colony ; while deserving officers of long and faithful service are over-ridden by unfledged youths, whose only qualification is that they happen to have a friend near headquarters.

Touching appointments, which have been so profusely dealt in lately, with no very satisfactory result to any one concerned, we are enabled to state that Major Gray has been appointed by the Secretary of State to be Superintendent of the Singapore Gaol, and that the Rev. Arthur Fearon has been appointed Chaplain of Penang. These appointments will undergo no revision, coming as they do from the fountain head of patronage. With respect to the clerical appointment announced, it is satisfactory to find that the spiritual requirements of Penang have the earnest regard of Her Majesty's Secretary of State, and we trust the restless community of that Island will duly appreciate the attention. The nomination of Major Gray to the Superintendence of the Singapore Gaol has no doubt been made with a full consideration of the requirements necessary in the appointee to this important office, but we question if the Commission now deliberating on Prison Arrangements will feel much flattered by a nomination which clearly places no account upon what their recommendations may be.

The steamer *Batavia*, pioneer of the Messrs. Rubattino's line between this part of the world and Genoa, has called here *en route* to Batavia, and will call again on her return voyage. Should the venture prove encouraging, we look for the establishment of a regular line of steamers on this route.

A Marine Court of Inquiry has been held at Penang, to investigate the loss of the British barque *Albatross*, off Atchin. The Court was composed of Captain D. T. Hatchell, Magistrate of Police, President, assisted by Messrs. Fox and Eagleshame as Nautical Assessors. After going through the evidence adduced in the case, the captain and officers had their certificates returned to them.

A meeting of the Singapore Sporting Club has been held at the Exchange Room, at which it was decided to hold an autumn race meeting in the first week in November next. A programme is now in course of preparation by the stewards.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—The slight improvement noticed in last report had made further progress, and a considerably better demand had been experienced for Yarns at higher rates, the rise having been most noticeable in 28/22s Shirtings had likewise advanced, 9 lbs. having attracted most attention. Indigo Shirtings, Cotton Sateens, and Turkey Reds, had been more asked for. Velvets were quieter, and Taffachelass showed some recovery from previous low rates. In Woollens, best qualities of Black Lustres and Italian Cloth were more easily saleable, and Mousselines continued in good demand. Blankets of lighter weights had been inquired for and in Cloth more business had been done at the low rates ruling. There was no change to notice in Metals, and transactions had been unimportant. Holders of good brand Nail rod Iron refused the low offers that were made.

HIOGO-OSAKA.—The Chamber of Commerce report says:—There has been a somewhat better demand for goods, and transactions have been upon a larger scale, although no important advance in values can be advised as yet. Cottons.—Grey Shirtings: Deliveries have improved considerably, and an advance of 5 cents per piece has been established, 9 lbs. goods are enquired for. Turkey Reds: Prices have recovered somewhat from the low point previously reached, but do not yet afford much temptation to holders. Black Velvets are likewise rather firmer. Victoria Lawns may be considered out of season. Worsteds and Woollens.—The approach of the Autumn has drawn the attention of the dealers to Black Lastings, Orleans and Checked Lustres, but the prices offered so far have not induced much business. Plain Mousselines de Laine have been taken. Iron continues in heavy stock, with limited demand.

CHEFOO.—Messrs. Wilson, Cornabe, and Co. report:—Our last Circular was issued on the 5th July, and we now beg to continue our market advices. Cotton Goods: Owing to the wet and unfavourable weather we have had during the past month, there has been no business whatever effected in either Grey Shirtings or T-Cloths, but as we close a better feeling is becoming apparent, and we hope to see a better business done shortly. Drills and other Plain Cottons have equally shared the prevailing dullness. Woollen Goods have not been inquired after, but as milder weather will soon be setting in, we trust ere long to see some demand. Metals; Stocks of all kinds of Iron are very heavy, with no demand whatever, and prices are quite nominal. Lead is in fair inquiry, but as supplies are coming in rather freely, we look for a decline in value.

NEWCHWANG.—Messrs. Bush Bros. report: Manufactures had been in good demand. Ordinary 8¼ lbs. Grey Shirtings were quoted Tls. 1.63 to 1.65 ; 8 lbs. T-Cloths, Tls. 1.59 to 1.61.

CHINKIANG.—Messrs. Spencer and Wolfff write:—Our Piece Goods market has recovered from its late depressed state, and goods have been placed at a marked advance on last quotations. Drills are being inquired for, but there are hardly any in stock.

SHANGHAI.—There had been a continuous improvement in the market, and prices of both Cottons and Woollens—but especially Grey Shirtings and T-Cloths—showed considerable advance. The demand had been active throughout, and there were signs of further improvement at the close.

BANGKOK.—With the exception of a decline of 5 Tic. per bale in the value of No. 18-24s Grey Twist, and a rise of Tic. ⅛ per piece on 6lbs. and 7 lbs. T-Cloths, there had been no change in quotations; 6 lbs. and 7 lbs. T-Cloths, were quite out of stock for the moment, and Tic. 2⅜ and Tic. 2⅞ would be paid for first arrivals.

MANILA.—There had been little or no change in the tone of the market, and quotations remained without alteration.

EXPORTS.

TEA.

YOKOHAMA.—Since the 9th Aug. buainess had continued active, settlements for the period amounting to about 12,000 piculs. Although prices had been somewhat irregular, an advance of quite $1 per picul upon last quotations must be noted. The Thomas A. Goddard had sailed for New York, leaving the H. A. Litchfield, Mercury, Oleander, and Ukraine, (sailing vessels,) on the berth, also the Lothair, expected from Hiogo. The P.M.S. City of Tokio, and O. and O. steamer Oceanic were fully engaged. The following cargoes, amounting to 1,259,734 lbs., had been despatched:—Per s.s. Gaelic, August 15—316,945 lbs. to New York, 135,697 lbs. to San Francisco, 13,794 lbs. to Boston, 60,970 lbs. to Chicago, 3,850 lbs. to St. Louis, 5,620 lbs. to Detroit, 42,029 lbs. to Montreal. Per barque Thomas A. Goddard, Aug. 17—670,029 lbs to New York (also 2,072 lbs. Tea Dust). Per s.s. Malacca, August 18—10,800 lbs. to England. Quotations:—Common, $22 to 24 per picul; good common, $25 to 27 ; medium, $28 to 31 ; good medium, $32 to 34 ; fine, $36 to 38 ; finest, $39 to 42½; choice, $45. Export from 1st May to date 6,885,039 lbs.

HIOGO-OSAKA.—An active business had been transacted since the 19th July, and settlements are returned as 11,700 piculs, a considerable portion of which had been purchases made for shipment to Yokohama and Nagasaki. At the close buyers seemed less disposed to pay the rates demanded by the dealers and there was a smaller business doing. Total settlements to the 16th August 32,700 piculs, against 28,450 piculs at the corresponding period last year. Stocks were reduced to about 2,500 piculs, consisting of common to good medium grades principally. The s.s. Galley of Lorne left far Shanghai on the 8th August, after taking in some 125 tons for New York viâ Suez. The British ship Lothair sailed on the 18th August for Yokohama, where she would complete loading for New York.

SHANGHAI.—There had been a considerable business in Congou, at about last week's quotations. Buying had been chiefly in the grades between Tls. 18 to 20, and good value had been obtained in these classes. Common kinds at Tls. 18 up were perhaps slightly firmer, but the market closed quiet. No third crops had yet arrived. Settlements for the week—18,328 chests at Tls. 15 to 26 ; stock—31,720 chests. Green: There had been only a moderate demand for Pingsueys, and prices were unchanged. Business had commenced in Teenkais, four chops having been settled at Tls. 28½ to 36. These purchases had been made apparently for shipment per P. M. S. mail, and there was not much disposition amongst the buyers to continue operations at opening rates. Total Settlements of Green Tea, to date, were less than half what they were at the same time last year. Settlements for the week—Fychow, Teenkai, &c., Tls. 27½ to 29½, 3,120 ½-chests ; Pingsuey, Tls. 20 to 35½, 7,948 ½-chests; total 11,068 ½-chests; total stock, 50,090 ½-chests. Export to Great Britain to date—

	1875-1876.		1874-1875.
Black	48,023,449 lbs.	against	44,968,362 lbs.
Green	1,246,490 „	„	1,870,943 „
	49,269,939 „	„	46,839,305 „

FOOCHOW.—Messrs. Westall, Galton, and Co.'s Weekly Letter says:—Owing to the continued bad news received from London, the quiet tone noticed last week still prevails, and buying for that market has been on a very limited scale. The settlements of Congou only amount to some 13,000 chests, of which more than half is intended for the Colonies and the Cape of Good Hope. Congou: During the past week teamen have displayed more disposition to meet buyers, especially in good common kinds, in which a slight decline is noticeable. None of the third crop country teas have yet arrived, and holders, with the present large stock on hand, are endeavouring to strengthen the market by

Digitized by Google

delaying them as much as possible. Souchong: Only a very trifling business has been passing. Oolong: Two small parcels have found buyers at former rates. Flowery Pekoe: Several chops have been settled, very full prices being paid. Scented Teas.—Purchases show no change. The export to date to Great Britain, the Continent of Europe and the Cape of Good Hope amounts to 33,055,193 lbs., against 29,635,942 lbs. last year; to America, 87,555 lbs., against 154,936 lbs. last year; to the colonies, 8,512,582 lbs., against 7,177,894 lbs. last year.

SILK.

YOKOHAMA.—The market had continued active since last Circular. Some superior parcels of hank Silks having arrived, a higher range of prices had been paid, and for these sorts the demand continued good. The pretensions of holders for medium grades (which as yet showed little improvement in quality) and the unfavourable tenor of late home advices had curtailed business at the close. Supplies had come forward freely. Settlements, from 1st July to date, 1,250 bales, against corresponding period, season 1874-5, 950; do., 1873-4, 2,200; do., 1872-3, 4,200.

SHANGHAI.—There had been another comparatively quiet week in the market, buying being confined to a few hands, and holders showing no signs of weakness as yet. Common and Market Tsatlees had been principally dealt in at from Tls. 275 to 290 per picul, and settlements for the mail were estimated at about 1,800 bales, giving a total of 25,000 since the 1st June, against 24,200 bales last year. Best descriptions of Tsatlees had been neglected and were less firmly held; but for all kinds of Taysaams and for Hangchow Tsatlees very full rates were demanded, especially for the latter, which were the dearest Silks in the market. The unsold stock was estimated at 18,000 bales. About 350 bales of re-reels had been settled, chiefly medium to common classes, at rather higher rates. The better and extra grades being partially neglected had been taken at slightly reduced prices.

ARRIVALS.

At YOKOHAMA.—From London, Aug. 18, Flintshire (str.),

At HIOGO.—From London, Aug. 2, Argyll (str.); 4, Duke of Abercorn; from Liverpool, 7, Spirit of the Age.

At SHANGHAI.—From London, Sept. 30, Fleurs Castle (str.); from Liverpool, Patroclus (str.).

At HONG KONG.—From London, Aug. 17, Lucia; Sept. 24, Glenearn, (str.); 28, John C. Monroe; from Cardiff, 29, Eugenie; from Shields, Solsterk.

At MANILA.—From Liverpool, Aug. 5, Buenaventura (str.); from Cadiz, 13, Vicenta; from Cape Town, 14, Cicilie.

At BANGKOK.—From London, Aug. 8, Ellen Rickmers; from Hamburg, July 25, Broderne.

At SINGAPORE.—From London, Aug. 22, Bristow; from Sunderland, 25, Maid of Aln; from Newcastle, 26th, Nehemiah Gibson; from Algoa Bay, 21, Bedfordshire; from Mauritius, 24, Elizabeth Ann; from London, &c., Sept. 29, Gordon Castle (str.).

DEPARTURES.

From YOKOHAMA.—For New York, Aug. 17, T. A. Goddard.

From HIOGO.—For London, Aug. 3, Argyll (str.).

From SHANGHAI.—For Callao, Aug. 10, John Parker.

From HONG KONG.—For Cape of Good Hope, Aug. 20, Marie.

From MANILA.—For London, Aug. 9, Cornuvia, for Channel, f.o.; July 31, Assyrian; for San Francisco, Aug. 5, George Moon; for West Coast of Africa, 8, Abeille.

From BANGKOK.—For London, July 29, Karikal; for Marseilles, Aug. 7, Oribe.

From SINGAPORE.—For Rio Janeiro, Aug. 25, Birdstone; for London, Sept. 25, Scotland (str.); for New York, 24, Galley of Lorne (str.).

TELEGRAMS FROM THE FAR EAST.

THE DIFFICULTY WITH CHINA

(REUTER'S TELEGRAMS.)

SHANGHAI, SEPT. 27.—The final answer of the Chinese Government to the demands of Mr. Wade in reference to the murder of Mr. Margary is expected to be given by the end of the month.

SHANGHAI, SEPT. 28.—Admiral Ryder and four British men-of-war are at Chefoo.

SHANGHAI, SEPT. 30.—Mr. Wade has intimated to the Chinese Government that if his demands are not complied with to-day he will leave Peking.

(TIMES' TELEGRAM.)

SHANGHAI, SEPT. 27.—The Chinese Government shun effectual performance of the terms laid down at Tientsin. Mr. Wade leaves Peking on the 13th October, unless a satisfactory settlement is conceded. The punishment of the Yunnan officials and publication of foreign affairs in the *Gazette* are reported as the chief difficulties.

MURDER BY CHINESE SEAMEN.

BERLIN, SEPT. 30.—The Foreign-office has received a telegram from the German Consul at Amoy, dated yesterday, stating that Captain Gerwitz and the mate of the German schooner *Anna* had been murdered at sea near Foochow by the Chinese crew of the ship. Nothing is as yet known as to what has become of the vessel itself. The German gunboat *Cylop* left Amoy yesterday for Foochow.

THE MAILS.

—o—

Heavy Portion of Last Inward Mail.—Gibraltar, Sept. 28.—The P. and O. Company's steamer Cathay, with the India, China, and Australia (heavy) mails from Port Said 20th inst. left at 4 P.M. for Southampton, where she may be expected on the 3rd October.

Inward Mail, due October 25.—Galle, Sept. 39.—The P. and O. Company's steamer Surat, with the China and Australia mails, leaves for Suez to-day. Australian gold for Europe, £680,000.

Heavy Portion of Last Outward Mail.—Gibraltar, Sept. 28.—The P. and O. Company's steamer Poonah, from Southampton 23rd inst., arrived at 11 A.M., and left at 5 P.M. for Malta and Port Said.

Outward Mail of Aug. 20.—Shanghai, Sept. 30.—The P. and O. Company's steamer Teheran, with the London mails of Aug. 20, has arrived here.

SHIPPING POSTSCRIPT.

Arrivals Not in the Tables.—Sept. 28, at Falmouth, from Akyab, Vega; from Rangoon, Famiglia Prima; from Manila, Angostura; from Akyab, Cavallo Marino; 26, at Marseilles, from Singapore, Hesperia; at Hamburg, from Rangoon, Alardus; 29, at London, from Rangoon, Quattro, Nina Sheldon; 28, at Falmouth, Angiolina; 26, at Bremen, Kate Covert, Tommasseo, Venezia; from Bassein, Ydun; 28, at Liverpool, from Rangoon, Wild Deer; 30, at Falmouth, from Akyab, La Sophia, Stavanger; Oct. 1, off Deal, from Colombo, Lota; at London, from Penang, Brisbane; at Plymouth, from Bassein, Alpi; at Falmouth, from Rangoon, Matteo; August, — at Queenstown, from Bassein, Britomart.

Departures.—Sept. 26, from Hamburg, for Hong Kong, Formosa; 28, from Shields, for Singapore, Poseidon; 29, from London, for Shanghai, Galatea (str.); 27, from Bremen, for Rangoon, Charlotte; Aug. 26, from Rio Janeiro, for Batavia, Trinidad; Sept. 4, Lieutenant, for Hong Kong, Carolus Magnus; Oct. 1, from Cardiff, for Singapore, Guiseppe Padre.

Spoken.—Bastian Pot, from Falmouth to Singapore, Sept. 6, 13.1 N., 26.34 W.; Amsterdam, from Liverpool to Singapore, Aug. 22, 12 N., 26 W.; Adolf, from Hamburg to Batavia, Aug. 5, 10 N. 27 W.; Eve, from Bordeaux to Reunion, Sept. 6, 8 N., 25 W.; Monte Rosa, from Sunda to Liverpool, Sept. 10, 34 N., 36 W.; Berryer, from Bordeaux to Reunion, Sept. 1, 18 N., 29 W.; N. Boynton, from Singapore to Boston, Aug. 25, 17 S., 3 W.

Miscellaneous.—Passed Gibraltar, Sept. 27, Hampton (str.), from Rotterdam, for Batavia; the Lord of the Isles, from Shanghai, for London, arrived at Suez on the 29th Sept.; the Tom Morton (str.), from Foochow, arrived at Aden on Sept. 27, and proceeded same day for London. The master, Lashbrooke, of the Boldon, from Singapore, which arrived here yesterday, was washed overboard on the 6th of July. Cape Town, sailed Aug. 25, for Anjer, Confluentia; for Batavia, Barbadian; East London, 25, sailed for Java, Sea Form. Port Elizabeth, Aug. 31.—The repairs to the Tecumseh are being rapidly effected. The master is advertising for a loan of £3,000 or £4,000 in bottomry. Aden, Sept. 18.—The Thingvalla (Dan. str.), from Antwerp to Singapore and China, with iron and a general cargo, put back to this port, Sept. 12, with three blades of her propeller gone. It will be necessary to replace the propeller by a spare one on board. When this vessel arrived here originally on the 6th Sept., the master found that two blades or portions of them had been knocked off, but the vessel proceeded, intending to change the screw at Singapore, She, however, fell in with heavy weather off Socotra, and lost the third blade, when it was thought advisable to bear up.

Casualties.—The Zodiac, from Padang, whilst beating up for the anchorage on the 3rd inst., broke her maintopgallantyard, carrying away mizentopmast with it. The Nieuwland, from Batavia, arrived here, reports very heavy weather on the 8th, 9th, and 10th August, lat. 35 S., lon. 27 E., was obliged to run back 100 miles to the N.E., under doublereefed topsails and foresail, as the vessel could not withstand the force of the gale; lost bulwarks, &c., and sustained slight damage to bows.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

Beckett—On the 9th Aug., at Shanghai, Mrs. Beckett, of a daughter.

Burnett—On the 30th Sept., at Croydon, Surrey, the wife of George H. Burnett, of a son.

Cooper—On the 10th Aug., at the British Consulate, Shanghai, Mrs. Cooper, of a son.

Gentle—On the 25th Aug., at Fern Hill, Singapore, the wife of Alex. Gentle, of a daughter.

Kindblad—On the 3rd Aug., at Shanghai, the wife of A. W. Kindblad, I. M. Customs, of a son.

Laird—On the 28th Sept., at Birkenhead, the wife of William Laird, of a daughter.

Marshall—On the 14th Aug., at Hiogo, Japan, the wife of J. Marshall, of a son, stillborn.

Plunket—On the 24th Aug., at the Stadt House, Malacca, the Hon. Mrs. Plunket, of a daughter.

MARRIAGES.

Bates—Medhurst.—On the 30th Sept., at the Parish Church of West Teignmouth, by the Rev. E. J. Hillier, Vicar of Cardington, Bedfordshire, assisted by the Rev. W. Laidley, Vicar of the parish, the Rev. Jonathan Bates, Rector of Kirstead, Norfolk, to Augusta Liberta, youngest daughter of the late Dr. Medhurst, of China.

Green—Green.—On the 30th Sept., at St. Mary's Church, Scarborough, by the Venerable Archdeacon Blunt, Octavius Green, youngest son of the late Philip James Green, of Boyne House, Notting-hill, London, to Augusta Eleanor Isabella, youngest daughter of Sir John Green, C.B., late Her Majesty's Diplomatic Agent in Roumania.

Windram—Spink.—On the 28th Aug., at St. Paul's Cathedral, Calcutta, by the Rev. A. N. W. Spens, James Windram, of the National Bank of India, to Ellen Beaufort, second daughter of William Spink, Calcutta.

DEATHS.

Barton—On the 4th Aug, at Nagasaki, Augusta S. Barton, the beloved wife of Zeph. Barton, of Shanghai, aged 39 years.

Kirschstein—On the 5th Aug., at Chefoo, Erdman Tiergen Kirschstein, aged one year and fourteen days.

Louttit—On the 25th Sept., at Notting-hill, Samuel John Louttit, Controller of Accounts Tea and East India Department H.M. Customs, aged 63.

Meadows—On the 3rd Aug., at Tientsin, suddenly, John Armstrong Taylor Meadows, aged 58.

Northmore—On the 1st Sept., at Colombo, Ceylon, Harriet Olympia Morshead, wife of John Northmore, of Cleve House, near Exeter, aged 30 years.

Patterson—On the 23rd Sept., while serving in Burmah, Captain C. D. Patterson, 1st Battalion 21st Fusiliers, only son of Talbot Patterson, of Melville, Bideford.

Peterson—On the 9th Aug., at Nagasaki, Hans Martin Peterson, of Drobak, Norway, aged 43 years.

Welsh—On the 18th Aug., at Yokohama, Edward Welsh, aged three months, son of David Welsh.

Literature.

L'Art Khmer. 'Etude Historique sur les Monuments de' l'Ancien Cambodge. Par la Comte de Croizier. Paris: E. Leroux 1875.

Indo-China is, without doubt, one of the least known regions of Asia, but without having as yet been able to decipher the enigma of the revolutions by which it has been overwhelmed, we are beginning now-a-days to get together some date with regard to its ancient civilisation, and as in those countries where written tradition has most frequently disappeared through the agency of constant political troubles, and where oral tradition, when it exists at all, does so in a garbled shape, so in Indo-China we can only turn to stone monuments and their inscriptions for information. Such, in brief, is the opinion of M. de Croizier, and such is the riddle to the solution of which he has devoted several years of his life. The volume before us contains an interesting and most painstaking *résumé* of the results of his labours, and it will be perused with much pleasure and profit by all who are desirous of obtaining trustworthy information on that branch of Oriental art, which is now beginning to attract attention among the lovers of Fine Art.

M. de Croizier divides his modest and unpretending work into four main parts. The first part he calls *Etude Historique;* in Chapter I. he treats of our acquaintance with Cambodia previous to 1861; Chapter II. is devoted to the labours of Henri Mouhot, who, in 1861, discovered afresh the ruins of the ancient Khmer civilisation, and made known "the existence of Angkor-Thom, the ancient capital of the Khmers, and of Angkor-Wat, the Jerusalem of Buddhism." Chapter III. contains some notes respecting "*Explorations Diverses;*" and Chapter IV. an account of Captain de Lagrée's expedition; with him, it will be remembered, there were asscciated Lieutenants Garnier and Delaporte, Drs. Thorel and Joubert, and the Vicomte de Carné. Chapter V. reproduces from the *Journal Officiel* the principal passages from the official report of Lieut. Delaporte's subsequent explorations; and Chapter VI. contains some remarks on the Musée Khmer which has been formed at Compiègne from the specimens of various kinds collected by that industrious officer and other *savants.* In the second part of his work M. de Croizier furnishes a general sketch of the monuments, and describes the materials of which they are composed, the processes of their construction, &c.; and in the third part we have a complete list of the Khmer monuments found up to the present time. The fourth and concluding part contains a detailed catalogue of the contents of the Musée Khmer, which has found a temporary home in the Palace of Compiègne, but which it is intended eventually to transfer to the Louvre. Annexed to this is a map of Southern Indo-China (*ancien royaume* Khmer), on which are indicated by figures the positions in which the various groups of Khmer monuments have been discovered. The volume also contains a portrait of Lieut. Delaporte, together with a few illustrations.

The author of the work noticed above has also in preparation for issue by the same firm *Légends Indo-Chinoises, relatives aux Monuments de Pierres, de l'ancien Cambodge,* and *Premier Recueil d'Inscriptions Khmer, publiées en Europe* (83 *planches*).

Canton and the Bogue—A Narrative of Six Eventful Months in China. By Walter William Mundy.

The above little work, published by Tinsley, does not pretend to give any exhaustive views upon China affairs, the residence of the writer having, of course, been of a too short duration to enable him to form such matured opinions as are necessary for a thorough exposition of matters in that much misunderstood country; but it will be useful in calling attention to some points in connection with it which are of special interest at the present time. A considerable portion of the book is taken up by a description of the journey and other kindred matters, which, though they are of interest to home readers, will, of course, be of little moment to those in China. A well-merited tribute paid to the Messageries Maritimes steamers for the excellent manner in which they are managed is, however, worthy of note. Mr. Mundy, it may be recollected, was the gentleman who so nearly lost his life in the attack upon the steamer *Spark*, and the chief interest in China will be centred upon the account given of this lamentable affair. Mr. Mundy, among other facts of importance as elucidating the matter, expresses a strong opinion that although the captain was reported to have made a strong resistance he was really attacked in his own cabin, and taken completely by surprise, as Mr. Mundy saw him "only a few minutes after the commencement stretched on the floor of his cabin dead, looking so placid as to make it evident that death had been sudden and without pain." The writer follows up his narrative of the

Digitized by Google

attack by a general disquisition upon pirates in the China Seas, and justly complains that the Hoppo's gunboats are employed exclusively in matters of revenue, often to the detriment of our trade in Hong Kong, instead of being actively engaged in hunting out and putting down these pests of the China waters. The volume concludes with a description of of the Typhoon of 1874, and some sensible remarks on the present condition of foreigners in China. The writer says that the insecurity and the uncertainty of approaching events had greatly increased since his departure, and the latest accounts by telegram certainly go to prove that the apprehensions generally felt were by no means groundless.

A valuable present has been made to the Library of the India-Office by H. E. Iwakura, Chief of the Japanese Embassy which visited England a few years ago, in the form of a Chinese version of the Buddhist Scriptures. The work is so large that it is packed in seven boxes weighing about 3½ tons, and will require a room to itself. The work will offer to the student an almost inexhaustible source of original information on this interesting and important subject.

Mr. Edward Duffield Jones, M.A., late of the Consular Service in China, contributes a paper to the *Sunday Magazine* for October on "The Chinese: Their Religion and Social Condition."

Messrs. Chapman and Hall will shortly publish *The Rambles of a Globe-Trotter in Australia, Japan, China, Java, India, and Cashmere*, by Mr. E. K. Laird.

Naval and Military.

The following is a list of the vessels comprising the force stationed in China at the present moment, under the command of Vice-Admiral A. P. Ryder:—Audacious, 14, armour-plated ship, Captain P. H. Colomb (flag-ship); Charybdis, 17, Captain T. E. Smith; Modeste, 14, screw-corvette, Captain A. Buller; Thalia, 6, Captain H. B. Woolcombe; Egeria, 4, Commander R. L. Turton; Ringdove, 3, Commander U. C. Singleton; Curlew, 3, Commander E. J. Church; Lapwing, 3, Commander Sir William Wiseman, Bart.; Dwarf, 4, Commander Hon. E. S. Dawson; Hornet, 4, Commander Grosvenor Stopford; Midge, 4, Commander J. F. G. Grant; Thistle, 4, Commander Francis Stirling; Growler, 4, Commander Walter Stewart; Hart, 4, Commander T. H. Royse; Frolic, 4, Commander C. E. Buckle; Fly, 4, Commander John Bruce; Kestrel, 4, Commander Charles B. Theobald; Mosquito, 4, Lieutenant R. H. Paul; Swinger, 4, Lieutenant E. A. Bolitho; Vigilant, 2, Lieutenant H. C. D. Ryder, despatch-vessel; and the Victor Emmanuel, 2, screw line-of-battle ship, Commodore John E. Parish—in all a force of 21 ships, of 2,003 officers and men, and 112 guns.

With reference to the sentence of the Court-martial upon Brevet-Colonel Burton, the *United Service Gazette* says:—Thus closes a case which all friends and well-wishers of the gallant Royal Marine Light Infantry cannot but regret was ever brought before the public, showing, as it has done, a condition of things in the corps most hurtful to discipline, and altogether at variance with that *esprit* and gentlemanlike tone which should prevail amongst officers. The case was beset with difficulties on all sides, and every one must be glad to find that the Court has been enabled to discover a way out of them so little harmful to the officers concerned. Let us, however, hope that while the court-martial will not be without good results, the personal feeling it has engendered will now be buried.

A correspondent at Hong Kong writes under date Aug. 21:—Her Majesty's ships of war in harbour are the Egeria, Growler, Midge, Modeste, and Ringdove. Her Majesty's ship Ringdove went out on the 16th of Aug. for a cruise and quarterly gun practice, and returned to harbour on the 20th Aug. Lieut. J. F. Bedford, appointed to Her Majesty's ship Audacious for special surveying service, arrived per P. and O. steamer Surat on the 15th of Aug. Lieut. C. G. Prater, acting first lieutenant of Her Majesty's ship Victor Emmanuel, has been ordered to join Her Majesty's ship Audacious. Capt. and Brevet-Major Rowland, 80th Regiment, has two months' leave of absence from Aug. 16 to Oct. 16 to Japan, upon the recommendation of a medical board.

Colonel Stokes, C.B., R.E., has been nominated to succeed Colonel Gallwey as Director of the School of Military Engineering at Chatham. Colonel Stokes was the first member appointed by England on the International Commission for improving the Mouths of the Danube, and he held that office during the whole period of the execution of those most important works. He was afterwards a member of the Commission to Regulate the Suez Canal Dues, and is at present Commanding Royal Engineer at Chatham.

The Boxer, 4, composite screw gunboat, Lieutenant Commanding William Collins, has arrived from the Pacific station, and is now at Sheerness, where she will be paid off. She left Esquimalt harbour on January 3, and arrived at Callao on April 10. After a very long voyage she reached the Azores on September 11, and left the next day for Plymouth. She had sailed over 23,500 miles on the passage home.

The title of "Controller," at present held by the chief of the Control Department at Woolwich, Captain Gordon, will shortly be abolished and replaced by the title of "Commissary-General of Ordnance." It is also expected that General Campbell, at present known as "Director-General of Artillery and Stores," will simply be entitled "Director-General of Artillery."

A telegram reports that Chief Engineer James Dalton, Engineer W. P. Davis, and three stokers have been killed by a boiler explosion on board the sloop Dryad, now on the North American station. No particulars of the disaster have yet been received.

The gunboat Lily arrived at Malta on the 21st ult., from England, *en route* to the China station. She had some repairs made, and all defects made good, and started again on the 27th ult. for Aden.

Miscellaneous.

MACHINERY FOR CHINA.

Messrs. Thomas Shanks and Co., of Johnstone, near Glasgow, have within the last few weeks completed the construction of two large and powerful machines to the order of the Chinese Government, for the manipulation of armour plates. The first is a double shaping machine, from the same design as that lately supplied by the same firm to Her Majesty's Dockyard at Pembroke. The bed of the machine is 26 feet long, carried on four massive standards, which also form the groundwork on which to place the armour plates. Four stationary standards fixed to the bed, and four sliding on the ground standards, and fitted with adjustable screws, afford the means of setting the plate in position, and also receiving the thrust of cutting. The bed is fitted with two saddles and shaping tool bars with variable stroke up to 30 inches. The tool bars are placed on edge, and are carried in guiding brackets made to angle above or below the horizontal line 15°; these motions are all worked by worm and worm racks. The object in having the tools to angle is the chief feature in this machine, as the time required to plane angled or bevelled edge plates in an ordinary planing machine was very great, and entailed much expense. In this machine a plate can be shaped having the edge angled in either direction at the beginning of the cut; as the work progresses, the angle can be increased or decreased at pleasure, and ended with the angle the opposite to what it was begun. Having a maximum stroke of 30 inches enables the machine to shape two plates at the same time, each 15 inches thick. Both saddles are driven from the same shaft, but each is arranged with disengaging motion, so that they may be worked together or separately, or at any position on the bed desired; all the motions for disengaging and setting the saddles are worked from the front of the machine, under the control of the person in charge. This machine has been shipped by the *Braemar Castle*.

The other machine is a hydraulic armour-plate bending machine, with a capacity of 3,000 tons for bending plates up to 12 inches thick. The cylinder is composed entirely of homogeneous steel, the centre ring being left square to act as guides for the side-gripping plates which prevent the cylinder canting or tilting when indirect pressure is exerted. The top and bottom crossheads are castings of immense strength, and to ensure efficiency great attention was paid to the mixture of iron used; in this case it contained more than one-half Welsh cold blast. The columns are 12 inches diameter, and of sufficient length to admit of a plate being bent to a circle of 10 feet diameter. For raising or lowering the top crosshead and resisting the pressure the columns are arranged with nuts and jam-nuts above, while following nuts below enable the crosshead to be easily adjusted to any required height. The pumps are four in number, two large and two small; they are self-acting, so that when the large ones have brought the ram to bear on the plate they are thrown out of gear automatically, leaving the small ones to complete the pressure. In the case where plates are very thick they must be slightly heated before being put in the machine, not so much for the sake of making them easily bent, but to prevent the fibre of the iron being damaged. This machine will probably be shipped on board the *Glengyle*.

THE PRODUCE OF THE FAR EAST.

In a series of papers entitled "Under the Hammer," a writer in the current part of *All the Year Round* furnishes a mass of information relating to the valuable produce which is constantly passing through the Commercial Sale-Rooms in Mincing-lane. We extract a few particulars respecting some of the drugs which come to this country from the Far East. Of musk the writer says:—"This drug arrives in its natural condition in small pouches, packed in tins or caddies, and often horribly adulterated. Downright fictitious musk is also sent to this country, the emptied pouches being refilled with abominable trash concocted for purposes of fraud by the 'heathen Chinee' and other child-like Orientals. A great quantity of genuine musk, however, comes from Tonquin, from Central Asia, and from the Indian Archipelago." Rhubarb has been grown from the earliest times in the western provinces of China, and has got the names of Turkey, Russian, and China rhubarb from the routes by which it reached our markets. "From the time of Marco Polo rhubarb found its way over the barren steppes of Central Asia, by Yarkand, Kashgar, and Turkestan to the Caspian and Black Seas, or by a southern deflection from that route by Bokhara and Afghanistan," and thence to Asia Minor and Alexandria. For this reason this got named Turkey rhubarb. "In 1653 China permitted Russia to trade on her frontiers, and the line of traffic was thenceforth diverted . . . taking its way from Tangut (now Kansuh) across the steppes of the high Gobi, and through Siberia to Moscow." The opening of the Chinese ports to foreign trade by the last Treaty of course soon destroyed Russia's previously large share of the rhubarb trade. From Cochin China and Siam gamboge is sent to "the Lane;" it is exhibited for sale in sticks, "showing the mark of the inside of the bamboo into which the gum, when liquid, was allowed to run."

Chinese Oil-tree.—In a paper addressed to the French Academy of Sciences, M. Cloetz treats of this tree, "Elæococca Vernicia," or "Tong-yeon" in Chinese. It belongs to the family of Euphorbiaccæ; its fruit is a nut containing several shells, in each of which there is a large seed covered with thick teguments. Under a strong pressure this seed will yield about 35 per cent. of its weight of a thick, colourless oil, having no smell and scarcely any taste. Its specific gravity is 0·9362; exposed to a cold of 18 degrees it will thicken, but not crystallise. By digestion with ether, the pounded seed will give about 41 per cent. of an oily liquid, differing but little from the other; but if, instead of employing ether as a dissolvent, we use purified sulphuret of carbon, the fatty matter, obtained after evaporating the sulphuret at 100 degrees, becomes solid in cooling, forming a number of pearls which under the microscope present a manifest crystalline structure; the mass melts at

Digitized by Google

32 deg. Centig. (89 Fahr.). M. Cloetz has ascertained that heat does not alone produce this difference between the two oils extracted, one by pressure, the other by the sulphuret. Another curious property of the oil extracted by the press is this, that it will quickly become solid under the influence of light alone, in the absence of air. It was interesting to ascertain whether this was a property belonging to white light only or whether the colours of the spectrum might perform the same office. M. Cloetz accordingly exposed the oil in closed tubes to different sights. At the end of the third day he found it had become solid under the white and the violet rays, but not under the yellow ones, where it was still liquid ten days after. Oil of Elæococca is the most drying one known.

A TELEGRAM received at Lloyd's states that a Siamese ship, the *Queen of England*, which left Hong Kong for Bangkok on the 8th of August, has since put back, the first mate having been murdered, and the captain wounded by Malay seamen.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, SEPT. 29.

We have had a stormy opening of the Session, and there is a general feeling in Parliament hostile towards the Cabinet. Singularly enough the attack in *optima forma* was made by the Lords, a fact perhaps unprecedented in our Parliamentary history. The question, about which the Cabinet was censured was a local one, and may be explained in a few words. For about thirty years there has been talk of a junction to be made at Rotterdam between the Dutch-Rhenish and the Dutch Railway. The managers of the first named company were averse to fulfilling their obligation by establishing the junction, notwithstanding that a capital of one million had been paid, as a guarantee that it should be done. Suddenly we hear that the Ministers of Finance and the Interior had concluded a contract releasing the Dutch Railway Company from its obligation, and that this sum of one million would be paid back. A storm of indignation thereupon arose in Rotterdam, and both the Ministers were attacked most vehemenntly. It so happened that the Members of the First Chamber met before those of the Second Chamber, and Mr. Duymaer van Twist made himself the mouthpiece of the Opposition to censure the Ministers. The two days' debate ended last Saturday with a motion, adopted by 23 against 12 votes, stating that the Ministers had not acted in a way to promote the general interest of the country. Before the vote Mr. Van Twist, however, most positively stated that his action was not designed to serve any political motive. When the blow was given a sort of general consternation prevailed, because it was not quite clear what ought to be done. In the meanwhile the Address to the Speech from the Throne, which was voted in a hurry, was presented to his Majesty by a Commission appointed for this purpose. This task was by no means a pleasant one. It was evident that the King was offended, as he had never before answered so coolly and so short. What he said may be freely translated: "Thank you, and go home." A few days we lived in expectation of important events which might occur; but in yesterday's sitting of the Second Chamber Mr. Heemskerk stated that he and his colleagues had asked for their dismissal, but that the King had most positively refused to grant it, and upon that decision the Ministers found themselves called upon to remain in office. *Jacta est alea.*

It was in some degree cynical on the part of the Minister of Finance that, immediately after the hostile vote of the First Chamber, he went to the Lower House in order to deliver his "Budget Speech," of which I give you the outlines. Mr. Van der Heim began with stating that the accounts for previous years had been completely balanced. The expenditure for 1876 is estimated at about 114,000,000 florins, or 2,300,000 florins more than for the present year. This comprises 7,000,000 florins for railways and 6,000,000 florins for improvement of our national defences. The revenue is estimated at about 109,000,000 florins, and the Minister proposed to cover the deficit as usual by an issue of treasury notes to the extent of five millions. He further explained, however, that the issue of these notes would not be required at present, nor would any extraordinary resources be necessary for the continuation of the works connected with national defence. On account of future financial needs a revision of the system of taxation would be necessary, and a scheme had been prepared by him to that effect. This state of affairs is, it happily cannot be denied, most satisfactory. In the last few years a large sum has been expended for public works, but we have not had to borrow a penny, but on the contrary, have added a large amount to our redemption fund. For this prosperity we have to thank the poor Javanese, for without the "squeezing system" our financial position would be anything but rose-coloured. Happy the Minister of Finance who is backed by a culture system! It is quite true what the *Vaderland* says:—The figures of the Budget are tragically eloquent; it would be impossible to balance the national account without the aid of the Minister of the Colonial Department.

The Address in reply to the Speech from the Throne was also approved by the Second Chamber after a very short discussion; no political debate took place. Mr. de Casembroot proposed to insert a paragraph to express our gratitude to our brave East India Army and Navy, but several members protested. The Royal Speech said only that the army were fully equal to their task, and it was of no use to be *plus royaliste que le Roi.* The Minister interpreted these phrases of the Speech in the sense of the amendment of Mr. de Casembroot. He, however, acknowledged that all was not *pour le mieux dans le meilleur des mondes possible*, and he promised improvements and reinforcements. The matter then dropped. A still worse fate befel the amendment of Mr. Teding van Berkhout, to insert in the Address that the war with Atchin should be brought to an end at once instead of being pushed on to a conclusion, as was proposed by the Commission. This amendment was rejected by a large majority. From the further debate I only find that not one important word was said about the Education question; and that Mr. Godefroi induced the Government to do something in behalf of Surinam, because he feared for the *deliberante Senatu periit Saguntum.* To-day the East India Budget was examined in the sections, the reporters being Messrs. Van Kerkwyk, Mirandolle, Mackay, Insinger, and Schimmelpenninck.

You will remember that the pamphlet of Mr. de Rochemont, "Loudon and Atjeh," was severely criticised in the Chamber by Messrs. Van de Putte and Fabius. The author has forwarded an address to the Lower House asking the President to make the said members responsible for the expressions used by them, when they gave their opinion upon his book. No notice, however, was taken of this address, especially because no members can be made answerable for remarks made in the Chamber (vide Art. 92 of the Constitution).

A few weeks ago I told you that some people in Belgium intended to proceed against our Government for the repayment of a sum of sixty millions, being the amount of the inheritance of a certain J. Dubois, who died in the last century. The *Amsterdamsche Correspondent* asked for some further information, and its correspondent now says:—On the 28th of June, 1875, a co-operative association was formed between fifty-three persons, in order to try to examine if there are grounds for claiming the inheritance of a certain Jacques Dubois, born at Vedrin (province of Namur), and who died at Batavia in 1704. New members will be enrolled till the number of 150 has been reached. The contribution is ten francs a month. The manager of the association is a certain Mr. Dubois, living at Chaussée de Waire, near Brussels.

There is still a large influx of Belgians at Harderwyk, recruits for the East India Army. As it has frequently happened that these persons are provided with false documents about their age, &c., our Government has ordered a strict investigation, and in consequence a large number of these volunteers are sent back again to their native country. Some days ago a kidnapper was arrested at Harderwyk, and he was well provided with false documents for this scandalous purpose. You will remember that the German Government arrested at Darmstadt a certain Major Steck, who formerly belonged to our East Indian Army. He was accused of promoting the secret enrolment of young Germans for our depôt at Harderwyk. He, however, has been set at liberty because there was no proof to support the accusations. On the 16th October a detachment of 240 soldiers will be despatched from Harderwyk per steamer *Celebes*, and on the 22nd another of 552 soldiers per *Prinses Amalia.*

For several years Dr. Hoffmann has been busy preparing for the publication of a Japanese-Dutch-English Dictionary. For some months, however, the author has been ill, and it is with his approbation that the Government has charged Mr. Serrurier to complete the work for a remuneration of f.5,000. The dictionary is to be ready within three years. The Government intends to grant a subsidy of f.17,700 to Dr. Blecker in order to enable him to finish his "Atlas Ichthyologique des Indes Orientales Meêr laudaises."

The province of Limburg is literally inundated by German Jesuits, who are compelled to leave their country. Several beautiful and large country seats have been bought by them. It is to be hoped that these religious persons will not involve us in difficulties with Germany.

Fifteen officers—and amongst them Mr. Reeringh, 1st lieut., Messrs. Berends and Wymans, 2nd lieuts.—are ordered for two years' service in Java.

Some members of the Red Cross will give a dinner to Mr. Gunther von Bultzingslowen who will arrive here in a few days. He has distinguished himself by his kind treatment of the wounded and sick soldiers in Atchin.

The leading Liberal papers, the *Nieuwe Rotterdamsche Courant* and the *Handelsblad*, are very angry because the editor of the London *Times* has presumed to meddle with our affairs in Atchin. Probably you will reproduce the article, and your readers in the Far East will be able to judge if it is written by some one who understands the question. According to these papers we have every reason to be content with our success. The enemy is not yet subdued, but we have succeeded in maintaining our positions. I should trespass too much on your valuable space by reproducing the whole of the remarks of these thick-and-thin supporters of the great blunder with which the names of Messrs. Van de Putte and Loudon are associated.

The same dullness as during the last weeks still prevails at the Bourse and the Money Market. I am glad to state that the shares of the Java Steamship Company have advanced 8 per cent.

The King has approved the appointment of Mr T. H. Pels as Vice-Consul for the United States at Batavia.

PRODUCE MARKETS.

Except for public auctions the market remains very quiet. Holders in general keep firm, and seem to be convinced that the small stock must lead to an improvement of business.

COFFEE.—Since the public sale of the Trading Company no transactions of any importance took place. The article seems to be in a very healthy condition.

TEA.—With a very limited business, the trade is expecting the result of the forthcoming auctions.

RICE very quiet. There was no demand at all for Java cleaned. The stock of Japan sorts is exhausted. The quotations—rather nominal—are unaltered.

SPICES.—Mace met with some demand, there being eager buyers for inferior quality. Nutmegs dull. Cloves without transactions. Pepper calm. Nutmegs, No. 1, 185c. to 190c.; No. 2, 170c. to 175c. Mace, D, 175c. to 176c.; E, 170c. to 173c. Black Pepper, 27c. to 27½c.; White Pepper, 45c. to 50c. Cloves, 105c. to 106c.

JAVA TOBACCO.—Important lots were sold by private tender. In general satisfying prices were paid for the sundry headmarks. The stock included, on the 18th, 3,564 bales Sumatra and 52,952 bales Java.

COTTON.—The market is dull because there is no demand for consumption or export.

RATTANS.—The Trading Company will offer on the 13th 97,700 bales.

JAVA INDIGO.—Some small lots found buyers at unaltered prices.

BANCA TIN.—The rather nominal quotation is f.53, Billiton f.50.

ARRACK.—70 cases Batavia ex-Nieuwe Waterweg changed hands.

THE PROPOSED WOOSUNG TRAMWAY.

The *North China Herald* to hand by the mail last arrived contains an interesting article upon the scheme which has for some time been under contemplation, of making a tram way between Shanghai and Woosung. The company for this purpose was, as our readers will recollect, formed some time since in England, and a considerable amount of the requisite capital has been already subscribed. It appears, however, that Shanghai is asked to contribute the further sum of Tls. 15,000, and our China contemporary takes the opportunity, while advocating the co-operation of the Model Settlement, to give a few facts which go far towards showing that the enterprise is likely to prove of a paying character. The total working cost is estimated at £20 a day, or the equivalent of about 86,000 cash; and it appears that the passage-boats which ply in large numbers between Shanghai and Woosung obtain a fee of 40 cash a-head from their passengers. It is justly pointed out that lengthened experience of railways shows that the traffic is always largely increased by the facilities they introduce. This view has of late received a striking illustration in the extent to which the district and metropolitan railway trains have increased the number of travellers in and around London; and there is no reason why similar effects should not be produced in China. As a means of testing the possibility of introducing the railway into China, the scheme is one which it is well worth the while of the mercantile community in Shanghai to support; and the amount of money which they are called upon to risk would be well spent upon the experiment. There may possibly be at first some difficulties in regard to the question of the right to build a tramway or railway of the kind in China, and some attempt at raising trouble on the part of the passage-boat owners, whose business will at first sight appear likely to suffer, must be looked for; but the land having been actually purchased by foreigners, it may be hoped that a satisfactory settlement of any question that may arise will be arrived at. It unfortunately cannot be overlooked that the construction of a railway in a country where such enterprises have not yet been introduced is a matter in which the authorities have a right to be heard, and it will not, therefore, do to rely implicitly upon the simple possession of the ground. We mention this, we need scarcely say, not with any idea of throwing cold water upon an enterprise which all who are interested in the progress of foreign commerce in China would gladly see successful, but simply to enable those who are charged with the conduct of the concern to be upon their guard in time; as although the tramway might be set on foot without the question being raised, experience of the Chinese points only too clearly to the probability of the opposite being the case. "Forewarned is forearmed" in all places, and more especially in China, where it is necessary always to be upon the alert against the action of the officials. If the local authorities, however, can be induced to support the scheme, the likelihood is that it would never be mentioned at Peking, which is the great *vis inertiæ* in regard to every attempt at the introduction of modern improvements; and it would therefore be wise to obtain their goodwill by every legitimate means. However this may turn out to be, the completion of even so small a line of iron road in China is an event upon which all must look with interest; and no doubt, if the present scheme succeed, it will do much towards facilitating the introduction of railways more generally into the Celestial Empire. At present the Chinese—both officials and others—are in total ignorance of what railways are, and naturally imagine that their introduction will have a serious political bearing; whereas, did they really know the nature of the enterprise, and found by experience that they were (as is likely to be the case) popular with the masses, they might be far less disposed to oppose them than they are likely to be without such knowledge. There is one element which is well worthy of consideration as a means of making the Chinese more friendly towards railway schemes, which might perhaps be attached to them, namely, the possibility of their being made a source of revenue. In a country where everything is taxed, as in China, there could be no reason why some form of impost should not be placed upon railways, and it is probable that a good revenue might be derived from this source. This fact would prove a more powerful argument with the mandarins than anything which could be advanced upon the grounds of political economy or general statesmanship; and there can be no reason why it should not be suggested to them. There is no doubt that a great deal of the opposition which we have met with from the Chinese officials has resulted from our asking to be allowed to do things for the permission to do which natives would be willing to pay, without offering to do so in any form. We cannot, of course, condescend to a system of bribery such as is universally in force in China; but there is no reason why we should not, where the circumstances admit of it, agree to the payment of reasonable taxes upon the enterprise for which we desire to obtain official sanction. There can be little doubt that the prospect of obtaining a substantial revenue from foreign goods had great influence with the Chinese in granting the treaty privileges already conceded; and it is certain, did they see similar advantage, they would be much more willing than they have been hitherto to grant concessions for railways and other foreign improvements.

THE HONG KONG AND SHANGHAI BANK.

By the last English mail we received the report of the Hong Kong and Shanghai Banking Corporation, passed at the meeting of the 18th August last, of which a telegraphic summary was published at that time. A perusal of the details, as set forth in it, shows that the affairs have been thoroughly sifted, and affords good ground for hope that the measures which have been adopted will be sufficient to make the temporary lull in the prosperity of the institution of short duration. It is evident that no pains have been spared thoroughly to investigate the accounts, to probe matters to the bottom, and to make ample provision for future contingencies. Mr. David McLean was well selected as Inspector, as there is no one who, from his long business experience, is more capable of making a thorough investigation, or who, from his reputation, could better command the confidence of the shareholders. He has evidently been determined to rest content with no half measures, and, in order to place matters before the shareholders in such a manner as to avoid the possibility of further disappointment, has taken all doubtful accounts as eventually turning out bad. Subsequent improvement in the position of the outstanding accounts goes to show that probably one-half the amount thus put down will cover the loss upon them, so that to this extent the outturn will be better than the estimate. It is to be regretted that at best the position of affairs is disappointing to shareholders, many of whom look to their dividends as the sole source of income, but at the same time it is satisfactory that decided action has been taken to meet the state of affairs which has for some time past caused anxiety; not, it is true, as to the stability, but certainly as to the prosperity, of one of the most important commercial institutions in China. The task of righting matters was not an easy one, and any hesitation in placing the worst before the shareholders would have been fatal to its success, and would, in fact, have been only a repetition of the mistake originally made. Fortunately the requisite moral courage has been displayed, and we

Digitized by Google

make little doubt that the shareholders will ere long have reason to congratulate themselves upon the firm position which has been adopted, and will find in the increased standing, credit, and prosperity of the Bank, ample compensation for the temporary inconvenience in the absence of the dividends which, until recently, were so regularly paid; and which, so soon as the existing drawbacks have been met, will, doubtless, be again forthcoming, not, it is true, upon the large scale formerly in force, but still upon one which will be a fair and reliable return for the capital invested.

THE PENDING NEGOTIATIONS IN CHINA.

THE latest telegrams from China with reference to the negotiations being carried on by Mr. WADE for the settlement of the difficulty consequent upon the murder of Mr. MARGARY confirm the view which we expressed in our last as to the probable cause of the conditions originally telegraphed as assented to having been departed from. It is evident that the Chinese have been resorting to their old plan of endeavouring to evade by *finesse* the terms agreed upon, and that Mr. WADE has not been satisfied that they will take any effectual steps either for the punishment of the offenders or for notifying in the *Peking Gazette* the *status* and rights of foreigners in the country—two measures imperatively demanded for our future security in the Empire. It is certain that the matter is looked upon in a grave light in important quarters, official and other, and that trifling and evasion will not be accepted in the present instance. Public opinion is strongly roused upon the subject, as may be perceived by the earnest manner in which it has been discussed by all the leading papers; and, indeed, the affair is sufficiently grave to demand the most earnest attention, and the adoption of a firm attitude. The victim of the attack was one of our own Consular officials, engaged upon a peaceful expedition, under the protection of the Chinese Government, and consequently there is every call, from our own point of view, to see justice done in the matter; while these considerations are of still more significance when regarded from a Chinese standpoint, and in connection with the extreme importance attached by the Chinese to official position. If it be once believed generally in China that a British Consular officer can be murdered with comparative impunity, it is clear that no British subject will be safe, and the matter is therefore one which cannot possibly be allowed to pass. We have hitherto abstained from laying stress upon the suggested culpability of the Chinese local officials themselves; but if we find the Peking authorities systematically evading any effective investigation of the matter, it is impossible to ignore the degree to which this is suggestive, not only of the culpability of the local officials, but also of the complicity of the Peking authorities themselves.

IN our last issue we published the sentence of the Court-martial on Brevet-Col. BURTON, of the Royal Marines, by which, being found to have made some statements reflecting seriously on a brother officer, he was, although he believed the statements on reasonable grounds to be true at the time of their utterance, found guilty of conduct prejudicial to good order and military discipline, and sentenced to lose four years' seniority, which will have the effect of shutting him out of all hope of further promotion. While we admit that Colonel BURTON'S conduct was ill-advised and possibly hasty, we cannot but consider the sentence by far too severe. Had the statements made been completely without excuse the case would be different; but although it appears they were untrue, there were reasonable grounds for believing them, and this circumstance materially diminishes the nature of the offence. A reprimand would probably have been quite sufficient to meet the exigencies of military discipline, and we are certainly surprised to find this exceptionally heavy sentence confirmed by the War-office and the Commander-in-Chief.

IN the event of hostilities breaking out with China the choice of the Admiral in command of the fleet will be a matter of great importance, and it is not improbable that Admiral Sir HENRY KEPPEL, who has already won so many laurels in the Far East, might be selected. No better person could possibly be found, as there is no flag officer who has had the same experience in the China Seas, or who, judging from the way he has always been received, is likely to work better with the communities or with the Consular and Diplomatic officials. The name of Admiral KEPPEL would of itself have great moral effect with the Chinese. We understand that there is no immediate intention of augmenting the China squadron, as has been rumoured. Should an increase of naval force be required at any given point, it would be easy to meet such a demand temporarily by withdrawing the ships usually employed on the Straits division or in Japanese waters.

THE DIFFICULTY WITH CHINA.

(THE TIMES.)

In calling for the punishment of the Yunnan officials our Minister has doubtless appealed to the sixteenth article of the Tientsin Treaty, which promises that if any Chinese subject shall wrong Englishmen by a criminal act he shall be punished by the Chinese authorities according to the law of China. It is easy to forecast the reply of the Viceroy. He cannot have boldly refused to fulfil that pledge; Chinese Governors seldom frankly refuse to do anything. But he may have urged that the guilty persons must be found before they can be punished, and that he cannot lay his hands on the criminals. He may deny that the Yunnan officials had anything to do with the murder of our countryman; and Chinese diplomacy must have forgotten its craft if he has not used the maxims of our own jurisprudence to show that the innocence of the Yunnan officials must be assumed until their guilt shall be proved. If Mr. Wade has really insisted that they shall be punished, he must possess evidence which has not yet reached this country. It is no doubt emphatically said that they were at least consenting parties to the murder of Mr. Margary, if, indeed, they did not actually let loose the assassins on him; and the Mandarin class has instigated so many outrages against our countrymen that such a report is, unhappily, but too credible. Still, so far as we yet know, it is only a report, and, unless Mr. Wade has found specific proofs of their guilt, he is not likely to have insisted that they shall be punished without trial. It is the more necessary to be cautious in such a matter because, in dealing with the Chinese Government, we have sometimes taken shorter cuts to success than those sanctioned by Western codes of morality. We have occasionally seemed to assume that all Chinese officials are liars and knaves on whom it would be folly to waste the nicer refinements of courtesy and the moral law. Their Ministers are not above the labour of studying those Parliamentary debates which are often pitiless indictments of ourselves; and Commissioner Yeh is said to have been extremely gratified by the stern condemnation with which some of our chief statesmen and jurists visited the attempt to treat the *Arrow* as an English ship. If we must fight, let it be for reasons of clear justice and of pressing necessity. Happily, Mr. Wade has given us no cause to doubt his prudence or his power of self-restraint. He can, as our Correspondent in China shows, maintain his own dignity, but he is not the kind of Minister who, when invested with authority in the distant East, is inclined to fight for trifles, or to be warlike because conceited Mandarins display the insolence of children. The probability is that he has made no unconditional demand for the punishment of the Yunnan officials, but has only insisted that the Government shall chastise the guilty, and that he finds it evading this duty. There can be little doubt that it will shield the murderers if it can, and that its preparations to find them out have been little better than a series of pretexts. If Mr. Wade sees that the Viceroy is trifling with him, his duty is, of course, as manifest as it is melancholy. At all hazards, we must insist that reparation shall be made for the murder of our countryman, because if one such outrage should go unpunished, others of the same kind would inevitably follow. Firmness is as necessary in our dealings with the Chinese as courtesy and justice.

The demand that the Treaty rights of this country shall be published in the *Peking Gazette* may be still more unwelcome to the Chinese Government than the call for the punishment of the Yunnan murderers. It was only after a disastrous war that the Emperor consented, in the eighth article of the Treaty of 1860, to command his high authorities to publish the compact for general information. To print the terms of it in the official *Gazette* was to proclaim throughout the Empire that "the barbarians" had been absolutely victorious. An end would thus have been put to much of the boasting which has hitherto been the essence of Chinese proclamations. It is said that the fulfilment of the pledge was evaded by the publication of the Treaty only in such copies of the *Peking Gazette* as would reach the hands of Englishmen, and that it was omitted in those numbers intended for general circulation. At least, most of the Chinese people are absolutely ignorant of the privileges which we have exacted by war. The officials know, for example, that the ninth article of the Treaty of Tientsin gives our countrymen a right to travel for pleasure or business into all parts of the interior so long as they possess passports; but the great mass of the natives still regard such visitors as intruders, and this idea is fostered by the official and the literary class. The only way to make our rights clear is to have them properly advertised in the official journal, because that print is regarded with absolute trust. Nothing, moreover, would so tend to give the people a true idea of English power as the text of a Treaty in which China is revealed as a suppliant for peace. Mr. Wade, who has a profound knowledge of the Chinese character, does well to insist on the literal fulfilment of a pledge which was one of the most valuable parts of the Treaty. If nothing but threats will induce the Chinese Government to bring the murderers of Mr. Margary to light and punish them, threats must be used. If threats should fail, war must follow. These general principles

Digitized by Google

of action will be admitted by all who admit that we have any right to be in China, and there is no danger that they will be forgotten. But it is equally necessary that they should not be applied if the shadow of a doubt rests on the justice of our case, or until all the resources of diplomacy have been exhausted. Nor need the hope of peace be dismissed. The presence of Admiral Ryder with four ships of war at Chefoo, and the knowledge that our Squadron is to be strengthened, will powerfully help Mr. Wade. The Chinese authorities may have been buying gunboats, importing Armstrong guns, and building new forts. They may think that they would not fare so badly in a contest with this country as they did before they possessed European arms; but they also know the power of Western States so well that, on seeing the futility of evasion, they may yield rather than fight. At least, we cannot yet resign that hope. Meanwhile our duty is to ask for nothing but what is essentially just, and to temper firmness with courtesy.

(MORNING POST.)

That Mr. Wade should have been obliged to press for satisfaction on account of the murder of Mr. Margary, and if the fulfilment of the obligations agreed to by the Chinese Government at Tientsin is indicative of an unfriendly spirit on the part of that Government towards England, that may be productive of infinite mischief. England would have been quite satisfied with a full investigation of the occurrences attending the murder of Mr. Margary. If such an investigation showed that the Chinese Government were not to blame, either directly or indirectly, that would have been satisfactory to all concerned; and if, on the contrary, the officials of the Chinese Government were to blame in the matter, an acknowledgment of the fact and some ordinary reparation would have disposed of the question. But in truth the present action of the Chinese Government only tends to confirm the impression previously forced upon us that the Chinese Government is the reverse of anxious to keep on amicable terms with this country. The levying of the duties at the Treaty ports in contravention of the arrangements entered into and the tone and bearing of the Government officials towards our representative boded no good. But, above all, the military preparations of the Chinese were calculated to raise feelings of distrust as to the future. It may be remembered that a year ago we pointed out that the Chinese Government had been procuring torpedo apparatus in this country, and that it was stated without much reserve that when the Chinese Government considered that their harbours and rivers were secure from attack they would break off relations with England and seek to drive us out of the country. There can be no question that the Chinese have entertained the idea that their former want of success in fighting with us was due to defective arrangements that could be rectified. They had seen what the disciplined Chinese under Gordon had been able to effect, and they had felt what arms of precision could do. If Prince Kung had remained in power possibly these ideas might have been kept within bounds, but with the change of Ministers the reactionary party became dominant, and insolence and hostility to foreigners and military preparation became the leading characteristics of the policy of the Chinese Government. All this indicated that a serious disagreement between England and China might at any time occur; and even if the present complication should blow over, there will remain the impression that sooner or later there must be a rupture of the relations subsisting between the countries.

But grave and threatening as the appearance of the Chinese question is at present, it would be wrong to jump to the conclusion that there must be hostile action between the two countries. The Chinese Government may yet agree to the demands of our Minister. That they have put off doing so to a period so late as to raise serious apprehensions as to what is to happen is true, but before the end of this month they may yield, and so obviate any further difficulty. But even if the Chinese Government should fail to comply with our demands, and that in consequence our Minister should withdraw from Peking, it by no means follows that war must be proclaimed at once. Negotiations may be resumed through the intervention of a mutually friendly Power, or even without such intervention. The Chinese Government, satisfied that we shall insist on having the murder of a British subject investigated and atoned for, and that, now at all events, they are not able to cope in arms with us, might agree to our demands in time to prevent hostilities. It is clear, however, that much will depend on the attitude and resolutions of the Chinese Government at the present juncture, and that the next news from China must be looked for with great anxiety.

(DAILY NEWS.)

Ever since Prince Kung's influence ceased to be paramount, the persons who have succeeded him in authority have been testing the extent of British patience under a crafty system of evasion and delay which has been made practically to shield iniquitous outrages on the part of their subordinates. To avoid such direct insult to the British Minister as would precipitate a quarrel, and at the same time to exhibit our countrymen to the population as the helpless objects of contempt, has been the practice of Li Hung Chung and his colleagues. The pressure which has been more recently exerted upon the Chinese Government, especially in connection with the satisfaction demanded for the murder of Mr. Margary, has led to some concessions, the value of which remains to be proved. Months may elapse before we know whether they are nominal and illusory, a mere device to gain time, or are intended to show the real regret of the Government of China for conduct on the part of its inferior agents of which it entirely disapproves. In the meantime it is no secret that our Minister at Peking has not found in his official experience reasons for feeling that confidence in the professions of the Chinese Government which is the best security for peace, and this reinforcement of the British squadron is one of the consequences. The Government and people of this country have no desire to leave the path of peaceful negotiation; but at the same time it must be made plain, not only to Li Hung Chang and his associates, but to every Nabob, Ameer, and Khan by whom our movements are watched throughout the East, that we treat in the plenitude of our power. Any mistake on this point would be followed by consequences onerous indeed to this nation, but disastrous to those who were betrayed into the belief that the concessions we made in friendship were the payment by which weakness buys off opposition. While, however, we welcome every indication of an amicable settlement of our differences between China, we are bound not to overlook the many signs which present themselves of a disposition on the part of the Chinese and their Government to throw off the obligations they have contracted to us, and to do so even at the risk of war. For many months every mail from further Asia has brought reports of manifestations of hostility of the Chinese to foreigners. Englishmen, Germans, and Americans have been insulted and maltreated in the streets of Peking, where neither social position nor official rank has protected them from attack. Were there reasons for believing that these occurrences were as contrary to the spirit and feeling as they must be to the interests of the Chinese Government, they might be left to be dealt with in the way of ordinary representation on the spot. But they coincide, to say the least, with a revival of the old exclusive and ultra-national feeling which has before now led to serious wars, and which tends to renew them. It is too plain that while the lessons of 1860 have been forgotten, the commercial intercourse which has since grown up between China and Europe has not exerted the influence which ordinarily accompanies relations mutually advantageous.

The experience of a quarter of a century dictates the policy to be pursued in dealing with a Government like that of China, which accepts obligations to free itself from difficulty, and then observes or neglects them according to its convenience or even its humour. In our past dealings with the Chinese, theoretical questions have been raised as to the right of one nation to require another to enter into intercourse with it. With such questions we have no longer to occupy ourselves. China is bound to us by Treaty engagements which we must require its Government to fulfil. There is nothing gained by acquiescing in such a policy of encroachment as is daily practised upon our merchants at the Treaty ports, and which aims at the destruction of the trade of foreigners. The Imperial Government carefully conceals from its subjects the legal status of foreigners as fixed by treaty, by declining to publish Treaties in the *Peking Gazette*. The Chinese Government may speculate on the chances of our resignation to the loss of the advantages which are ours by Treaty right, or it may be resolved to persevere in its present practices until we are driven to assert our just demands by war. It is more likely that it simply obeys an instinct which will urge it on until it encounters an opposition which it is afraid to face. Many a Government has done so, and has afterwards been surprised and alarmed to find that it has advanced too far to recede, and is committed to the issue of an armed collision. Our own Government may be trusted not to leave that of China in any uncertainty as to its intentions, and it will be the fault of the Chinese if the differences between them are not settled by negotiation. But we hope there will be no attempts to patch up the present disagreement, but that the straightforward course will be followed of requiring of the Chinese Government the full and fair fulfilment everywhere of all its engagements. To accept anything short of this will be to make war and probably to increase its cost. For our own sake we have no need to shrink from a war with China, but there is no way by which hostilities are so likely to be averted as by the assertion of our demands, accompanied by the frankest announcement of our intention to procure their fulfilment, and supported by the display of an adequate belligerent force. Our peaceable disposition will be abundantly evinced by the moderation of our requirements; and any weakness in sustaining them will only tempt men like the present rulers of China to advance further in the path which leads surely to war.

(STANDARD.)

We are as yet without authoritative information as to the points in dispute between Mr. Wade and the Chinese authorities, but the report that the latter are trying to evade the performance of the conditions agreed to in the first instance is only too probable. The long delay and the innumerable difficulties which we have had to encounter in bringing our complaints to the notice of the Chinese Government, especially in regard to the Manwyne outrage, will have prepared all those who have had experience of Chinese diplomacy to believe that it is the deliberate intention of those who are in power at Peking to refuse all redress, whether they have made up their minds to a war with England or whether they are only trying to wear out our patience in the usual Chinese fashion, relying upon the chapter of accidents to rescue them from the unpleasant duty of giving us satisfaction. Up to the present time the process of the negotiation has taken a course ominously resembling all other negotiations which we have ever had with the Chinese Government, all of which have ended in war. The first step on the part of the Chinese Government was to delay the presentation of our case. By all those minute arts of diplomacy in which the Chinese are such consummate experts we have been prevented from having access to the highest authorities. To the persistent efforts of the British agent to obtain satisfaction for the Manwyne outrage have been opposed all those resources which the Chinese know so well how to employ when a barbarian demand is to be evaded. After having exhausted all possible means of postponing the consideration of the case the authorities were at length induced to promise that an official of competent rank should be sent to Yunnan to inquire into the matter. What happened next was what happens always in the process of Chinese negotiations. Compelled by the persistency of Mr. Wade to come to some terms, the pretence of a local investigation seems to have been abandoned. Either it was thought not worth while to make any inquiries, or the authorities were but too well acquainted with all the circumstances of the outrage from the beginning. The next step was to agree to a treaty, which, in the last resource, is a pass to which it is not difficult to bring a Chinese Government, seeing that it enters upon treaties absolutely unprejudiced by any foregone intention of fulfilling them. To sign a treaty, as we know by experience, is not the same thing in China as to ensure its fulfilment. Both before and during the last war we signed several treaties at the ports which were systematically repudiated at the capital. That is, in fact, the main difficulty in dealing with the Chinese, arising out of the entire absence, in their diplomacy, of any idea that engagements with the foreigner are binding.

Digitized by Google

The history of the past is full of precedents proving the utter hopelessness of obtaining any agreement with the Chinese which they will keep any further than they are compelled to its observance. Next to the difficulty of obtaining any agreement is the difficulty of enforcing it. For China is like one of those huge polypi common in her seas, which may be maimed in some members without any injury to the vital part, and which are able to shed as many of their limbs as it is inconvenient to keep attached to the main body.

Our latest news is that Mr. Wade has determined to leave Peking on the 13th October, and if by that time some satisfactory arrangement is not arrived at with the Chinese Government there is, of course, but one possible issue to the business. To provide for such contingencies as it is the duty of every prudent nation having to deal with China to anticipate, the British naval force in the Chinese seas is to be immediately reinforced. Let us hope that it will not be necessary for our Government to take any step beyond this in the assertion of its just and moderate demands; but it is only right that, with our experience of the past, and our knowledge of the new ambitions which have begun to stir the Chinese national mind, and of which Li Hung Chung is the declared representative, we should be prepared for some serious measures. It is not possible for England, however anxious she may be for peace, and however interested in its maintenance, to go back one jot from the terms which she has demanded from the Chinese Government. Either it is a civilised Government or it is not. In the former case, it cannot refuse to do us the justice we seek, without making itself liable to the usual penalty. In the latter case it is our duty, on behalf of civilisation, to teach it one more lesson of the danger of outraging the ordinary laws of humanity and international duty.

(DAILY TELEGRAPH.)

The reparation due for the treacherous assassination committed by the Yunnan mandarins is neither politically nor socially easy for the Government. Politically they are glad to have the trade of the Empire shut out from their Western frontiers, and in the literary and official circles of China we are distinctly informed that the murder of Mr. Margary is looked upon as an act of courage and patriotic devotion worthy of reward. Socially, therefore, it is as dangerous as it is unpleasant for the Peking authorities to punish, by public act and notification, the "brave champions of the border;" and if they could persuade themselves to send a commission, and banish or execute some innocent or subordinate person or persons, they would only, under severe pressure, admit any notice thereof in the *Official Gazette*. Such is the position of affairs; and the prospect is darkened by the reflection that all Asiatics, from Calcutta to Korea, also understand it perfectly well, and are asking themselves whether we shall finally submit to have British blood spilt without expiation. They watch closely the progress of these negotiations in Burmah and at Manwyne, where the Chinese garrison has been strengthened, and the chief assassin of our countryman is still in high command and favour. They are equally alert in Kashgar, the Mussulman kingdom upon which, sympathising as it did with the Panthays, Russia is closing in on one side, and China on the other. They discuss the matter all over India and along the shores of the Bay of Bengal, and hence, for many solid reasons, we must have ample, open, and prompt reparation, or take steps more serious than the mere withdrawal of an Ambassador. There is, we fear, reason to believe that the want of promptitude and decisive language has already cost us the present uncomfortable situation. Alike in Burmah and in China, we have allowed ourselves to be put off with words and ceremonials, when the right policy would have been to formulate just and moderate requests in a perfectly rigid and precise manner, stating what we require, and naming the date at which we must have it. The course pursued—whether inspired by political or courtly reasons—has been the contrary of that which we have sketched. Both on the Irrawaddy and at Peking we have been "palavered," and the death of Mr. Margary is now an event of the far past; whereas strong in justice and national honour, the expiation of that cruel deed should have been insisted upon by us while his blood, as it were, still cried aloud. It is too probable that, like all Orientals, the Chinese officials have taken fresh boldness from a tame acceptance of delay on our part; and, if it be so, part of the blame for so untoward a situation must rest upon the head of British diplomacy. Now, however, the safe line is certainly firmness; and we cling to the hope that when Mr. Wade's resolve, with its possible consequences, becomes known, the mandarins of Peking will recognise the necessities of the dilemma brought on by them in blood-guiltiness, and afford complete, if reluctant, reparation. Herein lies, at all events, the clear way out of a darkening vista; and while we wait to know whether the tension of affairs has not been exaggerated in the telegram, it is lucky that a fortnight remains during which the grave contingency of a war with China and Burmah may still be—as all must fervently desire—avoided by the necessary and equitable submission of the Peking Court.

(THE HOUR.)

No time should be lost in concentrating every available ship in Chinese waters, and the island of Hong Kong should be the winter quarters of the British army in the East. It would be an error to underestimate the power of the Chinese Government. If Mr. Wade should be ejected from Peking, as his predecessor, Lord Amherst, was dismissed without the honour of an audience, there could be no redress for six months. The Peiho would be closed by ice before a British fleet could rendezvous in the Gulf of Pechili, and afterwards Peking is inaccessible. The small number of Europeans on the Chinese seaboard may all be murdered before the spring. The Chinese have an intense and deep-rooted hatred against all foreigneas, and need but the signal from some high mandarin like Li Hung Chang to enter upon a massacre of all the foreigners resident in China. The Chinese, 400,000,000 strong, cemented by a common language, a common religion, and a common hatred of foreigners, are capable of committing any atrocities. The only means of averting war and ensuring safety is an immediate exhibition of force upon the Chinese seaboard. The Imperial power of Great Britain must be made manifest to the Chinese Government in time to avert the great calamity of war. The Chinese are "spelling for a fight," and their smothered hatred of the English may burst out at any moment in inconceivable horrors. No English missionary in the interior is safe, and no English merchant on the seaboard is assured. No doubt the Chinese can and will be punished for any atrocity which they may commit, but the English residents in China have a right to protection, not redress. It is quite possible yet that the Chinese Government may resort to some subterfuge to detain the British Minister at Peking during the winter, but peace with the Chinese Government is at best only temporary, and we must be prepared to punish Chinese audacity or retire from the country. It is beyond human ken to fathom the results of a Chinese war, but England must do her duty without regard to consequences. If it should be the destiny of England to break down the barriers of Chinese exclusiveness, and bring the Celestials into the family of nations, as we have destroyed the castes of India, and brought them the blessings of peace and prosperity, we cannot shirk our destiny—all nations must bow to the Juggernaut of Progress. The Manchu Tartars have no Divine right to the government of China, and their *régime* has been one of exclusiveness and spoil. They hold the country by a feeble tenure, and the Government of China must ultimately fall under the sway of Russia or England.

(THE ECHO.)

It is sincerely to be hoped that war may be avoided, but the attitude of the Chinese Government since the accession to power of Li Hung Chung, and their unwillingness to fulfil the most solemn obligations, almost preclude the prospect of a peaceful solution of the difficulty. So deep and unchanging is the animosity felt towards foreigners by the victorious war party now ruling at Peking, that nothing but compulsory measures, or a threatening manifestation of superior force, is likely to influence them. We fear that mere attempts to patch up our relations with China will only put off the evil day. Ever since the deposition of Prince Kung from office the tone of the Chinese authorities has been haughty and contemptuous, not only towards Englishmen, but towards Frenchmen, Americans, and the subjects of other nations. The belief exists that it is still possible to extirpate the hated foreigner, and there is little effort to conceal the dislike with which the presence of the intruder is tolerated. The lesson of 1860 has been thrown away, and the same disinclination prevails to open up the commerce of the country. Whether the Chinese will or will not trade with us is a matter in which they must have some liberty of choice; but for the murder of Mr. Margary atonement must be made. The outrage was committed by Chinese troops, with the connivance, it is believed, of the Chinese authorities, and it is impossible to allow the offenders to go unpunished. We are anxious to avoid hostilities, but the national dignity demands that the obligations entered into by the Chinese Government at Tientsin shall be fulfilled.

The Times prints the subjoined letter from Mr. R. K. Douglas:—Of the two points in dispute between Mr. Wade and the Chinese Government mentioned in the telegram of your Shanghai Correspondent, the "publication of foreign affairs in the *Peking Gazette*" is by far the most important. The *Peking Gazette* is the *London Gazette*, and more than the *London Gazette*, of China. In its columns are published all memorials addressed to the Throne, all edicts issued under the Imperial seal, and all Court announcements. It is received regularly at every Yamun throughout the Empire, and it is read by the educated portion of the non-official classes. The exclusion, therefore, of all mention of foreign affairs from this universal Government record is tantamount to proclaiming that foreigners and their concerns are beneath the serious notice of the Son of Heaven and his advisers. This is, at all events, the view taken of it by the less well-informed of the people, who are as 999 to the 1 who has any knowledge of the true position of affairs, and who thus feel themselves at liberty to offer rudeness and even violence, when the occasion is afforded, to those whom their rulers contemn. Not only was the Treaty not published in the *Peking Gazette* as promised by the Chinese Government, but not a single mention has since appeared in its pages of the current relations between the Peking Foreign Office and the foreign representatives. Even the strangely unusual event of audiences having been granted to these gentlemen drew from the Imperial editor no more explicit information than that on a certain day "audiences were granted," but not a word was said as to whom the honour of appearing in the Imperial presence had been accorded.

The following letter from "Sinensis" has also appeared in *The Times*:—The question of peace or war with China probably hangs at the present moment on one thing, whether the Chinese Government believe our Minister to be in earnest and to mean what he says. The nation which succumbed without a blow to a petty Japanese raid twelve months ago does not now dream of provoking the hostility of England. Nor could any enterprise be more repugnant to public feeling in our own country than another attempt to attain by force in China what we have failed to achieve by all our diplomacy. Yet, though both parties are thus sincerely opposed to war, there remains the possibility of such miscarriage in the negotiations as may lead them into it against both their wills. Let us not forget that the Emperor Nicholas drifted into the Crimean war through a misunderstanding of our intentions. What is wanted to avert this calamity in China is a little plain speaking, backed by some visible evidence that we really intend our demands to be fully satisfied. Unhappily some proof of our sincerity has become necessary, as our words no longer go for much in China, for our representatives there have been dealing so freely in implicit threats of war for years past, that by constant iteration they have lost their effect. The present difficulty is the natural outcome of a well-meant but mistaken line of policy which foreign Governments generally, and our own in particular, have pursued towards China since 1860. It is not too late even now to remedy these errors, but it is high time the truth should be told, were it only from a sense of justice to the Chinese themselves. The murder of Mr. Margary is only the last of a long series, British subjects, of course, having been the chief sufferers. The real authors of these crimes have in almost every case been Government

Digitized by Google

officials, none of whom have been brought to justice. There was usually a little fuss about the affair, some general warnings of remot consequences, and there the matter would drop. The Chinese, as you observe in your leading-article to-day, being diligent students of English Blue-books, might have traced in the despatches of the Minister to the Home Government a disposition to make light of such matters and very often to cast reflections on the victims; and, reading on, they would generally find the correspondence closed by a congratulatory despatch from Downing-street thanking the Minister for his successful conduct of the affair. Why, then, they naturally ask themselves, should this particular murder in Yunnan be exceptionally treated? If missionaries, merchants, and Sisters of Charity may be slaughtered with impunity, why not gentlemen in the Consular service? We know, of course, that, notwithstanding our needless protestations of peacefulness, there is a point beyond which our forbearance will not go; but we have never given the Chinese the slightest indication as to where that point is. The thing which has been most firmly impressed on their minds since they have interested themselves in current English literature is that the English nation will not fight under any circumstances; and this is precisely the conclusion which a superficial student of the utterances of our public men during the Gladstone administration would have arrived at. It has been observed that it has been usual for the Chinese Government when pressed for redress of an outrage to consult wfth Mr. Hart, Inspector-General of Customs, not on the question whether redress ought justly to be granted, but simply whether the threats of the Foreign Minister meant "war." Mr. Hart could not concientiously say "yes," and consequently, the redress was refused. The Chinese statesmen are probably again plying their English adviser to know what the present bluster all means, and if he could now convince them that it did mean war, there can be little doubt that all our demands would be at once granted and peace would be maintained. It is greatly to Mr. Wade's credit that he is insisting, not only on a promise to punish the murderers of Mr. Margary, but on the fulfilment of the promise, this last being the novel element in our Chinese diplomacy which is causing all the trouble. Were that adopted as our invariable rule, there would be no longer any temptation to the Chinese to make experiments on our patience or our credulity. No doubt, the murderers must be found before they can be punished, and they will neither be found nor pnnished except under the direction of English officers, as I ventured to point out in your columns three weeks ago. Any settlement of the affair which does not include a strict local investigation into the facts of the massacre will be only one added to the list of shams with which our recent intercourse with China is marked.

THE ATCHIN WAR.

(THE TIMES.)

Exactly two years and a half have elapsed since M. Franse Van de Putte, Minister of the Colonies and one of the leaders of the Liberal Party, communicated to the States-General the fact that war had been proclaimed against the Sultan of Atchin by the Governor-General of the Dutch Indies. The Minister then assured the country that the war would be a mere parade, and that the formidable Mahomedan kingdom in North-Western Sumatra would at the first summons bow its head before the Power which ruled Java and Madura and the Spice Islands, and which had planted its forts and factories along the Sumatran coast as far as the Equator. But not many days had elapsed when the Government at the Hague was compelled to confess to a mortifying disaster: the troops which had been sent against Atchin by the Colonial Government were defeated with a loss of nearly 500 men, and General Kohler, their commander, was left among the dead. Embarrassed by the fatal climate and threatened by the simultaneous rising of all the tribes in the north of the island, the Dutch retreated, but the resolution to humble Atchin was firmly rooted in the hearts of the people of Holland by the shame of Kohler's defeat. The States-General, without delay or questioning, voted a large sum for the prosecution of the enterprise. Preparations for a renewal of the war as soon as the deadly summer had spent its force were instantly set on foot, and in the beginning of the cold season an army of considerable strength under General Van Swieten, advanced againt the Kraton where the councillors of the youthful Sultan had determined to resist to the last. The Atchinese fought bravely, and their valour was quickened by the religious passion of the Moslem revival. They had a strong position, some modern weapons, a few European leaders, and men at least partly disciplined in the European fashion. Pestilence scourged the besiegers, who, on their part, pressed on doggedly. At length, suddenly and almost without resistance, the Kraton fell, in the early days of 1874; and the victorious commander sent home a despatch affirming that the war was practically at an end. It only remained to extinguish in detail the smouldering fires of resistance, and for this necessary complement of the work of conquest money and men were again cheerfully voted by the Chambers at the Hague. Months passed by, however, and in the summer of 1874 it began to become known that the position of the Dutch was by no means assured. They held possession of the Kraton, but of the country around they commanded no more than they might from time to time enclose in their intrenchments or occupy in passing marches. Reinforcements were continually drawn from Holland, but they hardly filled up the gaps left by disease. The resources voted by the States-General melted away without giving the invaders strength enough to break the backbone of the resistance. The courage of the Atchinese was fully matched by their obstinacy, and an observer who had watched the struggle with close interest declared that they were equalled by no fighting race in the East, except the Sikhs. The Dutch Government attempfed to evade the force of this evidence, which appeared in our columns a little more than twelve months ago, but their conduct has since made ample confession of the truth. The barrenness of the achievements of General Van Swieten cannot be denied, and the avowal in the words we have quoted from the King's speech completes the disheartening story.

The Session of the States-General, which was opened last week, can scarcely be allowed to pass without a rigorous investigation of the Government policy. Military operations at the seat of war have never during this year transcended the modest proportions of petty skirmishes, in some of which—as, for instance, the last reported by telegraph some days ago—the success of the Dutch appears to have been very undecided. No attempt has been made to gather the struggle to a head and to strike a final blow. The Batavian journals, indeed, a month or six weeks since were congratulating the country on the reforms introduced into the army of occupation at Atchin, on the evacuation of the Kraton, where pestilence raged horribly, the improvement of the condition of the soldiery, and the hopes held out to them of pensions and other rewards. The new General in command had attempted to mitigate the sufferings of the European troops from the deadly heat by boring artesian wells and setting ice-making machines at work. But all these improvements barely sufficed to enable the Dutch to hold their ground. A new Sultan of Atchin has been raised, it seems, to the throne of the unfortunate boy with whom Holland picked a quarrel three years ago, and immediately after his installation he will lead, as is believed, an attack upon the Dutch positions in which 30,000 Atchinese are to take part. At Batavia there is a strong hope that this rumour, of which the telegraph has yet brought no confirmation may prove true. It is anticipated that if the Atchinese are imprudent enough to engage European soldiers in a pitched battle, their strength may be finally broken. But these Sumatran Mussulmans are by no means devoid of shrewdness, snd they may perceive that their guerilla warfare is tiring out the moral and physical energy of the invasion. Their tactics hitherto do not lead us to suppose that they will risk everything upon a single cast. The Ministers at the Hague evidently do not assume that the crisis has yet come. They wisely decline to purchase a temporary popularity by promising an early reduction of the calls for volunteers and the extraordinary credits demanded from the States-General. Yet these are no light burdens. The finances of Holland, it would appear, are able to bear the burden, but a continuing drain such as this lingering war entails must be felt by even a rich country. Since the beginning of the present year more than 3,500 men have been enlisted for service in the Indies by the Government at the Hague, at a bounty, including a sum granted for outfit, of 400 florins, or about £34 per head. Not a little dissatisfaction has been caused in the neighbouring countries, especially in Belgium, by the enlistments of men for this service; yet it seems the Dutch Government have been careful not to trench on international rights, and have merely accepted those foreigners who voluntarily offered to encounter the risks of a tropical expedition. The process, however, is costly, as the addition we have mentioned to the War Estimates, already swollen by the charges of a complete military reorganisation, is sufficient to prove, and it is doubtful if it procures the sort of soldiers who have either the physical or the moral qualities needed for warfare in the Far East. It is likely that the whole policy of the Government, and especially of the Colonial Minister, will soon be challenged, discussed, and severely investigated at the Hague. The reputation of M. Van de Putte has been gravely assailed by a partisan and former Aide-de-Camp of the Governor-General of the Dutch Indies, M. Loudon. On M. Loudon public opinion has hitherto thrown the blame of the disasters in Sumatra, but it is now alleged that the Colonial Minister is solely or mainly chargeable. It is just to say that M. Van de Putte repudiates the charges brought against his policy, which rests, as he asserts, upon garbled despatches; but he cannot clear himself without an inquiry which must open up all the miserable history of the Atchin war. Let us hope that the exposure of its present failure may spur the Government at the Hague to some decisive resolution. The prolongation of the struggle under its present conditions is an afflicting spectacle to humanity. Holland as well as Atchin suffers painfully, and no end of their suffering is in sight. It is time for Holland, if she respects herself, or regards the future of her great Empire in the Eastern Seas, to make an end of this wretched conflict. We do not counsel retreat; we do not even say that retreat is possible now. For the Dutch Government it remains to choose in what way the end shall be made—whether by a supreme exertion of force, or by a courageous confession of defeat.

Monetary and Commercial.

There is no feature to report regarding the position of the Manchester Market; the tone has been quiet, and the demand generally moderate. Low 8¼ lbs. Shirtings continue in fair demand, and for lighter weights there is some inquiry, but at prices which prevent business. Notwithstanding the absence of animation producers show no desire to tempt business by making concessions, and steadily maintain their quotations.

At the extraordinary general meeting of the Chartered Bank of India, Australia, and China on the 20th inst., the directors will recommend an interim dividend for the half-year ended 30th June last at the rate five per cent. per annum free of income tax.

The directors of the Eastern Extension, Australasia, and China Telegraph Company (Limited) have declared an interim dividend for the quarter ending June 30th, 1875, of 3s. per share, or at the rate of 6 per cent. per annum, free of income tax, payable on the 15th inst.

The Eastern Telegraph Company (Limited) announce the payment, on the 14th inst., of an interim dividend of 2s. 6d. per share for the quarter ended 30th June last, and that the coupons on the Six per Cent. Debenture Bonds will be paid on the 15th inst. at the bank of Messrs. Glyn, Mills, and Co.

The half-yearly report of the Delhi and London Bank shows an available balance of £11,325, out of which the directors pro-

Digitized by Google

pose to pay a dividend at the rate of 4½ per cent. per annum, to apply £3,000 to meet deficiencies on realisation of the lock-up account, and carry forward £729 to the next account.

The directors of Reuter's Telegram Company (Limited) have declared the usual interim dividend at the rate of 5 per cent. per annum for the half-year ending 30th June last.

It is announced that the Bank of California will resume business on the 2nd inst., and that all their outstanding drafts on the Oriental Bank Corporation will be paid on presentation.

The deliveries of tea from the bonded warehouses in London during the week ended the 25th ult. amounted to 3,525,514 lb., of which 2,080,422 lb. was for home consumption, 760, 367 lb. was removed coastwise, 566,857 lb. was exported, 112,710 lb. was sent coastwise for export, and 5,158 lb. was for ships' stores. The duty received was £52,011, being about 4½ per cent. less than in the previous week.

It is considered probable that during the next Parliamentary session a Bill will be introduced for the amendment of the Limited Liability Act. The subject is now engaging the attention of the Board of Trade, and it is generally admitted that the existing law requires some amendment, especially in regard to the liability of directors. Of course no attempt will be made to disturb the general principle of limited liability, which has now become too firmly rooted in our commercial policy to be disturbed.

Mr. E. Lentz has become a partner in the firm of Lafreutz and Co., of Cullum Street, which has increased its capital by the amount of £100,000.

Bar silver has been sold at 56 11-16d. per oz., but the Market now looks slightly weaker, the demand for export not being so active. Mexican Dollars remain as last quoted, a small quantity from New York having been sold at 55¼d. per oz.

ARTICLES OF IMPORT.

Few articles of first importance have undergone any improvement, and the general characteristic of the Produce Markets has been continued dullness. The telegrams from China respecting the uncertainty of political affairs, and the probability of a moderate export of Tea for the season has caused importers to be generally firm holders, and in many cases stocks are held for some advance in price. Silk is very quiet. There has been more demand for some kinds of Sugar, chiefly Java, at steady rates. Coffee has fluctuated, closing flatly at lower quotations. Rice has been depressed, resulting in a further decline in value, and prices are now lower than at any previous time this year. Sago has further declined. The recent advance in Pepper has not been sustained. Cassia is higher; Nutmegs lower; Mace rather dearer. Scarcely any alteration has taken place in Cotton. Hemp continues very dull. Cutch is quiet; Gambier dearer.

TEA.

The market rules very firm, as the weak holders have sold off their imports, and the bulk of supplies in first hands is held by firms of stability, with a practical knowledge of the leaf. The political events of the last few days have also tended to give strength, bids in most instances being refused, and many importers have withdrawn their teas. The most marked advance is in medium kinds of Congou from 1s. 3d. to 1s. 7d., which show 1½d. per lb. rise from the lowest point of about a month ago. Scented Caper is also 1d. to 2d. per lb. dearer, making 4d. per lb., from the extreme depression, and there is margin for a still further advance, as the shipments by latest telegraphic accounts give a deficiency of about 2,500,000 lbs. as compared with last season, and the range of prices now current is by no means at a high scale. Though the state of the market is in a much healthier condition than for some time past the value of most kinds of tea is still below import cost; and as the total export is not likely to be over last season owing to the heavy losses being made on good common to fair quality of Congou,

Digitized by Google

importers will no doubt continue to give support to the market. One or two dealers seeing the favourable change that has set in are quietly securing all the cheap parcels that are available, notably, old season's good useful teas at 10d. to 11d. per lb., worth during the early part of this year 1s. 1d. to 1s. 2d. per lb. There is now difficulty in buying similar teas on as favourable terms as during the early part of last week, and it is quite certain when buying becomes general during the next few weeks (for the autumn requirements) advanced prices will readily be paid. Green Teas have been freely offered, ex late arrivals, and, quality considered, have, on the whole, realised at public auction excellent prices. It is very satisfactory to note that prices in China are falling to the average current before the Taiping rebellion, and as the districts that were over-run have been brought under cultivation again, full supplies may be looked for, which, if not manufactured into green, will doubtless come forward to imitate Japan or Congou leaf.

	1875. lbs.	1874. lbs.
United Kingdom stock, on the 31st August, 1875, was estimated at ...	85,000,000	74,500,000
Cargoes of vessels arrived up to date, but not included in the above stock, with portion of other cargoes only partially included	20,350,000	19,997,000
Amount on the water advised by telegraph to 16th Sept, against actual shipments to same date last year	24,134,000	48,042,000
	129,484,000	142,539,000

SILK.

The market is quiet, there being little or no demand for export, and only a moderate inquiry for the Home Trade. Prices of Chinas and Japans remain unaltered, but those of Cantons are a shade lower. Deliveries 1st to 29th ult. inclusive; China, 3,080 bales; Canton, 465; Japan, 521; total, 4,066 bales.

COFFEE.

The market has been flat, and the much larger quantities of Plantation Ceylon brought to auction have gone off without competition at continually declining prices, until at the close the whole of the recent advance had been lost, and closing quotations are about equal to those given a fortnight ago. Native Ceylon has sold steadily. The market for foreign descriptions has been dull, and prices are lower. Closing quotations are: Plantation, triage and ordinary 88s. 6d. to 102s. 6d., grey to fine coloury small 104s. 6d. to 110s., fine fine ordinary faded grey 108s. to 109s. 6d., low middling 110s. to 112s., middling 112s. 6d. to 114s., good middling to fine middling 114s. 6d. to 116s., good to fine bold 116s. 6d. to 120s. 6d., one lot 122s. 6d., peaberry 125s. to 131s.; Native, small 86s. 6d. to 87s., good ordinary Galle kind 96s. 6d., fine ordinary even 97s. 6d. to 98s. 6d., good to fine bold 104s. 6d. to 106d., peaberry 104s. to 106s. per cwt. The sales of other East India include 73 bags Singapore mixed brown at 87s. 6d., and 100 bags Indian Manila at 96s. 6d. per cwt.

SUGAR.

The low point to which prices of West India has declined has attracted the attention of exporters, as well as the home trade, and the increased demand being freely met, a larger business has resulted, prices closing firmer. The principal transactions on the spot consist of fine Java, for which very low rates have been accepted, of 2,220 baskets in auction, import 1874, 1,715 baskets sold, good grainy yellow No. 14 and 14½ at 22s. 6d. to 23s., chiefly the latter price, low white grainy at 24s., grey at 22s. Since then there has been more inquiry, and about 2,000 tons have been sold by private contract, chiefly fine No. 14 to 15½ at 23s. to 24s. The demand for Manila has been limited, but prices are without further change. About 22,000 bags good fair clayed have been quitted at 16s. 6d. per cwt.

Cotton.—Little alteration has taken place in this market, and although slight fluctuations have occurred, closing quotations are very similar to those given a fortnight ago. On the spot a somewhat slow, but steady, demand has prevailed, and a fair business has been done. The floating transactions continue limited, consisting chiefly of Tinnivelly, which closes at 5⅜d. for good fair.

China Matting.—At public sale 998 rolls ex Galatea, from Canton, were all sold, fancy size 4/4 and 5/4 at 29s. to 31s. 6d., chiefly red check 6/4 to 4/4 at 23s. 6d. for common to 36s. for fine, white 4/4 to 6/4 at 21s. to 30s. per roll.

Coir Goods.—The public sales of Yarn have gone off slowly, and common dholls were cheaper, good to fine selling rather dearer. Cochin Fibre sold readily at full rates; Ceylon without change. Supplies of Rope continue much in excess of requirements, and prices in most instances are again lower.

Cocoanut Oil.—Cochin has been in only moderate request; 50 hogsheads fine sold at £42, since when 200 tons changed hands at a price kept secret. Ceylon has continued firm, and a fair quantity has found buyers, old in pipes at £38 and in hogsheads at £38 5s., new in pipes at £38 5s. and puncheons and hogsheads at £38 10s.; 25 tons June shipment sold at £38 5s.; of 258 casks offered by auction 38 pipes sold at £38, 28 puncheons at £38, and 69 hogsheads fair to good at £38 to £38 5s. per ton.

Cutch continues very quiet. In auction 800 boxes fine Pegue (Cock Brand) were bought in at 27s. per cwt.

Camphor.—Market firm, but little done; about 200 cases China sold within the past day or two at 70s. per cwt.

Colombo Root has been quiet but steady; of 32 bags offered over two-thirds sold at 22s. to 22s. 6d. for fair quality.

Dragon's-blood steady; at auction 6 cases sold; lump good at £6 10s. to £7 17s. 6d. for fair part dull, to good bright.

Ebony.—At auction 32 tons (80 logs) Ceylon were bought in at £20.

Essential Oils.—*Aniseed* quiet; small sales at previous value; 10 cases at auction retired. *Cassia* easier; about 50 cases sold at 4s. 2d. to 4s. 3d. on spot, and 4s. for arrival. *Nutmeg* steady; 15 cases at auction retired. *Cinnamon* quiet, 3 cases leaf retired. *Citronelle* firm and higher; about 180 cases changed hands at 1¾d. to 1⅞d., and none offered at auction. *Lemon Grass* has been rather more inquired for, and about 70 cases have changed hands at 2¼d.; and of 45 cases at auction 5 cases sold at 2⅜d., at which there are further sellers.

Galls have been very quiet in consequence of the recent advance in price; a few cases have been placed privately at 75s. per cwt.

Galangal Root has slightly declined; 30 bales have been sold by auction at 20s. per cwt. for fair quality.

Guttapercha continues extremely dull.

Gums.—*Benjamin:* Siam steady, and 3 cases offered were retired. *Sumatra* steady; of 21 cases, two-thirds sold at £8 5s. for fair seconds, and £5 good thirds. *Copal* quiet, with scarcely a transaction; 44 cases offered were retired, and of further lots brought forward yesterday 55 cases Manila sold at 29s. for good fair hard, and 49s. to 50s. for fine. *Damar* firmly held and little offering; of 110 cases, one-fourth sold at 50s. for good a little dull; small sales of fine Batavia at 62s. 6d. *Gamboge* quiet but firmly held; 27 cases offered retired.

Gambier.—There has been a good demand for block, and as supplies have been scarce a further advance has been obtained, but transactions both on the spot are unimportant, small lots having been sold at 29s. to 30s. per cwt. For arrival 200 tons (including 50 tons per Lord of the Isles) have been sold, June sailing at 27s. per steamer, at 27s. 4½d. ex-ship. At auction 26 bales block sold at 29s. 6d., and 276 bales cubes rather blocky at 37s. 6d. to 38s.

Hemp.—There is little disposition to buy Manila on previous terms, and as holders are not pressing sellers, business has been unimportant. At auction 13 bales fine quality sold at £39 5s.

Hair, &c.—11 cases drafted China Horse bought in at 4s., except 2 cases, which sold at 2s. to 3s.; 15 cases ditto Tails bought in at 2s. 3d. also 110 cases China bristles at 2s. to 5s. 9d. per lb.

Horns.—The public sales embrace 49 tons Siam Buffalo, which were only partly sold at 42s. 6d. to 43s. per cwt. for Horns averaging 734 to 643 to a ton, being rather over the previous value.

Indiarubber.—The market is dull. Business has been done in Borneo at 1s. 2⅝d.

Japan Wax has been more inquired for, and about 1,200 boxes have changed hands privately at 49s. to 53s. for yellowish to fine; at auction of 100 boxes half sold at 51s. 6d. for good, and at a subsequent sale (yesterday) of 264 cases offered 200 cases good small squares (import 1873) sold at 51s. 6d., landing weights.

Musk.—The sales have embraced 38 caddies Tonquin, of which two-thirds sold, good and fair selected well-shaped pods slightly damp at 42s.; rough and bally, 15s. 6d. to 17s. 6d.; wet pickings, 19s. 6d.; 12 caddies Yunnan sold at 36s. to 37s.; 17 tins, &c., grain, part sold at 45s. to 50s. per oz. for fair and good.

Plumbago.—At auction of 367 barrels Ceylon only 80 barrels sold at former prices, middling lump at 15s., fair chips 10s., dust 8s. 9d. per cwt.

Pepper.—*Black* has been quiet, and is slightly easier, with moderate private business in Singapore at 5⅞d., and Penang at 4⅞d. to 4¾d.; and at auction, of 6,758 bags offered, only about 700 bags sold, Singapore at 5⅞d., West Coast Penang at 4⅝d. to 4⅞d., grey 4⅝d. Afloat, no business of importance. *White* at auction was dull, and lower prices were accepted; of 2,878 bags offered barely one-third sold, Singapore fair at 8½d. down to 7¾d., good 8½d. to 8¾d. per lb.

Rice.—The market has remained depressed, and as the demand for floating cargoes has been languid, a further reduction of about 3d. per cwt. has been established, Rangoon selling at 7s. 10½d., Bassein at 7s. 4½d., and Necransie at 7s. 3d., or lower prices than for many years past. On the spot larger sales of soft grain have been made at a similar decline, but Bengal and Madras are scarce, and prices are steady. The sales on the spot comprise white Bengal at 11s. 3d. new Necransie per Northbrook at 7s. 3d., new Rangoon per John Bertram at 8s. ex quay, ditto per Uncle Toby, in dock, at 7s. 9d. ex ship, and 8,000 bags ditto, being the remainder of that cargo, at 7s. 10½d. quay terms.

Rattans.—At auction 16,000 bundles (47 tons) Penang sold, chiefly damaged at £25 15s. to £30 2s. 6d. Of 6,042 bundles (11 tons) damaged Singapore only partly sold at £15. 1,467 bundles (11 tons) Rangoon damaged all sold at £14 2s. 6d. to £14 5s. per ton.

Rhubarb.—China remains steady but quiet. At public sale 23 cases offered, half sold at 1s. 9d. for fair dull-coated heavy sun-dried root, two-thirds good even pinky fracture, rest dark and spongy.

Sapanwood.—Of 15 tons offered 4 tons damaged Ceylon sold at £12 per ton.

Sago is about 1s. per cwt. lower, and of 2,880 bags brought to public sale over half sold at 17s. 6d. to 18s. 6d. for fair to good small, and 16s. to 16s. 6d. medium and large. *Flour* firm but quiet; 500 bags fine Borneo were bought in at 14s., but partly since sold thereat; 177 bags damaged Singapore withdrawn.

Spices.—*Cassia Lignea:* The demand has been stronger, and prices close 3s. higher, 2,500 cases unworked having been sold at 56s. to 57s. But at auction 720 boxes unworked, imported 1872 and 1873, went off slowly, and only 150 boxes sold at 57s. *Cassia Buds:* 100 boxes China

Digitized by Google

bought in at £5 5s. *Cinnamon:* Of 29 bales Ceylon only 8 bales sold, second sort at 2s. 5d., fourth at 1s. 9d., the remainder bought in at 2s. to 2s. 9d. *Chips:* 80 bags Ceylon bought in at 4d. *Cloves:* Of 13 cases Penang 8 cases fine sold at 2s. 2½d. *Nutmegs:* The good supply of 43 cases 102 boxes fresh Penang went off slowly, and 35 cases 50 boxes sold at a decline of 1d. per lb., fine bold average 66 nuts to the lb. at 4s., 70's at 3s. 9d., 77 to 74's at 3s. 5d. to 3s. 7d., 83's at 3s. 6d., 126's at 2s. 8d., limed 164's at 1s. 6d., the remainder bought in, chiefly limed 135 to 160's at 2s. to 2s. 4d; of 17 cases 8 casks limed Java, 6 cases 2 casks sold, 87's at 3s. 2d., 104's at 2s. 8d. to 2s. 9d. Of 25 boxes defective broken Java 6 boxes sold at 10d. *Mace* has been very steady, and of 36 cases offered the bulk sold; middling to good at 2s. 2d. to 2s. 9d.; middling reddish 1s. 11d. to 2s.; pickings 1s. 1d. to 1s. 3d.

Shells.—The periodical sales were held on the 28th ult. *Tortoise:* Large supplies went off flatly, and East India was only partially disposed of at previous rates; 23 cases (about 980lb) Singapore, &c., sold, common shell at 8s. to 11s. 6d., middling to good clean do. 14s. 6d. to 18s. 6d., one lot fine 20s. *Mother-o'-Pearl:* The moderate quantity of Bombay met a good demand, and sold at an advance of 5s. per cwt. All other kinds, however, were unusually difficult of sale, and only a small portion found buyers; of 9 cases Manila 1 case small sold at £10 2s. 6d. *Ear Shells:* There was much less demand, and the large supply offered, consisting of 171 cases 827 bales 177 bags and 20 tons loose Japan Silver was almost all bought in or withdrawn, except about 30 cases 85 bags which found buyers, untrimmed medium £10, inferior trimmed £20, good do. £35 per ton. *Green Snail Shells* met a moderate demand, and of 240 baskets and about 3,000 loose (together 27,750 shells) 140 baskets sold at rather easier prices, very small at 2d., small 2½d. to 3½d., one lot good 4½d., medium 4⅞d., good bold at 8½d. to 9d. each.

Sticklac shows a slight decline; at public sales 211 cases were mostly retired, but the bulk subsequently sold, together with 200 and 300 cases privately, at 95s. per cwt. for good quality.

Star Anniseeds have been steady, small sales of fair quality but broken being effected at £5 16s. per cwt.

Soy has been firm; small business doing in China at 2s. 2d. per gallon.

Tapioca.—Market steady; and of 3,336 bags offered, one-third sold at 2⅜d. to 2½d. for good bold; 2⅜d. to 2¼d. fair and good small Flake, and 20s. 6d. fine small, and 20s. Bullets.

Tin has been irregular; Straits was sold as high as £87 and declined to £85, it is now £86 spot. The sale in Holland 22,900 Slabs, went at an average price of 52¾ guilders, equal to £90 10s., London. As the deliveries from London this month are over 1,200 tons, we shall probably have a firm market. Current quotations:—Straits on the spot £86, afloat £85 to £86; Banca £91; Billiton £86 per ton.

Vermilion has been steady; of 10 boxes China at auction, a few sold at 5s. 6d., also a few cases privately at same figure.

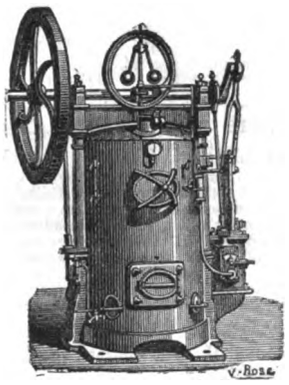
SPECIAL MANUFACTURE OF VERTICAL STEAM ENGINES,

Pumps with Plunge Pistons moved by Vertical Steam Engines.

Vertical Engines from 1 to 20-horse power. Boilers with tubes. Important saving guaranteed.



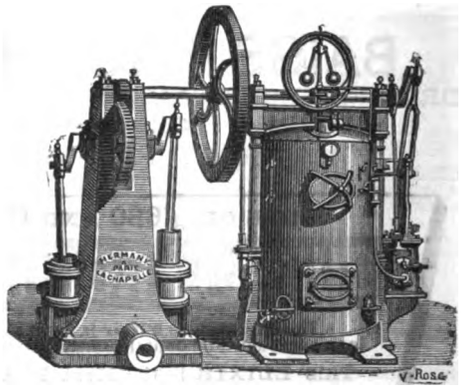
GOLD MEDAL
AT THE
EXHIBITIONS OF
ALTONA and SANTIAGO, 1869.

DIPLOMA OF HONOUR,

GOLD MEDAL, & LARGE GOLD MEDAL
AT THE
EXHIBITIONS OF
LYONS and MOSCOW, 1872.

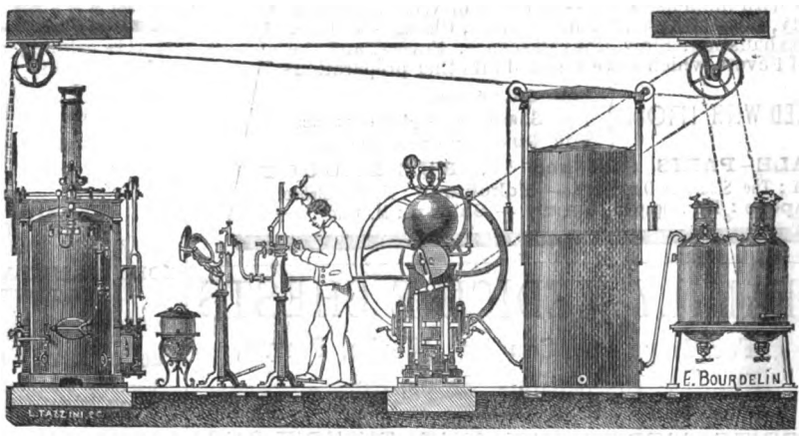
MEDAL OF IMPROVEMENT
(EQUAL TO THE LARGE GOLD MEDAL)
at VIENNA, 1873.

Pumps with plunge piston, moved by Vertical Steam Engines for irrigation and drainage.



CONTINUOUS APPARATUS for manufacturing Gaseous Drinks of all sorts (worked by a Steam Engine).

This apparatus, with mechanical compression and continuous action, is able to produce from 25 to 10,000 bottles of all kinds of aerated drinks per day. It is the only one which complies with all the requirements of the Committees of Health and Safety. The only one which has undergone, before leaving the workshops, the proofs required for any apparatus which has to work at high pressure. The only one adapted to working this branch of industry practically.

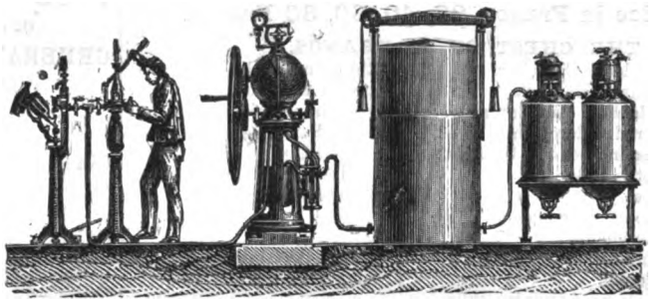


J. Hermann-Lachapelle's Syphons are also very remarkable. Their mechanism is very carefully made, and the decanters are in crystal glass of the best quality. The top of these Syphons is plain, without ornament, and easy to clean, which is an advantage.

COMPLETE APPARATUS for manufacturing Aerated Drinks of all kinds (moved by hand).

SYPHONS.

Large Lever, £2.25.



SYPHONS.

Small Lever, £2.15.

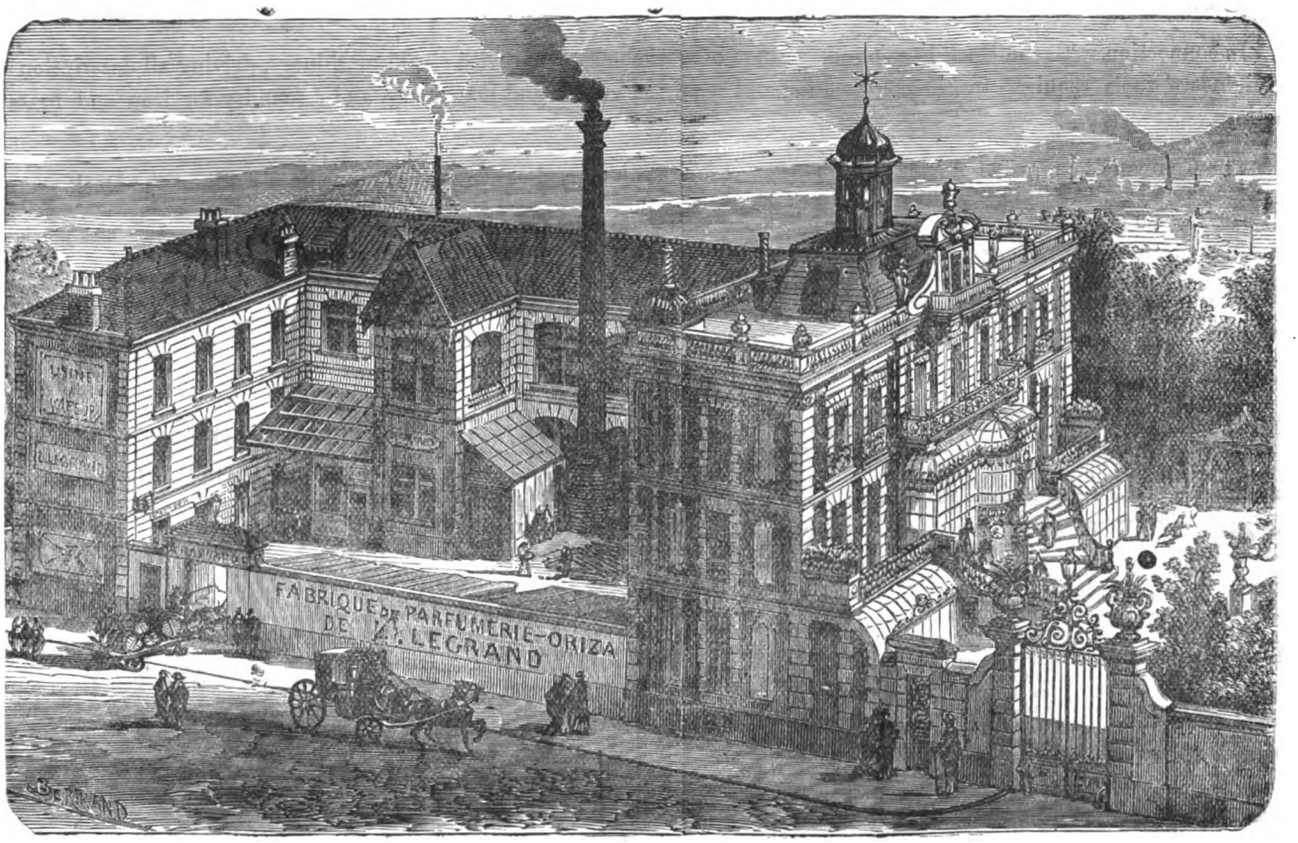
PARIS, 1867. ORIZA PERFUMERY. VIENNA, 1873

L. LEGRAND,

PURVEYOR TO FOREIGN COURTS.

WHOLESALE AND RETAIL ESTABLISHMENT, 207, RUE SAINT-HONORE, PARIS

MÉDAILLE DE MÉRITE AT THE EXPOSITION UNIVERSELLE DE PARIS 1867, AND VIENNA 1873.



VIEW OF THE STEAM FACTORY OF M. LEGRAND'S PERFUMERY AT LEVALLOIS-PERRET (SEINE).

LEGRAND'S SPECIAL PRODUCTS.

ORIZA SOAP. From the formula of Dr. O. Reveil. The best soap for rendering the skin white and soft. Sweetly and refreshingly scented. In boxes of three cakes.

ORIZA SOAP. In boxes of six cakes. Variously perfumed.

ORIZA CREAM MOUSSEUSE. A paste specially prepared for baths and shaving, facilitating the action of the razor.

ORIZA SOAP POWDER. The Oriza Soap, in the form of a powder, for shaving, producing with water a persistent and abundant lather.

ORIZA OIL. Variously perfumed. For rendering the hair soft and brilliant, and preventing it falling off. Bottles in cases.

ORIZA COSMÉTIQUE. For smoothing and fixing the hair. (Assorted colours and perfumes.) In cases.

ORIZA LACTÉ. A refreshing tonic to the skin, removing red spots, and preventing wrinkles on the face. In cases.

CREME ORIZA. (Of Ninon de Lenclos.) For producing a beautiful white complexion, with the clearness and velvety softness of youth.

ORIZA POWDER. Flowers of Carolina Rice. For softening and refreshing the skin In packets of 125 grammes (rather more than 4 ozs.), f.12 per dozen; of 250 grammes f.24 per dozen. In boxes with puff.

ORIZA FLOWERS. An excellent toilet water tonic to the skin, sweetly and delicately perfumed. White.

ORIZA FLOWERS. Amber.

ORIZA HAY. A toilet water with the perfume of new mown hay.

ORIZA ACIDULINE. Toilet vinegar, aromatic, and disinfectant, specially adapted for ladies' toilets.

ORIZA BRILLANTINE. Crystallised, violet perfumed, giving brilliance to the hair and beard. In cases.

ORIZA FLUID. A nutritive and strengthening pomade for nourishing the hair. Assorted perfumes. Vases in cases.

ORIZA PHILOCOME. Pure beef marrow and oil of hazel nuts with quinine, for nourishing the hair and preventing it from falling off. Bottles in cases.

ORIZA DENTIFRICE. An elixir for preserving the teeth and gums in good health, and preventing decay. Bottles in cases.

ORIZA DENTAIRE. A new paste for whitening the teeth without affecting the enamel.

ORIZA DENTAIRE. A powder for cleansing and whitening the teeth without injuring the enamel.

ORIZA BLANC. A harmless liquid paint for rendering the complexion white and brilliant.

ORIZA BLANC ET ROSE. Harmless paints in cakes for the city and the theatre. For producing a pale tint on the complexion with the freshness of the rose.

ORIZA BLANC ET ROSE. Paints in powder.

ESS ORIZA ET ORIZA-LYS. Perfume for scenting linen and the handkerchief without staining.

ORIZA SCOTCH LAVENDER. Sprigs of Scotch lavender flowers, a rich toilet water

The following are imported from India prepared by the celebrated Chemist, JAMES SMITHSON.

L'ORIZALINE VEGETALE (the best hair dye). For instantaneously dyeing the hair to any shade, and with no danger to health. In boxes, each with brush, comb, prospectus, and bottle.
The bottle only, without accessories.

ORIZALINE POMADE. For tinting the hair blonde or chestnut In handsome cases

LOTION VEGETALE (of Dr. SMITHSON). For preparing the hair and beard to receive the dye in order to ensure success for brown and black shades.

THREE VALUABLE RECEIPTS, prepared according to the formulæ left by the celebrated Dr. CHOMEL.

EAU TONIQUE DE QUININE LEGRAND. Cleansing the head from scurf, preserving it in health, and cleansing the hair and preventing it from falling off.
This lotion should be employed in conjunction with the BAUME DE TANNIN, in order to restore the hair in a very short time.

POMADE AU BAUME DE TANNIN (BALSAM OF TANNIN POMADE). Nutritive and strengthening pomade, making the hair grow very rapidly. Certain success.

PATE ROYALE DE NOISETTES. For softening and whitening the hands, curing and preventing cracks, chaps, and chilblains.

TANJONG PAGAR DOCK COMPANY
(LIMITED).

VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all description of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

LONDON AGENTS.
Messrs. MACTAGGART, TIDMAN, and Co., 34, Leadenhall Street.

E. M. SM :H, Manager.

Summary of News from the Far East.

JAPAN.

Our advices from the Japan Ports by the present mail are of no later dates than those received by Pacific mail on the 29th ult., and published in our last issue.

CHINA.

PEKING AND TIENTSIN.

The Tientsin correspondent of the *North China Herald* writes as follows:—

There is every indication of an extensive drought throughout the Eastern portion of this province at present; no rain of any consequence has fallen this month, and the fields and gardens are seared and dry. The rainfall in this district, since September, 1874, is less than has been known before for many years. There is, however, an appearance of general quiet and contentment amongst the people throughout the district. The heat at Tientsin continues unabated—indeed it has advanced two degrees, standing at 95° Far. in the house, on walls unaffected by the sun's rays: no rain has fallen for over two weeks, and the earth is parched. Many cases of sunstroke are reported among the Chinese. At Peking also they are having extraordinary weather; the; thermometer is 100° 5′ in the shade; it is not only a single day, but for a full week the heat has gone on increasing. The Chinese are at their wits' end; nobody seems to move a step if he can help it. The little sheds for retailing ice on the great streets are every morning beset with little crowds of purchasers. The scene at the wholesale ice depots outside the Tartar city is worth going to see. From the city gate to the depot a stream of men come and go for and with ice. The excitement and bustle are immense, and whether the carts ever get supplied or not I don't know. A large trade is done in the city by retail dealers, running about with their two lumps in their baskets and selling one or two cash worth at the doors of poor people's houses, and even to foot passengers; the moat outside the city wall is crowded in places with bathers, quite an unusual thing; while carters drive into the water, bath themselves and their animals, and slowly wash their carts as if they did not care though they never got another hire.

The little "tiff" between Mr. Wade and the Viceroy, of which I gave an account in my last letter, has been productive of some good. At least it has had the wholesome effect of *lim-*

Digitized by Google

bering up the stiff hinges of the Viceroy's Yamen doorway. Mr. Wade again visited the Governor-General on the 8th Aug., and was honoured by an *immediate* entrance to the presence of the great man. It is stated on good authority that Mr. Wade is discussing with the Viceroy the terms of settlement of the Margary affair, which have been submitted to the Chinese Government. Very little appears to be known outside of official circles of the conditions upon which Mr. Wade proposes an adjustment. It is, however, safe to say that the Chinese are in a yielding mood, and I shall not be surprised if we receive an official announcement of the final settlement of the whole question within a reasonable time. Mr. Mayers, Chinese Secretary to Her Britannic Majesty's Legation, has left Tientsin for Peking. There can no longer be a reasonable doubt that it is Mr. Wade's intention to remain at Tientsin until a final settlement of the Margary difficulty is arrived at.

A young Chinese bride came to her death a few days since under circumstances of singular and painful interest. It appears that this young woman had long been betrothed to a young Chinese gentleman living in the city, and that owing to the death of the Emperor her wedding had been postponed for several months. On the day fixed for celebrating the nuptials the bride in her wedding dress was sent in grand state to the house of her future husband; the day was intensely hot, and according to the custom in this part of China the bride was placed in a chair, closely veiled, and safely locked up. In due time the joyful procession which accompanied the bride arrived in front of the house of the affianced: the gaudy chair was set down by the bearers, and the would-be mother-in-law unlocked the door, when the bride was found sitting bolt upright, stone dead! It is supposed that the poor girl died of suffocation.

The French gunboat *Surprise* has arrived here from Newchwang. She leaves for Chefoo in a few days, to attend a review of the French Squadron which is to be had at that port on the 20th August, after which she will return to Tientsin for the winter. H.B.M.'s gunboat *Dwarf* and the Russian gunboat *Gornostay* both left on 8th August, for a short cruise in the Gulf.

Governor Li is making his presence felt again; he has recently re-issued an order which was in operation the first winter of his residence in the North, requiring every ten families to keep a watchman. The people say this is *not* for their protection against thieves simply. It is also required that all firearms and ammunitions shall be handed over to the magistrates. Persons found retaining over ten catties of powder are liable to decapitation—a lesser amount involves a lighter punishment.

The Chinese have recently displayed an unusual degree of activity at Taku, in surveying and sounding the Bar, making exact charts, and gathering all information possible to be had on the subject. But with what intention or for what purpose I am unable to say at present.

On the 9th Aug. Mr. Waeber, the Russian Consul at this port, took charge, *pro. tem.*, of the Danish Consulate, which office was rendered vacant by the death of Mr. Meadows.—It may be of interest to note that Li Hung-chang has placed the sum of Tls. 500 in the hands of Mr. Meadows' executors, as a donation for the benefit of the widow and children of the deceased; Dr. Elmore has subscribed a like sum.

Having concluded the negotiations about the Treaty, the Peruvian Chargé d'Affaires leaves in a few days for Peking, where he will take up his residence in Dr. Williams' house, lately occupied by General Raasloff; he is likely to stay in Peking during the winter.

SHANGHAI.

The present mail brings advices from this port to the 22nd August; the P. and O. mail from London July 9 was received on the 20th August. The following summary of news is from the *North China Herald*:—

Several questions of importance were discussed at the meeting of Treaty Consuls on the 5th Aug. It is very disappointing to find that the promised chart of the Bund line has not yet been prepared by the Harbour Master's Department. The best plan would be for the two Councils to draw up a joint plan, and try to get that accepted. The Dutch engineers seem to have been able to come over from Japan after all, and are at work on the Woosung Bar. The question of improving the position of the Mixed Court has been under consideration, but nothing definite has been arrived at. In view of the frequent interference incurred by foreigners going into the interior on pleasure trips, it is proposed to improve the form of passport. The Chinese troops question also came up for discussion, and it was stated that the Taoutai had said the men would be sent away at an early opportunity; and, in fact, a first detachment has already left for Chinkiang, *en route* for Yangchow and Senchow-foo (on the borders of Shantung).

A correspondence has been addressed to the Treaty Consuls on the subject of taxation in the Settlement. The word lekin is a misnomer in the case. It is not only lekin taxation, but taxation of any kind that is illegal. What is really levied is 2½ per cent. transit duty on imports. Grey Shirtings are charged the same for transit to the Maloo as for transit to Soochow; and this is directly in contravention of the treaty. A difference seems to have suggested itself in many people's minds between opium and other goods. A sentimental difference there may be, but legal difference there is none. Imports are freed, by the mere fact of paying import duty, from further taxation within the limits of the port. Whether the article is called Opium or Orleans cannot affect its legal status here. It is only when it gets out side that the first is abandoned to the tender mercies of the Chinese, and the second is protected by a treaty stipulation that it shall not be taxed more than 2½ per cent. in transit to its destination in the interior.

A correspondent criticises very severely the Council's letter to the Foreign Consuls on the subject; and we cannot but agree that their action in the matter has been weak. It is a mistake to be too anxious to forge chains for oneself; and the cry of the Council for instructions is very much of this nature. The Consuls are a responsible body, and very much hampered in their utterances and their actions, accordingly; while the Council is sufficiently irresponsible to be able to act with considerable freedom in a case where uncompromising action is required. Why then cannot it exercise its own discretion, and take some responsibility on its own shoulders, instead of appealing at every step for a definition of its powers? Let it act, and wait for the Consuls' opinion till its action is assailed. If any one of the members found a burglar in his house, would he leave him there to work his will, pending advice from his Consul as to whether he was justified in hindering his proceedings? Well, there are the treaties; and two legal interpretations of the treatiess if the original language is not clear enough. And here are men daily and openly infringing the treaties!

The Quinsan affair has been at last settled, on terms which are likely to prevent any further annoyance to foreigners in that district. The arrest of a certain number of the rioters having been at last effected, H.B.M.'s Vice-Consul, Mr. Davenport, accompanied by Chang as the Taoutai's deputy, went up to Quinsan to be present at the trial. The case was tried before Liu, the new Hsien of the district; Fan, who was displaced for his misconduct in the affair, and who had been ordered to attend, neglecting to put in an appearance. Ten prisoners were produced, besides the wounded man, who was led in looking more ghastly than ever, and supported by two others. How he contrives to keep this appearance is a mystery. The Taoutai's *weiyuens* probably had an inkling, as they appeared amused at his entry. The men produced were identified by Mr. Cooper as having taken part in the riot, and after discussion the following sentences were passed:—1. The old Tepao, in consideration of his age (seventy years), and of his having shown an inclination to behave properly towards the end of the riot, was let off. 2. The ringleader who was captured by Mr. Overbeck, and has undergone a long imprisonment in Shanghai, was flogged. 3. Brother of the wounded man, who has also been imprisoned in Shanghai, was let off in consideration of that imprisonment. 4 and 5. Forty blows and forty-five days' cangue. 6. An old man, let off flogging in consideration of his age, but cangued. 7, 8, and 9. One month's cangue for the riot, and beaten for impertinence to the magistrate. 10. Forty-five days' cangue. Mr. Davenport further arranged that a proclamation should be posted, warning the natives to treat foreigners who go to shoot game with courtesy; they are not to interfere with them, nor to snatch away their game when it is shot. In case such an accident as a foreigner shooting a Chinaman does unfortunately happen, the case is to be reported to the magistrate, who will take the necessary action.

At the U.S. Consulate-General, the adjourned case of "Liu Sun-kee *v.* Cunningham" (Messrs. Russell and Co.), was resumed, and on certain points concluded, before Mr. Seward, and Messrs. J. Rowse and H. B. Endicott. The case had stood adjourned since the 2nd July last, for convenience sake, and publicity had been withheld at the request of both sides. The present plaintiff, who at two different periods was compradore at Tientsin for the defendants—his services extending from 1862 to 1873, with a slight break—was sued by them in the Mixed Court, to recover a large sum alleged to be due from him on the settlement of his accounts at the final severance of the connection. Judgment was given by Chên for Messrs. Russell and Co. for upwards of Tls. 6,000. The present plaintiff, who complains that Chên would not permit him to enter into an explanation of his general transactions with the firm, commenced an action against them to recover Tls. 9,264.97 for wages and disbursements on their behalf, during the two periods abovenamed. The gist of the case turned upon the agreement which he said was made with him by Messrs. Russell and Co., but which they deny.—Judgment was delivered on the two points, as to whether there had been a full and final settlement of accounts between the parties in 1869, and again in 1873. The Court decreed in effect that the settlement of 1869 was full and final, but that there was not sufficient evidence to prove a final settlement in 1873.—The result of this decree is that the whole of the accounts between 1869 and 1873 will have to be investigated if the case is proceeded with. At present it stands adjourned until the 28th September.

The fine weather which we have been enduring for the last fortnight broke up on the 17th August. After a light north-

Digitized by Google

easterly breeze during the night, rain began to fall in the morning, and showers continued at intervals through the day. About five P.M. very heavy rain began, and continued at intervals through the night and the following day, with heavy gusts of wind. The barometer fell as low as 29.28. There was every indication of bad weather at sea.

An unusual occurrence took place on the river on the 19th Aug., shortly after noon. The flood tide came in with a "bore," about four feet in height, and some damage was, in consequence, done to various native craft on the river. At the entrance to the Soochow Creek several small junks parted their moorings and came into collision with one of the Astor-house waterboats, doing considerable damage. Another cargo-boat, laden with watermelons, that was being yulohed just clear of the bridge, was capsized. A scene of great confusion ensued on both sides the creek after the bore had passed; adventurers intent upon spoil, putting off in small sampans to fish out the melons floating in the water, some venturing even to swim after them. We learn that damage has been done to the wharves on the Pootung shore, where also several sampans came to grief. It is satisfactory, however, to know that there is no report of loss of life.

We have news from Szechuen which confirms the report from Burmah that the Chinese are assembling troops in Yunnan. The Taoutai and the Chentai had marched from Tali-foo at the head of a large force, for Ten-yi-chow, on the frontiers of Burmah, with the avowed intention of fighting the English in case they dared to enter Yunnan. There was considerable excitement in consequence in the district. Another correspondent writes:—The connivance of the Government of China in the attack on the Yunnan Expedition is now undoubted; it was known here as early as the 10th February that Mr. Margary was to be the victim of some outrage. It is an affair which the English cannot pass over; they will be obliged to have recourse to arms.

While some Chinamen were dragging in the river, near the mouth of Yang-king-pang, to recover the body of a boy who had fallen overboard from a boat and was drowned, they brought up the body of Mr. Wasson, engineer of the tugboat *Fokelin*, who had been missing since the night of the 2nd Aug. On that night he was seen walking on the unprotected pontoon at which the tugboat was moored, and is supposed to have walked accidentally into the water.

The steamer *Flamingo* arrived in port on the 15th Aug., on her third trip from Formosa, with troops, and came to an anchorage in the lower section. On the turn of the flood tide she went up to the Kianguan Arsenal, there to disembark her passengers. She was almost immediately followed by one of the gunboats of the Foochow fleet, with the commander and his staff, and a large number of troops.

The S. S. N. Co.'s steamer *Fusyama* arrived in the river on the 14th Aug., in tow of the *Nanking* and *Honan*, she having been successfully floated. She has been docked in the company's dock. The steamer is, we are told, in better condition than was expected; she has altered her shape very slightly, and it is supposed the repairs required will not be very expensive.

We have to acknowledge the *Customs Gazette* for the second quarter of 1875. The chief features of the Shanghai tables have been already noticed. The total revenue has been Tls. 3,241,741 against Tls. 3,089,536 in the same quarter of 1874. The *Gazette* contains 43 pages of précis of fines and confiscations, but these seem to include two quarters.

On the 20th August the Dutch corvette *Curaçoa* left her anchorage and steamed down the river on her way to Batavia, her ultimate destination.

The schooner *Almatia* has arrived in the river with one of the boilers, &c., of the wrecked steamer *Laptek*.

The new Consul-General for Russia, Mr. C. A. Schatschkoff, has arrived from Europe. Shanghai will be his official place of residence.

The subjoined items of news are from the *Celestial Empire*:—

The telegraph lines have been working very badly lately upon the Southern route, messages taking as long as three days to arrive from London. Considering the critical nature of present relations with China such delays are of considerable importance, apart from business, and what makes the matter more unsatisfactory is that the Telegraph Companies will give no explanation of the cause of the obstruction, although it is hard to suppose that they can be ignorant of it. The reputation of the Companies would not suffer from their being a little more communicative, but their failure to announce interruptions is calculated to destroy the confidence of the public, who have a just cause of complaint if telegrams are taken as is supposed for transmission in one day, whereas they are afterwards found to occupy three days on the journey.

A gang of gamblers appear to have got themselves into rather a mess upon the French concession. Their house having been recently shut up by the French Consul, the two head-men indignantly made an application to the Consulate, setting forth the injustice of depriving them of their little business after they had gone to such expenses in carrying it on—the said expenses, according to their own account, being a regular system of bribery to the French police. This startling statement was illustrated by the production of an elaborate code, which set forth succinctly enough the various sums paid monthly to these officials as hush-money, varying from ten dollars to two. The alleged recipients one and all repudiated the charge; the two principals, natives of Canton and Foochow respectively, insisting that their tale was true and affirming that they were heavily out of pocket and wanted their *quid pro quo*. The dilemma is, we believe, still unsolved.

A man suspected of being one of the chiefs of a large body of outlaws congregated at Chu-lung-shan, being captured by detectives some time ago, was sent off to Suchow the night of the 13th Aug. At his examination before the Che-hsien he denied being one of the band of robbers spoken of, though he acknowledged that he was acquainted with some of their head-men, as formerly he had signed articles of brotherhood with a large number of soldiers under the auspices of Tseng Kuo-fan.

The new hotel upon the Bund bids fair to be an acquisition to Shanghai. The rooms are all lofty, which is a great thing, and those downstairs—presumably the coffee and dining rooms—are spacious and well-proportioned. The single bedrooms are, of course, a trifle small, but even in this respect they compare very favourably with the upper bedrooms in the hotels of London. There is no doubt that when finished the new hotel will prove a very great convenience to both residents and visitors; its situation alone being worth everything, for convenience as well as for the cheerfulness of the constant traffic upon the river and the bund.

HONG KONG.

Our advices by the present mail extend to the 28th Aug.; the French mail from London July 16 arrived out on the 23rd Aug., and the following P. and O. mail of July 23 was received on the 27th August. The following items of news are from the *China Mail*:—

The Financial Statement has been presented by the Administrator to the Legislative Council. The following is a summary of its contents:—

The available funds for 1876 are set down at $960,773.58, and from the Estimates of Expenditure the outlay is calculated as follows:—

Establishments, including Civil List... ...	$556,489.60
Pensions	20,000.00
Charitable Allowances...	3,300.00
Transport	4,500.00
Works and Buildings	135,760.00
Roads, Streets, and Bridges	45,720.00
Lighthouses	500.00
Miscellaneous	36,800.00
Military Contribution...	100,000.00

Assuming that the whole of the $903,069.60 thus particularised will be expended, there will still be an available balance of $57,703.98, and as this will be further supplemented by a loan of $40,000 from the Special Fund to cover the expenditure incurred for Lighthouses, as soon as the total cost is ascertained, there will be a sufficiently wide margin for any exigencies which may arise.

You will observe with much satisfaction, I doubt not, that the cost of the permanent establishments are to be reduced to $556,489.60 in 1876, as against $568,059.60 in the present year, being a saving of $11,570. This is chiefly owing to a diminished expenditure of $7,680 in the police estimate, and the saving of $4,800 consequent on the transfer of the two student interpreters to permanent offices. For works and buildings, roads, streets, and bridges, the proposed outlay amounts to $181,480; and although this is unquestionably heavy, still I have no doubt whatever that you will agree with me that the present defective hospital arrangements should be remedied as soon as possible, and that the site already prepared for the new building should be utilised; that the Central School, the building of which is characterised by Mr. Stewart "as being inadequate in size, insecure as regards its foundations, and unhealthy as regards ventilation," should be rebuilt and enlarged; that the sewerage of the colony, which is dangerous to the health of the community, should be improved; and that it would be extremely unwise to continue to give egress to the mountain torrents through the bye-wash at Pok-foo-lum during the hot and rainy months of the year, whilst through a conduit of ample dimensions they could be diverted for the greatly increased comfort and health of the inhabitants of the city.

The Ordinance embodying the Estimates has been read a first time.

In consequence of frequent difficulty arising from documents being produced at the trial of cases in the Supreme Court without translations, a rule has been made by the Court that in future cases coming before the Supreme Court in original and summary jurisdiction, where advocates are engaged, no foreign documents will be admitted in evidence unless accompanied by a translation, a copy of which should be also served on the other side sufficiently early to allow of an examination being made as to the correctness of the version. In cases in summary jurisdiction, where no advocates are engaged, the plaintiff must deposit the documents on which he intends to rely, with the officer of the Court before the trial comes on, and all documents in a foreign language must be accompanied by a translation.

The *Gazette* notifies the appointment of Mr. W. Keswick to be a member of the Legislative Council, vice the Hon. J. Whittall, resigned. Mr. Whittall has, we believe, left the colony for good, and during his long term of residence was a useful non-official member of the Council; his many acts of private and business generosity gained him much respect and goodwill, and

Digitized by Google

in his departure the colony has undoubtedly lost an estimable resident.

The following is the report of the board of directors of the Hong Kong and Whampoa Dock Company, Limited, presented at the ordinary half-yearly meeting of the shareholders, held at the offices of the company, Club Chambers, Hong Kong, on the 21st August :—

The directors have the pleasure to lay before you their report for the past half-year, ending 30th June, 1875. It has been more favourable than several preceding ones, the company having made a net profit of $57.978.66 on a gross earnings of $312,141.54. The amount now available for distribution including $10,654.43 brought forward for the last half-year, is $68,642.09. Of this the directors would recommend a dividend of 2 per cent. for the half-year, $20,000.00 ; bonus to contributing shareholders, $4,000.00, directors' fees, $2,500.00 ; audttors' fees, $250.00. And to write off the value of Whampoa Docks, $30,000.00, leaving to be carried forward to New Account, $11,892.09.

During this half-year the debt due to the Hong Kong Fire Insurance Company has been reduced from $200,000 to $170,000, and the directors would recommend that a further sum of $10,000 be paid off this debt, and this amount be also written off the value of Whampoa property. The Docks have been fully employed since the accounts have been made up, and the directors hope they will continue to be so.

At the meeting the report and accounts were unanimously adopted. Messrs. J. S. Lapraik and the Hon. J. Whittall having resigned their seats at the Board, Messrs. A. T. Manger and W. Keswick were appointed in their stead, and the directors' nomination of Mr. Blakeman as auditor was confirmed.

An amendment has been made in the Charter of the Colony, which places the Colonial Secretary for the time being in the position of administrator of the Government, in the event of the absence on leave or death of the Governor. That such an alteration was to take place has been known for some time, public attention having been called to the matter by the remonstrance addressed to the Home authorities by Major-General Colborne. That it is a wise one, in view of the status of the Colony as the chief commercial centre of British influence, few will deny.

Apropos of rumours from the North, we learn that the British vessels of war now in Japan have all been ordered to China, to support, as we presume. Mr. Wade's ultimatum. This is sensible, and such action will do more good than reams of correspondence or scores of threats. The one difficulty is to persuade China that we are in earnest ; this once realised, the rest is easy.

We learn on very good authority that the Chinese corvette *Yang Woo* will be despatched very soon on a cruise to European countries, if not round the world. She will be placed in charge of Capt. Tracey, R.N., and will proceed first of all to Shanghai to have her bottom surveyed. If nothing proves to be the matter with her she will come down to Hong Kong first, and thence proceed to other places.

A very enjoyable gathering has taken place at St. Paul's College under the auspices of the Hong Kong Christian Association. Over a hundred soldiers, sailors, and policemen—several of the first-named accompanied by their wives—were entertained, first with tea and cakes, and afterwards with singing, games, and addresses.

The German steamer *Vindex*, which arrived here on the 15th August, is, we believe, the smallest steamer that has ventured out from Germany to China ; her length is seventy and her breadth fourteen feet. She is twenty-eight tons in measurement, and has come out from home to run on the Amoor River. She proceeds to Shanghai in two or three days.

It is becoming daily more and more apparent that the native journals are rapidly gaining ground and extending their influence ; and so long as they are fairly well conducted, the fact may be regarded as a healthy sign of the times.

We hear that at Tamsui, after two days' heavy rain, strong freshets occurred in the river, causing the loss of several junks and flooding the European houses at T'wa-ta-tea. The extent of the damage done is unknown.

A few days since H.E. the Adminstrator, the Hon. J. G. Austin, accompanied by the Hon. C. C. Smith, Acting Colonial Secretary, and Mr. M. S. Tonnochy, Acting Registrar-General, paid a visit to the Tung Wah Hospital.

The s.s. *Cybele*, which ran upon a reef near Raffles Island and has consequently been in dock at Singapore for the last month, arrived here on the 21st Aug.

It is rumoured that the Governor-General of Kwangtung has been degraded, in consequence of his action respecting the Waising lotteries.

The Hong Kong death-rate for the quarter ending June 30 was 2.46 per cent. for Europeans and 2.28 for Chinese.

A large matshed opposite the Honan Temple, Canton, caught fire recently, and many lives were lost.

The Provincial Treasurer of Canton died on the 23rd August.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 4th Sept. ; no later mail from London had arrived out. We take the following items of intelligence from the *Straits Times* :—

Sir William Jervois left on the 30th Aug. in the *Pluto* on a visit to the Malay States on the West Coast of the Malay Peninsula, where, according to all accounts, matters are not in a wholly satisfactory condition. There has been no disturbance, but the people do not fall readily into the Residential system, which is but imperfectly understood, and the working of which is altogether new both to the chiefs and their subjects. It was naturally to be expected that matters would not go on smoothly at first, and that difficulties would be encountered in endeavouring to introduce order, a systematic collection of the revenue by means of fixed duties, and the engrafting of English law and customs upon those of the country. It would be, indeed, surprising were the Malay rulers and chiefs to unhesitatingly adopt all the changes proposed by the Residents without even a struggle to retain at least the semblance of their former independence ; and probably the difficulties experienced in working the new system of administration may be due to this cause, and may be overcome by firmness and patient perseverance on the part of our Government.

In Perak, ex-Sultan Ismail, who was deposed by the election of the Rajah Mudah, Abdullah, still claims the throne, and refuses to surrender the regalia of Royalty, without which it is impossible to crown the young Sultan ; and it is doubtful if the substitution of a new regalia from Europe would be satisfactory to the Malays themselves. It is said, moreover, that Ismail has with him the sympathies of a large portion of the people, and has in fact the strongest party. Sir William Jervois intends, in the present visit, to go to Laroot, and thence proceed overland to Perak, in order to oscertain the state of the country from personal observation, and be better able to form an opinion as to the proper course to pursue under the circumstances. H.E. expects to be absent only about sixteen days.

The recent visit of Sir William Jervois to the States on the East Coast of the Peninsula has induced the Sultan of Tringanu to pay a visit to Singapore. He having intimated his desire to come, the *Pluto*, which was going to Pahang to meet a surveying party that had been sent across the country, was ordered to proceed on to Tringanu to bring the Sultan down. He arrived on the 29th August last, with all his wives, family, and relations, about 200 in all, and landed next morning under a salute of eighteen guns, and was immediately driven off to Government House, where he held a reception, after which he proceeded to the house that has been provided for the accommodation of himself and family during his stay. The Sultan has attended an entertainment given by Professor Vanek, the wizard, whose performances excited his astonishment and admiration, he having never before seen anything of the kind.

The Singapore Rifle Association has held another spirited competition at the rifle-range on the race-course. There were ninety-one competitors and eighteen prizes, the first prize falling to Sergeant Instructor Tomlinson, of the 1-10th, who was closely matched with Sub.-Lieut. Drennan, of the Singapore Volunteer Corps. The shooting between these two is always very close, and on the present occasion Sergeant Tomlinson only led by one point. The shooting, on the whole, was not so good at this competition as on previous occasions.

A telegram from Hong Kong announces the death of the well-known and much respected Chinese merchant Lim Liack, of the wealthy and leading firm of Liack, Chin Seng, and Co., of this colony. The deceased resided in Singapore for about fifty years, and was a great promoter of tin mining in the peninsula, as well as of the cultivation of tapioca in Malacca, and moreover did a large business with China ; he was always looked up to by his countrymen and others as an upright and honest merchant and a most enterprising man. He died at the age of seventy-one years.

News has been received from the Philippines of the seizure of the British steamer *Sultana* by a Spanish gunboat, for breaking the blockade of Sooloo. The steamer had been landed in and hidden among the bushes, with her funnel taken down, and was deserted by her captain and all the crew, who fled into the jungle. She was taken to Cavite, and the seizure will be inquired into by a Prize Court, when her captain, owners, and all interested in her have been cited to appear and put in their pleas. The steamer, we are informed, was under charter by the Victoria Trading Company.

We are glad to learn that the General Order regarding the appointment of Mr. C. H. Ord as Acting Head Inspector of Police has been rescinded, and that Mr. Ord ranks as Inspector only during his period of probation.

Rapid progress is being made with the Water Works ; the reservoirs are fast approaching completion, and the work of laying the pipes has been begun ; this latter part of the work will, however, take a long time to complete.

Commercial Report.

(For dates see first page.)

IMPORTS.

Tientsin.—Business to a fair extent had been effected at steady rates.

Hankow.—There had been more activity in the market for Grey Shirtings ; otherwise little, if any, change had occurred.

Digitized by Google

CHINKIANG.—Messrs. Spencer and Wolff write on the 18th Aug.:—Only a limited business has been done in Piece Goods during the past week, as holders are firm in demanding higher rates than dealers are willing to pay; but as prices continue to harden in Shanghai, they will be compelled to give way soon, stocks in the country not being large.

SHANGHAI.—The *North China Herald's* Report says:—The late excitement has subsided. Coincident almost with the closing of the French mail every symptom of an extraordinary business disappeared; but this, perhaps, is not to be regretted, inasmuch as trade has settled down into a steadier groove, and demand has become more general in its scope. Moreover, a lull was not altogether unlooked for by importers, albeit, they fondly hope the present may prove only a breathing time, and that as soon as the dealers have disposed of their previous heavy engagements they will start again with renewed vigour.

FOOCHOW.—Lead was quoted at $8.50 per picul against Tea.

HONG KONG.—The arrivals during the interval besides the mail steamers had been the s. s. Cybele, Naples and Diomed; there had been considerably more activity in the import market than for some time previously, and although there had been no general advance in prices, certain staples were in a better position. These remarks applied more particularly to the earlier part of the fortnight because the last week had been very much quieter, buyers seemingly having satisfied their wants.

CANTON.—Lead: The market had been quiet and prices had declined to $8.40 to $8.45 for LB and $8.45 to $8.50 for WB. Quicksilver quotations, $102 to $103 per picul nominal.

SINGAPORE.—The fortnight is reported as having been one of extreme stagnation—there has been very little demand, and the amount of business transacted had been small, at unaltered prices.

PENANG.—Business had been very dull; transactions generally had been smaller than those recorded during the previous fortnight; sales were difficult to effect and prices, as a rule, were weak.

EXPORTS.

—o—

TEA.

HANKOW.—Messrs. Drysdale, Ringer, and Co.'s Report says:—We have had a very quiet market, enlivened by the arrival of a few third-crop teas, almost all from Young-low-toong. A few of these are fair Teas and have been taken at Tls. 17½ to 19 per picul. Settlements for the fortnight are: 1,898 chests, 4,689 half-chests, 425 boxes at 1s. 0¾d. to 1s. 2¾d. per lb.; 1,229 chests, 3,515 half-chests, 750 boxes at 10¾d. per lb. Apart from the third-crop teas, of which only seven or eight chops have been settled, business has been chiefly in Oonfar tea at from Tls. 13½ to 16½, same Teas last year commanding Tls. 16 to 20 per picul. Our export still shows an excess of three millions compared with last year, but Tea is coming forward from the country very slowly and the quantity preparing is said to be small, so by the next two or three mails we may see this reduced.

KIUKIANG.—Black Teas: The arrivals for the fortnight had amounted to sixty-eight chops, or 11,180 chests, of which five chops had found purchasers at Tls. 14 to 23 per picul. Total arrivals 156,845 chests. Green Teas: Total arrivals 7,005 half-chests.

SHANGHAI.—The Chamber of Commerce Circular says:—Black: Owing to the firmness of holders, business has been restricted, the settlements for the fortnight are much smaller than for the previous interval. Prices show no quotable change, but are if anything a shade stiffer for all but common descriptions. Common Teas are a little easier, but no weight of Tea could be bought under Tls. 15 a lb. Supplies have been held back, third-crop Teas, which usually come forward freely at this period of the season have not yet been offered in any quantity, and no sales of them have been made on this market. The export figures have fallen to about a par with last season's at this date. Settlements for the fortnight are 24,535 chests; shipments on owners' account, 1,031 chests; stock, 30,100 chests. Quotations: Hohow, common to good, 9½d. to 1s. 3½d.; Oonam, common to fair and good, 10½d. to 1s. 3½d.; Ningchow, fair to good, 1s. 1d. to 1s. 5½d.; Oopack, fair to good 11d. to 1s. 1½d. Green: The purchase on 10th Aug. of two of the standard chops of Tienkai at Tls. 35 and 36 opened the market for these kinds. These prices are about 20 per cent. below last season's opening rates; but, in face of the dull demand, and full stocks on the home markets, a lower commencement might have been looked for. Little business has resulted since, Teamen being unwilling to accept the reduced offers made. In Pingsueys a fair business is doing, at prices, which, taking quality into consideration, are about on a par with those last quoted. The following are about the prices paid:—For Country Tea, 5,611 half-chests, at Tls. 22.5 to 36 per picul; for Pingsuey, 10,268 half-chests, at Tls. 21 to 30 per picul; stock, 57,600 half-chests.

FOOCHOW.—Messrs. Westall, Galton, and Co. report:—Although during the past week buying has become more general, still the total amount of settlements does not show any increase, and the market closes very quiet. Congou.—The prices of the better kinds costing from Tls. 17 short have been maintained by the operations for the Colonies; but for the commoner grades, teamen have accepted a decided reduction on low rates, and in many cases fully a Tael per picul decline is noticeable. Third crop Teas are arriving very slowly, and those that have been shown are poor in quality and leaf. Souchong.—No alteration to report. Oolong.—One line only has changed hands. Flowery Pekoe.—No transactions. Scented Teas.—Prices remain the same; Scented Orange Pekoes are, as a rule, very inferior and in many cases mixed to a great extent with Formosa Oolong. Quotations are:—Congou: Flavoury to medium, 1s. 3⅛d. to 1s. 6¼d.; good common to flavoury, 1s. 0⅛d. to 1s. 2¼d.; leafy to common, 9⅛d. to 11¼d.; dust to leafy, 7⅛d. to 8⅝d. Souchong.—Fine to finest, 1s. 9d. to 2s. 0¼d.; good to fine, 1s. 3⅛d. to 1s. 6⅛d.; good common to flavoury, 1s. 0⅜d. to 1s. 2½d. Oolong.—Good, 1s. 3½d. Scented O. Pekoe.—Good to fine, 1s. 1⅜d. to 1s. 5d. Scented Caper.—Good, 1s. 1d. to 1s. 1⅝d. The Export to date to Great Britain, the Continent of Europe, and the Cape of Good Hope amounts to 33,055,193 lbs., against 29,635,742 lbs. last year. To America, 87,555 lbs., against 154,936 lbs. last year; to the Colonies, 8,512,582 lbs., against 7,515,694 lbs. last year.

FORMOSA.—Advices are dated Tamsui, 16th instant, and report Chinese as still the chief buyers in an active market. Arrivals of Ooloongs were larger, but show no improvement in quality. Teas from "Fine" up were inquired for, but teamen demanded high rates. The total export to date amounted to 2,526,912 lbs., against 1,398,147 lbs. at same time last year. Business had been active for native-packed Tamsuis at firmer rates. A small cargo of 4,000 half-chests was eagerly bought up at prices on a basis of $29, duty paid, for superior, $33 to $34 for fine, and $42 to $46 for finest to choice, the last being only in small quantity. This activity was due to the improved advices telegraphed from New York. The British barques Anazi and Miako are on the berth for New York and the Benefactor is shortly expected to load for the same destination.

AMOY.—Congous: A steady business had been passing at about previous rates and 3,058 half-chests had been settled at $15 to $18. Ooloongs: Arrivals continued on a very limited scale and no immediate disposition was shown to commence purchases for the American market. The total supply for the present season was expected to be not more than 80,000 half-chests. Arrivals to date, Congou 58,582 half-chests; Ooloongs 48,026 half-chests.

CANTON.—Messrs. Deacon and Co.'s Report says:—Though we have again to report a generally quiet market, yet settlements for the fortnight have been larger than for some time past, Teamen having displayed more willingness to make some concession in prices. Congous: A small business has been done at rather easier rates. Few market transactions are reported at Macao, the shipments hence being chiefly contract Teas. Scented Teas:—Natives have at last given way in their demands for Capers, and a few settlements have resulted at much lower rates than have been hitherto current. A few small parcels of well-scented Teas have been bought at Tls. 19 to 20, and good common to fair Teas can now be obtained at Tls. 12½ to 15. A fair demand has existed for Pekoes, transactions being confined for the most part to "long leaf" kinds, owing to the very small supply of "new makes." These latter Teas show no change in value, but "long leaf" Teas generally have been bought on easier terms, though at the close Teamen are firmer for the medium grades, the stock of which is now reduced to a small compass. Fine and finest description have been dealt in to some extent at a decline of about one tael on quotations of last fortnight. Canton Greens:—300 boxes is the only settlement reported.

SILK.

SHANGHAI.—A very quiet tone had prevaded the market, Continental orders had not been so urgent, and English advices continued of a gloomy nature. Under such circumstances, it would naturally be expected, that buyers would have obtained some slight advantage, but such had not been the case, and the market sorts of Tsatlees, ranging from Tls. 270 to 290, which were most sought after, actually showed worse value than at date of last report whilst in Kiahings, hardly anything could be bought below Tls. 270. Amongst latest purchases were Kuekee's King-hock, at Tls. 307½; Gold Lion No. 3 and 4, Tls. 330 and 310; Yellow Elephant, Tls. 300; Donkey chop No. 4, 307½; Ching-younng-shing's Kiahings No. 1 and 2 were taken for last mail at Tls. 345 and 310; whilst a few Wooseihs and Laiyangs still found buyers, at Tls 225 to 240; Re-reels continued to be purchased for America. Settlements for the fortnight, Chinas, 2,800 bales. Total settlements since 1st June, 1875, 26,500 bales; against 1874-75, 26,500 bales; 1873-74, 20,500 bales. Comparative unsold stock on this market, at date 1875, 15,000 bales; 1874, 16,000 bales; 1873, 8,500 bales.

CANTON.—Although shipments during the fortnight had been considerable, actual transactions on the market had been only moderate, estimated at 600 bales. Quotations were almost unaltered, and the laying down cost was still 1s. per lb. in excess of rates current in London. Of fourth-crop Silk about 150 bales had arrived from the country, the thread appeared to be of fair quality, but rather full sized, and the natives asserted that about fifty per cent. of the yield was yellow Silk. 2,000 bales were expected to be forthcoming, and probable export for season was generally estimated at a little under 12,000 bales, against 8,900 bales last year.

THE MAILS.

—o—

PRESENT INWARD MAIL.—BRINDISI, OCT. 6.—The P. and O. Company's steamer Malta, with the homeward India and China mails, arrived here at 6, and the mail left at 7.15 A.M. for London

HEAVY PORTION OF PRESENT INWARD MAIL.—PORT SAID, OCT. 4.—The P. and O. Company's steamer Malwa left at 1 P.M. for Southampton, where she may be expected about the 17th inst.

HEAVY PORTION OF LAST INWARD P. AND O. MAIL.—SOUTHAMPTON, OCT. 3.—The P. and O. steamer Cathay, from China, *viâ* the Suez Canal, arrived at Southampton to-day, bringing the heavy India, China, and Australian mails, 71 passengers, £800,370 in specie, and 18,277 packages of cargo. Her dates were:—Shanghai, Aug. 8; Hong Kong, 14; Singapore, 21; Penang, 23; Galle, Sept. 1; Aden, 11; Suez, 18; Port Said, 20; Malta, 24; and Gibraltar, 28.

INWARD MAIL DUE NOV. 1.—GALLE, OCT. 4.—The Messageries Maritimes steamer Amazone, with the inward French mails from China and Japan, left here to-day for Aden.

OUTWARD MAIL OF SEPT. 10.—GALLE, OCT. 5.—The Messageries Maritimes steamer Tigre, from Marseilles on the 12th of September, left here to-day for Singapore.

HEAVY PORTION OF NEXT OUTWARD MAIL.—SOUTHAMPTON, OCT 7.—The P. and O. Company's steamship Hydaspes sailed to-day with the heavy India and China mails, a full cargo, and £51,409 in specie and jewelry. The Hydaspes takes 170 passengers, and 82 proceed by the corresponding steamer from Venice and Brindisi, making a total of 252.

Digitized by Google

The Hydaspes goes through the Suez Canal to Calcutta, passengers for Bombay changing ships at Suez.

Outward Mail of Sept. 24.—Suez, Oct. 8.—The P. and O. Company's steamers Avoca and Poonah left at 1 P.M. for Bombay and Calcutta respectively.

Dutch Outward Mails.—Southampton, Oct. 6.—The Nederland Company's Royal Mail steamship Prinses Amalia sailed to-day for Padang, Batavia, &c., with Dutch mails, 100 cabin passengers, 540 Dutch troops, and a full cargo of general merchandise.—Batavia, Oct. 1.—The Star Ball Line steamer Acton arrived here yesterday in thirty-nine days from Southampton, including all stoppages.

TELEGRAMS FROM THE FAR EAST.

THE DIFFICULTY WITH CHINA.

(TIMES' TELEGRAMS.)

Rangoon, Oct. 2.—The Chinese report that Lee-see-te-hai has escaped, disgraced. Officials are, by amputating hands, torturing the inhabitants of Manwyne to discover the assassins of Mr. Margary. An offensive and defensive Treaty is reported to have been concluded between Burmah and China. Trade is reviving.

Shanghai, Oct. 4.—Mr. Wade has not withdrawn from Peking. It is reported that the Hon. T. G. Grosvenor is to go to England with despatches. No details have transpired, but it is not thought that a final settlement has been made.

Shanghai, Oct. 4.—An edict published in the *Peking Gazette* concedes intercourse between the Chiefs of Government Departments and Foreign Ministers.

(MACLEAN'S TELEGRAM.)

Shanghai, Oct. 2.—The latest news received here from Tientsin, dated Sept. 28, announces that the British Minister, Mr. Wade, has satisfactorily settled the difficulties pending with the Chinese Government. The opinion prevails amongst the British community in Shanghai that there is no probability of hostilities with China. The Viceroy of Chihli has been summoned by the Chinese Government to Peking.

(REUTER'S TELEGRAM.)

Shanghai, Oct. 4.—Mr. Wade, the British Minister at Peking, has notified to the other Foreign Legations that the negotiations which have been carried on by him with the Chinese Government have averted immediate war.

BURMAH.

Simla, Oct. 7.—The Burmese Government has unconditionally agreed to the passage of an escort of British troops through Burmese territory, accompanying a fresh expedition to Yunnan, if another expedition should be necessary.

CHINA MARKET REPORT.

Shanghai, Oct. 7.—Grey Shirtings, 8¼lb., Tls. 1.9.0; cotton, Shanghai, Tls. 12. Tea, black, firm; ditto, green, quieter and weaker. Silk quiet, but steady; transactions only in common kinds. No. 3 Tsatlee Koonfongsing, Tls. 400.

Hong Kong, Oct. 7.—Grey Shirtings, 8¼lb., $2 50c.; 16-24 water-twist, $103; cotton, fair medium Bengal, $134.

Shipping Intelligence.

ARRIVALS.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Oct. 4, at Amsterdam, from Rangoon, Mary Ann; 6, at New York, from Singapore, Ivalo; at Clyde, from Java, Mutlah; 7, at London, from Bassein, Alpha, Astride, Catherina G; 6, at Antwerp, from Akyab, Andrea Wilhelmina; at Hamburg, from Rangoon, Anna; 8, at Falmouth, from Rangoon, Mountain Ash.

DEPARTURES.—Oct. 6, from Cardiff, for Singapore, Unione S.; for Hong Kong, Hermann; Aug. 28, from Rio Janeiro, for Batavia, C. O. Whitmore; Oct. 6, from Southampton, for Batavia, Prinses Amalia (str.); 7, from London, for Penang, Ocean Rover; 8, for Shanghai, Cawdor Castle (str.); 6, for Yokohama, Ullock; 7, from Newport, for Singapore, Argo; 4, from Bordeaux, for Saigon, Antoinette; 6, from Amsterdam, for Samarang, Graafstroom; 7, from London, for China and Japan, Montgomeryshire (str.).

LAID ON.—At London, for Shanghai, Eliza Shaw; for Colombo, Strathmore.

MISCELLANEOUS.—Malta.—Passed, Oct. 5, from Hankow, for London, Ægean (str.). Suez, Oct. 6.—Arrived, from Foochow, Tom Morton; from Shanghai, Bellona, both for London. Latest advices with regard to the Thomas Sorby (str.), ashore at Oosterbank, state that the vessel is in same position, sea too high for steamboats or lighters to get alongside; captain and crew landed. A telegram received, dated Oct. 8, states that many barges are along the vessel, and the weather is fair.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BAIN—On the 2nd Oct., at Hong Kong, the wife of G. M. Bain, of a daughter.
BIRT—On the 20th Aug., at Shanghai, Mrs W. Birt, of a daughter.
COPE—On the 27th Aug., at Hong Kong, the wife of Herbert Cope, of a son.
DUNMAN—On the 19th Aug., at Shanghai, the wife of R. Dunman, of a son.
HOWE—On the 30th July, at Nagasaki, the wife of H. A. Howe, jun., of a daughter.
JOHNSON—On the 15th Aug., at Hankow, the wife of R. M. Johnson, United States Consul, of a son.
MANGER—On the 28th Sept., at West Brompton, the wife of J. E. Manger, late of Hong Kong, of a son.
ROWBAND—On the 31st Aug., at Singapore, the wife of C. F. Rowband, of a daughter
SIDGREAVES—On the 30th Aug., at Wood-Neuk, Singapore, Lady Sidgreaves, of a son.
SMITH—On the 19th Aug., at Shanghai, the wife of D. Wares Smith, of a son.
SMITH—On the 3rd Aug., at Manila, the wife of W. M'Gregor Smith, of a son.
WALKER—On the 22nd Aug., at Rangoon, Burmah, the wife of Lieut.-Colonel G. A. Walker, Asst.-Comsy.-General, of a son.

MARRIAGES.

BEHRENS—FAIRLAND.—On the 7th Oct., Sydney L. Behrens, of Manchester, to Julia Fairland, daughter of the late Mr. Thomas Fairland.
CORNER—CRANE.—On the 14th Aug., at the Cathedral, Shanghai, by the Very Rev. Dean Butcher, Alfred Corner, third son of W. E. Corner, Leadenhall-street and Hackney, to Annie, eldest daughter of Stephen Crane, of Tower-street and Hackney.

DEATHS.

BROWN—On the 11th Aug., at Saigon, Captain William Robert Brown, of the British ship *Argo*, aged 42 years.
DUNDAS—On the 2nd Oct., at Peckham, William Edward Dundas, late Commander in the service of the P. and O. Company, aged 40 years.
HARVEY—On the 15th Aug., at the Civil Hospital, Hong Kong, Walter Harvey, engineer, *Chinkiang*, late of H.I.C.M.'s gunboat *Tulan*.
HEWLETT—At Kings Kerswell, Newton Abbot, Devon, William Strode Hewlett, aged 55 years.
MARSHALL—On the 23rd Aug., at Hong Kong, George Marshall, aged 28.
SAUNDERS—On the 6th Oct., at London, Frederick Saunders, of St. Anna, Aigburth, near Liverpool, aged 63 years.

Miscellaneous.

LORD DERBY ON CHINA.

Lord Derby was present Thursday at a banquet in Liverpool given by the Mayor. In replying to the toast of his health, he dwelt on three topics—the insurrection in Herzegovina, our difficulty with China, and the Admiralty Circular in reference to fugitive slaves. With reference to the difficulty with China Lord Derby said:—In China we have claims of our own to press and interests already extensive, and which may in course of time become almost incalculably great. I had hoped till the last moment that I might be able to come here as a welcome guest, and, bringing the news that our Chinese difficulty was peaceably settled. That is not the case; no decisive intelligence has reached the Foreign-office on the subject. From what we know already I am hopeful that matters will go well, but that is all I can say. I need not enter into the history of the dispute; most of the facts are familiar to you through the newspapers. For years past it has seemed probable to careful observers that some collision of this kind would take place. It has come at last, and we must do our best to turn it to good account, and make it the means of putting our relations on a better footing in future. I need not say that if it could be honourably escaped a war with China is a thing which we should all deprecate. We do not look forward with pleasure to the prospect of sacrificing men and money in a war where climate would be the chief enemy, where our opponent is hopelessly inferior in strength, and where, therefore, there is but little military reputation to be acquired, whatever that may be worth; but more than that, we don't want to break up a vast empire, to have another "sick man" on our hands, and to ruin a people with whom our object in holding intercourse is the development of trade; therefore you need not fear any excess of pugnacity on our part. But it is no use running away from plain duties because they are unpleasant, and temporising with a difficulty is generally the way to make it bigger. Our demands have been moderate and just, and we mean to adhere to them, and if trouble comes we have a good cause, and we can say with truth that the fault has not been with us.

Referring to Lord Derby's remarks *The Times* says:—Lord Derby will command the complete assent of the whole country for what he says of our relations with China. A war with such a State is peculiarly unwelcome to any great nation with a sense of self-respect. We could gain no honour in a contest with a country as weak as it is vain. Nor can we lightly run the risk of having to replace a Government which a short war might destroy. It is, therefore, unwelcome news that the Foreign-office has received no decisive intelligence as to the intentions of Peking, for Lord Derby admits as frankly as the most warlike Minister could that we must insist on the fulfilment of our conditions, be the cost what it may. The lives and the rights of our countrymen in China must be secured, and the Government of that country must give substantial proof of a determination to fulfil its promises. If it will not comply with just and moderate demands, it must take the consequences of its own infatuation. Happily, Burmah has ceased to inspire misgivings, for her readiness to let another expedition to Yunnan be accompanied by an armed escort of British troops, if we should see fit to undertake such an enterprise, is all that we can desire. We have no aggressive designs in seeking to open up an overland trade route with China. To punish the murderers of Mr. Margary is the duty of the Chinese Government, and all we want is to protect an exploring party from treachery. In agreeing to give a passage through his dominions to an escort of our troops the King of Burmah offers a sign of friendship which, in the critical state of our relations with China, may be found serviceable for other ends than those of trade.

THE NEW ADULTERATION ACT.

On the 1st inst. the Act to repeal the former Statutes on adulterations and to make better provision for the sale of food and drugs in a pure and genuine condition came into operation. From and after the 1st of January next tea is to be examined by Customs officers on importation, and if found to be unfit for human food is to be forfeited and destroyed. There are several provisions as to the execution of the Act in England, Scotland, and Ireland.

Success has thus attended the recent crusade against impure tea After much agitation, and very prolonged and careful official consideration, a scheme has been produced by means of which it is hoped and believed that the importation of worthless tea will be very materially checked, if not prevented altogether. An order has been issued by the Board of Customs setting forth the details of the arrangements which have been made, and giving general instructions for the carrying into operation of the scheme resolved upon. To attain the object which they have in view, the Commissioners of Customs have ordered that there shall be three inspectors, two assistant inspectors (who will perform the necessary duty during the absence of the inspectors), and one analyst, to whom will be entrusted the important functions connected with examination. Each of the three inspectors will very properly receive an additional allowance of £50 a year, subject to a proportionate reduction during their absence from duty, while the assistant-inspectors will be paid at the same extra rate when they are acting for the inspectors. The analyst is also to receive an additional allowance of £50 a year. The inspectors who have been appointed are: Mr. C. T. Pickford, surveyor of the first class, and Messrs. C. Bernard and E. P. Le Feusre, surveyors of the second class; while Messrs. W. F. Bramall and T. Satchell, assistant-surveyors, have been appointed assistant inspectors. Mr. J. B. Keene, a gauger of the first class, is to be the analyst. The inspectors will continue to perform the ordinary duties of surveyors, and they will also examine the tea brought to (1) Uptown Station, (2) Upper and Lower Sufferance Wharves, south side, and (3) wharves above London Bridge, north side. The surveyors of the Lower North Sufferance Wharves, London Docks, and Monastery Warehouse, Legal Quays, will examine the tea which may be brought to those stations without additional remuneration, communicating with one or other of the inspectors when necessary. The Surveyors-General will make arrangements for the performance of the necessary duties at the outports, but special arrangements will be made for the port of Liverpool.

THE CHINESE COMMISSIONER.

The subjoined letter has been addressed to *The Times* by Wong-Ching-Yong:—I shall be exceedingly obliged if you will kindly find space for the following observations in your widely circulated newspaper, in order to correct a mistake into which some English newspapers have fallen. Last June, during my sojourn in England, where I had been visiting the mines and the principal manufactories of machinery, the newspapers thought that I had been sent by the Chinese Government, and consequently spoke of me as an Imperial Commissioner. I was not sent by the Chinese Government, but by the authorities of Shanghai, to come to terms with Mr. Henderson; and also by the Director of the Arsenal at Nanking to visit the mines and manufactories of machinery in Europe. I would not have trespassed on your valuable time and space had it not been that I received a letter from Shanghai telling me that the Chinese newspaper *Sing-po*, in its issue of the 14th Aug., accused me of having assumed a false title. I declare that I have never assumed the title of Imperial Commissioner, nor have I given any one to understand that I was sent by the Chinese Imperial Government.

THE Vienna correspondent of the *Daily News* telegraphs that Chinese agents have arrived here for the purpose of purchasing a large number of smooth-bore bronze cannons. The Government possesses a considerable stock, which it is intended gradually to recast, after the system invented by General Uchatius. The correspondent considers it doubtful whether the application of the Chinese will be complied with.

Captain Hugh Campbell, of the Undaunted, 31, flagship of Rear-Admiral R. J. Macdonald (Clanranald), commander-in-chief in the East Indies, has been compelled to resign the command of this ship owing to continued illness. He will be succeeded as flag-captain by Captain Harry W. Brent.

THE Eastern and Australian Company's steamer *Somerset* arrived at Singapore from Brisbane on the 1st inst., with Queensland mails fo London.

THE AMENDED PRESS LAWS IN JAPAN.

At the conclusion of his valuable and elaborate notes and observations in regard to the then state of education in Japan, which were drawn up some two years ago, Mr. R. G. Watson, at that time Her Majesty's Secretary of Legation at Yedo, pointed out that a great educational influence, which was even then actively at work, and the power of which, in his opinion, might be expected to extend itself from day to day, was to be found in the Native Press that had sprung up in such a remarkable manner thoughout the country. Mr. Watson's prediction has been more than verified, and so great has the power of the Native Press, as well as the determination to wield it, become during the past two years that, after much consideration, the Mikado's Government has deemed it both necessary and advisable to amend, in a somewhat restrictive sense, the regulations issued in 1874 for the publication of newspapers and books. The new Press laws, as they must be termed, which have recently been made public by the *Nisshin Shinjishi*, consist of sixteen articles, with two additional rules appended. Articles 1 and 2 set forth the manner in which authority to print and publish a newspaper is to be applied for, as well as the penalties for the violation of the rules. By Art. 3 it is provided that in the event of the death or dismissal of the Editor, and of any change of proprietors, printers, or editors, notice must be given to the local authority within fifteen days. Art. 4 explicitly states that "the proprietor, the head man of a company of owners, editors, and temporary editors, must be Japanese." This appears to us to be a very salutary and wise regulation, and we think that a great deal of unpleasantness would be avoided if a similar practice obtained in the management of the germs of a native press in China, which from its present small beginnings, may become important before many years have passed. The chief provision of Arts. 5 and 6 is that the names of the editor and printer must be given at the end of each paper; and in the following Article it is laid down that should anything defamatory or slanderous appear, the editor will be held primarily responsible, and after him the writer, but no mention is made of any risks incurred by the printer and publisher. Considered from an English point of view, Art. 8 is foolish and objectionable, for it requires that any person writing on home or foreign matters, the laws or resources of the country, literature, art, religion, &c., &c., *must* sign his name to his articles; and any person, writing under a feigned name, may be imprisoned for thirty days, and fined ten *yen*. It is, however, more fairly provided that any one using the name of another person will be liable to imprisonment for seventy days, and a fine of twenty *yen*. Art. 9 seems unjust, for it orders that writers, translating from foreign papers, must sign their names; but Art. 10 shows a more lenient spirit, for it permits the appointment of a substitute, "under certain circumstances," in case the editor be imprisoned, presumably for infraction of the press laws. Art. 11 is a most extraordinary one, for it ordains that letters sent from people to a newspaper for publication must be published under a penalty of from ten to one hundred *yen!* We pity the unfortunate editor who is compelled to conduct his paper under such an odd regulation as this. Articles 12, 13, and 14 provide for the punishment of offences against the constitution, &c., and seem fair enough, although in most well-regulated countries one would think that the force of public opinion would be sufficient to correct such misdeeds as those defined in these Articles. Articles 15 and 16 are open to serious objections, for they involve a great curtailment of the reasonable privileges of the press: the former ordains that proceedings of the judicial courts and the actions of judicial officers may not be published, unless they are officially notified, and that infringement of this Article shall involve imprisonment from one month to one year, and a fine of from 100 to 500 *yen;* and the latter, that no memorial may be published without previous permission from certain quarters, under similar penalties as those provided in the last case. The two additional rules direct that any person who already has permission to publish a newspaper, must furnish reports, as required by Art. 2, within ten days after receipt of the new regulations, and that in the event of a paper having several editors, the proprietors must appoint a chief editor within two days. Viewed as a whole, these amended press laws do not appear to us to be nearly so harsh as we had been led to expect from the rumours which reached us before their actual publication, though at the same time we think that the Japanese Government will do well to modify and revise at an early date those particular Articles to which we have taken exception, for they may rest assured that they will not find it to their advantage in the long run to hamper the native press with absurd and foolish restrictions.

THE CHINA DIFFICULTY.

The latest telegrams with reference to the negotiations in China are by no means satisfactory. Mr. Wade, it appears, has notified the other Ministers at Peking that immediate war has been averted, and we are further informed that it is announced in the *Peking Gazette* that Foreign Ministers are to have the right of visiting the Heads of Chinese Departments. Although, of course, there is no necessary connection between these two pieces of intelligence, it is impossible not to consider them in conjunction the one with the other. Knowing the usual tactics resorted to by the Chinese we cannot but conclude that the concession with regard to visiting the Heads of Departments has been made as an inducement to Mr. Wade not to press his demands for redress of the Margary murder too strongly at the present moment. In other words, Mr. Wade has been asked to work in with the Chinese policy of temporising and delay, and has consented to do so. No doubt reasons of apparent weight will be given for the course which he has adopted, as Chinese ingenuity would readily lay before him some plausible ground for delay, which is all that they want to carry out their plan of evading the responsibility of punishing the offenders. So the Minister, whose habit of over-estimating the importance attaching to official *status* in China is as well known to the Chinese officials as to foreigners, is dallied with by a concession which will tickle his fancy and flatter his vanity, while further delay is countenanced in hunting out and punishing the men guilty of the murder of a British official six months before. We can only trust that before the matter be done with, Mr. Wade, whose diplomatic talents, when he is determined to exert them are if no mean order, will show that he is not to be caught by the bait which has evidently been thrown out to him. It may be very well to improve our intercourse with Chinese officials as a means of placing our general relations with the country on a more satisfactory basis; but, at the present moment, when so grave a matter is in hand as obtaining reparation for the gross outrage which has been committed in the murder of a gentleman who, as Major-General Margary points out in his letter to *The Times*, was practically in the position of representing the British Government, it seems little short of puerility to be discussing questions of etiquette and official formality. There would surely be time enough to decide a point of this character after the Chinese Government had let Mr. Wade know definitely whether they intended to comply with the demands he made as a basis of maintaining friendly relations.

THE ROUTE BETWEEN COCHIN CHINA AND YUNNAN.

In a recent issue we noticed the conclusion of a Treaty between France and Annam, by which the King of that country agreed to throw open three ports in Tonquin, and to place his kingdom under French protection. The probable completion of a Treaty of this kind has been long foreshadowed, and the matter is of especial interest and importance at the present time, when the opening up of a trade route with Western China is occupying so much public attention. In the comments which have been made upon the subject, the fact that Russia and Great Britain are approaching their frontiers to those of China, and "claiming the duties of good neighbourhood" has been much dwelt upon, but it has of late been overlooked that France is doing the same thing in a more definite, and what may ultimately prove, a more effectual manner. It is somewhat curious that this fact should seem to be passed over at the present time, seeing that on other occasions, when there would appear to be less reason to notice it, a great deal has been said upon the subject. It has long ago been ascertained that the river San-Kai can be navigated through Tonquin to the capital of Yunnan, and thus the French can actually establish a trade route by water through a territory over which they claim a protectorate, and to the same districts in China to which we are seeking access from India by way of Burmah. That communication could be made to Yunnan *via* Tonquin has been known for many years, as vessels formerly navigated a river to the south of the San-Kai as far as the old Dutch Factories; and it is surmised that there is water communication between them and Han-Hoi, the capital of Tonquin. So far have matters progressed in regard to opening up the new route by the San-Kai River that we understand that a company have undertaken to keep up regular communication between Saigon, Tonquin, and Hong Kong, and so to carry on trade with the rich provinces of Yunnan and Szechuen. How far this fact may have influenced our Government in endeavouring to establish a route *via* Burmah it is, of course, impossible to say; but it is by no means improbable that a knowledge of the preponderating influence which it would give to France to have the sole command of so important an entry into China has had something to do with the interest which has of late been manifested in the subject. The Protectorate which France desires to establish in Tonquin would, there can be little doubt, be only the first step towards conquest of that country and Annam, if, indeed, it would not practically amount to that in itself. It might, of course, be a question whether or not it would be politic to interfere with the action of France to the extent of raising a question as to our trading rights, as France has always shown a disposition to act in a liberal spirit in according trading facilities in her Colonies to other countries. If, however, it were necessary or desirable to raise any such question, it appears that we have very definite grounds for doing so, as permission to trade with Cochin China, which at the time belonged to Annam, has been granted to Great Britain over and over again in the name of the East India Company, the last occasion being in 1821, in which year it is recorded, in an account of Crawford's Embassy, a willingness to trade was expressed by the authorities. At the same time, especially in view of the lengthened period which has elapsed, it might be hardly politic to raise a question on this basis, though it would afford ground for looking for liberal treatment in respect to trading facilities from the French. So far, however, as the matter has a political bearing we are, no doubt, not only justified, but called upon, to see that we be in as good a position towards the South-West of China as other Powers, otherwise we should be permitting them to have a preponderating influence in China which might at a given moment be of great significance, and might lead to political consequences of the most important nature.

An address on the China question was delivered by Lord Derby at Liverpool last week. The speech of the Foreign Minister deals with the question in a masterly manner. He states that no decisive information had reached the Foreign-office on the subject; but that, while we had no desire to enter upon another war with China, and had no wish to have another "sick man" on our hands, we could not flinch from a plain duty because it was unpleasant, and temporising with a difficulty was generally the way to make it bigger. These remarks are a welcome reassurance that the Home Government are not disposed to swerve from the firm attitude originally adopted in this difficult and painful matter; and we may, therefore, hope that the blandishments in respect to visits to Heads of Departments, which, as noticed elsewhere, the Chinese have, with the skill and *finesse* for which they are celebrated, been making to Mr. Wade, will prove futile, and that redress will be unflinchingly demanded; especially as it is now announced that the Burmese Government has agreed to the passage of an escort of our troops through its territory, accompanying a fresh expedition to Yunnan, so that if another expedition should be necessary, it will be easy to organise one and carry it out. The fact that British troops may enter Yunnan will, beyond doubt, have a more powerful effect upon the Chinese than any amount of moral suasion we could bring to bear upon them.

A telegram, dated Rome, October 4, states that a Chinese Embassy was expected at the Holy City to propose the permanent establishment there of a Chinese Legation. Although at first sight the statement appears somewhat improbable, it is not impossible that the Chinese may be desirous of being represented in Rome with the idea of altering the *status* of the Catholic Missionaries in China, who have hitherto been under the protection of France. Should such be the fact, it may be presumed that the Ambassador would meet with a favourable reception, as we read in to-day's papers that his Holiness has just given audience to General Agar, the special Envoy of the Shah of Persia, and that the General was received in the Throne-Room with all the honours paid to an Ambassador. He presented the Pope with an autograph letter from the Shah, thanking his Holiness for his letter and presents, and informing him that orders had been issued to all the authorities throughout Persia, that Roman Catholics are to be protected and respected in the exercise of their religion. His Holiness expressed his thanks to the General for the good news of which he was the bearer.

The appointment of Mr. Herbert Taylor Ussher, C.M.G., to be Consul-General in Borneo, is gazetted.

Literature.

Dr. Anderson, of Calcutta, who was on Colonel Brown's staff, contributes to the current number of *Macmillan's Magazine* an article on "The Exploring Expeditions to Western Yunnan of 1868 and 1875," which, at the present juncture of affairs, will be read with considerable interest. Dr. Anderson warns his readers at starting that they need not dread a discussion of rival trade routes, or an intrusion on the province of diplomacy, his intention being to give briefly an intelligible sketch of Major Sladen's and Colonel Brown's expeditions. This he has done clearly and concisely; but we look in vain for an account or explanation of the crowning catastrophe, the brutal and treacherous outrage on Mr. Margary, which, added to former injuries and insults, heaped one upon another during a long course of years, has at last roused the British Lion, and brought the relations between the two Governments of Great Britain and China to their present critical condition. Oddly enough, too, the language used by Dr. Anderson at the commencement of his paper fully warrants the expectation that some light would be thrown on this sad event. However the King of Burmah, in his heart of hearts, may have been disposed towards us, Dr. Anderson fully exonerates the Burmese guard which accompanied the expedition from all suspicion of treachery or unfriendliness. The Burmese officer, he writes, had been warned of the attack on Colonel Brown's party in letters from Manwyne (which announced Mr. Margary's murder), and advised to keep out of harm's way, but he and his men loyally adhered to their trust, and displayed a cool presence of mind throughout the day. After the conflict was over, the Burmese did all in their power to secure the safety of the expedition. So far as it goes, this is satisfactory enough, but we fail to perceive that this or his previously courteous treatment of the members of the expedition affords the slightest proof that the King of Burmah did not connive at the attack, and was not an accessory before the fact. The Burmese bodyguard were faithful to their trust—that is beyond all doubt—but it does not seem to have occurred to Dr. Anderson that the King of Burmah, with diabolical ingenuity, most probably in-

Digitized by Google

tended to sacrifice his subjects in the furtherance of his treacherous designs. This is one of the weak points in the paper, and the other is the attempt to take from Le-see-tai all direct responsibility for the murder of Mr. Margary. Arguing from the fact that at Muangmow Le-see-tai had received Mr. Ney Elias courteously, that he pretended to have expected the whole mission to come by that route, and had apparently gone there to meet it, and that he warned him that it was not safe to proceed as there was fighting on the road, Dr. Anderson maintains that "it is impossible to avoid the reflection that the Chinese officer, had he been so minded, could have let the traveller advance to certain death, and that without any apparent complicity." He also dwells upon Le-see-tai's unusual, and even unnecessary, attention to Mr. Margary when he passed through Manwyne, and appears to think that he clinches his argument by saying that "no authentic or trustworthy account could be obtained whether he (Margary) fell a victim to the robbers or assassins of that turbulent frontier town, who feared interference with their intended plunder, or to the organised hostility of the Chinese merchants." Indeed, Dr. Anderson would seemingly have us believe that Le-see-tai was a guileless and childlike Oriental, who had no other end or object in life save to protect and receive with extraordinary respect all British subjects wandering in his neighbourhood, and to do good to his fellow-creatures in general; although, at the same time, he cannot help admitting that he, "as Governor of the Shan States, could certainly bring to justice the guilty parties, unless they had been instigated and screened by officials superior to himself." We regret that we cannot share Dr. Anderson's estimate of Le-see-tai's character and disposition towards Englishmen; and we remain convinced that, although he may not have been the chief and original instigator of this foul outrage, he was, nevertheless, the prime mover in it, and ought to be punished accordingly at that day of reckoning which is now slowly, but surely, approaching, in spite of all the efforts of Chinese statesmen to stave it off by their usual devices of dilatoriness and obstructiveness. If by the punishment of his murderers, "it be established."—to quote Dr. Anderson's concluding words,—"that a peaceful English traveller or trader shall hereafter pass unmolested through the Shan valleys, though for years the fancied commerce may be still only an unrealised vision, the gallant young Margary will not have died in vain. No towering pagoda or simpler monument may rise on the spot where he fell, to tell the wondering natives that England never forgets her heroes; but, what he would more have desired, the opening to commerce of a secure trade route between Burmah and China, which has now become a national duty, will keep his memory green." We hope that this end may be attained—by peaceable means, if possible—but still, come what may, Mr. Margary's murder must be avenged, and proper reparation must be made for the insult offered to Great Britain in that remote region where the outrage occurred.

Keramic Art of Japan. Part II. By G. A. Audsley, Architect, and J. A. Bowes, President of the Liverpool Art Club. Liverpool: Published by the Authors for the Subscribers. London: Henry Sotheran and Co.

The second part of this superb work now before us is in every particular fully equal to the first instalment, the appearance of which we hailed with pleasure three months ago. The present part contains pp. xiii. to xxxii. of the Introductory Essay on Japanese Art, together with Plates C, E, and G, illustrating the same; pp. 9 to 12 of Keramic Art of Japan; five very magnificent chromolithographic plates with descriptive letter-press; and two autotype plates, also with descriptions in detail.

In continuing their essay on Japanese art, the authors observe that "to so active and clever a craftsman one would naturally surmise that the most beautiful objects and the bright side of nature would alone recommend themselves; such, however, is far from being the case, for one finds every phase and mood, and all classes of objects, furnishing him materials for his art. From magnificent flowers, which the skill and patience of his native gardeners have increased to gigantean proportions, down to the modest daisy in the grass,—from the lofty fir down to the dwarf oak-tree, which can be covered by a man's hand,—from the mythical *Ho-ho*, with its superb tail of waving plumes, down to the tiniest feathered inhabitant of his island home,—everything comes in for an equal share of his careful study, and receives an equally truthful rendering at his hands. The flowers are shown in the bud, in full bloom, and in decay; the trees waving in the summer breeze, in autumn's stripping blasts, and with barren branches weighted down with winter's snows; and the birds in all their varied movements and graceful positions." These remarks naturally lead the writers into some observations upon the peculiarities of Japanese gardening, especially in regard to dwarf pleasure-grounds, the strangely dwarfed trees, ceremonial bouquets, and flowers. Although they intend to avoid in their essay all dissertations on technical and formative processes, they think it only right to allude briefly to the several methods adopted by the Japanese artist in developing or accentuating his floral designs for decorative purposes; and this leads them into furnishing some very interesting notes. Trees next claim their attention, and "as they appear to be more esteemed than flowers, and enter very largely into the ceremonial observances of the Japanese," they consider that they deserve to be rather more fully treated. Next in order they have a few words to say about grasses. "Simplicity of taste," they remark, "is a distinct characteristic of the Japanese artist, and perhaps the most eloquent proof of this is to be found in his tender little sketches of blades of grass. These trifles, as they may be called in comparison with his grand essays of decorative art, are not, however, tender only; they are almost invariably expressive of something beyond themselves." After vegetation Japanese artists are thought to be "most skilled in the representation of birds, and they appear to have an equal love for depicting them, either alone or in conjunction with vegetation . . . . The birds most frequently represented, and consequently the most carefully studied by the Japanese artists, are the crane, tame and wild ducks, wild goose, peacock, pheasant, raven, hawk, falcon, ordinary domestic fowls, and several of the small birds common to the country." In regard to these, again, Messrs. Audsley and Bowes make some interesting observations, indicative of careful study of their subject. Owing to the comparative scarcity of four-footed beasts, wild or tame, in the Japanese islands, it is not surprising "that natural quadrupeds are comparatively seldom depicted" in works of art, the horse being the principal exception. Almost at the conclusion of this instalment, the authors glance at another phase of their essay, which we shall hope to follow out more fully upon a future occasion. "It is absolutely necessary," they write, "for a proper understanding and study of the art of such a thoughtful people as the Japanese, that some knowledge should be obtained of the popular literature of the country." With some sketch of this in its bearing on Art we trust that Messrs. Audsley and Bowes may be enabled to furnish their readers before closing their essay. The illustrations given on the present occasion in this department of the work represent Stencilled Leathers, Wall Papers, and Ceremonial Bouquets.

In the four pages of the "Keramic Art of Japan," given in the part before us, the enumeration of the principal districts in which the art is practised is concluded; and the authors next proceed to give a sketch of the processes of porcelain manufacture in Hizan, their authority being the Japanese work translated by Dr. Hoffmann. This, we feel sure, will be perused with interest. They also touch upon "the ancient blue and white Japanese porcelain, which, doubtless, came over with the blue, red, and gold, or 'Old Japan' ware," and which does not appear very plentiful; but "there are considerable quantities of Japanese blue in Holland, where it appears to have been much appreciated, judging from the copyism indulged in by the Delft manufacturers. There are several good specimens of the old ware preserved in Hampton Court Palace, which were brought over by William and Mary in 1688. . . The quality and tone of the old Japanese porcelain is so much like the Chinese, or so-called 'Nankin' of the same date, that it is a matter of difficulty to individualise the respective wares; the decoration is usually the best guide, although in very many instances that cannot be depended upon." Of the five chromolithographic plates given in this part, four represent Hizen ware and one Awagi faïence. The former comprise, (1) a covered jar in the Imperial Keramic Collection at Dresden; (2) an octagonal covered jar in the same collection; (3) two beakers and a triple gourd-shaped bottle, all at Dresden; and (4) a dish and saucer dish, in the possession of Messrs. Bowes and Audsley respectively; the latter is a flower vase of fine cream-coloured faïence, covered with a thin varnish, minutely crackled, the most striking feature of which is the deep fringe-work which hangs from the rim of the mouth. The two autotype plates represent several objects of Celadon and Kioto ware, some of the latter being tastefully and artistically decorated.

Journal de mon Troisieme Voyage d'Exploration dans l'Empire Chinois. By M. L'Abbé Armand David. Paris: Libraire Hachette and Cie.

We welcome this work as a very valuable contribution to literature relating to China. The Abbé David is well known as an able scientific explorer in China, the present being the third journey which he has made in that country. On the occasion previous to that which forms the subject of the present volume, he returned to Peking, after an absence of two years, only to hear of the Tientsin massacre, which had just occurred. He, indeed, owed his own escape to an accidental delay of the boat in which he was travelling. This lamentable event rendered his further stay in China impossible, and being in bad health, in consequence of his exertions, he returned to France; and in 1872 found his way back to China to complete the voyage of which the volumes before us contain an account as interesting to the general reader as valuable in a scientific point of view. Abbé David writes in an easy, pleasing style, without, however, falling into the trivialities which too often disfigure itineraries. He has a great deal of the dramatic power which gave such popularity to a similar work from the pen of the well-known Abbé Huc; while his scientific remarks upon the natural phenomena, the birds, plants, &c., of the districts which he has passed through, will form a very valuable addition

Digitized by Google

to our information on the subject. On his return to China in 1872 Abbé David visited the beautiful province of Chekiang, and then returned to Peking to organise his expedition through Shensi and Honan, and to explore the important mountains known as the Tsing-Ling. The Mahommedan rebellion, however, preventing him from advancing further towards the west, he descended in May, 1873, to Hankow, after a perilous voyage on the Hankiang. The journal thus presented to the public contains much that is entirely new, and gives a good and truthful picture of Chinese life and character.

An interesting paper on the Straits of Malacca, from the pen of Commander W. H. Lewin, appears in the October number of the *Charing Cross Magazine.*

Correspondence.

OFFICIALISM IN THE STRAITS SETTLEMENTS.

(To the Editor of the *London and China Telegraph.*)

Sir,—The Straits newspapers are loud in their complaints of officialdom. The *Penang Gazette* records the proceedings of a public meeting, at which the Lieutenant-Governor, Colonel Anson was boldly taken to task for his "masterly inactivity, and his constant shirking of official responsibility, referring every question, whether of great or minor importance, to the Governor at Singapore." Evidently the "man for Penang" is not to be found in the present occupant of Suffolk-house, and the sooner he bestirs himself or takes his leave of the Settlement the better. This complaint is of old standing, and the late Governor, Sir Harry Ord, is chiefly to blame for the unsatisfactory position of affairs, through his system of centralisation and attempt to do everything himself. It is to be hoped that Sir William Jervois will now insist on the Lieutenant-Governor doing his duty and earning his pay. The *Straits Times* of Singapore is even more irate than its contemporary, as it appears that there are eleven absentees among the officials, and something like seven acting appointments. The former Colonial Secretary, Mr. Birch, is unconfirmed Resident at Perak; the Acting Colonial Secretary, unconfirmed, Mr. Braddell, is at home; the Auditor-General, Mr. C. J. Irving, is acting Colonial Secretary; Mr. E. A. Irving, Assistant Colonial Secretary, is acting Auditor-General; Mr. Knight, Chief Clerk to the Audit Office, is acting Assistant Colonial Secretary; Mr. Phillips, the unconfirmed Attorney-General, is acting Puisne Judge; and Mr. Bond, of the Straits Bar, has been appointed Deputy Attorney-General. Besides these there are an Acting Judge at Penang, and an Acting Lieutenant-Governor at Malacca. Now, I may ask the authorities at the Colonial-office how it is possible that Government can be efficiently carried on by so many round pegs being put into square holes? Are these persons taken from their proper work to act a short time in another position, and before they are well acquainted with their new duties put back again to bring up the arrears which have accumulated whilst their *locum tenens* has been getting into harness? Why are there so many unconfirmed appointments? I hear that the Superintendent-General of Police has been waiting nearly three years for his confirmation, and most of the others named have been performing "unconfirmed" duty for upwards of a year. This must create discontent among the officials and disgust among the governed.

I hear, privately, of a more serious matter, which savours much of a job. Some time past a complaint was made in Council that the Attorney-General, besides his salary of £1,000 a year, received retainers from the Opium and Spirit farmers as well as from certain native chiefs. As this was thought injudicious, the pay was increased to £1,500, on the understanding that he was not to be allowed any private practice. When Mr. Phillips accepted the acting berth of Attorney-General he stepped into the larger salary; and the Acting Puisne Judge, Mr. Vaughan, received £1,200 a year. The latter gentleman having resigned, Mr. Phillips resumed his former position; but it is reported that he retains the salary of the Attorney-General, and that of the Judgeship is given to Mr. Bond, the Deputy Attorney-General—a berth created for the purpose, but ignored by Ordinances V. and VI. of 1873. The Legislative Council was shortly to meet, when it is hoped a question will be asked on this subject, as well as on that of acting appointments and absentees.—I am, &c. X.

THE OPIUM TRADE.

(To the Editor of the *London and China Telegraph.*)

Sir,—I have read the paragraph in your paper of June 18th on the subject of the "Opium Trade" with some disappointment. 'No doubt," so says the writer, "There is much to be said on both sides of the question." Is this so? Is there any honest doubt in the mind of any honourable thinker as to the character of England's early dealings with China in this Opium business? If not absolutely immoral it was wholly discreditable—bold unblushings muggling under the British flag for many years; and a smuggling trade turned into a legal trade by war alone, by force, and wholly against the wishes of the Government and people of China. These, I submit, are facts of history; and the only way of getting rid of these unpleasant facts is, the sorry expedient of discrediting to the motives of the Chinese.

"Much may be said" in favour of the trade. But all that I can gather from your article on this side of the question is, that the trade is worth nearly eight millions sterling to the Indian Exchequer, and that Mr. Gladstone was opposed in 1871 to taking any steps with regard to its suppression. Which is the most weighty of these two arguments? Especially when we remember that the main argument urged by Mr. Gladstone and his colleagues in favour of the policy of non-interference was that it was a lucrative trade, indispensable for India, and not much worse than the liquor traffic.

The telegraph has informed us that Mr. Disraeli's Government have discovered a few fresh arguments in favour of the trade—"Opium is well suited to Eastern nations." Strange, then, that the vast proportion of the people of India never touch it; strange that before British rule it was death to smoke it in some of the districts of British Burmah. "The evils of Opium, too, have been exaggerated." Strange that the Chinese, who know more probably about the question than the British Parliament, still think Opium immoral, a curse, a plague. But the true argument was reached, I see, before the debate on Mr. Mark Stewart's motion closed—the money argument; and I fear, indeed, that the reasonings of all who defend the trade, even the line of thought of such great debaters as Mr. Gladstone himself, must be summed up in this word, "We make a *virtus* of necessity." For it is of political and national virtue and vice that we speak. What the lovers of England long to hear is not that Opium is not quite so bad as people say, nor that the trade is so very lucrative, but a fair and satisfactory argument to prove that England's honour has not been tarnished by this trade, and that England did no real harm to China in this respect. Prove this, and we are content; fail in this, and no opiates as to expediency and necessity can lull to sleep the uneasy persuasion then. Vengeance, though slow of foot, may fall heavily on a great Christian nation guilty of a great international crime. Will it come in the shape of another Chinese war? The news from Burmah is of the most disquieting character; and Burmah makes scarcely the pretence of concealing her secret understanding with China. News from Peking is of an uneasy character; and should war suddenly break out where would the seventeen British communities on the coast of China be? There are about as many men-of-war as there are communities, but for *defence* they would be hopelessly inadequate; the whole squadron concentrated at Shanghai would find it hard work, and with no land force to defend the scattered settlement, overcrowded by refugees from the Yangtsze and from the coast ports, against the hordes of well-armed and comparatively well-trained troops who could be poured down.

Revenge, if not rescue, would come in time from India or England; but the prospect of a sudden outbreak is simply appalling. Probably these rumours and ominous clouds which the heat of each summer raises like noxious exhalations from the swamps of speculation and intrigue may soon pass and be dissipated. But the very idea should lead to a most earnest consideration of any question which, as in the case of this Opium trade, may affect so vitally the prosperity of a great nation, by calling for that retribution which great national crimes always bring in their train.—I am, &c., E.

Shanghai, August 3, 1875.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

Hamburg, Oct. 5.

The last fortnight has been characterised by wet and nasty weather; fearful gales have swept over the North Sea and the Baltic; the telegrams announcing disasters at sea have been coming in by dozens, and the managers of our many insurance companies, after displaying a smiling face all the summer, are now going about with a sorrowful appearance. Only yesterday a very melancholy accident, although not caused by bad weather, was telegraphed from Copenhagen—the loss of the Swedish steamer *L. T. Bayer*. This vessel, while on the voyage from Lubeck to Copenhagen, &c., caught fire in the Kjoge bight, and out of twenty-five passengers twenty-four were lost, besides two-thirds of the crew.

With reference to the East India and China trade there is very little to report. The s.s. *Altona*, which was advertised to leave here on the 15th of Oct. for Singapore has been withdrawn, in consequence of the refitting in London requiring a good deal more time than was anticipated. So the *Egeria*, advertised to leave on the 30th Oct., is the only steamer on the berth now, and a competition which might have arisen between these two vessels is fortunately avoided. Of sailing vessels the *G. H. Wappaus Diedrichsen*, for Penang and Singapore, and the *Condor*, for Chefoo, are still loading and slowly filling up. The *Alcides* and *Gateshead* have arrived from Rangoon, for which port the *Therese* left here on the 25th ult. The *Norma* also sailed from here on the 25th of last month for Singapore, and the *Formosa* for Hong Kong. The *Peri*, hitherto belonging to A. J. Hertz and Sons, and employed in the China coasting trade, has been sold to Blankenese. The *Argogatje*, a new vessel, built at Mr. Dreyer's wharf here, cleared on the 27th ult. from Cardiff for Singapore, and very likely will be employed in the coasting trade in China. The rates of freight for the East are at present very low, sailing vessels 15s. to 20s. for Singapore, and 50s. and 10 to 15 per cent. for steamer, with very little doing.

The Hamburg American Packet Company has advertised four of its steamers for public sale, on the 14th inst. viz., the *Bavaria*, *Borussia*, *Teutonia*, and *Heligoland*. The *Bavaria* built in 1857, carries 1,448 tons register; the *Borussia*, built 1855, holds 1,335 tons; and the *Teutonia*, built 1856, holds 1,470 tons. These three boats are built after English rules in England, and are all in good condition. The reason of the sale is that this company, in consequence of its amalgamation with the Transatlantic Company, at present owns more boats than it is able to employ, and therefore requires to reduce its fleet. The *Borussia* and *Teutonia* were last year sold for the sum of £56,000 to an English owner, who offered to pay one-half of the above sum on delivery of the vessels. But as the security offered for the other half was considered somewhat doubtful the sale was not accomplished. The above steamers consume about twenty-five tons of coal every twenty-four hours, are well fitted, and in perfect good order. The *Heligoland* was intended for the trade between Hamburg and Heligoland, and is fitted out with splendid saloons, &c., but was found too large for the route. She is a paddle-boat, built of best Swedish iron, and only a few years old.

The *Shakespeare*, Gorgensen, belonging to Robert M. Sloman, will leave here on Thursday for Wellington (New Zealand), with over 400 passengers, and as she is a very good and new vessel and well fitted out, it is to be hoped that she will bring her valuable cargo safely to her destination.

The exertions of your celebrated sailors' friend, Mr. Plimsoll, who has been for some time staying here in Hamburg, have brought forward a good many imitators all through Germany, and the Government, although not exactly of the same opinion as Mr. Plimsoll and his followers, yet has found the necessity of passing a law to prevent unseaworthy English vessels being sailed under the German flag. By this law the German Consuls in all the ports of Great Britain are directed not to allow any strange vessel to be placed under the German flag unless such vessel be provided with a certificate of a Board of Trade surveyor, by which document the seaworthiness of such vessel is officially proved.

The German Bank, which is known in the Far East by her former branches in Shanghai and Yokohama, intends to amalgamate with two similar establishments, viz., the Berliner Bankeverein and the German Union Bank. But a considerable number of shareholders consider the paid-up capital to be too great for present purposes, having regard to the suppression of the Eastern branches, and do not wish an association with any other banking establishment without a reduction of the capital.

Our neighbouring town Altona began in 1873 the erection of mooring-piles in the lower part of the Elbe, thus diminishing the channel to our town. The Hamburg authorities protested against this, and an order has emanated from the Government to stop the work till a thorough survey has taken place.

The Board of Trade of Bremen sent in June last a circular to German Consuls in Transatlantic ports, containing a number of questions concerning the possibility of an export of German coals to those places. Several exhaustive replies are said to have come in, and the tenour of them will be published shortly. Nothing is, however, known as yet about the favourable or unfavourable contents of these reports.

The directors of the Deutsche Transatlantic Steamship Company have been asked by some of their shareholders to publish a balance-sheet, as the shares of this company have suffered such a great reduction in value of late. The directors declare, in plain words, this to be impossible for the moment, but promise to call an extraordinary meeting of shareholders as soon as the association with the Hamburg American Packet Company has been carried out.

The following official statistics concerning the trade of Hamburg with Great Britain and China,&c., may, perhaps, be of some interest :—

IMPORT FROM UNITED KINGDOM.

	M. per 50 kilo.—Nutto.	Value in Marcs.
1872	28,704,078 ...	554,262,645
1873	24,533,233 ...	503,500,330
1874	25,048,233 ...	510,311,990

EXPORT.

	M. per 50 Kilo.—Bantto.	
1872	6,656,702 ...	Duties not payable.
1873	7,181,006 ...	
1874	5,358,635 ...	

In 1874 there arrived at the port of Hamburg from the United Kingdom 2,316 vessels of 1,222,433 tons register, including 1,899 steamers of 1,164,935 tons register; from China, 12 vessels, of 5,825 tons register; from the East Indies, 37 vessels, of 25,722 tons register, including 7 steamers of 6,233 tons register. In 1874 there sailed for the United Kingdom 2,408 vessels of 1,272,634 tons register, including 1,908 steamers of 1,164,116 tons register; for China, 11 vessels of 5,944 tons register; for the East Indies, 29 vessels of 18,594 tons register, including 9 steamers of 8,380 tons register.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Oct. 6.

Although the King refused to accept the resignation of the Ministers for Home and Financial Affairs, which was tendered in consequence of the recent hostile vote of the First Chamber, it seems pretty certain that the Lower House will reject the Budget of Mr. Heemskerk, in which event he, of course, will be compelled to resign, unless he adopts the alternative of dissolving the Chamber.

From the Colonial Budget Report, which is gradually being completed, I learn that as far back as June, 1874, the Director of Finances at Batavia has proposed to the Governor-General, Mr. Loudon, the introduction of two new taxations to be paid by European residents and foreign inhabitants, viz., a house-tax, and a tax upon trade and traffic. The first-named tax it was proposed should be calculated according to, 1st, the rental value of dwelling houses; 2nd, the value of furniture and carriages; and, 3rd, the value of horses. The second tax to be levied according to the net profits derived from trade; this amount to be declared by the parties interested or by governmental valuation. The receipts of the first tax are estimated at 1½ million, and of the second one at 1½ million of guilders, or, deducting the cost of collecting and control, at about two millions for the two taxes. The former Governor General did not approve of the first tax, but the second he considered fair and equitable. The Minister of the Colonial Department has attentively considered the matter, and wrote half a year ago to the present Governor-General that the justice of the proposed taxations could not be denied, as there could not be a single reason why Europeans should be exempted from contributing to the expenses of the Government at the same rate as the native population. The Minister gave it as his opinion that no reasonable objection could be entertained against either of the taxes proposed. The Governor General was therefore invited to make the necessary plans for their introduction. The Chamber of Commerce at Batavia will be first put in acquaintance with these plans. The Minister hopes to be able in the early part of 1875, to request an increase of his Budget, in consideration of the expenses necessary for the introduction of these new taxes. By their introduction several other small imposts will be abolished and others better regulated; for instance, the one on public sales. In conclusion, the Report mentions the well-known petition of European residents in Java, which was addressed to the King, opposing the new taxes, and the answer inserted in the *Java Courant*. The Minister stigmatises the petition as premature, founded on misrepresentation, and therefore having no claim to consideration.

The Roman Catholic papers insert a pastoral letter from the Pope to the Archbishop of Utrecht, by which his Holiness makes known that Johannes Heykamp has been excommunicated for having allowed himself to be elected and ordained as Archbishop of the Jansenists at Utrecht, as also Johannes Rinkel, who calls himself Bishop of Haarlem, and who performed the ordination ceremony; likewise are excommunicated all those who assisted in the ceremonial. The Pope calls this ordination a vile and despicable act, and warns all good Catholics from holding any intercourse with the perpetrators of it, but to pray without ceasing that God may turn their hearts.

I have been favoured with the first copy of a new transatlantic paper, *De Nederlandsche Mail*, a weekly journal for the East and West Indies. The editorship has been entrusted to Mr. C. C. E. d'Engelbronner, a *pursang* Protectionist. On the list of the staff are Joh Gram (arts in Holland), Con Moto (music), Indophulus (India rule). This paper will, of course, have to compete with the Rotterdam mail paper, and this will be a hard task.

The newspapers contain most congratulatory articles to Prince Henry, who celebrates the twenty-fifth anniversary of his Stadtholdership of the Grand Duchy of Luxemburg. The *Amsterdamsche Courant* publishes a telegram from its correspondent at Luxemburg, stating that the Prince is proclaimed Hereditary Grand Duke, so that even the personal bond between that State and Holland will cease to exist. The *Nieuwe Rotterdamsche Courant*, however, contradicts this telegram.

The *Dagblad* says that the Minister of the Financial Department will propose a tax upon tobacco.

The King has conferred the knighthood of the Netherlands Lion on the Regent of Bodjonegro Raden Adhipati Tirto Netta.

A lull prevails on the Bourse, and also in the markets for Colonial Produce.

Monetary and Commercial.

The Board of Trade returns for the month of September issued yesterday show a further falling off in our export trade, the total value of the exports having been £19,853,750, against £21,463,876 for the corresponding month of last year, being a decrease of £1,610,126, or 7½ per cent. In the import trade the total value represented £30,858,909, against £31,142,994 last year, showing a decrease of £284,085, or ⅞ per cent. With regard to the exports, cotton yarn decreased 4¼ per cent. in value, but the quantity was about the same as last year. Cotton piece goods decreased 6¼ per cent. in value and 7 per cent in quantity; linen yarn increased 14 per cent in value and 5½ per cent. in quantity; linen piece goods increased 2 per cent. in value and 3 per cent. in quantity; woollen yarn decreased 17¼ per cent. in value and 19⅞ per cent. in quantity; woollen cloths decreased 8 per cent. in value and 7¾ per cent. in quantity; worsted stuffs decreased 5½ per cent. in value and 1 per cent. in quantity; iron and steel decreased 16 per cent. in value, but increased 4 per cent. in quantity; and coal, fuel, &c., decreased 14 per cent. in value, but increased 3 per cent. in quantity. In the imports the greatest increase was in corn, which has advanced 60¼ per cent. both in quantity and value, the total value being £3,667,282, against £2,283,050 last year. Raw cotton decreased 41½ per cent. in quantity and 44 per cent. in value; flax increased 1½ per cent. in quantity and 8 per cent. in value; raw silk decreased 49 per cent. in quantity and 45½ per cent. in value; wool decreased 18 per cent. in quantity and 20½ per cent. in value. The total value of tea imported increased 21 per cent., and the amount entered for home consumption 1¾ per cent.; but the value of coffee decreased 5½ per cent., and the quantity for home consumption 16½ per cent.

Tenders for £700,000 in bills on India were received at the Bank of England on the 6th inst. The amounts allotted were :—To Calcutta, £663,500; to Bombay, £61,800; and to Madras, £33,000. Tenders on all the Presidencies at 1s. 9 13-16d. will receive about 6 per cent., above in full. The total amount allotted reached £758,300. These figures show a considerable increase in the demand for remittances to the East, the price tendered for being 1-16 higher.

The directors of the Chartered Mercantile Bank of India, London, and China have declared a dividend for the half-year ending 30th June at the rate of 8 per cent. per annum, which will absorb £30,000, leaving a balance of £55,000 to be carried forward to the present half-year. The half-yearly meeting will be held on the 19th inst.

The Directors of the Oriental Bank, at their meeting on the 20th inst., will announce a dividend for the half-year ended 30th June last, at the rate of 12 per cent. per annum.

The directors of the New London and Brazilian Bank (Limited) have decided to recommend the payment of a dividend of 7s. per share, making, with the interim dividend paid in April last, the dividend for the year 12s. per share, or 6 per cent. on the paid-up capital of the Bank.

The directors of the Eastern Extension, Australasian, and China Telegraph Company (Limited) have issued the half-yearly report prior to the meeting of shareholders called for the 11th inst. It states that the gross earnings for the half-year have amounted to £110,754 2s. 3d. The working expenses, cost of repair, and maintenance of cables, payment of income-tax, interest on debentures, &c., amount to £28,473 18s. 9d., leaving a balance of profit of £82,280 3s. 6d. for the half-year. An interim dividend of 1½ per cent., amounting to £29,962 10s. has been paid, and it is now proposed to distribute a further interim dividend of 1½ per cent., leaving the sum of £22,355 3s. 6d. to be carried forward. The debenture debt, taken over by this company from the China Submarine and British Indian Extension Companies, has been reduced by £3,200, leaving a balance of £4,700, of which a further sum of £1,500 has been redeemed since the commencement of the present year. By a resolution passed at the special general meeting, held on June 7, 1875, an issue was authorised of 3,200 debentures of £100 each, bearing interest at the rate of 6 per cent., for the purpose of laying the cable between Sydney and New Zealand, and the greater portion of the same has been taken up and allotted to the shareholders at par.

The Globe Telegraph and Trust Company announce that the interim dividends for the quarter ending the 18th inst. will be 3s. per share on the preference shares and 3s. per share on the ordinary shares, both payments being at the rate of 6 per cent. per annum.

The West India and Panama Telegraph Company will recommend to the shareholders at the approaching meeting a dividend of 7s. 6d. per share, on account of arrears of dividend on the first preference shares to the 30th of June, 1875.

The accounts of the Brazilian Submarine Telegraph Company (Limited) show a profit for the year ending 30th June sufficient to enable the directors to recommend a final dividend of 2s. 6d. per share, making, with previous distributions, 5 per cent. per annum, and carrying to reserve the sum of £40,000.

The Maritime Passengers and Mariners Insurance Company have declared a dividend at the rate of 7½ per cent. per annum.

An extraordinary meeting of the Singapore Gas Company (Limited) will be held on the 26th inst., for the declaration of a dividend.

The liquidator of the City and County Bank (Limited), which went into liquidation in May last, has paid the creditors in full.

The traffic receipts of the Eastern Extension Australasian and China Telegraph Company (Limited) for the month of September, 1875, amounted to £18,080, and to £18,163 for the corresponding period of 1874. The Eastern Telegraph Company's traffic receipts for the month amounted to £30,176, and to £28,208 in the corresponding period of 1874.

The traffic receipts of the Great Northern Telegraph Company for the month of September amounted to f.392,089, against f.425,931, last year. The total receipts from the 1st of January to the 30th September were f.3,186,948, against f.3,328,040 last year.

The quantity of tea delivered from the bonded warehouses in London during the week ended the 2nd inst. was 3,874,191lb., of which 2,232,961lb. was for home consumption, 860,036lb. was removed coastwise, 655,997lb. was exported, 119,035lb. was sent coastwise for export, and 6,162lb. was for ships' stores. The duty received amounted to £55,824, against £52,011 in the previous week, being about 7¼ per cent. more.

Bar silver has been sold at 56 11-16d. per oz. The market is now firmer, in consequence of an increased demand for the East. Mexican dollars have been sold at 55¼d. per oz. for China.

The amount of bullion per P. and O. steamer *Hydaspes*, from Southampton on the 7th inst., was:—In silver, to Penang, £3,300; to Singapore, £4,600; to Shanghai, £3,720;—total, £11,620.

ARTICLES OF IMPORT.

Transactions in the Produce Markets continue upon a moderate scale, and prices have undergone no change of importance. A large business has been transacted in Tea, and for a day or two rather better rates were obtainable, but prices are now much the same as last week, the arrivals having been heavy, and the probabilities of war with China being for a time averted. A steady demand has prevailed for Sugar at present low quotations, but there is an absence of speculation. Coffee has been without material alteration, Plantation Ceylon at the public sales finding buyers at barely last week's rates for pale and grey sorts. The demand for Rice does not improve, although remarkably low rates have been accepted, the sales including a cargo of Necrancie Arracan at 7s. 1½d. per cwt. In the Spice market quietude has been the prevalent feature; Tin is slightly lower, but firm at the close.

TEA.

Messrs. James Goddard, junior, and Co. report that all through the week—with the possibility of hostilities with China—the Tea Market has been very strong, especially for all the medium qualities of Congou, and the new samples showing sold readily in importers' favour. At one time there seemed some disposition to buy speculatively the common grades, but the quantity changing hands was small; and with the more reassuring telegrams from China the market is more quiet, although very steady. Public sales continue small, and prices irregular for Congous. Green Teas have sold fairly well. Indian Teas are largely offered, and have obtained very full prices.

Messrs. Thompson's Circular advises as follows:—*Foochow Congous.*—Siftings and broken leaf remain at late quotation; leafy, comm on to good common, 10½d. to 11½d.; fair, 1s. to 1s. 2d. The chief demand has been for grades from 1s. 2d. to 1s. 6d. per lb. Fine are neglected. *Black Leaf Congous.*—Common to good common flavory kind have been sold at 10½d. to 11½d.; fair, 1s. to 1s. 3½d.; and medium to good, 1s. 4d. to 1s. 8d. per lb. have been in good demand. Fine and finest are still very quiet. *Scented Teas.*—Capers fully maintain the late advance. Foochow Pekoes are in full supply, and medium to good are cheaper at 1s. 4d. to 1s. 7d. per lb. *Green Teas.*—Late arrivals have been forced at auction, and lower prices have ruled for Young Hysons, but Gunpowders have sold rather better. The China sales have been small, the whole quantity only amounting to 6,998 packages, the bulk being Green Teas.

	1875. lbs.	1874. lbs.
United Kingdom stock, on the 30th Sept. 1875, was estimated at ...	86,500,000	74,000,000
Cargoes of vessels arrived up to date, but not included in the above stock, with portion of other cargoes only partially included	2,361,000	10,066,000
Amount on the water advised by telegraph to 30th Sept., against actual shipments to same date last year	26,224,000	53,200,000
	115,085,000	137,266,000

SILK.

Messrs. Durant and Co.'s Circular says:—We have to report a month of small daily doings in Silk—gradually increasing in extent, and possibly even with some little hardening of prices towards the end. Bankrupts' stocks have been a heavy weight upon the market, but these are gradually coming to an end. In Japan Silk the extremely low prices have at last attracted attention, and business has been done to some fair extent, resulting in an improvement of 6d. to 9d. per lb., and reducing the stock to a small point. Canton Silk has been in fair demand, but transactions have not been large, nor has there been any activity of purchase in any particular class. The periodical public sales are fixed to commence on the 20th instant.

Mr. John Kershaw's Circular says:—There has been a steady business throughout the month of September; Chinas have been in most favour, and prices may be quoted a trifle higher than at the date of last circular; Tsatlees from 12s. 9d. to 14s. 6d. have been in good demand, and Kahings of the better qualities (which are scarce) have been readily taken at full rates. Importers are, as a rule, firm holders, and show no disposition to make any concession to buyers; thus prices remain very steady. The assortment in the arrivals of last month has been better, although there is still a marked decline in the quantity of good medium Tsatlees which comes forward this season. Canton Silk has been quiet, and business in Tsatlee reels has been unimportant. Japans are firmly held; the new Silk is beginning to arrive.

Messrs. Waithman, Hogg, and Co.'s Circular says:—During the past month there has been but little change to note in the state of the Silk Market; at one moment, about the middle of the month, there appeared to be an improved demand, and a better tone prevailed for a few days, but it was unsustained, and the market has relapsed into its former inanimate condition. In China Silk some little business has been transacted for daily requirements, at unaltered rates. In Japans an advance of 6d. per lb. was established, and has since been maintained, the dealing being both with Silk on the spot and for arrival. In Cantons a moderate business has been done, and prices are unchanged. The deliveries as compared with the previous month show a slight increase in Chinas and Bengals, but a slight decrease in Cantons and Japans, the figures being Chinas 3,197 bales against 3,064 bales; Bengals, 232 bales against 202 bales; Cantons, 477 bales against 530 bales; Japans, 566 bales against 698 bales.

	Stocks. Sept. 30.		Imports. Jan. 1 to Sept. 30.		Deliveries. Jan. 1 to Sept. 30.	
	1874. Bales.	1875. Bales.	1874. Bales.	1875. Bales.	1874. Bales.	1875. Bales.
China ...	26,338	17,502	25,651	16,790	27,517	29,989
Canton ...	4,798	5,480	2,210	5,209	5,476	4,854
Japan ...	5,545	3,758	6,329	3,362	6,160	5,124

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 28s. To Singapore: 14s. To Batavia and Sourabaya: 20s. To Galle: 18s.

CASUALTIES.

Deal.—Oct. 5, the Laurens Coster, Dutch ship, which left Flushing Sept. 24 for Sourabaya, has put back and anchored here; vessel reported leaky, and crew refusing to proceed.

Brouwershaven.—Oct. 6, the Thomas Sorby (str.), from Java for Rotterdam, has gone ashore at Oosterbank in a very dangerous position; tug gone to her assistance.

St. Helena.—Sept. 12, the Zodiac, from Padang, for New York, whilst beating up for the anchorage here on the 3rd inst., broke her maintopgallantyard, carrying away mizentopmast with it.

The Nieuwland, from Batavia for Rotterdam, arrived here, reports very heavy weather on the 8th, 9th, and 10th August, lat. 35 S., lon. 27 E., was obliged to run back 100 miles to the N.E., under double-reefed topsails and foresail, as the vessel could not withstand the force of the gale; lost bulwarks, &c., and sustained slight damage to bows.

Batavia.—Oct. 6, the Birker, from London to Hong Kong, has put in here from Anjer, owing to contrary currents, and with windlass broken; probable detention three days.

Amoy.—Oct. 5, the Hector, steamer, Shanghai to London (tea), struck a reef six miles from this port, and has broken in two; 1,000 packages saved damaged; crew saved.

MISCELLANEOUS.

At Malta.—Oct. 1, passed, Hampton (str.), from Southampton, for Batavia; 4, Venice (str.), from London, for China and Japan.

Port Said.—Sept. 30, arrived, Ægean, from China for London, and proceeded; Oct. 1, Lord of the Isles, from Shanghai, and left on the 2nd for London; 6, Achilles, from Liverpool for Shanghai; Hampton, from Southampton for Batavia.

Suez.—Arrived, Oct. 4, from Shanghai, for London, Menelaus.

Aden.—Sept. 27, arrived, Tom Morton (str.), from Foochow, and left same day for London; 30, Holland (str.), from Batavia, for Nieuwe Diep, and proceeded; Crocus (str.), from Foochow, and left on the following day for London; Oct. 5, Torrington (str.), from Batavia, for Rotterdam.

The Thingvalla (Danish str.), from Antwerp for Singapore and China, with iron and a general cargo, put back to this port, Sept. 12, with three blades of her propeller gone. It will be necessary to replace the propeller by a spare one on board. When this vessel arrived here originally on the 6th Sept., the master found that two blades or portions of them had been knocked off, but the vessel proceeded, intending to change the screw at Singapore. She, however, fell in with heavy weather off Socotra, and lost the third blade, when it was thought advisable to bear up.

St. Helena.—Arrived, Aug. 22, Mountain Ash, from Rangoon; 24, M. D. Rucker, from Bassein, both for Falmouth; 26, Tage, from Akyab, for Channel, f.o., Whittington; 27, Assaye, both from Bassein, for Liverpool; 29, Wm. Woodbury, from Ilo Ilo, for New York; 31, Isabella Ridley, from Sourabaya, for Gibraltar; Sept. 2, Nieuwland, from Batavia, for Rotterdam; 3, Zodiac, from Padang, for New York, Sei Amici, from Rangoon, for Channel; 5, Marie, from Batavia, for Rotterdam; 9, Illovo, from Colombo, for London, passed Aug. 22, Veloce, from Akyab, for Falmouth; 26, H.R.G.P., from Reunion, for Nantes; 5, Palmyra, from Rangoon, for Channel.

Ascension.—Passed, Aug. 27, Cambay, from Maulmain, for Falmouth; Sept. 1, Petronella, from Macassar, for Amsterdam; Etta Rickmers, from Akyab, for Bremen; Bechardass Ambaidass, from Rangoon, for Falmouth; 2, Bristolian, from Bangkok, for London; 5, Sophia, from Rangoon, for Falmouth.

Cape Town, Aug. 25.—Sailed, for Anjer, Confluentia; for Batavia, Barbadian.

East London, Aug. 25.—Sailed, Sea Foam, for Java.

Port Elizabeth, Aug. 31.—The repairs to the Tecumseh are being rapidly effected. The master is advertising for a loan of £3,000 or £4,000 in bottomry.

Colombo.—Arrived, Scotland (str.), from Shanghai, and left Oct. 5 for London.

Drowned at Sea.—The late master (Lasbrooke) of the Boldon, from Singapore, which arrived at London on the 30th ult., was washed overboard on the 6th July.

Intelligence has been received from Gibraltar by the P. and O. Company that the Deccan, which on the 30th ult. left Southampton for Bombay, lost her screw when forty miles eastward of Gibraltar, and had to be towed back to the last-mentioned place. The Company has despatched another steamer, the Peking, to tow the Deccan to Malta (where her spare screw will be fitted), and take on the passengers, mails, and cargo to Bombay.

The number of ships which have passed through the Suez Canal from the 11th to the 20th September has been 35; from 11th to 20th August, 35; from 1st to 10th September, 37; from 1st to 20th September, 72 ships. Receipts from transit, from 1st to 10th September, 710,000f.; from 11th to 20th August, 760,000f.; from the 1st to 20th September, 1,470,600f.

Trial Trip.—The Pontianak (str.), which was launched from Messrs. Lobnitz, Coulborn, and Co.'s yard at Renfrew on the 7th ult., went on her loaded trial trip on the 1st inst., and attained a speed of 12¾ knots over the guarantee; she will shortly proceed to Singapore.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.

Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,
HOMŒOPATHIC CHEMISTS,

48, Threadneedle-street, and 170, Piccadilly. Works:—Euston road and Camden Town, London.

Makers of Epps's Glycerine Jujubes (throat irritation).

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

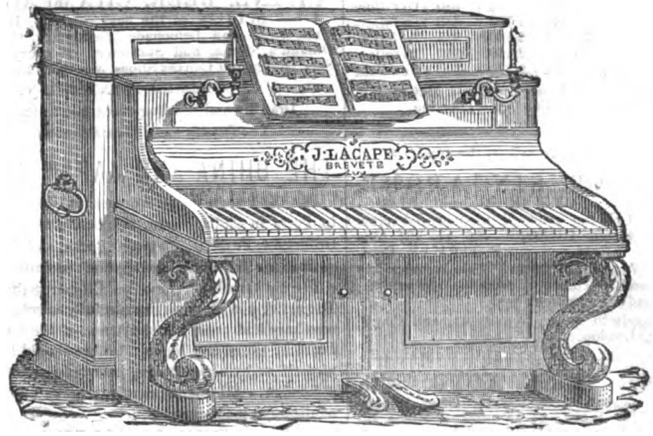
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29, BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

THE MAILS, &c.

The French mail, bringing the above advices from China and the Straits Settlements, was delivered, *via* Marseilles, on the 12th inst., being six days in advance of its due date. There are no later Japan advices. The next inward (P. and O.) mail, with a week's later dates, viz., Yokohama 1st, Shanghai 5th, Hong Kong 11th, Singapore 18th Sept., is due on Monday next, the 25th inst. The Pacific mail, from Yokohama, Sept. 11, may be expected on Tuesday or Wednesday next.

List of Passengers.

PASSENGERS INWARD.

By last mail to Brindisi, per P. and O. steamer *Malta*, arrived Oct. 6.—From Singapore: Capt. Smith.

To Southampton, per P. and O. steamer *Malwa*.—From Shanghai: Mr. Jochumson. From Singapore: Mr. J. Bolt, Mr. and Mrs. R. Coulson and child. From Penang: Capt. and Mrs. Ord.

By this mail to Marseilles, per Messageries Maritimes steamer *Meikong*, arrived Oct. 10.—From Yokohama: None. From Shanghai: Mr. and Mrs. Priestly-Tates, Mr. and Mrs. Holdsworth, Mr. Buchan, Mr. Vernet. From Hong Kong: Mr. and Mrs. Howard, Mrs. Schmitz, Messrs. Ewen, Hubbe, Heitmann, Cundall, Brossement, seven Japanese students. From Saigon: Messrs. Norie, Guirard, Howard. From Singapore: Mr. and Mrs. Etty, Messrs. Hoare, Kay, Manifold, Cameron, Harper, Nicaise, Brand, Perez, Mr. and Mrs. Brine, Mr. and Mrs. Poole.

PASSENGERS OUTWARD.

Per P. and O. steamer *Malta*, from Venice, Oct. 15.—To Yokohama: Mr. H. O. de la Camp.

Per P. and O. steamer *Gwalior*, from Southampton, Oct. 19.—To Yokohama (*via* Bombay): Capt. Saunders, Marquis of Kildarç.

Per P. and O. steamer *Mirzapore*, from Southampton, Oct. 21.—To Yokohama: Rev. and Mrs. J. Bates. To Shanghai: Mr. W. Lamond. To Hong Kong: Mrs. P. B. C. Ayers, Major and Mrs. R. H. Newbolt. To Ceylon: Mr. C. W. Jebb, Miss Jebb, Mr. C. H. Cameron, Mr. and Mrs. H. H. Cameron, Miss M. Cloystown, Miss E. O. Wignon, Mr. R. S. Fraser, Mr. A. C. Williams.

Per P. and O. steamer *Baroda*, from Brindisi, Nov. 1.—To Ceylon: Mr. and Mrs. Hutton, Mr. F. H. Izard.

Per French steamer *Sindh*, from Marseilles, Oct. 24.—To Yokohama: Mrs. Watanabe, Mrs. Nakasima. To Shanghai: Mr. Laing. To Hong Kong: Sir Arthur and Miss Kennedy, Mr. O'Callaghan, Mr. and Mrs. Coxon, Mr. and Mrs. Sunkiewitch To Batavia: Mr. and Mrs. Greig, Mrs. de Hart, Mr. and Mrs. Van Trist. To Singapore: Mr. W. H. Read, Mr. and Mrs. de Rivera and child, Mr. Peyer, Mr. J. F. Torrame. To Galle: Mr. E. Vex, Mr. Pauncefote, Mr. Russel, Capt. Jessop, Miss W. Jones.

Per French steamer *Meikong*, from Marseilles, Nov. 7.—To Shanghai: Mr. Bavier, Mr. Choppard, Mr. H. Relph. To Batavia: Mrs. Barge and family, Mr. Brink. To Singapore: Mrs. Harvey, Capt. and Mrs. Ross, Mr. John Ross, Mr. and Mrs. Adamson and child, Miss MacNair, Mr. and Mrs. Buchanan, Mr. J. Vaughan.

Per French steamer *Amazone*, from Marseilles, Nov. 21.—To Batavia: Mr. and Mrs. J. Wuste. To Singapore: Mr. Baumgarten and family, Mr. Thos. J. Broome. To Galle: Mr. and Mrs. J. F. Dickson, Mr. A. MacFarlane.

Per French steamer *Djemnak*, from Marseilles, Dec. 19.—To Hong Kong: Mr. and Mrs. Pelham Warren.

To Java, per Nederland Company's steamer *Prinses Amalia*, from Nieuwediep, Oct. 3.—Mr. C. A. Kroesen, Mr. T. Reervnk, Mr. J. B. van Delden, Mr. G. H. Furnee, Mr. and Mrs. C. Muntendam, Mr. G. W. F. Kehrer, Mr. R. S. Metselaar, Mr. and Mrs. B. F. Matthes, Mr. and Mrs. W. F. Bosman, Mrs. E. F. Schenck, Mrs. J. Cramer, Mrs. E. Beuzemaker, Mr. and Mrs. H. Volten and child, Mr. and Mrs L. W. F. Schmidt and three children, Mrs. Hageman, Mrs. Stoelman and two children, Mr. and Mrs. A. de Vulder van Noorden, Mrs. Quartera, Mrs. B. Arendsen, Mrs. M. J. A. Harloff Greve and three children, Mr. and Mrs. B. Bossert, Mr. and Mrs. F. Schenck, Mr. and Mrs. D. Feckema and two children, Mr. and Mrs. A. C. Suyck and eight children, Mrs. Porrey, Mrs. Noordhoven, Mrs. C. H. van Zalingen and three children, Mrs. Dunlop and two children, Mrs. van Oosterzee, Mr. and Mrs. O. Ivan Cattenburgh, Mr. P. Ladage, Mr. C. H. Crone, Mrs. Meyer, Mr. M. Faunay, Mr. W. H. Scheffer, Mr. Klatton Pastoors, Mr. and Mrs. A. P. Smelser, Mr. P. Schrom, Mr. C. Voorhoeve, Mr. J. Wouters, Mr. A. M. van Haeffen, Mr. A. van Stigt, Mr. D. W. Zelisfe, Mr. A. Ch. van Langen, Mr. K. A. van Langen, Mr. Capel, Mr. H. F. Meyer, Mr. W. B. A. A. Baron van Dedem, Mr. C. A. Bekker, Mr. A. J. A. T. Erdmans Mr. J. B. J. H. van der Meusch, Mr. L. Lange, Mr. van Galen and three workmen, Mr. H. Verploegh, Mr. T. P. Lofichius and two children, twelve subaltern officers, 540 soldiers.

Summary of News from the Far East.

JAPAN.

Our advices from the Japan Ports by the present mail are of no later dates than those received by Pacific mail on the 29th ult., and published in our issue of 4th inst. Advices bearing date Yokohama Sept. 11 have been received at San Francisco, but the summary of news telegraphed to New York contains nothing of importance.

CHINA.

PEKING AND TIENTSIN.

The Tientsin correspondent of the *North China Herald* writes as follows:—

The American steamer *Chihli*, on her outward voyage to Shanghai, on the 18th Aug., while passing the village of Koku, was assaulted with stones and missiles by the Chinese junkmen at the native anchorage in the Koku bend. The affair is to be officially represented to the authorities. The anchorage of the southern junks at Koku is a standing nuisance; hardly a year passes but one or more foreign steamers are assaulted, just as the *Chihli* has been in this instance. I am informed that at present there is barely room left, at this difficult bend, to allow foreign vessels to pass, the junks occupying nearly the whole channel. The native officials appear to have little or no control over these southern junkmen, who are, as a class, notoriously disorderly and dangerous.

Another very sudden death has occurred in our midst; on the 14th Aug. Mr. Horace Farley Lovett, of the Chinese Customs' service, was seized with an apoplectic fit, and died in two hours. Mr. Lovett was thirty-two years old, and had been in China about fifteen years, and in the Customs' service about

Digitized by Google

even years—first at Newchwang, then at Shanghai, whence he came here about four months ago. He was a native of Beverly, Mass., U.S.A.

There is the usual amount of speculation and rumour respecting the progress of Mr. Wade's negotiations with the Chinese Government; bnt nothing reliable or definite has been made public.

Two members of the Legation escort arrived here from Peking yesterday. It is surmised that they brought despatches for Mr. Wade. Admiral Ryder is expected to reach here within a week. He will be conveyed from his own ship to Tientsin, in the *Vigilant*.

Highway robberies are said to be of quite frequent occurrence in the country to the S.W., a distance of 300 or 400 *li* from Tientsin. They are purely local affairs. They have not even the old excuse, "poor crops," for the yield in that direction seems to have been fair.

We have had a most agreeable change in the temperature. The thermometer fell suddenly from the nineties to seventy degrees Fahrenheit, where it has steadily remained ever since. We have had a cool breeze and a pleasant shower—enough to make the roads muddy.

CHEFOO.

This port has been visited by an unusually severe gale, which lasted continuously for three days, and has occasioned a serious amount of damage and loss of life, both ashore and afloat. On the 18th Aug. during the whole day a strong wind prevailed from the north-east, and the heavy sea which soon got up stopped all operations in the harbour. At the same time the water rose at high tide to an alarming extent, and the heavy breakers rolling in began to take effect on boundary walls and other outlying property, which is usually well out of the reach of danger. On the following day matters began to look more serious; the gale increased, the sea became more furious, and the tide rose still higher, doing very serious damage along the whole line of shore. The ships in the harbour were anxiously watched, but seemed to hold their positions well except the *Ellon Castle*, which being anchored out in the fairway was exposed to the full force of the waves rolling in from the sea. At four P.M. it was evident that she had parted her last chain, and was drifting helplessly on to the beach. At last she took the ground, having been run nearly stem on by those in charge. Nearly the whole of the Foreign Community turned out, bnt the violence of the waves was such that no assistance could be rendered to the unfortunate crew. These succeeded in launching a small boat, in which four Chinese supercargoes and two native sailors found their way ashore amidst the surf. A rope which had been attached to this craft with a view of hauling it back for another load, unfortunately parted, and from this time till past midnight the remainder of the crew stuck to the vessel, with heavy seas breaking over them all the time. Soon after midnight the vessel began to break up, and in a few minutes became a total wreck; the crew jumped or were thrown into the water, and all with the exception of four Chinese and a Korean boy swam or were washed ashore. Captain Ramsay himself was picked up last of all, clinging to the after-part of the wreck.

On the 20th it was found that the German brig *Peter* had gone ashore during the night; she was lying high and dry at low water, but in a comparatively safe position. The *Catharina*, another German vessel, kept dragging her anchors, and was found touching the ground a few yards in front of the Customs jetty. Numbers of junks are ashore, and it is reported that some twenty or thirty Chinamen have lost their lives. The *Ellon Castle* was laden with beans, bound for Amoy, and the beach presented a curious spectacle of hundreds of coolies with baskets of every description eagerly collecting the cargo as it was thrown up in yellow heaps all over the place. The vessel is said not to be insured, and much sympathy is felt for the owner, Captain Ramsay, who has thus lost his all.

The tide was higher by five feet than has ever been known by the oldest resident; and many of the foreign houses were flooded.

SHANGHAI.

The present mail brings advices from this port to the 29th August; no later mail from London had been received. The following summary of news is from the *North China Herald*:—

The removal of Chinese troops has been going on rapidly. The C.M. steamer *Yungching* passed up the river on the 25th August, bound to the Arsenal for another, and nearly, we believe, the last batch.—The steamer *Leeyuen* arrived on the 27th from Chinkeang, and after a short detention in the lower limits of the harbour, also proceeded towards the Arsenal for the same purpose. The behaviour of the men latterly has been as orderly as it was at first bad; and the near departure of the remainder is regarded with unaffected regret by our native fellow residents. Their martial visitors have so grown upon their affections that a prospect of another Formosan embroglio would throw them into ecstacies. For the first time, perhaps, in Chinese history, the soldiery have been kept well in hand, and no depredations allowed on the citizens. Besides this, the troops have spent a large portion of their pay in buying articles which cost only half as much here as at their homes on the north of the Yangtsze; these commodities not having been li-kinised. Instead of forcibly taking articles from shopkeepers at prices appraised by themselves, as is their wont, they have paid fair prices for them. We would gladly ascribe this change to improved discipline; we did so in fact to a native friend, who evidently comprehended the situation better than we did; it was fear, he said, of our Municipal police that caused such good order to prevail.

A Volunteer parade was held on the 26th August. There was rather a better muster than has been usual lately. Still, with the exception of the Miholoongs—who turned out nearly sixty, and were divided into two companies to equalise them with the others—no company mustered in half its effective strength. The force marched out to the racecourse, where some skirmishing and battalion drill was fairly well gone through; the Miholoongs again certainly deserving credit for their skirmishing practice. On the march home various changes of formation were accomplished, the men improving evidently with each repetition, thus showing that all they want is more drill. We shall be able to have more frequent parades now the weather is getting cooler; and men must turn out more regularly. That even the nominal strength of the corps is less than a half of what it should be we are tired of repeating.

Li-Hun-Chang has started for Yunnan, *via* the Tung-ting lake. He will be able, on arrival, to complete the arrangements which have, of course, been going on all these months, to prove that nobody did it; and to finish promoting any officials about the neighbourhood who may have been so far left in their posts, so that, at any rate, no one may be discoverable who did do it. By the time the British delegates arrive all will be ready; fortunately, it will be difficult to get rid of Li-Se-tai, who is rather too prominent.

Complaints of laxity in the performance of his official duties by the present Chehsien have attracted the attention of the Futai, who is said to have communicated with the Taoutai on the subject generally, but more especially with reference to the recent escapes of criminals from the Shantung-road Hospital and the Yamen Prison. Although not suspended from office, the Chehsien has been compelled to doff his button, pending an inquiry. Crime is said to have increased in the city and neighbourhood, the list including three murders, several burglaries and robberies with violence, and outrages of other descriptions.

A case of systematic squeezing has been brought before the Mixed Court, which we should hardly have thought possible under the eyes of the police. But where so much is knowingly let pass, it is less surprising that smaller matters should be overlooked. A Chinaman seems to have been in the habit of systematically squeezing native boatmen, under pretence that he was authorised to impound their boats for official use. In the case which led to his arrest, he carried off two yulohs in the absence of money; and in a house near the Honkew Creek, which he had told his victims was a tax-office, the police found a number of yulohs that had been apparently stolen from boatmen under similar circumstances. The police seem to have arrested the thief in this case, without reference to the Foreign Consuls; and he was sentenced to a sharp, though scarcely adequate punishment.

There has been another desperate fight in Hongkew; a party of sailors quarrelled in the neighbourhood of the Broadway, knives were drawn, and one man is asserted to have been seriously stabbed. He was, however, taken away by his companions, and the efforts of the police have hitherto failed to trace any of the men concerned.

We hear that, consequent upon the action of the police to suppress annoyances resulting from the present system of hiring jinrikshas to middle men, who in turn sub-let them to others by whom they are let out singly to the coolies, the principal proprietors are conferring, with a view not only to substitute a better plan in that respect, but also to provide a less dirty class of coolies as runners. The latter is a consummation devoutly to be wished.

We are glad to see that a concert is to be given next week by the Amateur Wind Instrument Society, for the benefit of the sufferers by the late floods in the South of France. The concert is to be held in the garden of the French Municipal Hall, which will be illuminated for the occasion, and we trust will bring a handsome contribution for the purpose of the charity.

On the 24th August a cargo boat from the steamer *Quang-se*, having on board fifteen cases of Bryant and May's matches and six cases of clocks, got into the "chow chow" water, where, being overladen, she rocked so much that the upper tier of cases slid off into the river. It was only by a smart chase after the would-be salvors, who evidently considered the strays as their own property, that three cases were recovered by one of the river police officers, who followed the delinquents 300 or 400 yards inland, where one of the cases was found buried under some grass. Three cases of matches are still missing.

The body of a foreigner has been found floating in the river, above the East Gate. There was a severe wound on the head, which leads to the supposition that deceased met his death through violence.

According to a letter from Newchwang the weather, which

Digitized by Google

had been usually hot, was cooling, and the thermometer had fallen to sixty-six. Rain was threatening but did not come. Such a dry spring and summer had not been known within the recollection of the oldest resident.

The Municipal Council have, at the written request of twenty-five electors, convened a special meeting of ratepayers for the 7th Sept. The questions to be considered are :—The application of the Hospital Trustees for a loan by the Municipality ; and a motion by the Council in favour of a re-assessment of land and houses within the limits of the Settlement.

H.M.S. *Vigilant* has looked in during the week, but left again for Chefoo, where she will meet the Admiral and take him to Tientsin.

According to the China Coast Meteorological telegram, a short, but rather severe earthquake was experienced in Nagasaki on the 25th Aug. No details are given.

The *Celestial Empire* supplies the subjoined items of news :—

The political situation remains *in statu quo*. We know absolutely nothing more now than we did when rumours that an ultimatum had been presented by Mr. Wade to the Chinese Government first reached us ; nor, in spite of the general feeling of expectation, do we believe there is any immediate chance of our further enlightenment. It is said—although we are unable to trace the statement to any acknowledged authority—that Mr Wade has presented an ultimatum to the Chinese Government' and that he is now at Tientsin awaiting their decision and reply. Meanwhile, however, everything is at a standstill, with the exception that the Chinese are most indisputably making extensive preparations for any contingency that may arise. Troops are being carried about, armaments are being shipped in large quantities to the north, and the Imperial Arsenals are full of work. A rumour is current among the Chinese that the Yamen is divided upon the question of the ultimatum. Prince Kung, Wen-seang and Li-Hung-Chang are in favour of preserving peace with England ; the other party are all for brazening it out. We have no idea as to the source from whence this news is said to come ; but give it in the belief that there is probably as much truth in it as in any other.

Death has been playing sad havoc with the French missionaries at Newchwang ; two sisters and two padri have lately died, three of whom were carried off in as many weeks. There are many stories flying about, of a nature similar to those before the Tientsin massacre ; but whether they have been got up by the literati, or are merely the consequence of some new arrivals —six French nuns have appeared with Monsignor Verrolles—it is not possible to say. Anyhow some of the residents are seriously uneasy, if not thoroughly frightened, and hope that more satisfactory arrangements may be made for next winter. It is lamentable that natives cannot be induced to believe in the purity of those who work for nothing ; and at the same time one is almost tempted to regret that any unnecessary elements of danger should be imported, especially in such very critical times as the present.

The Chehsien of Kwen-shan has issued a proclamation, exhorting all in his jurisdiction to treat foreigners kindly in future, and to look upon them as guests, not intruders. He says that accidents may be forgiven, but organised attacks will be visited with prompt and heavy punishment. The Hsien has evidently had quite enough trouble already, and is anxious to avoid a repetition of the nuisance.

The steamer *Oceanic* has arrived at San Francisco, bringing advices from Shanghai to the 4th Sept., and the subjoined intelligence has been telegraphed to New York :—

While pressing the settlement of the Margary case the British Minister did not remain at Peking, as at first intended, but at Tientsin. The final acquiescence of China to his demands was reluctantly given. All indications point to the certainty that if resistance had been determined on the war would have been far more desperate than ever before. The hostile preparations were more comprehensive than usual, and among the measures contemplated was the burning of the open ports and a general sacrifice of Chinese property for the sake of injuring foreign interests. The counsels of a few high officials, strong in influence though in the minority in number, averted the contest; but preparations for a conflict were still progressing, and the attitude of China was more menacing than at any time since 1861. The terms demanded by Mr. Wade greatly increased the ill-feeling. The claims for punishing the murderers and for the indemnity are recognised as not extraordinary, but the introduction of commercial demands into such a question is bitterly complained of.

FOOCHOW.

The subjoined items of news from this port are taken from the *Foochow Herald* :—

During some heavy thunder showers on the 18th Aug. the sanitarium of the American Methodist Episcopal Mission at Sharp Peak was struck by lightning. The lightning entered the top of the front wall, near the southwest corner, descending through the bricks to the verandah blinds, one of which was scorched down its whole length and nearly torn from its hinges. From this blind the lightning seems to have descended in several forks to the earth, jagging the bricks in several places and burning two small holes in a zinc water pipe on the ground. Three of the missionaries were studying Chinese at a table not more than four or five feet distant from the corner that was struck, but no one was injured ; one who was seated at the opposite end of the verandah saw what appeared to be a ball of fire as large as his double fist apparently fall from the direction of the blinds on to the floor of the verandah and scatter sparks around freely; a very strong sulphurous odour accompanied the shock. A gentleman and a lady were knocked from their chairs to the floor by the violence of the shock ; but, as we have stated, no person was injured. The damage to the building was trifling.

An International Racquet Match (Irish *versus* Scotch) was played on the 25th August. From the well known skill of the players, it gave rise to considerable interest, and attracted a large number of spectators. The sides were Messrs. Reeves and Dunne (Irish), against Messrs. Saunderson and Walkinshaw (Scotch). The first game resulted in rather an easy victory for Messrs. Reeves and Dunne. The second game, to the surprise of the knowing ones, was won without any difficulty by the opposition ; this gave considerable interest to the deciding game, which, after being for some time evenly contested, was won rather easily by Messrs. Reeves and Dunne. In the first two games the competitors did not quite play up to their usual form, the first half of the deciding game, however, gave rise to some excellent play, and although resulting in an easy win, at one time it looked as if it were anybody's game.

We understand that, as the result of persistent effort on the part of Mr. De Lano, United States Consul, extending over a period of several years, the Committee of Foreign Trade have at last issued a proclamation, to be posted up throughout the province, stating clearly the toleration of Christianity under the treaties, and forbidding all attempts to compel native Christians to contribute to idolatrous ceremonies, or to restrict them in any of their rights or privileges on account of their profession of Christianity.

The Imperial Commissioner for Formosan affairs arrived from Tai-wan-fu on the 24th Aug., in one of the arsenal gunboats. His Excellency was received by the Chinese fleet at the Pagoda Anchorage, in something like the foreign style on such occasions, *i.e.*, there was a great amount of cannonading, a somewhat lavish display of dirty bunting, and manning of yards, &c. The true ring of enthusiasm was conspicuous by its absence, and there was an air of counterfeit about the entire business.

The telegraph seems to be making quiet progress towards Amoy. Occasional indications of opposition are easily managed by the mandarins—now that they really wish to establish the line. Mandarin Fu, the Sub-Director of the Committee of Trade, is at present quartered in the telegraph building as a guest, and has general charge over the construction of the work, so far as native authority is concerned. Several *employés* of the Great Northern Telegraph Company started over the route towards Amoy on the 25th Aug. on business connected with the enterprise.

The annual meeting of subscribers to the Native Hospital and Dispensary was held on the evening of the 20th Aug., Mr. Sheppard in the chair. The financial statement for the year—showing a credit balance to 30th June last of $894.01—was submitted to the meeting, an unimportant discussion ensued, and a new committee was selected. After a formal vote of thanks to the chairman, the proceedings closed.

HONG KONG.

Our advices by the present mail extend to the 4th September ; no later mail had arrived out. The following items of news are from the *Hong Kong Daily Press* :—

A meeting of the Legislative Council was held on the 2nd September, when Ordinances were passed to provide for the more convenient administration of "The Extradition Acts, 1870 and 1873," to consolidate and amend the Ordinances relating to the assessment and collection of rates in the colony, and for compiling a new edition of the Ordinances of the colony. The Administrator moved the second reading of an Ordinance for consolidating the Enactments relating to the speedy recovery of Crown Debts for Rents and for Assessments, Fees, and Forfeitures ; the Ordinance was read a second time, and its further consideration postponed. The Administrator also moved the first reading of an Ordinance to provide a General Register of Marriages in Hong Kong.

We have received a telegram to the effect that Mr. Henderson, the Customs' Engineer in Chief, has been mobbed on the Shantung Promontory. There is nothing very startling about the fact, and certainly nothing very novel ; it is only another example of that ebullition of Chinese hostile feeling which, during the past few months, has been manifesting itself in different localities in the north, and which, moreover, seems to be spreading. As we have only yet received the cable message, we are of course in complete ignorance as to the cause of the disturbance, but the chances are that it has been nothing of very great importance. The native rowdy is essentially rowdy, and he only requires to receive the cue from some one superior in station to himself to go at the individual in question, whoever he may be,

Digitized by Google

with all the stubborn ardour and impetuosity of his nature. Mr. Henderson for some reason or other has never been very popular with the natives. If we remember rightly he has been in tronble with them before ; this may very likely be no fault of his personally, but of that we cannot say. The fact is there, however, that he has been mobbed, and it is equally true that many more foreigners in China have recently been treated in a more or less hostile fashion.

Some few days ago a certain travelling trader of Canton bought a small case of matches with the intention of selling them in his native village ; he paid duty at the proper Customs on his merchandise, and then took passage on board a passenger boat, to which he transferred it. When the boat was passing Fatae, a few miles from Canton, it was stopped by the petty officers of the lekin station in order that they might search it for smuggled goods : of course, they spied the matches and eagerly pounced upon them as dutiable goods. The owner protested that he had paid duty on them, but this did not prevent the officers from weighing them again and discovering that the case was two catties over what had been paid duty on. Thereupon they charged the unlucky trader with intending to smuggle, and threatened to put him in irons. Ultimately, by working upon his terrors, they contrived to exact $10 from him, and then permitted him to resume his journey, probably with a resolution to recoup his loss on the earliest opportunity, at the expense of the revenue.

A few days since two European Chinese Custom-house officers presented the colony with an exciting scene. It appears that a case brought before the police-court wherein a man was charged with the unlawful possession of lead used for the purpose of sinking smuggled opium in the Canton River, arrested the attention of the Customs' authorities through the columns of the newspapers, and they at once despatched two European Custom-house officers to Hong Kong, to watch the Canton boats as they left, and discover who were the smugglers. They were lying off in a sampan outside the Ichang, and when the *Kinshan's* whistle blew they pulled alongside of her. Immediately they showed their faces the Chinese on board were struck with consternation, and, thinking that the officers had as much power here as in Canton waters, at once threw their opium overboard. Seeing this, the Custom-house officers refrained from boarding, and assisted to pick up the opium. Small packages and boxes were seen floating about in all directions ; one box buoyed contained a considerable amount of opium, and in hauling it up the rope gave way. Fifty-nine balls, however, were recovered, and the opium was taken to the police-station. It is said the value of the opium recovered is $2,000. Those who sold the unprepared opium to the parties who were taking it up allege that it was not paid for, and have engaged Mr. Brereton to claim its return to the rightful owners. Mr. Brereton has made an application for that purpose, but the necessity for an investigation has caused the inquiry to be adjourned.

As the O. and O. S. N. Company's steamship *Oceanic* left her moorings, and was turning round to steam out through the Ly-ee-moon Pass, Mr. Stuart's pilot boat *Florida*, which was alongside, capsized and sank, in consequence of the Chinese crew allowing the masts to catch the *Oceanic's* gear and outriggers. Their carelessness nearly cost them their lives, as they were only saved by the exertions of Mr. Stuart, who was on board the steamer; he not only rescued them, but succeeded, by diving, in divesting the boat of the weight which kept her at the bottom, and brought her safely to shore.

The Macao Government Estimates for the year 1875-76 have just been published, showing the probable receipts to be 354,831,333 reis and the expenditure 322,702,481 reis, leaving a surplus of 32,128,852 reis. The several items of receipts are thus classified :—

Direct taxes	293,106,333
Indirect	26,991,000
Sundry revenue	34,734,000
Total	354,831,333

The above receipts as compared with those of last year show a decrease of 19,404,667 reis.

We are pleased to state that Mr. C. D. Bottomley, who has retired from the firm of Messrs. Bottomley and Hughes, has been presented with a testimonial by a number of his friends. Mr. Bottomley has been long and favourably known in the colony, and both in his business and private relations is held in universal respect. He is now about to accept a position in the firm of Messrs. D. Lapraik and Co., and he enters upon it with the best wishes of his numerous acquaintances.

SIAM.

—o—

BANGKOK.

The *Siam Advertiser* of the 2nd Sept. contains a return of the imports to Bangkok as declared at the Customs for the month of July last. The return is furnished by Mr. S. Bateman, the Commissioner of Customs, and its figures are of some interest to our merchants and traders. The total value of the imports for July amounted to $497,946, of which sum $395,322 is credited to Singapore, $70,152 to Hong Kong, $23,000 to Europe, and $9,463 to the coast. These figures show the value of the Bangkok trade to Singapore. The following are the principal articles of trade from Singapore in the order of their value :—

Treasure	$108,277	White Shirtings	$27,568
Opium	69,045	Grey Shirtings	24,659
Chowls	31,677	Coloured Piece Goods ...	16,712

From Hong Kong the principal imports consisted of silk piece goods of the value of $20,324, silk chowls $7,452, brass and copper-ware $6,919, silver-ware $4,263, and silk trowsers $3,062. From Europe the list of imports is headed by liquors of the value of $6,131, and next come fancy goods $3,521, glass-ware $3,490, and ship-chandlery $3,284. The coasting trade appears to be very insignificant, consisting almost entirely of tin, which represents $7,878 of the total amount $9,463.

The same paper contains an official return of the exports from Bangkok for the same month, but the quantity only is given without a valuation. Of course the principal article is rice, and the principal market for it is Hong Kong. Of rice there were exported in July month the following quantities :—

To Hong Kong pls.	150,971.66	To Europe, America, and Australia, pls....	18,687.52
To Singapore	81,140.09	To Java	21,202.81
To China	104.06	To Coast	15,261.15

making a grand total of pls. 291,367.29. The following are the other principal articles exported :—

Treasure	$46.478	Cleaned Cotton, pls. ...	6,525
Sapanwood, pls.	11,310.32	Rosswood „ ...	5,353
Sugar „	10,618	Dried Mussels „ ...	5,911.52
Teak planks	8,935	Paddy „ ...	4,472
Uncleaned Cotton ...	8,682	Sticklac „ ...	1,059.44

The bulk of the export trade of Bangkok appears to be with Hong Kong in almost every article.

JAVA.

—o—

BATAVIA.

According to an official telegram from Atchin, dated the 18th August, and published at Batavia on the 27th, the state of health at the seat of war was favourable, and no fresh cholera cases had appeared there since the 16th August. The *Dagblad* of the 28th August states that passengers who arrived at Padang on the 22nd from Atchin in the steamer *Salak*, gave the following information :—The state of health at Atchin was not more unfavourable. A few cases of cholera had, however, appeared. Before the departure of the *Salak* for Padang our troops had for two whole days been in action with the enemy, who suffered heavy loss, while on our side the losses were not slight. A newly constructed fort was wrested from the enemy.

We learn from the *Handelsblad* of the 23rd Aug. that Batavia is at length to have floating dry docks, under the management of private persons, a Mr. A. G. Bosch having obtained from the Government, in 1872, a concession for seventy-five years to establish them in Batavia roadstead, and having formed a company for the purpose.

According to the *Java Bode*, a portion of the cargo of the *Neva*, sold by auction at Batavia on the 25th Aug., brought 30,000 guilders.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 11th Sept. ; the P. and O. mail from London Aug. 6 arrived out on the 5th Sept. We take the following items of intelligence from the *Straits Times* :—

Messrs. Daly and O'Brien, the surveyors sent by Government across the country from the Moar river to Pahang, returned to Singapore on the 9th Sept., in a small native boat from Pahang. It will be remembered that the *Pluto* was sent to meet this party, but after waiting two days proceeded on to Tringanu to bring down the Sultan ; but we now learn that the *Pluto* had only left about two hours when the surveying party arrived. They were, however, very hospitably cared for by the Bandahara of Pahang, though subjected to an irksome delay of several days before they could get a passage to Singapore. We understand the survey has been very successful, and that the watershed whence the Moar and Pahang rivers take their rise was found exactly as it had been described by H.H. the Maharajah of Johore. When going up the Moar river, the party made a detour of some twenty-one miles from the river to the Chindrass Mines, and were thus enabled to connect their survey with the surveys already taken at Malacca. In Rumbowe, they met with very unfriendly treatment from the natives, and two of their Chinese coolies were detained for two days by the Rumbowe people, about thirty of whom, moreover, surrounded the surveyors and attempted to rob them, but were deterred by a determined attitude and the exhibition of a revolver. Owing to this unfriendliness of the Rumbowe people it was impossible to make the intended detour towards Sunghie Ujong. We understand the party crossed the

Digitized by Google

track of Mr. Maclay, the Russian traveller, who was going up into a district inhabited by very wild tribes; it is said the Malays consider Mr. Maclay's undertaking hazardous, and believe his destruction almost certain.

We have received a despatch from the Secretary of State for the Colonies to the Governor, announcing the appointment of Major Gray as Superintendent of the Singapore Prison, to which is appended a letter to Major Gray, explaining the nature of the appointment and the conditions attached thereto. It appears that the appointment is provisional for two years, during which the Government may terminate the engagement at any period, and after which, if recommended by the Governor for confirmation, he will be made one of the Civil Servants of the Colony. Major Gray will be required to undergo two months' training in the English convict prisons, and will receive half salary from the date on which he commences his training. With all respect to Earl Carnarvon, we think the two months to be spent in "training" in the English convict prisons both time and money thrown away; the English convict establishments are doubtless model institutions, and their discipline and management well suited to the climate and the character and physique of the prisoners. But when Major Gray arrives here he will find it necessary to begin his training afresh, to learn something of the native character and habits of life, and how to maintain a strict penal discipline and prevent the escape of prisoners in a rambling establishment, never constructed for the purpose of a penal gaol. Against the selection of Major Gray we have no objection to make more than if any other gentleman had been appointed. But failing to find, in England, "an officer conversant with the management of a convict prison," we think the interests involved of such magnitude that a greater effort should have been made to find a man of that description for the office. No one doubts Major Gray's character as a "soldier and a man of business,"—to us the two qualifications appear hardly consonant—but the great want in our prison management is experience and knowledge of the native character; two essentials, the want of which undoubtedly led to the late outbreak and the murder of Mr. Dent, and inattention to which exposes us to the risk of a fresh mutiny.

It has been decided that the prisoners charged with taking part in the coolie mutiny on board the schooner *Hawk* are to be tried by British law, the offence having been committed on board a British vessel and in mid-channel. The question of jurisdiction has taken a long time to settle. The Maharajah of Johore, having some of the prisoners in custody, made application for the extradition of those arrested in Singapore, and the question was referred to the Government law officer for his opinion, which, after a long delay, has been given as above. We trust the great lapse of time between the commission of the crime and the trial may not result in a miscarriage of justice, but fear there is great danger such may be the case.

We are pained to have to record the sudden death of the Rev. B. P. Keasberry, who fell dead while preaching to his congregation in his Mission Chapel in Prinsep-street. Dr. Little was immediately sent for, and hastened to the chapel, but could be of no assistance, as Mr. Keasberry was dead before he had reached the floor, having fallen a victim to disease of the heart, from which he had long been suffering. Mr. Keasberry was highly esteemed by all classes of the community, having incessantly laboured for the past thirty-six years for the religious and secular education of the Malays, and accomplished much good.

It is rumoured that the Netherlands India Steam Navigation Company intend opening a large establishment of their own at Singapore, in fact, making this port their headquarters, and that with this view they have purchased, or are about to purchase, the Bon Accord Dock, where a wharf is to be built, to which all the cargo for their steamers will be conveyed by cargo boats and steam lighters. Their general office here will, it is said, be under the control of one of their old captains, with a competent staff of mercantile assistants.

The pigmy steamer *Sri Malacca* (belonging to Mr. Tan Chin Hoon), which was seized by the steamer *Telegraph* upwards of two years ago for an alleged attempt to force the blockade of Salangore, has at length been restored by Tunku dia Oonin to her rightful owner, and is lying at present in the Malacca River, and looks rather "the worse for wear."

It is noticed in the columns of the *Sarawak Gazette* that the Dutch man-of-war *Onrust* saluted the Sarawak flag with thirteen guns instead of twenty-one. This result, whether intentional or accidental, has occasioned not a little indignation amongst the inhabitants of Sarawak. The Rajah in Council mentions the matter, and promises to write for explanation to the Netherlands Government. If this result was intentional, we think that it is rather late in the day to throw a slur on the Sarawak flag, which has been acknowledged in these waters by England, Italy, and America, and has now been in existence for over thirty years.

The *Sarawak Gazette* calls the attention of capitalists to the capabilities of Sarawak territory for depasturing cattle. There are at present about 800 head of cattle in the country, and there are, says the *Gazette*, many places on the coast with pasturage enough to feed and fatten tens of thousands. The beef that can be produced in Sarawak is excellent in quality, almost if not quite equal to that of Europe, and a great contrast to that with which Singapore is supplied by the badly-fed cattle of Tringanu.

James Nelson Lewis, Cashier in the Sarawak Government Treasury, left Sarawak by the s.s. *Royalist* on the 24th July, for six weeks' sick leave. After his departure it was found that he had embezzled about $5,000 belonging to the Government. He left Singapore by the E. and A. mail steamer *Brisbane* on the 21st Aug., booking for Townsville, Australia.

Mr. Kater, the Resident of Pontianak, accompanied by the Assistant Resident of Sambas, paid a friendly private visit on the 18th Aug. to Kuching on board H.N.M.'s gunboat *Onrust*.

The success of Mr. Salzmann's singing class has been admirably illustrated at the Town Hall, when the full choir met at the close of the second season, before a large and fashionable assemblage of the residents, who were afforded a musical treat such as they seldom have the opportunity of enjoying here. The programme consisted of full choruses, solos, glees, a quartette, and a duett; and the very effective manner in which the various pieces were sung reflects the greatest credit upon Mr. Salzmann's ability as a leader, and upon the proficiency of the choir.

We regret to learn that cholera has again made its appearance in the Criminal prison. The outbreak this time is said to be of a very virulent type. As this is the second time within the past three months that this disease has made its first appearance within the gaol walls, it is evident that a searching investigation into its causes is necessary.

We learn that the Sultan of Tringanu will return to Tringanu by the steamer *Kromatah*, and is expected to embark on the 13th Sept. from Johnston's Pier, under a salute and a guard of honour.

The average note circulation during August of the following Banks was :—

Chartered Mercantile Bank (Singapore)	...	$476,655
Chartered Bank of I. A. and C. (Penang)	...	91,466

The Governor has appointed Captain J. R. Kellock and Captain J. Mackenzie to be members of the Pilot Board at Singapore.

PENANG.

The Penang Association held its monthly meeting on the 1st Sept., and the *Gazette* of the 4th contains a lengthy report of the proceedings. The Chairman (Mr. D. Brown) took exception to the remarks of Lord Stanley of Alderley in the House of Lords on the Indian coolie question, and the ill-treatment of the coolies in Province Wellesley, but quite agreed with the noble lord that the magistrates have deteriorated, especially if that portion of his remarks applied only to Province Wellesley. The Chairman was followed by Mr. Nairne, who in a short but telling speech protested manfully against the class of magistrates appointed in Province Wellesley, saying the inhabitants of the province had been put to great expense and trouble of late, because the office of magistrate had been "filled for the most part by men or youths either practically ignorant of law, or wanting generally in those powers of discrimination, and that calmness and accuracy of judgment so necessary in a judge." The result, said Mr. Nairne, has been a series of such contradictory judgments, one magistrate paying little or no regard to the decisions of his predecessor, that a change of magistrates had come to be looked upon as practically a change of law; and, indeed, instances had occurred where a magistrate had in subsequent cases contradicted his own previous decisions, and a recent case of this sort had necessitated an appeal. After dwelling upon the evils arising from the incompetency of the magistrates, Mr. Nairne proposed the following resolution, which was seconded in an able speech by Mr. J. M. B. Vermont :—

That the Committee of this Association take immediate measures to represent to Government the present unsatisfactory state of the magistracy in Province Wellesley, and to request that a properly qualified magistrate may be appointed in Province Wellesley, who shall have no Executive duties, and whose time shall be wholly devoted to the magisterial office.

The *Penang Gazette* of the 28th August announces that a masonic lodge has been successfully formed, and says:—The lodge is now thoroughly established and in full working order, and though the usual formal ceremony observed in opening new lodges will be deferred for the present, regular masonic business will be proceeded with. It is expected that either in October or November the District and Deputy-District Grand Masters R. W. Bros. W. H. Read and F. H. Gottlieb will visit Penang, when the official opening of the lodge and installation of the W. M. will take place. We subjoin a list of officers for the ensuing year :—Worshipful Master, Bro. R. C. Woods; Senior Warden, Bro. A. Ainslie; Junior Warden, Bro. T. A. Fox; Treasurer, Bro. W. L. Hill; Secretary, Bro. J. Wilkinson; Senior Deacon, Bro. W. Marshall; Junior Deacon, Bro. J. King; Steward, Bro. J. Hewick; Inner Guard, Bro. H. Lloyd; Tyler, Bro. H. Barrow.

The *Penang Gazette* says that affairs in the Native States are by no means satisfactory, and that reports are current that gang robberies are of frequent occurrence in Laroot, in the immediate neighbourhood of the police stations too; and that in Perak Mr. Birch's police body guard are constantly being assaulted and attacked by the followers of the native chiefs. Certainly, if these reports have any foundation in fact, there is a necessity for determined and judicious action by Sir William Jervois.

Digitized by Google

The same paper says :—It is reported on good authority from Singapore that Mr. W. E. Maxwell is to cease exercising the function of Assistant Government Agent of Province Wellesley, and will for the future have to limit himself to discharging the duties of Magistrate of that district.

Commercial Report.

(For dates see first page.)

EXPORTS.

TEA.

SHANGHAI.—Black : There had been a large business during the week, and prices were decidedly firmer. Arrivals had come to hand slowly, and the stock on hand was small. Settlements—4,440 chests at Tls. 12 to 25½. Stock—14,900 chests. Green : There was no general demand. Several chops of Teenkai had been purchased but at very irregular rates, and there had been no reduction in values. Pingsueys attracted very little attention. Settlements—Fychow, Teenkai, &c., Tls. 25 to 34; Pingsuey, Tls. 16½ to 32¾.; total settlements, 15,261 half-chests. Stock, 60,660 half-chests. Export to Great Britain to date—

	1875-1876.		1874-1875.
Black	51,863,187 lbs.	against	51,683,973 lbs.
Green	1,592,537 „	„	2,877,713 „
Total	53,460,724 „	„	54,561,686

FOOCHOW.— Messrs. Westall, Galton, and Co.'s Letter says :—During the week there has been a slight increase in business on this market, and some 16,300 chests of Congou have found buyers. Congou : At the commencement of the week prices remained the same as last quoted, but during the past few days teamen have became firmer in their demands, and the market closes strong for all classes. The settlements that have taken place in the third crop teas show very full value for quality. A great quantity of these must be now close at hand, and heavy supplies are daily expected. Souchong : Only a small business has again been passing in this description. Teamen seem now more anxious to quit their stocks, but they are not yet inclined to accept any appreciable decline on late rates. Oolong : No transactions. Flowery Pekoe : 106 chests of very common quality have been settled at extremely full rates. Scented Teas : Prices show no change. Quotations are :—Congou : Flavoury to medium at 1s. 3½d. to 1s. 6⅝d., good common to flavoury at 1s. 0⅛d. to 1s. 2½d., leafy to common at 9⅛d. to 11½d., dust to leafy at 7⅝d. to 8⅝d. Souchong : Choice at 2s. 5⅜d., fair to fine at 1s. 3⅛d. to 1s. 7½d., leafy to fair at 9⅜d. to 1s. 2½d., dust to leafy at 7½d. to 9¼d. The export to date to Great Britain, the Continent of Europe, and the Cape of Good Hope amounts to 36,146,148 lbs., against 31,654,742 lbs. last year. To America, 87,555 lbs., against 154,936 lbs. last year. To the Colonies, 8,765,943 lbs., against 7,806,894 lbs. last year.

TELEGRAMS FROM THE FAR EAST.

THE DIFFICULTY WITH CHINA.—TELEGRAM FROM MR. WADE.

A telegram has been received at the Foreign Office from Mr. Wade, dated Peking, October 7, stating that he had obtained from the Chinese Government the guarantees which he considered necessary, and that Mr. Grosvenor would proceed to Yunnan. Mr. Grosvenor had left for Shanghai to prepare for his journey, and Mr. Wade intended to proceed there also in a few days to give him final instructions.

(REUTER'S TELEGRAM.)

SHANGHAI, OCT. 11.—The *Peking Gazette* publishes an edict enjoining the proper treatment of foreigners in China. The main points of the demands made by Mr. Wade upon the Chinese Government, including the punishment of the murderers of Mr. Margary, have not yet, however, been conceded, and the prospect of a satisfactory settlement still appears doubtful.

(TIMES' TELEGRAM.)

SHANGHAI, OCT. 13.—The aspect of affairs at Peking is more satisfactory. Probably Grosvenor will proceed to Yunnan shortly.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Oct. 12, at Marseilles, from Batavia, J. B. Walker (str.); 9, at Amsterdam, from Batavia, Waalstroom; 10, from Rangoon, Gustav Adolph; Sept. 29, at Rio Janeiro, from Saigon, Penseur; Oct. 10, at Flensburg, from Rangoon, Ruhtinas; 15, at London, from Shanghai, Ulysses (str.); 12, at St. Nazaire, from Reunion, G. B. Moyon; at Antwerp, from Rangoon, Matts August; 14, at Falmouth, from Maulmain, Tilde.

DEPARTURES.—Oct. 13, from Liverpool, for Rangoon, Vacni; 8, from Copenhagen, for Akyab, Superb; 9, from Amsterdam, for Macassar, Singapore; 14, from Cardiff, for Singapore, Suscero, Gli Amici, Serafina; for Hong Kong, Esmeralda; for Galle, Giovanni Z., W. E. Gladstone; 13, from London, for Batavia, Professor Van der Boon Mesch; 14, from Newport, for Galle, Alkar; from Deal, for Sourabaya, Laurens Coster; 15, from Cardiff, for Hong Kong, Fanny; for Singapore, P.C. Pederson.

MISCELLANEOUS.—Suez, arrived, 14, Stentor, from Shanghai, for London; Buenaventura, from Manila, for Liverpool; 10, the Nederland Company's steamship Voorwaarts, which arrived here to-day from Batavia, reports that on the 4th inst. she endeavoured to tow the British steamer Medina off the Parkins Rocks, where she was stranded, but after breaking her hawsers and chain cables, she did not succeed, and having stood by her for twenty-six hours, she took off fifty of the crew, and proceeded for Suez.

SPOKEN.—Lizzie Barry, from Sunderland, to Singapore, Oct. 6, 45.58 N., 10 W.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

HELME—On the 8th Oct., at Arthur House, North Camp, Aldershot, the wife of G. C. Helme, 10th Regiment, of a son, stillborn.

MILLAR—On the 1st Sept., at Queen's-road East, Hong Kong, Mrs. Andrew Millar, of a son.

SABONADIERE—On Friday, the 15th Oct., at Tonge-house, Lower Norwood, the wife of William Sabonadiere, late of Ceylon, prematurely, of a daughter.

MARRIAGES.

CLARKE—CHRISTIAN.—On the 6th Sept., at the Cathedral, Singapore, by the Rev. W. H. Gomes, Frederic Sydenham Clarke, of Bangkok, son of the Rev. W. J. Clarke, of Swinderby, in the county of Lincoln, to Annie, daughter of Alexander Christian, of Monghyr, India.

MAITLAND—MOUSLEY.—On the 13th Oct., at All Saints' Church, Upper Norwood, by the Rev. J. Watson, M.A., assisted by the Rev. W. Taylor Jones, M.A., Principal of Sydenham College, J. Maitland, of Colombo, Ceylon, to Helen, youngest daughter of the late John and Eliza Mousley, Birmingham.

DEATHS.

CASWELL—On the 7th Oct., at West End, near Southampton, George Caswell, Retired Captain, R.N., in his 82nd year.

DEACON—On the 9th Sept., at Macao, China, sdddenly, Sidney Deacon, aged 30.

DEIGHTON—On the 9th Sept., at Penang, Captain N. T. Deighton.

GOMES—On the 10th Sept., at Singapore, Alfred Lionel, second son of the Rev. W. H. Gomes, aged 15 years and 10 months.

GRIGOR—On the 29th June, at Balclutha, Otago, New Zealand, Eleanor Sophia, wife of Duncan Grigor, late of the P. and O. Company's Service, in the 27th year of her age.

KING—On the 6th Sept., at Singapore, Elizabeth, wife of John King, aged 31.

LOVATT—On the 14th Aug., at Tientsin, Horace Farley Lovatt, of the Imperial Maritime Customs.

OMMANNEY—On the 9th Oct., at Great Yarmouth, Norfolk, Commander Henry Mortlock Ommanney, R.N., aged 35.

SHILLINGFORD—On the 10th Oct., at Folkestone, Alexander Shillingford, Commander R.N., in his 84th year.

Miscellaneous.

THE SOCIAL SCIENCE CONGRESS.—THE OPIUM TRADE.

At the meeting of the Social Science Association at Brighton, on the 12th inst., in the Economy and Trade Department there was a discussion on the Opium Revenue of India, initiated by a paper from the pen of Mr. R. N. Fowler, late M.P. for Falmouth. The essay was read by the Rev. F. S. Turner, secretary of the Anglo-Oriental Society, who explained that Mr. Fowler's absence was occasioned by his having undertaken a journey to China and India for the purpose of collecting information about the opium trade. The hon. gentleman lamented the inattention of Parliament to the affairs of India, to which only few exceptions could be pointed out, such as that of Professor Fawcett, who once declared that "he felt no responsibility weigh so heavily upon him as the responsibility he owed to the people of India." The financial position of India should be a subject of anxious thought to every statesman. The major part of the opium revenue was derived from the provinces of Bahar and Benares, where the poppy was cultivated for the Government by the ryots, who received special licenses and advances of money for the purpose; all the opium produced in these provinces being conveyed to the Government factory, paid for at a fixed price, and sold again for the benefit of Government. The other portion of the revenue was derived from a transit duty of 600 rupees a chest, levied on opium grown in the native States. The revenue was threatened seriously by Chinese competition, and was objectionable on moral grounds. They were sometimes told that they were merely doing in India in regard to opium what they were doing in Great Britain in regard to spirits. As regards the duty from Malwa there might be some truth in this comparison, but the system pursued in Bengal made it altogether inapplicable. Our legislation in regard to alcoholic beverages in England was a legislation of repression. Heavy taxes were placed on the production, and restrictions imposed on the sale. Many persons might think that legislation did not go far enough, but so far as it went its tendency was to decrease the consumption of alcohol. In Bengal, on the other hand, the Government became the cultivators of opium and its manufacturers into a form suited for the Chinese market. They do not act as financiers, but as traders taking every means to enlarge their profits. The parallel between opium and alcohol was not fair. The evils of intoxication were fearful, but most people thought that the moderate use of alcohol was beneficial. It was not so with opium. Who ever heard of a medical man recommending opium-smoking? Mr. C. B. Denison, M.P. for Yorkshire, an advocate of the present system, admitted in Parliament that he could not dispute the deleterious effects of opium. Sir Benjamin Brodie and other eminent medical men had reprobated its use as a luxury. Consul Lay, Mons. Huc, Dr. Medhurst, Mr. Wylie, and others, gave unequivocal testimony to the same effect. A Chinese Mandarin said, "It is not the man who eats the opium, but the opium eats the man." The East India Company said, "Were it possible to prevent the use of the drug altogether, except for the purposes of medicine, we would gladly do it, in compassion to mankind;" and the Select Committee of the House of Commons on our Commercial Relations with China reported that, "They are afraid the demoralising influence on the population of the opium trade is incontestable and inseparable from its existence." It would be easy to multiply evidence, but enough has been said to show the fearful demoralisation which the use of the drug was causing in China. Whatever the advocates of the Indian Government might say of the harmless luxury which opium afforded to the Chinese, the fact remained that they had done what lay in their power to discourage its use among their subjects in India, thus showing their sense that its consumption had at least a doubtful tendency. But how could India dispense with the income? It would be very hard to force India to give it up, and to substitute for it some tax which would press hardly upon the poor and unrepresented population of India; Parliament would never do this. The matter therefore rested with the people of England, who were responsible for permitting the system to grow up. If England was to be freed from her guilt in connection with the traffic, her people must be prepared to pay for the release, as their fathers paid £20,000,000 to abolish slavery. There ensued a most animated discussion. It was begun by Mr. H. Richard, M.P., who contended that the fact that the revenue produced £6,000,000 annually, should not out-weigh the consideration that the traffic was most pernicious and immoral. Sir George Campbell, M.P., said he detested the traffic as much as anybody, but he complained that the people who condemned it had suggested no practical remedy for the evil. Ng-Achoy, a native of China, stated, as the result of personal experience, that the trade in opium produced the most baneful results, and England's honour was involved in its repudiation. Professor Amos contended, in opposition to the views of Sir George Campbell, that the British Government did all they could to push the traffic. Their obligations to China in the matter should be cancelled, and some other staple article cultivated for the sake of the revenue. The Rev. J. Simpson argued that the traffic being morally wrong could not be politically right. Mr. Harrison and other gentlemen having also spoken, Mr. Turner replied, and the Department rose for the day.

THE WESLEYAN MISSION TO THE FAR EAST.—The Wesleyan Conference is sending out the Rev E. E. Jenkins on a special mission to the East. He sails in the *Montgomeryshire*, a ship belonging to his brother, Mr. David Jenkins, M.P. for Falmouth. He will go to Japan, to inspect the Methodist mission there, and then return to China and visit the missions at Shanghai and Hankow, and probably Canton. Then he will go to Madras on the official mission proper which has been entrusted to him. The district meeting at that place will be postponed in order that the ministers on that district may have an opportunity of conferring with the representative of the Missionary Committee. From Madras Mr. Jenkins will go to Bombay, and will return thence to England probably in July.

SEAMEN'S WAGES.—On the 8th inst. Mr. T. Kayle, the captain of the ship *Glengyle*, lying in the East India Dock, was summoned by William Greenwood, able seamen, on board the same vessel, for £13 14s. 6d. wages, alleged to have been earned during a voyage from London to Hong Kong and back. There were three items in dispute, one under the head of "fines and forfeitures," two days' pay for being asleep while on duty, and 35s. for the freightage of a dog which the complainant had brought from China. The magistrate, Mr. Lushington, said he did not think the freightage of the dog came under the Merchant Shipping Act, and should not allow that deduction. It was clear from the evidence that the prosecutor was asleep while on duty, and he should allow that deduction. He made an order for £13 9s. 10d.

THE Messageries Maritimes Company's steamer *Meikong*, with the present inward mail, arrived at Marseilles on the 10th inst. She brings 110 passengers, and a general cargo, including 404 bales of silk, 12,701 packages of tea, 193 sundries, and £76,112 in specie for London, which part of her cargo will be forwarded to its destination per Company's steamer *Indus*, due in London on or about the 20th inst.

MR. WADE is publishing Mr. Augustus Margary's journal for the benefit of his family.

LI-HUNG-CHANG.

We extract in another column the more interesting portions of a letter which has appeared in *The Times*, with reference to Li-Hung-Chang, and which reiterates a great many of the ominous warnings which have of late been so frequently made respecting the increasing forces in China and the dangers which attend a future war with that country. The writer sets forth that the forces of China are habitually underrated, and goes on to say that "in the event of war, we should find that the forts of the "Peiho, Yangtsze, and Pearl River were not simply "mounds of mud and millet stalks, enclosing rusty "ancient guns, and they could not all of them be calmly "taken in the rear, and their wretched garrison impressed "to form a coolie corps." No doubt this is true, but the progress which has been made is habitually over-estimated by those who hold similar views to the writer in *The Times*. It is not at all likely that, in the event of hostilities, we should go to China equipped only to meet such rubbishing forces as those which we encountered in the last war. We should have to do, and should do, precisely what was done on that occasion, and proceed to China with an equipment sufficient to meet a respectable foe; and there cannot be the slightest doubt that the very first action would be sufficient utterly to cow the Chinese. The idea of a protracted war taking place in that country is simply absurd; and the writer of the letter under notice is so far right in saying that it is "impossible to calculate the effect of protracted hostilities." Li-Hung-Chang is no doubt a very formidable Commander-in-Chief—for a Chinaman; but the idea that his genius would enable him to maintain for three months a contest against a power such as Great Britain, can only provoke a smile on the part of those who know what the Chinese are when one gets a little beneath the surface. The arsenals at Nanking and Shanghai seem formidable enough, and no doubt the munitions of war which are to be found there would be dangerous if there were the slightest chance of their ever being used effectively. But Chinese soldiers are utterly lacking in the greatest essential for actual warfare, namely, discipline, and the Chinese nation at large equally lack the great essentials for perpetuating, hostilities, of order, centralisation, and financial prosperity. Any lengthened hostilities would assuredly produce internal rebellion, and of this the officials are fully aware, so that they would be only too anxious to come to terms after the first decisive blow had been struck; and it is scarcely to be imagined that Chinese progress in the art of war has been such that we should not succeed in whatever special operation the commanders of our military and naval forces might think it desirable to commence with. We may, therefore, rest assured, as the writer in *The Times* himself impliedly admits, that a war with China would result in the complete and ignominious defeat of that nation. It is, perhaps, to be regretted that so much is said from time to time with respect to the warlike preparations of the Chinese, which cannot but have the effect of so far flattering their vanity as to be very likely to tempt them, more than anything else, to try their strength again with a European Power. It seems to be overlooked by those who harp so much upon this string that if the Chinese have been making some efforts at military and naval organisation since the last war, we have not ourselves been quite idle in that respect during the past fifteen years; and that during that time we have had both naval and military officers in large numbers in China who have no doubt fully taken the measure of Chinese warlike powers, and will be able, should the necessity arise, to give well considered and reliable advice to the War-office and the Admiralty as to the nature of the forces which will be required.

THE RUSSIANS IN KHOKAND.

Three weeks ago we were enabled to inform our readers of the capture of the town of Khokand, on Sept. 16, by the Russian troops under the command of General Kauffmann, and at that time, from the details before us, it appeared probable that the insurrectionary movement was entirely crushed by that event. Fresh intelligence, however, has reached St. Petersburg from Central Asia, giving some brief particulars respecting further fighting, which has again ended in the complete triumph of the Russian army. The Russian *Invalide*, in its issue of Wednesday last, states that Abduracham Avdobadschi, the leader of the insurrection, collected 10,000 men at a short distance from Marghilan with the avowed object of making a further stand against his victorious opponents. General Kauffmann, hearing of his movements, marched at once on Marghilan, but Avdobadschi again retreated without any collision having occurred. The General despatched Colonel Scobelew in pursuit, and on Sept. 21 his detachment overtook and completely routed the 5,000 men whom Avdobadschi had kept together. Three bronze guns were captured on the occasion. "The retreat of Avdobadschi," we are told, "then became a disorderly rout, and he fled "through Krarassu, accompanied by not more than 100 "men. The Cossacks continued the pursuit as far as "Uscha, but returned to Marghilan after having lost all "trace of Avdobadschi on Sept. 25. When last seen he "had only five followers with him." The Russians have left a small detachment in the district to watch for him, in case he should attempt to create any further trouble. The Russian occupation of the Khanate is seemingly approved of by the inhabitants, who possibly are anxious for some more settled form of government, and we hear that deputations have arrived from all parts offering submission to the Russian authorities. There can be no doubt that General Kauffmann's recent successes are viewed with great approval and interest in the highest quarters, as, in compliance with the expressed wish of the Czar, an aide-de-camp has left Tashkend for Livadia to make a personal report to his Majesty upon the events of the campaign in Khokand.

SEIZURE OF THE BRITISH STEAMER "SULTANA."

The Hong Kong papers contain some notice of the seizure of the British steamer *Sultana* for breaking the blockade of Sooloo. The account given is very brief, and it is evident that there is a great deal more in the matter than appears upon the surface. It is stated that the steamer had been "landed and hidden among the bushes, with her "funnel taken down, and was deserted by the captain and "all the crew, who fled into the jungle." It is evident that the steamer is of very small dimensions, and, if the facts are correctly stated, they look very much as if those concerned in the matter were conscious that they were committing an illegal act. The history of the blockade of Sooloo by the Spaniards is a very long affair, and their right to take up the attitude they have assumed is gravely questioned in some directions; but the fact remains that no exception has been taken to it in official quarters, and that the blockade has been officially announced in Hong Kong, where attention was called to it some two years ago, by the seizure of vessels under circumstances analogous to the present. The matter is to be fully investigated by a Prize Court at Cavite, and we trust that the proceedings will have the effect of setting the matter of the Sooloo blockade in a thoroughly clear light, so that difficulties of this character, which are apt to lead to unpleasant international questions, may be rendered impossible. It would

Digitized by Google

be well also if the Home authorities seized the present opportunity of ascertaining generally the rights and pretensions of Spain with reference to Sooloo.

THE official announcement, which is made elsewhere, from the Foreign-office, to the effect that Mr. WADE had telegraphed on Oct. 7 that he had obtained the necessary guarantees from the Chinese Government, and that Mr. GROSVENOR would proceed to Yunnan to investigate with reference to the murder of the late Mr. MARGARY, gives promise that the firm attitude adopted in the matter will be productive of satisfactory results. It had already been announced in unofficial telegrams that the Chinese had issued a proclamation, stating that foreigners were to be well treated, and that the negotiations were proceeding satisfactorily, but nothing was said as to what steps were to be taken for the punishment of the offenders. The last is, of course, the one point upon which the satisfactoriness or otherwise of the result depends, and it is to be hoped the latest news indicates that this fact will not be lost sight of. If the Chinese fail to punish the offenders in so serious a case as the murder of Mr. MARGARY, all that they may do in the form of issuing proclamations will not counterbalance the moral effects of their dereliction of duty. As noticed in last issue, however, Lord DERBY appears to be determined that due punishment shall be inflicted on those implicated in the crime, and a statement, which appears in one of yesterday's papers to the effect that, "owing to the continuance of complications with China," Lord DERBY cannot deliver his rectorial address to the students of the University of Edinburgh till the middle of December, would seem to indicate that the China question is being taken into very serious consideration at head-quarters.

A LETTER has appeared in the *Echo* with reference to "Our Position in China," from the pen of "An Old Colonist," which is interesting as showing the power of hope in the minds of some people. Our exports to China, the writer believes, are to be indefinitely increased by the good will which will result from the labour of medical missionaries. While giving every credit to those gentlemen, we scarcely believe that they will completely succeed in this object, and that guilds, barriers, lekin taxes and monopolies will at once vanish before pills and powders, drugs and diagnosis. As to the Rev. Mr. LO-SAM-QUEN'S allusion to the hospital in Hong Kong, it is notorious that the Tungwha Hospital does scarcely anything towards healing the sick; and that the committee have made use of the powers conferred upon them by the Ordinance for the establishment of the hospital to constitute themselves into an unofficial and unauthorised native protectorate.

THE Japanese Charge d'Affaires, WOOYENO, has left London on a visit to the Continent, and KINZO has been appointed to discharge the duties of the post *ad interim*.

LI-HUNG-CHANG.

A letter signed "Kwang-Tung" appears in *The Times*, in which an account is given of the career and exploits of Li-Hung-Chang. The writer supplements his account with the following observations:—

What progress have the Chinese made during the last ten years? is at the present moment a question worthy of our serious consideration. To the writer of the following notes—who spent some years in travelling through China—it seems that there is a decided tendency to underrate the effect of the recent measures which the Chinese have taken to improve their coast and river defences, and to strengthen their Army and Navy. It is customary to describe the Chinese Army as existing mainly on paper in an imposing position in official documents, or, at best, as an ill-conditioned, badly-armed, undisciplined rabble. In the event of war we would find that the fort on the Peiho, Yangtsze, and Pearl River were not simply mounds of mud and millet stalks, enclosing rusty ancient guns, and that they could not, all of them, be calmly taken in the rear, and their wretched garrisons impressed to form a transport coolie corps. It is quite certain that the Chinese—who have confined their late efforts in the direction of progress to the improvement of their arms and defences—have not altogether failed in their efforts to advance. On the contrary, they have succeeded to a degree that must not be too lightly estimated if we would prepare ourselves to strike sharply and decisively. It is impossible to calculate the effect of protracted hostilities. In the Southern Provinces of China, our troops would be exposed to the dangers contingent on a hot, humid, and unhealthy atmosphere. This would apply with equal certainty to the Northern Provinces during the summer months and early autumn, when large tracts of country are flooded by the overflow of the Yangtsze and Yellow River, when the fevers common to hot and marshy lands might check our progress. Again, during winter, in the North an army campaigning, let us suppose, on the plains of Pe-chihli would be exposed to a rise and fall of temperature during day and night which may at times be compared to the heat of an African sun and the cold of an Arctic winter.

Li Hung Chang, Governor-General of Pe-chihli, is supposed to be the arch-enemy of foreigners and the leading opponent of progress. This estimate of Li's character cannot altogether be borne out by facts. As a soldier, he has done more than any man living in China to improve the weapons of his country and the condition of his Army. If his schemes have miscarried, and his energies have been misdirected, it only proves that he has shot too far ahead of the sluggish Imperial Government and the physically and intellectually low estate of his toiling countrymen to meet with ready and honest co-operation. This remarkable General, whose life has been full of activity, and who has done so much good service for the Imperial Manchu Government, was the first to found an arsenal on the foreign model. This arsenal was built at Nanking after its recapture by the Imperial forces in 1864, and has been kept steadily at work in the manufacture of guns and munitions of war under able European direction. The buildings, which are on a most extensive scale, were partly constructed out of the ruins of the great Porcelain Tower and Monastery of Gratitude. They consist of a gun, small arms, and carriage factory, where caps and cartridges are also manufactured in enormous quantities. At some distance from this factory there is another, entirely devoted to the preparation of combustible material, and filling of shells, torpedoes, and rockets. The workmen employed in the arsenal are all of them Chinese; the inspectors of departments only are Europeans. Nothing surprises one more in such a place than the solid beauty of the steel and iron castings which are turned out without flaw or blemish. For some years guns have been cast there under pressure, and with unvarying success, save, perhaps, on one occasion only, when, in the absence of the superintendent, the mandarin left in charge was experimenting on his own account. Not less remarkable are the finished guns, torpedoes, rocket-stands, and tubes, which are all proved for service before leaving the arsenal. There are other arsenals besides this in China, at Shanghai, Foochow, and Tientsin, and schools for the instruction of naval and military cadets in the modern art of war. Enormous stores of war material have been produced at these arsenals, and are now ready for any sudden or unforeseen emergency. It is by no means a soothing reflection to think that these arsenals have, for the most part, been maintained by the revenue accruing from foreign commerce. It would almost seem that the increased facilities for trade granted by the last Treaty have only contributed the means to place the Chinese on what they conceive to be a formidable war footing; to place in their hands the weapons that will, they probably dream, enable them to defend and fall back upon their ancient policy. The proper lighting of the coast, dredging of harbours, and removal of sandbars have been studiously neglected, while no pause has been made, and no cost spared, by the Chinese Government in surveying the river approaches, in laying torpedoes, in constructing new forts, and in repairing the old ones, in erecting batteries of Krupp and Armstrong guns, in arming their soldiers and maturing their plans for defence. It cannot be doubted that the Chinese have for years past been (long before the Japanese difficulty had to be dealt with) making progress in the direction mainly of preparing for war, and should our Government tide over the present difficulty with China it is much to be feared that the Chinese will neither rest nor reform until they have tested their prowess with the weapons we have placed in their hands and tasted the bitterness of another defeat.

EASTERN EXTENSION AUSTRALASIAN AND CHINA TELEGRAPH COMPANY (LIMITED).

The fourth ordinary general meeting of this Company was held on the 12th inst. in the Cannon-street Hotel. The chair was occupied by Mr. John Pender, M.P.

The Chairman having alluded to the figures given in the report, said the earnings showed a falling off of about £4,999 as compared with the corresponding half of the previous year, but this was fully accounted for by the depressed state of trade in India. The expenses were rather less than in the previous half-year, and included an amount of £3,000 which the company had lost from dishonesty at Shanghai. He went on to say that the board were strongly in favour of the policy (which had been advocated at some of the company's meetings) of adding to the reserve fund, and he hoped they would be able to do this, and also maintain the present rate of dividend. Having referred to the reduction in the debenture debt, he expressed a hope that the balance of £3,200 would be paid by March next year. The repairs to the cable for the half-year amounted to £2,751 19s. 2d., as against £3,099 8s. 7d. in the corresponding half of last year. The faults in the Batavian cables, which were in shallow water, had been easily repaired—a fact which ought to strengthen confidence in telegraph property. As regarded the New Zealand cable, a portion had been shipped on board the steamship *Edinburgh*, and he believed the whole cable would be laid by February next year. He congratulated the shareholders on the fact that the shareholders had taken about two-thirds of the debentures authorised at the special meeting, and said the directors would have no difficulty in placing the remainder on a small premium. He said the joint purse agreement with the Northern of China had been renewed; it had worked well hitherto, and would no doubt do the same in future. At the St. Petersburg Conference considerable attention was given to the subject of submarine cables, which, he believed, would result in benefit to those undertakings. Having expressed his belief that the word "tariff" would become general on submarine lines, he concluded by moving the adoption of the report.

The Hon. Mr. Massey, M.P., seconded the resolution, which was put and carried without any discussion. A vote of thanks to the chairman and directors closed the proceedings.

THE SCHOOLS OF JAPAN.

Writing from Tokio, under date of August 24, an occasional correspondent of the *Daily News* contributes a letter on this subject, which is especially interesting from the fact of its showing that, by a late decision of the Department of Education, the English language is to take the most prominent place in the future instruction of the youth of Japan. The writer sketches briefly the course of events, from a scholastic point of view, since the Imperial Government took over the territories of the old feudal princes, and resolved upon making Tokio the great centre of education for the empire. From the statements which he makes, the fees charged are exceedingly moderate, and it is also remarkable that the schools are conducted with a comparatively small staff of foreign teachers. Besides the youths under instruction in the ordinary educational establishments of the city, there are also about two hundred pupils under the care of the English and French missionaries, most of them paying from two to three shillings per month. As its name implies, the Eigo Gakko, the writer remarks in his concluding paragraph, is emphatically a language school; and although arithmetic, history, and geography are also taught, the great aim is to turn out students capable of speaking and writing English with fluency and correctness. Half-yearly examinations are held, and the best pupils are promoted, either to higher classes or to the Imperial College. At the beginning of the next half-year another hundred and fifty scholars will be admitted, and an addition made to the foreign teachers. The Ko Gakko Riyo and Imperial Naval College Preparatory Schools are also English schools, and the course of study is the same as in the Eigo Gakko. The first contains one hundred and fifty scholars and four teachers. The pupils on finishing their course enter the Imperial College of Engineering. The Naval College Preparatory School contains ninety scholars and two teachers; the pupils in this are intended to enter the Naval College. The Guwai Koku Go Gakko (foreign language school) contains four divisions; first, the German, with two hundred pupils and five teachers: second, the French, with one hundred and fifty pupils and four teachers; third, the Russian, with seventy pupils and two teachers; fourth, the Chinese, with forty pupils and one teacher. The students in the French department are eligible for admission to the Imperial Military, those in the German to the Medical School. Up to the present time instruction has been given in the Kaiser Gakko (Imperial College) in English, French, and German; but, as we have observed above, English is to be *the* language of the future. The number of students in the Government and private schools together is estimated at eight thousand, of whom about one-half may be reckoned as French and German students, and the remainder, of course, almost entirely English.

Literature.

Notice sur le Cambodge. Par E. Aymonier, Lieutenant de Vaisseau, Professor de Cambodgien au Collége des Administrateurs Stagiaires à Saigon. Paris: E. Leroux. 1875.

In the volume before us M. Aymonier treats his subject in considerable detail, though at the same time with brevity, and all who desire to obtain any information respecting Cambodia will peruse it with profit, and will hardly fail to find what they are in search of in its pages. He commences with a general survey of the country, and a sketch of its history in legendary as well as historical times. In his fourth chapter he makes a few remarks on the present state of the country and the different races inhabiting it, of which he refers to four classes besides the indigenous Khmers, &c. First come the Malays (Chvéa) and the Chams, the latter of whom are gradually being absorbed by the former. Next are the Chinese, in number somewhat over a hundred thousand, whom M. Aymonier evidently does not hold in high esteem; and more numerous even than these are the Annamites, who make their way in by every channel of communication, and who are largely increasing in number. The fourth class consists of cross-breeds, chiefly between Chinese and Cambodians, and between Cambodians and Annamites. Chapters 5 to 10 are devoted to the King and the various dignitaries and functionaries of all grades. The "Bakou" and "Prea Vongsa" castes next claim our attention. The former are descended from the Brahmin caste, and number from eight hundred to a million men; while under the latter designation come the descendants, male and female, of the Royal family, who, after the lapse of several generations, are considered to have lost all possible claim to the Throne. In the following chapter a curious ceremony is described, viz., that of drinking "oath-water," which takes place twice a year. Chapters on Revenue, Impost on Rice, &c., are next in order; after which M. Aymonier discourses briefly on the Religion of the Cambodians, adding, in an ensuing chapter, a few notes on the three distinct classes of slaves existing among them. The longest chapter in the volume, and probably the most generally interesting one, is that descriptive of the manners and customs of this little known people, upon whose affairs some light is gradually being thrown by the persevering industry of French writers. His last chapter M. Aymonier entitles "Fêtes et Rejouissances." According to ancient usages, he writes, the Cambodians have a fête for every month in the year, the name of which is often borrowed from the old language. The late King, who was much attached to the traditions of his country, scrupulously observed these fêtes, which hold an important place among the customs of the kingdom. A paragraph is devoted to each of the twelve fêtes, and briefly describes their peculiarities. In an Appendix some particulars are given on the subject of Weights and Measures, Money, the Cycle, &c. In a concluding note, headed "Art Cambodgien," M. Aymonier refers his readers for information on that point to the Comte de Croizier's "L'Art Khmer," recently noticed in these columns.

In a paper entitled "Audi Alteram Partem," the *Friend of China* expresses its views on the China question, which, we suspect, will hardly be relished by European communities in that country, nor yet by those at home who desire its rapid commercial development. Mr. Nang Choy's letter to *The Times* of July 6th on the Opium question is reprinted in its entirety, and is followed by a communication from Dr. S. Wells Williams to the editor, generally approving its gist. Sir W. Lawson's speech in the House of Commons on the Indian Budget is also reprinted, on account of its bearing on the Opium question. Next, we have some remarks on the Birmingham Committee of the Society, and the Commercial Reports from H.M.'s. Consuls in China, 1873, are then finally disposed of. The rest of the number is occupied with "Communications from China," "Gleanings from the Newspapers," and "Notes of the Summer."

The *Geographical Magazine* for October opens with an appreciative notice of the late Commodore Goodenough, R.N., who was murdered on the 20th of last August, and who at all times took a great interest in the success of that journal. This is followed by two instalments of the promised papers on the Arctic Expedition, and Major Herbert Wood's Observations on the Attrek bed of the Oxus. Mr. E. Delmar Morgan contributes a sketch of Mongolia and the country of the Tangutans; and the editor furnishes some extracts from a letter of Mr. Ney Elias, written on the 4th of last January, but which "through an accident were not inserted" at the time of their receipt, some months ago. Mr. Keith Johnston continues his notes of recent journeys in Paraguay, and the editor promises in the next number to give some account of the recent Russian Expedition to the Khanate of Hissar. Several reviews appear in this month's issue, as well as the usual amount of information under the headings of Cartography, Log-book, and Correspondence. The "Proceedings of Geographical Societies" include a somewhat lengthy report of the recent meeting of the British Association, and the June and July bulletins of the Paris Geographical Society. The latter concludes with a summary of the account of a journey made by Père Dubernard, "with the object of conciliating some savage tribes named Lissu, who had made a raid on the inhabitants of Tse-ko (in Western China), where some of the fathers resided."

Many of our readers will, we think, peruse with much pleasure a paper, entitled "The Zuider Zee," in the current part of *Chambers' Journal*. The writer bases his observations on M. H. Havard's "Voyage au Villas Mortes du Zuiderzée," a work which gives an interesting account of many places, which are now considered out-of-the-way towns, but which were once well-known to fame. In the frequently inundated island of Marken, which is entirely occupied by fishermen, and is remarkable for some strange customs and practices, it is curious to note that the walls of the bedrooms are covered with blue china, Japanese porcelain, &c. Perhaps in some of these old-world towns and villages Messrs. Audsley and Bowes might find some specimens of the latter which would be of use in illustrating their "Keramic Art of Japan"? At any rate, the idea is worth a passing consideration.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Amsterdam, Oct. 13.

We are threatened with being involved in another war. Whilst we need all our forces to subdue the Atchinese we are obliged to send some men-of-war to the Caribbean sea. The small Republic, Venezuela, with which we have been involved several times in difficulties, claims concessions which we cannot grant. But let me sketch the history in a few lines. The man who rules at this moment in the Republic is General Guzman, an inveterate enemy of the Dutch; some years ago he was a resident in the island of Curaçao, and there he conspired against the established Government of Venezuela. Our authorities, of course, let him know that he was dangerous to good order, and he had to leave our possessions; his plans, however, were ripe, and without much difficulty he overturned the Government. As President of the Republic he reciprocated Dutch hospitality with injuries and Mr. Rolandus, our *chargé d'affaires*, was unceremoniously sent home. Our vessels had to struggle with many difficulties, and some time ago the *Mida*, a merchantman of Curaçao, was captured as a prize ship; the crew were thrown into prison and tortured, with the aim that they should avow that the vessel was loaded with contraband of war; and last, but not least, the principal harbours were closed to our trade. Since the expulsion of Mr. Rolandus Mr. Brakel was sent to Caracas as our representative, and he obtained as a compensation for the damage done to our traders a certain sum of money. Two claims, how-

Digitized by Google

ever, remained unsettled, viz., the question of the *Midas* and the closing of the harbours. Our Government was surprised on a certain day by the arrival of a Venezuelan ambassador, who came to settle the difficulties. Our Government claimed, of course, reopening of the harbours and indemnification for the *Midas*. Dr. Josa, the ambassador, was not inclined to grant these demands, but, on the contrary, he brought forward the claims of his Government, which consisted of an indemnification for the very extensive smuggling trade alleged to exist between Curaçoa and the Republic by which the insurgents of his State were aided. To check this it was asserted that the Republican Government had been obliged to spend a good deal of money, and this ought to be paid back. None of the parties would hear of concessions. Our Minister of Foreign Affairs was inclined to negotiate if our claims were granted, and promised that if it were proved afterwards that we were in the wrong an indemnification would be given. The Venezuelan ambassador at last submitted an ultimatum, and left the Residency. Thus diplomatic relations are brought to an end, and the question now is, what will happen? Yesterday the minister was interpellated thereabout, and he said that for the moment the affair was limited to a rupture of our diplomatic relations. Of course, Mr. Brakel will be recalled; but what will next happen? It is quite true that the army of the Republic is small, but, nevertheless, this affair may create much trouble. The best course would, I think, be that the question should be brought to an end by arbitration, because there is, no doubt, right and wrong on both sides. The President knows very well what he has to hope and what he has to fear from the residents of Curaçao, and it seems that too much importance by our Government was set upon the question of closing the harbours. The port of Laguayra remained open because it was under the control of the Government. This, of course, was a burden to our colonists, but no other nation protested against this measure. We rest in hope that this affair will be definitively settled in the sense expressed in the letter of the Ambassador, *d'une manière pacifique et mutuellement satisfaisante.*

This interpellation excepted, the business of the Second Chamber has not been very interesting, and I only need state that a second address of Mr. de Rochemont, claiming a rehabilitation, was put aside without taking any notice of it, and that the election of Baron Heemstra as M.P. for the district Haarlemmermeer was annulled because several informalities were discovered. The section report upon the Budget for Foreign Affairs has been published. Several members urged the necessity that measures ought to be taken in order to prevent "English floating coffins" being allowed to adopt the Dutch flag; that gunboats should be sent to protect our fishing-boats against the brutalities of English fishermen on the high seas; and that the scandals which have taken place with regard to the enrolment of foreigners for our East India Army should henceforth be prevented. I may add to this last remark that several foreigners who offer themselves are refused, because they do not possess the necessary documents to prove that they are fit for service in our colonies. It is said that the depôt will be removed to a town which is situated more in the neighbourhood of our frontiers than Harderwyk. The question, however, is whether in that case more desertions may not take place than now occur.

The festivals in Luxemburg in honour of Prince Henry, who has been for twenty-five years Stadtholder of that Grand Duchy, have come to an end. They were, the correspondents say, most splendid and most cordial, and proved that the Prince is held in great esteem by the Luxemburg people. The *fêtes* had, of course, rather, an *intime* character. The important news of which I spoke in my last, and which was derived from the *Amsterdamsche Courant*, has been proved to be a *canard.*

The King has granted permission to Mr. J. A. Dieduksman at Djohjocarta, to accept the Knighthood of the Fourth Class of the Crown conferred upon him by the German Emperor.

Mr. J. N. Anslyn, H.M.'s Consul in Egypt, arrived some days ago at the Hague.

I regret that I have to state that the steamer *Thomas Sorby*, bound from Batavia to Rotterdam, has stranded in the neighbourhood of Brouwershaven. Thé crew were saved, but the valuable cargo, estimated at one million and a half, is for the most part lost. It included 10,000 bales of coffee, 250 chests of indigo, and some lots of tobacco.

The greatest dulness still prevails on the Bourse. There is plenty of money seeking employment, but there is great want of confidence. Our Home funds are not in the least affected by the Venezuelan question, and even the nominal quotation of the fund of that Republic on our Exchange remains as it was.

PRODUCE MARKETS.

The transactions in Colonial Produce have been very limited, which is partly due to the extensive public sales and the lots offered by tenders. Prices are in general very firm, and holders not much inclined to operate.

Coffee.—The market is rather dull, but the quantity which has been offered is small, last auction prices being maintained. The private parcels brought into the market were eagerly taken.

Tea.—Since the auction the greatest dullness prevails.

Sugar.—The market has remained unaltered. Superior quality is held too high to make operations possible. Inferior quality has been sold at f.1¼ under July.

Rice.—Uncleaned firm in price, but dull. Prices are nominal.

Spices do not meet with much demand, but only trifling lots are offered. 278 c. Amboina Cloves found buyers at prices that did not transpire.

Tobacco (Java).—Important loss of sundry marks were sold at satisfactory prices. The stock includes 1,835 bales Sumatra and 45,910 Java. A company has been established here to cultivate tobacco at the Cape of Good Hope, under the style of the Transvaal Tobacco Company.

Cotton.—Without any particulars; prices are too high in America, to make any speculation possible.

Rattans.—A couple of hundred bales found buyers.

Java Indigo.—Unaltered and only some trifling lots have changed hands.

Hides.—The stock is very large, and includes about 7,000 ps. E. I. In other articles there have been no transactions worth notice.

SHIPPING.

Arrivals.—Oct. 5, at Brouwershaven, from Rangoon, Angiolina; at Tessel, from Akyab, Stavanger; at Flushing, from Akyab, Andrea Wilh; 6, at Tessel, from Batavia, Waalstroom; 9, at Flushing, from Tjilatjap, Samarang.

Departures.—Oct. 9, from Maassluis to Batavia, Noach I.; from Tessel to Akyab, Marathon.

Naval and Military.

The Himalaya, troopship, is expected to arrive at Hong Kong from Malta on the 31st of January next. She will leave Hong Kong on the 14th of February, arriving at Singapore on the 20th, and leaving on the 27th for Portsmouth. Notice has been given that letters, &c., for the Himalaya should be posted to go by the mails leaving on the following dates:—For Hong Kong, December 24th, *viâ* Brindisi; December 30th, *viâ* Southampton; and January 7th, *viâ* Brindisi. For Singapore: January 13th, *viâ* Southampton; January 28th, *viâ* Brindisi.

The *Broad Arrow* says:—"There is little glory for anyone from the Burton court-martial. There have, in fact, been many wrong, and only one right, while even he has not escaped censure; the true moral to be drawn from the whole affair is that women are the very devil, unless, as is usually the case, they are 'angels and ministers of grace,' instead of disgrace." The *Army and Navy Gazette* says:—"We believe that in the opinion of the Lords of the Admiralty there has been a miscarriage of justice in the late trial, as they have not only written to Lieut.-Colonel Burton expressing the high sense which they entertain of his character and of his conduct during the most trying circumstances, but at the same time they have administered a rebuke to all concerned in this most disgraceful attempt to traduce the character and ruin the professional reputation of an able officer and a high-minded gentleman."

A correspondent at Hong Kong writes under date September 4:—"Her Majesty's ships of war in harbour are the Modeste (senior officer's ship), Midge, and Ringdove; the flagship Audacious, Kestrel, and Thalia are at Shanghai, the Egeria, Frolic, and Sylvia at Nagasaki, the Charybdis at Yokohama, the Hart at Amoy, the Hornet at Foochow, the Mosquito at Hankow, the Swinger at Kiukiang, the Fly, Lapwing, and Thistle at Singapore. The Growler left here on the 2nd of September for Chefoo. The Dutch corvette Curaçoa arrived here on the 29th of August (Sunday), and the following day exchanged the customary salutes, which were returned by the garrison battery. Captain Brooke, Brigade Major, proceeds to England by mail steamer of 2nd of October to take up the appointment of Brigade Major at Shorncliffe."

Mr. W. A. M. Gordon, of the Survey Department; who had been at home on leave, and had come up to London to embark for Ceylon on board the Hankow, died suddenly the day before the departure of the vessel. Mr. Gordon was well known as an able and most zealous officer of the Survey Department, and one who had undergone much "roughing it" in the jungle. Previous to his arrival in Ceylon he had served in the Royal Artillery, of which his father, the late General Gordon of Culdrain, Aberdeenshire, was a distinguished officer. General Gordon served in Ceylon nearly half a century ago, and his name is still connected with several public works in the island.

The Rosario, 3, screw-sloop, Commander Arthur E. Dupuis, was paid out of commission on the 12th inst. at Sheerness Dockyard. She was commissioned on the 12th October, 1871, at Sydney, Australia, it being her second commission on that station. She left England 2nd November, 1867. Her crew were granted the usual seven weeks' leave on being paid off, and the ship herself was placed in the fourth division of the steam reserve at Sheerness until her services are again required, which is very unlikely, as she is very defective and unsound.

Captain John Ommaney Hopkins will be flag-captain to Admiral Sir Thomas Symonds, K.C.B., who will succeed Admiral the Hon. Sir Henry Keppel, G.C.B., at Plymouth, at the end of this month, as commander-in-chief. The last appointment held by Captain Hopkins was as flag-captain to the late Rear-Admiral F. Campbell, commanding the flying squadron.

The Diamond, 14, screw corvette, Captain George S. Bosanquet, which sailed on the 14th Aug. last from England for the East Indian station, will relieve the Briton, and the latter will come home *via* Suez Canal to be paid off; she was commissioned 28th Nov., 1871.

Captain Arthur Hill, of the Royal Marines, who served with the battalion recently stationed in Japan, has, at his own request, been placed on the Retired List, and has been recommended for a step of honorary rank.

The Teazer, 4, double-screw composite gun-vessel, has been commissioned at Sheerness for service on the East Indian station by Com. Capel Wodehouse, with a complement of seventy-two officers and men.

The Sirius, screw sloop, Captain Charles Pringle, sailed on the 11th inst. from Plymouth Sound for the Cape of Good Hope and West Coast of Africa Station. She will call at Madeira and Ascension.

Major G. Bertie B. Hobart, Royal Artillery, has been appointed Military Secretary to his Grace the Duke of Buckingham and Chandos, Governor of Madras.

The Lily, 3, composite sloop, Commander Basil E. Cochrane, arrived at Port Said on the 8th inst. from Plymouth and Malta, *en route* to the China Station.

Monetary and Commercial.

The Manchester Market has been very steady, though without any marked increase in the daily transactions, which have been carried through at full prices which show an upward tendency, notwithstanding the check this evidently places upon the operations of buyers.

The directors of the West India and Panama Telegraph Company have issued their report for the six months ending the 30th June last. An available balance is shown of £10,981 15s. 7d., and out of this sum it is proposed to pay 7s. 6d. per share on account of arrears of dividend on the first preference shares, and carry forward £1,606 15s. 7d. to the new account. The increase in the traffic receipts is £9,308, or 67 per cent. in excess of the receipts for the corresponding period of 1874.

The directors of the Royal Mail Steam Packet Company have decided to recommend to the shareholders at the meeting to be held on the 27th inst. a dividend of £1 10s. per share for the half-year ended the 30th June last, free of income-tax, which is equal to £5 per cent. per annum.

At the meeting of the Eastern Extension, Australasia, and China Telegraph Company (Limited) the directors' report for the half-year, which recommended the payment of an interim dividend of 1½ per cent., in addition to a similar distribution previously paid, was adopted.

We learn that an enterprising firm has hit upon the idea of re-exporting tea to China. Of course the idea can be only to have it repacked and sold again as new season's tea, when the rush usual at the opening of the season comes on. Apart from the very questionable morality involved in the proceeding, it is interesting as showing the uncalled-for character of the enhanced prices paid in China for new season's cargo, and the absurdity of the competition which has for years past characterised the trade.

The rails for the first line of railway to be laid in China are in course of manufacture at the Cleveland Works, Stockton.

The quantity of tea delivered from the bonded warehouses in London during the week ended the 9th inst. was 4,017,534 lb., of which 2,355,743 lb. was for home consumption, 1,053,528 lb. was removed coastwise, 562,708 lb. was exported, 42,124 lb. was sent coastwise for export, and 3,431 lb. was for ships' stores. The duty received amounted to £58,894 against £55,824 of the previous week, showing an advance of about 5½ per cent.

The market for Bar Silver has been firm throughout the week, and the supply limited; prices ranged from 56¾d. to 56⅞d. per oz. standard, until a special demand for immediate delivery caused a rise to 57⅛d. The closing price is 57d. per oz. standard. Mexican dollars are quoted 55¼d. per oz., but any arrivals would realise more, owing to the rise in Bar Silver.

THE BOARD OF TRADE RETURNS.

The following is an extract from the Board of Trade Returns for September of the figures which refer to our Export trade with China and the Far East:—

COTTON YARN.

To		For the Month ended 30th September. 1873.	1874.	1875.

ARTICLES OF IMPORT.

Although several leading articles have recovered from the recent depression, there has been a general absence of activity. Tea has been steady, and the attention of the Trade has been chiefly directed to the medium to good classes of Congou. Silk has been quiet at unaltered quotations. The business in East Indian Sugar continues limited; a slight decline has occurred it Cutch, Gambier, Pepper, Rice, Sago, and Tapioca. Tin is firm at an advance of 20s. per ton.

TEA.

Messrs. Arthur Capel and Co.'s Circular says:—Our market has been rather quieter during the past week, the more peaceful accounts from China having partially checked the demand from the country. Importers, however, do not press sales, and we have therefore little if any alteration to notice in prices generally. Public sales have again been small, comprising only 12,942 packages, the whole of which have been sold without reserve. The deliveries for the week, as compared with last year, are as follows, viz.:—

	1875. lbs.	1874. lbs.
Home Consumption	2,366,931	2,113,791
Coastwise	1,014,308	785,471
Exports	741,614	769,744
	4,122,853	3,669,006

Congous.—Red-leaf kinds: Siftings have sold at about previous prices. Old season's common have sold at auction from 9½d. to 10¼d. per lb.; new broken-leaf 10¼d. to 10½d. per lb.; fair from 1s. to 1s. 1¼d. per lb., being about private contract rates. Fair to good Kaisows have met with but little inquiry, but the few sales made have been at former prices. Good to fine and finest remain firm. Pak Lin kinds show no material alteration, the demand being chiefly for good qualities from 1s. 8d. to 1s. 10d. per lb. Black-leaf kinds: Old season's common to fair remain steady at previous prices; new sell with difficulty at from 10½d. to 11d. per lb., quotations being hardly so firm; fair, at auction, have sold from 1s. 0¼d. to 1s. 1¾d. per lb., fair to good medium from 1s. 2½d. to 1s. 4½d., being a shade under recent private contract rates. Privately the few sales made show no alteration in prices. Good to fine have been well maintained. A few parcels finest have been sold from 2s. 3d. to 2s. 7d. per lb. New-make kinds have been firm, and those per Euphrates found a ready sale. Oolongs still remain difficult of sale privately. At auction good quality was sold from 1s. 4d. to 1s. 4½d. per lb. Souchongs sold at public sale from 1s. 6½d. to 1s. 7¼d. per lb., showing no change. A few fine have been sold at about previous prices. *Scented Teas:* The demand for Canton Capers remains steady, and previous rates have been maintained. Orange Pekoes have been saleable at last week's prices. Foochow Capers sell only slowly, whilst the demand for Orange Pekoes has also been small, the trade having bought rather freely. *Green Teas:* There has been rather more demand, and for the better kinds of Ping Suey Gunpowder full prices have been paid, Young Hysons still selling at comparatively low rates. Teen Kai kinds show no change in the week. Privately it is somewhat difficult to effect sales in the face of frequent public auctions without reserve.

SILK.

The market is without animation, business in most descriptions being restricted to small daily operations, but as importers are firm holders, full rates are obtained for the few parcels that change hands. Deliveries 1st to 13th inst. inclusive: China 1,253 bales, Canton 203, Japan 196; total, 1,652 bales.

Messrs. Arles, Dufour, and Co.'s Lyons Circular says:—In European Silk a moderate business only has been done in September, and prices have weekly given way. We notice since a few days, a little more active demand, and prices seem better maintained. It is to be hoped that consumption of China Thrown Silk will remain as large as for some time past. Unfortunately low prices lately obtained even for some important contracts, with late deliveries in second class works, show that holders apprehend the competition of European and Japan Silks. Under such circumstances, and notwithstanding strong telegrams from Shanghai reporting higher prices and a probable reduced export, the demand for raws remained limited, and prices have been hardly maintained.

COFFEE.

As the export deliveries have continued exceptionally small, the demand has been languid, and prices of Plantation Ceylon have gradually given way until towards the close, when there has been more competition and the downward movement has been arrested. Closing quotations show a decline of about 1s. 6d. per cwt. upon the prices ruling a fortnight since. The demand for Native Ceylon has been been well sustained, and prices are steady, fine ordinary selling at 97s. 6d. to 98s. 6d. The closing quotations are:—Plantation triage and ordinary at 88s. to 99s., good ordinary 101s. 6d., common to coloury small 101s. 6d. to 108s. 6d., fine fine ordinary grey 105s. 6d. to 108s. low

Digitized by Google

middling grey 108s. 6d. to 110s. 6d., middling 111s. to 113s., good middling to fine middling bright coloury 113s. 6d. to 116s. 6d., good to fine bold bright 117s. to 121s,, pea-berry 124s. to 128s. 6d. Native, small 83s. 6d. to 84s. 6d., fine ordinary even pale 97s. 6d. to 98s. 6d., yellowish 99s., good to fine bold 102s. to 105s., pea-berry 101s. to 105s. per cwt. The only sale of other East India has been 199 bags Singapore at 91s. 6d. to 93s. 6d. for mixed brown.

The Dutch Trading Company have announced their next sale for the 20th inst., when 96,625 bags Java, &c., will be offered.

SUGAR.

The tone of the market has been quiet throughout; at the same time a good steady demand has prevailed for refining West India, at the value of 18s. 6d. to 21s. per cwt., and the bulk of the entire business consists of those descriptions, prices being firmer but not decidedly dearer. Common brown Eastern descriptions continue abundant, and the demand is still limited.

Penang continues very dull of sale, and in auction 4,776 bags 322 Native were bought in at 15s. 6d. to 16s. 6d. The demand for *Manila* is without improvement, and only small sales have taken place, chiefly in unclayed at about previous rates. The sales comprise 3,000 bags fine clayed Manila at 17s. 6d., 8,500 bags superior unclayed Zebu at 15s. 6d., 15,000 bags unclayed Ilo Ilo at 15s. 3d., and 4,000 bags low to ordinary Cane China at 15s. to 15s. 6d. per cwt.

Cocoanut Oil.—Ceylon has remained in good demand, prices have further advanced, and a large business has been done, puncheons on the spot at £39 5s., and in pipes at £38 10s. to £39 10s. For arrival 200 tons May-June-July shipment sold at £39, 50 tons September-October ditto at £38 5s., 100 tons ditto at £38 10s., and 200 tons October-November at £38 10s. to £39. Cochin has also been rather firmer, having changed hands, pipes at £41 5s. to £42, and hogsheads at £42 per ton.

Camphor has been steady, with sales of 200 cases new China at 69s. 6d. to 70s. landing weights, and about 120 cases old Japan at 72s. 6d. landing ditto.

Cutch.—Small sales have been made at barely former rates, including 100 boxes fine Elephant at 26s. 3d. Landings, Deliveries and Stocks for the first nine months of the three years—

		1875.	1874.	1873.
Landed	tons	2,369	351	3,426
Delivered	...	2,277	2,555	3,032
Stock, Sept. 30 ...	...	3,006	2,639	4,399

Cotton.—This market has undergone a gradual improvement, but notwitstanding the activity, and advance in value, in Liverpool, the demand here has at no time become animated; transactions therefore are not extensive, although larger than for some past. Prices on the spot have slightly fluctuated, and at the close show little variation. For arrival an advance of 1-16d. has been paid, but this is not quite maintained at the close, good fair Tinnivelly has been sold at 5 7-16d. to 5½d.

Galls.—China have further advanced, small sales having been made at 80s. per cwt. Statement of the movements of China and Japan Galls for the first nine months of the three years:—

		1875.	1874.	1873.
Landed	boxes	5,076	5,150	6,588
Delivered	...	4,696	5,531	5,232
Stock, Sept. 30 ...	...	797	1,280	3,329

Gambier has been quiet throughout, and only limited transactions have occurred. On the spot small sales have been effected in whole bales at 28s. 6d. Imports, &c., in the first nine months of the three years:—

		1875.	1874.	1873.
Landed	tons	3,833	2,939	4,929
Delivered	...	3,736	3,988	4,191
Stock, Sept. 30 ...	...	409	27	1,277

Hemp.—The demand for Manila is without improvement, and only about 500 bales have been sold, chiefly good roping at £32. The small supply at auction, consisting chiefly of damaged, was mostly sold at steady rates. Of 530 bales offered 452 bales sold, sound at £28 5s. for mixed below fair, the bulk (360 bales) consisted of damaged, which sold as follows: for first classes, good roping at £32 5s., mixed to fair at £28 to £29 10s., brown at £27 5s. to £27 15s. per ton.

Hair.—Nine packages China and Japan sold, stump tails, &c., 9d. to 1s. 10d., mixed and brown 7¼d. to 7½d., white 1s. to 4s. 5d., black 2s. 6d. per lb.; Human (sea-damaged) at £7 15s. per case.

Hides.—At the periodical public sales the competition for East India kinds in the hair was not animated, and of the moderate quantity offered a little over half was sold; the value, however, remains unchanged. Singapore, Penang, and Rangoon Ox and Cow were only partly sold at about late rates. Buffalo, Singapore, &c., were in small supply, and recovered the slight decline of last sales; in Batavia there was almost nothing done.

India-rubber.—No business effected during the week.

Japan Wax has been in moderately active demand at steady prices. About 150 boxes have been sold during the week, square cakes common to middling bold at 47s. 6d. to 50s., including slightly sea-damaged, of which a good part consisted, good yellow and pale at 50s. to 51s., one lot fine bold 52s. 6d. per cwt., middling small saucer 47s. to 47s. 6d., large ditto 49s. to 50s., fine 51s. per cwt.

Pepper.—*Black*: A dull tone has prevailed, and only moderate sales have been made; prices of Penang are rather cheaper, but Singapore is steady. Privately about 3,000 bags have been sold, chiefly Penang at 4¾d., Singapore at 5¼d.; and for arrival 650 bags Singapore, chiefly August sailing *via* Cape, have been sold at 5¼d. At public sale only a few lots have been disposed of; of Penang, good West Coast at 4¾d., Trang at 5⅛d. to 5¼d. *White*: The market has been quiet, and prices are again slightly easier, at auction, of 1,492 bags Singapore about 650 bags sold chiefly fair to good fair at 7⅞d. to 7⅞d., good at 8d., fine bold 8½d. to 8 d.; 135 bags Penang sold, brown at 7½d., good bold at 8d. per lb.

Rhubarb.—Of 55 chests China 27 chests sold, fair to good fair rather mixed at 2s. 3d. to 2s. 5d., ordinary wormy to middling at 4½d. to 1s. 4d.

Rice.—The market has remained in a dull state, but after a further slight decline had been accepted for floating cargoes, there has been rather more demand, and prices have slightly recovered. On the spot there has been very little demand, and only small sales have been mads at easier rates. The sales on the spot comprise fine white Bengal at 12s. 9d., Ballam at 11s. 3d., Madras at 9s. 3d. to 10s., and Rangoon, old at 7s. 3d. to 7s. 4½d., damaged new at 7s. 9d. for first-class. The business afloat includes five cargoes of Rangoon, partly off the coast, at 7s. 9d. to 8s. 4½d., one Bassein at 8s., Liverpool quay terms, and two Necransie Arracan at 7s. 3d., open charter.

Spices.—*Nutmegs*: 36 packages Penang, mostly small and wormy, sold at 2s. 8d. to 2s. 10d. for 120 to 116's, one case 72's at 3s. 10d.; and a few low limed Penang at 2s. 1d. to 2s. 2d. per lb. *Mace*: The sales have been upon a very small scale. *Cloves*: Good qualities are firm; Zanzibar have sold at 1s. 5⅞d. to 1s. 5½d., and one lot at 1s. 6⅛d.; 18 cases Amboyna were chiefly withdrawn; 69 bales Cloves Stems sold at 3⅝d. per lb. *Cinnamon*: At public sale 112 bales Ceylon partly met with buyers, 1st sort 2s. 10d., 2nd 2s. 7d., 3rd 2s. 1d. to 2s. 3d, 4th 1s. 8d. to 1s. 11d.; 100 boxes China, in bundles, withdrawn at 1s. 1d. per lb.; 90 bags Chips bought in at 5½d. for the sound; 35 bags Bark sold at 2⅞d. per lb. *Cassia Lignea*: 1,281 cases were taken in at further advanced rates, chiefly at 60s. for recent import, and 58s. to 59s. per cwt. for a few old landed parcels. *Ginger*: 18 cases Japan sold at 46s. to 47s. 6d. per cwt.

Sticklac has been in limited request, and at auction of 206 boxes Siam 40 boxes sold at and previously, good free at 95s. Landings, &c., of Sticklac for the first nine months of the three years:—

		1875.	1874.	1873.
Landed	boxes	3,257	6,721	3,109
Delivered	,,	3,348	4,581	2,992
Stock, Sept. 30 ...	,,	3,080	3,536	1,205

Sapanwood continues quiet, and supplies are more liberal, and at auction of 87 tons 9 tons sold, the remainder bought in, sound Ceylon, &c., £12 to £12 10s., sea-damaged £9 10s. to £10 5s. per ton; 14 tons new Ceylon slightly damaged at £12 5s. to £12 7s. 6d.

Sago.—Large supplies offered at auction, amounting to 4,332 bags, consisted almost entirely of small Pearl, which met only a limited demand, and about 1,500 bags sold at about previous rates, fine small at 17s. 6d. to 18s., the bulk fair to good at 17s. to 17s. 6d., grey and ordinary at 16s. to 16s. 6d., one lot heated at 15s. Privately 300 bags large have been sold at 16s. 6d., and 300 bags small at 17s. to 17s. 6d. *Flour*: In auction 1,135 bags Singapore were offered on account of whom it may concern, and all sold at 12s. 6d. to 13s.

Tapioca.—989 bags Singapore went off flatly, and 600 bags sold at easier rates, good white at 2⅛d., a few lots fine at 2¼d. to 2⅜d., and fine bold 2⅛d. to 2⅜d. Of 535 bags Alma Penang 220 bags sold, superior sifted white at 3d., small at 2⅛d., the remainder fine bought in at 2⅜d. *Pearl*: 1,052 bags went off slowly at barely former rates for medium, and 6d. cheaper for bullets; but 700 bags sold, chiefly medium, at 18s. to 18s. 6d., two lots at 19s.; bullets at 19s. *Flour* continues dull of sale, and prices close ⅛d. lower; in auction of 1,273 bags Penang and Singapore 600 bags sold at 2d. to 2¼d., closing at 2d. to 2⅛d.

Tin has been steady, and with the exception of an occasional small parcel sold below current quotation the price is firm. Straits is quoted £86 to £86 10s. on the spot, and £85 to £85 10s. afloat; Banca £92, Billiton £86 per ton.

Tobacco.—123 bales Japan chiefly sold at 7d. to 7¼d., 49 ditto Japan damaged 5½d. to 5⅝d. per lb.

FREIGHTS AND CHARTERS.

Current Rates of Freight for Vessels on the Berth.

Per Steamers via Suez Canal.—To Yokohama: 55s. weight, 55s. meast. To Hiogo: 55s. weight, 60s. meast. To Nagasaki: 60s. weight, 65s. meast. To Shanghai: 45s. weight, 40s. meast. To Hankow: 60s. weight, 55s. meast. To Hong Kong: 45s. weight, 40s. meast. To Singapore: 45s. weight, 35s. meast. To Penang: 45s. weight, 35s. meast. To Colombo: 35s. weight or meast. To Batavia: 60s. meast. To Samarang: 65s. meast. To Sourabaya: 70s. meast.

Per Sailing Vessels.—To Yokohama: 40s. weight, 30s. meast. To Hiogo: 40s. weight or meast. To Shanghai: 32s. 6d. weight, 25s. meast. To Hong Kong: 30s. weight, 25s. meast. To Singapore: 25s. weight, 20s. meast. To Penang: 25s. weight, 20s. meast. To Batavia, Samarang, and Sourabaya: 20s. to 25s. weight, 25s. to 30s. meast. To Colombo: 25s. weight, 22s. 6d. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne, per keel—To Yokohama: £32. To Shanghai: £30. To Hong Kong: £26. To Singapore: £21. To Penang: £23, f.c. To Colombo: £23. To Galle: £23. To Batavia and Sourabaya: 23s.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama: 32s. 6d. To Shanghai: 30s. To Hong Kong: 28s. To Manila: 24s. To Singapore: 20s. To Colombo: 21s. To Galle: 20s. To Batavia and Sourabaya: 23s.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 28s. To Singapore: 14s. To Batavia and Sourabaya: 20s. To Galle: 18s.

CASUALTIES.

Copenhagen, Oct. 11.—The Oberon, from Cronstadt, Oct. 3, for the Amoor (rye meal), has put in here, having been fouled by the Ganymed, Danish schooner, which carried away jibboom, bowsprit, and all the forerigging. Both vessels will be repaired here.

Suez, Oct. 11.—The Medina (str.), from Singapore, for Jeddah, stranded on Parkin Rock, Harnist Island. Pilgrims taken on by Timor; agreement, £4,000.

St. Helena, Sept. 21.—The Goodell, from Sourabaya, for Falmouth, reports:—Left Bali Straits July 10; on Aug. 22, lat. 34.44 S., lon. 26.33 E., experienced a series of heavy gales from the westward with a sharp cross sea from the southward, ship labouring hard and shipping much water on deck, split topsails, &c.; 2 A.M., shipped a heavy sea over the starboard quarter, carrying away the gig, rails, topgallant bulwarks, and filling cabins; same day, a tremendous heavy sea boarded on the starboard bow, sweeping everything before it, stove open the fore hatch, filled the forward house, and flooded the decks. Aug. 23, found the cutwater and knighthead badly started, head rails gone, buffalo split and part gone, jibboom carried away, maintopsailyard and spankerboom badly sprung. Examined cargo and found the decks had leaked in a few places, and by the staving of forehatch some water had got down between decks.

Shanghai, Oct. 9.—The Taitsing, arrived here from New York, experienced a heavy typhoon, during which she lost overboard three men.

MISCELLANEOUS.

Gibraltar.—Passed, Oct. 11, Prinses Amalia (str.) from Southampton, for Batavia.

Malta.—Oct. 5, passed, from Hankow, for London, Ægean (str.).

Port Said.—Arrived, Oct. 8, Tom Morton; 12, Crocus, both from Foochow, and left for London; 10, Venice, from London, for Shanghai; 14, Galatea, from London, Glaucus, from Liverpool, both for Shanghai.

Suez.—Oct. 6, arrived, Bellona, from Shanghai; 10, Africa, from Hong Kong, both for London, and proceeded; 12, Torrington, Holland, both from Batavia, for Rotterdam.

St. Helena.—Arrived, Sept. 12, Evelyn, from Nagasaki, for London; 13, Goodell, Sourabaya, for Falmouth; 14, Robertus Hendrikus, Batavia, for Marseilles, Elvezia, Rangoon; 15, Prince Victor, Bassein, both for Falmouth; Aldebaran, Rangoon, for Channel; 18, Penmore, Colombo, 20, Banquereau, Ilo Ilo, both for London; 21, Regent, Manila, for New York. Passed, 19, Hendrik Fish, from Manila, for New York.

The Regent, from Manila, with hemp and sugar, arrived here on the 21st inst. with rudder damaged; a survey has been held and the surveyors recommend the vessel to be lightened in order that the rudder may be unshipped and landed for further examination; the vessel was otherwise apparently in good order; upon sounding the pump well, 14 inches of water was found, and after standing an hour 14½ inches.

Port Elizabeth.—Sept. 10, the Tecumseh, from Singapore for Liverpool, has shipped a new rudder, and completed her repairs, and will sail in a day or two. The master has raised £3,500 at 9½ pr. on bottomry.

Mauritius.—Sept. 16, the Annie, from London, for Colombo, short of water, put in here Aug. 26, and sailed on the following day; the Sir Humphrey Davy, from Colombo, for New York, arrived on the 28th, short of water and provisions, and left again on the 3rd inst. Arrived, Sept. 4, Julia H, from Singapore; 7, Amur; 11, Eliza Queirolo, from Maulmain, for Falmouth; sailed, Aug. 21, for Rangoon, Indus; 24, for Maulmain, Empress of India, for Reunion, Rene d'Anjou; 27, for Batavia, San Giovanni; Sept. 9, for Anjer, Formosa; 10, for Galle, Sydney, Eggers.

The Straatsraad v. Ewyck, from Batavia for Amsterdam, which put in here Aug. 14, with damage, has discharged all her cargo and gone into dry dock, where she will be stripped, caulked, and remetalled; about 570 bags of coffee have been sold as damaged.

Rotterdam, Oct. 10.—Sixty cases of indigo, also a quantity of damaged coffee, tobacco, tin, &c., have been taken into Goedereede ex Thomas Sorby (str.); and 281 bags of coffee, 110 cases indigo, 150 piculs tin, 3 bales tobacco, and 1 bale ditto, much damaged, have been taken to Helvoet; some damaged coffee, tobacco, indigo, and tea, and some provisions and materials, have been taken to Brouwershaven; 240 blocks tin, 59 cases undamaged and 50 cases damaged indigo, and 70 cases damaged coffee, have been taken into Ouddrop. The vessel is a total wreck. Oct. 11.—A small boat has arrived at Brouwershaven with tobacco; also 11 cases indigo, some copper pipes from the machinery, 120 fathoms chain, three anchors, a cannon, and 15 hides, have been landed at Ouddrop from the wreck.

Liverpool, Oct. 11.—The No 1 (str.) which left here on the 15th ult. for Manila, has put back to this port from Milford, and has been placed on the gridiron, having sprung a leak in dock.

The Suez Canal.—From the 1st to the 10th October, 38 vessels passed through the Suez Canal, the receipts on the same period being 680,000 francs.

The Hector (str.).—This fine vessel, recently lost near Amoy, was built in Hebburn in 1871 for the Ocean Steam Shipping Company (Mr. Alfred Holt's); her tonnage was 1,956 and 228-horse power, and was employed exclusively in the China trade. This is, we believe, the first of their large fleet which has ever been lost.

NOTICE TO MARINERS.

Malacca Strait—North Entrance—Revolving Light Near Atchin Head.—With reference to Notice to Mariners No. 115, dated Aug. 12, 1875, on the intended establishment of a light on the north point of Pulo Brasse, near Atchin Head, at the north-west end of Sumatra Island:—The Netherlands Government has given further notice that the light is now exhibited. The light is a *revolving* white light, attaining its greatest brilliancy *every minute*, and so continuing *nine seconds*. It is visible between the bearings of E. § N. (through south and west) and N.W. ½ W., elevated 525 feet above the level of high water, and in clear weather should be seen from a distance of thirty miles. Within the distance of twelve miles a faint light appears between that of the greatest brilliancy. The illuminating apparatus is of the first order. The tower, 120 feet high, is painted white to a height of 98 feet, and above that height, red. Position, lat 5° 44′ 20″ N., lon. 95° 9′ 10″ E. Also, that within a few months it is intended to exhibit a *fixed red* light of the fourth order from the above light tower on Pulo Brasse, at a height of 26 feet above the ground. This light will be visible through an arc of 90°, its central part crossing over the north-west islet. The light is intended to warn vessels of their approach to this outlying islet. In clear weather it should be seen from a distance of twelve miles. And, that further notice will be given of the exhibition of this auxiliary light.—Hydrographic-office, Oct., 1875.

SUNDRIES PER "SURPRISE," FROM NEW YORK, FOR YOKOHAMA, Sept. 24.

947 pkgs. glassware		7 pkgs. fixtures

HOLLOWAY'S OINTMENT

Mr. J. T. COOPER,

In his celebrated TRAVELS IN CHINA, published in 1871, says:—

"I had with me in my travels a quantity of "Holloway's Ointment. I gave some to the people, "and nothing could exceed their gratitude: and, in "consequence—milk, fowls, butter, and horse-feed "poured in upon us, until at last a teaspoonful of "Ointment was worth a fowl and any quantity of "peas, and the demand became so great that I was "obliged to lock up the small remaining stock."

This fine OINTMENT is invaluable in the cure of BAD LEGS, BAD BREASTS, OLD SORES, wounds, ulcers, gout, rheumatism, and all skin diseases.

DRUGS, CHEMICALS, &c.,

WHOLESALE AND FOR EXPORTATION.

Per P. and O. steamer *Hindostan*, from Brindisi, Nov. 15.—To Batavia: Mr. Lorraine. To Ceylon: Mr. T. Steele.

Per steamer *Ajax* (Holt's line), from Liverpool, Oct. 18.—To Port Said: Mr. and Mrs. Stapledon, Mr. and Mrs. Perceval and family. To Singapore: Mrs. Marshall and child. To Shanghai: Mr. Rae.

Per steamer *Glenroy*, from London Oct. 21.—To Singapore: Dr. and Mrs. Simon, Mr. H. M. Beecher. To Hong Kong: Mr. J. S. Hook.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present P. and O. mail brings advices from this port to the 1st Sept., and by the Pacific mail we have news to the 11th Sept.; the French mail from London, July 16, arrived out on the 1st Sept., and the following P. and O. mail of July 23 was received on the 4th Sept. The *Japan Herald* supplies the following items of news:—

The Press laws still continue to be the principal topic of interest discussed by the Japanese papers. The Government continues to summons newspaper editors to answer for supposed infractions of them. The sentences recently inflicted have, however, been (probably in consequence of orders from the authorities) of a milder type than the earlier ones.

The Japanese Government has tendered an apology to Captain Lewis and Judge Richardson for the arrest of those gentleman at Hachoji, which has been accepted; but some surprise has been expressed at there not having been any public inquiry into the circumstances of the case. We hear that, in view of the trouble caused by the arrest, the Government are about to issue a stringent proclamation on the subject. When issued we can only hope that it will be enforced, and that police officers may be made acquainted with its purport.

A case which threatens to last over a considerable period has been commenced in the U.S. Consular Court. The plaintiff, a Japanese named Ito Hachibei, claims a sum of over $100,000 from the firm of Walsh, Hall, and Co., being, as he claims, a balance due to him on exchange and rice speculations. On the other hand, the defendants reply that they owe nothing to the plaintiff, and that he is considerably in their debt.

On the 1st Sept. an inquiry was held at the British Consulate into the circumstances attending the loss of the British barque *James Paton* on the 10th August at Tukusima. The finding of the Court was that every exertion was made to save the ship and cargo prior to and subsequent to the stranding, and that no blame attaches either to the master or to the officers and crew. The certificate of Captain Cotter was therefore returned to him.

With the exception of some swimming and canoe races, we have nothing to chronicle in the way of amusements. The programme for the autumn races has been published, and it apparently gives general satisfaction. A cricket match, Scotchmen *v.* The World, is being arranged. Since the departure of the Marines and the fleet there has not been much rivalry in the cricketing world, and we are therefore glad to see that the members of the club have woke up. The secretary should be able to muster two very evenly-matched elevens, but although the respective sides are not finally chosen, we believe the North Britons are the favourites.

We notice the arrival by the steamer *Tokio Maru*, from Shanghai, of Signora Maria Palmieri, Signora Alice Persiani, and Signor Palmieri, who have been giving a series of concerts in Hong Kong and Shanghai, with the most brilliant success. It is intended, we understand, to give three concerts in Yokohama before the departure of these accomplished singers for America.

With a view apparently of affording some outlet for the thoughts of the nation, the Government have issued a revised set of regulations on the subject of books, and these may now be published after application to the *Naimusho* (Home Department). The subject of trial by jury, as a security against the arbitrary or corrupt decisions of judges, who hold their office at the pleasure of the Government, has also been mooted.

Steps are about being taken, certainly not before time, to abate the dog nuisance in Yokohama, the Consular Board having under consideration a proposition from the Municipal Director to that end.

Our weather has been much more agreeable lately, being cooler; the summer heats may now be considered as past. The settlement is very healthy.

The Russian and Japanese Commissions for the transfer of Saghalien and the Kurile Islands left here on the 28th August.

The stoppage of the Bank of California was announced here on the 28th August, and occasioned much surprise.

NAGASAKI.

The only items of interest in the *Rising Sun* are the following:—

As the British Admiral's yacht *Vigilant* was leaving the harbour on the night of the 18th Aug., she ran foul of the Mitsu Bishi s.s. *Tokio Maru*. Though only proceeding at quarter speed she managed to stave in three planks on the steamer's port quarter. Not content with this performance, she served a sampan in much the same manner as Hans Breitman's velocipede is said to have served that notable personage when it ran away with him down the hill, viz., "Slished him up de middle." The sampan was fairly cut in two, and the occupant swam ashore more frightened than he had been for many a day.

A seaman of the Russian man-of-war *Beyau* was accidentally shot by the explosion of a revolver while it was being cleaned by a young lad on board; the poor fellow died next day.

A young seaman of H.M.S. *Audacious* died about the time of the vessel's arrival at Nagasaki, on the 14th Aug. The body was interred next morning in the cemetery, with military honours, the band leading the procession playing the "Dead March in Saul," and the officers of the ship bringing up the rear.

CHINA.

PEKING.

A Peking correspondent of the *North China Herald* says that Mr. Mayers, who arrived from Tientsin on the 14th August, brought the first communication from Mr. Wade to the Tsung-li-yamen that he has sent since his arrival from the South. He declares he has it on good authority. But that Mr. Wade should have condescended to negotiate all this time with Li-Hung-Chang, instead of addressing his demands directly to the Central Government, is incredible. The correspondent also affirms that those who inferred from the memorials lately published that the Chinese are at once going to send out Chinese Ambassadors and Consuls were very premature. There is no likelihood of any being sent for a long time yet.

The *Peking Gazette* of August 13 contains a memorial from the Governor of Shantung, which shows that the capacity of the Chinese for carrying out great works is not yet quite extinct. The repairs executed to the south bank of the Yellow River, at a cost of nearly half-a-million taels, do credit to their industry. Some of the difficulties encountered are set forth in the memorial. The stretch of embankment repaired seems to have extended over sixty miles, and upwards of 100,000 men were employed.

The *Peking Gazette* of the 11th August contains an edict severely reprimanding the Governor-General of Kwangtung for re-establishing the Wei-ang Lotteries. Our readers may have noticed various memorials and edicts on this subject that have appeared in the *Peking Gazette*, and frequent reference in our Canton news to local excitement on the subject. In defiance of the orders from Peking, and in opposition to the wish of the Governor, the Viceroy reinstituted these lotteries directly on his arrival in the spring—the bait of $800,000, which the managers were content to pay for the privilege, being altogether too tempting. The Governor has not been content to allow the wrong; he has memorialised the Government, and we have now an edict severely blaming the Viceroy and handing him over to the proper Board for punishment.

CHEFOO.

There has been another outbreak at the Shantung Promontory. Mr. Henderson, the chief engineer of the lighthouse department, and the assistant light-keeper of the place, accompanied by a Chinese servant and a boatman, were attacked in the neighbourhood of the lighthouse by a mob of about forty Chinese. The Chinese servant was knocked down and beaten; Mr. Henderson was seized by three men and beaten, and the assistant light-keeper also received some blows. The Chinese were armed with hoes and grass-cutting knives, and one of these knives was thrown at the assistant and hit him with the butt-end; if the blade had struck him it would have inflicted a severe wound. Mr. Henderson and his companion only managed to extricate themselves by defending themselves as well as they could with their sticks, and then taking to their heels; but they were pursued, and while leaping a ditch Mr. Henderson was struck two blows by the Chinamen, one of which drew blood. Two of the Chinese were sent back a couple of days later, from the district magistrate's yamen, and the appearance they presented showed they had been rather more than half murdered at the hands of the mob. The chief instigator of this disturbance was a Chinese retired literary man, or mandarin, named Lee-woo, who has frequently been the cause of a great deal of trouble.

A Naval Court was held at H.B.M.'s Consulate on the 28th Aug., to inquire into the causes of the loss of the *Ellon Castle*, which went to pieces on the beach during the gale of the 18th and 19th Aug. It appeared that the vessel was on a voyage from Newchwang to Amoy, and had put in here in order to repair a hawsepipe, which had been carried away in Newchwang. The story of the loss was brief enough: moored, as all thought, in perfect safety, with 120 fathoms of chain, she parted first one cable and then the other; even then she all but succeeded in getting under sail, but most unfortunately one of the cables, when in the act of being slipped, got jammed round the windlass, and before the crew could clear it the dead weight at the bows brought the vessel's head back into the wind, and then all hope was over. The utmost that could be done was done, and that was to keep clear of the rocks, and run her on to the sandy beach. The finding of the Court was that the vessel was lost through sheer stress of weather, and no blame whatever attaches to Captain Ramsey, who received back his certificate.

Admiral Ryder arrived at this port on the 27th Aug., and hoisted his flag on board the *Audacious*. It seems uncertain whether he proceeds north or not. Mr. Grosvenor has arrived, bearing despatches from Mr. Wade, and has left again in the *Kestrel*.

SHANGHAI.

The present mail brings advices from this port to the 5th September; the French mail from London July 16 was received on the 29th August, and the following P. and O. mail of July 23 arrived out on the 1st September. The following summary of news is from the *North China Herald*:—

We are indebted to Her Majesty's Consul for a copy of the New Order in Council, constituting Shanghai a port of registry. After the usual verbiage at the commencement, the title of the document is fixed as the "China and Japan Maritime Order in Council, 1874." Under it Shanghai is constituted a port of registry. A Registrar is to be appointed by the Home Government, but the British Minister in China may appoint an Acting-Registrar, in case of the absence or illness of the genuine one. The Registrar has the same powers as any registrar of shipping appointed under the Merchant Shipping Acts; and Her Majesty's Minister is, with regard to the performance of any act relating to the registry of a ship, to be considered as occupying the place of the Board of Trade. Detailed instructions are given as to the mode of transfer of a ship under certificate of sale from one British subject to another at a consular port, the mode of transfer from a foreign to a British subject, the mode of registry of a ship provided with a sailing letter, &c. Passes may be granted pending the delivery of certificate of registry. A scale of fees is fixed, and printed copies of the Order are to be "provided and sold at such reasonable price as Her Majesty's Minister in China directs." It is a matter for congratulation that this Order, the necessity for which has been so long felt, has been at last obtained and put in force.

Digitized by Google

The only point of interest in the Minutes of the last Council meeting is the Bund line correspondence. We gladly infer, from the Consuls' inquiry whether the plan proposed by the French Council accords with the interests of the English and American Settlements, that there is a prospect of getting the approval of the Chinese to the whole scheme. The English Council point out that the French plan is a copy, so far as these Settlements are concerned, of the one laid before the Consular body some years since, and which appears to have dropped out of sight. The three Settlements are therefore in accord; and we sincerely trust some authoritative limit to wharf encroachment will be at last laid down. No one will regret to see the pontoon bridge over the Soochow Creek disappear; to say it is the ugliest structure over any creek in the neighbourhood is to use a mild term. However, it was not meant to be handsome, but to serve a purpose; it has done this, though not so effectually as it might have been made to do, and may now well be removed.

The quarters of the Settlement inhabited by Chinese presented a singular appearance between the hours of 7.30 and 9 on the evening of the 30th Aug., consequent upon a general illumination in honour of Tso Tsan Wang, one of the deities of the earth presiding over the crops, and especially that of rice—he being, apparently, a sort of male Ceres. He was of Japanese descent, being the son of Sin-ho, and eventually settled in China. He is said to have wrought so much good for the people in respect of improvements in agriculture, that posthumous honours of a divine nature were awarded him, and the 30th of the seventh moon in each year set apart as his day of observance throughout the Empire. In the native city and suburbs the ceremonial was also generally carried out, and the reflection of the fires was seen far and wide, while the sky was all aglow. This effect was in a great measure to be accounted for by the combustibles employed on the occasion; for alas! the spirit of innovation, consequent upon the corrupting influences of Western civilisation, was abroad; and, instead of the ordinary joss-paper, kerosine and other oils were used, which, poured upon some material built up in little circles, and set on fire, gave an intense glare, the appearance of which seemed to please the assembled crowds as much as the object for which it was lighted. Others, again, set up a row of common tallow candles, while the more orthodox confined themselves exclusively to joss-paper. The ceremonial has probably dwindled down very much to the simple observance of an annual custom—like, for instance, the exploded gunpowder-plot bonfires, or the custom still observed in some places in the West of England of dancing round twelve fires on twelfth night. Chinese of respectable position at any rate laugh and turn away with a negative shrug if they are asked whether they believe in the efficacy of the proceedings towards really improving the crops.

A meeting of the English members of the Rowing Club has been held to discuss the desirability of challenging the Scotch members to an eight-oar match at the forthcoming Autumn Regatta, about one-third of the number of English members attended. After some discussion, Mr. Westall proposed, and Mr. Haslewood seconded, that a challenge should be sent to the Scotch members. An amendment, proposed by Mr. George Lewis, and seconded by Mr. Dowdall, that it be left to the Scotch to challenge the English if they chose, was lost, and the original motion carried. Mr. Westall and Mr. Haslewood were successfully proposed as captain of the English eight, to select and train the crew, but declined on account of pressure of business. Mr. George Lewis was then proposed, and accepted the post, and this terminated the business.

A special meeting of the Mi-he-loong Hook and Ladder Company has been held to elect a second assistant foreman, and for other business. Captain Rice occupied the chair, and the minutes of the last general meeting having been read by Mr. M. Hawtrey, hon. sec., were passed and signed. Four new members were then elected. Mr. Pryer and Mr. Westall having been proposed and seconded for the vacant office above-named, the former gentleman offered to withdraw, but it was decided to ballot in the usual way, the result being that Mr. Westall was elected by nine to seven.

A very heavy rainfall occurred during the night and morning of the 31st August and 1st September. The streets were flooded, 10.85 inches fell in about eighteen hours, which gives a rough average of 2,000,000 gallons to each block in the Settlement. The *Herald* supplies the subjoined account of the storm:—

The rain, which began to fall gently about mid-day on the 31st, gradually increased as night approached, and at seven o'clock descended in torrents, and continued with almost unabated violence until some time after midnight. A cessation then took place, but at about 4.30 next morning there commenced a downfall unparalleled in the memory of the most ancient settler. The water fell with the noise of a cataract, and it soon became apparent that the sewers were incapable of carrying off so great a volume. Hour after hour the downpour continued, until all the low-lying streets and alleys of the Settlement were submerged—in some places to the depth of a foot, fifteen, and even eighteen inches. The rain continued in undiminished quantity for some time longer, but there did not seem to be any further rise of water in the flooded districts; and when an abatement commenced the sewers quickly carried off the deluge. The district that suffered most from this unwonted visitation was of course that of Hongkew, Seward-road and its neighbourhood being covered to a depth reaching nearly to the axle-box of the carriages which some of the residents were obliged to obtain in order to leave their homes; while the fields at the back of the houses, nearly as far as the eye could see, were converted into a lake, doubtless to the great damage of the crops. But the district generally was, so to speak, under water, causing much inconvenience and annoyance to the residents by the flooding of the lower apartments of their houses. The Chinese in particular suffered greatly in this way. In the English Settlement, the Honan, Foochow and Shantung-roads, and a portion of the Hankow-road, appear to have suffered most. In many native houses the water rose to the height of over a foot, and in several opposite the German Club, in the Foochow road, the furniture in the lower rooms was set afloat. The Honan-road between the Municipal offices, and extending for a long distance in both directions, was at least ten inches under water at the sides, the crown also being invisible.

Through an alley leading from the Hoopeh to the Fohkien-road the flood ran like a mill-race, filling the houses and driving out the inhabitants, who with usual Chinese thoughtlessness stood in the main road, laughing and shouting at what might have proved the destruction of their homes. That this was not at all unlikely was proved by the fact that in the Louza district seven Chinese houses, in different streets, fell in consequence of the soaking they received, fortunately causing only slight injury to person in one instance. A godown of the Shanghai and Hongkew Wharf Company also collapsed; it had, however, previously been condemned, and was to have been pulled down. The Consular compound and the interior of the racecourse were also transformed for the time into lakes of considerable extent, and we believe some parts of the public garden were also submerged, but fortunately without damage being done. The French Settlement does not appear to have been so sorely visited, although several of the thoroughfares were flooded more or less. In the Native City matters were much worse, in consequence of the narrowness of the streets and the almost total lack of sewerage. The Chehsien's Yamen and other public buildings were washed out, as were hundreds of shops and private houses; and although a considerable amount of floatable property was carried away by the flood and destroyed, the city cannot fail to be benefited by the unusual cleansing it has received. That the rain extended for a long distance in the country was evidenced by the volume of water which poured down the creeks into the Hwangpoo; in the Soochow Creek the current ran at over six miles an hour, and the discoloration of the water showed that vast quantities of soil must have been washed away. Fortunately it was ebb tide during the flood, or the effects would probably have been disastrous.

Arrangements were made to launch a small iron-clad gunboat which has been built at the Kiangnan Arsenal on the 1st Sept.; but she stuck on the ways, and, despite the united efforts of two gunboats and two tugs, still remains fast in the cradle. We are informed that, in consequence of the falling tides, no further attempt will be made to get her into the water, probably for a fortnight. It is satisfactory to know that her position is as secure as skill can make it, and that there is little fear of danger from straining.

The steamer *Chihli* has returned to port with the veritable junk in tow that was abandoned last week by the *Howsang*. Another junk disabled at sea has been picked up and brought safely into port by the pilot sloop *Ruby*. Captain Brand states the cruise from which he has just returned has been the hardest, in point of weather, that he has had during many years' experience as a pilot.

The Race Course was opened for training for the ensuing Autumn Races on the 1st Sept. The Rifle Range is also open for practice, preparatory to the Autumn competition of the S. V. C.

A cricket match has been played at Chinkiang, between eleven of H.M.S. *Mosquito* and eleven of the Chinkiang Cricket Club; the latter won, after a most exciting struggle, by two runs.

All the troops who were in the neighbourhood of the south gate have left; the deserted enclosures of their camps are the only remaining traces of their occupation.

The American ship *Charter Oak* has arrived from New York, with the new boilers intended for the use of the U.S. gunboats *Palos* and *Monocacy*.

FOOCHOW.

The subjoined items of news from this port are taken from the *Foochow Herald*:—

We learn with much pleasure that the Imperial Commissioner for Formosan affairs has approved of a scheme put forward by Mr. H. E. Hobson, the Commissioner of Customs at Tamsui, for the working of the Kelung coal seams on the European system, and that Mr. Tyzack, a mining engineer engaged last winter by the Inspector General of Customs, is to proceed to England to select the necessary machinery. We also understand that the export duty on Formosan coals has been reduced to one mace per ton, with the usual liability to pay half that amount at the port of destination.

The annual meeting of subscribers to the Native Hospital and Dispensary has been held, Mr. Sheppard in the chair. The financial statement for the year—showing a credit balance to 30th June last of $894.01 was submitted to the meeting; an unimportant discussion ensued, and a new committee was elected. After a formal vote of thanks to the chairman the proceedings closed.

There is a strong probability that the rumoured visit to this port of Signor and Signora Palmiera and Signorina Persiani will

Digitized by Google

become an accomplished fact ere long. Efforts are being made by several gentlemen of the community to organise a guarantee fund, and we understand that rather more than $500 has been subscribed thereto.

The newly-organised local Amateur Dramatic Corps is, we understand, making great way. The community will, we are sure, unite with us in wishing every success to the efforts of the gentlemen who have kindly undertaken to serve as a provisional committee.

H.B.M.'s ship *Egeria* arrived on the 31st August from Hong Kong, bringing despatches for the *Hornet*. She left again on the 1st September. It is rumoured that the fleet has received orders to assemble at Chefoo, but that one gunboat will remain at each treaty port.

A few days since an alarm of fire occurred at the Torpedo College, but owing to the early stage at which it was discovered, and the prompt measures taken to extinguish it, but little damage was done. The *extincteurs* with which the college is supplied were found very serviceable, and the fire was confined to the cookhouse in which it originated.

We learn of a disturbance at Kwang Tou, about thirty miles from this place, between the villagers and the Great Northern Telegraph Company's people. The riot was, however, promptly suppressed by the native authorities, and no further interference with the line has taken place.

HONG KONG.

Our advices by the present mail extend to the 11th September; the French mail from London July 30 arrived out on the 4th September. The following items of news are from the *China Mail*:—

We hear on the best authority that the negotiations of Her Majesty's Minister with the Peking Government, in regard to the Margary murder and the breaking up of Colonel Horace Browne's expedition, have come to a termination, and it is satisfactory to know that peace will be maintained. The intelligence was received from the North on the 4th Sept., but nothing is known as to the nature of the arrangement. Doubtless the ultimatum has been complied with, as, from the last telegram on the subject received from England, Mr. Wade seemed determined that his demands should be complied with, and the affront offered our Minister by Li-Hung-Chang would not tend to make him suggest any modification. Our information is necessarily scanty at present, but our readers will be glad to have the earliest knowledge that our relations of peace are to be maintained; and we only hope that they have not been maintained at too great a sacrifice.

The Times correspondent at Shanghai has, it appears, been telegraphing home that the Chinese Government intends to send an embassy to England "in reference to the murder of the late Mr. Margary." That such an idea never had any existence save in the brain of the correspondent may safely be asserted. But the mischief which so ill-considered a message may do is none the less obvious. China has for a long period been subjected to considerable pressure in order to induce her to establish Legations in foreign countries, and after a long course of hesitation has resolved to act upon the advice given to her. No sooner do indications of her giving way in this direction become public than straightway the very sensible concession to foreign feeling thereby evidenced becomes the basis of a canard, which is calculated to materially damage any action taken by China in British eyes. The Chinese know perfectly well that the position of the British Government is very different to that in which the Executive Power of France found itself shortly after the Tientsin massacre; the French Minister then at Peking was absolutely helpless to threaten or even to engage to accept the terms offered in satisfaction. Mr. Wade occupies a very different position, and there is no more likelihood of an attempt being made to give him the go-by than of China declaring war against us on her own account. It is to be hoped the correspondent has since telegraphed that his first message was a mistake.

We understand that the leading members of the so-called Hospital Committee have resolved to form a Local Anti-Opium Association. For this purpose they have put themselves into direct communication with the London Society, and are only awaiting the suggestions of the latter as to detailed rules, to begin their operations. We have no idea what line of action they intend to adopt as to the connection of the English Government with the opium trade; but though we do not presume that they will be able materially to influence the policy of the Imperial Government, it is nevertheless gratifying to see natives of this Colony alive to and taking active interest in questions so closely bearing on the financial interests of two great Empires.

We understand that the following are the regulations which Mr. Bailey, the U.S. Consul here, has framed for the conduct, in accordance with the new Act of Congress, of Chinese female emigration to the United States of America:—

1. Any proper Chinese female going to the United States for reputable purposes, whether she resides in Hong Kong or comes from other places, and not having relatives at this place, must put down in the declaration the name of some Hong or Shop with which she may be acquainted, and who are willing to be surety for her, to enable inquiries to be made without difficulty.

2. Seven days before the steamer, or vessel, sails she must submit the declaration and her photographs in triplicate to the U.S. Consul for inquiries and examination. One photograph will be handed back to her on the arrival of the steamer, or vessel, at her destination, one will be filed with the Collector in San Francisco, and one retained for file in the Consulate.

3. Should there be any doubt as to the character of the applicant she must be seen by the examiners. It will therefore be necessary that she should state in her declaration whether she is willing to be seen, and at what time and place.

An exciting occurrence took place on the 9th September on board the steamer *Teviot*, Captain Nisbet. It appears that while Captain Vickory was on board making some inquiries about certain machinery consigned to the Dock Company, and he and the chief officer (Mr. Hunt) were examining the bills of lading for the goods, the Malay lamp-trimmer rushed behind and plunged a knife into the chief mate's shoulder. Mr. Hunt staggered under the blow, and Mr. Vickory appears to have got away. The excited lamp-trimmer upon this appears to have taken charge of the ship for a short time, so sudden was the attack; and he was allowed to career round the deck, on sanguinary deeds intent, until the arrival of the second officer. The latter immediately seized a marline-spike, and felled the rampant rascal to the deck. We are glad to learn that the wound, though serious, is not mortal, and that a day or two will possibly suffice to dissipate all fears of a fatal result. Mr. Hunt was formerly in command of the *Cheops*, and of the tea clipper *Titania*; and there is not the slightest reason to suppose that the native had any provocation whatever. The only explanation seems to be that he must have been inflamed by drink, and ran "amok" after the Malay fashion at the first man he saw. At the magistracy the case was brought up and remanded.

On the 30th August the Spanish steamer *Panay* caught fire It appears that the fire originated in spontaneous combustion of the rice cargo, which was damp; the men from the Police Chop were quickly on board, and soon extinguished it. Messrs. May and Creagh went off, but their direction was fortunately not required. The police sent a fire-engine off in a cargo boat, but the fire had been put out before it reached the vessel. Altogether, great promptness was shown by every one concerned, and the owners may be congratulated that matters were no worse. But little damage was done, and that chiefly to the cargo by water.

The steamer *Formosa* came off the West Point Slip on the 8th Sept. She has changed hands and hoisted the Spanish flag she is now called the *Zamboanga*, and is commanded by Captain Arrecharala. She will run between Amoy, Hong Kong and Manila. We hear she is partly owned by Remedois, and Co, of Hong Kong.

A general meeting was held at the Amoy Club on the 4th, to discuss two questions of some importance to the community. The first subject under consideration was the Recreation-ground, better known as the Cricket-field; 1,700 dollars are wanted for it, and though it would be immensely to the interest of several members of the community to keep the ground clear of buildings, it is considered very doubtful whether the amount will be subscribed. The matter was therefore allowed to be in abeyance for some time, in order to see if the amount will be forthcoming. The next matter was the final decision whether or not a new Club should be built; this question was decided in the affirmative, and the works will be commenced almost immediately.

Our Manila advices inform us that a Court of Inquiry will be held on the 15th September, at Cavite, for the purpose of investigating into the circumstances connected with the lately reported seizure of the steamer *Sultana*, Captain J. R. Howard, by one of the Spanish men-of-war on the South Coast of Sooloo, on the 21st of June last. The question of nationality may have prompted this action on the part of the authorities, and some consideration may yet be given to the flag of Borneo after all.

At a meeting of the Legislative Council on the 7th September the Ordinance to provide a General Register of Marriages in Hong Kong was passed, and the discussion of the Companies' Ordinance was postponed *sine die*.

In the Supreme Court on the 31st August Sorabjee Rustomjee, a broker, was adjudged a bankrupt, and in consequence a claim preferred against him by Mr. Algar for $610.50 in the Summary Jurisdiction Court had to be withdrawn.

The British brig *Pelham*, which arrived here on the 4th September, reports that her captain (Till) died of *delirium tremens* on the voyage, after having tried to kill the boatswain.

The opposition on the Canton river is now an established fact, the steamer *Ichang* running both ways within the twenty-four hours. The *Yotsai* (Kwok Acheong's steamer) is to run to Macao in opposition to the *Spark*.

Captain Sands advertises for sale his Patent Slip and Foundry, &c., at West Point, which he has been carrying on for some time back.

CANTON.

On the 27th Aug. a fire broke out in the Tartar quarter of Canton city. The scene of conflagration was a matshed built specially for the purpose of holding cricket-fights. Suddenly an

Digitized by Google

alarm was raised, and it was discovered that the shed was on fire, and in a very short time the structure was burnt to the ground. As to the cause of the fire, some ascribed it to the careless throwing of the end of a cigar on the floor; another account put it that the Tartars who took part in the game had lost a good deal of money by the result, and became so exasperated that they set the tenement on fire. There is yet another story which asserts that some of those who took an interest in the fight became so elated at the victory of the insects on which they had staked their money that they burnt a large quantity of fire-crackers, and this set fire to the place. Which of these accounts is correct it is impossible to say, and one is about as likely to be so as the other.

A robbery almost as daring as that perpetrated on the Min Shun Bank in Tah Toong-street, Canton, last year, occurred on the 28th Aug. upon a shop in the same neighbourhood. The shop victimised on this occasion is the Yik Sow Loong, which deals in retailed opium, and is situated in the Upper Ninth Ward. This shop, as a sort of inducement to purchasers, allows its customers to smoke on the premises, providing them with necessary apparatus, and the oil which feeds their tiny lamps. On the night in question, some ten men went to the shop to smoke, and when an opportunity offered, they suddenly rose *en masse*, and kept the shop-people at bay with the weapons they carried with them, while some of their number ransacked the house, carrying away some 300 taels of silver. Another account placed the sum at about 1,000 taels, but allowing for the usual exaggeration of Oriental arithmetic it is thought that the former sum is nearer the truth.

There has been a riot in a theatre at Kong Moon. It appears that it is a common custom with the people of Kong Moon to engage the services of one of the first-class companies of play-actors to perform before the Joss-house of their popular god on the anniversary of the birthday of this diety, and on this occasion the Joss-house Committee engaged the Poo Tin Lok Company. In one of the plays some omissions on the part of the actors were observed by the spectators, and the latter, regarding the omissions as wilful and conveying a slight to them, commenced to hoot. The hooting spread like wild-fire, and was taken up by that portion of the audience who stood in the pit. This lasted for a few moments, when stones were hurled on to the stage. The actors then, in self-defence, turned out with weapons, for they could not say to what extent the infuriated mob below might go. Fighting then took place between the two parties, and was not stopped until several men on each side were wounded.

Sundry members of the Canton guild lately challenged the compradore of an old established foreign firm to a cockroach fight, for the sum of $1,000. The said amount was distributed over a large circle of friends, the proportionate amounts being various, ranging from $10 to $100. The victory resulted with the compradore and his friends. A singular fact is that only the Cantonese indulge in this sport.

The heat in Canton has been very great, and much sickness is prevalent, especially in the city itself.

PHILIPPINE ISLANDS.

—o—

MANILA.

The *Straits Times* gives the following translations:—

According to official statistics published last month at Manila, the value of imports into the Philippines during 1874 is estimated at $13,704,254, and the exports from the same at $17,302,977, forming a total of $31,007,231. For 1873 the figures are respectively $13,217,836, $23,522,529, and $36,740,365.

In reply to inquiries, the translator regrets to say that the Manila papers give no further particulars so far regarding the blockade of Sooloo, or how the war goes on in that quarter; or of the *Sultana* and cargo seized in the Sooloo Sea; or what became of the renowned Captain Hayes, whom the Spanish authorities caught hold of at the Marianne Islands, and whose future progress would be rather interesting to traders and others in these parts.

SIAM.

—o—

Advices by this mail report some excitement at Bangkok in reference to the advance of a body of Chinese marauders, supposed to be from Yunnan. They appear to have worked down from the northern frontier of Lugang Prahang without opposition, to within two hundred miles of Bangkok, but preparations were being made for despatching a disciplined military force, with European arms, &c., to meet and dispose of the invaders. The first instalment was to leave on the 22nd Sept. Another matter was causing some talk, viz., the visit of Sir William Jervois, Governor of Singapore, to the Siamese town of Singora and the dependency of Tringanu, without any previous intimation to the Siamese Government. When the officers of the Sultan of Tringanu were appointed, a few years ago, it was understood that his position as tributary to Siam should be recognised, and Singora is an absolute Siamese town.

The *Siam Advertiser* of the 9th Sept. states that the Government is making all preparations for sending the expedition to quell the disturbances in the Northern Provinces, and put a stop to the depredations of the Cheen Haus, and that the expedition was to leave Bangkok in a few days. H.R.H. Somdetch Chowfa, and other Siamese nobles, were to be the leading Generals. The Government had also requested the French Consul at Bangkok to officially notify the Saigon Government of the sending of the expedition, and entreat the Saigon authorities to prohibit the supply of arms, ammunition, and supplies to the insurgents from French Cochin China.

The new bronze coins struck off at the Siamese Mint have been put into circulation, and the gambling farms had been notified to redeem their porcelain currency and use the new coins instead. These bronze coins are of very small value, and are estimated by their fractional value a "fuang," or one eighth of a tical, equal in our currency to 7½ cents. The new pieces are valued respectively at a quarter, eighth, and a sixteenth of a fuang.

JAVA.

—o—

The *Straits Times* gives the following on Atchin and Java affairs:—

The Batavia *Dagblad* publishes a letter from a correspondent at Atchin regarding the state of affairs. The following is a translated extract therefrom:—

"We at present hear little of the West Coast; the West monsoon is now prevailing there, during which shipping, particularly on the more northerly portion of it, encounters great difficulties. Trading craft come there very seldom, so that the blockade is now somewhat easier to maintain than during the East monsoon. The roadstead of Great Atchin, or rather Olehleh, continues to be lively. Steam vessels are almost always in view there, busily discharging cargo; there are also to be seen men-of-war departing or arriving, receiving fresh orders, or coming to give in their reports to the naval commanding officer, and steam launches moving to and fro, &c.

"As to the blockading squadron, very little of a remarkable nature has happened since the bombardment of Sambelangan. With reference to the States which are still persistently hostile to us, their fisheries are interrupted as much as possible by firing upon fishing prahus which venture out to sea, which firing is, at Sambelangan, always returned from the shore. Notwithstanding their chastisement, the Sambelangers do not generally await our fire, but fire upon every man-of-war which steams past that petty State. Fortunately, however, their firearms are of such a nature as to do us but little harm so far. Along with Simpang Olim, Sambelangan is certainly at this moment our most obstinate enemy on the coast. In other respects the squadron continues to perform the same service; blockading, blockading again, and always blockading; that is to say, looking sharply, by day and by night, towards all points of the compass for any vessel in sight, so as to stop her if she come inside the blockade line, examine her papers and cargo, which are generally found to be in order. In the night time armed boats are also despatched from the men-of-war to cruise close to the shore to prevent small prahus from taking advantage of the darkness to bring contraband articles ashore. Prizes, however, are at present rarities, and are made more frequently on the East Coast only, although there they are usually small native prahus."

The same journal also contains the following nautical intelligence:—

"A correspondent writes to us as follows from Anjer, under date the 26th Aug.:—'Captain Warland, of the American ship *Endeavour*, reports that in 5 deg. 50 min. N., and 119 deg. 13 min. E., his vessel sailed over a bank not marked on his English chart; the soundings were from eight to ten fathoms, while coloured water was visible at a short distance; at the same time he ascertained that Hog Point, twenty-seven miles off, bore south.' When the foregoing intelligence was previously published a couple of errors crept into the same, which we have corrected on this republication."

The Batavia *Handelsblad* states as follows:—

"The wreck of the *Neva* has again exchanged hands; this time, less cargo, it has been sold for 10,000 guilders.

"At Batavia the state of health is in a sad condition. Cholera is daily carrying off victims even from amongst the well-to-do classes; in one family five children died in a few days. A young actress lately arrived, who had performed successfully here on her first appearance before the public, was a corpse a couple of days afterwards, owing to this disease."

On the same subject the *Dagblad* says:—

"Cholera at Batavia is again increasing frightfully amongst the European population. Of late the death-rate has been made double what it had been under ordinary circumstance by this terrible disease."

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 18th Sept.; the French mail from London Aug. 13 arrived out on the 11th Sept., and the following P. and O. mail of Aug. 20 was received on the 18th Sept. We take the following items of intelligence from the *Straits Times*:—

His Excellency the Governor has been absent from the Settlement on a visit to Laroot and Perak, returning on the 18th Sept. Nothing has yet been made public regarding this visit, but his Excellency's object was to go into the interior of Perak, and ascertain for himself the state of the country and the best course to pursue in dealing with the difficulties that naturally arise in the working of the new system. The information thus gained will, it is believed, enable him to estimate at their true value the character of the rival claimants of the throne of Perak, and their influence over the people.

The Sultan of Tringanu, after a stay here of about sixteen days, left for home in the steamer *Kromatah*, which would call in at Tringanu to land him and his party on her way to Bangkok. The Sultan's party included a body guard and about forty of his wives, with a great many of his children and grandchildren, the whole numbering about 200 persons. While here the Sultan visited every place of public interest, but was best pleased with his visits to the European stores.

At last, the Supreme Court has taken possession of the new Court House, which is a handsome and commodious structure. The internal decorations are in accordance with the substantial character of the building itself, and the structure reflects great credit upon the architect who designed and so well carried out the incorporation of the old and new buildings. We trust, now that the Court is a second time domiciled in a house of its own, that its days of shifting about are over, and that no encroachments will be made upon the accommodation that, after so much delay, has been provided for it.

The project for a railway in Singapore may be premature and financially unsound; but there are indications that one of these days a tramway from one end of the town to the other will be an absolute necessity to accommodate the passenger traffic. Hack gharries are getting to be expensive luxuries, and are hard to find whenever particularly wanted—though usually they are as thick as bees, and very anxious for one's custom just when he don't require them. The omnibus proprietors are temporarily supplying that great want of the native population—cheap conveyance—by running their 'busses at night from the neighbourhood of Circular-road to Campong Glam and back, stopping at any part of the route, at a uniform fare of three cents per head; —and the 'busses appear to go full too. It is rumoured, also, that shortly there will be a fresh line to and from Tanjong Pagar.

This morning the racecourse opened for training for the Autumn Race Meeting. Great results come occasionally of small beginnings, and it is to be hoped the measure of our actual sport on the race days will be in this relationship to the display of the first training morning. Three horses—evidently intended for racing work—were taken round; there was a very promising looking black mare, and a bay gelding of good form, neither of which had been on the course before; and Bar One, an old friend, made the third. So much for the horses. The attendance of the members of the Club was a fair average for the beginning of the season, and we were glad to see a number of old faces present. The coffee and tea were unexceptionable, and the appointments connected therewith showed an improvement upon former arrangements. The ordinary amount of gossip was got through, and the gathering dispersed about half-past six.

The steamer *Benmore* brought down from Malacca nine European gold miners from the Chindrass mine, who had asked to be released from completing their engagements, preferring to return to Australia, and we learn that the underground manager has tendered his resignation. We understand that only four European working miners now remain at the mine, who, with the manager and coolies, will carry on the future operations of the company. The greatest piece of news is that Chindrass has been altogether abandoned, and the machinery is being taken down and operations begun on another hill called Tahan, some twenty miles distant from the late expensive and profitless workings, where there are prospects of at last obtaining the coveted gold, in pursuit of which the shareholders have spent so much money.

At one of the meetings of Council last year there was a Committee appointed, or a proposal made for one, to revise and consolidate the numerous Ordinances with which the Settlements have been blessed or burdened by the labours of the Legislative Council since 1867. We do not know whether any action has been taken in this important matter, but whether or no, we would suggest, as a very desirable pendant to the motion, the propriety of steps being taken to have the digest, when finished, translated into Chinese, Tamil, and Malay, or at all events into the first-named language, as being that of the most numerous, if not most important section of the community. We observe that in Hong Kong the local Ordinances are to be translated as soon as possible into Chinese, and the same step is quite as necessary here in regard to the three Settlements.

The hack-gharry strike has come to an ignominious end. A crowd of unruly Klings in Commercial-square forcibly stopped a hack carriage with two gentlemen in it; an hour or two afterwards the sycees had all voluntarily resumed work, and there being no rain are over-anxious for custom.

PENANG.

At a meeting of the Municipal Commissioners, the following was agreed to in regard to Mr. Carrington's Scheme for water works:—

Resolved, 1st. That the larger of the two schemes be adopted, and that the sixteen inch iron main required for the first division of the new line be ordered from the Commissioners' manufacturers by the next homeward mail, and that at the same time inquiries be made regarding the services of a fitter.

2nd. That the Secretary be directed to consider the best means of raising the necessary funds, with a view to determining what proportion can be met out of current revenue, and making application to Government for the necessary borrowing powers.

3rd. That one-half of the borrowed money shall be paid by instalments within a limited period, and the remainder to be a debt on the Municipality.

4th. That the thanks of the Commissioners be conveyed to Mr Carrington for his report, and to the Commissioners of Singapore for their courtesy in permitting them to avail themselves of Mr Carrington's services.

5. Read a letter from the Lieut.-Governor requesting, on the part of Government, to know what may be the amount of the Commissioners' contribution towards the cost of building the Town Hall.

Resolved, that Government be informed that the Commissioners will be prepared to participate in the expense of the building to the extent of $10,000, provided the premises when completed are vested in them according to their original proposition.

The *Gazette* says:—The colony is spending nearly $100,000, as we have often pointed out, on the Prye and Duroo bridges. Surely it is very false economy to begrudge the salary of an officer of the P. W. Department here in Penang to see that the money is properly spent. The colony has lost $10,000 over the Duroo bridge already, owing to the indifference of the heads of the department in Singapore, and we have no guarantee that the $100,000 about to be spent now will not be thrown away in a like manner. We hope to see this matter taken up at the next Penang Association meeting.

Malacca, according to the latest accounts, has got its *full* meed of acting appointments at present. The Hon. C. B. Plunket is Acting Lieutenant-Governor, Magistrate, and Coroner, vice Captain Shaw and Mr. Isemonger, who are both absent on leave; Mr. Magalhaens, the Colonial Engineer of the Settlement, is Acting Collector of Land Revenue as well, vice Captain Ord, who has just gone to England; and the military Doctor attached to the detachment of 16th Regiment is Acting Colonial Surgeon, while an Acting Chaplain has to go up periodically from Singapore to attend to the spiritual welfare of the Protestant members of the community, and the Superintendent of Police has been "Acting" for nearly two years. It will thus be seen that out of the seven officials that Malacca has to pay for she has at the present moment the services of three only in reality, viz., Messrs. Plunket, Malgalhaens, and the Superintendent of Police, and the Engineer is the only officer who is not acting. We are told that Mr. Plunket has to hold Court till midnight frequently owing to the pressure of his other duties during the day. We can only ask the Government whether, in allowing the existence of such a state of affairs, it is doing justice to either the public or its servants.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—For some little time the demand for most goods continued, but during the closing week rather less inquiry had been apparent for Grey Shirtings, also for 16/24 Yarn, but good 28/32's were still saleable. In Velvets a considerable advance had been established; and for Indigo Shirtings, Cotton Sateens, Turkey Reds and Taffachelass, a fair current demand existed. Woollens were generally in better inquiry, and an advance had been obtained on Black Lustres. There had been little change, and no improvement, in Metals; sales had been confined to a few lots of Nail-rod Iron, at prices under previous quotations.

HANKOW.—During the fortnight sales of Grey Cottons had only amounted to 1,800 pieces. There had been more inquiry for Fancy Goods, however, than for some time previously.

CHINKIANG.—Messrs. Spencer and Wolff write:—We have again to report a dull week in all Grey Goods, with the exception of English Drills, which have been moved off somewhat freely. A few bales of Shirtings and T-Cloths have been taken to supply immediate requirements; but dealers refrain from purchasing to any extent, as, owing to the weak state of the Shanghai market, they anticipate a decline in rates.

SHANGHAI.—The week had been a cheerless one to the majority of holders. The dulness had continued throughout, unbroken saving by an inquiry for low priced Turkey Red Shirtings, and a renewal of the demand for 14 lbs. Drills—in godown.

Digitized by Google

FOOCHOW.—Five hundred pieces 8.4 lbs. Grey Shirtings had been sold at $2.80 per picul. Lead: Small sales at $8.50 per picul against Tea.

HONG KONG.—There had been little if any alteration in prices during the interval. Business had been moderate, but a tendency towards improvement was exhibited at the close.

CANTON.—Lead: The market had been very dull, and prices had declined to $8.30 to 8.35 for LB; quotations were nominal. Quicksilver was quoted $102 to 103.

BATAVIA.—There had been scarcely any change in the position of our market for Cotton Manufactures. The demand for nearly all descriptions of goods continued on the most limited scale, and sales of any importance were as a rule impossible, unless long credit be given. Prices generally had a downward tendency, and were only maintained where there was scarcity of stock.

SINGAPORE.—The arrivals with general cargoes had been the steamers Feronia from Hamburg, Emiliano and Patroclus from Liverpool, Lorne, Fleurs Castle, and Glenearn from London. The market had continued extremely dull during the whole of the fortnight. Advices from the outports were unsatisfactory, and importers having shown more anxiety to press sales prices were weaker.

PENANG.—There had been no improvement to report in the demand for imports; if anything the market during the fortnight had been duller, and only retail sales had been practicable. For a wholesale quantity there were sellers at a reduction on current rates, but demand was wanting.

EXPORTS.

TEA.

YOKOHAMA.—After departure of the last Pacific mail steamer a current business continued to be done at full rates, whereupon Teamen endeavoured to force up prices, and for a short time were successful; this had the effect of curtailing business, and arrivals still coming forward freely, they had again to give way, and prices closed about on a par with those ruling at the date of last report, with an easier tendency. Settlements during the fortnight amounted to 7,000 piculs, making total to date about 94,000 piculs, against 78,000 piculs at same time last year. The Ukraine not meeting with sufficient encouragement had been withdrawn, leaving the H. A. Litchfield and Lothair on the berth for New York, and the Hants County for San Francisco. The Oleander and Mercury sailed for New York on the 28th and 29th Aug. respectively, the former with 459,886 lbs., and the latter with 301,854 lbs., making an export of 1,598,357 lbs. Quotations: Common $20 to 23, good common $24 to 26, medium $27 to 30, good medium $32 to 34, fine $36 to 38, finest $39 to 42, choice $45 per picul.

HANKOW.—Messrs. Evans, Pugh, and Co.'s Report says:—A moderate amount of business has been transacted during the past fortnight, settlements amounting to about 13,500 chests having been reported, while shipments to Shanghai for sale on that market have been limited to about 6,000 chests. During the corresponding period last season settlements were about 10,000 chests, a similar amount being forwarded to the Shanghai market. The arrivals have been very moderate, say about 18,000 chests, against 28,000 chests during the same time in 1874. There appears to be every prospect of a short supply of third crop teas. Prices of the better classes that have been offered, which are of fair quality, have advanced from Tls. 1 to 2 per picul from opening rates, owing to competition between Russian and English buyers. The commoner kinds, however, show little change in value. The export of Hankow Teas per Customs Returns is now 49,341,967 lbs., against 48,212,807 lbs. in 1874. Quotations are:—For second and third crop Oopacks, Tls. 13.00 to 18.75, against Tls. 16.00 to 19.00 at same date last season; ditto Oanfas, Tls. 11.25 to 13.50, against Tls. 16.25 to 17.00; ditto Oonahms, Tls. 10.00 to 13.75, against Tls. 13.50 to 17.75. The following is a comparative statement of the export hence:—1875-76, 58,364,327 lbs.; 1874-75, 56,520,383 lbs.; 1873-74, 54,732,720 lbs.; 1872-73, 52,634,163 lbs.; 1871-72, 52,866,378 lbs.; 1870-71 41,614,185 lbs.

SHANGHAI.—*Black:* A very fair amount of tea had been settled during the fortnight, and prices for all Congous were decidedly firmer. Supplies were still kept back, and there was only a small stock affording a poor selection. **Settlements, 28,**487 chests. Stock, (against 32,000 chests last year), 12,180 chests. The following prices had been paid:—Oopacks, 10½d. to 1s. 1½d.; Oonahms and Oonfaas, 9¾d. to 1s. 1¾d.; Hohows and Ningchows, 8½d. to 1s. 6d. *Green:* There had been a somewhat strong demand for Country Teas, the finer kinds of which were dearer. Lower classes showed no change in value, nor had there been any alteration in Pingsueys, the business done in them having been small.

FOOCHOW.—There had been considerable improvement during the fortnight in the amount of business in progress, as will be observed from the settlements given below. Congou: Settlements had amounted to 36,190 chests, at Tls. 6½ to 25½. The better grades had been in demand, and prices had steadily advanced until they were quoted Tls. 2 over the lowest point reached. Common kinds were about one-half a tael higher. Arrivals had amounted to 38,400 chests. Quotations: Siftings to broken leaf, 7½d. to 9½d.; broken leaf to ordinary, 9½d. to 11½d.; fair to good common, 11½d. to 1s. 0½d.; flavoury to medium, 1s. 0½d. to 1s. 5½d. Souchong: Settlements 2,427 chests, at Tls. 14 to 44, showing slightly easier rates; arrivals 5,500 chests. Oolong: Settlements 1,348 half-chests, at Tls. 13½ to 28; arrivals 200 half-chests. Scented Teas: Settlements 6,289 boxes, at Tls. 16 to 26; arrivals 7,000 boxes. Flowery Pekoe: Settlements 106 chests, at Tls. 33, being full prices; arrivals 100 chests.

AMOY AND TAMSUI.—Congou: A moderate business had been in progress at Amoy during the fortnight, transactions being principally for the London market. Prices showed a slight decline all round. The third crop was expected in about ten days or a fortnight. Quotations were:—Common to fair, $15.00 to 17.00; good, $18.00 to 19.00; superior, $23.00 to 25.00. Oolong: Small purchases for the London market continued to be made, but nothing had been done for America, prices being still about $3 to 4 over quotations received from New York by telegraph. Arrivals to date—54,226 half-chests, against 136,129 half-chests at same date last year. Formosa Oolongs had come to hand during the fortnight to the extent of 8,000 half-chests, all of which had met with ready sale at rates which show some improvement. Quotations: Good cargo, $26.00 to 27.00; superior, $29.00 to 30.00; fine, $33.00 to 36.00; fine to choice, $42.00 to 46.00.

CANTON.—Messrs. Deacon and Co.'s Report says:—The past fortnight's business has been on a more extensive scale than for any similar period during the past three months, and it would have assumed larger proportions had not operations been checked by the endeavours of Teamen to obtain advanced rates. Congous.—Rather better value has been obtained in these, and settlements have been chiefly of the better teas offered; the bulk of the stock being of an unattractive character. Business at Macao is again chiefly confined to the shipment of contract teas. Scented Teas.—A demand for Capers sprung up early in the fortnight, and a large business has resulted; at one time it appeared as if buying would be checked entirely by teamen advancing their ideas Tls. 1 to 2; they have succeeded partially in their attempts to raise prices, but only for fine and finest which must be quoted about one tael higher than last mail; transactions in other gardes have been made on much the same basis as the business of last fortnight. Quotations are good common to fair Tls. 13 to 15; medium to good Tls. 17 to 20; and fine to finest Tls. 22 to 24. Though there is a considerable quantity of leaf held by natives, yet the teamen who manipulate the Tea have only small stocks, and therefore firm in their demands. A large portion of the unprepared leaf held over during the past two months has suffered from damp, and the presence of damage is markedly evident in many of the musters shown. Pekoes have been in less demand, and fewer purchases have to be recorded. Prices as a rule have ranged much the same as last mail for long leaf kinds, while new makes have advanced one tael. Canton Greens.—No settlements are reported. The following is a summary of the fortnight's business:—Congou, 2,000 boxes at Tls. 15 to 22 per picul, Scented Caper 25,000 boxes at Tls. 13 to 24 per picul, Orange Pekoe 7,000 boxes at Tls. 14 to 31 per picul.

SILK.

YOKOHAMA.—Since the date of last report a considerable business had been done. Arrivals of Hanks had been very large, and dealers had shown some anxiety to realise these classes, more especially the lower qualities, for which a slight decline has occurred. Oshius and Kadidas had met with ready sale at previous quotations. Stocks had further increased.

SHANGHAI.—An attempt made by the Chinese to force up prices had resulted in a small business for the mail (prices paid showing an advance of fully Tls. 5 per picul. all round), and settlements had not exceeded 1,500 bales, giving a total of 30,000 bales since 1st June, against 32,000 at same date last year. Some of the silkmen, however, seemed apparently very confident that later on in the season would be a more general demand, in anticipation of which they were purchasing to fair extent on this market, rather than pay the reported higher prices up-country.

CANTON.—Messrs. Deacon's Circular says:—We have had another fairly active fortnight in this article. 800 to 900 bales of Tsatlee reel have been taken, and with the exception of finest thread, all classes have more or less been dealt in; the demand, however, has been mostly for No. 4 and common descriptions. The fact of fourth crop being rather an improvement, as regards general quality on previous yields this season, has induced a slightly firmer tone of late, although there is little quotable difference in prices. No. 4 has been in at $325 and $327½ per picul, and up to $330 per picul is asked for good Kowkong. Loong-kongs have not been wanted, and no transactions have taken place. Long-reels: Settlements are put in at 180 piculs and 40 bales Cumchuck, Seulem, Kowkong, &c. Re-reels have been in limited demand, and only one contract of 300 boxes is reported. Stock has received considerable addition, and is estimated as follows, viz.:—1,400 to 1,500 bales Tsatlee, 100 bales Loong-koong, 200 bales Cumchuck and Lackl ow, 50 bales Kowkong, and about 200 bales of inferior sorts.

ARRIVALS.

At Yokohama.—From Philadelphia, Aug. 27, Rainb

At Shanghai.—From London, Aug. 29, Ambassador, Cybele (str.); 31, Naples (str.); from New York, Charter Oak; from London, &c., Oct. 16, Gordon Castle (str.); 21, Nestor (str.), Agamemnon (str.).

At Hong Kong.—From London, Sept. 7, Teviot (str.); Oct. 20, Glenfinlas (str.), Chusan.

At Batavia.—From Cardiff, Oct. 20, Cape Horn, from Nieuwe Diep; 13, Conrad (str.) from Glasgow Sept. 9, County of Lancaster; 12, Berbice, from Holland; 7, Johanna and Margaretha, Madura (str.); from New York, Aug. 29, Humboldt, from Cape Town; Sept. 9, Vanadis, 12, Heidi.

At Singapore.—From Cardiff, Sept. 13, Akyab, from Algoa Bay; 17, Helene, from Cardiff; Oct. 13, Queen of the Age; 20, G. F. Muntz, from London, Braemar Castle (str.).

DEPARTURES.

From Yokohama.—For New York, Aug. 28, Oleander, 29, Mercury.

From Shanghai.—For London, Sept. 2, Norman Court.

From Hong Kong.—None.

From Batavia.—For Channel, f.o., Sept. 3, Kalaya; 5, Charlotte Lange; 8, Tarquin; for Holland, Aug. 29, Friesland (str.); 31, Minister Fransen van de Putte; Sept. 2, Nieuwe Waterweg II; 5, Nieuwe Waterweg I.; 9, Holland (str.), for New York; 5, Evening Star.

From Singapore.—For London, Sept. 4, John George; 15, Lea Star; for Marseilles, 15, Bedfordshire.

VESSELS LOADING.

At Yokohama.—For New York, H. A. Litchfield; for San Francisco, Hants County.

At Shanghai.—For London, Flamingo (st.), Ascalon Halloween, Tamerlane.

At Foochow.—For London, White Adder, Fiery Crossa, Endymion, Min.

At Hong Kong and Canton.—For London, Ada, England's Glory; for New York, Harriet N. Carleton.

At Batavia.—For Holland, County of Sutherland (str.), County of Bute, Kortenaer, Johanna and Willem, Madura (str.), Johanna and Margaretha, Mrs. J. Van Lennep.

At Singapore.—For Channel, f.o., Adeline; for Marseilles, Chiara, Batavia (str.); for New York, Kate Carnie; for Boston, Nehemiah Gibson.

At Penang.—For London, Bristow.

FREIGHTS AND CHARTERS.

From Yokohama.—To London, by steamer, £4 15s. per ton of 40 cubic feet; sailing vessel, £2 10s. per 40 feet; $4.50 per bale; to New York, by sailing vessel, £2 5s. to £2 15s., per ton; to San Francisco, $8 per ton.

From Shanghai.—To London, by steamer, £2 10s. to £3 per 40 feet; sailing vessel, £2 10s. per 50 feet; to New York, by steamer, £4; sailing vessel, £1 10s. per 40 feet. The rate reported by telegraph is £2 5s.

From Foochow.—To London, by steamer, £3 per 40 cubic feet; sailing vessel, £2 10s. per 50 cubic feet.

From Hong Kong and Canton.—To London, per steamer, £3 5s. per ton of 40cubic feet; sailing vessel, £2 10s. per ton of 50 cubic feet; to New York, sailing vessel, £2 10s. per ton of 40 cubic feet.

From Batavia.—To Channel, f.o., £3 5s.; to Holland, sugar, f.70; coffee, f.77.50; tea, f85 to f.90; tin, f.50 per ton.

From Singapore.—To Liverpool, by steamer, gambier, £3,; sago flour, £2 10s.; to Channel f.o., sailing vessel, gambier, £2 7s. 6d.; sago, £2 12s. 6d.; pepper, £3 5s. per ton.

From Penang.—To London, by steamer, tapioca flour £3 10s.; tin, £1 5s.; pepper, £4; sailing vessel, bag sugar, £2 12s.; pepper, £3 5s.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

Allen—On the 16th Sept., at Singapore, the wife of George Allen, of a daughter.

Layard—On the 13th Oct., at 19, Saumarez-street, Guernsey, the wife of Henry W. Layard, of Ceylon, of a son.

Quelch—On the 6th Sept., at Swatow, the wife of C. B. Quelch, of a daughter.

Reynvann—On the 4th Sept., at Yokohama, the wife of J. M. Reynvann, of a son.

Winter—On the 6th Sept., at Hiogo, Japan, the wife of John Jamieson Winter, of the Hong Kong and Shanghai Bank, of a daughter.

Yorme—On the 17th Oct., at Balham, London, the wife of John Stow Yorme, of a son

MARRIAGES.

Hance—Kneebone.—On the 7th Sept., at St. John's Cathedral, Hong Kong, by the Right Rev. Bishop Burdon, D.D., assisted by the Rev. R. Hayward Kidd, M.A., Colonial Chaplain, Dr. H. F. Hance, H.B.M.'s Vice-Consul at Whampoa, to Charlotte Page, eldest daughter of G. A. Kneebone.

Turnbull—Hardy.—On the 13th Oct., at Oatlands Church, Surrey, by the Rev. J. Corbett Turnbull, M.A., of Cheltenham, father of the bridegroom, assisted by the Rev. R. C. Meade, M.A., Vicar of St. Neot's, Hunts, William Abbott Turnbull, of Shanghai, to Amy Harriet, widow of Harcourt W. Hardy, late of Shanghai, and elder daughter of the late John Henry Kolle, of Park House, Upper Tooting.

DEATHS.

Birley—On the 13th Oct., at Hillside, Kirkham, Lancashire, Alice Constance, infant daughter of Hutton Birley, aged two months.

Fearon—On the 28th Sept., in the Red Sea, on the voyage to Penang, Roger Grey, son of the Rev. Arthur and Lilla Fearon, aged seven months.

Fitzgerald—On the 24th Aug., at Hiogo, Maurice Fitzgerald, aged 43 years.

Sheppard—On the 23rd Aug., at Osaka, Charles Sheppard, C.E., of the Imperial Government Railways, aged 45 years.

In reference to the complaints of the Singapore community as to the despatch of the P. and O. Company's steamers, we understand that instructions have been sent to the agent at that port authorising him to extend the time.

TELEGRAMS FROM THE FAR EAST.

THE DIFFICULTY WITH CHINA.

(Reuter's Telegrams.)

Shanghai, Oct. 18.—The difficulty with China has been diplomatically settled, and Mr. Wade has left Peking.

Shanghai, Oct. 20.—Mr. Wade, in notifying to the Foreign Legations that Mr. Grosvenor proceeds to Yunnan, informs them that while negotiating on this subject at Peking he took the opportunity of insisting upon a better observance of Treaty obligations, especially with regard to the taxation on trade. The Chinese Government agreed, to institute an inquiry and have a report prepared on the subject as a basis for further negotiations. Mr. Wade, however, stated that no new trade convention was contemplated, and that no convention could be operative if negotiated by any one Minister single-handed. It must be accepted by all the foreign representatives alike. The latter announcement has caused some surprise here. No other stipulations have been notified. Mr. Wade and Admiral Ryder have arrived at Shanghai. Mr. Wade is expected to return shortly to Peking.

Shanghai, Oct. 23.—Mr. Grosvenor and Mr. Baber, the British members of the commission of inquiry into Mr. Margary's murder, to be sent to Yunnan, accompanied by Mr. Davenport, will start on their journey to-morrow morning.

(Times' Telegram.)

Shanghai, Oct. 18.—The negotiations are going on satisfactorily The *Gazette* contains an edict referring to Mr. Margary's murder, and declaring the right of foreigners to travel in the interior, and requiring the officials to take cognisance of Treaties. Mr. Grosvenor and Mr. Baker start for Yunan overland. Mr. Wade has arrived at Shanghai.

FOREIGN OFFICE DESPATCH.

A telegram has been received at the Foreign-office from Mr. Wade, dated Shanghai, October 18, reporting that the guarantees which he required and obtained from the Chinese Government before leaving Peking included the despatch of a Mission to England with a letter of apology for the Yunnan outrage, and a safe passage to the frontier of Burmah and across it for the Mission of Inquiry to be sent to Yunnan.

A decree was issued on the 28th September directing the Yamên of Foreign Affairs to consider, with the other Departments of the Government, the question of personal intercourse with the Foreign Representatives at Peking.

Instructions have been issued to Mr. Hart, the Inspector-General of Customs, to report fully on the taxation of foreign trade; and the Chinese Government have engaged that when the inquiry is concluded a competent Chinese officer shall be appointed to confer with a British official on the regulation of the frontier trade between Burmah and China.

A decree was issued on the 10th of October calling the attention of the Provincial Governments to the passport clause in the Treaties, and alluding to the murder of Mr. Margary and the consequent appointment of a High Commission.

Mr. Wade will return to Peking in about a week, after having despatched Messrs. Grosvenor and Baber to Yunnan.

REPORTED LANDING OF WAR MATERIAL AT SHANGHAI.

Hong Kong, Oct. 18.—It is reported that the *Gordon Castle* has landed at Shanghai sixty tons of Henry-Martini ammunition for the Chinese Government, which had been shipped in London as merchandise. The Government is investigating the affair.

Hong Kong, Oct. 21.—The report that the Gordon Castle had landed at Shanghai 60 tons of Henry-Martini amunition for the Chinese Government is confirmed.

SHIPPING POSTSCRIPT.

Arrivals Not in the Tables.—Oct. 22, at London, from Singapore, Empress; from Shanghai, Cutty Sark; October 16, at Amsterdam, from Akyab, Stavanger; 20, at Antwerp, Malleville; 21, at Queenstown, from Rangoon, Pater; 22, at London, from Penang, Cotherstone; 21, at Liverpool, from Rangoon, Savernake; at Marseilles, from Singapore, Emilienne; 22, at Falmouth, from Rangoon, Battistina Madre; Palmyra, from Akyab, Nereid; at Queenstown, from Bassein, for Liverpool, Prince Patrick; 21, at St. Nazaire, from Reunion, Chittagong; 23, at London, from Colombo, Kent; from Shanghai, Menelaus (str.); 25, from Nagasaki, E. Selyn.

Departures.—Oct. 14, from Nantes, for Reunion, Volta; 20, from Southampton, for Batavia, Celebes (str.); 21, from London, for Shanghai, Glenroy (str.).

Spoken.—Gryfe, from London to Hong Kong, Sept. 2, 10 N., 27.35 W.; Cannanore, from Bordeaux to Batavia, Sept. 7, 7 N.. 26 W.

Miscellaneous.—Gibraltar, Oct. 20, passed from Greenock, for Singapore, Pontianak (str.). Table Bay.—Sailed, Sept. 24, Franziska, for Batavia.

Casualty.—Manila: By telegram, dated Hong Kong Oct. 23, Rooda (ship), for London, with sugar and hemp, took fire here, and was scuttled to save her hull; extent of damage not yet ascertained. She is discharging her cargo, all of which is damaged, for survey.

THE MAILS.

Present Inward Mail.—Brindisi, Oct. 21.—The P. and O. Company's steamer Baroda, with the homeward India and China mails, arrived here at 7.30, and the mail left at 9.40 P.M. for London

Heavy Portion of Present Inward Mail.—Port Said, Oct. 18.—The P. and O. Company's steamer Surat left for Southampton at 9 A.M. to-day, where she may be expected to arrive about the 1st proximo.

Next Inward Mail.—Marseilles, Oct. 24.—The Messageries Maritimes steamer Amazone, with the China and Japan mails, arrived here to-day at 2 P.M. Her cargo includes 443 bales of Silk, and 6,600 pac

Digitized by Google

ages of tea, for London, which will be forwarded by the Company's steamer Gange, due about the 9th proximo.

Inward Mail due Nov. 15.—Galle, Oct. 16.—The Messageries Maritimes steamer Anadyr, with the inward French mails from China and Japan, left here to-day for Aden.

Heavy Portion of Last Inward P. and O. Mail.—Southampton, Oct. 18.—The P. and O. steamer Malwa, from Port Said 4th inst., arrived this evening with the heavy India, and China mails, 206 passengers, £41,956 specie, and a large cargo, including 18, 610 chests of tea and 832 bales of silk. She left Shanghai on the 23rd August; Hong Kong, 28th; Galle, 16th September; Aden, 24th; Suez 2nd Oct.; Malta, 8th; and Gibraltar, 13th.

Last Outward P. and O. Mail.—Suez, Oct. 22.—The P. and O. Company's steamer Hydaspes, with the outward China mail of October 7-15, left at 11 A.M. for Calcutta.

Outward Mail of Sept. 24.—Galle, Oct. 18.—The Messageries Maritimes steamer Hoogly, from Marseilles on the 26th of September, left here to-day for Singapore.

Miscellaneous.

THE RUSSIAN EXPEDITION TO CHINA.

The *Russian Invalide* gives details of the Russian expedition to China, under the command of Colonel Sosnovski. It says that the intelligence it gives acquires special importance from the fact that it has been brought from the town of Larng-tjen-fow, in the upper part of the Yellow River (Hang-Hay), *vid* the towns of Harni, Barkul, and Gutchen to the Zaisang Post, in the province of Semipeletinsk, that is, through the whole of Western China. This circuit has been made by Sub-Lieutenant Pavloff, of the Siberian Cossacks, who was entrusted by Colonel Sosnovski with some despatches. The distance from Lang-tjen to the Zaisang Post is more than six thousand li (more than three thousand versts), and Pavloff accomplished it in eighty days, going alone through the district which had been the principal scene of the Dungan rebellion. During his journey Pavloff everywhere met with protection from the local authorities. The despatches which he brought give an account of the journey of the expedition from Hang-kow, *vid* Hang-chung-foo, to Lang-tjen. The expedition left Hang-kow on the 23rd of January, and, attended by Chinese river gun-boats, steamed along the River Hang-tsjan to the town of Hang-chjung-fow. In that town the Russians remained for more than a month, and left it on the 1st of June. On the 26th of June they arrived at Lang-tjen-fow, where the powerful General Tzo-Tzun-Tang, Lieutenant of Hang-see, Chjungeria and of the Eastern Turkestan, received them very kindly. He lodged Colonel Sosnovski in his own palace, and was very well disposed towards the expedition, looking on it, as he told Colonel Sosnovski, as "dear to his heart."

A CHINESE VISITOR IN 1687.

A news-letter from London, dated July 19, 1687, among some seventeenth century documents acquired lately by the MS. department of the British Museum, contains the following account of a remarkable visitor at that time:—

I have been somewhat busy in showing the civilities of the Coart city & Country to a chinese lately come over who is the first man of learning of that country that ever was known to have come into Europe. His Majesty was pleased to be very civil to him himself, & did not only give me his Royal exemple, but did lay his commands on me to do so & do all the friendly offices I could by letting him see what was most proper to satisfy his curiosity by. He came out of China about 6 years ago in the company of some of the missionary Jesuits, and stay'd 4 of them in Italy, the other two in France and Flanders. The occasion of his coming into England was to have the convenience of embarking on one of our East ships and of returning into his own country, with a Genovese Jesuit who goes an apostolique missionair into China to further the conversion of that great people. Our Chinese is a christian by birth his parents having been so befor him, is about thirty-two years of age, of the great town of Nanquin, where the Emperours of China had their palace and residence befor the first Invasion of the Tartars. By profession he is to be a Jesuit and to enter into orders befor he leaves England. The best European language he speakes is latin, tho' he understands french, portuguese, and Italian. Of his own language he understands 14,000 characters, which is a great deal, if compared to the paucity of our characters & words, but if you consider that they have upwards of 50,000 characters in their alfabet it will not appear so much as is necessary to attain to the exact knowledge of the language in all its extension. I sent him about ten days ago to Oxford, where the ingenious men there had a mind to see him & show him some Chinese MSS. of which they have a considerable number in the anniversary Library. Mr. Hide the Bibliothecarian writt to him to favour them with a visit; and tho' he went thither with a design of staying only 4 days, yet he is not yet returnd, this being the 11th day.

THE FOREIGN OFFICE TELEGRAMS.

(Pall Mall Gazette.)

Mr. Wade's telegram just received at the Foreign Office announces the close of what may be called the "acute stage" of our difficulty with China. Besides the guarantees secured by him from the Chinese Government for the due punishment of the murderers of Mr. Margary, he has also required and obtained from them an undertaking "to despatch a mission to England with a letter of apology for the Yunnan outrage," and to ensure "a safe passage to the frontier of Burmah, and across it, for the mission of inquiry to be sent to Yunnan." All this news is as satisfactory as any intelligence of the kind can be, only we must not forget what kind of intelligence it is. Its real value can only be declared by the event. The concessions which it announces are still in the region of promise; and although of course performance cannot in affairs of this kind follow instantaneously upon promise, yet this is rather an argument against undue impatience than in favour of relaxed effort. In short, we must not too hastily infer that our Chinese difficulty is entirely at an end, and that we may now turn away from the subject with a feeling of complete relief. On the contrary, a continued exercise of vigilance and firmness will be requisite to keep the Chinese Government up to their word, and the same sort of pressure which had to be employed to extort the promise must, if necessary, be again resorted to to secure its performance.

So much as regards the gravest and most peremptory of the demands made by us upon China. As regards the others and the concessions accorded to us in respect of them, we shall be wise in assuming a very different attitude. Mr. Wade's telegram contains some important news on this head also. "Instructions," we are told, "have been issued to Mr. Hart, the Inspector-General of Customs, to report fully on the taxation of foreign trade; and the Chinese Government have engaged that when the inquiry is concluded a competent officer shall be appointed to confer with a British official on the regulation of the frontier trade between Burmah and China." It will be observed that Mr. Wade has been satisfied with the undertaking of the Chinese Government merely to take these subjects into consideration, without pledging themselves to any definite concessions; and it must be allowed that, as regards one of these points at least, it would have been unreasonable to ask more than this. The regulation of the frontier trade between Burmah and China would no doubt be attended with serious difficulties of the nature we pointed out the other day; but nevertheless there is no reason to doubt that, if the Chinese Government were really willing to abandon their obstructive policy, they might keep in check the hostility sure to be provoked among the border tribes and the Burmese, as well as their own people, by the opening of this trade route. So far, at least, we are demanding of China something which, though difficult, is possible, and which in existing circumstances it is of high importance to us to obtain. But the question of the taxation of foreign trade is of a very different kind. In pressing for the reform of our principal grievance on this head, we may be demanding something of China which it is not possible for her to perform. Those who have most studied the subject of the Lekin taxation, and have had the longest practical experience of the working of the system, have grave doubts as to the practicability of immediately reforming it. We pointed out the other day the serious difficulties in the way of a step which would amount in effect to the reconstruction of the entire fiscal administration of the whole empire; and, what is more, to its reconstruction out of materials the most inadequate to such an undertaking. For not only is the system of internal taxation under which foreign trade has so long suffered in China a radically vicious system in itself, but it is made worse in operation by the character of the officials who administer it; and to introduce any change in this latter respect assumes the possibility—which, as matters stand, does not exist—of purifying the public service of China. Obviously, no trade can flourish when it is impossible to make any accurate estimate of the amount that will be levied on foreign goods before they reach the place of consumption; but when this uncertainty is due not only to the arbitrary variation of tariffs in the different provinces, according to the particular exigencies of their governors, but to the general corruption of the officials themselves, it is obvious that reform may in certain conditions of a society be impossible. To replace official corruption by official integrity it is necessary that there shall be a sufficient supply of the latter quality to be obtained; and in China, where no public servant can live upon his salary, and where bribery and corruption have become the recognised means of eking out starvation stipends, the supply in question is not to be found. Under such circumstances it is impossible to insist upon immediate reform. A Government cannot be called upon to develop public virtue without a moment's delay, under pain of creating a new international difficulty if it fails to do so. A generation, at least, would be required to make honesty and conscientiousness the habit of Government employés, while even then a first step to reform must be the payment to them of adequate salaries; and to the Chinese Government it would not be very clear where the money was to come from during the process of moral education. On the whole, the difficulties in the way of our claims upon China for internal fiscal reform are serious indeed, if not absolutely insurmountable, and we should in fairness abstain from pressing them to the extent and by the same sort of means in and with which we have pressed our claims for the redress of our other grievances.

OUR RELATIONS WITH CHINA.

(The Times.)

The telegram from our Correspondent at Shanghai gives us at length some definite assurance that, at least for the present, our difficulties with the Chinese Government have been satisfactorily arranged. Upon the whole, the result of these negotiations up to the present time must be deemed the most satisfactory incident in our relations with the Chinese Empire. We endeavoured some years ago, from a sense of justice and from a desire to deal equitably with the Government of a great Empire, to place our relations with China upon a diplomatic footing similar in principle to that on which we stand towards other States. It was, no doubt, an experiment; and there were not wanting those who would have abandoned it on the first occasion of difficulty, and have resorted to our old rough methods of menace and of force. Had such advice been followed, we should probably have been by this time engaged in another miserable war with the Chinese—a war pregnant only with inglorious sacrifices and incalculable responsibilities. A combination of patience and firmness in the assertion, by the usual diplomatic methods, of just demands has vindicated the wisdom of our recent policy. It has been proved, so far, that though the Chinese are more addicted to evasion than the Governments of European States, and are less easily convinced of the necessity of concession, they are open to persuasion, and are capable of realising the

Digitized by Google

necessities of their position. The value of diplomacy is to give time for explanations, and to insure that rash resolutions are not taken in ignorance of the real facts. It was equally just and wise that we should bind ourselves to this method of dealing with so important an Empire, and, having bound ourselves to it, we were as much under an obligation to observe it as the Chinese are under an obligation to satisfy the claims which the same Treaties impose on them. Even if, at the last moment, the Chinese should recoil from the full meaning of their own acts, and if such importations of arms as are reported from Shanghai this week should indicate a disposition to resist, in the last resort, giving full satisfaction to our demands, we shall none the less be clear gainers by our previous patience and moderation. We have already obtained admissions and concessions which will furnish us with a valuable vantage-ground for the future, and to have gained them without war may fairly be regarded as an achievement in the difficult task of dealing with this extraordinary Empire.

(PALL MALL GAZETTE.)

One commentator dilates with pride on the lesson the Chinese are about to receive "respecting both our rights and our power," and thus concludes:—"Mr. Wade has done well at the same time to allow the Chinese themselves to conduct the inquiry, although Mr. Grosvenor is to see that justice is done." But the Chinese will not consider that they are allowed to conduct the inquiry if they are to be controlled in the use of such forms of procedure as law prescribes. As the administration of an oath was imperative in our Courts before the passing of the Declaratory Act, so in certain cases is the application of torture to criminals in China. But can an English official sit in Court and sanction by his presence the application of torture? And if he be not present, where is the security for justice? The first attempt ever made to hold a "Mixed Court" of British and Chinese officials, after the signing of the Pottinger Treaty, came to a deadlock on the ground thus indicated. It appears therefore that, unless it has been determined by previous agreement to override legal forms of procedure established in China by statute and immemorial custom, no judicial inquiry can be conducted by a joint commission of Chinese and English officials; and, if conducted by the Chinese judicial authorities or by Chinese Commissioners alone, there is not much security for justice perhaps. In that case our only hope should be that the real criminals would be induced to confess their guilt, and that Mr. Grosvenor and Mr. Baber, satisfied with such corroborative evidence as they may be able to obtain that the self-accused men were the only guilty parties, would feel justified in accepting a verdict for conviction. But only a sanguine temper can indulge in such anticipations; and, failing a solution of this kind, we are by no means hopeful that the satisfaction we have demanded on this important point—the punishment of the guilty—will in fact be rendered. No doubt it is well within the power of the Chinese Government to give us this satisfaction, if they desire to do so; what we question is, whether it is attainable through a judicial inquiry in violation of all their own established laws of evidence. In minor offences, such as are dealt with by summary process in our own police-courts, both the confession of the offender and the application of torture to extort it may, we believe, be dispensed with at the magistrate's discretion, when other evidence of a conclusive nature is forthcoming. Taking advantage of this, a "Mixed Court" for the trial of minor delinquencies has for some years been established at Shanghai, where a Consular officer sits as assessor, with a deputy of the Che Hien or City magistrate; but in graver charges, involving capital punishment, the duty of the presiding judge, in default of a confession of guilt, is to apply torture in order to elicit the truth, not only from the accused but from the witnesses if necessary. The law in such cases made and provided is held to be barbarous here: but England is not China. Chinese officials declare, as the result of a large experience, that without torture, or the fear of it, neither accused nor witnesses in their country can be expected to speak the truth; and in the administration of their own laws they must have their own way, we suppose.

(ECONOMIST.)

The principal difficulties with China have been these:—1. The unsettled character of most of the districts through which any of the routes would have to pass. The Siamese Peninsula, in almost every part of it, contains the *débris* of numerous races, but more especially towards the north, in the region intervening between the Gulf of Bengal and China. What civilisation there is in this region is of a Chinese type, though China, it was understood, claimed no political sovereignty over Burmah, or what are known as the Shan States lying south-east of it; and it is only recently that the King of Burmah is reported to have made himself a feudatory of China. But, from whatever cause, the whole region, excepting what is under our rule, or forms the centre of the King of Burmah's power, is in a state of more or less complete anarchy. There are numerous hill-tribes—Karens, Khakyens, and others—all split up into many sub-tribes, mutually independent, and ever ready for robbery and brigandage. Western China itself was the scene, for many years, of a great insurrection against Chinese authority, and its frontier to Burmah and the Shan States has been partly, for that reason, peculiarly unsettled. 2. The latent hostility of the King of Burmah, which we became acquainted with at a very early stage of Captain Sladen's mission, was a formidable difficulty. The Burmese monarch, justly or unjustly, seems to have got the notion that our prosecution of trade routes was not favourable to his authority, and, it is also stated, would destroy a monopoly of international trade which he possesses in his own dominions, and which he greatly cherishes. With natural cunning, he did not avow his hostility, but in dealing with such semi-civilised sovereigns, the concealment should not have blinded us to the risk of entanglement we ran in pressing for any route through his territory. 3. There were great physical obstacles to be overcome, even with the best and most favourably-disposed Governments. The region between the Irrawaddi and Western China is singularly mountainous—a wilderness of hills, where the natural engineering difficulties are of a formidable kind. Only a great trade could have paid for the construction of a costly route, and a great trade after all is a speculation—our whole trade with China being last year under twenty millions sterling, notwithstanding the fair number of Treaty ports now open, and their facilities of communication with the interior of China by its great rivers.

(STANDARD.)

We ought not, perhaps, to be surprised to hear that considerable interest has been felt in St. Petersburg in the prospect of hostilities between England and China. There has been a lull in the process of Eastern conquest since General Kauffmann quelled his last insurrection in Central Asia, and the public mind has been exercised by the reports of the British demands upon China and upon Burmah. The prevailing opinion in the Russian capital, as we learn from our Correspondent there is, that any serious collision between England and China cannot have a solution favourable to the interests of Russia, it being feared that Russian trade will be injured by England's obtaining access to other ports and rivers than those which are now open to her. Even if it could be supposed that England entertained any ambition so extravagant as that of obtaining a footing on the Chinese mainland, it would be difficult to show how this could be any menace to Siberia, or to any part of the Russian Empire. We would not, if we could, advance in this direction; nor is there any conceivable object to be gained by such an advance. But we have no such security in the case of Russia in Central Asia. She has advanced, she is advancing, she claims the right to advance. Every step forward is so much added to Russian territory, and a stage towards a country infinitely richer and more valuable—a country on which for generations the eyes of Russia have been notoriously set, and which must be her objective point in all that series of conquests which have marked her presence in Central Asia. If it is nothing else, such an advance is a direct source of anxiety and trouble to our subjects in India, whereas it is ridiculous to pretend that if we conquered the whole of the maritime provinces of China our presence there could possibly be any cause of disquietude to the Russian Government in Asia. There is finally another consideration which we beg to commend to the notice of our friends at St. Petersburg who affect to be uneasy at the prospect of a conflict between England and China. The rights which we have been lately maintaining at Peking are the rights not only of England, but of all European nations. We have not been negotiating, as we did not fight in 1860, for our own interest alone, but for the interest of all other Powers as well. The commercial privileges we are protecting in China are the privileges which we expressly stipulated, with a magnanimity of which, we regret to say, we see no example whatever in Central Asia or elsewhere, should be open to all the European Powers. It would be, therefore, especially unreasonable in Russia to be jealous of what we have done in China, nor is there the smallest parallel between our Chinese policy and that which we find pursued with regard to the independent countries in Central Asia.

We cordially welcome the promise of the continuance of peace between England and China. We have not entertained the alarm which has been expressed by some of our contemporaries at the prospect of another war with China, but we have felt the greatest anxiety that such a struggle should be avoided. Apart from the natural and necessary objections to all wars of this kind, wars in which after all little honour is to be won, and the position of England, however inevitable, can hardly be a proud one, it is on every ground our interest to keep as far as possible on friendly terms with the Chinese people. We go to China not to conquer but to trade, not to seize provinces or batter down cities, but to exchange commodities. We want to secure, if only in that mercantile interest, the goodwill of the industrious people of that vast Empire. We want to close the period of wars, which can profit nobody but just those classes in China whose influence has hitherto been most pernicious to their country. We trust we may hail what we venture to consider the complete compliance by the Chinese Government with Mr. Wade's demands as an assurance that the difficulties we have hitherto had to contend with are removed, that the governing classes understand that we are not to be trifled with when we make serious demands, that the idea of a new war to undo the work of the last thirty-five years is given up, and that the Chinese Government will fulfil, perhaps with some temporary signs of ill-will here and there, the engagements it has entered into with England, and we may add, for the benefit of M. John Lemoinne, with France, Germany, Russia, and the United States.

(DAILY TELEGRAPH.)

The visit of Mr. Grosvenor to Yunnan will place the country folk and officials in the situation of witnesses to the surrender of their Government; just as Lord Elgin's voyage up the Yangtse Kiang was a visible demonstration of our right and power to navigate the inland waters of the Empire. So far, therefore, the Chinese will have in Mr. Grosvenor a palpable proof that the exclusive system has been broken down for good and all. In a political point of view a frank admission of its duties towards foreigners on the part of Imperial China is not less important than the adoption of adequate measures expressly designed and loyally executed to redress the heinous wrong committed in Yunnan. In the memorials addressed to the Emperor counselling extended and continuous relations with foreign courts and nations, especial stress was laid upon the need for machinery, knowledge of processes, and not least upon the want of some acquaintance with science. None of these desirable commodities can be had if the barbarian is jealously shut out, or maltreated when allowed to step over the Imperial threshold. The more enlightened mandarins are plainly hungry for what the outside world alone can supply, and they are as ready to visit as we are to sojourn among them. The foreigner comes, says one of the memorialists, but "we do not go;" yet the intruders will not enter Flowery Land in large numbers, or risk their capital in its soil or mines, unless they are certain of safety to life, limb, and property. If Mr. Wade has finally vanquished the evil spirit of exclusion, and so far overcome Chinese pride as to have won an unequivocal admission that the land is free to alien feet, then he will have performed a service of great magnitude, not only to England, his first care, and to Europe and America, but he

Digitized by Google

will have conferred a genuine blessing upon an Empire which must gain, and cannot lose, by being brought into the community of peoples.

A letter in *The Times*, signed by "A Chinese," says:—It cannot be too generally known that there is a large party in China who, from selfish motives, are ever crying out for war against China. They know full well that one of the immediate consequences of a war with China will be the enhanced value of tea and other articles. They understand perfectly well, as no sensible man can doubt, on which side victory will be should a war be waged between two nations of such a totally different character, and that besides a large amount of indemnity for war expenses to be paid by the defeated nation more privileges and greater concessions for inland trade will be exacted. With such notions in their heads they will ever be glad of any opportunity for picking up a quarrel with China. If they hear of a slight unintentional discourtesy on the part of a mandarin shown to an English official, they put it down as a manifestation of the hatred of all mandarins for all foreigners; if a local disturbance should occur between a foreigner and some natives in some district, they attribute it to official instigation and encouragement. In fact, they will blacken every case so much against my nation as to render it a fit occasion for national vengeance, totally regardless of the bloodshed and horrors of war. It cannot be strongly urged that information coming from such a source, unless confirmed by official despatches, should be received with extreme caution, and the fact that all news from China proceeds from European sources, while nothing emanates from the Chinese themselves, whose interests are unrepresented in Europe and whose views are not known, adds an additional reason that the Press and public should be very careful in dealing with Chinese questions, and should judge such questions on fair and unbiassed grounds.

In reply to this letter Mr. D. C. Boulger writes:—As your correspondent, "A Chinese," says, it is a pity "that Chinese interests are unrepresented in Europe, and that their views are not known," and undoubtedly there is no inconsiderable advantage in having their point of view submitted to us, as in his letter. It is no less to be regretted that the English point of view is not appreciated in China. Chinese can come here with perfect impunity to understand us; can English go with safety beyond Hong Kong or Shanghai? It may or may not be that there is a large party in China—of our merchants—who desire war from selfish motives; but even if such is the fact, it is an idle protest to deduce therefrom a predisposition to war on our part, while it is really quite beside the present discussion. Our demands are founded simply on "official despatches," and chiefly consist of reparation for the murder of a Government official, with whose fate—no matter how they personally may sympathise—merchants' interests have nothing whatever to do. The "slight, unintentional discourtesy" seemed so flagrant to Mr. Wade, who all Englishmen must now admit thoroughly comprehends the Chinese character, that he departed the moment etiquette required, and declined to return even at the earnest solicitations of the Mandarin. As to our being "totally regardless of the bloodshed and horrors of a war," our whole attitude throughout this crisis belies such an insinuation, and indeed this assertion is another proof that your correspondent labours under a complete misapprehension of the state of affairs. His appeal is ill-timed, because unnecessary, and seems to be attempting to put China in the light of the injured party.

The Times of Friday publishes another letter from "A Chinese," in which he says:—I have noticed in *The Times* the letter of Mr. D. C. Boulger, who animadverted on that of mine to which you kindly gave insertion on the previous day, and who appears to have entirely misunderstood the drift of my note. I made no allusion whatever to the lamentable case of Mr. Margary, whose murder I deplore as much as his friends and relatives do, and I did not in the least attempt to justify or palliate the crime of that murder. Neither did I attribute a "predisposition to war" to the people in England as interpreted by Mr. Boulger, and if he peruses my letter again calmly and impartially, he will find that it could not bear that construction. What I protested against is the habit of circulating exaggerated reports concerning China affairs by some people in China, with a view to serve their selfish ends. I do not wonder that great agitation and excitement are often unnecessarily raised in England over any difficulty or misunderstanding with China; my wonder is that a fourth war had not long before been declared against that country.

"An Englishman" also writes to the *The Times*, and says:—The letter of "A Chinese" must only be accepted as the expression of opinion of a native of China influenced, naturally and honourably, by patriotic feeling, and probably possessing very limited opportunities of studying British sentiments and politics. Permit me to offer to your readers an extract from the letter of a fair specimen of the British merchant, long resident in China—no mere shipper or speculator, but the head of a respected firm of long standing:—"There is a very uneasy feeling about our relations with this Government, the murder of Margary being, of course, the main point, which we most anxiously desire to know the intentions of our own Government about; but there are numerous other matters continually cropping up that show, I think, beyond a doubt that the Chinese are falling back into the old hostile and contemptuous position towards foreigners which, in my opinion—and I have said and written it dozens of times in past years—dates distinctly from the Tientsin Massacre, an awful and almost unheard-of outrage, fully equalling, if not surpassing in terror, the Cawnpore murders, and which, from the terrible events then passing in France, excited but little notice, and was not followed, and never has been visited, with the slightest punishment or reparation. A few coolies had their heads cut off, and their families were compensated by money and grand funerals. No doubt there is a tendency, in dealing with barbarous nations, to sit upon them, and, as in India, to talk about thrashing the 'niggers' for their impudence, but I really do not think this is the case with merchants in China. We are grossly misrepresented occasionally, and strong efforts have, I know, been made to represent us generally as bold smugglers, determined to thrust opium down the Chinaman's throat, or perish in the attempt. Now remember, if you ever hear the subject spoken of, that nowadays there is only one house in China which can be said to have any trade in opium at all, and many of the largest houses never had an interest in a chest of opium in their lives. But I believe myself that as reasonable men and as friendly disposed to the Chinese Government are living in China as can be found anywhere; and more than that, some of the most influential men here have strong tendencies towards the native; and, indeed, if people could only use their commonsense, it must be so. War and commotions cannot improve our trade, and it must be a very short-sighted man who could think that a stoppage of the tea or silk trade, which might temporarily enhance the price of these things, could really be of any general advantage. The loss to the producers would react upon us, and our imports would suffer to as great, if not a far greater, extent. However, so it is—a very uneasy feeling exists; there is a general unfriendliness that I hardly think I ever saw before—certainly not when we took Peking; and as a small but significant evidence I have heard several old experienced hands, among whom I may, I think, count myself, speak doubtfully about going on our shooting excursions next winter. And this in the districts we have been in the habit of looking on as our own particular friends—the country we rescued from the hands of the rebels, and restored from a howling wilderness to a state of great prosperity and comfort. I think almost everything depends now on whether we exact and insist on a most signal reparation for Margary's murder. If this be done—and no humbug, like the Tientsin Massacre business—we may disregard the smaller causes of irritation, which are perhaps only signs of the times and the growing arrogance of the Chinese. If not, I am afraid before long we shall have some great trouble; and if both people get their blood up, the consequences will be fearful."

The subjoined letter appears in the *Pall Mall Gazette*, with the signature "D.":—I had hoped that your remarks on the "hobgoblin of Chinese anarchy" which has been so frequently of late held out as an inevitable result of a war with China would have set the bogie at rest; but since it has been again stalked out, sheet and all, in a leading article in *The Times*, will you allow me to emphasise your observations by showing from recent history how baseless is the superstition? The hobgoblin was coined in the first instance out of the fertile brains of Chinese mandarins. It has been used with more or less effect on numerous occasions when treaties and international rights have been subjects of discussion between Chinese officials and the Foreign Ministers, and never has it been more successfully employed than since the conclusion of the last treaty. But how has the belief been justified by events? The last war, which, according to these prophets of evil, was to shake the empire to pieces, did not give rise to a single disturbance or rebellion through all the length and breadth of China. It is true that the withdrawal of troops from the central provinces to oppose us in the north gave fresh vigour to the Taeping rebellion, but no new outbreak occurred anywhere, nor was any fresh attempt made to overthrow the existing Government. On the death of the Emperor Hien-fung in the following year, the *coup d'état* effected by Prince Kung, by which he overthrew the Council of Regency appointed by the Emperor and put the two leading members to death, and which in any Western land would have produced divisions and disorders at Court and throughout the country, gave rise to no commotion of any kind either at Peking or in the provinces. And when, again, on the decease of the late boy-Emperor, the Dowager Empresses seized the reins of power and arbitrarily appointed a child to succeed who was by no means the nearest heir to the throne, their decree was carried into effect without any outward sign of disturbance or dissatisfaction. And if the three events I have mentioned—a disastrous foreign war, followed almost immediately by a revolutionary *coup d'état*, and later by a violent suspension of the laws of succession—have not only not "shaken the empire to pieces," but have not for a moment disturbed her equilibrium, is it reasonable to insist that another war would inevitably bring about all the disasters which these alarmists are for ever picturing in their imaginations? The Chinese are the most easily governed people in the world, and China is consequently less liable to prolonged revolutionary movements than almost any other country. This is sufficiently proved by the one broad fact that the system of government which was established more than 2,000 years ago has survived the overthrow of dynasties and all the vicissitudes of fortune to which the Empire has been exposed during those many centuries.

The Times has the following on the Foreign Office Despatch:—

It is satisfactory that the Foreign Office should publish the official information it has received of the result of Mr. Wade's negotiations at Peking, even though the intelligence arrives three days later than that which we received from our own Correspondent at Shanghai. The substance of his communication was contained in the telegram we published on Tuesday, coupled with the subsequent telegrams through Reuter's Agency; but it is well to be assured, by further details, that the result of the negotiations as understood at Shanghai corresponds with the interpretation placed upon it by our own Minister and announced to our own Government. The additional details thus made known will enhance, in most respects, the favourable impression already created, and it is at least evident that the Chinese Government has been made to feel the necessity, not only of making amends for Mr. Margary's murder, but of treating foreigners and foreign trade for the future in a more just and friendly spirit. Mr. Wade has not been contented with simply demanding reparation for the particular outrage in question; he has taken the opportunity to obtain valuable concessions on the principal points of importance in our relations with China, and he has sought these concessions, not as special favours to Great Britain, but as a just recognition of the rights of all foreign Powers. His vigilance will still be needed in order to see that the promises of the Chinese Government are not rendered nugatory by delay or evasion; but in procuring a reconsideration of the manner in which our official relations with the Empire are conducted, of the taxation of foreign trade, and of the general treatment of foreigners in the interior, he must certainly be allowed to have made good use of his opportunity.

LONDON: MONDAY, OCTOBER 25, 1875.

THE CONGRESS OF FRENCH ORIENTALISTS.

To the regret of all who take an interest in the promotion of Oriental studies, it was found impossible to arrange for a meeting of the International Congress this autumn, as had been proposed, and its next session has consequently been deferred for a year; but the friends of the movement in France, who have from the first shown themselves most zealous in the furtherance of its objects, are evidently not content to remain idle in the meantime. For a long time past they have set a good example to other European nations by the activity which they have displayed in the cultivation of the study of the languages, literature, &c., of the Far East—an activity to which it has given us much pleasure to draw attention from time to time in our columns, and which we trust that our own students will emulate before long. Taking the lead, again, in the matter, the French Committee of the International Congress of Orientalists has, by a recent resolution, decided to transform itself into a permanent institution, under a distinctively national title. This new association, we are informed, has it in contemplation to prepare works for the periodical meetings of the International Congress, and generally to promote, by all the means in its power, the study of Oriental languages in the French department, following in this respect the example which has for some years been set by Germany. With the view of carrying out this idea effectually, the Committee in a recent Inaugural Session resolved that the first Provincial Session should be held in Saint Etienne, Loire, on the 19th inst. The Proceedings of the Inaugural Session referred to have been published in an octavo volume, containing numerous plates; and, among other important contributions to it, we may mention "An Address on the Decentralization of Oriental Studies in France," by the President, Professor Leon de Rosny; "A Vocabulary of European Words derived from the Malay Language," by Aristide Marre; a curious Japanese poem on Charlotte Corday, translated by Nomura Noakagu; a paper on the Japanese poetess Komati, by Baron de Ravisi, with seven coloured portraits of the poetess; a translation by Emile Burnouf of a book of the ancient Chinese Geography, "Shan-hai-king," a compilation which, by the way, some scholars look upon with distrust; a translation by M. Leon de Rosny of the Japanese History of Taikosama; a translation by Paul Ory of the notice on Kiao-che (Cochin-China) in the "Tung-se-yang-kao;" "The Women of Central Asia," by Leon Cahan, a learned traveller in Turkestan; and "A Journal of a Residence in Japan," by M. Madier de Montjau. The meeting appointed for the 19th instant has been organised under the auspices of the Municipal Council of the Department of the Loire, and is expected to be an attractive one to all who are interested in Oriental studies. During the session of the Congress it would appear that the town of Saint Etienne will be *en fête;* and among other matters of interest it is intended to open an exhibition of Oriental industries, and some performances of Oriental dramas will take place at the theatre. In a future issue we shall hope, by the courtesy of the same correspondent to whom we are indebted for most of the foregoing information, to be able to give our readers some account of the work done at this session of the Congress of French Orientalists, which has our best wishes for its success.

THE LATEST TELEGRAMS FROM CHINA.

The telegrams forwarded by Reuter and from the Foreign-office, which are given further on, lifts at last the veil from over the proceedings of the British Minister at Peking, and show how far he has succeeded in his endeavours to bring the Chinese officials to reason, and to induce them to institute a proper inquiry, and to afford the reparation due for the murder of Mr. Margary. We are told that "while negotiating "upon the subject at Peking he took the opportunity of "insisting upon a better observance of Treaty obligations, "especially with regard to taxation on trade." We can only say that, while the object is a most desirable one, the opportunity is a very bad one. It would no doubt have been extremely desirable, after the affair with reference to Mr. Margary was settled, for the Minister to insist generally upon better observance of the Treaty, especially with reference to the protection of foreigners, and the securing their commercial rights in China; but to raise any side issue pending the negotiations with reference to so serious a matter, was a mistake of such a character as we should scarcely have expected to find a Minister of Mr. Wade's experience falling into. It was, in fact, precisely to play into the hands of the Chinese, who would only be too glad of anything which would divert the negotiations from their direct object, and would afford them a chance of bartering the promise of future concessions against their failure to act up to present responsibility. No step could tend more clearly to weaken Mr. Wade's position than swerving either to the right or the left from the immediate matter in hand. If anything were wanting to show this, it is the simple fact that it is necessary to notify the other Foreign Legations at Peking with regard to any steps taken to alter our Treaty relations would open a question in which the representatives of other nations would be entitled at least by courtesy to be consulted, whereas the matter actually in hand was one which concerned the British Government alone, and in regard to which we were entitled to act by ourselves. It is surprising to read that Mr. Wade has declared that no new Trade Convention can be operative if negotiated by any one Minister single-handed. The doctrine is new and incomprehensible, and if it indicates the existing diplomatic rule at Peking, it promises badly for the hope of any future revision of our Treaties. But if there is any understanding at all of this character, it is a most serious mistake for Mr. Wade to take the question of obtaining reparation for the murder of Mr. Margary out of the category of matters in which he had to be guided alone by his own judgment and his instructions from the Foreign-office, and, by mixing it up with negotiations of a general character, to place it in the category of matters in which he is compelled to consult the other Ministers, and to some extent also Mr. Hart, the Inspector-General of Customs, and so of necessity weaken at once the dignity of his position and the force of his representations.

AWARDS BY THE JURY OF THE GEOGRAPHICAL CONGRESS, PARIS.

The list of prizes and honourable mention at the second sitting of the *Congrès International des Sciences Geographiques* contains the following awards for works connected with the Far East:—To the Geographical Office of the Government of Yedo, a medal of the first-class for a collection of maps of the different provinces of Japan together and in detail; to M. Dumas Vorzet, medal of first-class, for his map of the basin of the Nile; to the Japanese Legation at Paris, honourable mention for maps of the Court of Japan; to the *Compagnie de Chemin de Fer entre la France et l'Angleterre*, letters of distinction for the services which the work they have undertaken with so much enterprise and resolution is destined to render not only to the countries bordering on the Channel, but also on the larger portion of the transit from the extreme East, or from Central Europe to England or the United States; to the Great Northern Telegraph Company at Copenhagen, letters of distinction for (*inter alia*) establishing communication between Siberia, China, and Japan, but, above all, the laying the line between Amoy, Hong Kong, Shanghai, Nagasaki, and Wladiwostock, to Mr. Thompson, medal of the second-class for his Journey

Digitized by Google

in China; to Mr. VENIOUKOFF, medal of the second-class for Explorations in Asia, and Voyages in Siberia, China, and Jadan; and to Lieutenant-Colonel GORDON and Captain CHAPMAN, medals of the second-class for their works on Central Asia. The distribution of distinctions has evidently been made in a thoroughly cosmopolitan spirit, each nation being rewarded strictly according to its merits. It is gratifying under the circumstances to find that Japan, in whose progress all must take interest, receives so much honourable notice. We observe that the jury gives the credit of first devising a plan of sending telegrams in Chinese to the Great Northern Telegraph Company. We believe, however, that this credit is due to Dr. MACGOWAN, of Shanghai, who was the first to hit upon the idea. The system consists, we believe, in registering the characters and telegraphing the registered number of those it is desired to transmit, a matter which is not difficult, as about 3,000 Chinese characters suffice for all ordinary purposes of writing or business. The idea, however, though simple, is undoubtedly ingenious, and we think the credit of its first conception ought to be given in the right direction.

THE address which was made by Governor GREGORY to the Legislative Council at Ceylon has attracted some attention here. On the whole it is considered satisfactory, but some disappointment has been expressed at the protracted delay in extending the railway into Dimbulla after its necessity, feasibility, and its advantageous character as an investment have been demonstrated. The construction of only seventeen miles of railway in a colony so prosperous as Ceylon, and so progressive in other respects, is certainly not much to boast of. We are informed that Mr. BATEMAN'S scheme for a water supply for Colombo, to cost over £200,000, is still under consideration at the Colonial-office; but it is stated that Lord CARNARVON is inclined to consider it too large a work for such a colony as Ceylon. No appointment has yet been made of a successor to Sir EDWARD CREASY, the late Chief Justice of Ceylon; and we believe that, notwithstanding the great outcry on the part of the colonists on his retiring pension, no alteration in the amount will be made. We quite agree with the Colonists that they should have been consulted in the matter before such an enormous tax had been settled upon them.

AS may naturally be expected, some surprise has been expressed by the appearance in all the daily papers of a telegram sent through REUTER to mention that the steamer *Gordon Castle* had landed a large quantity of arms for the Chinese Government. The announcement, however, does not afford any special, or, at all events, any new ground for alarm, as it is well known that for a long time past the Chinese authorities have been receiving consignments of arms, and have at the present moment agents purchasing munitions of war in large quantities both in England and on the Continent. It seems rather strange, therefore, that an individual consignment should have been thought worthy of a special telegram, unless there be something connected with the matter which has not yet leaked out.

WE understand that the Japanese Minister in Paris, SAMESHIMA, will return to his post in May next. Mr. MEURICE BLOCH, the well-known statistician, is appointed to represent the Japanese Government at the Congress to be held at Pesth next March.

JAPONISM.

At the beginning of August we drew our readers' attention to an interesting letter on this subject from M. Philippe Burty, one of the *Academy's* Fine Art correspondents at Paris, who is a devoted admirer of all that relates to Japan. In its last issue our contemporary has published another communication from him, in which he "glances at the translations and books which have lately appeared to improve our acquaintance with that charming land." We subjoin a brief abstract of this paper:—

M. François Turretini, already known in connection with the "Heike Monogatari," and his translation of the novel "Komats et Sakitsi," is now publishing at Geneva two collections of articles by himself and other Japanese and Chinese scholars; they are coming out irregularly in numbers. One (quarto) is called "Atsumi Gusa," another (octavo) "Ban-zai-sau;" the last number contains "l'Histoire de Taira," taken from the "Nit-pon Gwai-si," a popular story of the beginning of this century. This number "explains many of those scenes made so familiar by those works which are the glory of Japanese art,—porcelain, albums, ivory, iron, lacquer-work, and the rest." Mdme. Judith Gautier, the eldest daughter of Théophile Gautier, who has already published a "book of Chinese poetry, called 'Livre de Jade," and an extremely original Chinese novel, "Le Dragon Impérial," has just issued a two-volume novel, entitled "L'Usurpateur," and founded on a Japanese subject. "Japan," says M. Burty, "suits her natural genius as well as China, and gives her the same opportunity of displaying a thoroughly artistic learning. In some respects the personages are rather French. . . . . But the scenery in which she places them is worthy of the beautiful albums whence she draws her inspirations." We hope we are not wronging Mdme. Judith Gautier, but we have an uncomfortable sort of idea that her Chinese "literary adviser" was not exactly a member of the Han-lin-yüan! M. Burty next devotes a couple of paragraphs to the Provincial Congress of French Orientalists and its recently-published report, with regard to which we have already ourselves been able to furnish our readers with fuller particulars. M. Madier de Montjau's pamphlet, "Extérieur Comparé des Chinois et des Japonais," is afterwards briefly alluded to. "Japonism," continues M. Burty, "is beginning to be everywhere in the ascendant." M. L. Serrurier, of Leyden, has just sent us a translation and exact reproduction of the chapter on Quadrupeds, and of the first part of the chapter on Birds, in the popular Japanese Encyclopædia, called "Kasira Gaki."

The translation is published in two numbers (in quarto, E. I. Brill, Leyden), and presents a most attractive appearance, both as regards the letter-press and facsimile engravings . . . . M. L. Serrurier dedicates his admirable translation to his master, Dr. Hoffmann, who may be said to be the father of Japanese studies in Europe. In completing his list of the works on Japan lately published in France, M. Burty devotes some space to "Les Quatres Campagnes Militaires de 1874," by Edmond Planchet (Michel Lévy, 1 vol.). The first four campaigns are the French expedition to Tonkin, the English to the Gold Coast, the Dutch to Sumatra, and, finally, that of the Japanese to Formosa. In conclusion, M. Burty expresses an opinion that it "looks very much as if the active part reserved for the Japanese to play in the destinies of the extreme East would begin with an expedition into Korea, an expedition which, it would seem, is already on the eve of being undertaken." M. Burty writes pleasantly and amusingly on Japanese matters, and though he does not always adhere very closely to his text, we shall be very sorry if his attention be too "completely engrossed by exhibitions and public sales" to admit of his having any spare time to devote to further contributions on Japonism.

A NEW USE OF STEAM LAUNCHES.

We all know the great importance which the Chinese attach to the due performance of their old-world superstitious, and that for generation after generation they have always observed them in the same manner as did their forefathers hundreds of years ago. Knowing this, it is very amusing,—and indicative, perhaps, of the coming era of changes, when China shall be transformed into a progressive empire,—to see how one of the appliances introduced by the outer barbarian has suddenly made its appearance at one of their festivals. The occurrence we allude to is mentioned by a correspondent of the *North China Herald* as having come under his notice at Shanghai last August. About that time the Chinese celebrate what they call the "Shao-i-chieh" or "Feng-shui-têng"; "this is a yearly observance, and priests and other officials go afloat in boats, accompanied by the relatives of the drowned persons, beating gongs and burning incense paper, which is thrown into the water. The boats have hitherto been separately yulohed, but at the performance of the rite on Wednesday evening last they were towed in line by a steam launch." This is certainly a very remarkable innovation on "old custom," and shows that at last the Chinese are beginning to appreciate labour-saving apparatus. After this we may not improbably hear of the festival of Dragon Boats being done by steam, unless indeed "Fêng-shui," comes to the rescue, and puts a stop to it as being too perfunctory a way of observing the feast.

JAPAN.

(REPORT OF THE POSTMASTER-GENERAL.)

We have received a report of the Postmaster-General of Japan for the year 1874, from which we find that the total revenue was 352,244.89 yen, and the total expenditure 502,190.71 yen, making a deficit of 149,945,82 yen. We extract the following from the report:—

In the gross estimate of the revenues and expenditures for the eighth year of Meiji (1875), the estimated deficiency is 90,000 yen. The deficiency for the ninth year of Meiji (1876) will be probably much greater for the following reasons:—

1. The postal routes to be hereafter established will extend through the remotest and most uncivilised portions of the

Digitized by Google

Empire, where the routes will be the longest and the mails the smallest; such, for example, as the routes to the Loochoo Islands. The expense of transmitting mails over such routes will be very considerable, while the postages collected will be very inconsiderable.

2. The Post-offices in all Provinces are owned by the Postmasters, whose salaries are very small, and entirely insufficient to compensate them for their services alone. For the present, however, they are satisfied with the small payments made them, because they are proud of being employed in the service of the Government, and, understanding the true object of the establishment of the Postal System, they deem it honourable to voluntarily perform such duties as tend to benefit and promote the welfare of the public. It is to be expected, however, that the spirit of our people will change, and they will become more mercenary. For this reason the Department will doubtless find it necessary to erect its own Post-offices, as well as to increase the salaries of the officials connected therewith.

3. The issues of newspapers are continually increasing, but the expense attending their transportation amounts to more than the postages collected thereon, the general average being five times the postage. For example: the cost of transporting a packet of newspapers from Tokio to Osaka overland averages fourteen yen, while the postage is between two and three yen. It therefore appears that the expenditures of this Department will increase as the mail increases, and as the Postal Service becomes more extended.

Table showing the number of letters, newspapers, books, patterns, &c., transmitted in the mails during the seventh year of Meiji (1874).:—

Letters ordinary	16,728,025
Do. registered	268,577
Newspapers	2,629,648
Books and Patterns	33,824
Free Mails	178,109
Letters containing valuables	95,235
Dead Letters	3,227
" " returned to writers...	778

During the year money belonging to the Government to the amount of yen 562.37, and stamps to the value of yen 770.42 were stolen from post-offices, and the mails were robbed of yen 1,085.13. The persons who robbed the post-office of yen 557 of Government money and the mails of yen 1,035.50, and all the stamps mentioned above, having given themselves up and confessed, a request has been made to the Judicial Department for the reimbursement of the said amounts, but no answer has as yet been received. Another person, who had stolen 27 yen, voluntarily confessed and paid back the money to this Department. The number of letters stolen during the seventh year of Meiji was 540; of these 366 were regained and have been delivered intact, 14 are not yet delivered, and 160 are lost; 24 letters were lost in consequence of the carriers having been threatened by robbers, and in other ways.

CUSTOMS' REPORT ON THE TRADE OF CHINA.

The *Customs Gazette* for the quarter ending June, 1875, supplies the following statistics of the trade at the various ports as compared with the corresponding period in 1874:—

NEWCHWANG.—The tonnage figures entered and cleared show a large increase; the imports of cotton goods, metals and native sundries are also much higher; the exports have advanced considerably; the revenue figures are Tls. 81,033.0.9.1 against Tls. 73,818.0.4.8.

TIENTSIN.—The tonnage figures entered and cleared are higher; the imports of cotton goods have decreased, while metals and native sundries have advanced; the exports are lower; the revenue figures show a falling off, being Tls. 84,541.2.6.5, against Tls. 104,026.9.1.5.

CHEFOO.—The tonnage both entered and cleared has slightly increased; the imports of cotton goods and metals have decreased; native sundries are in advance; the exports are also higher; the revenue figures show a decrease, being Tls. 69,960.8.7.8, against Tls. 80,378.2.9.9.

HANKOW.—The tonnage figures entered and cleared are much lower; the imports of cotton goods have decreased, while metals and native sundries have both advanced; the exports have increased considerably; the revenue has also increased, the figures are Tls. 711,417.1.6.7, against Tls. 588,540.1.4.7.

KIUKIANG.—The tonnage entered and cleared has decreased; the imports of cotton goods and native sundries are less, metals show an increase; the exports are in advance; the revenue figures are also higher, being Tls. 276,161.6.3.3, against Tls. 244,451.1.0.7

CHINKIANG.—The tonnage figures entered and cleared are much less; the imports of cotton goods have also decreased, metals and native sundries have both slightly increased; the exports are in advance; the revenue figures are Tls. 40,049.0.2.5, against Tls. 32,187.9.4.

SHANGHAI.—The tonnage entered and cleared has considerably increased; the imports of cotton goods, metals, and native sundries have also increased; the exports are very much in advance; the revenue figures are less, being Tls. 788,628.8.6.4, against Tls. 825,264.2.7.7.

NINGPO.—The tonnage entered and cleared is much higher; the imports of cotton goods and native sundries have decreased, while metals are in advance; the exports are also higher; the revenue shows an increase, the figures being Tls. 114,683.8.2.1, against Tls. 104,844.2.5.0.

FOOCHOW.—The tonnage figures entered and cleared are in advance; the imports of cotton goods and native sundries are also higher, while metals show a decrease: the exports have increased; the revenue figures are Tls. 473,205.2.3.0, against Tls. 422,015.3.7.4.

TAMSUI (FORMOSA).—The tonnage entered and cleared is less; the imports of cotton goods and native sundries show a decrease, metals are somewhat higher; the exports are also in advance; the revenue is less, being Tls. 30,972.5.5.0, against Tls. 33,283.8.2.7.

TAKOW (FORMOSA).—The tonnage figures entered and cleared are much lower; the imports of cotton goods and native sundries are also less, while metals are in advance; the exports have decreased; the revenue figures are Tls. 37,551.5.4.5, against Tls. 51,183.0.8.0.

AMOY.—The tonnage entered and cleared has slightly increased; the imports of cotton goods and native sundries are also in advance, while metals are lower; the exports are very much less; the revenue figures are not so high, being Tls. 102,729.3.0.1, against Tls. 107,932.8.1.3.

SWATOW.—The tonnage figures entered and cleared are higher; the imports of cotton goods and native sundries have increased; metals show a slight decrease; the exports are in advance; the revenue is Tls. 193,750,1.2.6, against Tls. 193,679.8.6.3.

CANTON.—The tonnage figures entered and cleared have increased; the imports of cotton goods and native sundries are much in advance, while metals have decreased; the exports are also very much lower; the revenue figures are higher, being Tls. 232,057.4.8.7, against Tls. 227,930,2.7.4.

Literature.

The Map of Europe by Treaty; showing the Various Political and Territorial Changes which have taken place since the General Peace of 1814. With numerous Maps and Notes. Three Vols. By EDWARD HERTSLET, C.B., Librarian and Keeper of the Papers, Foreign-office. London: Butterworths; and Harrison. 1875.

The object at which Mr. Hertslet aims in this important work is to enable the statesman and the student, and more especially the English statesman and the English student, to ascertain accurately the changes that have taken place, by Treaty, in Europe since 1814, and how these changes have been brought about, and with this view he has classified all the necessary documents in a complete and connected form. This work is comprised in three thick octavo volumes, containing upwards of 2,400 pages, so that it will readily be seen how impossible it is for us to do full justice to a work of such magnitude within the limits of a necessarily brief notice. We can only pretend to indicate its scope and the vast amount of labour which has been expended on it.

The documents brought under our notice in these volumes, which, in defining the landmarks of Europe, constitute the title-deeds of the European family, are entirely arranged in chronological order; "each Paper has a distinctive number, and where references are made in one document to a previous one, the number is referred to, and not the date, but where subsequent documents are referred to in the notes, the dates are given, and not the numbers." The latter is a slight drawback, perhaps, but it was found impracticable to attempt to number the Papers beforehand. "Each Treaty is preceded by a Table of Contents of the subjects contained therein, and each Article has a descriptive heading, whilst a sub-heading at the top of each page is given to denote the subject of the document, or the name by which the Treaty is generally known."

Vol. I. embraces the period from 1814 to 1827, and contains among other important documents, the first and second Treaties of Peace of Paris, signed in 1814 and 1815; the Vienna Congress Treaty; the General Treaty of Frankfort of 1819; the Treaties of 1825 to 1827 relating to the separation of Greece from Turkey, &c. Vol. II. embraces the period from 1828 to 1863, and contains, amongst others, the following important Documents: The Treaties, &c., relating to the Turco-Russian war of 1828; the separation of Belgium from Holland in 1831; the incorporation of Poland with Russia in 1832; the Pacification of Spain and Portugal in the same year; the Convention respecting the Straits of the Dardanelles and Bosphorus of 1841; the Territorial arrangements of Italy in 1841 and 1847; the war between Turkey and Russia in 1853; the Crimean War, 1854 to 1856; the Conference of Paris of 1856; the General Treaty of Peace with Russia of March 30, 1856; the Redemption of the Sound Dues in 1857; the organisation of the Principalities of Moldavia and Wallachia in 1858; the war between Austria, France, and Sardinia in 1859; the Treaties of Villafranca and

Digitized by Google

Zurich of the same year, by which Lombardy was ceded to Sardinia; the annexation of Savoy and Nice to France, and of Tuscany, Modena, Naples, Sicily, &c., to Sardinia in 1860; the withdrawal of the British Protectorate over the Ionian Islands in 1863, &c. Volume III. embraces the period from 1864 to 1875, and contains the Treaties and other documents relating to the Amelioration of the Condition of the Wounded in War (1864); the Conference in London relative to the War between Austria, Prussia, and Denmark (1864); the Schleswig-Holstein Conventions of 1864 and 1865; the Austro-Prussian War of 1866; the Treaty of Prague and of Vienna (1866), by which the Lombardo-Venetian Kingdom was ceded to Italy; the Annexation of Hanover, Hesse-Cassel, &c., to Prussia in 1866; the Dissolution of the Germanic Confederation (1866), the Formation of the North German Confederation (1867), and of the German Empire in 1871; the Luxemburg Treaty of 1867; the Franco-German War of 1870-71, and the Treaties ceding Alsace and Lorraine; the Abrogation in 1871 of the Black Sea clauses of the Treaty of Paris of 1856; the Final Protocol of the Brussels Conference of 1874; and the Proposals for reopening the Conferences in 1875, which were declined by the British Government.

In order that his volumes might be as useful as possible, and that some of the Treaties might be made more intelligible, Mr. Hertslet has inserted a number of maps, which are remarkable for their clearness and general excellence. Special maps, too, have been added, showing the status of Europe in 1815 and 1875. The whole work is in English throughout, all Treaties originally signed in foreign languages having been carefully translated, where this had not been previously done in presenting the papers to Parliament. In an Appendix Mr. Hertslet furnishes copies of or extracts from Treaties concluded before 1814, but alluded to in this work as being still in force, "as well as a reference to the volumes of State Papers, in which will be found extracts from and references to other documents which it was not thought necessary to insert in the body of the work in their order of date." Immediately following the Appendix is a List of Treaties, &c., between Great Britain and Foreign Powers for the Maintenance of the Peace of Europe, and for the Settlement of European Questions.

The Index, which extends to some 300 pages, and appears to be complete in every possible particular, will be found most useful to students of the book. Mr. Hertslet himself looks upon it as forming an important feature in his work, and tells us that it has been prepared on an entirely new plan, giving full reference to every *name* as well as to every *subject* mentioned in the several Treaties, and other documents contained in the three volumes.

Mr. Hertslet's name and reputation in connection with other works of a similar nature will be ample guarantee that "no pains have been spared to ensure accuracy," and that long and patient labour have been bestowed upon the volumes before us in order "to make 'The Map of Europe by Treaty' a complete and satisfactory work." He desires it to be understood that he himself is solely responsible for the selection of the papers, the correctness of the translations, and the accuracy of the maps and notes. For our own part, we have no hesitation in expressing our conviction that Mr. Hertslet's elaborate and carefully digested work will be found of the utmost value by, and ought to be in the hands of, not only every statesman, but every individual—be his nationality what it may—who desires to obtain a clear conception of the political and territorial changes of Europe during the past sixty years.

We hear that the Rev. Thomas M'Clatchie, M.A., of Shanghai, has in the press, and hopes to publish next month, a translation of the "Yih King," or Book of Changes, which, as Mr. Wylie tells us, in his "Notes on Chinese Literature," is regarded with almost universal reverence, both on account of its antiquity and also the unfathomable wisdom which is supposed to lie concealed under its mysterious symbols. We think Canon M'Clatchie will probably avail himself of the opportunity thus afforded him to reply to Mr. Chalmers' remarks in the May-June num- of the *China Review* on the explanatory notes attached to his translation of the "Forty-ninth Section of the Complete Works of Choo Foo-tsze," published last spring.

As evidence of the much greater interest taken now-a-days throughout Europe generally in matters relating to the Far East, we may mention that in the current number of the Danish periodical, *Det nittende Aarhundrede*, Lieutenant Wolff illustrates with what are considered able translations, a long paper on the "She-King," the Book of Odes or Songs, which are said to have been selected and arranged by Confucius.

The proprietors of the *Graphic* and the *Illustrated London News* have both issued special numbers, containing illustrations of the chief places of interest which will be visited by the Prince of Wales during his Indian tour, with descriptive letterpress.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, Oct. 19.

I have again to report a fortnight very destructive to shipping. A fearful gale from the eastward, almost increasing to a hurricane, raged on the 13th and 14th inst. over the whole of the Baltic. An inundation, only little less severe to that of the melancholy 13th of November, 1872, has visited the eastern shores of Schleswig-Holstein and Denmark, and many reports of shipwrecks are filling the papers. Especially has the vicinity of the town of Schleswig suffered, where, by the breaking of the dike, the waters forced their way into the fields, and by sweeping away the newly-sown seed spoiled the hopes for a good next year's crop of many a farmer. Copenhagen and other ports are filled with distressed vessels, and it is feared that many a good vessel will be reported in the shipping papers as "not having since been heard of."

With regard to shipping in the Elbe there is very little to report. Business goes on on a moderate scale, and the prospects for the approaching winter on the whole are not very brilliant. Regarding East India and China I have to report the arrivals of the *Anna*, from Rangoon, the *Egeria*, s.s., from China, &c., and the *Dorothea*, also from Rangoon. The departures comprise the *Deutschland* and the *Fortuna*, both to Rangoon, and the *Denderah*, s.s., to Valparaiso and Callao. The *Egeria*, s.s., advertised to leave here on November 1, is fast filling up, and no doubt will obtain a full cargo. The *Altona*, s.s., arrived from London, has also taken the berth, to leave here on October 25. This vessel will be commanded by Mr. A. Muller, her former chief officer, a young but intelligent and active sailor, and will again be employed in the China coasting trade. The *G. H. Wappœus*, for Penang and Singapore, as well as the *Condor*, for Chefoo, are still loading; the *Fylland* has taken the berth for Hong Kong, and the *Candare*, for Yokohama and Hiogo. The barque *Henriette Bohn*, belonging to Hamburg, has arrived at Cronstadt, to take in a cargo of general goods to the Amoor River, and very likely on her way out may call at some port in China, especially so if she should arrive in the China waters somewhat early for the reopening of the shipping trade on the Amoor.

The advertised sales of the *Borussia* s.s., *Bavaria* s.s., *Teutonia* s.s., and *Heligoland* p.s., belonging to the Hamburg American Steam Packet Company, has not led to any result. The boats were put in at very moderate prices, but no offer was made for either one of them, and the company have to keep their vessels.

Rates of freight to East India and China have not fluctuated since my last report; cargo is scarce for sailing vessels, especially now as two steamers are laid on, although the s.s. *Altona's* cargo for the most part is shipped on owners' account.

On the 14th inst. at Berlin, there was a meeting of shareholders of the Cuxhaven Harbour and Railway Company (Limited), and a resolution was passed to raise additional capital to the amount of 18,000,000 marks for building purposes. German capital will hardly be found for this subscription, and English markets will probably be invited to contribute.

A number of shareholders of the Commerce and Discounting Bank in Hamburg are urging a reduction of the paid-up capital, and ask the directors to call an extraordinary meeting of shareholders in order to adopt the necessary resolutions. The proposed reduction of about 20 per cent. is intended to take place from the 1st of Jan., 1877.

The mails which leave London early each morning for Hamburg are at present distributed here the second day; but the Post-office announces a change in the traffic, which is to take effect from the 15th of Oct., by which letters and newspapers forwarded from London early in the morning will reach their address the afternoon of the next day about 5 P.M. Merchants here will thus be enabled to answer their letters the same day, and London correspondents may have their replies by return of post on the evening of the third day, or early on the fourth day.

An interesting fact is the great fluctuation in the average tonnage of those ships trading between here and Great Britain. As you will see from the official statistics below the number of vessels trading between Hamburg and the United Kingdom has almost continually decreased, while the average tonnage of these ships, and especially during the year 1874, has largely increased.

Arrived in Hamburg from the United Kingdom:—

			Tons register.	Average tons register
1871	...	2,525 vessels with	1,132,880	449
1872	...	2,631 " "	1,207,182	458
1873	...	2,387 " "	1,060,540	444
1874	...	2,316 " "	1,222,433	528

Sailed for Great Britain:—

1871	...	2,770 vessels with	1,236,743	446
1872	...	2,929 " "	1,347,108	459
1873	...	2,512 " "	1,116,944	441
1874	...	2,408 " "	1,272,634	529

I subjoin statistics of the imports of coals and coke in Hamburg, and, as you will see, the tonnage of the trading ships has nearly been stationary, while the proportion of sailing vessels and steamers used in this branch has undergone a considerable change.

In Hamburg arrived in—

			Tons register.	
1871	354 sailing vessels, with ...	...	77,891	556,044
	918 steamers, with ...	...	478,153	
1872	208 sailing vessels, with ...	...	53,813	538,490
	899 steamers, with ...	...	484,677	
1873	152 sailing vessels, with ...	...	29,905	399,927
	716 steamers, with ...	...	370,022	
1874	121 sailing vessels, with ...	...	25,716	513,401
	755 steamers, with ...	...	487,685	

PRODUCE MARKETS.

COTTON has moved slowly; quotations for Surats nominal, Bengal m.0.76 to 0.46 per kilo.

SPICES.—Mace and Nutmegs quiet; Mace m.6.40 to 6.60 per kilo; Nutmegs, m.6.40 to 7.00 per kilo.

Digitized by Google

CLOVES firm; Pepper in good demand, m.110 to 111 per 100 kilo. for Singapore quality, m.100 to 102 for Penang.

RICE.—Demand for cleaned well maintained, uncleaned in very little demand. A cargo of 15,000 sacks per Dorothea, from Rangoon, has changed hands; afloat, quotations are per 50 kilo, Bengal m.11 to 15½; Rangoon 9 to 9¼; Bassein 9; Arracan 8½ to 8¾; Moulmain 8¾ to 9¼; Saigon 8 to 8½.

TEA.—Firm, with much inclination to buy; arrived per s.s. Egeria, Glenlyon, and Priam, from Foochow, 389/4, 3,638/8, 1,543/16 boxes Congou; 1,577/8, 707/16 boxes Souchong; 166/4 boxes Pecco. Quotations are: Congou, ordinary to good ordinary, 1.00 to 1.15 marks per half kilo.; ditto middling to fine, 1.35 to 4.00; Souchong, ordinary to good middling, 1.20 to 1.70; ditto fine, 2.60 to 4.00; Caper, 1.50 to 2.00; Souchong, 0.90 to 3.00; Pecco, ordinary to good middling, 1.80 to 2.40; ditto fine, 3.80 to 5.00; ditto orange, 1.25 to 3.40; Haysanschin, 0.90 to 1.80; Tonkay, 0.90 to 1.80; Younghaysan, 1.10 to 2.70; Haysan, 1.70 to 3.60; Imperial, country, 1.50 to 3.60; ditto, Canton made, 0.90 to 1.70; Gunpowder, country, —; ditto, Canton made, 0.85 to 2.60.

EXCHANGE.—London: 3 months, m. 20.13 to 20.07 per £.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, OCT. 20

The Second Chamber has done good work since last week. The Minister of the Department of Justice has laid before the members three Bills to reorganise a branch of our judicial institutions and to introduce, by means of simplifying, the necessary improvements. This is most certainly the first step in the right road. There was of course a good deal of opposition, because local interests are much concerned with this question. But Mr. Van Lynden obtained a victory, which is of still more importance, because some of his predecessors endeavoured in vain to introduce these measures, which will, it is said, be followed very soon by further legislation. The members are now discussing the Railway Bill, and I think that the Liberal party, especially the Rotterdam coterie, will give Mr. Heemskerk hard nuts to crack. The leading paper of that town has opened a heavy fire on the Minister, and I think with but small reason. It seems that this journal is of opinion that the right moment has arrived to harass the Premier, but this conviction is by no means generally supported. It is quite true that Mr. Heemskerk has not effected much during his second term of Government, and that many blunders have been made by him, but this does not prove in the least that the Liberal party in the Chamber is strong enough and sufficiently united to take the reins of Government in hand. It is possible, now that the election for the district Haarlemmermeer is annulled, that their number may be increased by one; so much is certain that all that is possible is done to beat the candidate of the Conservatives and Anti-Revolutionists, and to secure the victory to Mr. Rutgers. I think, however, that he has but little chance.

The amount of worthless stocks on our market increases so enormously that a few of the large number of victims, who have lost a good deal if not the whole of their capital, have addressed themselves to the Second Chamber, in order that an *enquête* might be opened, to inquire into the doings of those who brought the loans in question into the market. The sufferers are of opinion that the measure, which was applied by the British Parliament, has given satisfactory results. If the Second Chamber agrees to the demand, we shall, undoubtedly, hear that Messrs. So-and-So are scoundrels and pickpockets, but the victims, who were caught by false promises and figures, will remain as poor as they are now. Indeed, I cannot see how our Government can protect people from the effects of their own folly; the sound-minded know that they run a high risk when they lend their money for extravagant interest, and the ignorant people must learn experience, if they won't listen, as the Dutch proverb says. This was amply proved a few days ago, when a meeting of shareholders in the St. Paul's and Pacific Railway took place. We are still suffering enormously under that American railway fever, which has already cost our national fortune about 500 millions. The Turkish repudiation has not caused any exorbitant loss on our Bourse, but we are, of course, interested enough in the financial household of the "sick man" that our Government will join the collective protest, pointing out the necessity of giving the ill-treated creditors some re-assurance. Perhaps the Porte may learn from this note what the world thinks of its honesty, but this is the only success that can be hoped for. A real remedy is only to be effected by a political and moral revolution. The strangest fact is that there is now much speculation in this fund; the declared reason is that at the current quotation the interest is very high. But for how many years is payment guaranteed? *C'est le premier pas qui coute*, and the Turkish Government has just learned that it can do with its creditors just what it likes.

Some members of the Second Chamber will propose, when the Java Budget is discussed, to raise the wages for the natives for planting coffee from f.14 to f.20 per picul. As the yearly crop is on the average 100,000 piculs, this measure will cost our treasury five or six millions. It is, however, demonstrated that such an augmentation of the wages for planting is not necessary as a general measure to promote the private cultivation. In some districts this amount of f.20 will be too large, in some others too small. Instead of increasing these wages it would be preferred to improve and extend education, and to abolish slavery, which still exists under the form of "heerediensten" and "pantjensdiensten," and which abolition was decreed in 1866 without, however, the least effect. It is further asserted that measures such as those to increase wages afford another proof that it is not wise to rule the Colonies from the Hague.

Nothing is heard any more about our difficulty with Venezuela. Some of the papers treat it *en bagatelle*, while others regard it as a very serious matter. Rumours are current that a *questionnaire* has been forwarded to Curaçao, as a result of the very voluminous correspondence which was laid before the Minister by the Venezuelan Ambassador, Mr. Rojas. No further information will be given to Parliament until the Minister has received further advices.

Mr. Auslyn, our Consul in Egypt, has arrived at the Hague, and has had several conferences with the Minister for Foreign Affairs. It is said that this gentleman will be promoted to the post of Diplomatic Agent and Consul-General in the place of Mr. Ruyssenaers, who wishes to resign.

Our principal shipowners and traders intend to forward an address to the Second Chamber of the States-General, in order to urge the necessity that the plan of the Government to construct a harbour at Batavia should have the support of Parliament.

The Prince of Orange has at last returned from his trip to Paris. Some strange rumours are current about his stay in the French capital. I, however, do not think that they are trustworthy enough to be worth repeating.

The Java Steamship Company has resolved, by way of experiment, to fix the freight by the two next steamers at the same rate for the goods destined for Padang as for Samarang and Sourabaya. The steamer *Celebes* has left for Java with a detachment to reinforce our Colonial army.

Miss Mina Kruseman, who is now residing in Brussels, will next winter make another appearance on our stage in a play written by herself.

The Money Market is well provided, and large amounts can be obtained at 3 per cent. The Bank rate remains unaltered.

The management of the establishment of Prince Henry at Port Said has been entrusted to the *chef de cuisine* from Brach's Doelen Hotel in this town.

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

An extraordinary general meeting of this Bank was held on the 20th inst. at the London Tavern, Mr. W. Paterson in the chair. Mr. William Charles Mullins (the Secretary) having read the notice convening the meeting,

The Chairman said: Gentlemen, there is no report to be read, and I am glad that on this occasion we have nothing of importance to bring before you. Considering the troublous times through which we have passed I think we may congratulate ourselves that such is the case. You have all heard and read so much of the numerous commercial disasters which have occurred since we last met in this room that it would be superfluous for me to say anything on the subject further than to state what, of course, interests all of us, that this Bank has sustained no loss by those failures. (Cheers.) It will also be satisfactory for you to know that the Bank is doing a steady, quiet, safe business, and we are progressing more than might be expected in such times. Our deposits have been increased; but we could employ a larger amount advantageously; and, perhaps, now the foreign loans and many other investments are out of favour, probably more depositors will be disposed to come to this Bank, where they would have ample security, and get a fair rate of interest on fixed deposits. This half-yearly meeting although called for a special purpose gives you the opportunity of putting any questions you think desirable to the directors, and we shall be prepared to answer any. I do not think that I have anything further to say, and I, therefore, would proceed to propose the resolution for which you have been specially called, namely, that an interim dividend for the half-year ended the 30th June, at the rate of 5 per cent. per annum, free of income-tax, be now declared payable on and after the 27th inst.—Mr. John Jones seconded the motion.

Mr. J. R. Morrison said that, like most other Indian banks, the dividend was not quite so large as they could wish, but he inferred from the Chairman's remarks that next April a considerable sum would be added to the reserve fund. As none of them wished to have any more bad accounts, he asked the Chairman to say whether the policy of silence or suppression was not likely to perpetuate rather than do away with that skeleton in their cupboard, the six months' usance. (A laugh.) He asked the question because, now that the Suez Canal was in full work, it enabled the millionaires to make what they liked out of trade with the East, and occasionally men of the Collie stamp achieved the *éclat* of a national calamity whereas moderate and right-minded men were shunted aside and held of little or no account. No doubt, if banks were free to serve the public more generally, instead of being wrapped up in a few over-rated firms, shareholders generally would be less likely to complain of light dividends.

The Chairman replied that he could only repeat, with respect to the prospects of the Bank what he had already said, and that was that the Bank was doing very fairly indeed, and the directors expected at the end of the year to do probably better than they did last year. They did not think it advisable to add to the dividend, the policy of the directors being rather in the direction of an increased reserve fund. (Cheers.) A good deal had been said on many occasions with regard to the long usance of bills. That was a matter which could not be forced in any way. It would require a combination amongst the different banks and firms issuing letters of credit. But the fact of the matter was this, that the managers of this bank did not buy all the bills that were offered; they only took such as were approved of, and they all knew it was more the character and position of the drawers and drawees of the bills and the operations which they represent than the mere dates at which they were drawn that had to be looked at. Of course, they would rather have a good substantial six months' bill than a "kite" at three months, although they would rather not have a kite at all. Being however only one of many Indian Banks they could not further the matter more than they were doing, but it was satisfactory to know that Suez Canal shipments were very frequently drawn against at three months' sight.

The motion was then put to the meeting and carried unanimously. A vote of thanks to the chairman and directors terminated the proceedings.

ORIENTAL BANK CORPORATION.

The half-yearly meeting of the Oriental Bank Corporation was held on the 21st inst. at the offices, Threadneedle-street, Mr. Arbuthnot in the chair. Mr. Stuart, the chief manager, read the notice calling the meeting.

The Chairman said they had met for the usual purpose of declaring an interim dividend, which they were able to give for the operations of the Corporation for the half year ending 30th of June last, and he thought it would be a source of satisfaction to them that he was able to announce that they could give them the dividend they had been accustomed to receive for some time past, viz., at the rate of 12 per cent. for the year. Lately there had been some heavy failures in houses connected with the East, but he was happy to say their bank had not suffered from them, though they had received—as they must expect to do—blows from other parts of the world. In Australia there had been the failure of not one, but several houses, a large house having fallen, and several others had followed. They had, however, provided for those losses—sufficiently provided for them—and still had enough left to pay the shareholders a dividend of 6 per cent. for the half year. They had been interested in the Bank of California, with which they had had very large transactions, and if its suspension had been permanent they would have had a very small claim against it, which, he believed, would have been paid in full. It was, however, a great satisfaction to the directors that it had resumed payment, and he hoped the important relations they had had with it in times past would be continued.

Dr. Thom said that he had found in the case of Gledstanes that remarks left until the April meeting had lost their zest. He then alluded to the examples set by the prosecutions of Lizardi and Collie, which had broken down through the imperfect state of our bail laws, and stated that there was another mode of swindling by means of overvaluing invoices, in which cases the banks were the sufferers, and he alluded to a case which had occurred in Ceylon, that of Brodie and Co., and he asked the bank to prosecute, as a gentleman, whose name he withheld, was prepared to find every shilling of the expenses of the prosecution.

The Chief Manager said that in the Ceylon case, in which, however, they were not greatly interested, one of their officers had been made official liquidator, and he had been requested to take the proper steps to punish the guilty. With regard to the losses from the failure of large houses in London, he believed the losses would be confined to £1,000. The customary vote of thanks to the chairman and his colleagues closed the proceedings.

CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

The half-yearly general meeting of the shareholders in this bank has been held at the Banking-house, 65, Old Broad-street. Mr. G. G. Nicol, Chairman, presided. The half-yearly statement of accounts to the 30th of June last showed a net profit of £85,115 7s. An interim dividend at the rate of 8 per cent. per annum was proposed, leaving a balance of £55,115 7s., carried forward to the next account.

The Chairman, in moving the adoption of the accounts, said the present was an interim meeting, and he had not therefore much to say. He hoped, however, that the shareholders, looking at the results of the working of the past six months, and remembering the many failures which had taken place, would consider the report satisfactory. There had been many failures in India and China houses, due to that abuse of trade which he had so frequently condemned, and he thought they had reason to congratulate themselves on coming out so well. Of course, the bank never had any connection with Collie, but it had dealt with firms who were mixed up with Collie, and it was therefore matter of congratulation that their losses had been unusually small. After careful examination of the accounts, he thought all they would lose would be under £15,000. It had been said that the bank lost heavily by the failure of Messrs. Shand and Co., who were connected with Collie, and had long been customers of the Corporation. So far from that being the case, although the accounts were not finally closed, he believed he might say that they would sustain no loss at all. This was proof of the care and prudence with which the bank was conducted, and was besides very creditable to Messrs. Shand. They could only regret what had happened, as through it they had lost a very valuable account. They must also allow for the losses by Joshua, of Singapore. As he told them at the last meeting, they had possession of some property, but in the present state of affairs in Asia Minor they were unwilling to realise. There were hopes of recovering something from the man, but they had determined to appropriate from the balance a sum sufficient to meet that loss, amounting, probably, to £8,000 or £10,000. Allowing for all these losses, however, their reserve would stand at between £80,000 and £85,000. The directors felt it was all-important to increase this reserve fund, and on the other hand they had to consider the claims of the shareholders. Still, if they could pay the dividend at present declared, and increase the reserve as well, they would do so. It was the special object of the directors to increase the reserve to £250,000. The board had discussed whether the dividend declared should be three or four per cent., but considering the satisfactory result of the half-year, and that at the higher rate they would still be able to add a considerable sum to the reserve, they felt they were not justified in dividing less than four per cent. They must bear in mind, however, that to increase the reserve was their paramount object. The business of the bank was progressing in a most satisfactory way, the branches were conducted with great efficiency, and considering the troubled period through which they had passed, their business, on the whole, was in a more healthy state than he had known it for some time. Prices were now at a level beneficial for banking interests, although, perhaps, mercantile interests did not benefit. The directors, he could only say in conclusion, would do their best to keep the bank clear from the unfortunate and exceptional losses it had sustained for some time past. The chief inspector (Mr. Jackson) had now returned from a visit to all the branches, and had been appointed assistant-manager in London, and another inspector was now examining the branches. On his return another gentleman would be sent out, and they would thus have a continuous and regular inspection of all the branches.

In answer to questions, the Chairman said the bullion at the branches was counted every fortnight; they were obliged to keep large amounts on hand ready to meet any emergency that might arise. A large amount of money was deposited with them at fixed rates, varying from 4 to 5 per cent. They were endeavouring to reduce these rates as much as possible; but although at present prices they were rather a dead weight upon them, he did not think it would be wise to interfere very much with the matter at present. On the 31st December their reserve fund would, he estimated, stand at from £80,000 to £85,000, independent of what they might earn during the coming half-year. They did not expect a half-year so good as the last; still he had every reason to believe it would be a very fair account.

Mr. Richardson proposed a vote of thanks to the directors and managers, praising the ability and energy with which the bank was carried on; and the Chairman having briefly responded, the meeting terminated.

Monetary and Commercial.

The quiet feeling in the Manchester Market has continued to prevail; and though producers have, as a rule, maintained their demands, those who did not participate in last week's activity have not been so firm. Diminished sales of Cotton have caused this market to close rather tamely: the demand for both Yarns and Goods being moderate, though prices are quotably unaltered.

The remittances for the payment of the Bonds of the Seven per Cent. Japan Loan, which are to be drawn in January at the Oriental Bank, are now on their way.

The meeting of the Chartered Mercantile Bank of India, London, and China was held on the 19th inst., when the directors' report was adopted, and a dividend at the rate of 8 per cent. per annum was declared. A report of the proceedings is given in another column. The subjoined statement of accounts was presented:—

At the meeting on the 20th inst. of the Chartered Bank of India, Australia, and China the directors' report was adopted, and an interim dividend for the past half-year at the rate of 5 per cent. per annum was declared.

The half-yearly meeting of the shareholders of the Oriental Bank Corporation was held on the 21st at the offices, Mr. Arbuthnot in the chair, when an interim dividend at the rate of 12 per cent. per annum, or £1 10s. per share, was declared, carrying forward a balance of £5,745.

The report of the Bank of Alexandria states the profit for the past year at £229,461, and recommends the payment of a dividend and bonus of £1 per share, making, with the interim dividend, 15 per cent. per annum. It is also proposed to add £30,000 to the reserve fund, and to carry forward £11,816.

The report of the Standard Bank of British South Africa (Limited) has been issued for the half-year ended the 30th of June. It states the profit at £76,922, but from this £27,099 has to be deducted for rebate. Of the £50,000 odd left £25,000 is devoted to a dividend at the rate of 10 per cent per annum £20,000 is added to reserve, raising it to £120,000, and the balance carried to the new account.

The directors of the Australian Mortgage Land and Finance Company (Limited) have declared the usual interim dividend for the half-year ended 30th June last at the rate of 10 per cent. per annum.

The report of the Singapore Gas Company (Limited), to be presented to the shareholders at the meeting of the 26th inst., says:—

The directors have the satisfaction of reporting continued progress in the lighting of Singapore, for particulars of which they refer to the report from their engineer and manager, Mr. E. J. Wells, dated August 26th, 1875. The balance-sheet to June 30th, 1875, shows the financial position of the company. The directors have written off for depreciation of works and plant, and off the expenses of first establishment, as per balance-sheet, at the rate of one-half per cent. per annum. The profit for the half-year, after writing off these sums, amounts to £2,033 12s. 3d., which, together with £38 2s. 7d., the unappropriated profit of the preceding half-year, makes the available balance £2,071 14s. 10d.; out of this sum the directors recommend the declaration of a dividend at the rate of 7½ per cent. per annum, less income tax, on the amounts paid up on the preference and original capital; the balance of £27 1s. 1d. to be carried forward to the profit of the succeeding half-year. The dividend to be payable on November 20th.

In the Bankruptcy Court a first meeting for proof of debt and appointment of trustee has been held under the adjudication of Charles Carnie, merchant, of New Broad-street. The adjudication was made on the petition of the London and Westminster Bank, creditors for £18,000, the act of bankruptcy being the filing of statutory declaration of inability to pay his debts. The statement of affairs was produced, but the debts are stated at upwards of £56,000. Debts to the amount of £42,140 were proved, but in consequence of the parties not being in a position to appoint a committee of inspection, the meeting was adjourned.

The failure is announced of Messrs. G. D. Neroutsos and Co., merchants, of London and Manchester, with liabilities amounting to between £40,000 and £50,000, of which about £25,000 is expected to be covered. The suspension is ascribed to recent heavy losses in trade.

The National Safe Deposit Company (Limited) is now in thorough working order, and offers every facility to depositors of valuables, &c. The rents of the safes are small considering the immense advantages, as no insurance is necessary, and a conflagration is next to impossible; and even should one occur it would not be attended with any loss such as was sustained at the recent fire at Mr. Hankey's residence.

We have received the third annual report of the Silk Association of America. It contains an elaborate exposition of the proceedings of the Association during the year, and special reference is made to the frauds which have been committed upon the revenue in connection with the Silk trade. A general reform in the administration of the Customs service is urged as a means for the prevention of these frauds for the future.

The amount of bullion per P. and O. steamer *Mirzapore*, from Southampton, on the 21st inst. was:—In gold, to Galle, £215; in silver, to Shanghai, £1,200.

Bar Silver has been active at 57d. per oz. during the week, the demand being for India and Spain. The Council drafts having gone somewhat cheaper, the price (although without actual alteration) is not quite so firm at the close. Mexican Dollars, about £50,000 in value, have been sold at 55 9-16d. per oz., showing a rise of 5-16d. per oz. They have been taken principally for China.

ARTICLES OF IMPORT.

TEA.

Since the more peaceful intelligence from China the market has relapsed into a very quiet state, as dealers hold large stocks bought during the temporary excitement. Prices are not quite so firm, and in some instances may be quoted about ¼d. per lb. lower; the feeling, however, seems pretty general that a steady market will rule to the end of the season, as the total yield from China will not be more, if as much as last season; importers, too, are firm holders, and do not sell, except at paying prices. The unsatisfactory business that had been going on in Canton Teas for the past year or two appears to have had the desired effect by considerably curtailing shipments this season, both of Tayshan Congou and Scented Caper, and the relief afforded to this market has caused a great rally, and they now rule at a standard of prices that will admit of imports being renewed. Green Teas will apparently have to go through the same ordeal before it becomes a paying business to import.

Messrs. Capel and Co.'s Circular says:—*Congous.*—Red-leaf kinds: Siftings have been inquired for at previous prices. Old season's red-leaf remain firm at 9¾d. to 10d. per lb. for common; new have sold at 11d. to 1s. at public sale for common to good common. Fair to good Kaisow kinds have been rather more saleable at last week's prices; fine have been firm; finest only in limited request. Pak Lin kinds have been wanted from 1s. 7d. to 1s. 9d. per lb.; fine to finest are slow of sale in the absence of export demand. Black-leaf kinds: Old season's common to fair show no change. In new: Common have sold from 10d. to 11d. per lb., fair from 1s. to 1s. 2d. per lb., fair to good medium have been firm from 1s. 2¼d. to 1s. 5d. per lb. Good and fine have been saleable at previous rates. A few finest have also been taken for export at last week's rates. New-make kinds: Common to fair have sold from 10½d. to 1s. per lb., some in half-chests have sold from 1s. 2½d. to 1s. 3¼d per lb., showing fair prices as compared with other kinds. Ooloongs remain difficult of sale, but there is no further change in prices to report. Souchongs have sold without alteration in prices. Flowery Pekoes have sold at higher prices. *Scented Teas.*—Canton Capers remain very firm, and new arrivals have found a ready sale at full prices. Orange Pekoes show no material change. Foo Chow Capers have been dull of sale. There has been rather more inquiry for Orange Pekoes at the decline recently established. *Green Teas.*—The better kinds of Gunpowder have been well maintained. Young Hysons are still comparatively cheap. In other kinds there is no alteration to notice. The Deliveries for the week, as compared with last year, are as follows, viz.:—

	1875. lbs.		1874. lbs.
Home Consumption	2,369,755	...	2,152,825
Coastwise	838,452	...	867,805
Exports	413,337	...	951,676
	3,621,524	...	3,972,306

SILK.

Messrs. Durant and Co.'s Circular says:—The periodical public sales commenced on the 20th inst. and are concluded. The quantity offered was rather less than usual—about 400 bales Bengal silk, 3,700 bales China, 600 bales Japan, and 800 bales Canton silk, and about 40,000lbs. English thrown silk—this last, with about one-third of the China, half the Japan, and two-thirds of the Canton raw silk, was printed to be sold "without reserve." The result is fully as favourable as might have been expected. The China silk sold generally at about previous prices—the Canton rather under market quotations, but a large portion was heavily damaged, and another large portion was in very small fragmentary parcels, and some very old silk. The Japan silk also showed some little weakness upon extreme prices. The general market is much as it has been for some weeks—fair daily doings. Deliveries show the effect of the absence of foreign buyers.

Coffee.—The unfavourable result of the Dutch sale has depressed this market, and small quantities of Plantation Ceylon at auction have been sold at a reduction of about 1s. per cwt. upon last mail's quotations. The closing prices are, triage 88s. to 95s. 6d., small 103s. 6d. to 107s. 6d., low middling 108s. 6d. to 110s., middling 111s., peaberry 124s. to 125s. 6d. The Dutch Trading Company's public sale of 96,625 bags Java held on the 20th inst. in Rotterdam went off flatly at 1c. to 1½c. below valuation for good ordinary, and 1½c. to 2½c. lower for yellow and good sorts; good ordinary Java closing at 58½c. against 60½c. to 61c. at the September sales.

Cocoanut Oil has been steady, fine Cochin at £42, Ceylon in pipes at £39 per ton.

Cutch.—10 boxes Elephant Pegue, of old import, sold at 26s. per cwt.

Gambier continues in steady demand, and 400 bales have been sold at 28s. 6d. ex quay; at auction 947 mats pressed cubes were bought in at 38s. per cwt.

Galls.—In public sale 165 cases China were bought in at 82s. 6d. 85s.

Hemp.—By private contract the following sales of Manila have been made: 400 bales superior roping Zebu at £36, 400 bales ditto at £35, and 10 bales fine white Quilot at £48.

India-rubber.—At auction, of 259 cases old Borneo offered, 20 cases sold at 1s. 2½d. per lb.

Isinglass.—Large supplies of Brazil at the periodical auctions went

Digitized by Google

off slowly, and prices underwent a further general decline of 2d. to 3d. for good, and more for other kinds. East India descriptions, being in moderate supply, met a steady demand, Penang tongue selling rather dearer, but leaf 1d. cheaper, good cake dearer, common unchanged; 31 cases 4 bags Penang sold, fine pale tongue at 4s. 2d. to 4s. 3d., ordinary to middling at 3s. 3d. to 3s. 8d., good leaf 4s. 10d., thick 3s. 6d., middling to fine cake at 1s. 4d. to 1s. 9d. Of 2 cases Saigon cake offered 1 case sold at 1s. 1d. per lb.

Japan Wax.—In auction 224 cases (import 1873 and 1874) were all sold at a further decline, viz., good saucer 48s. to 48s. 6d., fine bold ditto 49s. 6d. to 50s. 6d. per cwt., also 118 cases of recent importation at 50s. for very good bold squares.

Pepper.—*Black:* Only a moderate supply was offered by auction, and partly sold at steady rates; 552 bags Singapore sold at 5½d.; 979 bags Penang were bought in at 4⅝d., excepting 55 bags damaged, which sold at 5⅝d. for first class. *White:* The public sales were restricted to 75 bags Singapore, of which 43 bags sold steadily, good fair at 7¾d. Privately fully 200 bags Singapore have been sold at 7⅞d. per lb.

Rice.—Early in the week the demand for floating cargoes improved, more especially for distant, which realised an advance of 3d. per cwt., but Thursday the demand had subsided, and the recovery is not now obtainable. On the spot 3,000 bags new Rangoon have been sold at 8s. 3d., 3,000 bags ditto at 8s. 6d., also 3,500 bags new Necransie at 7s. 6d.

Sugar.—The market has exhibited a quiet tone, but there has been a steady demand from the trade at previous rates, and a good business has resulted, consisting chiefly of Barbados, prices showing no alteration. No business has occurred in East India.

Sticklac.—At public sale 94 boxes Siam were bought in at 95s., and 93 cases at 92s. 6d. per cwt.

Tobacco.—In public sale 168 bales Japan leaf sold at 5⅞d. to 7½d., 444 bales ditto 4d. to 6¾d., 35 bales Sumatra 10d. to 3s. 7d., and one bale Manila 9⅝d.

Tin.—The market has been quieter, and prices at the close show a slight decline upon last mail's rates. Straits is quoted £85 10s. to £86 on the spot, and £85 afloat; Banca £92, Billiton £86 per ton.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 28s. To Singapore: 14s. To Batavia and Sourabaya: 20s. To Galle: 18s.

CASUALTIES.

The St. Aubyn, Metaire, from Cardiff for Singapore (coal), put into Falmouth on the 17th inst., leaky.

MISCELLANEOUS.

Rotterdam, Oct. 17.—The masts of the Thomas Sorby (str.) have disappeared, and the wreck is now quite covered at low water, the boats that went out to her on the 16th have all returned empty.

Malta.—Arrived Oct. 16, Holland (str.), from Batavia, for Nieuwe Diep; 17, Crocus (str.), from Foochow, and proceeded for London; Montgomeryshire (str.), from London, for China and Japan; 19, Torrington (str.), from Batavia, for Rotterdam.

Port Said.—Arrived, Oct. 18, from Glasgow, for Hong Kong, Fung-Shui; from Liverpool, for Manila, Yrurac Bat; 20, for Shanghai, Anchises; 21, from London, for Shanghai, Cawdor Castle; 22, for China and Japan, Montgomeryshire; from Southampton, for Batavia, Prinses Amalia.

Suez.—Arrived Oct. 14, Stentor, from Shanghai, for London; Buenaventura, from Manila, for Liverpool; 22, Galley of Lorne, from Yokohama, for New York; Scotland, from Shanghai, for London.

The Nederland Company's steamship Voorwaarts, which arrived here on the 10th inst. from Batavia, reports that on the 4th she endeavoured to tow the British steamer Medina off the Parkins Rocks, where she was stranded, but after breaking her hawsers and chain cables, she did not succeed, and having stood by her for twenty-six hours, she took off fifty of the crew, who have been landed here.

Mauritius.—The surveyors of the Staatsraad v. Ewyck, from Batavia, for Amsterdam, which arrived here Aug. 14, report two between deck beams, one upper deck beam, and three iron knees broken, and that the deck had worked upon.

Hong Kong, Oct. 18.—The P. and O. Company's steamer Sunda, which struck upon a rock in the China Sea on the 14th Sept., and was afterwards beached near Amoy, has been successfully floated.

Yokohama, Sept. 7.—The wreck of the James Paton, with two anchors, was sold at public auction yesterday for $600.

Gunboat for Rajah Brooke.—The Aline, built and engined by Messrs. Blackwood and Gordon, Port Glasgow, and launched Aug. 23, had her trial trip on the 16th inst.; the measured mile was run at the rate of ten knots per hour, being one knot above her contracted speed. This vessel, which looks more like a combined yacht and gunboat, is most handsomely fitted up. The saloon, which is placed on the under deck forward for the convenience of the Rajah, is most tastefully decorated in white and gold. On the upper deck, forward and aft, will be placed two 32-pounder guns. She will also be supplied with four 9-pounders. After the trial her course was changed for Loch Long, when a select company of ladies and gentlemen who were on board sat down to an excellent dinner. After her fittings are completed, she will proceed to Borneo under the command of Lieut. Gladstone Scott, of the Royal Navy.

The P. and O. Steamer Bangalore.—This fine vessel, which has been for some time on the Clyde under repair, left on the 20th inst. for London, where she will load in the Victoria Docks; she has received new boilers, and her engines have been converted to the compound system a poop has also been added; and the ship generally has undergone a thorough refit. She will leave Southampton on Nov. 11, taking out the Bombay Mail.

BANK OF CALIFORNIA.—THE ORIENTAL BANK CORPORATION

are prepared to ISSUE DRAFTS at sight on the Bank of California, San Francisco, the terms for which may be ascertained at their Office.
Threadneedle-street, 1875.

THE NATIONAL SAFE DEPOSIT COMPANY (Limited).

1, Queen Victoria-street, Mansion House, London.
Capital, £500,000. Subscribed, £250,000.

DIRECTORS.

J. H. Pulleston, Esq., M.P., Chairman.
Lawford Acland, Esq., Chairman Ceylon Company.
George Arbuthnot, Esq., Chairman Oriental Bank Corporation.
George W. Barnett, Esq., Barnetts, Hoares, Hanburys, and Lloyd.
Horatio S. Coulson, Esq., Director United Discount Corporation.
Lord Wm. M. Hay, Director Eastern Telegraph Company.
Hugh F. Sandeman, Esq., Director Scottish Union Insurance Company.

The Company is now ready to let to approved applicants Safes in their Fire and Burglar-proof Vaults, at rents from £2 10s. to £30 per annum.

No insurance is necessary.

The main object of the Company is to provide the public with a perfectly secure, yet inexpensive repository for valuables of every description, and relieve them from the harassing and wearing strain occasioned by the personal care of such property. The Company take for safe custody all kinds of securities, valuable property, bonds, wills, marriage settlements, and other documents, and guarantee their value when required. Drawn bonds, coupons, &c., collected.

The Company undertake the duties of trustees, receivers, and executors, and act in other confidential capacities.

The Great Vault is superior to any building in the world intended for similar purposes. The utility of these Safes, which are entirely underground, is undeniable, as bankers are not responsible for deposit of valuables.

The loss of many kinds of securities is irreparable, the loser having no recourse against the Government or other party issuing them. A constant watch is kept both inside and outside the building. There is a room especially adapted and reserved for ladies. The premises can be inspected, and further particulars obtained on application. HENRY WEST, Manager.

STANDARD LIFE ASSURANCE.

REDUCED PREMIUMS.

CHINA and JAPAN.—The Directors of the STANDARD LIFE ASSURANCE COMPANY have reduced the rates of premium to be hereafter charged for residence in certain parts of China and Japan, and full particulars as to terms, regulations, and conditions may be had at the offices of the Company.

Local Boards and Agencies in India, China, and all the colonies.

Moderate premiums, at rates suited to each climate.

Immediate reduction to home rates on return to Europe or other temperate climate.

Loans advanced to civilians and military officers.

The next division of profits will be made among policies in existence at 15th Nov., 1875, and all who assure before that date will rank for profits on that occasion.

Annual income of the Company upwards of £700,000 sterling. Invested capital and accumulations upwards of £4,500,000.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See artucle in the *Civil Service Gazette.*

Made simply with boiling water or milk.

Sold in packets (in tins for abroad) labelled:—

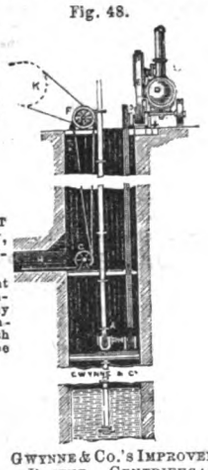
GWYNNE and Co., Hydraulic and Mechanical Engineers,

ESSEX STREET WORKS, STRAND, LONDON, W.C.

Fig. 39.

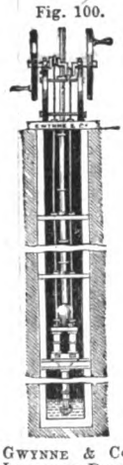
GWYNNE & CO.'S PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.
The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be given

Fig. 48.



GWYNNE & CO.'S IMPROVED PATENT CENTRIFUGAL PUMP.
Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water

Fig. 100.

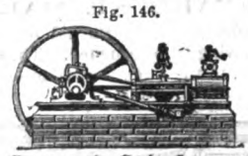


GWYNNE & CO.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP,
For Hand-power, adapted for ordinary wells of any depth, of most careful construction, and on the most approved system

Fig. 86.

GWYNNE & CO.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.
These Pumps work without valves or packing, and raise a considerable quantity of mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.



GWYNNE & CO.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.
With or without Expansion Gear, for economical working.
From 4 to 100-horse power

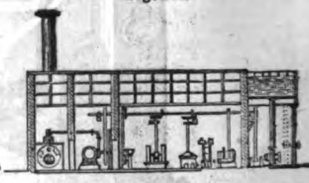
Fig. 154.

GWYNNE & CO. IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.
These boilers are simple and compact. They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler

Fig. 142.

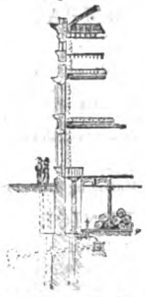
GWYNNE & CO.'S IMPROVED PORTABLE STEAM ENGINE.
Light, simple in construction durable, and economical, and very superior to "Agricultural" Engines.
From 2½ to 30-horse power

Fig. 192.



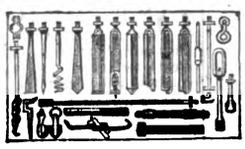
GWYNNE & CO.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES FAT, &C., &C.
The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motion power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

Fig. 193.



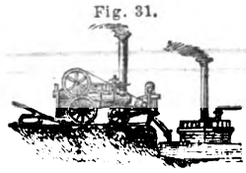
GWYNNE & CO.'S IMPROVED HYDRAULIC LIFTS.
Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.
Prices on application.

Fig. 121.



GWYNNE & CO.'S BORING TOOLS.
Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.
G. & Co. can confidently recommend these as the best in the market.

Fig. 31.



GWYNNE & CO.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR
In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. In all sizes.

Fig. 105.

GWYNNE & CO.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.
These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and compare on with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.

GWYNNE & CO.'S IMPROVED DREDGING MACHINERY.
The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Antonetti, Mrs. Van Lier, Mrs. Perrier. From Batavia: General Verspyck, Mr. Starkenborgh, Mr. Cordes, Mr. and Mrs. Emmerick, Miss Piccarot. From Singapore: Messrs. Beck, Barna, Roderiguez. From Galle: Mr. and Mrs. Mackintosh, Mr. Wick.

PASSENGERS OUTWARD.

Per P. and O. steamer *Baroda*, from Brindisi, Nov. 1.—To Ceylon: Mr. and Mrs. Hutton, Mr. F. H. Izard.

Per P. and O. steamer *Assam*, from Southampton, Nov. 4.—To Yokohama: Mr. C. G. Dunlop. To Shanghai: Mrs. G. T. Baillie. To Singapore: Messrs. R. W. G. R. and F. A. Gow, Mrs. Gow, Mr. S. B. Kennard. To Ceylon: Mr. Houstoun. To Galle: Mr. A. J. Seaton.

Per P. and O. steamer *Hindostan*, from Venice Nov. 12.—To Ceylon: Mr. H. S. Saunders, Mr. H. C. Bury.

Per P. and O. steamer *Hindostan*, from Brindisi, Nov. 15.—To Batavia: Mr. Lorraine. To Singapore: Major Gray. To Ceylon: Mr. T. Steele.

Per P. and O. steamer *Khedive*, from Southampton, Nov. 18.—To Singapore: Mr. A. P. Talbot. To Ceylon: Mr. C. F. Hill.

Per P. and O. steamer *Baroda*, from Brindisi, Nov. 29.—To Penang: Mr. T. C. Brown.

Per French steamer *Meikong*, from Marseilles, Nov. 7.—To Yokohama: Mr. Bartrum. To Shanghai: Mr. Bavier, Mr. Choppard, Mr. H. Relph. To Kong Kong: Mr. and Mrs. Sienkevitch. To Batavia: Mrs. Barge and family, Mr. Brink, Mr. Norden. To Singapore: Mr. Braddell, Capt. and Mrs. Ross, Mr. John Ross, Mr. and Mrs. Adamson and child, Miss MacNair, Mr. and Mrs. Buchanan, Mr. J. Vaughan., Master Brooks and governess. To Galle: Mr. and Mrs. J. M. Greig, Mr. John Tyndall, Mr. Collard, Mr. R. S. Atkinson.

Per French steamer *Amazone*, from Marseilles, Nov. 21.—To Batavia: Mr. and Mrs. J. Wuste, Mr. Voute, Mr. Van Delden. To Singapore: Mr. Baumgarten and family, Mr. Thos. J. Broome, Mr. Hinnekind and family, Mr. Sohst and family. To Galle: Mr. A. MacFarlane, Mr. E. G. von Glehn.

Per French steamer *Anadyr*, from Marseilles, Dec. 5.—To Batavia: Mrs. van Lawick. To Galle: Mr. Boustead.

Per French steamer *Djemnah*, from Marseilles, Dec. 19.—To Hong Kong: Mr. and Mrs. Pelham Warren.

Per steamer *Deucalion* (Holt's line), from Liverpool, Oct. 27.—To Penang: Mrs. J. Irvine and child. To Singapore: Mr. Bennett. To Shanghai: Mr. and Mrs. Quin and servant, Miss McKenzie.

Per steamer *Alaska*, from San Francisco Oct. 1.—For China and Japan: C. Passavana, C. M. Otto, J. H. Games, Captain Von Escnbacher, R. N. Fowler, Mr. Howland wife and child, Mrs. M. B. Capp, J. M. Carney, wife and infant, J. Copenhagen, E' Martin, Mrs. H. E. Fielding, Wm. Schmadz, F. L. Runels and wife, Baron Von Gutschmidt, Wm. Smith, Mr. Walton, Mrs. Shepard, Mrs. Hillman, Miss Lotta German-Miss Campbell, and 508 steerage.

Summary of News from the Far East.

JAPAN.

Our advices from the Japan Ports by the present mail are of no later dates than those received by Pacific mail on the 18th ult., and published in our last issue. Advices bearing date Yokohama Sept. 17 have been received at San Francisco, but the summary of news telegraphed to New York contains nothing of importance.

CHINA.

PEKING AND TIENTSIN.

The Tientsin correspondent of the *North China Herald* writes as follows:—

There seems to be little doubt that the Yunnan affair is practically settled, on the understanding that the guilty parties in Yunnan shall be punished, that an indemnity shall be paid to Mr. Margary's family, that a trade route shall be opened between Yunnan and Burmah, that the lekin taxes shall be better regulated, and that freer intercourse shall be established with the different branches of the Chinese Government. Details probably remain to be settled, but it is generally believed that these heads have been agreed upon. It is reported that two Ambassadors to England have been named by the Chinese Government; the first is Kwoh Sung-tao, at present Judicial Commissioner in Fuh-kien, to which post he was appointed only a few months ago; and the second Hu K'ien-shên, a Taoutai expectant at Peking. The first-named of these two officers is a Hanlin of some distinction, and was formerly acting Governor at Canton for a few months; he has lived in retirement for some years, until his recent recall to office. His colleague is a much younger man, who has already had some experience of travel, having resided for a time in Japan.

On the 3rd Sept. Mr. Wade returned to Tientsin from Chefoo, in H.B.M.'s gun-vessel *Dwarf*. The Admiral's yacht, *Vigilant*, also came to Taku, from which place the Admiral accompanied Mr. Wade to Tientsin in the *Dwarf*. We understand that the Admiral leaves in the *Dwarf* for Newchwang. Mr. Wade made a very early call on Li-Hung-chang on the 4th Sept.; Governor Li returned the visit at the British Consulate, but no one knows what transpired.

An unfortunate accident occurred a few nights ago, causing the loss of a Chinese boatman. The schooner *Marian* was being towed up the river when a boat was seen trying to run across the bow of the tug *Pathfinder*. By "porting" her helm the tug just cleared the boat, but the schooner, though "porting" her helm as soon as the boat was seen, was less fortunate. The boat caught on one fluke of a hanging anchor, which cut a great gash in her side, and lifted her partially out of the water; she afterwards sunk. All the men clambered on board the *Marian*, save one, who appears to have fallen overboard, and was drowned. The boat had no light, and seems to have run directly into danger. The schooner was also at fault for depending entirely on the lights of the tug, to the neglect of nautical regulations, which require side-lights in such cases.

The *Peking Gazette* of the 1st Sept. contains a somewhat startling decree, removing the present Governor-General of the two Kwang Provinces, Ying Han, from his post, and ordering him from Canton with all his official suite, to await at Peking the punishment he has incurred by sanctioning the re-establishment of the *Wei Sing* gambling lotteries. The present Acting Governor-General of the two Kiang, Liu Kw'ên-yih, is named his successor, and Liu-ping-chang is named Governor of Kiangsi. The Governor of Kwantung is to act as Governor-General until the arrival of Liu Kw'ên-yih at Canton.

CHEFOO.

Our advices from this port state that no action had been taken with reference to the outrage at the Shantung Promontory. It was generally believed that the matter has been formally brought before Mr. Wade's notice, and it was hoped that something vigorous will be done, otherwise the lighthouse and all its inmates will be at the mercy of Li Wu and his followers. It is a fact that no one is allowed to supply the lighthouse with fresh provisions of any kind; the place is watched, and any one attempting to hold communication is caught, beaten, and fined, and then told to go and do it again. The last complaint is that the light-keepers have been destroying all the grass of the country; the fact being that a few sheep sent down by the Commissioner of Customs to provision the place had been browsing outside the enclosure.

Mr. Wade arrived in H.M.S. *Dwarf* from Tientsin, on the 1st Sept., and visited Vice-Admiral Ryder on board the flag-ship *Audacious*. Mr. Wade and the Admiral left together for Tientsin in H.M.S. *Vigilant* next day. The *Dwarf* left Chefoo on the evening of the 1st Sept. for Taku, to convey Mr. Wade and the Admiral up the Peiho, in case the *Vigilant* does not find water enough to proceed to Tientsin.

A military mandarin arrived from Teng Chow-foo on the 1st Sept., with a body-guard of forty soldiers, armed with Martini-Henry rifles; and there are rumours of large bodies of Chinese troops coming. No fewer than 418 cases of munitions of war were landed from a Chinese steamer during the last week in August.

SHANGHAI.

The present mail brings advices from this port to the 12th September; the French mail from London July 30 was received 12th September. The following summary of news is from the *North China Herald*:—

The concert given in the Garden of the French Municipal Hall, in aid of the sufferers by the late floods in the South of France, was numerously attended. The Garden and Hall were brilliantly illuminated for the occasion, rows of gas jets being placed along the tacade of the building, and also the entire length of the railings fronting the Rue du Consulat; the entrance of the Hall being further decorated with three gas stars of considerable magnitude, while hundreds of Chinese coloured lanterns were suspended from the trees and shrubs, the whole producing a pleasing effect. The roadway in front of the Hall, and for a considerable distance towards the Bund, was kept clear for visitors by a detachment of French police, whose semi-military uniforms looked well in the glare of light. The programme included selections from the most popular music of the day, and was excellently played by the members of the Wind Instrument Society; a pleasing novelty being introduced in the shape of two choruses, sung by amateurs, who were greatly applauded. The promoters of the concert must be congratulated on achieving so decided a success.

The illuminations attracted large crowds of Chinese, not only from the immediate neighbourhood, but also from the city and suburbs, and the police had a difficult task to perform in keeping the immediate approaches clear for carriages and jinrikshas. As the night wore on, the crowd became turbulent, but at first confined their demonstrations to hooting and shouting at the occupants of vehicles as they approached and departed from the Hall. The police, thereupon, tried to keep them further back and to open a lane through them. This they resented by more shouts and yells, and immediately afterwards began throwing stones, brick-ends, and other missiles in regular vollies, which lasted for some minutes, many of the police being hit, several of them receiving bruises and abrasions on the face or head. They, nevertheless, behaved with great forbearance, although armed, contenting themselves with pushing the crowd back, and apprehending those who were most prominent in the disturbance. The Chinese who were arrested were brought before the French Mixed Court, and were sentenced to periods of one to two weeks' cangue and from forty to fifty blows of the bamboo each. The ringleader, however, was sentenced to 100 blows with the heavy bamboo, and one month's cangue.

The *Shunpao* has the following curious paragraph regarding the excursion of foreigners to the interior:—

It is a custom of old date at all the Treaty Ports, that whenever officials or merchants go up-country for pleasure or otherwise, a passport should be obtained from the Chinese authorities through the Consul. Feng, Taoutai, however, owing to the cases of Margary at Yunnan, and Cooper at Quinsan, in which the country people, by mobbing foreigners, gave rise to great trouble, now requires that wherever a passport for travelling up-country is applied for, a Wei-yuen should be deputed to accompany the foreigner, who will give his passport in charge to the Wei-yuen, that it may be duly returned for cancelment at the close of the trip. The object is to prevent any trouble or annoyance arising from the difference in speech and dress. In the case of Foreign officials going up-country, it certainly appears most proper that Wei-yuens should be despatched with them; but in the case of merchants, who mostly go up for shooting, it would seem that to be accompanied everywhere by the Wei-yuen would be inconvenient. The Japanese Consul, therefore, on hearing of this, discussed the matter. Will the Taoutai be able to hit upon a good expedient to meet the case?

He will certainly have to find a better expedient than this, for no foreigners would be bothered with a Wei-yuen; nor we imagine would any Consul in Shanghai listen to such a proposal. The whole thing is probably a misconception, with just the grain of foundation which rumours, however absurd, very frequently have; and this may be the explanation:—With the view of putting a stop to the annoyances to which several parties of sportsmen were subjected last winter by ill-disposed natives, H.M. Consul hit upon the plan of requiring the Taoutais of Shanghai and Chinkiang to furnish him with a large number of sealed copies of proclamations, setting forth the right of foreigners to roam about at their pleasure, and forbidding the people to molest them, or, when accidentally hurt, to take the law into their own hands; and his idea was to provide each applicant for a passport with a copy of this proclamation; so that, if he got into trouble, he could exhibit it and possibly save himself from annoyance. This plan being approved of by the Consuls, Mr. Medhurst suggested it to the Taoutai, who liked it so well that he begged Mr. Medhurst to put it in writing, and he would see to its being carried out.

The programme submitted by the Shanghai Rowing Club for the forthcoming Autumn Regatta, which is to be held on the 25th and 26th of October, presents several features of interest beyond that centring in the contemplated challenge race between the English and Scotch eights. There are eight races set down for each day, including eights, fours, pairs, and sculls; and a new feature has been introduced, in the proposal to have a real international race for four-oared boats, manned by English, Scotch, American, and German, and probably French crews. Such a race should prove one of the most attractive events on the card, and it is hoped there will be sufficient interest shown to carry it out. An invitation has been sent to the Kobée crew, to come over and row what is termed an inter-port race, which, all things of course considered, they cannot decline to accept, remembering the beating they gave the Shanghai crew (who rowed under adverse circumstances) at the last Nagasaki Regatta. Prizes are also again offered to be rowed for, each day, by man-of-war boats.

The runners at the Mixed Court are complaining of the strictness with which the Chinese Magistrate Hsieh insists on the punishments he orders being carried out, often himself superintending the bambooing to see the blows are given properly. Such energy takes from the runners a good slice of their income, derived from payment by culprits for either a light infliction or total evasion of the bamboo and other punishments; and, as it is said they have no salary, their emoluments have been reduced to almost nothing since Hsieh's accession to the office. Under his easy going predecessor the officials reaped a steady harvest of cash or dollars, according to the social status of the delinquent. They have threatened to carry their complaint to the Chehsien, in the hope that he would do something towards restoring matters to their former prosperous condition.

The steamer *Olympia*, while under weigh and steering towards the wharf, got foul of a small cargo boat that was under sail, and the boat getting athwart hawse, owing to the tide, heeled over and sank. According to the steamer's account repeated warnings were made by the officers to the occupants of the cargo boat, who were calmly enjoying their evening meal, and took no notice until too late. There was a rumour that one of the crew was missing, but the steamer officers say that there were five men on board, four of whom were taken on board the steamer, and the fifth was picked up by a sampan.

It appears that, in the action appealed to the Supreme Court from Kanagawa Felice Beato, the defendant and appellant, and James Davison and Co., the plaintiffs and respondents, sued each other by cross-actions. In the one Beato claimed from Davison

Digitized by Google

$5,459.85, and in the other Davison claimed from Beato $9,055.05. The actions were consolidated, and the jury found a balance to be due to Davison of $8,302.65. This finding was the subject of appeal, and the amount was reduced by the learned judge by $4,393.74. These few words of explanation are necessary, as the nature of the case was hardly apparent from the judgment as it stood.

The programme of the Shanghai Autumn Race Meeting contains some good prizes, and should ensure a successful meeting. Seven events are set down for each day. A good-looking lot of griffins has been offered for sale at the horse bazaar, and the majority were sold at full prices. Tls. 270, 195, 180, 165, and 160 were among the sums given. Several went between Tls. 120 and 150; some at about Tls. 60, and some were withdrawn, high reserves were, we understand, fixed in several cases.

Mr. W. H. Tapp, who has been appointed Registrar of Shipping under the new Order in Council, has resumed charge of the Shipping-office of the British Consulate.

The *Celestial Empire* supplies the following items of intelligence:—

Locally, the principal event has been a special meeting of ratepayers in the Lyceum Theatre, convened chiefly for the purpose of considering the vexed question of the new Hospital, and arriving at some definite decision upon the subject. It has resulted in a resolution empowering the Municipal Council to treat with the Trustees of the Institution with a view to relieving them of the responsibilities attaching to their office, and a vote of Tls. 30,000, to enable the former to erect a new building on an entirely independent basis. The difficulty of Endicott's Garden still remains, and is considered, we may suppose, to be in abeyance; but seeing that the inmates of the present building will have to turn out on the 31st December proximo, the position is sufficiently serious, for there can be no doubt of the impossibility of there being a new house in readiness to receive them by that date.

The Taoutai has been exerting himself in trying to find out the truth with regard to the attempt at smuggling silk piece-goods, which we narrated in our issue of the 1st September. He has had the boatman up for examination three times; and has flogged him each time, by way of encouraging him to be candid—the last time inflicting four hundred blows. The prisoner refuses, however, to inculpate any of the Shanghai dealers. He has given the name of the silk hong up-country who loaded his boat with the piece-goods in question; but maintains that the firm gave him the money to pay the *lekin* and all other taxes, and that he himself, having applied the money to his own needs, devised the false bottom to the boat, and conducted the smuggling enterprise with a view solely to his own advantage. This story is not fully believed in; and the Chehsien of the district in which the up-country hong is situated is to be applied to, and if possible the books of the hong are to be searched to see if there be any entry of money paid the boatman for taxes on this silk or not.

Our readers will no doubt remember the murder committed upon an old man who acted as custodian of the Rev. Mr. Muirhead's chapel in the city of Shanghai. The assassin, who had given himself wounds of some severity in the hope of thereby supporting a story he told of the crime having been committed by a third party, was sent to the Shantung-road Hospital to be cured. There he was watched by guards sent from the Chehsien's yamen, but nevertheless, when convalescent, managed to escape; having previously acknowledged his guilt, and knowing, we suppose, that a speedy death would be his sentence if he lost the opportunity given him by the carelessness of the watchmen. The Chehsien, in consequence of this escape, and of that of another criminal effected about the same time from the City prison, was deprived of his button, and ordered to find both the fugitives within a certain time, on pain of dismissal from office altogether. Half his troublesome task has been accomplished; the perpetrator of the murder in the chapel has, we are informed, been captured at Hang-chow.

The Chinese ironclad at the Kiangnan Arsenal still remains on the "ways," and is likely to do so for some time longer. After they have exhausted all the plans that can be proposed by unprofessional foreigners and by native mechanics, and wasted a little more time and money, it is probable that the authorities will ask their naval architect to complete the launch in the way which is usual in such cases in England, or elsewhere. We are told on what we consider to be good authority that he has protested against all the plans that have been attempted from the first, and that the only plan he has suggested is one that would strike at the root of the difficulty, viz., the comparatively simple process of taking out the "ways" and regreasing them.

FOOCHOW.

The subjoined items of news from this port are taken from the *Foochow Herald*:—

We learn of a very serious attack having been made on the Great Northern Telegraph Company's staff and property near Huang Kow, resulting in the destruction of the greater portion of the line between Foochow and Huang Kow, and the robbery of a considerable quantity of the Company's material. It seems, from what we can gather, that the Company's Camp, containing a large collection of telegraph material, was attacked on the 4th Sept. by several hundred Chinese. At the time of the assault there was only one European in charge, and as the native soldiers, who by a fiction were supposed to be guarding the property disappeared incontinently on the first approach of danger, the work of spoliation was short, sharp, and thoroughly complete. Mr. Holst—the gentleman above referred to—was seized by the ruffianly mob, plundered, and badly beaten; in fact, we are assured that he narrowly escaped with his life. During all this time, the main body of the construction party, including six Europeans, were about five miles in the rear engaged in putting up the line. On receiving the first intimation of the attack they hastened to the Camp, and on arriving there found that nearly everything had been carried off. The Europeans then thought it prudent to retire to a neighbouring Joss House, and subsequently to apply to the District Magistrate of Fu Ching-hsien for assistance. This functionary arrived next morning; he appeared to be frightened, and proposed to arrange the "little affair" in the usual off-handed manner; not by arresting, or making any attempt to arrest the thieves, but by coolly returning about one-half of the looted property, at the same time time sending presents of sheep, pigs, and poultry to the Telegraph Company's people.. This mode of compounding felony many suit mandarindom—it is hardly acceptable to foreigners. We are assured that not a single man has been arrested on account of these robberies—*ergo*, the plunder continues, about fifteen miles of line and posts having been stolen up to the 7th Sept. It is evident that the Chinese authorities must have an interested motive in again permitting this wholesale destruction of foreign property to take place.

The question arises, "Will these ruffians, emboldened by success venture further afield?" We trust not! It may be that British interests at this port are not in peril; but it is to be regretted, if there is any foundation for the report, that H.B.M.'s Consul has declined to co-operate with the Consul for the United States in procuring redress for the Danish Company. The interests—commercial and political—of foreigners in this country are identical, and when an injustice is done to one nationality the evil effect will, in all probability, be more or less felt by all the rest.

We understand that the committee of the Dramatic Club are making great progress towards completing the necessary arrangements for a performance at an early date. A number of theatrical properties have been ordered from London, and the proprietors of the Gymnasium have kindly consented to lend their building as a theatre.

There has been a great amount of excitement in the city during the week, in consequence of the literary examinations which have commenced, under the presidency of the Viceroy (in the absence of the Governor). These examinations are, we believe, held every three years, and attract candidates for literary honours from all parts of the province.

About sixty soldiers have been permanently quartered at the Custom-house, Pagoda Anchorage, by order of the Tartar General. This course has been rendered necessary, we suppose, by the undetermined action of the authorities in the matter of Mr. Blacklock's murder, and the disturbances connected therewith.

Messrs. Westall, Galton, and Co.'s Weekly Tea Letter, dated 11th Sept., says:—

Buying has continued en a very extensive scale; operators, however, do not appear yet to have satisfied their wants, and the market closes with a large business doing. Congou.—Owing to the rain that has taken place in the tea-producing districts, the bulk of the third crop, which was detained so long by the low state of the river, has now been enabled to come forward, and the arrivals amount to 45,600 chests. The quality of the crop must be considered decidedly inferior, as the teas are roughly made, and, as a rule, they are wanting in strength and point. Notwithstanding that a stock of nearly 110 chests has now accumulated, prices are fully maintained by the heavy daily settlements, and teamen remain very firm. Souchong.—Business in this description has been on rather a larger scale at former rates. Oolong.—Only one small chop has been circulated as settled. It is reported, however, that the undermentioned have been taken at the prices affixed:—Tong Sing, 1,442 half-chests at Tls. 25½ short; Kum Hung Wo, 772 half-chests at Tls. 25½; Sieu Yuen, 638 half-chests at Tls. 29; Yuey Mow, 2,200 half-chests at Tls. 25½. Flowery Pekoe.—No transactions. Scented Teas.—Purchases show no change. The export to date to Great Britain, the Continent of Europe, and the Cape of Good Hope amounts to 38,624,854 lbs., against 31,654,742 lbs. last year. To America, 87,555 lbs., against 154,936 lbs. last year; to the Colonies, 10,564,840 lbs., against 9,707,376 lbs. last year.

HONG KONG.

Our advices by the present mail extend to the 18th September; the P. and O. mail from London Aug. 6 arrived out on the 12th September. The following items of news are from the *Hong Kong Daily Press*:—

Captain Shearey, late of the *Deerhound*, has favoured us with fuller particulars of the loss of his ship. He reports that the British ship *Deerhound* left Shanghai for London on the 5th of August, and had light weather till passing the Prata Shoals, after which they experienced unsettled, squally weather, which

Digitized by Google

set in with thick and heavy rains. The wind was chiefly from the south-west. Owing to the state of the weather they could obtain no reliable observations after sighting the Scarborough Shoals, and for six days previous to the vessel grounding had no sight of the sun whatever. At 3.20 A.M., on the 30th August, a brisk breeze blowing at the time, the vessel grounded on what is known as the North-West and Danger Shoals. Every effort was made to get her off, but all to no purpose, as the water rapidly left the ship's side, and she heeled over on her port bilge. Later on in the day they commenced to throw cargo overboard, with the view of getting her afloat the next tide. The vessel began to make water fast, and her steering apparatus was completely carried away through her jumping on the shoals. The next day they had less water alongside, having only eight feet six inches at low tide, and nine feet eight inches at high tide, and only high tide once in twenty-four hours. Seeing there was no prospect of getting the ship off, but considerable risk of the masts coming down and breaking the boats, they were put out in readiness. The next day the boats were masted and provisioned ready for leaving the vessel. At 5.15 P.M., on the 1st Sept., they concluded to abandon the vessel. The boats were manned; the chief officer and seven men left in one; and soon after Captain Shearey, the second officer, and eight men, left in the other boat, and shaped a course for Manila. The first night after leaving they had torrents of rain and a nasty chopping sea, in consequence of which they were compelled to throw overboard a portion of the effects in the two boats, and two men had to be constantly bailing out the boats with buckets. At length they fell in with the German barque *Lesmona*, bound to Hong Kong, and were taken on board and treated with great kindness and courtesy until their arrival in Hong Kong on the 13th Sept. They ran a distance of nearly 400 miles in the boats.

Not long since we drew attention to a statement that the Hoppo of Canton had captured some thirty junks, all quite recently, while on their way to Hong Kong and Macao from Hainan, on the pretext that there was no treaty port there. We have now a complaint from Macao of a system of blockade of that port if anything still more vexatious and injurious than that established round this colony. According to a correspondent, even small craft laden with provisions are not allowed to enter Macao if they can be intercepted, with the result that articles of first necessity grow daily dearer and scarcer. The reason for this unprecedented course of conduct is not alleged. It can scarcely be pleaded that these provision boats are engaged in smuggling, and it is only to be supposed that the Chinese authorities intend, if possible, to complete the ruin of Macao. Whether the Portuguese Government will submit to this remains to be seen. But the fact, taken in conjunction with the efforts made to destroy the junk trade of Hong Kong, assumes significance, and threatens, if continued, to compel the unwilling interference of the British Government.

The Rev. J. Chalmers, M.A., of Canton, has for some time past been engaged in the compilation of a Chinese Dictionary. The prospectus which has been issued states :—

This work is wholly in Chinese. It is to be completed in 500 or 600 leaves, including Index of Primitives and Tables of Sounds. The primitives, about 1,000 in number, are given in the order in which they occur in *Kanghi* under their *radicals;* and placed prominently at the top of the page with sub-primitives, if any, immediately under them. All the derivatives found in *Kanghi* are ranged under each primitive in the order of their nearness of sound. All the pronunciations according to the best Chinese authorities are given by means of a fixed set of *initials* and *finals*, so chosen that each couple, inclosed by lines, represents at once the old or authorised *(Pei-wan-yun-fu)* pronunciation, the Pekingese, the Cantonese, and what is called the Southern Mandarin. When the method fails, in the case of a character in common use, the authorised pronunciation is followed, and the modern or local given separately. The meanings are copied from *Kanghi*, without the examples, references, and discussions. The confusion, obscurity, and frequent self-contradiction of *Kanghi* are to a great extent cleared up. The grouping of characters under their primitives is a great help to remembering them and writing them correctly, as well as to etymological and philological research. The work may be bound up in one volume, and will possess advantages of portability and facility of reference far above *Kanghi*. If the plan meets with general acceptance it may also be the basis of a future Standard Chinese and English Dictionary.

We believe that Mr. Chalmers has had in his mind the idea of preparing such a work for many years, and we trust that he will receive such encouragement from foreign sinologues as will ensure the success of the undertaking.

Piracy still flourishes along the coast and up the rivers of Kwang-tung Province. Proofs of this fact occur pretty frequently, though a great many acts of violence and pillage are perpetrated which never reach European ears. The other day a passenger boat, while sailing near Sam Shuey harbour, was suddenly hailed by a pirate junk; the pirates then fired upon the passenger boat, and the latter retaliated, but would eventually have fallen into the hands of the pirates had it not been for the opportune arrival upon the scene of another boat, the occupants of which had noticed the state of affairs. On the arrival of this boat the pirates sheered off with as much expedition as they were capable of. Both craft were somewhat injured by the shot, but no lives were lost.

A few days since a band of robbers went to a piece-good shop situated near the East Gate, Canton, and endeavoured to force an entrance. The watchman of the street perceived them and raised an alarm, when the ruffians turned upon him, murdered him, and then made off. The matter has been reported to the authorities.

A number of artillerymen went over to Kellet's Island this week, and while doing something there in connection with their military duties an explosion occurred, which sent the sand and stones flying in all directions. Lieutenant Kelly was cut about the face, and two or three others injured. One, who received a wound in the leg, had to be conveyed to the hospital.

Her Majesty's ships of war in harbour are the *Modeste* (senior officer's ship), the *Midge*, and *Ringdove*. During the stay of the *Modeste* here she has been supplied with a new shaft, and has had a trial of machinery, at which she attained an average of 10.3 knots per hour, and with the exception of excessive heat in the engine-room (over 150 degrees) everything worked highly satisfactorily. The Lords of the Admiralty having approved the offer made by tender for the purchase of the *Princess Charlotte*, for many years the receiving ship here, she has been handed over to her purchaser for the sum of $33,000 (£7,012), and she will be towed to Canton, there to be broken up.

The American gunboat *Ashuelot* arrived here on the 4th Sept. from Swatow, and left on the 9th for Whampoa to be docked.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 25th Sept.; no later mail from London had arrived out. We take the following items of intelligence from the *Straits Times*:—

The Governor and Lady Jervois, with their family, proceeded to Johore on the 20th Sept., on a visit to the Maharajah, and will not return until the 25th. The visit is one which has been long promised, and we think makes a fitting conclusion to the Governor's visits to all the chiefs of the Peninsula. Even since the founding of the Settlement of Singapore circumstances have brought the Chief of Johore into close contact with the British Government, and the most amicable relations have prevailed on both sides. There have been disputes and little difference since, but the Tumongongs have been always loyal to their engagements, and of all the chiefs of the Peninsula have been foremost in intelligence and enlightened enterprise for the development of the resources of the country they rule over. His Highness has always been famous for his hospitality, and to celebrate the visit of his Excellency the Governor, with Lady Jervois and family, a grand banquet is to take place in the Istana, at the capital, Johore Bahru, to which most of the principal residents, with officials, civil, naval, and military, have been invited. The Maharajah's gunboat *Pantie* and the colonial steamer *Pluto* convey the guests there and bring them back again.

The *Government Gazette* contains the statement of the Singapore Municipal Fund for the year 1874. We find the accounts summarised in the comparative statement of receipts and disbursements for 1873 and 1874, as follows :—

RECEIPTS.—Assessments on houses and lands, 1873, $95,565.17; 1874, $98,338.90; increase, $2,773.73; taxes on private carriages, 1873, $6,101.47; 1874, $6,612.67; increase, $511.20; taxes on registered carriages and carts, 1873, $13,953.86; 1874, $14,192.79; increase, $238.93; magistrates' fines and fees, 1873, $13,032.63; 1874 $15,764.66; increase, $2,732.05; fees on distress warrants, 1873, $499.72; 1874, $341.93; decrease, $157,79; fees for registration of cattle and hand carts, 1873, $126.58; 1874, $137.15; increase, $10.57; fees on licenses of slaughter house, wood and coal depots, oil boiling, &c. &c., 1873, $1,841; 1874, $1.841; fees under Hackney Carriages Act, 1873, $2,298.30; 1874, $2,583.25; increase, $284.95; cemetery fees, &c., 1873, $542; 1874. $496; decrease, $46; rent of roadsides, 1873, $972.74; 1874, $552.28; decrease, $420.46; rent of town, 1873, $200; 1874, $800; increase $600; miscellaneous receipts, 1873, $135.60; 1874, $820.43; increase, $684.83; total 1873, $135,269.07; 1874, $142,481.06; total increase, $7,836.24; decrease, $624.25.

DISBURSEMENTS.—Maintenance of police force, magistrates' establishments, 1873, $38,655; 1874, $54,860.95; increase $16,205.95; commissioners' office establishment and contingencies, 1873, $9,470.60; 1874, $10,038.24; increase, $567.64; conservatory establishment and; contingencies, 1873, $5,313.43; 1874, $9,378.87; increase, $4,065.44; maintenance of roads, 1873, $36,031.09; 1874, $26,754.49; decrease, $9,276.60; bridges and culverts, 1873, $1,298.36; 1874, $4,545.18; increase, $3,246.82; piers, river, and seawalls, 1873, $4,118.17; 1874, $7,948.39; increase, $3,830.22; drainage, 1873, $4,719.31; 1874, $2,222.36; decrease, $2,496.95; cemetery, 1873, $796.95; 1874, $644.29; decrease, $152.66; town hall, 1873, $801.82; 1874, $842.44; increase, $40.62; lighting town, 1873, $10,443.82; 1874, $10,428.04; decrease, $15.78; sweeping and cleaning town, 1873, $8,444.86; 1874, $9,221.84; increase, $776.98; interest on loans, 1873, $6,169.50; 1874, $1,680; decrease, $4,489.50; hackney carriages regulation, 1873, $766.55; 1874, $883.38; increase, $116.83; watering streets, 1873; $420.38; 1874, $398.36; decrease, $22.02; miscellaneous charges, 1873, $2,711.60; 1874, $4,048.02; increase, $1,366.42; total, 1373, $130,161.44; 1874, $143,894.85; total increase, $30,186.92; decrease, $16,453.51.

Digitized by Google

On the 21st Sept. Mahomed and Ganjeh, two peons in the Tanjong Pagar Dock Company's police force, were arraigned before Captain Walshe charged with having wrongfully confined two Manilamen belonging to the Spanish steamer *Paragua*. It appears that they had been arrested by the defendants, and kept locked up for some hours in the Dock Company's premises, and it was asserted that the defendants had gone round to the Manilamen's boarding-houses, and sought to obtain gratuities of $3 for each of the men thus unlawfully detained in custody. On being released the Manilamen went to Mr. Mencarini, the Spanish Consul, and stated their grievance, and Mr. Mencarini officially brought the matter to the notice of the Inspector-General of Police, who ordered proceedings to be taken against Mr. Hunt, the Dock Company's Police Inspector. The charge against Mr. Hunt, however, proved to have been a mistake, as when he appeared before the magistrate the complainants at once exonerated him, he having in fact advised them what steps to take. The case against Mr. Hunt was dismissed, and proceedings taken against the defendants above named, who, being unable to give valid reasons for locking up the complainants, were sentenced by the magistrate each to one month's rigorous imprisonment.

From Atchin there is no later intelligence. A correspondent, writing to the *Sumatra Courant* from the seat of war, states that the Commission appointed to inquire into the sanitary matters at Khotta Rajah and the neighbourhood has recommended, amongst various salutary changes, the planting around that place of the *Eucalyptus Globulus* and the sun-flower as means of improving the situation; and the necessary seeds have been provided by the army medical authorities. The wells of drinking-water are also to be re-arranged, attended to, and improved; and various other measures are to be adopted as contributing to the health and comfort of the troops; of which measures the supplies of good and clear cooking and drinking water are of course the most material. Fresh wells are to be sunk, and every precaution taken to keep them clean, and as much as possible apart from pestiferous rubbish, &c.

We extract the following notifications from the *Government Gazette*:—

The Governor has been pleased to approve of the undermentioned changes in Province Wellesley:—The Magistrate of Province Wellesley to cease to be Assistant Government Agent; and Mr. Sinclair to be relieved of his duties as Deputy Assistant Government Agent. The Province Wellesley Land Office to remain under the charge of Mr. J. K. Birch, Acting Collector of Land Revenue. The duties of Coroner and Registrar of Births and Deaths to be resumed by the Acting Assistant Superintendent of Police, who will also have charge of the Police at Salamah. The Harbour-master and Postmaster, Penang, to be responsible for the Sub-Post Offices and for the collection of Harbour Dues in Province Wellesley. Mr. W. E. Maxwell, Magistrate of Province Wellesley, to have temporary charge of the Trans-Krian District as Settlement Officer. Mr. C. W. Sneyd Kynnersley to be Assistant Magistrate, Province Wellesley, vice Mr. Sinclair.

The Governor has been pleased to appoint Captain O. H. Strong, 1/10th Regiment, to be Acting Assistant Superintendent of Police, Penang; Mr. E. Karl, Chinese Interpreter, to be a member of the Committee of the Pauper and Leper Asylums, Penang; and Mr. A. G. Morrison, Penang, to be a Justice of the Peace for the Straits Settlements.

The Governor has granted to the Venerable Archdeacon Hose, Singapore, three months' leave of absence, to proceed to Europe for the benefit of his health, with leave to apply to the Secretary of State for an extension.

The Commission of Inquiry nominated by Sir William Jervois for the purpose of investigating into the allegations of the hack owners and syces against the police embodied in their petition to the Governor, sat on the 22nd Sept. The police were there ready to go on with the investigations, but the hack owners and syces failed to put in an appearance either in person or by counsel. Clearly the police are in the right and the petitions in the wrong.

On the 21st Sept. there was a lively fight between a number of coolies at the Tanjong Pagar Dock, but it did not last long, and three of the combatants, having been taken in the very act, were prosecuted before the police magistrate, and sentenced each to fourteen days' rigorous imprisonment.

Mr. Birch, the British Resident at Perak, is expected in Singapore shortly. We understand the *Pluto* will proceed to Perak after her return from Johore, for the purpose of bringing Mr. Birch down.

The case of the coolies charged with the mutiny on board the schooner *Hawk* some time ago is now under investigation by the police magistrate.

Shipping Intelligence.

ARRIVALS.

At YOKOHAMA.—From London, Oct. 23, Formosa, Glenfalloch (str.); from Cardiff, Shalimar.

At SHANGHAI.—From London, Sept. 5, Guinevere; Oct. 2, Glenfinlas (str.).

At MANILA.—From London, Sept. 7, Sir Jamsetjee Family; from Liverpool, 11, Emiliano (str.); from Glasgow, Aug. 28, Janet Ferguson.

At SAIGON.—None.

At BANGKOK.—From London, Aug. 28, Pallas; from Havre, 30, Jacques Cartier; from Hamburg, 20, Johann Carl.

At BATAVIA.—None.

At SAMARANG.—None.

At SINGAPORE.—From Glasgow, Oct.—, Douglas Castle.

At PENANG.—From Liverpool, Oc. 27, Achilles (str.).

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London, Sept. 3, Stentor (str.).

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Oct. 27, at London, from Rangoon Eliza A. Kenny; 25, at Bordeaux, from Bassein, Pactolus; 29, off St. Catherine's Point, from Foochow, Thermopylæ; 28, at Portland, from Bangkok, for London, Bristolian; 29, at Plymouth, from Akyab, Maria Guiseppina; at Queenstown, from Rangoon, Prince Victor; 27, at Bremen, from Bassein, Condor, J. H. Epping; from Rangoon, Amaranth; 29, at Falmouth, from Akyab, Queirolo; at Queenstown, Affezione II.

DEPARTURES.—Oct. 26, from Glasgow, for Rangoon, Martaban (str.); 25, from Bordeaux, for Reunion, Nantaise Creole; 28, from Cardiff, for Rangoon, Picola; from Liverpool, Araby Maid; 27, from London, for Shanghai, Eliza Shaw.

SPOKEN.—Lennox, from London, to Singapore, Sept. 4, 5.28 N., 22.41 W.; J.L.P.W., from Cardiff, to Galle, Sept. 20, 1.20 S., 27.30 W., and George Croshaw, from London, to Singapore, Sept. 17, 8.15 N., 25.50 W.

MISCELLANEOUS.—A telegram received from Brouwershaven reports that 815 blocks of tin have been landed by divers from the wreck of the Thomas Sorby (str.), Java to Rotterdam, which stranded Oct. 6, at Oosterbank.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ADLARD—On the 23rd Sept., at The Retreat, Rangoon, the wife of Percy Harmer Adlard, of a daughter.
BAYLEY—On the 15th Sept., at Galle, the wife of Francis Bayley, of a son.
DUNLOP—On the 28th Sept., at Cluny Villa, Cinnamon Gardens, Colombo, Ceylon, the wife of Walter Dunlop, of a daughter.
HUTCHISON—On the 23rd Oct., at Canton, the wife of Alfred Hutchison, of a son.
RUSSELL—On the 2nd Oct., at Aden, the wife of Lieut. F. B. Russell, Royal Artillery, of a son.
TOWSE—On the 25th Oct., at Roff's Wharf House, Woolwich, the wife of William Wrench Towse, of a daughter.
YOUNG—On the 17th Oct., at Balham, the wife of J. S. Young, of a son.

DEATHS.

ELMSLIE—On the 18th Oct., at West Brighton, Sussex, aged 55, Adam W. Elmslie late H.M. Consul at Canton.
POOK—On the 26th Oct., at his residence, Lewisham, John Pook, aged 62 years.

The *Gazette* notifies that the Board of Trade have received from the Secretary of State for Foreign Affairs a copy of an Order issued by the Director-General of Finance of the Philippine Islands permitting the free importation of pig iron into the colony. Pending the approval of the Spanish Government this exemption from duty is only temporary.

Literature.

Rambles of a Globe Trotter in Australia, Japan, China, Java, &c. By E. K. LAIRD.

This is a pleasingly written narrative of a journey made by the writer through the above countries, and will be read with interest, especially by those who have visited any of them. A fair number of pages are devoted to a description of the writer's doings in Peking, Shanghai, Hong Kong, Canton, and Nagasaki, and residents in those parts will recognise many old friends in the ladies and gentlemen who are somewhat superfluously indicated only by their initials. There is not very much disguise to any who are interested in saying, for instance, "Mr. K——, of J. M. and Co., took me a ride on Sunday night," or indicating Mr. Wade, the wife of the Minister at Peking, as Mrs. W——. However, the book is amusing and unpretentious, and, with the capital photographs which it contains, will convey a very good idea, and fewer false opinions than most books of travel with respect to the countries which Mr. Laird has visited *en globe-trotteur*.

Trübner's American and Oriental Literary Record supplies us with the following interesting note:—The rare volume by the celebrated John de Laet, the eminent geographer, and one of the first directors of the Dutch East India Company, *De Imperio Magni Mogolis*, printed at the Elzevir Press in 1631, contains in the tenth chapter a fragment of Indian history communicated to him by his countrymen residing in India. Professor Lethbridge, of Hooghly College, translated this chapter, and communicated it through the *Calcutta Review*, from which it has been reprinted with additional notes, under the title of "A Fragment of Indian History, from the Latin of Johannas de Laet, 1631." This modest *brochure* of thirty-two pages contains an account of the topography of the Mogul Empire as known to the Dutch in 1631, and is full of most interesting information.

The same periodical also comments on an absurd paragraph which has obtained some circulation, to the effect that a history in 220 volumes of Colonel Gordon's campaign in China against the Taipings is being printed by the Chinese Government at Peking. This, it thinks, is probably distorted from the mention made last year in the *Record* of the Official History of the Taiping Rebellion from 1849 to 1864. The Chinese Government has always published *matières pour servir* of this kind, when it suits their purpose, and in the Chinese view of the suppression of the rebellion the part played by Europeans has a very infinitesimal share. Colonel Gordon's doings may, perhaps, be incidentally referred to in some of the memorials from the Governor of Kiangsoo, but will certainly not be found to have any prominence assigned to them in the work of 220 volumes.

Our American readers will, doubtless, peruse with interest the particulars which the *Record* gives respecting the progress of the Astor Library:—2,666 books have been added to the Library during the past year, that is to say, 1,938 by donation and 728 by purchase, making the whole number of volumes now on its shelves 150,306. The number of readers has considerably increased during the past year, viz., from 29,438 to 34,854. These figures, however, only refer to readers in the public halls and not to those in the alcoves, the original endowment, under the will of Mr. John Jacob Astor, was $400,000, but has been increased during this period of twenty-five years by additional donations and by investment of income, to $773,336.55, nearly twice the original legacy. The number of volumes in the Library in 1850 was about 20,000; in 1854 it had increased to about 80,000, and now that number is not far from doubled.

In its "Jottings from the Mission Field," the November number of the *Sunday Magazine* furnishes two unusually interesting items of information. The more important announces that "the London Missionary Society has resolved on having a department of female missionaries. . . . A commitete of fifteen ladies is to be appointed to take the oversight of this department. The number of women in India and China standing in need of instruction, and accessible to the efforts of Christian missionaries, is now very great, and during recent years the facilities for this kind of work have increased very greatly." The other and longer note comprises some extracts from the letter of a Wesleyan missionary at Galle, respecting the Buddhist Revival there. A Buddhist Sunday, it appears, is being revived:—"It occurs on the day of the moon's change, four times a month, commonly known as 'Poga Day.' Recently, however, a much stricter keeping of it has been called for, and now the Buddhist bazaar and the boutiques are all closed on 'Poga Days.' In 1864 I never saw or heard of such observances; now we can get nothing from Buddhists on 'Poga Days.'" The energy, however, with which the Buddhists have turned their attention to English education is even more remarkable. For fifty years this was left entirely to the Government and the missionaries; "now, however, Ritualists, Romanists, and Buddhists are successfully competing with Government, and have outstripped us completely. But I confine my-

Digitized by Google

self to Buddhist schools now. One was commenced last year, near Richmond Hill, and the result is that now our school here is scarcely worth keeping on. They are getting able teachers of *English;* and as they teach *nothing but English*, they prove an immense attraction to Buddhist parents. . . . Their argument is that English is the only language that pays, and hence it is simple waste for their sons to learn Singhalese."

The *Monatsschreft fur den Orient*, the paper published in connection with the Oriental Museum, to which we alluded recently, speaks of the discussion in Hong Kong with respect to fortifying the island, that has arisen in consequence of the hostile attitude taken by the Chinese. It observes that on account of the narrow entrances to the harbour, a single battery, with two or three gun-boats stationed at the passes, would render it impossible of approach. The present number also contains a good notice of the Exhibition at Tokio, Japan.

Professor Doyle, of the British Museum, has been nominated as Corresponding Member for Great Britain and Ireland of the Russian Committee of the third Session of the International Congress of Orientalists, which is to be held at St. Petersburg next September.

The last number of the *Moniteur des Soies* shows evidence of its service to the silk trade, and avails of the meeting of the Oriental Congress at St. Etienne to give a description of what will be discussed in reference to silk and other matters.

Naval and Military.

We understand that the Juno corvette, 6 guns, 2,216 (1,462) tons, 1,090 (400) horse power, which served for a considerable time in China, is to be re-commissioned for that station by Captain F. C. B. Robinson (1871).

The Lords of the Admiralty have tendered their thanks to Vice-Admiral Sir Charles Shadwell, K.C.B., late Commander-in-Chief on the China Station, for some interesting information he has forwarded since his return to England, respecting Port Hamilton and the Korean Archipelago.

The German war vessel Vineta has arrived in Plymouth Sound, *en route* for China.

The command of the 2nd Battalion 10th Foot, which has been vacant since June last, when Colonel S. F. C. Annesley retired, has been bestowed on Colonel C S. Dowson, late 3rd Foot, who is thus brought in from half-pay. The *Gazette*, which announces the above, also notifies the retirement of Lieutenant-Colonel P. B. Lucas from the command of the 1st Battalion 10th, which he has held since 5th June last.

The colonelcy of the 17th Lancers, left vacant in consequence of Lieutenant-General Balders's death, is filled by the transfer of Lieutenant-General Gibsone from the 8th Hussars, the 8th being given to Major-General R. de Salis, C.B. General de Salis served with the 8th Hussars in Turkey and the Crimea from May, 1854, till the peace in 1856, and also in India from 1857 until 1859.

Arrangements have been made by which the armourers of Her Majesty ships employed on the China, East Indies, Mediterranean, and North American stations shall be instructed in the mode of repairing the Martini-Henry rifle at the various Control Departments.

A system of defence of Malta by torpedoes has been decided upon by the War Department, and the military authorities stationed on the island are ordered to forward reports and plans upon the proposed scheme.

Commander A. Douglas, late director of the Naval College at Yedo, Japan, has been complimented by the Admiralty on the manner in which he conducted his duties while in the employ of the Japanese Government.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, OCT. 27

As soon as the fate of the Railway Bill is decided the Chamber will deal with the East India Budget, which is now ready for discussion. The Members will then take a very short recess till the last week of November, when the several Budgets will be laid before them. The Members of the First Chamber are summoned to meet on the second of next month.

Mr. van Zyll de Jong, ex-commander of the artillery in Atchin, publishes in the *Vaderland* a very rose-coloured article about the state of affairs in that country. Some people, he says, think it very strange that this war should last two years, but it must be remembered that we fought for eight years against the Padries on Sumatra; that our war with Bandjarmassin lasted six years, and that in Bali four years; and, moreover, that the United States were not able to overcome the North-American Indians in one hundred years. His conclusion is: "There are but a few small States who sympathise with the war-party, viz., Simpang Olim, Tandjong, Semantok, and Langsar on the Eastern Coast; Pedir, Merdoc, and Semalangan on the Northern Coast; and Telok Kroet and Tonom on the Western Coast. Of all these only Pedir and Simpang Olim are of any importance. If four fortresses (the author describes them in his article) were built, these States would very soon give in, and the Dutch flag would float everywhere in Atchin."

According to the Ministerial paper, *Het Dagblad*, one of the main causes of our dispute with Venezuela has been settled in a friendly way. Mr. Jesurum, a resident of Curaçao, and owner of the vessel *Midas*, which was declared by the Venezuelan authorities to be a lawful prize, opened negotiations with the President of Venezuela about the indemnification which should be paid to him. Mr. Jesurum has been satisfied, and it is hoped that the other matters in dispute will be settled in the same manner

The Geographical Society has issued a circular asking subscriptions on behalf of a scientific expedition to Sumatra. In June, 1874, this plan was brought on the *tapis*, especially with the view to make the necessary investigations in Upper Djambi and Korintji, which are hitherto quite unknown. The Government at once sympathised with the plan, and has given the necessary assistance, so that the prospect is now so promising that in a short time the commission will be appointed under the auspices of the Society. The cost is estimated at 25,000 guilders which is beyond the means of the Society, so that assistance from the nation and the Government must be asked for. There is not the least doubt, I think, that the small sum required will be soon collected, so that the expedition may start without delay. But it must be acknowledged that we, as a nation, do not show much sympathy with these undertakings, which are thought to be only of a relative value, notwithstanding that there is every ground for the belief that this unknown part of Sumatra is the very richest of the whole island n natural wealth.

It is feared that we are involved in a diplomatic question with Denmark. Some months ago a Danish steamer, the *Phönix*, ran down on the Scheldt a Dutch barge. The owner claimed an indemnification of f.12,000, but the steamer was nowhere to be found. Some days ago she passed Flushing, and the collision having taken place within our territory the Court at once gave permission to stop the steamer. A gunboat was ordered out, and when the *Phönix* steamed down the river she was ordered to stop. The captain, however, was obstinate, and some shots had to be fired before he would bring to. Much noise has been made about this very simple affair, but I think that our *diplomates* will be able to made it quite clear that the Danish captain is in the wrong. As soon as he had given proper bail he was allowed to continue his voyage.

Some days ago a Wedono (an inland chief from Java) arrived at the Hague; he intends to make a trip through Holland and Europe. He has had an audience of the Minister of the Colonial Department, but as he speaks only a few words of the Dutch language the discourse was a very short one.

Mr. de Rochmont has been admitted a Member of the *Littéraire* Society at the Hague. This fact is worth mentioning because a few black balls more and the "right hand of Mr. Loudon" would have been rejected.

Mr. J. P. J. A. van Zuylen van Nyevelt has been appointed Ambassador at the Court of Vienna.

Prince Alexandre, whose health is very bad, starts in a few days for Algiers, where he will stay during the winter.

The harbour at Batavia is still the topic of discussion in the papers. A large number of masters of East Indiamen will forward a protest to the Second Chamber against the existing plans, because the interests of the sailing vessels are totally sacrificed to those of the steamers. A rumour says that the Trading Company and the Java Dock Company will also address Parliament to the same effect.

AMSTERDAM, OCT. 28.

Some important alterations having been made in the East India Budget, especially regarding the collection of the taxes, and the increase of the salaries of subaltern officers in the East India Army, another examination in the sections is thought to be necessary.

All the amendments on the Railway Bill are out-voted except those regarding Amersfoort, Rhenen, Nymegen, Schiedam, Hoek van Holland, Zwaluwe, and Basch. The Bill was passed by sixty-five against seven votes, and the Chamber took recess.

The Tea auctions, in which 2,553/4, 2,609/8, 1,043/12, 413/16 chests Java were offered, went off satisfactorily.

The lots of Java Tobacco of sundry marks offered to-day by public auction were all sold.

CHINESE SMUGGLING.—The Chinese in San Francisco are inveterate smugglers, and conduct operations on an extensive and constantly-increasing scale, resorting to all kinds of ingenious devices to outwit the revenue officers. Silk and opium are the principal articles smuggled, the profit on a successful operation with the latter commodity yielding a handsome sum. During the year 1873-4 the amount of goods seized on steamers and vessels from China amounted to about $25,000. Since March this year the seizures have amounted to about $40,000. The largest seizures for years past was made recently by Captain Towies, night inspector. He had his suspicions aroused about some eighty-five boxes landed from a China steamer invoiced as oil; an order of examination was obtained, which resulted in the discovery of a very large quantity of opium in the boxes, which, on being appraised, was valued at about $25,000, and was forfeited. Another seizure was recently made by Captain Redden, and the goods consisted of 500 pounds of opium, worth $6,950, which had been concealed in ale barrels.

AN OPIUM DEN.—In California-street, San Francisco, a Chinaman named My Lee keeps an establishment of three rooms for the accommodation of infatuated lovers of opium. This place, the existence of which and its like has not been much suspected by the community, is frequented by a certain class of whites and Chinese, both male and female, who smoke at four bits a pipe. Upon this deadly den a detective, has made a descent, when he found five young women from eighteen to twenty-three years old, and some eight or nine young men, fumigating themselves in Oriental style amidst a pack of Chinese. The miserable guests were ordered to leave, and informed that they would be prosecuted for vagrancy if found again in such degraded surroundings.

THE Pacific Mail Company's steamer *Colorado* arrived at San Francisco on the 12th ult., with dates from Hong Kong to the 8th Sept., and from Yokohama to the 17th Sept.

The Eastern and Australian Company's steamer *Bowen* arrived at Singapore from Brisbane on the 29th ult., with Queensland mails for London, three days early.

THE P. and O. steamer *Surat*, with the heavy portion of last inward mail, left Gibraltar on the 27th ult., and is expected at Southampton this day.

THE P. and O. steamer *Khiva*, with the London mail of 17th Sept., arrived at Shanghai on the 29th ult.

FRANCE IN THE FAR EAST.

The *Revue Scientifique* of the 9th ult. contains a valuable article, by Mons. F. Garnier, upon the above subject. It is written in reply to one from the pen of Mons. P. Giquel, which appeared in the *Revue des Deux Mondes* as far back as May, 1872, and attracted a great deal of attention at the time. It will be recollected that M. Giquel took a most discouraging view of the interests and influence of his country in China and Cochin-China, and did all that masterly ability as an advocate and as an expert with reference to China questions could do, to make it appear that it was to the interests of France to abandon a position which had been taken up rather from ideas of national aggrandisement than of material or political advantage. The view which he set forth was well timed, as it was suitable to Republican as opposed to Imperial instincts, and it is not surprising that it produced a considerable impression. At the same time, France has not been induced in any way to alter her attitude in the Far East, nor do we think it is likely she will do so easily, seeing to how great a degree she is pledged by her previous acts. The chief subject of attack in the article in the *Revue des Deux Mondes*, to which the paper under notice is a reply, was the protection afforded by France to the Catholic Missionaries in China; and it was suggested that a solution might be found to the difficulties which have resulted from this, to trust the care and protection of the Missions to the Chinese officials themselves, and thus put an end to the conflicts of jurisdiction, rivalries in influence, and the quarrels without end or use which have repeatedly arisen. Against this view the writer in the *Revue Scientifique* enters a strong protest. He admits that the Missions in China require more organisations, and suggests with this object the formation of central colleges at Peking and Shanghai, but considers that it would be folly, above all at the present moment, to place this powerful means of influence and progress in the hands of implacable enemies. "To think that the Chinese Govern-
" ment would respect the work of the Missions the day
" when France ceased to be the arbiter of the difference
" which this influence provokes—what an illusion! Events
" would sooner or later give a cruel denial to the confi-
" dence of some diplomatists and some employés in the
" Chinese service who rely upon the firm intention of the
" Tsungle-Yamen to realise the progressive ameliorations
" demanded by the foreign Powers. China, we think
" we have demonstrated, arms herself, but does not
" become civilised. She borrows, from Western science,
" engineers, vessels, instructors for her troops; she
" buys Krupp's guns, and has fortifications constructed
" —she asks from us, in a word, all that separates and
" nothing which re-unites two civilisations. If two or
" three members of the Supreme Council display disposi-
" tions favourable to Europeans, the others arrogantly
" repel every idea of compromise." M. Garnier holds that the real opposition of the Peking Government to the Missionaries is based not upon religious grounds, as the Chinese Government is perfectly indifferent to religious propagandism—but upon the consideration that the Missions will be the means of diffusing European ideas in the interior of China; and in this view he is no doubt to a great degree right, as China has always shown herself indifferent in regard to religious teaching so long as it has not a political bearing. At the same time, it must be confessed that the Chinese have some grounds for fearing the political effects of the Missions to which France affords protection, especially in view of her position in Cochin-China. Upon this latter point M. Garnier holds that it is an entire error to represent that France does not derive any benefit from her position in the Far East. He points out that it is her destiny to create direct and fruitful relations between Cochin-China and the Celestial Empire; that Tonking, which is destined to become French, is watered by a large river leading to Yunnan, the most southern province of China, concerning the mineral and other products of which the French Commission which explored Indo-China and China five years back has obtained the most favourable information; and he concludes the portion of his paper to which he gives publicity at the present time, by a suggestion that the time has now fully come when France should pay serious attention to the part which she is called upon to play in the regions of the Far East, formerly so distant, but now brought, by improved intercommunication, almost to her doors.

SIAM AND LAOS.

We have before us a Blue-book, just issued, containing a Consular Report on the trade of Bangkok for 1874, and, in addition, an account of a journey made by Mr. Edwardes, Interpreter to the Consulate, during the present year, in Chiengmai and other provinces of Northern Laos, where the teak timber forests are found. The Foreign-office would do well, when they publish detailed notices of remote and little-known districts, to compare the "proofs" carefully with the original MSS., for errors in the spelling of the geographical names would thus be less likely to creep into the official text. Map-makers are apt to consult these occasional records of travel, and this is one way in which towns and rivers appear in our atlases under designations which only serve to mislead students. Thus, in the Report now before us, Ban Hawt appears as Baw Hawt, Rachawongse as Kachawongse; Mï Wang and Mü Wang cannot both be right as names of the same river; we strongly suspect that neither are correct, and that the word should be Më Wang; while Kamphen Plut or Kampheng Plut—for each form occurs—may be intended for Kampheng Phet.

Mr. Edwardes spent rather more than four months over his trip to Chiengmai and Northern Laos, and he devotes a considerable portion of his narrative to an account of the present condition of the teak forests, the method of working them, the quantities of timber annually cut, and the capacities of the forests for maintaining the supply in future years. Many hundreds' of natives from British Burmah, Tongsoos, and others, entitled to the protection of the English flag, are met scattered up and down the Laos provinces. Troublesome customers are to be found amongst them, though for the most part they are peaceable and well-behaved; but as foreigners they cannot get their disputes settled properly in the Native Courts, and it was with a view to considering the advisability of establishing a British Vice-Consul at Raheng or Chiengmai to look after our treaty rights and obligations, and to foster our trade in Northern Laos, that Mr. Edwardes was sent on his recent journey. We shall be glad to hear that such an appointment has been decided on. There are three principal causes which operate as a bar to the proper development of commerce in the timber districts of Laos, and the presence of a permanent British officer there would have a vast influence in getting rid of all three obstacles. The jungles are full of dacoits, so that neither life nor property are secure, and thus enterprise is paralysed. Then the chiefs are not always just; they are tempted to squeeze a trader who is known to have had a good season, or they neglect to see a creditor's claims settled, or to adjudicate a case brought into their Courts. Imperfect legal protection is thus the second evil. Lastly, general credit is bad. Petty chiefs contract to supply so many logs, take half the money in advance, and then break their agreements when the season for delivery arrives. Capital is not to be wooed into the timber trade when such practices are in fashion; but it would not take long to bring the half civilised chieftains to see that not to keep faith in a pecuniary

Digitized by Google

transaction is literally to cut the golden eggs out and kill the goose.

Besides these disadvantages there are several local monopolies in the various provinces which greatly harass trade, and which the authorities might readily be persuaded to forego, if shown that it was to their own interest to do so. Thus in Chiengmai sticklac has been a monopoly for some time past. A Chinaman pays $1,000 to a chief there for the privilege. No person is allowed to sell sticklac except to this farmer, and he buys at about one-fourth what he can sell again for. The betel-nut trade is placed under similar restrictions; the Chinaman of course soon grows rich and quits the district for his dear native land, but the inhabitants, the chief's own people, are kept poor; and thus, for the sake of a little direct revenue, the tax paying capacity of the province is permanently sacrificed. Salt is scarce in Chiengmai; it has to be brought by river all the way from Bangkok, and another article scarcer still is small change; neither bronze half-pennies from Birmingham factories, nor bank-notes at the rate of a hundred to the dollar, nor our own familiar postage stamps, being available in the teak districts. The difficulty is cured by a solution of salt. It is a fact that in the bazaar, if a rupee is tendered for some fruit, change is given in handfuls of salt.

Most of our readers know that a clumsy treaty was recently negotiated at Calcutta between ourselves and the Siamese, and intended to secure the satisfactory protection of British subjects in Northern Laos. In accordance, we suppose, with the provisions of this treaty we hear through Mr. EDWARDES of an English official sent on a temporary visit from Moulmein to Chiengmai to assist in trying complaints between British Burmese and Laos. As we read Mr. EDWARDES'S account the arrival of this new officer was followed at once by the re-opening of a number of old cases which had long ago been dealt with at Bangkok; but, of course, as a stranger had turned up those who failed formerly thought they might as well have a new go-in. It is quite certain that if a British official is to be appointed to exercise jurisdiction in Northern Laos at all, he must be directly subordinate and responsible to the Consulate at Bangkok, otherwise we shall have two independent Courts in the same kingdom; and the unsuccessful litigants will fly from one to the other, and perhaps, according to the evidence adduced, conflicting decisions would be given.

The import and export trade of Bangkok increased in 1874, a very large quantity of teel seed being now sent to France. British ships still secure the lion's share of the carrying trade; and it is curious to learn that the Siamese —who have for years past been very fond of the shipping line—do not now own as many vessels as formerly. The fact is, that many of the Siamese craft were not purchased till very old, and those which were sound are often ill-navigated; hence the great typhoon in 1873 played sad havoc among Siamese shipowners, who are never as careful to insure as they should be, and those who did not lose their property have thought it prudent to sell for fear of similar disasters hereafter. The Siamese Government have now got out a quantity of bronze coinage from England, and this plan appears to answer well; previously they had failed in an attempt to obtain currency for a number of paper-notes worth a cent a-piece. These must have been the smallest bank-notes ever issued.

WE are glad to notice that the Legislative Council of Hong Kong followed the recommendation of Chief Justice SMALE to postpone or give up the introduction of a measure which had been proposed in the Legislative Council, having for its object the amendment of the local Company's Ordinance in such a way as would permit companies to reduce the amount of their shares. In a colony so peculiarly constituted as Hong Kong such a measure might be of a somewhat dangerous character, and ought certainly not to have a retrospective force, even if there are grounds for introducing it at all. If any existing company desires to alter the amount of its shares, a special Ordinance ought to be asked for allowing it to do so, and such Ordinance ought not to be passed until the opinions of mercantile men in the colony have been carefully taken on the subject. It is important to bear in mind that the whole nature of a company may be altered in a place such as Hong Kong, so far as its standing with the public is concerned, and consequently in respect to the credit given to it, by a change in the amount of its shares. The shares being at a high figure will secure their being in the hands only of comparatively wealthy and reliable shareholders; and by placing them at a lower figure, those who have trusted the Company are virtually forced to transfer their trust to a different and presumably less reliable circle of investors. Altogether the question is beset with so many difficulties that we think Chief Justice SMALE was quite justified in calling upon the Council to hesitate before passing a measure of the kind; and we are glad to find that a suggestion of the Hon. Mr. KESWICK, that further consideration of the measure should be postponed *sine die*, was adopted.

IF telegraphic intelligence is to be depended upon, the Yunnan Commission, or rather the British members of it, will at last have actually started from Shanghai before these lines are in print, but even at the eleventh hour a new element of obscurity has been introduced into this matter, about which there has been so much official reticence, and so much irritating and apparently unnecessary procrastination. We learn now, through REUTER'S agency, that Messrs. GROSVENOR and BABER were to leave Shanghai on October 24, "accompanied by Mr. DAVENPORT." It is provoking that we are not informed in what capacity Mr. DAVENPORT joins the Commission. That his appointment as the *chief* Consular member of the Commission would be a good one, failing the employment of a Consul of longer experience, we at once admit; for, apart from the fact of his holding the QUEEN'S commission and his previous well-known services, he has recently distinguished himself by the determined attitude he took in the settlement of the Quinsan outrage. If any further recommendation were necessary, the knowledge he has acquired, as British Assessor in the Mixed Court, of the shifts and expedients to which the Chinese resort in civil and criminal cases, would be quite sufficient. But what appears to us inexplicable is how it happens that Mr. DAVENPORT is to "accompany" the Commission, one of the members of which is nearly ten years his junior in the Consular Service; we are not told that he has been appointed a member of it, though, possibly, that may turn out to be the real explanation of the enigma.

WE hear that Mr. F. W. MITCHELL, the late much-respected Postmaster-General of Hong Kong, who left that place some time back with the object—as was generally understood—of returning to his native country, has settled down in Tasmania on an estate which he has purchased there. His lengthened residence in Hong Kong and other Colonies rendered the climate of England unsuited to Mr. MITCHELL; and being, as we are informed, already known in Australia, he decided to pass his latter years in that quarter of the globe.

THE ironclad laid down for the Japanese Government at the yard of Messrs. SAMUDA, on the Thames, will be a heavy armour-clad screw ship of about 2,500 tons. A composite corvette has been laid down at EARLE'S yard, Hull, of about 1,700 tons, and a similar one at Pembroke. All these vessels are building under the superintendence of Mr. E. J. REED, the late Chief Constructor to our Navy, and will probably be completed in about two years.

WE understand that Admiral DUPERRÉ, the Governor of Saigon, is expected by next mail on leave of absence, and that General COLOMB will assume the interim government of the colony. The French Minister of Marine has not yet decided on a successor to Admiral KRANTZ, as commander-in-chief of the naval forces in the Far East.

AN open competition, under the usual regulations, is to be held in London, commencing on the 11th January next, for five Student Interpreterships. Four of the vacancies are in China and one in Japan, and successful candidates will be at liberty to choose between the two posts according to their order of seniority.

ORIENTAL CONGRESS MEETING.

(FROM A CORRESPONDENT.)

ST. ETIENNE, OCT. 26, 1875.

Many years ago a Provincial Congress of Orientalists was established in Germany. The scientific decentralisation of the ex-Germanic Confederation was very favourable for such annual session. But in France all the resources for study are to be found only in the capital, and our provinces have produced till now very few Oriental scholars. A Provincial Congress for such difficult studies was only to be undertaken by the founder of the International Congress of Orientalists, whose motto seems to be the old *audaces fortuna juvat*. It has been undertaken in one of the last cities of France in the department of sciences, and in one of the first French towns for commercial intercourse.

Nevertheless, against all the predictions of the Cassandras of the East, the success has been complete, and much over the hopes of the founders.

The reasons of that unexpected success are two-fold:—first, the Cambodgian studies, till now uncultivated in Europe, and very important for the knowledge of Buddhism and Indian fine arts, have been represented in St. Etienne by a very remarkable number of established scholars, among whom were nearly all the members of the great explorative expedition of Indo-China, under Comm. Doudard de la Grée;—secondly, the idea of associating the labour of Orientalists with those of the industrial and commercial world has been raised to the rank of a great and useful theory, very well adapted to the question of the progress of Oriental studies.

Our celebrated Egyptologist, Mr. F. Chabas, President of the Chambre de Commerce of Châlon sur Saone, explained with great talent how the basis of deciphering the hieroglyphical inscriptions of Old Egypt has been for him a commercial study, and has aided in forming his knowledge of administrative order and responsibility.

At the Cambodgian meetings M. de Villemeuil, Commander of the French Navy, has vindicated for Commandant Doudard de la Grée, the honour of all the idea and of the accomplishment of the French Expedition in Central Indo-China, and has given proofs that Lieutenant Garnier has founded his reputation on the labours and intelligence of the too-soon-forgotten D. de la Grée. Garnier was certainly a brave soldier, and a remarkable seaman; but he was not prepared by Oriental studies to add any important help to the important work of La Grée.

The vindication of M. de Villemeuil was agreed to by the meeting, and by order a commemorative medal of his vote will be coined and presented to M. de la Grée, brother of the celebrated explorer, and one of the vice-presidents of the session.

The results of the commercial meeting are very numerous. A great number of delegates of the Chambres de Commerce, and the most important large merchants and manufacturers of Lyons were present at that meeting. It is not possible in such a letter to give you a compendium of the numerous papers communicated on the occasion. But I must announce to you, according to a wish of the Congress, that a committee is appointed to prepare the constitution of a new Free Faculty out of Paris, under the title of Free Oriental Faculty for Commercial Purposes. Three professors are to be nominated in the shortest time, one for the Chinese language, one for the Japanese language, and one for Oriental laws and customs. The professors will not receive any salary from the Government, but are to be paid by a private fund; their situation will be better than that of the College de France, and of the reorganised Ecole du Langues Orientals of Paris.

Several important communications were presented by Professor Aymonier, Professor Leon de Rosny, Professor Chodjke, Professor Foucaux; MM. Desgeaud, President of the Geographical Society of Lyon; D. Michalowsk and D. Maurice, vice-chairmen of the Academy of St. Etienne; Madier de Montjau, the eloquent President of the Societé American de France, the rich and distinguished traveller in the Far East; Baron Ventor de Ravis, President of the Session, and ex-Governor of Karikal, East Indies; Julien Vinton, the great *Tamulist* of Bayonne, &c.

The local organisator of the session is a banker of St. Eteinne, M. le Mansois du Prey, a man of great knowledge and administrative ability.

We have had, during the time of the session just finished, a splendid banquet offered by the Municipality. It was a long feast of seven days for all the city; all the foreign members received twice as many invitations as they could accept. I have been three times *obliged* to take two dinners one after the other.

The last day a very curious performance of Oriental theatres was offered to all the members, when everything there was organised in the most tasteful and artistic style.

According to a vote of the Congress, the second Provincial Session is to be held in the next year at Marseilles, that city obtaining 61 votes.

GREEN TEAS.

A correspondence appears in *The Times* of the 25th ult., between Messrs. Forwood Bros., tea dealers, and the Customs, with reference to the working of the Sale of Food and Drugs Act (which comes in force next January), in respect to green teas. Messrs. Forwood and Co. point out that all green teas imported contain more or less colouring, and ask to be informed what amount of colouring matter will, in the opinion of the analyst, render the tea unfit for human food? To this very pertinent inquiry the Board reply that it is not in their power to answer the question put, but that when the Act referred to shall have come into operation, each case of the kind referred to will be decided on its own merits. To this diplomatic but scarcely satisfactory answer Messrs. Forwood rejoin, reiterating their question, and justly pointing out its importance in connection with instructions to agents in China; and the Commissioner replies, admitting the importance of the matter, but only repeating his previous answer. It cannot be denied that there is some ground under the Act for objecting to green teas, seeing that they are notoriously "faced;" but although the drugs used are undoubtedly unwholesome, it is to be doubted whether the case is really so severe a one that any prohibitory action need be taken in the matter. Ever since tea has been imported at all from China green teas have been consumed, facing and all, and we have certainly never heard of any one injured by the "facing," though we have heard that the tea itself, from the strong influence it exerts upon the nerves, is decidedly pernicious to some constitutions. In point of fact, it would seem that there is a great deal more reason to prevent the sale of the tea than of the "facing," and it would be carrying restrictive measures to absurd lengths to interfere with the sale of an article which has been consumed for more than a century without any pernicious effects being experienced from the special cause for which its sale would now be prohibited. The amount of metallic substance used in "facing," which is infused in each teapot-full of the beverage, is evidently far too small to affect anybody seriously, if at all. Probably a dirty metal teapot, such as is too often used, would be the means of getting much more of some salt of copper into our tea-cups than could ever find its way there from the colouring matter used by the Chinese; and really the case seems to be somewhat analogous to what a witty American paper once announced with respect to tobacco, when it solemnly declared it to have been ascertained that if a man smoked ten pipes of tobacco a-day he would imbibe sufficient nicotine into his constitution to poison him in ninety-nine and a half years. From all accounts this would appear to be about the amount of danger which we incur in drinking "faced" green teas; and if this is the fact, it will be a great mistake for our Government, in order to adhere to a logical and somewhat pedantic interpretation of an Act of Parliament, designed to meet cases of a very different description, to crush out a valuable trade, which will infallibly be the result of fussy interference in the matter. The Chinese will always "face" their teas; and if such cargo cannot be imported into and sold upon the London market, the trade must go to other countries. We doubt very much the wisdom of entrusting the decision in a matter such as this merely to the judgment of an analyst, however skilled and proficient. Some modifications are necessary in view of established facts; and we think, if the experience of half a century proves that no pernicious results have accrued from the consumption of a certain article, it is going too far summarily to prevent its sale because some drugs, which would be pernicious in a larger quantity than they are used in or are ever likely to be used in, enter into its preparation.

The following is the letter which Messrs. Forwood addressed to the Commissioners of Customs:—

We observe under the "Sale of Food and Drugs Act," 38 and 39 Vic., clause 30, that on and after the 1st of January next all tea imported as merchandise into this country is to be subject to examination by persons to be appointed by your honourable Board, and the clause goes on further to state that "if upon analysis the tea shall be found to be mixed with other substances . . . the same shall not be delivered, or if it be found unfit for human food the same shall be forfeited or destroyed in such manner as your honourable Board may direct." As importers of green tea into this country, we know that none of it arrives here without being mixed with other substances in the shape of colouring matter, and that, therefore, under the clause quoted above, it would be competent to your honourable Board to cause the same to be destroyed; and seeing that all the necessary arrangements for the examination of tea are made as regards this port, we venture to ask what course your honourable Board will adopt with tea of the nature described by us, and what amount of colouring matter will in the opinion of the analyst render the tea unfit for human food, or whether the very fact of any colouring matter will be considered to render it unfit for human food. Your honourable Board will, no doubt, be aware what a large interest the importation of green tea consists of; and unless some positive declaration be made as to the manner in which your honourable Board will deal with such importations of green tea, the business in it must cease, for no merchant would venture to import an article which might, at the caprice of an individua lanalyst, be condemned to be destroyed. Upon your honourable Board's reply hangs a communication with our correspondents in China as to whether they shall send us more green tea or cease shipping it altogether. We therefore respectfully request that we may have as speedy a reply as possible.

Digitized by Google

The Commissioners replied as follows :—

I am desired by the Commissioners to acquaint you that it is not in their power to answer the question put by you, but that when the Act referred to shall have come into operation each case of the description in question arising under it will be considered by the Analyst for Tea and by the Commissioners, and will be decided upon its own merits.

The Times prints the subjoined comments on the correspondence :—

If green tea is always artificially coloured, and always with some unwholesome colouring matter, it would be a direct contravention of the spirit and letter of the new law if the Commissions of Customs were to give free sanction to its importation. But, on the other hand, it can scarcely have been intended that the consumers should have no option, and that, whether they will or not, they should necessarily give up green tea after the 1st of next January. It would be enough, from every point of view, if faced tea were still suffered to be imported and to be sold to those who wish for it, but so only that purchasers had always a full knowledge of its nature and of the special kind of preparation to which it may in each case have been subjected. To import and sell faced tea as unfaced is the offence against which the Food and Drugs Act is directed. The tea merchants who thus came under its provisions could scarcely complain if their goods were confiscated or destroyed. The tea-drinkers would be secured, too, by a proper enforcement of the Act, against the dangers to which they have hitherto been exposed of swallowing an impure and possibly a poisonous substance in simple ignorance of its properties. Let our merchants, then, we would say, by all means go on with their old business. Let them import faced teas if faced teas are demanded from them. Let shopkeepers continue to sell them if they can find purchasers bold enough to continue to ask for them. But let all who are engaged in the transaction declare openly the nature of the goods they offer, and let them be only refused permission to import or sell anything which professes to be other than it is. Consumers who have no objection to drink tea which they know to be unwholesomely prepared should surely be suffered to go on drinking it at their pleasure. To deprive them of the means of doing so would be, perhaps, all the better for them, but it would be a species of paternal care which they would somewhat indignantly protest against. We would hope that all green tea, however certainly it may be faced, is not therefore necessarily injurious to health, or, in the words of the Act, "unfit for human food." It is, at any rate, a very slow and very mild description of poison, and not absolutely to be forbidden to those who, knowing what it is, are willing to take the risk of drinking it. Faced tea sold under its proper title would seem to be a perfectly legitimate article of trade. Faced tea sold as unfaced comes however under a totally different designation, and it is to the suppression of the trade in this that the Commissioners of Customs and the existing local authorities would do wisely to confine their efforts.

Since the above was written a further correspondence has taken place on the subject. Mr. Arthur Hill, M.D., objects to the facing of green teas as unnecessary, and urges that if the importation of faced teas were prohibited the process would soon be abandoned in China, and a Manchester tea firm, who express their opinion that the colouring matter on green tea is "a filthy compound of silicate of magnesium, China-clay, Prussian blue, turmeric, and other dirt," expresses similar views ; and are followed by Messrs. J. C. Sillar and Co., who declare that the statements made that all green teas have colouring matter upon them are untrue. On the other hand, another correspondent, who is evidently conversant with the subject, states that all who have any professional knowledge of the article will bear out the assertion that some of the finest teas imported are green teas, with a slight facing of colour, and holds that such facing is absolutely necessary in order to preserve the virtue of the teas.

TEA OR ARMS—WHICH IS IT ?

The following letter appears in *The Times* of the 27th ult. :—

21, Mincing-lane, E.C., Oct. 26.

SIR,—It is just twelve months since you did us the honour of quoting in your City Article an extract from one of our circulars, calling attention to the fact of the damaged teas from the *Gordon Castle* being refired and prepared for sale in this market. We regret to inform you that a large business is now being done in these teas. Several parcels have changed hands during the past week at 3d. per lb., and 2½d. per lb. has been offered and refused for 2,000 packages, the owners holding for 3d. When we saw the teas this time last year they had a disagreeable smell, and we hear now that they have become quite putrid. What connection the trade in unwholesome tea may have with the export of war materials to China we know not, but it is a coincident that the putrid tea was imported here by the *Gordon Castle*, and sixty tons of war material have just been landed at Shanghai from the same vessel. Furthermore, the principal buyers of the putrid teas in this market are said to be manufacturers of gunpowder. We hear that application was made, and very properly refused, at the Custom-house to export the unwholesome tea to Gibraltar and Malta for the use of our garrisons there. * * * * * * *

Your obedient servants,

J. C. SILLAR AND CO., Tea Brokers.

TEA WEIGHT NOTES AND WARRANTS.—On the 27th ult. a public meeting, which was attended by the representatives of all the most eminent firms in the tea trade, was held at the Commercial Sale-rooms, Mincing-lane, "to take into consideration a proviso inserted on tea weight notes and warrants (unknown to the owners thereof) by some of the proprietors of the bonded wharves, which destroys their validity." Mr. R. Hillhouse presided. The Chairman, after referring to the object of the meeting, said the provisos were so very important that they might be said to seriously impair the value of the notes and warrants, and they had been inserted without any communication to those concerned. The offence, happily, was confined to two wharves. They intended by one of the resolutions to nominate a committee to confer with the proprietors of Hay's and Butler's wharves as to the abandonment of the proviso and its omission from all future warrants. Mr. A. Steains, senior, in the absence of Sir H. W. Peek, moved the first resolution :—"That this meeting of the brokers and wholesale dealers in tea in the City of London hereby express their strong disapproval at the act of the proprietors of Hay's and Butler's wharves in adding a proviso to weight notes and warrants issued by them without consultation with the trade, whereby the validity of the documents is seriously impaired." He said they had a right to know by whom and for what motive the extraordinary innovation had been made. They regarded it as a departure from commercial rectitude. It affected bankers as well as themselves, for hitherto a warrant in Mincing-lane had passed from hand to hand with all the security of a Bank of England note—indeed, more so, because if a stolen note went into the hands of a third party for value received, the original holder could not claim it, whereas a warrant could be demanded into whose hands soever it had passed, even for value received. After reading a letter from Sir H. W. Beck, who condemned the proviso, he moved the resolution, which was seconded by Mr. W. J. Thomson, who said he fully endorsed everything which had been written by Sir H. W. Peek. After a few remarks from Mr. J. C. Sillar, who thought that if dealers continued to pay deposits to brokers as they did now they were certain to lose their money, Mr. A. Magnaic, in answer to Mr. Steains's remarks, said he believed he was the author of the proviso, as he believed his wharf (Hay's) was the first to use it. The object was the honest and straightforward one of stating plainly by a notice which they placed in the hands of everybody concerned, that a warrant could not be delivered from their wharf unless a bill of lading had been previously lodged there, &c. During the last four years they had issued about 400,000 of these notices. He did not understand, therefore, how the trade could have been taken by surprise. Mr. Hugh Smith (the partner of Mr. Magniac) said the clause alluded to was expunged on Saturday last. All that Hay's wharf had done was that they had told the public they required the goods to be "cleared" before they delivered up the warrant. He denied that the proviso destroyed the validity of the warrant. Mr. Arthur Capel said in business the haste was so great that the broker had no time to look at a weight note. Before the proviso was inserted the trade ought certainly to have been consulted. He believed, however, that the proprietor's of Hay's wharf had acted in good faith. Mr. Magniac, in explanation, said had they known that the notices would have passed unnoticed, and that the clause would have been regarded as it had been they certainly would have consulted the trade, and taken the greatest pains before the clause was adopted. It had never occurred to him or his partner to give what he might call notice of a notice. The Chairman said it was a departure from an established custom. After a few further remarks from Mr. Magniac in defence of the insertion of the proviso, and from other gentlemen, the resolution was carried *nem. con.* Mr. Capel then moved, and Mr. R. H. Salmon seconded, the following resolution :—"That this meeting will not receive such documents as weight notes or warrants within the meaning of contracts." The resolution was carried unanimously, as was also the following, on the motion of Mr. J. Dummett, seconded by Mr. S. Harrison :—"That a committee be now formed of brokers and dealers to communicate with the importers and bonded warehousekeepers on the subject, consisting of the following gentlemen :—Sir H. W. Peek, and Messrs. A. R. Capel, R. Lloyd, F. Peek, A. Steains, and W. J. Thompson." A committee was afterwards formed for the purpose of protecting the interests of the trade as far as possible; and the proceedings terminated with a vote of thanks to the chairman.

THE SINGAPORE GAS COMPANY.

The half-yearly meeting of the Singapore Gas Company was held on the 26th ult. at the London Tavern, Mr. H. P. Stephenson in the chair. The Secretary having read the notice calling the meeting, the report was taken as read.

The Chairman said that compared with the corresponding period of last year the working was generally very nearly the same. They had more capital, which was laid out in the extension ; their position was worse as regarded the losses on exchange, and worse in regard to coke, and these were the three main points in the accounts. Taking the accounts more in detail, the increase in the capital was £5,380, but in the cash in hand there was an increase of £3,490 ; their debenture bonds were £900 less, and sundry creditors £1,900, whilst on the credit side the amount spent on works was £1,600, and the stock on hand £2,570 less. With regard to the profit and loss account, the coal carbonised was within £15 of the same period last year, with an increased rental of £350, whilst the profits on sundries were £240 less, and there was also an increased loss of £180 on exchanges. They proposed to pay the same dividend, 7½ per cent., and had written off only half per cent. for depreciation, which was not quite so good. He concluded by moving the adoption of the report.—Mr. Forman seconded the motion.

In reply to questions, the Chairman said they were still paying the high price for coal from Australia, but freights had gone down; though this did not affect them as yet. It would, however, be slightly felt next half year, and still more in the following half year. He believed the shareholders generally were satisfied with the 7½ per cent. dividend, and though it was desirable to pay more if they could, yet 7½ per cent. regularly maintained could not be considered as unsatisfactory. The stock consisted of coal £2,400, fittings £5,620, and coke and lime and oxide. He did not think it would be advisable to reduce the stock of coal with the uncertain freights from Australia and the uncertain supply, as they could not buy in Singapore as they could in London, and he did not consider it safe to have less than nine to twelve months' supply on hand. Their stock had been lower, and they had had to pay through the nose to keep up the sup-

Digitized by Google

ply; even in an English company in the winter he should not consider himself safe unless he had two and a half months' supply of coal on the works. With regard to the fittings they had reduced them by £2,570; £5,620 was, he considered, a large amount to lay by in fittings, but he was afraid to promise any reduction, as if they found freights heap they might lay in largely. The report was unanimously adopted, and the dividend, at the rate of 7½ per cent. per annum, declared.

THE ARMAMENTS OF CHINA.

(To the Editor of the *London and China Telegraph.*)

Sir,—I agree with you, and think that the progress which the Chinese have made is over estimated by such writers as you alluded to in your able article headed "Li-Hung-Chang," of the 18th inst., and I also think that such letters which you commented on are calculated to do the Chinese far more harm than good, for most of us know they are inflated enough already with pride and conceit, without the aid of foreigners helping them on in their conceited course.

The castings, muskets, and guns which the writer to *The Times* make mention of, even with the aid of Krupp guns, will be of very little service to them in another war with England without disciplined troops, which they have not got, and are not likely to have for many a day to come.

If the writer to *The Times* on Chinese progress wishes to do the Chinese a good turn, let him tell them at once, "You have succeeded in your arsenals under the aid of European teachers; you are good copyists, but you do not produce brave and disciplined men, which are the real essentials in a war with any Power."

If such writers as I am alluding to are still of opinion that we underrate China's warlike prowess, I refer him to the late miserable *fiasco* between them and the Japanese in their little dispute about Formosa, and if that disgraceful "cave in" by a large and wealthy country to a very small one like Japan—a country that has only been practically known to Europe for a few years—is not enough to teach such as "Kwang Tung" that we do not undervalue China's progress, I don't know what will.

England has no need to fear, and will not fear, China's progress in warlike material. Let them go on with their castings, and men-of-war building, under the tuition of foreigners; when the day comes the British navy and army will render a good account of the lot.

There are more ways to Peking than the route *viâ* the Peiho, and I do not think you will catch another English admiral taking that route at dead low water again; the next time we have wrongs to redress with China our army will pay the Emperor a visit from another quarter, while our navy will be taking stock of the Chinese newly-created navy on the seaboard.

—I remain, &c.,
OLD CHINA.

Oct. 22, 1875.

Monetary and Commercial.

We have received the report of the Union Iusuraace Society of Canton, which was to be presented to the meeting on the 21st Sept. The statement of the business for 1874 shows an unsatisfactory result for the last half of that year. The nett premia collected was $439,614.42, making a total for the year of $773,648; while the losses paid from 1st July to 31st Dec. were $515,782.11. The total profit for the year was $27,000, which, in conformity with the Articles of Association, will be carried, half to reserve fund, and half to contributing shareholders in proportion to their contributions. The poor result of the year is attributed to the unusually large number of first-class steamers lost during that period, and to the unpreeedented and disastrous typhoon of 1874. For the half-year ending June 30, 1875, the business of the company was again upon something like its old remunerative basis. The premia amounted to $407,934.68, while the losses paid were $116,807.67, leaving a balance at credit of working account of $250,958.25. The position of the Society, so far as could be ascertained on the 15th Sept., when the report was issued, was as follows:—

Balance of working account as above	...	$250,958.25
Estimate of premium earned since	...	180,000.00
		$430,958.25
Estimated losses to that date. .	...	119,000.00
Balance	...	$311,958.25

The directors report that the result of the London agency has been satisfactory, the risks having been well selected, and the business remunerative.

The report of the directors of the Royal Mail Steam Packet Company, together with the accounts from January to June, have been issued. There is little to notice in the report beyond the regret expressed by the directors at the loss of two of the finest ships of the Company—the *Boyne* and the *Shannon*. These losses were felt, they say, the more severely that they happened in the first year of the new mail contract, when the reduction of the subsidy, the heavy fall in freights, and the general depression of the shipping interest "already called for the most anxious supervision in all the details of the Company's business." The dividend recommended is £1 10s. per share. There will be no bonus from the insurance fund for some time to come, but it is satisfactory to find that its balance in favour of the Company is £246,000. The net earnings of the half-year were £107,287.

We learn that Mr. James White, ex-M.P. for Brighton, is now *en route* for Japan and China, *via* San Francisco. Mr. White's connection with China dates back to 1840. In 1843 he conducted the *Friend of China* newspaper at Hong Kong, and subsequently went to Shanghai, where he made a fortune in silk, and returned to London.

The Pacific Mail Steamship Company's new steamer *City of San Francisco* sailed on 21st September from New York for San Francisco, to take her place there on the Australian mail route, under the new postal contract with the Governments of New South Wales and New Zealand. She will be followed by the sister steamers *City of New York* and *City of Sydney* at intervals of about four weeks. The terms of the contract require a speed of eleven knots per hour.

The total quantity of tea delivered from the bonded warehonses in London during the week ended the 23rd inst. was 3,408,931lb. The duty received amounted .to £58,215, being rather more than 1 per cent. less than that of the preceding week.

The very heavy rainfall at Shanghai, reported by last mail, has caused considerable damage to the cotton crops in the district. Mr. W. B. Chalmers writes to *The Times*, pointing this out, and that it may be expected to lead to a larger demand for Manchester goods.

Some distrust is shown by parties interested in the *Thermopylæ*, from Foochow 8th July, with a cargo of 1,400,000 lbs. tea, and reinsurances have been effected at four to five guineas. She has just been reported.

Mr. William Henry Stone has become a partner in the firm of Messrs. Frith, Sands, and Co., East India merchants, of Old Broad-street.

Bar Silver remains at our last quotation; the demand for India has for the moment ceased, the existing orders being for the Continent. Mexican Dollars have been sold at 559-16d. per oz., showing no alteration in price.

Mr. C. J. F. Stuart, chief manager of the Oriental Bank Corporation, will shortly leave London on a visit to South America, California, and Japan, for the benefit of his health.

ARTICLES OF IMPORT.

TEA.

We reported a quiet market last week, and business during the interval has been limited at a decline of ½d. per lb. on Congous below 1s. 2d.; common Scented Caper has also given way ½d. per lb., buyers acting cautiously, fearing large supplies, of which the Lord of the Isles, of Canton, brings 5,000 boxes, with heavy shipments advised by telegram. All tea of good quality offers good prospect of seeing better prices as the season advances, as supplies cannot be heavy, and will be brought by sailing vessels; the first, the Cutty Sark, from Shanghai, arrived 20th inst., with a good assortment, chiefly good medium to fine, which, though selling slowly, are doing much better than teas of similar quality by steamers early in the season, and is another instance of the folly of the modern system of shipping six months' supplies in two months, to the injury of all concerned in importing. The postal advices from Hankow to 28th Aug. furnish much interesting information relative to the market, and prices for tea had touched a point as low as those ruling when the port was opened in 1860. Teas were selling at taels 10¼, and should dissipate the notions of buyers in China that "tea cannot be produced as cheaply as formerly." It would seem that the astute teamen have been gulling foreigners for years past, and may in a measure account for the heavy losses which importers have sustained.

Messrs. Thompson's Circular says:—The market has continued quiet. Foochow Congous: Siftings and broken leaf have been sold from 8½d. to 10d.; common to fair, 10½d. to 1s. 1d., the chief demand running upon Amoy descriptions. Medium to good are firm at late quotations, 1s. 4d. to 1s. 7d. per lb. Black Leaf Congous: Common to good common, 10d. to 11d., are little inquired for. Fair 1s. to 1s. 3d., and medium at 1s. 4d. to 1s. 6d., are unaltered. Sales, ex *Cutty Sark*, have been made at 1s. 5d. to 1s. 7d. per lb. Fine are held for late quotations. Tayshans: Several parcels of common, in boxes, have been sold at 10d.; fair, 11½d. to 1s. 1d. Scented Teas: Canton Capers maintain the late advance, and sales of fair to medium have been made at 1s. 2d. to 1s. 5d. per lb., but Old Season's common to fair have sold at 9d. to 10½d. per lb. Orange Pekoes, good common to fair, 11d. to 1s. 2d. per lb. Foochow kinds are very dull of sale. Oolongs: Medium to good, 1s. 3d. to 1s. 5d. Green Teas: In these descriptions there is not any alteration. The United Kingdom stock on the 30th Sept., 1875, was estimated at 86,500,000lbs., against 74,000,000lbs. in, 1874.

Messrs. Capel and Co.'s Circular says:—*Congous.*—Red-leaf kinds: Siftings remain very firm, especially for those of good quality. Old season's common show no change; new have sold at about previous prices; fair to good Saryune kinds have been saleable, bnt for the plain Kaisow kinds there is not much demand; fine Kaisows have been in moderate request; in finest there have been no sales to report. Pak Lin kinds remain much as before. Black-leaf kinds: Old season's common to fair have sold from 10d. to 11½d. per lb.; in new common have been dull of sale; fair to good medium have been taken at about former prices; business in good to fine has been checked by the firm-

Digitized by Google

ness of importers, finest remaining only in limited request. Newmake kinds: A large business has been done in common kinds from 10d. to 10½d. per lb., fair at 11d. to 1s., with some good kinds from 1s. 1d. to 1s. 3d. per lb. A few sales of Oolong have been made at last week's prices. In Souchongs there is no alteration to notice. Flowery Pekoes remain firm. *Scented Teas.*—Canton Capers have sold rather lower, at public auction, from second-hand parcels. Privately there has been a fair demand at about former rates, good to fine kinds being very firm. Long-leaf Orange Pekoes have sold steadily. Foo Chow Capers remain depressed. In Orange Pekoes the few sales made have been at previous prices, but the demand is at the moment limited. *Green Teas.*—The market has been more settled. The fine lines of Moyune Gunpowders have sold steadily, but Ping Sueys and the commoner kinds of Moyune are still realising low prices. Public Sales still remain on a moderate scale, only 9,709 packages having been offered and sold without reserve. The Deliveries for the week, as compared with last year, are as follows, viz.:—

	1875. lbs.	1874. lbs.
Home Consumption	2,225,289	2,037,640
Coastwise	861,400	901,681
Exports	419,497	601,485
...	3,506,186	3,540,806

SILK.

The Silk Market is still very dull, there being little or no demand for export, and only a moderate business for the home trade. Prices of China Silk show no change, but those of Cantons and Japans are lower. Deliveries 1st to 27th inst. inclusive:—China, 2,545 bales; Canton 423; Japan, 347; total, 3,315 bales.

CHINA STRAW PLAIT.—At auction of 165 bales offered 60 bales sold, mottled at £7 to £9, ordinary to middling white £8 10s. to £11 5s., good to fine £13 to £18 15s., with one lot at £26 5s. per bale.

CAMPHOR has continued quiet, about 300 cases China having changed hands at 69s. to 70s. for landing and reweights respectively,

CHINA PRESERVES.—In auction yesterday 451 cases China Ginger just arrived (Chyloong brand), 25 cases sold, large jars at 8¾d., small ditto 10¼d. per lb.

CUTCH is quiet, but prices are firmer; privately about 700 boxes fine Pegue having been sold at 26s. 6d. for Elephant and 26s. for Cock brand, and 10 boxes of the former in auction sold at 26s. per cwt.

COCOANUT OIL.—The market has subsided into a quiet and rather easier state. The business done privately includes 40 tons fine Cochin at £42, 25 tons Ceylon at £39, and some hogsheads at £39 10s. per ton.

CARDAMOMS.—Two cases Ceylon fair quality, but partly lean and shelly, were sold at 6s. 6d. to 6s. 8d. per lb.

COTTON.—The improvement noticed in our last issue has entirely disappeared, and the market has remained inactive throughout, prices closing slightly cheaper, viz.:—Tinnivelly, 4⅞d. to 6d., middling to fine; Western Madras, 4⅝d. to 5½d., fair to fine; Northern ditto, 5⅜d. to 5½d., good fair; Coconada, 4 13-16d. to 4 15-16d., fair to good fair.

DRAGON'S-BLOOD has been steady, but quiet.

EBONY has continued in steady demand, and of 111 tons in auction the greater part was sold at £11 to £18 for fair to fine.

ESSENTIAL OILS.—*Cinnamon* quiet and easier; of 4 cases good sweet, 2 sold at 4s. 4d. to 4s. 6d.; of 18 cases leaf, over half sold at 1¼d. to 2½d. for ordinary to fair. *Citronelle* has been firmly held, but quiet, and 21 cases offered at public sale were retired. *Lemon Grass* has been quiet; of 50 cases at auction half sold at 2¼d. to 2⅝d., being easier. *Anniseed:* Early in the interval some quantity changed hands, chiefly at 10s., but quite recently 9s. 6d. has been accepted. At auction of 34 cases, a few sold at 10s. Afloat about 40 cases sold at 9s. *Cassia* quiet, and about 10 cases sold at 4s. 2d. for worked. Afloat last price 4s. *Nutmeg* quiet; of 56 cases a few sold at 7d. for good white, being previous value.

GAMBIER has been quiet, and prices close rather lower, on the spot about 1,000 bales block have been sold, closing at 27s. 6d. to 28s., and 100 tons just arrived at 27s. ex-ship. At auction 808 mats free cubes partly sold, fine pale at 39s.; of 1,000 mats pressed, 55 mats damaged sold at 30s.

ARTICLES OF EXPORT.

MANCHESTER GOODS.

The Market has continued quiet, with an undercurrent of demand, principally for low and ordinary 39-in. Grey Shirtings. The obstacle to activity has been the refusal of manufacturers to make the reduction at which considerably increased orders could be executed, and only where stocks have accumulated has there been any inclination to accept the easier rates that have led to business. For Yarns the inquiry is only limited, and prices are not so well maintained as for Goods.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 28s To Singapore: 14s. To Batavia and Sourabaya: 20s. To Galle: 18s

CASUALTIES.

MALTA.—Oct. 19, the Tom Morton (str.), from Foochow, and the Africa (str.), from Hong Kong, both for London, have put in here, the former with slight damage to machinery, the latter with boilers leaky.

MAURITIUS.—Oct. 25, the Yosemite, from Manila for Boston, put in here on the 12th inst., leaky, and by order of surveyors is discharging her cargo for another survey.

SOURABAYA.—Sept. 8, the Amity, from Ilo Ilo, for London (sugar and mats), was carried by strong currents, Aug. 31, on to a reef about ten miles N.E. of the island of Bawean, in the Java Sea, where she became a total wreck; crew saved. The master arrived here Sept. 3 in a native boat; he states that the reef upon which the vessel struck is a wash, and he fears that there is but little chance of boats getting alongside. Latest advices from the wreck report twelve feet water in hold; the wreck will be sold by auction.

MANILA.—Oct. 20, the Roodee, loaded with a full cargo for London, caught fire and has been scuttled in four fathoms water; all damaged cargo will be landed and sold; at present discharging between decks for examination; decks badly burned, but it is not thought that the vessel will be much injured, and it is expected that she will be easily raised.

AMOY.—Oct. 28, the Alexandra schooner, from Swatow, is ashore north of Formosa, and will probably be a total loss; crew, except one, lost.

MISCELLANEOUS.

GIBRALTAR.—Oct. 22, passed, Holland (str.), from Batavia, for Nieuwe Diep; 24, Torrington (str.), from Batavia, for Rotterdam.

SUEZ.—Arrived Oct. 26, Erl King, from Yokohama; Diomed, from Shanghai, both for London.

ADEN.—Oct. 9, the Thingvalla (str.), from Antwerp, for China, which put back to this port with three blades of propeller gone, has shipped her new propeller, reloaded, and will proceed immediately.

BATAVIA.—Sept. 22, the Golden City, from Newcastle, which arrived here with master dead and three of the crew drowned, the vessel having been struck by a heavy sea, has since been surveyed. The damage to her is all above the water-line, and the vessel is supposed to be perfectly tight; cost of repairs estimated at 9,425fl. She has gone to Samarang to discharge.

OCT. 27.—The Grenada, from Greenock, for Java (coals), grounded in Sapudi Straits, but was got off without assistance, and with no apparent damage.

The Birker, from London, for Hong Kong, which put in here from Anjer, owing to contrary currents, and with windlass broken, has sailed.

MANILA.—Sept. 15, the Camiguin (str.), which stranded at the island of Camiguin, April 9, and was afterwards sold as a wreck, arrived here to-day.

FALMOUTH.—Oct. 25, the St. Aubin, from Cardiff for Singapore, which put in here on the 17th inst., leaky, has been surveyed, and commenced discharging her cargo.

The P. and O. steamer Deccan, which lost her screw on the outward passage with the Bombay mail of Sept. 30, has arrived at Southampton. She was towed from Gibraltar by the Company's steamer Khedive.

The Alaska was despatched from San Francisco to Japan and China, in place of the City of Tokio, as that vessel had to undergo repairs.

REPORT OF THE THOMAS SORBY (STR.).—Samuel Jackson, master of the Thomas Sorby (str.), 952 tons, of Middlesborough, from Batavia, Aug. 12, for Rotterdam (general produce), reports:—Proceeded, and all went well until the morning of the 6th inst. About 6.45 A.M. sighted the buoy on the N.W. side of the Oosterbank, being rather close to, owing to the sun shining over the buoy and making it very hard to distinguish on the water. The ship being steered due E. and the buoy right ahead, immediately put the helm hard a-starboard and ordered a cast of the lead. At 7 A.M., tide about high water, weather hazy, wind W.N.W., a fresh gale, with a strong sea from the westward, ship then steaming half-speed, heading E.N.E. by compass, helm hard a-starboard, struck the telegraph "Full-speed ahead," ordered a cast of the lead, and at the same moment felt the ship strike the ground. Immediately ordered "Reverse the engines full-speed astern," the sea then making a clean breach over the port quarter. Finding there was too much sea to go astern against it struck the telegraph "Full-speed ahead," the helm being worked accordingly. She then struck so heavily that the boilers were unseated and stopped the engines. The engineers reporting ship making water ordered all the pumps to be set to work. They were kept going until the fires were put out by the water, the ship having burst in the bilge. Deponent then gave orders, "Get the starboard lifeboat out." Sent her ashore with the passengers and ten of the crew, in charge of the first mate. Then got the other boats ready for saving the remainder of the crew. About 11 A.M. the second boat left the ship, in the charge of the third mate, and the remainder of the crew left the ship at 2 P.M., second mate in charge. Deponent states that the passengers and all the crew were saved by the ship's boats, with the exception of himself, and that after staying by the ship until he found her broken, and filling with water, he was taken out by a Dutch pilot-cutter, the vessel then being a total wreck. The mails were recovered the next day, and safely delivered to the postal authorities.—Middlesborough, Oct. 16.

DRUGS, CHEMICALS, &c.,

WHOLESALE AND FOR EXPORTATION.

JAMES EPPS & Co., Homœopathic Chemists, 48, Threadneedle-street, and 170, Piccadilly.

HOLLOWAY'S OINTMENT

Mr. J. T. COOPER,

In his celebrated TRAVELS IN CHINA, published in 1871, says:—

"I had with me in my travels a quantity of "Holloway's Ointment. I gave some to the people, "and nothing could exceed their gratitude: and, in "consequence—milk, fowls, butter, and horse-feed "poured in upon us, until at last a teaspoonful of "Ointment was worth a fowl and any quantity of "peas, and the demand became so great that I was "obliged to lock up the small remaining stock."

This fine OINTMENT is invaluable in the cure of BAD LEGS, BAD BREASTS, OLD SORES, wounds, ulcers, gout, rheumatism, and all skin diseases.

THE NATIONAL SAFE DEPOSIT COMPANY (Limited).

1, Queen Victoria-street, Mansion House, London.
Capital, £500,000. Subscribed, £250,000.

DIRECTORS.

J. H. Pulleston, Esq., M.P., Chairman.
Lawford Acland, Esq., Chairman Ceylon Company.
George Arbuthnot, Esq., Chairman Oriental Bank Corporation.
George W. Barnett, Esq., Barnetts, Hoares, Hanburys, and Lloyd.
Horatio S. Coulson, Esq., Director United Discount Corporation.
Lord Wm. M. Hay, Director Eastern Telegraph Company.
Hugh F. Sandeman, Esq., Director Scottish Union Insurance Company.

The Company is now ready to let to approved applicants Safes in their Fire and Burglar-proof Vaults, at rents from £2 10s. to £30 per annum.

No insurance is necessary.

The main object of the Company is to provide the public with a perfectly secure, yet inexpensive repository for valuables of every description, and relieve them from the harassing and wearing strain occasioned by the personal care of such property. The Company take for safe custody all kinds of securities, valuable property, bonds, wills, marriage settlements, and other documents, and guarantee their value when required. Drawn bonds, coupons, &c., collected.

The Company undertake the duties of trustees, receivers, and executors, and act in other confidential capacities.

The Great Vault is superior to any building in the world intended for similar purposes. The utility of these Safes, which are entirely underground, is undeniable, as bankers are not responsible for deposit of valuables.

The loss of many kinds of securities is irreparable, the loser having no recourse against the Government or other party issuing them. A constant watch is kept both inside and outside the building. There is a room especially adapted and reserved for ladies. The premises can be inspected, and further particulars obtained on application. HENRY WEST, Manager.

HONG KONG AND SHANGHAI BANKING CORPORATION.

Capital, $5,000,000. All paid up.
Reserve Fund, $100,000, at exchange of 4s. 6d.—£22,500.

COURT OF DIRECTORS AND HEAD OFFICE IN HONG KONG.

MANAGER—D. McLean, Esq., 31, Lombard-street.
BANKERS—London and County Bank.

BRANCHES AND AGENCIES.

Hong Kong	Hankow	Saigon
Shanghai	Yokohama	Singapore
Foochow	Hiogo	Bombay
Ningpo	Manila	Calcutta

The Corporation grant Drafts upon, and negotiate or collect Bills at any of the Branches or Agencies; also receive Deposits for fixed periods, at rates varying with the period of deposit.

The Corporation issue Letters of Credit and Circular Notes, negotiable in the principal cities of Europe, Asia, and America for the use of travellers.

They open Current Accounts for the convenience of constituents returning from China, Japan, and India.

They also undertake the Agency of constituents connected with the East, and receive for safe custody Indian and other Government Securities, drawing Interest and Dividends on the same as they fall due.

Shareholders having their shares on the London register receive their dividends at the fixed rate of 4s. 6d. per dollar. Dividends are payable in London in April and October, on receipt of the advice of meeting in Hong Kong, held in February and August.

COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1854, and 31st December, 1866.

Recognised by the International Convention of 30th April, 1862.

CAPITAL, fully paid up, £3,200,000.

Reserved Fund ... ... f.20,000,000 ... £800,000.

HEAD OFFICE—14, Rue Bergere, Paris.

AGENCIES AT—Lyons, Marseilles, Nantes, Mulhouse, Roubaix (France), Brussels (Belgium), Alexandria (Egypt), Calcutta, Bombay, Hong Kong, Shanghai, Saigon (Cochin China), Bourbon (Reunion), and Yokahama (Japan).

LONDON BANKERS.—Bank of England and Union Bank of London.

LONDON AGENCY.—141, Londenhall-street, E.C.
MANAGER.—Theod. Dromel.
SUB-MANAGER.—H. Duval.

The London Agency grants Drafts and Letters of Credit, and purchases or collects Bills payable at the above-named places.

The Agency will conduct Banking business of every description with the Continent, India, China, &c., upon terms to be ascertained at the Office

THE JUMMOO AND KASHMIR TERRITORIES. A Geographical Account. By FREDERIC DREW, F.R.G.S., F.G.S., Associate of the Royal School of Mines, late of the Maharaja of Kashmir's Service.

"It has rarely been our good fortune to read so lucidly planned a book as Mr. Drew's. . . . Every chapter is deeply interesting. The importance and value of the work in a scientific point of view are very great, and the five maps, which are arranged respectively as the general, the snow, the political, the faith, and the race maps, are the most complete within our knowledge."—*Spectator.*

"It is pre-eminently a storehouse of valuable facts. Each of these facts is plainly put before the reader, and no one can rise from a perusal of Mr. Drew's volume without knowing very much that is fresh about the countries treated of. Mr. Drew's work is most methodically arranged, and a good index renders it still more valuable as a book of reference. . . . We imagine—so precise and full is the book before us—that many years will pass before any other author will attempt to treat of a subject which Mr. Drew has so thoroughly exhausted. . . . The maps which conclude the volume are, in our opinion, by far the best of the region yet published."—*Athenæum.*

"One of the most valuable additions to our knowledge of Indian Geography which we have been called upon to notice for some years past. . . . We are able to speak of the author's work in terms of unqualified praise. . . . The maps deserve more than a passing notice, for it is but rarely that English works of travel are illustrated cartographically in so liberal and unexceptional a manner."—*Geographical Magazine.*

Second Edition, crown 8vo, pp. 552, cloth, with Map, 8s. 6d.

THE PRINCES OF INDIA. An Historical Narrative of the Principal Events from the Invasion of Mahmoud of Ghizni to that of Nadir Shah. By Sir EDWARD SULLIVAN, Bart., Author of "Letters on India," "Trip to the Trenches," "Rambles in North and South America," &c.

The following pages were commenced after a journey through India and Ceylon some years ago; they do not lay claim to the rank of history; neither will they satisfy the "immortal longings" of the real student, but they may perhaps help to turn more attention to the romantic chronicles of a country unequalled in the world for the magnificence of its natural aspects, and that has produced some of the noblest sovereigns, warriors and statesmen that adorn the annals of any age, people, or country. The author has inserted nothing without authority, and he believes he has consulted every work or article that has been written on India, in the English or French languages.—*Extract from Preface.*

With Coloured Map, crown 8vo., cloth, 6s.

CHINA.—THE FOREIGNER IN FAR CATHAY. By W. H. MEDHURST, H.B.M. Consul, Shanghai.

CONTENTS.—Position of Foreigners—Customs of the Chinese—Shop Signs—Advertising Mandarin Yamens—Opium Smoking—Infanticide—Eating and Drinking—Social Institutions—Modes of Sepulture—Character of the Chinese—Specimen of Chinese Music, with Original Words and English Literal Translation, &c.

"It is a volume which will amply repay perusal, and that man must be very impervious to knowledge who lays it down without having gained from its pages an intelligent insight into the strange and much misrepresented world of China."—*Saturday Review.*

"We must be thankful to the author, who has given us much that is thoroughly reliable of China as it is, which we should look for in vain elsewhere."—*Spectator.*

"There is not an intelligent reader in Europe who will not be edified and amused by a perusal of this little book."—*London and China Telegraph.*

New Edition. Scale, 90 miles to an inch; size, 26 inches by 22.

CHINA.—MAP OF CHINA. By J. ARROWSMITH. Sheet, Coloured, 3s.; mounted, in case, 5s.

New Edition. Scale, 86 miles to an inch; size, 29 inches by 33.

INDIA.—STANFORD'S NEW PORTABLE MAP OF INDIA: Exhibiting the present Divisions of the Country according to the most recent Surveys; showing also the adjacent territories of Beluchistan, Afghanistan, Turkestan, the Chinese Empire, Burmah, and Siam. The Railways, Rivers, Canals, Mountain Passes, and the Elevations above the Sea are clearly indicated; and the Boundaries of the Provinces, the Bengal, Bombay, and Madras Presidencies, the Districts under British and Native Government, and the French and Portuguese Possessions, are distinctively coloured. Price, Coloured, 6s.; mounted on linen, in case, 8s.; or on roller, varnished, 11s.

Scale, 33 miles to an inch: size, 27 inches by 32.

BURMAH, &c.—A Map showing the various Routes proposed for connecting China with India and Europe through Burmah, and developing the Trade of Eastern Bengal, Burmah, and China. Prepared under the direction of JOHN OGILVY HAY, F.R.G.S. Coloured, 3s.; mounted, in case, 5s.

"A map, prepared under the direction of Mr. John Ogilvy Hay, F.R.G.S., has just been published, 'showing the various routes proposed for connecting China with India and Europe through Burmah, and for developing the trade of Eastern Bengal, Burmah, and China.' It must not be supposed from this description that the area embraced by the map extends from China to Europe. It includes simply Assam, Pegu, Eastern Bengal, and West Yunnan or that part of the Indo Chinese countries in which Englishmen are most directly interested. The scale, thirty miles to the inch, has enabled the engraver to use large letters in printing the names of places, and to represent, without crowding or confusion, a considerable number of the routes followed by recent travellers, or suggested as new lines of commercial intercourse."—*Times.*

FOR CHINA AND JAPAN.—The following splendid first-class STEAMERS will be despatched as under:—

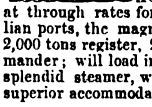
Port.	Ship.	Class.	Dock.	To sail.
Sing., H. K., Yoko., & Hiogo	Benledi ...	100 A1	S.W.I.D.	Nov. 15
Pen., Sing, Hg Kg., Yoko., & Hiogo	Oxfordshire	100 A1	S.W.I.D.	To follow

For Freight or Passage apply to NORRIS and JOYNER, 126, Bishopsgate street Within, E.C.

Steam via the Suez Canal.

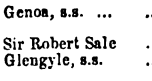
TO SINGAPORE, HONG KONG, YOKOHAMA, and HIOGO (if sufficient inducement offer), taking cargo for transhipment to Java, Australia, &c., at through rates at shippers' risk, last shipping day 15th Nov.; the favourite Clyde-built full-powered screw steamer BENLEDI, 100 A1, 1,557 tons gross, 1,000 tons net, 160-horse power nominal; J. W. BUCHANAN, Commander; South West India Docks. This fine steamer is well and favourably known in the China trade, and has splendid accommodation for saloon passengers.

For Freight or Passage apply to NORRIS and JOYNER, 126, Bishopsgate-street Within, E.C. (corner of Cornhill).



CASTLE LINE of STEAM PACKETS from LONDON. — For SINGAPORE, HONG KONG, and SHANGHAI, taking goods at through rates for Java, Japan, and Eastern Australian ports, the magnificent steamship CROCUS, 100 A1, 2,000 tons register, 225-h.p. nominal; R. H. JOY, Commander; will load in the South West India Dock. This splendid steamer, well known in the China trade, has superior accommodation for passengers.

Apply to THOMAS SKINNER and Co., 5, East India-avenue, London, E.C.

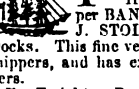


FOR Tanjong Pagar, SINGAPORE.—The following VESSELS are now on the berth in LONDON.

	Tons.	Brokers.	To Sail.
Genoa, s.s.	1,900	Gellatley, Hankey, Sewell, & Co. ...	Nov. 8
Sir Robert Sale ...	704	Wright Bros. & Co.	Nov. —
Glengyle, s.s. ...	2,676	McGregor, Gow, & Co.	Nov. 11
Crocus, s.s.	2,010	T. Skinner & Co.	Nov. 15
Benledi, s.s.	1,557	Norris & Joyner...	Nov. 16
LIVERPOOL.			
Sarpedon, s.s. ...	—	Alfred Holt ...	Nov. 5
Priam, s.s. ...	—	„ ...	Nov. 15
GLASGOW.			
Mutlah	—	T. Skinner & Co.	Nov. —

Scale of wharf and dock charges may be had on application to the Company's London Agents, Messrs. MACTAGGART, TIDMAN, and Co., 34, Leadenhall-street, E.C.

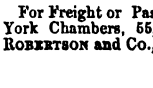
With quick despatch.



FOR YOKOHAMA and HIOGO, the well-known China clipper BANDA, A1 13 years 481 tons register; J. STOLLERY, Commander; West India Docks. This fine vessel is confidently recommended to shippers, and has excellent accommodation for passengers.

For Freight or Passage apply to J. D. WILLIS and Co., 115, Leadenhall-street, London, E.C.

With despatch.



FOR YOKOHAMA AND HIOGO DIRECT, the favourite China clipper TAMESA, A1 16 years, 718 tons register, South West India Docks; F. J. GREEN, Commander.

For Freight or Passage apply to JOHN WILLIAMSON York Chambers, 55, King-street, Manchester; or to ROBERTSON and Co., 5, Newman's-court, Cornhill, E.C.

With quick despatch.

FOR HONG KONG DIRECT, the favourite China clipper EVELYN, A1 13 years, 762 tons register. South West India Docks; HENRY KNOWLES, Commander.

For Freight or Passage apply to JOHN WILLIAMSON, York-chambers, 55, King-street, Manchester; or to ROBERTSON and Co., 5, Newman's-court, Cornhill, London, E.C.

* By Pacific mail *via* San Francisco.

THE MAILS, &c.

There have been three deliveries of mails from the Far East this day, viz., the P. and O. mail *via* Brindisi, the French mail *via* Marseilles, and the Pacific mail *via* San Francisco, the French mail being exactly one week in advance of its due date. The next inward (P. and O.) mail, with a week's later dates, viz., Yokohama 5th, Shanghai 8th, Hong Kong 14th, Singapore 21st Oct., which is due, *via* Brindisi, on Monday, the 22nd inst., left Galle on the 31st ult., one day late.

The Great Northern Telegraph Company's line *via* Russia, is interrupted, and messages for Japan must be sent *via* Suez.

List of Passengers.

PASSENGERS INWARD.

By this mail to Brindisi, per P. and O. steamer *Malta*, arrived Nov. 5.—From Shanghai: Mr. W. Lent. From Singapore: Hon. A. Macalister.—To Venice, arrived Nov. 8.—From Yokohama: Mr. Campbell, Mr. H. Heinneman. From Shanghai: Mr. G. W. Coutts, Mr. J. Maclean. From Hong Kong: Assistant-Controller Maloney.

Per French mail steamer *Anadyr*, arrived at Marseilles, Nov. 6.—From Yokohama: Mr. Lawrence, Mr. Loureiro, Mr. Gray. From Shanghai: Mr. and Miss Ballance, Mr. and Mrs. Ekman, Messrs. Brassonnet, Hankardt, Hennequin, Fitzgerald, Bishop Moller, Richardson. From Hong Kong: Mr. Greig. From Saigon: Messrs. Blanchard, Garnier, Verhame, Miss Beauregard. From Singapore: Mr. and Mrs. Dicke, Messrs. Mills, Semisch, Moos, Mickleman, Dalton, Gonzalis, Albay, Snock, Van Lith, Warnken. From Galle: Colonel Armitage, Messrs. Saboniders, Butherford, Grigor, Hayes, Mrs. Cameron.

To Southampton, per P. and O. steamer *Peshawur*, expected to arrive Nov. 14.—From Yokohama: Mr. Moffatt, Mr. W. Haswell, Mr. J. Wilkie, Mr. A. J. Davison, Mr. W. Edwards. From Hong Kong: Mr. C. J. Johnstone, Mr. W. Dyer. From Singapore: Mrs. Rowell and two children, Surgeon R. Morgan, Mrs. Birtwhistle, Mr. W. Weymouth. From Galle: Miss H. Sowell, Captain H. Campbell, R.N., Mr. W. Walker.

Per Pacific mail steamer *Colorado*, arrived at San Francisco, Oct. 13.—From Hong Kong and Yokohama: J. S. Feron, Mrs. Dulin and infant, E. H. Williams, L. B. Winton, M. Steeld, J. W. Caldwell, Wm. Dory, Thos. Rorke, Wm. Cole, M. Murray, H. Clark, E. McDonald, and 100 Chinese.

PASSENGERS OUTWARD.

Per French steamer *Meikong*, from Marseilles, Nov. 7.—To Yokohama: Mr. Bartrem, Mr. Matzmullo, Mr. Keko Voyeno, Mr. Bavier, Mr. Barthelet, Mr. Vantissa. To Shanghai: Mr. H. Relph, Mr. McMinnies, Mr. Meaney. To Kong Kong: Mr. and Mrs. Sienkewitz, Mr. Brousted, Mr. and Mrs. Frichauste, Mr. Knoack, Mr. and Mrs. Kopp, Miss Freye, Mr. O'Callaghan. To Saigon: Mr. Blustens. To Batavia: Mrs. Barge and family, Mr. Bring, Mr. Norden. To Singapore: Capt. and Mrs. Ross, Mr. John Ross, Mr. and Mrs. Adamson and child, Mr. and Mrs. Buchanan, Master Brooks and governess, Mr. Jackson, Mr. Struckman, Mr. Ortiz, Mr. Pereda, Mr. Michalsky, Mr. Czarnosky, Mr. Westcamp. To Galle: Mr. and Mrs. J. M. Greig, Mr John Tyndall. Mr. Collard, Mr. R. S. Atkinson, Mr. Bragg, Mr. Smithers, Mr. Palliser, Mr. Van Cuxlemberg.

Per French steamer *Amazone*, from Marseilles, Nov. 21.—To Yokohama: Mr. and Mrs. Fanconnet. To Hong Kong: Mr. Schmidt. To Batavia: Mr. and Mrs. J. Wuste, Mr. Voute, Mr. Van Delden. To Singapore: Mr. Baumgarten and family, Mr. Thos. J. Broome, Mr. Hinnekind and family, Mr. Sohst and family, Lieut. H. F. Braddel. To Galle: Mr. A. MacFarlane, Mr. E. G. von Glehn, Mr. J. Tarn, Mr. and Mrs. Young, Mr. Bosanquet.

Per French steamer *Anadyr*, from Marseilles, Dec. 5.—To Batavia: Mrs. Van Lawick, Mr. H. de Lyon, Mr. Verkoukeri. To Singapore: Comte Herngasze. To Galle: Mr. Boustead.

Per French steamer *Djemnah*, from Marseilles, Dec. 19.—To Hong Kong: Mr. and Mrs. Pelham Warren.

Per P. and O. steamer *Assam*, from Southampton, Nov. 4.—To Shanghai: Mrs. G. J. Baillie. To Hong Kong: Mr. Smith. To Singapore: Messrs. R. W. G. R. and F. A. Gow, Mrs. Gow, Mr. S. B. Kennard, Mr. J. Robertson, Mr. Muir, Mrs. Cairns and and child. To Ceylon: Mr. Houstoun, Mr. R. A. Meade. To Galle: Mr. A. J. Seaton.

Per P. and O. steamer *Hindostan*, from Venice, Nov. 12.—To Ceylon: Mr. H. S. Saunders.

Per P. and O. steamer *Hindostan*, from Brindisi, Nov. 15.—To Yokohama (via Bombay): Mr. C. G. Dunlop. To Batavia: Mr. Lorraine. To Singapore: Major Gray. To Ceylon: Mr. T. Steele. To Galle: Mr. G. A. Talbot.

Per P. and O. steamer *Khedive*, from Southampton, Nov. 18.—To Singapore: Mr. A. P. Talbot. To Ceylon: Mr. C. F. Hill.

Per P. and O. steamer *Baroda*, from Brindisi, Nov. 29.—To Penang: Mr. T. C Brown.

Per steamer *Burmese*, from London, Oct. 30.—To Penang: Mr. Louis Wieze, Mrs. Proffit and daughter. To Yokohama: Mr. Kindon Shou, Mr. Katriaki Hanzaroa, Mr. James Annand.

Per Nederland Company's steamer *Prins Hendrik*, from Nieuwediep, October 31.—To Java: Mr. and Mrs. A. E. Rubenkoning and three children, Mrs. Van Wely, Mr. T. H. Brevet, Mr. and Mrs. S. Westerbaan Muurling, Mr. H. R. Pereira, Mr. W. Pronk, Mr. and Mrs. C. C. M. van Blommestein and two children, Mr. Schäfer, Mr. Gericke, Mr. Bosch, Mr. and Mrs. P. J. Roosegaarde Bisschop and seven children, Mr. J. A. Dezentjé, Mr. H. A. Loder, Mr. C. F. H. van Vuurden, Mr. T. G. A. Boon, Mr. G. van Os, Mr. G. Driessen, Mr. J. J. Stikkel, Mr. W. G. Koning, Mr. S. Bakker, Mr. M. A. Raasveldt, Mr. T. A. Schell, Mr. P. W. Kluit, Mr. J. A. Waleson, Mr. C. L. Meyer, Mr. D. Hollander, Mr. L. J. Z. Jordaan, Mr. and Mrs. G. M. Oudraad and two children, Mr. Luecher, Mr. and Mrs. J. Visser and child, Mr. P. Luecher, Mr. J. B. Ponstyn, Mr. R. Paehlig, Mr. F. Nauta, Mr. F. A. E. Auffmorth, Mr. F. Darling. Mr. L. Dezentjé, 10 subaltern officers, 240 soldiers.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present P. and O. mail brings advices from this port to the 15th Sept., and by the Pacific mail we have news to the 25th Sept.; the French mail from London, July 30, arrived out on the 14th Sept. The *Japan Herald* supplies the following items of news:—

There is no political news of importance. Editors and contributors to native papers are still being prosecuted for infringements of the new Press laws. This will probably soon end, however, as it has been publicly stated, and private information seems to confirm it, that as severity is powerless to suppress the expres

Digitized by Google

sion of opinion, a new and probably more efficacious manner has been adopted of dealing with the malcontents, who, it is alleged, are to be bribed into silence.

During the trouble with Formosa the Government bought several steamers to be used as transports. Since the amicable settlement of that difficulty these steamers, not being required for their original purpose, have been lent to the Mitsu Bishi S. S. Co., on terms which have never transpired. It is now stated that the Government has presented the whole of these steamers to the Company, and has also granted it a subsidy of $250,000, with the addition of $15,000 extra for the preliminary training of officers and engineers. The steamers handed over number thirteen, and their value is said to amount to $2,000,000. In making this appropriation the Japanese Government has, we think, acted wisely. It has always been found necessary, even in Europe and America, to thus foster and encourage the commencement of steam navigation (the expenses in establishing and running a line of steamers being very great) until a sufficient trade has been developed to render them self-supporting. In Japan this is more especially the case, as the country is so poor that it is necessary to keep freight, &c., down to the lowest point, to encourage native shippers to make use of those facilities of communication that steam-ships give. With this subsidy, and the gift of the larger portion of its fleet, the Company should be able not only to hold its own, but to do much towards fostering the commerce, and opening up to trade those portions of the empire which are as yet almost closed to enterprise.

The Government has issued to foreigners in its employment a circular of "Regulations to be observed whilst Travelling in the Interior with Passports," some of which are rather singular. Passing over the first eight, we come to Regulation "IX":—"The bearer, while in the interior, though he possesses a shooting license, is forbidden to shoot." What does this mean? Is it to be understood that a shooting license only authorises the holder to shoot within treaty limits; or are holders, if in Government employ, to be deprived of the privilege? Then the regulations say it is forbidden :—

1. To ride on horseback or drive in a carriage after sunset and before sunrise without carrying lamps. 2. To ride on horseback in the neighbourhood of fires. 3. To pass along a road or cross a bridge on horseback or in carriage where there is a notice prohibiting it. 4. To obstruct the passage of water by throwing stones, tiles, or earth, into rivulets, canals, or drains. 5. To damage plantations. 6. To drive a carriage (with rapidity) through narrow passes or streets. 7. To destroy boards on which the numbers of a house, or the names and addresses of the inhabitants are written, and which are usually put up on the doorway. 8. To do damage to the places where fishes are cured. 9. To do damage to the places where nori is dried. 10. To damage trees on the sides of roads. 11. To neglect the payment of tolls and fares of boats at ferries. 12. To set free horses and cattle, thereby damaging gardens or farmers' fields. 13. To set grass or trees on fire in field or in forest. 14. To throw stones and tiles into fields belonging to farmers. 15. To cut or destroy flowers, plants, &c., in gardens or on road sides.

It will be seen that many of the above prohibitions are of the most puerile character, and the list might have been indefinitely prolonged if every trivial possibility had been included. Several of the regulations are simply childish.

A rowing match between four Scotch and four English members of the club is arranged to come off in the beginning of October. The English crew will be—H. O. Jeyes, bow; J. J. Dare, 2; A. Milson, 3; A. H. Dare, stroke; while the Scotch will consist of J. Leckie, bow; J. Y. Henderson, 2; J. Dodds, 3; G. Hamilton, stroke. There will, besides these, be one or two members kept in training to fill any accidental vacancy which may occur through any of the above gentlemen being unable to pull. It is difficult, at such an early date, to give any idea of the relative merits of the two crews, but the Scotch have a great advantage in having the best stroke in Yokohama (and, with the exception of Mr. Low, we might say the best in Japan), and they are also a much heavier set of men, averaging, we should suppose, nearly 10 lbs. more than their opponents.

We are assured, on good authority, that the long-talked of opening of Yedo to foreigners desirous of residing in portions of the capital beyond the limits of the Foreign Concession has been finally decided upon, and that negotiations have been terminated by the wished-for concession on the part of the Japanese being granted, conditional upon compliance with native tenancy law by persons availing themselves of it. The stipulations with respect to the maintenance of roads and lighting in Tskidiji will no longer be insisted on; but it is understood the Tokio *Fu* will of its own accord continue to preserve their present state. The New Year is the date assigned for such tenancies to be entered upon.

The Yokohama Gas Works and stores have passed from the original proprietors to the Government, for about $200,000, which is probably about $70,000 more than similar works, &c., could be constructed for; but then a few persons have to make a profit out of a transaction of this kind, and a Government is considered as fair game. When the works were projected we stated that they would not yield interest sufficient to pay a native proprietory, and our prognostication has been verified by the above result. The consumption of gas by native private consumers is, as we predicted, very slight indeed. The gas outside the foreign settlement is mainly devoted to the street lamps, which are paid for by a rate levied on the inhabitants, adjusted to the amount of frontage to the street so lighted. In Yokohama the gas rate is paid without much grumbling, but in Tokio the reverse is the case. Many streets in the capital are lit with Silber lamps, which, taking everything into consideration, at the low price ruling for kerosine, furnish a cheaper light than gas.

A notification has been published by the Home Department announcing the establishing of model sheep farms, and of the intended admission of students thereto. Could this industry once be carried out on an extensive scale, the advantage to the country would be incalculable. We have, however, very little faith in Government schemes of this sort, which generally result in failure, as witness the Kaitakushi Department.

Upon the day on which official notice of the death of Andrew Johnson, ex-President of the United States, was received, the U.S.S. *Yantic*, the senior officer's ship, fired half-hourly guns from sunrise to sunset throughout the day, the other men-of-war and vessels in port also half-masting their flags.

The Petroleum Company in Tokio, which has for some time been engaged in boring for petroleum in the province of Etchigo, is about being merged into the Mining Department. The Company is endeavouring to raise in Kaga a loan of 180,000 rios to carry out the works.

The trade in silkworms' eggs has been gradually declining, and it is thought that this year may probably see the close of it. The number of *graineurs* who have arrived is very limited, and their ideas seem to point to even a lower scale of prices than those which prevailed last year.

The case of Ito Hachibel *v.* Walsh, Hall, and Co., in the American Court, still drags its slow length along, and from adjournments for mails, and other interruptions, promises to extend over a considerable period.

Signor and Signora Palmieri and Signorina Persiani have given two concerts here, which have been highly successful, and have drawn forth the encomiums of the press.

The Rev. Sholto Douglas, who is on a revival tour round the world, has arrived here and is holding daily services.

Attention has been called to the large importation of spurious and adulterated drugs into this country.

CHINA.

—o—

TIENTSIN.

The correspondent of the *North China Herald* writes on the 11th September :—

There is little of importance to report from this "entrance to the capital." It may interest some persons to know that His Excellency Mr. Wade was half way to Peking at ten o'clock last evening. All quiet and peaceful.

The Chinese have it that Governor Li does not feel equal to the responsibility of granting the demands of the British Government as made by its representative, but that he said a Commission would be sent to England to settle the matter there. Doubtless he would like to gain time.

The Commissioner appointed to visit England with a letter to H.M. the Queen is his Excellency Kwo, recent Judge of the province of Fokien. His deputy is a Mr. Hsü, who is in charge of the Interpreting-office of Li-Hung-Chang, at Tientsin. He is said to be very well disposed towards foreigners. The timbers of the dredging-machine purchased by Governor Li last summer have arrived, and are being put together. The machinery is expected soon. It is to be hoped it may not be a failure, as were some formerly tried in this same muddy stream. If it is Li will probably feel personally aggrieved, and never buy another. Messrs. Hill and Hamill are the parties from whom the machine was purchased, and who are getting it ready for working. We wish them all success—and the machine too, in its future relations with the mud of the Pei Ho.

The *Shantung* in her passage up the river last Wednesday did some slight damage to an empty salt junk. The owners refer the case to the U.S. Vice-Consul for decision, without a trial. It would be well if arbitration could be used in all such cases. The s.s. *Conquest* arrived from Nagasaki this morning.

The new buildings at the "Treaty Temple" seem to be intended for workshops; they are commodious and well lighted. They seem to be well built, and are a great improvement on those now in use at this Temple.

SHANGHAI.

The P. and O. mail brings advices from this port to the 19th and the French mail to the 26th September; the P. and O. mail from London Aug. 6 was received on the 18th September, having been delayed by the accident to the P. and O. steamer *Sunda*. The following summary of news is from the *North China Herald*:—

Judged by the minutes the Council meeting of the 6th must have been a rather flat one. The Cash State was, as usual now

Digitized by Google

handed round for inspection instead of being laid on the table. The Council very rightly declined a proposal by one man to monopolise the jinriksha licenses, and resolved that the people in Sinza village shall be made to withdraw within due limits the various structures they have built out on the roadway. The Royal Insurance Company will not contribute towards the expenses of the Fire Brigade because other companies will not; but it is willing to give something towards the actual expense of turning out the Brigade on the special occasions when its properties are endangered. The Council think the basis on which this contribution is to be calculated an impracticable one. So it is, strictly speaking, in the case of a volunteer brigade; still, we think a rough calculation might be made, on the basis of the number and extent of fires, and of the annual cost of the department, which might be accepted.

About the usual hundred volunteers turned out for the parade on Thursday. The Mih-ho-loongs were in strong force, and were divided into two companies; No. 2 also mustered well; Nos. 1 and 3 were feeble, and were doubled up to form one company. The force marched out to the race-course, headed by the band, and went through some skirmishing drill and battalion movements very creditably. Several changes of formation were effected in the Maloo on the way back, and one or two changes of front on the Bund, on arrival home. We may take the opportunity of remarking that the Chinese crowd the race-course most unpleasantly on parade nights, and gather so closely round the men as to be a perfect nuisance. Could not a policeman be stationed at the gate to keep them out?

The feeling at the sale of Griffins last evening was more deliberative than speculative. Only two animals were sold, one at Tls. 115, the other at Tls. 60. There was no "pow" after the sale.

The native charged with the murder of the doorkeeper at Mr. Muirhead's Mission Chapel has been brought to Shanghai, and has, it is said, undergone a brief examination before the Chehsien; but nothing is yet known as to what fate awaits him.

Despite the inducement of a brilliant moon and a temperature refreshingly cool for promenading, there was a thin attendance at the tenth garden concert of the Wind Instrument Society on Wednesday night. Probably the fear that the grass and walks would be damp kept many away, but the paths were surprisingly dry, and everything conduced to make a pleasant evening out of doors, though of course sitting could not be indulged in for long at a time. The music was, as usual, excellent.

H.M.S. *Thalia* went out for gun practice. H.M.S. *Growler* has gone to Ningpo, and on her return will, we believe, go to Tientsin for the winter. The steamer *Glenartney* has returned, having made the trip within a week less than four months. She left Hankow for London with new teas on the 19th May.

We have received a copy of Mr. Margary's notes of his journey from Hankow to Talifoo, which have been published with the sanction of Her Majesty's Minister, for the benefit of his estate. There are various gaps in the journal, to be explained probably by the fact that Mr. Margary suffered from time to time seriously in health. It stops just before his arrival at Talifoo, and the remainder was too probably with him when he was murdered. It is a pity that an attempt was not made to complete the story by adding some of the private letters which were afterwards received by him, and which would have given some idea of his experiences over the most interesting portions of his route. Some of these have actually been published in England, so there could have been no possible objection to their reproduction as an appendix. We hope that a second edition of the little book may be called for, and that this suggestion will then be carried out.

We are still without definite news from Peking. It is rumoured that the Chinese are very loth to yield the point of publication in the *Peking Gazette*; but it is believed that Mr. Wade would not have gone to Peking unless he were assured that his conditions were in principle accepted. That the Chinese will do all they can to modify the stringency of the terms when they come to be arranged in detail and put upon paper, is likely. But is is believed that Mr. Wade is firm, and firmly supported by his Government. Warlike rumours were very rife yesterday; but there seems very little clear foundation for them, and speculation upon their truth is quite useless pending the receipt of more definite news.

H.M.S. *Thalia*, while steaming up the river to her anchorage off the Naval Yard, came into collision with some ballast lighters alongside the brig *Lady Belmore*. The lighters were lashed to each other on the starboard side. The *Thalia*, after having let go an anchor, swung round, and with her starboard quarter struck the lighters, causing the two most heavily laden to sink immediately; another capsized, but being partially unladen, floated bottom up, and was secured by the crew of the str. *Cybele*. Two of the boatmen made report to the river police that two of their crew were missing, and that one man had got a broken jaw. But we are glad to hear that it has been clearly ascertained no one was drowned, neither did anyone have his jaw broken, though one man did get a severe blow on the face. The cause of the accident is attributed to the unusually strong flood tide.

The steamer *Chikli* struck on the rocks near the Shantung Promontory, on her way to Chefoo, and was at one time in some danger. She was lightened somewhat, however, and with the rising tide she floated off with so little apparent injury that the captain determined to continue on his voyage.

FOOCHOW.

The subjoined items of news from this port are taken from the *Foochow Herald*:—

The native authorities have sent about 300 troops to Huangkow—the scene of the disgraceful attack on the Great Northern Telegraph Company's camp, to which we referred last week. We understand, on excellent authority, that not a single arrest of persons implicated in the robbery of the Company's property had been effected up to Tuesday last. The ringleaders, although well known to the Chinese officials, were still at large, and it was very evident that the Mandarins were either unwilling or unable to bring them to justice. Meantime, the work is entirely suspended, and we are informed that a heavy claim for damages and expenses, caused by the delay, has been sent in to the high provincial officials.

The present Imperial Commissioner at the Arsenal—Shen Pao-Chen—being about to take up his Viceroyalty at Nanking, a successor will have to be appointed. Kwo Sung-tao was originally intended for the post, but his recent appointment as Envoy to Great Britain will, we presume, upset the arrangement. His Excellency Shen is unpopular with the natives, but we believe is much respected by the foreigners with whom he has had official dealings.

A very severe thunder-storm was experienced at this place on the evening of the 10th September. For several days previous to the outburst the weather had been very close and oppressive, and a storm of considerable magnitude was evidently close at hand. It burst over the Settlement between eight and nine o'clock on the evening above named, and continued to rage for about an hour. In the city the loss of several human lives is reported, but we have not heard of any loss of life in the Settlement. At Pagoda Anchorage the storm appears to have been most severe. The main mast of the British barque *Rachel* was struck, fortunately without causing any injury to the vessel.

The condition of the river Min is again exciting uneasiness among the foreign residents at Foochow. A correspondent draws attention to the rapidity with which the river between Foochow and the Anchorage has latterly been filling up. He says that it is now hardly possible for a sampan to go to the Anchorage, much less a cargo-boat. The only navigable channel to Foochow some 170 years back was, it is said, at the back of the Nantai, and the initiated see sure indications that the channel is returning to the same course.

A disturbance, originating in one of those endless disputes between the Lekin officials and a gang of opium runners, took place on "the hill" last week. We understand that firearms were used on both sides, and that one man, at least, was injured. The representatives of law and order behaved as usual on such occasions, *i.e.*, they moved to the rear, for strategic reasons, we suppose.

We have much pleasure in recording the fact that the Chinese Government has conferred the Imperial Order of the *Cum-pai* on Mr. James Maitland, chief officer of the cruiser *Ling Fêng*, for distinguished services rendered during the late Formosan crisis in connection with the Foochow fleet. Mr. Fettes, of the same vessel, has also, we understand, had a similar honour bestowed upon him.

We understand that the Fantai shortly expects to receive from England a new steam launch of great power and improved construction.

Operations in Formosa are apparently suspended. The Chinese officials are very reticent with regard to the state of affairs in the aboriginal country.

HONG KONG.

Our advices by the P. and O. mail extend to the 25th September, and by the French mail, we have dates to the 2nd October; the French mail from London Aug. 13 arrived out on the 19th September; and the following P. and O. mail of August 20 was received on the 30th Sept. The following items of news are from the *China Mail*:—

A telegram from Shanghai on the 19th Sept. announced the wreck of the P. and O s.s. *Sunda*, on her voyage from this port to Yokohama. She left this on the 12th, with the usual mails, having on board as passengers Messrs. A. B. Johnson, Recks, Bingham, H. Collins, and Amidici, five in all. Soon after her departure she encountered dirty weather, and about noon on the 14th Sept. she struck upon an unknown rock, about one mile to the north of Turnabout. Fortunately she had been ashore but a few hours when the *Geelong*, carrying the upward Shanghai mails, hove in sight, and seeing there was something wrong ran towards her. The mails, passengers, and crew of the *Sunda* were at once transferred to the *Geelong*, and search being made it was discovered that the *Sunda* was severely damaged in the fore compartment where she had struck, and it was finally con-

Digitized by Google

cluded to beach her. This was accomplished at Station Island, in the Haitan Straits, some ten or twelve miles distant from where she struck. As she was able to run this distance, it is probable that her injuries are confined to the fore compartment only. As soo n as the vessel was safely beached, news was sent on and a gunboat was at once despatched to the scene of the wreck, the *Geelong* leaving as soon as she saw that the *Sunda* had help at hand. Mr. Green, the superintending engineer of the company, has left, per *Bombay*, accompanied by two European divers (one from the *Victor Emmanuel* and the other, Mr. Stewart, wharfinger of the Hong Kong, Canton, and Macao Steamboat Company's wharf), together with several native divers and every description of appliance to float the *Sunda*. Some doubts are entertained of success, as at high tide the hull is submerged. The rock upon which she originally struck is said to have eighteen feet of water on it at low tide. It is not, we are told, marked on any chart, and the accident was entirely unforeseen. By the arrival of the *Douglas* on the 22nd Sept. we learnt that the Chinese boatmen, *alias* pirates, had been again giving trouble. Notwithstanding the fact that the steamers *Geelong* and *Douglas* were lying close to the wreck of the *Sunda*, the natives swarmed on board the latter at dusk, for the purpose of wrecking her. Had it not been for the warm reception given to these gentry—first by the steamers named, and subsequently by H.M.S. *Hornet* (which fortunately arrived)—there would have been little of the *Sunda's* furniture and gear left.

The following is the report of the China and Japan Marine Insurance Company to June 30 :—

The directors beg to congratulate the shareholders on the satisfactory result of the company's business for the six months ending 30th June last, the amount of net premia earned being considerably in excess of that for the corresponding period of last year. From the annexed accounts it will be seen that a balance of Tls. 57,442.02 stands at working account in favour of the company. The directors, therefore, have pleasure in recommending to shareholders the payment of a dividend of four per cent. for the half-year. This will absorb a sum of Tls. 12,000, leaving Tls. 45,442.02 to be carried forward to the credit of new account. The losses paid since 30th June amount to about Tls. 5,000, and so far as is known at present the only important loss to be provided for is that of the *Deerhound*, on which the company has a lien of Tls. 30,000, of which Tls. 11,000 is chargeable to the half-year under review.

The directors regret having to record the fact that the business latterly has suffered to some extent in consequence of action taken on the part of certain shareholders to force the company into liquidation. As the Company is and has been in a sound and prosperous condition. the directors, in the interest of shareholders, cannot do otherwise than strongly recommend its continuance; and they are supported in this view to a material extent by the fact that only a very small number of the fifty-six shareholders who signed the requisitions are contributors of business to the company. Two of the directors, viz., Mr. Thomas M. Drysdale and Mr. O. C. Behn, having resigned, owing to their departure for Europe, Mr. J. M. Ringer and Mr. C. W. Siegfried have accepted the vacant seats at the board, and their election requires confirmation by the shareholders.

The ordinary yearly meeting of the shareholders of the Union Insurance Society of Canton was held at the head office, Hong Kong, on 21st September, the Hon. P. Ryrie in the chair. The chairman stated that the losses caused them by the typhoon of September last amounted to some $91,000, and that would account for the poor results of the year. The society's income had, however, it was satisfactory to note, increased, and 1875 promised better than the preceding year. The report was unanimously adopted. Messrs. Ryrie and Jocock were re-elected directors, and the re-election of Messrs. Richard Deacon and C. Morland Kerr as auditors was also agreed to.

An extraordinary general meeting of the shareholders of the Chinese Insurance Company (Limited) was held at the company's office, Hong Kong, on 22nd September, for the purpose of considering certain changes to be made in the articles of association. The alterations proposed were to enable the company to become a permanent one. A long discussion ensued on the first resolution, which involved the question of the continuance of the company, and a division ultimately took place, when it was carried by a majority of 431 against 64 votes. The other resolutions were passed without opposition.

A letter from Macao says :—The Custom's cruisers continue to vex the poor inhabitants of this city by forbidding junks with firewood and provisions to enter the port. Some of the former were ordered away under pain of confiscation of their property, and under such alternative they directed their course to Komun, and thence communicated with their agents here. The prices of all necessaries of life have enhanced a good deal, causing thereby much consternation among the poor classes, which are three-fourths of the entire population. It was ascertained from a reliable source that the cruisers were merely obeying orders from high quarters at Canton, the Viceroy of that city being much incensed against the Portuguese authorities on account of recent diplomatic correspondence anent the Waiseng Lottery, which is legalised here, and forbidden by Imperial Decree in all parts of China. More pressure, it is said, will be brought to bear on Macao until the authorities are compelled to bow to the viceregal mandate. On the other hand, our Governor is brooding day and night over the matter, and is only waiting for orders from Lisbon and reinforcements, in the shape of two steam corvettes—now stationed, one in Mozambique and the other in Goa—to take some vigorous steps, which will be very unpleasant for China. There are several important towns in the Hiang-shan island that may be reduced to ashes by a handful of soldiers. The resolution taken by the Portuguese in 1828 may be repeated in 1875, and the Customs cruisers mercenaries will be treated as pirates, and as such punished according to law.

On the 20th Sept. the cargo of coal on board the U.S. ship *Pilgrim* was, early in the morning, discovered to be on fire. The alarm was at once given, and the police went off, followed closely by Captain Deane and Mr. Creagh. Steps were at once taken to discharge the cargo, and the vessel was immediately towed over to shallow water on the Kowloong side. The discharge continued all the forenoon, an engine having meanwhile been got alongside in readiness to pump on the seat of the fire as soon as discovered. There did not appear to be very great danger, but the vessel being a fine new one the captain naturally felt anxious. By three P.M. the fire was reported out, but the discharge of cargo still continued, to guard against a possible fresh outbreak.

A meeting of the Hong Kong Cricket Club has taken place. There were about twenty members present—Mr. H. B. Gibb being voted to the chair. Last season's accounts were examined and passed. A committee was then elected, consisting of the following members :—Messrs. H. B. Gibb (President), A. P. Handley, J. Greig, F. Tobin, H. E. Wodehouse, and C. C. Cole, 80th Regiment; Mr. E. G. Skinner was elected Secretary and Treasurer. A vote of thanks to Mr. Watson for his services as Secretary last season was carried unanimously. The meeting then separated, after the usual vote of thanks to the chairman.

An order has been made in Council by the Administrator, ordering that ships plying daily or every other day between Hong Kong, Canton, or Macoa, and entering Hong Kong by night, be required to pay one-third only of the duty of one cent. per ton imposed upon them by the Order in Council of the 30th March last.

From information we have received we believe that reasonable hopes are now entertained of the recovery of the treasury from the wreck of the s.s. *Japan*. At all events, the divers have at last reached the treasure-room, and this must be regarded as an important advantage gained. Whether or not they will be able to prosecute their researches farther this season remains to be seen.

The Committee of the Hong Kong Humane Society desire to acknowledge the receipt of a sum of $600 from the Chinese community. This handsome subscription is the result of representations made to several leading Chinese, and the subscribers' views are neatly expressed in the accompanying address :—

To the Registrar-General,—Having been made acquainted by your Honour with the object with which the Humane Society has been established by the good foreign merchants in Hong Kong—namely, for the rescue of persons in danger of drowning during a typhoon—the Chinese community opened a subscription list amongst themselves in aid of the good object which the Society has in view. Now they beg to hand to your Honour the sum of $600, which they have succeeded in collecting, as a slight token of their appreciation of and as an assistance to the good work, and they beg your Honour to inform the members of the Society of this. By doing so you will confer an obligation on the subscribers.

The last mail from Yokohama brought down the wife of Mr. Wooyeno, the Japanese Minister in England, who is proceeding to join her husband in London. As the first Japanese lady who has, we believe, visited—certainly the first who will reside in—the metropolis, her advent will doubtless cause some curiosity. We trust she will acquire a favourable idea of English hospitality.

The new Viceroy of Canton has not yet arrived; the supercession of the former one has caused general satisfaction in native circles.

Dr. Ayres, colonial surgeon, and Mr. E. Sharp, crown solicitor, have both returned from leave, and resumed their duties.

Mdlle. Claus, the eminent lady violinist, is giving concerts here.

BORNEO.

SARAWAK.

The Sarawak Gazette has the following :—

Our community, both Native and European, must have been struck with the change in the policy of England in these seas to what was pursued formerly, say thirty years ago, when the names of Keppel, Mundy, Belcher, and Farquhar were heard of and well-known in these parts. The why or wherefore we will not attempt to account for, but now, only at rare intervals, a British man-of-war comes to Sarawak or Labuan, stays for one or perhaps two days, and is off again before there is time even for the vessel or flag to be seen. She comes and goes before a dozen people on shore know of her nationality or existence. It is more than two years since one of Her Majesty's ships called at Sarawak, or on its coast. With such sparse and flying visits, is it to be wondered at that the natives are forgetting the colour of the flag of Great Britain? and does not a valuable trade, three-fourths of which falls to the share of the British merchant, deserve some more notice and encouragement?

Digitized by Google

In former years this coast was never without a man-of-war somewhere in the vicinity, and ships and officers came to make themselves known and remembered, as good friends or dangerous enemies, but now it is different.

Eleven years ago a British Consul was appointed to the State of Sarawak, and the British flag flew at the Consulate up to the year 1872, when the Vice-Consul left, and no one has since been appointed to succeed him. We do not mean to infer that there is much business which really requires the presence of a Consul, but was this sudden change fair to the prospects of a young State? It did not suffer, however, nor do we mention the fact of the non-presence of a man-of-war on account of instability or want of safety; as, with the exception of a few inland Dyaks, who resemble wild cats more than men, peace and security prevail throughout the State as much as in other parts of the world.

The twenty and odd Europeans in the Government Service, as well as the gentlemen in the Borneo Company's employ, are all English or Scotch, and however long they may have resided in the east—thanks to active and healthy occupation, and to speedy receipts and circulation of English literature—they have in no way lost their English-born identity, nor true sentiments towards the mother country. So long as this *status* is maintained, respect from natives will hold good; but once commence to decline towards the mental level of the native inhabitants, civilisation ceases to be a stronghold, and moral force is gone.

The presence of a man-of-war would be looked upon as a boon, and would no doubt do good in many ways. It is, therefore, to be hoped some change may take place that will enable naval officers to more frequently visit Sarawak, where they will ever be warmly welcomed.

STRAITS SETTLEMENTS.

SINGAPORE.

The present P. and O. and French mails bring advices from his port to the 9th Oct.; the French mail from London Aug. 27 arrived out on the 25th Sept., and the following P. and O. mail of Sept. 3 was received on the 2nd Oct.. We take the following items of intelligence from the *Straits Times*:—

As the outward bound P. and O. steamer *Kashgar* was coming into New Harbour from the westward on the 2nd Oct., on arriving abreast of the P. and O. wharf the engine became disabled and would neither go ahead nor astern, owing to which the vessel drifted on the bank near St. James's. A kedge anchor was run out immediately, but was of no use, as the tide was falling. The vessel remained on the bank till 11 P.M., when she was towed off and taken alongside of the wharf, without having sustained any damage. The steamer, after a detention of six days repairing her machinery, resumed her voyage to China on the 9th Oct. The mails had been sent on previously by Holt's steamer *Agamemnon*.

Nothing has yet been made public with respect to the recent visit of H.E. Sir William Jervois to Laroot and Perak, but matters there continue in an unsettled state, owing to want of power and lack of inclination on the part of Sultan Abdullah to carry out the terms of the Treaty of Pangkor. The Resident, Mr. Birch, together with Mr. Swettenham, were to have come down by the *Pluto*, which has gone to Perak, but this arrangement has been altered, and Mr. Birch will not come. Our Government is placed in a difficult position in dealing with the Perak Chiefs, all of whom, it appears, did not sign the Pangkor engagement; but the only course to be pursued under the circumstances is to enforce the observance of the terms of the treaty and the maintenance of British supervision, independently of any local changes in the denomination of the chiefs, or even in the Sultanate, should such an event occur.

We understand that although the *Pluto* has gone to Perak to bring down the Resident, Mr. Birch, that officer has postponed his visit to Singapore because Sultan Abdullah either cannot or will not come with him at present. We believe it was intended to send Captain Douglas to Perak to act in Mr. Birch's stead during his absence, which was expected to last about three weeks; but owing to the postponement of the visit this arrangement has fallen through.

Our readers will be glad to learn that the enterprising Russian traveller and *savant*, Baron Micluho Macleay, has been heard of from the Galena Mines in Patani, where he appeared on the 28th August in fair health. It will be remembered that the recent surveying party up the Moar river were told by the inhabitants of the interior that M. Macleay was almost certain to be killed by some of the wild tribes on his projected track, and it is, therefore, all the more satisfactory to learn of the solitary traveller's safety through the most dangerous part of his adventurous journey.

The homeward P. and O. mail steamer expected here tomorrow is the last of the Saturday P. and O. mail steamers, and the M.M. steamer *Djemnah*, following next Saturday, will be the last of the Saturday homeward mails for the next six months. The date of leaving Hong Kong will thenceforward be altered to Thursday, on account of the change of monsoon, and our bankers and merchants will no doubt revert to their old normal existence, and observe the Saturday half-holiday, as in days gone by—that is, when outward mails and ever-coming teamers will permit.

THE LEGISLATIVE COUNCIL.

The session of the Legislative Council was formally opened on the 7th Oct. at the Council Chamber in the public buildings. All the military and civil officers and a large number of the European residents were assembled in the Council Hall, and the seats reserved for ladies were well filled. A guard of honour of the 10th regiment was drawn up before the building, and the regimental Band was stationed in front of the porch. When his Excellency drove up the guard of honour presented arms, the Band playing "God Save the Queen," while a gubernatorial salute of seventeen guns was fired from Fort Canning. His Excellency was escorted up into the Council Chamber, and at the last gun of the salute rose and addressed the Council. After alluding to the measures which have been and which are to be brought before the Council, Sir William Jervois said :—

In the interval which has elapsed since my arrival here, some five months ago, I have endeavoured, as far as possible, by personally visiting the several parts of the Malay Peninsula, to acquaint myself with the affairs of the native States with which our interests are so intimately associated. Although the anarchy and confusion which were formerly so rife in these States have happily, to a great extent, disappeared with the intervention of the British Government, yet the anticipations which were formed when British residents were first appointed to advise the chiefs of these States have been but partially realised. I believe this has been due to the very nature of the system, which implies that the British officer in a native State is merely the adviser of the chief without any power of control. In Perak especially, where I have recently had an opportunity of personally observing the condition of affairs, and of becoming acquainted with the Chiefs who represent the different interests which prevail in that State, the relations between the adviser and the advised have been unsatisfactory from the very commencement. Whilst Her Majesty's Government hold the Chiefs responsible for keeping the engagements entered into by them with the British Government, there is scarcely any one of those engagements referred to which has not been violated by them. The Resident's advice is disregarded, and he must consequently either passively look on, whilst acts are committed which he disapproves but cannot control, or he must assume to himself a power which is inconsistent with his position as adviser, thus practically taking upon himself the government of the State, so far as the opposition of Rajahs and Chiefs will permit him to do so. The result is eminently unsatisfactory to all concerned.

With regard to the course which should be adopted with respect to these affairs, I am glad to say that I have just been able to introduce, in Perak, a policy which I have every reason to believe will be satisfactory both to ourselves and to the native chiefs and people, and which will place that State on such footing as will foster the growth of commercial enterprise, and lead to the importation of the labour and capital necessary for the due devolopment of its rich resources. I shall in due course explain to the policy to which I refer, and it will be for consideration whether this policy may not be extended to other native States.

I take the opportunity, gentlemen, of this my first occasion of meeting you in Council to assure you of the confidence with which I rely on your loyal and intelligent co-operation—beyond the walls of this Council, no less than within them—in the promotion of whatever may tend to the good Government and development of this portion of Her Majesty's dominions. I desire to express my thanks for the ready assistance which I have already experienced from each of you individually in dealing with questions on which I have had the pleasure of consulting you, and I can assure you that no effort will be wanting on my part to conduct to a successful issue the many complicated matters connected with this Government with which it has become my duty to deal.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—During the fortnight there had been a fair business doing in most classes of goods. Yarns were firm, and 28/32's more particularly had an upward tendency. Common 8¼ and good 9 lb. Shirtings were quoted higher, but good 8¼ lbs. had been barely maintained. Black Velvets had become flat. Woollens and Fancy Goods were generally in fair request. Metals continued very dull at unchanged rates.

HIOGO-OSAKA.—The Chamber of Commerce Report says :—Deliveries of all goods have been upon a greatly improved scale, and quotations generally have advanced. Dealers appear, however, to have satisfied immediate requirements, showing within the past week less inclination to operate. Cottons.—Grey Shirtings: With the exception of some 4,000 pieces the entire business in these goods has been done by Chinese, and the sales consist principally of common 8¼ lbs. from Shanghai; 7 lbs. are scarce, and in demand. Black Velvets: These goods have been in fair inquiry at advancing rates, but show weakness at closing. Chintz: A large business has been done in assorted, at slightly improved prices. Turkey Reds: A somewhat better feeling is apparent in these goods. Worsted and Woollens: Black Lastings have been placed to some extent at firmer rates, but show weakness at the close. The same remark applies to Black Orleans, deliveries of which have been very considerable. Mousseline de Laine have been in good demand at advanced quotations, which are still maintained. There are indications of an inquiry for Cloth. Iron remains without improvement.

Digitized by Google

HANKOW.—Markets very dull.

SHANGHAI.—Business had been dull throughout the interval.

FOOCHOW.—Sales: 700 pieces 7 lbs. T-Cloths at $1.825 per piece. Lead was quoted $8.50 per picul nominal, and some sales had been made at $9 per picul against tea.

HONG KONG.—A small business had been transacted during the interval, but there were signs of improvement at the close, and prices were steady.

MANILA.—The market continued dull, and prices of most articles were weaker.

SAIGON.—The market for Manufactured Goods was very dull, some descriptions showing again a decline on value.

BANGKOK.—Coloured Twists, after a period of inaction, were saleable; but for the majority of other articles there was absolutely no demand, on account of the attack of the Cheen Haus, or aboriginal Chinese, on the east provinces of Siam, which had caused a cessation of all up-country business in that direction.

SINGAPORE.—Great dullness had again been the characteristic of the market for imports; prices generally had rather a weaker tendency, but no important decline in quotations is noted; towards the close some resumption of demand for the Siam market had rather increased the amount of business current.

PENANG.—A rather more active demand had prevailed during the fortnight for staple goods, chiefly induced by some holders accepting reduced rates.

EXPORTS.

—o—

TEA.

YOKOHAMA.—Settlements for the fortnight had been extensive, amounting to 10,000 piculs, comprising mostly medium and good medium parcels, with some lines of finest and choice Teas; prices had slightly fluctuated during the period, according to amount of daily settlements, and closed showing a decline of about $1 per picul on grades fullest in supply. Stocks were light, but supplies were expected in the course of a week. The Lothair was daily expected to sail, being now full, leaving the H. A. Litchfield, City of Quebec, and Ambassador (to arrive), on the berth for New York. Quotations:—Common $20 to 23, good common $24 to 26, medium $27 to 29, good medium $30 to 33, fine $34 to 37, finest $38 to 40, choice $43 upwards per picul. Export from 1st May to date, 9,542,209 lbs.; for corresponding period 1874-5, 8,953,168 lbs.

HIOGO-OSAKA.—Business had been much less active, settlements amounting to 7,125 piculs. During the fortnight, especially, purchases had been very light, and latterly the finer grades only had occupied the attention of buyers. Prices had not declined, however, and the market closed firm, particularly for the higher grades. Total settlements to the 17th Sept., 39,825 piculs, against 35,950 piculs for the same period last year. Stocks estimated at 3,000 piculs.

KIUKIANG.—Black Teas: Supplies had been small, and had all been forwarded to Shanghai on native account. Green Teas: Heavy arrivals of Moyune Teas had taken place during the fortnight. No local business is reported. 29,670 half-chests had been forwarded to Shanghai on native account.

HANKOW.—Messrs. Drysdale, Ringer and Co.'s Report says:—There is little of interest to write about tea since our last report, dated 1st September. Arrivals have been comparatively small, say 11,000 chests against 12,000 chests in the corresponding period last year. All the desirable parcels have found ready sale, and the tendency of the market has been towards higher prices. Particulars of settlements are:—830 chests, 3,647 half chests, 990 boxes at 1s. 0⅜d. to 1s. 3¼d. per lb.; 4,301 chests, 2,707 half chests at 9⅜d, per lb. For teas with a little flavour, from 17 to 19 tls., has been readily obtainable, lower kinds selling for 12 to 16 tls.; and Shuntam packed 10 to 11 tls. per picul. Export is about half a million pounds in excess of last year.

SHANGHAI.—The Chamber of Commerce report says:—Black: The amount of business transacted during the fortnight has been unusually small even for the time of year, but prices show no material change. The bulk of the settlements are at prices ranging from 10⅜d. to 1s. 2¼d. Supplies are coming forward very slowly, and the stock on offer is limited. Receipts both at Hankow and Kiukiang have fallen below last year's figures. Settlements for the fortnight are 9,052 chests; shipments on owners' account, 420 chests. Green: Notwithstanding the large business which has been done during the fortnight, heavy arrivals from the country have increased the stock considerably. Moyunes, which have been placed upon the market in quantity, are much the same as last season both in leaf and liquor. There is little change to make in quotations. Pingsueys have been dealt in to a moderate extent, and, at the close, Teamen are showing rather more disposition to make sales.

FOOCHOW.—Messrs. Westall, Galton, and Co.'s Weekly Letter says:—A very extensive business has been passing on our market, more than 30,000 chests of Congou having been settled. Congou: During the past week operations have been principally in the common to flavoury kinds, and notwithstanding the large stock of these, especially of the lower descriptions, late prices have been fully maintained. The better grades have also attracted some attention, and as the quantity on offer is now comparatively small, teamen are very firm. Souchong: Transactions continue on much the same scale at fully former rates. Oolong: Settlements that took place some little time ago, and which were mentioned last week, have now been circulated. These Teas are all for America, and the prices paid may be quoted about Taels 2 under last year's opening rates. Flowery Pekoe: Two chops of common quality have changed hands at very high value. Scented Teas: Purchases show no change.

CANTON.—Messrs. Deacon and Co.'s Report says:—Our market has been active during the fortnight, and we have a large business to report at generally advanced rates. Congous: A fair amount of transactions are reported, and though we make no change in quotations et these teas have participated in the firmer tone which has ruled for nearly all classes since last mail. Settlements at Macao have bee trifling, but contracts have been made at former rates. Scented Teas: The demand for Capers has continued, and a larger business would doubtless have resulted had not the supply of desirable teas become scarce. Purchases have been somewhat irregular, and for the most part show an advance of one tael for medium to fine, while finest have been settled at prices Tls. 1½, and in some instances Tls. 2, higher than rates current two weeks ago. Very little of the fourth-crop leaf has as yet found its way to this market, though in a few days ample supplies may be looked for; prices in the country are reported to have advanced. Pekoes continue in fair request, and higher prices have been paid. Settlements have been confined to good medium to finest "long leaf" and one or two parcels of "new make;" fair and medium "long leaf" kinds are in very scanty supply, and there are very few parcels to be met with. Canton Greens: No transactions are reported. The following is a summary of the fortnight's business:—Congou, 3,000 boxes, at Tls. 18 to 21 per picul; Scented Caper, 20,000 ditto, Tls. 14 to 24; ditto Orange Pekoe, 7,000 ditto, Tls. 15 to 32.

SILK.

YOKOHAMA.—Transactions had been very important. Prices for hanks had advanced, notwithstanding large arrivals. Oshius were in good request, and remained firm. Settlements, from 1st July to date, 3,050 bales, against corresponding period, season 1874-5, 2,700 bales; ditto, 1873-4, 3,500 bales; ditto, 1872-3, 6,000 bales. Stock 900 bales. Silkworms' Eggs: The first supplies of the season were expected shortly.

EXCHANGES, &c.

TELEGRAMS FROM THE FAR EAST.

MURDER OF THE BRITISH RESIDENT IN PERAK.

(REUTER'S TELEGRAM.)

PENANG, NOV. 4.—The *Pluto* arrived here last night with the news that Mr. Birch, the British Resident at Perak, had been murdered in Malayan territories. Troops have started to-day for Perak, to punish the guilty parties.

PENANG, NOV. 8.—Intelligence received here from Perak announces that the Malays are besieging the British Residency. The troops despatched hence on the 4th inst., to Perak, have reached that place. Mr. Swettenham, Assistant Resident of Salangore, is safe. Mr. Birch's body has not yet been recovered. All the native Rajahs are suspected of complicity in the murder, and the Malays are stated to be making great preparation for resistance. The Sultan is reported to be collecting large forces with the object of attempting to expel the British.

*** We have received the following communication from the Colonial-office:—Telegraphic intelligence has been received at the Colonial-office from the Governor of the Straits Settlements to the effect that the Lieutenant-Governor of Penang had telegraphed on the 3rd instant that Mr. Birch had been treacherously killed at Passer Sala between Rhota and Durian on the Perak river. Mr. Birch appears to have been attacked while in his bath. His Malay intrepreter is reported to have been killed, four of this suite wounded, and two missing. Energetic measures have been taken to bring to justice the perpetrators of this outrage, a detachment of troops having been sent from Singapore to Perak, as well as a force of armed police. The Governor himself started from the Perak river yesterday to inquire into the state of affairs. Mr. J. W. W. Birch, the Colonial Secretary at Singapore, has been acting as Resident at the Court of the Sultan of Perak: there is, therefore, every reason to fear that the Governor refers in his telegram to this officer, though the Christian names are not given.

DISTURBANCES IN CHINA.

(REUTER'S TELEGRAM.)

SHANGHAI, NOV. 5.—A local paper publishes a report that disturbances have broken out in the province of Kweichow.

Shipping Intelligence.

ARRIVALS.

At YOKOHAMA.—From New York, Sept. 19, Wm. Van Name.

At SHANGHAI.—None.

At HONG KONG and CANTON.—From London, Nov. 3, Lotus (str.); from Liverpool, Oct. 30, Eastern Monarch; Nov. 1, Antenor (str.); from Philadelphia, 3, Caprera; from London, Nov. 1, Braemar Castle (str.)

At MANILA.—From Cadiz, Sept. 20, Chica.

At BANGKOK.—None.

At BATAVIA.—From Liverpool, Sept. 25, Horatio Sprague; from Cardiff, 21, Hotspur; from New York, 18, Susan A Blaisdell; Oct. 26, Gysbertus Hermanus; from Amsterdam, Nestor; from Sunderland, Nov. —, Kenilworth; from Rotterdam, Nov. 6, Hampton (str.).

At SINGAPORE.—From Bordeaux, Sept. 22, Madeline; from Hamburg, 18, Adler; from Algoa Bay, 27, Humboldt.

At PENANG.—None.

DEPARTURES.

From YOKOHAMA.—For New York, Nov. 1, Ambassador.

From SHANGHAI.—For London, Oct. 30, Glenearn (str.); for New York, Glenlyon (str.).

From HONG KONG and CANTON.—For London, Sept. 15, Scotland (str.); 19, Diomed (str.); 22, Nankin (str.); for New York, 19, Harriet N. Carleton; for Cape Town, 23, Cicile; for Callao, 19, Livingstone.

From MANILA.—For London, Sept. 17, Cicero; 19, Christine; for Cadiz, 15, Jacmel; for New York, 16, Ella, Great Admiral.

From BANGKOK.—For London, Sept. 8, Kaisow.

From BATAVIA.—For Channel, f.o., Sept. 21, Brothers German; for Holland, 19, County of Sutherland, Admiral de Ruijter.

From SINGAPORE.—For London, Sept. 25, Scotland (str.), Erl King; 29, Diomed (str.); for London, Nov. 6, Glenlyon (str.).

From PENANG.—For London, Nov. 3, Nankin (str.), Patroclus (str.).

VESSELS LOADING.

At YOKOHAMA.—For London, Merse; for New York, H. A. Litchfield, City of Quebec; for San Francisco, Hants County.

At HIOGO.—For London, Kashgar, Satsuma.

At SHANGHAI.—For London, Cybele (str.); Ascalon, Halloween, Tamerlane; for New York, Challenge, Fire Queen, Wylo.

At FOOCHOW.—For London, Legislator (str.); Edymion, Jerusalem.

At HONG KONG and CANTON.—For London, Ada, England's Glory, Melbrek; for New York, Thyatira, Midnight.

At MANILA.—For London, Roodee, Hervatska; for Liverpool, Glee Maiden, James Shepherd, Emiliano (str.), Corea, Elizabeth Ann; for Channel, f.o., Scindia; for Cadiz, Vicenta; for Santander, Antela; for New York, Moneta; for San Francisco, Gazelle.

At BANGKOK.—For London, Attila, Josephine.

At BATAVIA.—For Holland, Kortenaer, Ada.

At SINGAPORE.—For London, Templar, G. F. Muntz; for Channel, f.o., Adeline; for Marseilles, Chiara; for Boston, Nehemiah Gibson.

FREIGHTS AND CHARTERS.

From YOKOHAMA.—To London, by steamer, $18 per ton of 40 cubic feet; sailing vessel, £3 10s.; to New York, £2 5s. per ton.

From HIOGO.—To London, by sailing vessel, £3 per ton.

From SHANGHAI.—To London, by steamer, £3, sailing vessel, £2 10s per 50 feet; to New York, by steamer, £4; sailing vessel, £2 10s. per 50 feet.

From FOOCHOW.—To London, by steamer, £2 10s. per 40 cubic feet; sailing vessel, £2 per 50 per cubic feet.

From HONG KONG AND CANTON.—To London, per steamer, £2 15s.; sailing vessel, £2 10s. per ton of 40 and 50 cubic feet respectively; to New York, £2 10s. per 40 cubic feet.

From BATAVIA.—To Holland, sugar, f.70; coffee, f.80; spices, f.90; hides, f.110; arrack, f.115.

From SINGAPORE.—To London, by steamer, tin, £1 5s.; sago flour and tapioca, £2 15s.; coffee, £3 15s.; measurement goods, £3 5s.; pepper, £4; hides and gutta, £5 5s.; sailing vessel, gambier, £2 7s. 6d.; sago flour, £2 17s. 6d.; light freight, £3 10s.; to Liverpool, gambier, £2 7s. 6d.; other dead weight, £2 10s.

VESSELS PASSED STRAITS OF SUNDA.

THE MURDER OF MR. BIRCH AT PERAK.

(MORNING POST.)

The lamentable fate of Mr. Birch, British Resident at Perak, whose murder was announced on Friday by a telegram from Penang, is deeply to be regretted on public as well as private grounds. It is an unpropitious commencement of the system which was so recently initiated by Sir Andrew Clarke, of placing British officers at the Courts (if they could be so designated) of the rulers of the principal Malayan States, with a view to their aiding these potentates with advice, and the moral support of their presence in keeping their turbulent subjects in order. Perak was, it may be remembered, one of the States to which the attention of the late Governor of the Straits Settlements was directed shortly after he assumed office in the colony, as being in such a state of anarchy and disorder as to cause serious injury to the trade and interests of this country, and to menace the peace and good order of the British Settlements bordering upon it. The origin of all this evil was a dispute as to the succession to the Sultanship of the kingdom, to which there were two claimants, one of whom, Ismail by name, had usurped the throne and possessed himself of the regalia. It was asserted that he had only been declared Acting Sultan as a temporary measure, but there is very little reason to doubt that his intention was to retain the office and dignity to which he had been called to the prejudice of the Rajah Muda Abdullah. Each of these rival aspirants to the regal dignity of course had his followers, who were continually embroiled, each side committing depredations upon and ravaging the property of the other, until piracy, arson, and even murder were rife in the country. Sir Andrew Clarke, after assembling the head men of the district and hearing what each party had to say respecting the question of the succession, decided that the Rajah Muda Abdullah was really the rightful heir to the Sultanship, and he accordingly recognised him as the Sultan of Perak. The Chiefs of the State agreed to this step and entered into an engagement, dated 20th January, 1874, acknowledging Abdullah as their Sultan, and deposing Ismail, the usurper, who was allowed to retain the title of Sultan Muda, with a pension and a small territory that was assigned to him. One of the articles of this engagement—it could not be called a treaty—was to the effect "that the Sultan should receive and provide a suitable residence for a British officer to be named Resident, who shall be accredited to his Court, and whose advice must be asked and acted upon on all questions other than those touching Malay religion and custom." This, then, was the origin of the appointment of a British officer to the position of which Mr. Birch was the first holder.

That the action which Sir Andrew Clarke took was judicious was abundantly shown when the officer who has so unfortunately lost his life before his nomination as Resident visited the country on a mission to it and other native States. In a report made by him of his proceedings he related that the whole country traversed was at peace, that a general feeling of security prevailed, and that tin mines were being worked successfully in many places by Malays, amongst whom there was no lack of enterprise. The resources of the country were described by Mr. Birch as unusually great, the scenery most picturesque, and the soil of surprising fertility; moreover, the natural water communications were said to be excellent, and the territory an easy one for the construction of roads. Still there was much levying of black mail, a practice which the Sultan and many of his chiefs were honestly anxious to abolish; but they did not know how to set about any reform, and as they lacked confidence in themselves they were sorely in need of a guiding hand to lead them. Abdullah and his principal chiefs were most anxious that a British Resident should be sent to Perak, and it was anticipated that by the appointment of one the hand of the Sultan would be so strengthened that he would be able to carry out measures for the development of his dominions. After much consideration, Mr. Birch was nominated for the office, and in recommending him for the position Sir Andrew Clarke spoke in the highest terms of his qualifications for it. Mr. Birch had had great experience previously as Settlement officer in Ceylon, possessed an intimate acquaintance with Oriental life, customs, and habits, whilst to untiring physical energy and great powers of endurance he added unfailing tact and judgment in dealing with natives. His abilities for administration had already been displayed as Colonial Secretary of the Straits Settlements, which office he had occupied for upwards of four years prior to his transfer to Perak. It is evident, then, that this gentleman was most suitably placed when he was appointed as Resident at the Sultan's Court, and it may well be assumed that the sad event which has occurred was not brought about by any error of judgment in the execution of the duties assigned to him.

We are by no means inclined to view his murder as in any way tending to show that the measures adopted by Sir Andrew Clarke are in any degree likely to fall short of their object. The presence of a Resident was anxiously desired by the Sultan as well as by a majority of his leading men, and though in the absence of fuller information it is impossible to say who is answerable for the heinous crime that has been perpetrated, we think he and they may safely be acquitted of any share in it. No doubt to many the presence of an officer whose mission it was to guide the Sultan in restraining them from their evil, though to themselves profitable, courses was most distasteful; and there may have been chiefs whose great aim would be to rid themselves of him. It the report to which we have alluded it was stated that at one village where several freebooting chiefs had taken refuge Mr. Birch was not received cordially, and it was hinted that those who showed a spirit of hostility to him were adherents of the ex-Sultan. It is more than probable, then, that to some of Ismail's followers the crime will be traced, and it is satisfactory to notice that steps have already been taken for punishing the offenders, whoever they may be. We trust that signal punishment may be inflicted, and that the natives of the Malayan Peninsula will be taught that British officers cannot be murdered with impunity. But though this may be done, and due reparation exacted, it will be but a sorry compensation for the death of an officer of such promise as Mr. Birch, whose loss to the public service is a heavy one that will be seriously felt.

Naval and Military.

Assistant-Controller Malony, in charge of the Control Department at Hong Kong, was to have left that station by mail steamer of Sept. 25, and is ordered to report himself to the Controller at the Royal Arsenal, Woolwich, not later than November 15. The *United Service Gazette* says:—

We understand that the General officer commanding the troops at Hong Kong has obtained the recall of the Assistant-Controller at that station. We are not in possession of the full particulars of the case, but it appears that there has been a misconception on the part of the latter officer as to the extent of his jurisdiction, inasmuch as he did not feel himself bound to observe the orders of the General. The opening it afforded to a contention between departmental and executive authority has been often pointed out as one of the chief defects in the constitution of the Control. Hong Kong is a small garrison, but a large staff of control officers is kept there; and, situated as it is, so far from England, the necessity of the General commanding being supreme is all the more obvious. The late Controller at Hong Kong has been

Digitized by Google

twenty years in the service, fifteen of which have been spent in connection with the civil department of the War-office.

Lieutenant-Colonel H. C. Smith, of the 80th Regiment (Hong Kong), has been granted four months' leave in extension, at the close of which he will rejoin his regiment. Lieutenant P. Swinburne is at present on leave in England.

The Commander-in-Chief has approved of ninety-four volunteers from the infantry regiments being transferred to the 28th Regiment, in order to make up its established strength previous to embarking for Hong Kong.

Orders have been sent out to Hong Kong directing the officer commanding the 80th Regiment to hold his corps in readiness to leave that station about the middle of February for Singapore.

The German frigate Vineta, Captain Grat von Montz, left Plymouth Sound on the 31st ult., for China and Japan, where Captain Montz will be the senior German officer on the station.

The corvette Juno has been commissioned for service in China by Captain James A. Poland (1871), who has seen considerable service on the China station.

New boilers for the Salamis, despatch vessel on the China Station, are to be constructed at Devonport, at a cost of nearly £5,000.

The following officers, whose last term of service was on the China station, have been appointed as under :—Lieutenant A. H. Bolders (in the Thistle, from 1870 to 1874), to the Naval College ; Lieutenant W. H. Calwell (in the Curlew) to the Curlew, gun-vessel, China ; Lieutenant J. S. Muggeridge (in the Kestrel) to the Kestrel, gun-vessel, China ; Lieutenant J. Swan (in the Hornet, from 1872 to 1874), to the Malabar, Indian troopship ; Sub-Lieutenant R. A. A. Lambert (in the Iron Duke, from 1872 to 1874), to the Sirius, sloop ; Midshipman J. G. Duberley (in the Iron Duke, from 1872 to 1874), to the Monarch Channel Squadron ; Navigating Sub-Lieutenant W. Sugden (in the Elk, from 1872 to 1874), to the Jumna, Indian troopship ; Mr. G. A. Haddy (in the Cadmus, from 1872 to 1874), to the Crocodile, Indian troopship ; Assistant-Paymaster C. E. Gifford (in the Iron Duke, from 1871 to 1874), to the Royal Adelaide, Devonport ; Mr. R. Eales, gunner (in the Iron Duke, from 1869 to 1875), to the Asia, Portsmouth ; Mr. E. Wingate (in the Victor Emmanuel (from 1874 to 1875), to the Durham, drill-ship, Sunderland.

On the recent passage of H.M.S. Lynx, from Rio de Janeiro to the Cape, Lieutenant W. L. H. Browne gallantly jumped after one of the crew, who had fallen overboard, and succeeded with the aid of a life-buoy in rescuing him. This is the third time that Lieutenant Browne has been fortunate in saving life, the last occasion being in China, when he jumped overboard from the quarter-deck of the flag-ship and rescued an officer of marines, for which he was presented by the Royal Humane Society with its silver medal.

Fleet Surgeon Seton Wade has been appointed to supersede Fleet-Surgeon James Lilburne at Deptford Dockyard, and this last-named officer has received from the Admiralty a highly complimentary letter, in which their Lordships convey to him their approval of the manner in which he had discharged his duties during the three years he had been attached to the yard.

Letters from the Pacific state that the squadron there is much undermanned in consequence of the wholesale desertions which have occurred. The flagship has lost 100 men, while the Tenedos and the Myrmidon have lost half their complement of hands. The high rate of wages at San Francisco is alleged as the main cause of the desertions.

It is announced that Captain O'Callaghan, 1st West India Regiment, has sent in his application to retire on half-pay, with a view to continuing on the staff of Sir Arthur Kennedy, Governor of Hong Kong, as his aide-de-camp.

It is officially announced that the recent Admiralty Circular as to the reception of fugitive slaves on board Her Majesty's ships has been withdrawn, and that new instructions on the subject will be issued.

By the retirement of Lieutenant-Colonel Lucas, of the 10th Regiment (Singapore), Brevet-Lieutenant-Colonel J. P. H. Crowe obtains a step.

The Teazer, gunboat, Commander Wodehouse, has left Devonport for the Persian Gulf, calling at Gibraltar and Malta.

Miscellaneous.

POLICE OFFICIALISM.

Mr. E. H. Parker, of the China Consular Service, has met with an adventure, of which he sends the subjoined account to *The Times* :—I engaged a passage by the steamer *Upupa* from Cork to Milford. At the hour appointed for the departure of the steamer I was requested by the stewardess to come from my cabin and take my ticket, and thereupon paid 17s. 6d. for a ticket to Milford. A tall and somewhat sinister-looking man at this juncture inquired of me whither I was going, to which I replied thaa I was going to Milford, or perhaps Newport. He then asked whence I came, why I was going to Milford, and what was my name and my address. I was somewhat taken aback by these queries, but, supposing that the number of strangers landing at and departing from Cork rendered such inquiries necessary, I at once replied that I was an officer in Her Majesty's Consular Service in China, now on leave and travelling for my health, and gave him my father's address in Liverpool. He then laid his hand on my shoulder, and, eyeing me severely, inquired if I knew Edward Young, Remarking that I supposed he was a detective officer, though, apparently, an over-zealous one, I replied in the negative, and from my portmanteau, which lay at hand, I took several law books, which I explained I was studying in connection with my profession, and an Irish guide-book, with my name printed on the fly-leaf. He, on his part, seized "Green's History of the English People," and a pair of trousers, and demanded what book it was, and whether the trousers were riding breeches, which they were not. This book also had my name written on the fly-leaf. To my surprise, however, he still insisted that I must go with him to the station, and ordered me to stand erect and exhibit my waistcoat, which I did, protesting at the same time that the affair was becoming serious, and inquiring who he was and what satisfaction I should get if I were delayed when I had proved my identity. He asked me a great number of questions—my age, height, the hotels I had visited, the names of my travelling companions—who had left for Dublin that morning—and insisted all the more strongly, as I replied to his negative, that I must be Edward Young. I suggested that he should himself go to the Imperial Hotel where I had last stayed, and make inquiries, or accompany me to Milford ; but he, after repeatedly pressing me to go with him, at last said, "Are you coming? If you don't come at once I have got three men here who will carry you." Not wishing to have my skull split open with a life-preserver or to be dragged through the streets, I consented, adding that I should hold him responsible for all loss and delay, and report him to his superior officer directly I had proved my identity. He flatly refused to carry or assist me with my portmanteau, and made me follow him through the dirt, cattle, cargo, and pouring rain to the wharf, where I was subjected to the scrutiny of a crowd of his satellites and other loafers, one of whom demanded my papers. I was allowed—probably because it seemed like a prelude to the discovery of sundry gold watches and other plunder—to go back to look for a gold pencil-case which I had left behind in the hurry of my departure. In returning, accompanied by him, to fetch this, I narrowly escaped being thrown into the river, owing to one of the planks in the gangway suddenly overturning. Once again in the street I insisted on getting into a cab ; he, following me, ordered the driver to proceed to the Imperial Hotel. Arriving at the hotel, I was made to accompany him to the bar, where, before all the waiters, porters, &c., the landlady, and several visitors, I was examined and identified as having spent two days there in company with my two friends, whose names, together with the items of my bill, were read out for the general edification of all present. Then only, somewhat to my surprise, did my conductor perceive his mistake ; he simply said "Very satisfactory" to the landlady, and to me, "I will now take you to the steamer again." He dropped me there without a word of apology, and paid the cab. I told him that as I could just catch the steamer I should not insist upon his taking me before his superiors, but ascertained from him what was his name. At a second risk of my life I was dragged by two men on board the steamer, after the removal of the gangways and just as she was moving off.

"LIE TEA."

The subjoined lines with the above heading appears in the current issue of *Punch* :—

"Now stir the fire, and close the shutters fast,"
Surely the boredom of the day is past :
With some reward our virtue should be crowned,
"Let fall the curtains, wheel the sofa round,"
Forget the morning, when one's cares return,
"And, while the bubbling and loud-hissing urn
Throws up a steamy column, and the cups
[COWPER despised the naughty man who sups,
Adhering to his liquor like a leech]
That cheer and not inebriate, wait on each,
So let us welcome peaceful evening in."

O peaceful poet ! is it not a sin
That this, your fragrant fine and favourite beverage,
Should be so treated in our mighty clever age ?
It "not inebriates," but it causes stupor :
And, you, so surely as your name was COWPER,
Would find yourself a sufferer by the trick
That mixes indigo and turmeric,
And other things, with names unfit for rhyme,
In the rare product of old China's clime.

At least they give the poison proper name,
Since as Lie Tea 'tis known to grocery fame :
But comes the deep momentous question, why
False Tea alone should have the prefix "Lie."
Lie-Wine is found on tables of pretence,
Lie-Agitators mock our common sense,
Lie-Hair is seen on heads of ladies bright,
Lie-bloom to cheeks gives dangerous delight,
Lie-Ten-per-Cent. brings house and land to th' hammer,
Lie-Journalists write trash in wretched grammar,
Lie-Politicians somehow fill their purses,
Lie-Christian clerics shock the world with curses,
Lie-Coals are slate and brick, Lie-Broadcloth shoddy,
Lie-Whiskey'd made a Scot abjure his toddy.

TRADE WITH THIBET.

The Times says :—Last year Mr. Edgar was deputed by the Government of Bengal to report on the trade between India, Nepal, and Thibet ; and, in forwarding his Report to the Imperial Government, the Government of India observed that the Lieutenant-Governor of Bengal was of opinion that a considerable trade might be established with the countries beyond Darjeeling if a good road were constructed through Sikkim. The Government of India hesitated to incur the requisite expenditure on account of the alleged refusal of the Chinese to allow commercial intercourse with Thibet, and also from not thinking that the extent of the trade would afford a commensurate return for the outlay. But the Secretary of State, in reply, stated that he saw no ground for the belief that the Chinese would throw difficulties in the way of purely

Digitized by Google

commercial intercourse with Thibet,— at all events, in case of a traffic carried on between the Bhooteas and Thibetans, and that it would appear that at present there is a very fair trade considering that everything has to be transported on men's backs; and he suggested that a survey should be undertaken to ascertain the cost of making a bridle path through that portion of the route which lies within British territory. Sir R. Temple strongly advocates the construction of a road, and feels assured of the existence of an increasing desire in Thibet for commercial communication with the outer world. It appears from *data* collected by Mr. Edgar that, while there is almost an entire absence of manufactures in Thibet, it is wealthy in cattle, and abounds in minerals. Its goldfields, hitherto little explored, extend from Rudok to Lassa, some 700 miles. It is stated that the authorities, from feelings of superstition, are opposed to the working of the gold and silver mines, but there need be little doubt that self interest would soon prevail with a people said to be eminently commercial. The anticipated advantages appear still more marked when we look to the traffic which we could carry into these Trans-Himalayan countries. English woollens and broadcloths are much sought after, notwithstanding Russian competition. Salt produced by solar evaporation abounds in Thibet, but it is thought likely that the better and cheaper salt from Calcutta would supersede it, and possibly find its way beyond Thibet. Mr. Edgar thinks a large expansion of trade might arise from the introduction of Darjeeling teas into Thibet. If the trade were free, our producers might in course of time supplant the China article both in quality and price, but probably this would be the latest concession which the Chinese Government would voluntarily make.

THE NATIONAL BIBLE SOCIETY IN CHINA.

A meeting of the friends of the Bible Society in Nairn was held on Oct. 29, at which Mr. Lilley, one of the agents of the National Bible Society in China, gave a most interesting account of his work in that empire. Mr. Lilley has been travelling for the past six years in the interior of China, and has visited many districts hitherto unreached by the missionary. The principal difficulties, in addition to the language, had been the intense dislike to foreigners, and the excessive politeness of the people. This last made it hard for the missionary to meet the real difficulties of the Chinaman. Whatever he thought he assented to, and applauded everything he heard. Mr. Lilley gave a most graphic account of his travels and frequent perils, which along with his account of the manners and customs of the people, seemed to be highly appreciated. The work of the Bible Society in China seems to be that of breaking up ground rather than gathering results. The agents of of the Society sow, and others come after to reap. Several instances to show this were mentioned; one deserves special notice— a Chinaman had bought from Mr. Lilley a copy of Matthew's gospel, and by reading it became convinced of the truth of Christianity. He saw from that gospel that other books such as the book of the prophet Isaiah were referred to, hence he concluded that he possessed only a part of the Sacred Writings. At once he set out on a journey of several hundred miles to reach the nearest missionary station. There he received the other books, and further information. By the instruction received he became a decided convert, and returned to his own town to become in turn a missionary of the Cross. The result of his labours has been the establishment of a new missionary centre, and the gathering together of a church with nearly 200 members. The Chinese Mr. Lilly found willing to buy the Bible, and many who doubted the reality of their own faith were anxious to hear the way of salvation through Christ. Before coming home Mr. Lilly mentioned that he had been sent to Japan to make arrangements regarding the establishment of a Bible Society agency in that important country. There the difficulties were even greater than in China. Although the Japanese were ready to adopt Western improvements they restricted foreigners to twenty-three miles inland from the open ports. The Rev. Mr. Dey expressed the thanks of the meeting to Mr. Lilley for his address, and hoped he might be able to come North to the annual meeting of the Association.

THE "CHALLENGER" DISCOVERIES.

Among the most interesting zoological discoveries made by the naturalists on board the *Challenger* is a specimen of the animal enclosing the spiral shell known as Spirula. Although this shell is so common as to be collected by bushels on the shores of the Atlantic and Pacific islands, the animal to which it belongs (a small kind of cuttle-fish) has only three times been captured before this. One specimen was brought by Mr. Earl to England from New Zealand, and was drawn by Mrs. Gray; a second was sent by Peron to France, and was described by De Blainville; the third was found floating dead on the surface of the Sulu Sea, and was dissected and described by Professor Owen. The *Challenger* was dredging in sight of the coast of Banda Neira, one of the Moluccas, when the fourth specimen was procured. It came up with a vast number of other living things from a depth of 360 fathoms, and appeared to have been swallowed by one of the deep sea fish (probably a Macrurus) which vomited the valuable specimen on being subjected to the diminished pressure of shallow water, as the dredge was hauled in. This specimen seems to prove that Spirula lives at a depth of 300 to 400 fathoms, where it probably crawls about under the ledges of rocks and stones, and thus escapes the dredge. Probably some plan of baiting the dredge would serve to entice those forms into its meshes, which are now lost by their retiring movements. When the *Challenger* sailed there were some naturalists who believed that so much elaborate preparation would certainly, amongst other things, ensure a full supply of specimens of Spirula. It is satisfactory to hear now that at least one specimen has been secured. A more astonishing form, and one which is quite new, was dredged by the *Challenger* off the coast of Japan; this is a gigantic hydroid polyp. The hydroid polyps are graceful flower-like little organisms, seldom exceeding half an inch in length to each individual, though they form tree-like and mat-like colonies, which are of considerable size. The new form is allied to a very elegant British genus, Corymorpha, but the polyps attain the gigantic size of seven feet.

THE ATCHIN WAR.

A letter in the *Eberfeld Gazette* gives a lamentable account of the present position of the Dutch in Atchin. This is the third year (says the correspondent) of the campaign against the Atchinese, which, according to the Dutch commanders, was to be completed in six weeks; and yet, since the capture of the Kraton at the beginning of 1874, the Dutch have barely gained two miles of ground. The Kraton, lying in a marshy hollow near the coast, is rather an obstacle than a protection to those who hold it, to say nothing of the fatal exhalations of the marshes in its vicinity. There are breezy heights on the other side of the hollow, but the Dutch, notwithstanding all the efforts of the last two years, have as yet been unable to reach them. The Atchinese, confident in their strength, continue their agricultural and other pursuits as in time of peace, while the Dutch must be constantly on the watch to defend themselves against the occasional attacks of the enemy. It is true that the Dutch commanders have from time to time reported the submission of some native tribes, but it has always turned out that this submission was merely nominal. The native chief simply declared that he would cease fighting and recognise the supremacy of Holland; and he resumed hostilities as soon as a favourable opportunity presented itself, wishing only to be left alone so long as his people desired peace. The Dutch are now waiting in the Kraton till the fruit gets ripe and falls into their laps; but it will not ripen, and if things do not advance more rapidly the Dutch will not have got any farther ten years hence than where they are now. The health of the troops has improved since they have been supplied with better provisions and water from the artesian wells; but deaths from fever and dysentery are still very frequent among them, and ten Dutch soldiers at least die every week for one of the enemy. Reinforcements are constantly being called for from Holland, and though they are supplied very sparingly they have already an enormous force.

THE MURDER OF MR. DENT AT SINGAPORE.

The *Pall Mall Gazette* gives the following, which we feel sure can be answered satisfactorily by the accused:—"I have received a letter from Singapore, the writer of which says: 'In my capacity of civil engineer I have taken the opportunity of inspecting the prison here, the scene of the late frightful massacre, and was astonished to find the place still in the most unsafe state, and a total want of discipline is apparent.' 'I was much shocked at what I saw,' is the concluding phrase of the letter. The Singapore authorities appear to take things easily. A letter was received from them by Mrs. Digby Dent, in the month of July last, in which they informed her that a pension of £120 per annum had been granted to her, but said nothing of the manner in which she was to avail herself of the grant or how she was to obtain the arrears due to her. In fact, so far as they were concerned, she might have been penniless. Under these circumstances an influential friend applied to Lord Carnarvon, who promised to make inquiries on the subject. He did so, and directed the Crown Agent of the Colonies to pay the money without any further delay."

Action against the P. and O. Company.—In the Queen's Bench Division of the High Court of Justice, with reference to the case "Touke *v.* the P. and O. Company," Mr. Butt, Q.C., moved for a rule to set aside the verdict obtained by the plaintiff last term for £250, on the ground that it was against the weight of evidence. The action was brought to recover damages occasioned by a collision which occurred near Gravesend in which a vessel was run down by the Company's steamer *Indus*, and sunk. The plaintiff was a merchant's clerk who had had a passage to India on board the vessel, and sought to recover compensation for the loss of his effects. The evidence showed that the steamer was at the time of the collision in sole charge of a pilot, who was on board by compulsion of law, and with whose orders the captain or his officers did not in any way interfere. That being so, it was submitted that the defendants were not liable. A rule *nisi* was granted.

Professor Nordenskiold's recent journey from Norway to Siberia by way of Pet Straits (Jugorsky Shar) and the Sea of Kara has caused quite a sensation in Russia. At a meeting of the Society for the Encouragement of Commerce and Industry M. Sidorof said that the journey was one to be ranked in importance with the discovery of a new world, as it would in all probability lead to the establishment of a regular line of communication between Northern Europe and Siberia, and the vast resources of the latter country would thus at last find an outlet along her great fluvial highways.

We learn from *Nature* that a French expedition is being fitted out to make a "Tour du Monde" in ten months. The excursionists are to visit India, Japan, the interior sea of Japan, Chinese ports, Australia, &c. A special library, with instruments, will be placed on board. The members of this expedition will be exclusively of the male sex. The fare is to be £300, everything included. The Geographical Society will superintend the management of the enterprise, although it will be supported by private funds, and it is altogether a private speculation.

The King of Portugal has been pleased to confer on Mr. R. H. Major, of the British Museum, and Joint Sec. of the Royal Geographical Society, the diploma and insignia of a Knight Commander of the "ancient most noble and illustrious" Order of Santiago, in recognition of the value of his researches in the history of geographical discovery.

Mr. Robert Swinhoe has in an advanced state of preparation an important work on the Birds of China. It will be uniform with Mr. H. E. Dresser's *Birds of Europe*, to which it will form, as it may be termed, a supplement, no species of bird being figured in both.

A telegram from Semipalatinsk states that the expedition under Colonel Sosnoski, which has been travelling in Western China in order to discover a practicable caravan road to Western Siberia, has returned from Peking by way of Landien and Khami to Saisan.

The Pacific mail Company's steamer *Great Republic*, with the Japan mail, delivered this morning, arrived at San Francisco on the 17th ult.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, NOV. 2.

Regarding our trade with the East Indies and China I have to report the arrivals of the barque *A. E. Vidal*, Captain Angelbeck, from Hong Kong, and the *Bellona*, s.s., Captain Dose, from China. The *Condor*, barque, left here on the 17th of October for Chefoo; the *Altona*, s.s., Captain Mueller, on the 20th, and the *Egeria*, s.s., on the 31st October, both for India and China. The latter steamer, formerly commanded by Captain Entwistle, is now commanded by Captain Johannsen—Captain Entwistle, it is said, not being in good health. On the berth are: the *Feronia*, s.s., 2,500 tons, for Penang, Singapore, Hong Kong, &c., to leave on the 30th November; *G. H. Wappæus*, Diedrichsen, for Penang and Singapore; the *Zylland*. Laub, and the *Deutschland*, Tiemann, both for Hong Kong; and the *Candace*, Meinschien, for Yokohama and Hiogo (last four before reported as having taken the berth). The two first-named steamers are still lying on the lower river, completing their cargoes. The *Altona*, s.s., has received the greater part of her cargo from England on private terms; and the *Egeria*, s.s., will fill up at 45s. to 50s. and 10 to 15 per cent.; rates for sailing vessels are nominal at 15s. to 20s., with very little doing.

It is a long time since we have had a period so destructive to shipping as the last fortnight. Telegrams, announcing disasters at sea, have continued to come in daily. Only this morning a new loss to the English merchant fleet was reported, viz., the stranding of the *William Chapman*, s.s., which vessel, on her voyage from Holland to Dantzic, on the 27th of October, stranded on the dangerous (and not sufficiently provided with sea-marks) Horns-reef, on the western coast of Jutland, Denmark, and no doubt will prove a total loss; nine hands of the crew were saved by the *Merour*, s.s., and landed at Nieuwe Diep, but ten are still missing. The German flag has not suffered very much, and the losses of especially Hamburgish vessels only comprise the *Altona*, steam collier (not to be mistaken for the East Indian *Altona*), which boat, trying to enter the port of Sunderland during an easterly gale and just arrived at the end of the north pier, in consequence of her rudder gear getting foul, drove to the northward of the pier, and was totally wrecked. The Scandinavian nations, especially the Baltic fleet, have suffered most, and if this stormy weather should still keep on for a while, there is no doubt that the present year, after showing a promising appearance during the first three quarters, will only give a very poor financial result. A very praiseworthy case of humanity, shown by an English master during the late gales, I feel myself bound to report to you, as an example for imitation; Captain Chase, of the *Kingmoor*, s.s., on his trip from Hamburg to Shields on the evening of 21st Oct., at the Daggerbank met with the schooner *Anthon and Jacob* lying at anchor dismasted and leaky, and altogether in a most helpless condition. Notwithstanding the gale blowing at the time, and the high sea running, Captain Chase, after staying all night with the distressed vessel, next morning with great difficulty succeeded in saving the crew and took all hands safely to England.

The Hamburg American Steamship Company from the beginning of December, on its West Indian line, will despatch two steamers a month instead of one, as at present; and, besides this, in view of supporting the International Exhibition to be held at Philadelphia, there will be despatched an extra steamer to Philadelphia at the end of February. There is no doubt that the West Indian line of this active and well-managed company would answer very well if the German Parliament would only for a few years allow this line a subvention to half the amount of that which the English Parliament has allowed to English mail lines for many years. But our Parliament will hardly be brought to such a step, and as things stand now it is to be feared that the balance for the present year will again show a deficit. The New York line seems slowly to be recovering, and even if the steamers on this line, since the union with the Transatlantic Company, may not have given any remunerable profit, it is at least satisfactory that no losses have occurred.

The Cuxhaven Railway Steamship and Harbour Company (Limited) held a meeting of shareholders at Berlin on the 26th October, and resolved upon the issue of new preference shares to the amount of twenty-seven millions of marks. I lately referred on this subject to a financial project, to which the English money market is likely to contribute, and we have now to expect in a short time the announcement of the subscription of this new loan.

At four of our ports, viz., Cuxhaven and Bremerhaven on the North Sea, and Newfairwater and Swinemünde on the Baltic, I have to report the erection of time-balls, which are to fall twice a day, firstly, at local time, and, secondly, at Greenwich time. These time-balls will be placed high enough so as to be seen by all passing ships.

The traffic of our German Post-office includes, as you know, the forwarding of specie, and of this there was forwarded in the year 1874 the amount of nearly 15,000 millions of marks. The total weight of all packets forwarded during the same period amounted to 185 million kilos., while the number of post-passengers reached five millions.

The production of coal in the Westphalian pits during the three months from 1st April to 30th June, 1875, exceeded the production of the same period in 1874 by 12½ per cent.; and a very interesting fact is the despatch of five coal trains a week, by Koeln-Mingden Railway Company, to the North Sea ports, Hamburg and Bremen; and the Atlantic steamship companies of these ports have already been trying to make use of these coals, as we hear, with a fairly satisfactory result.

PRODUCE MARKETS.

The Produce market during the past fortnight has been without animation, and few transactions of importance have occurred.

COTTON has been hardly inquired for, and only some small sound lots have changed hands. Quotation for Bengal quality m.0.76 to 0.96 per kilo.

SPICES.—Mace and Nutmegs are quiet; quotation for Mace, m.6.40 to 6.60 per kilo, Nutmegs, m.6.40 to 7.00 per kilo. Cloves in good demand, and have changed hands at m.172 to 175 per 50 kilo.

PEPPER firm; Singapore quality m.55 to 55½ per 50 kilo., Penang m.50 to 51 per 50 kilo.

RICE.—Lots in good condition found buyers easily with firm market; quotation for Java quality m.12 to 14 per 50 kilo; Java table rice, m.16 to 21 per 50 kilo.; Bengal, m.11 to 15; cleaned (Patna), m.18 to 19; Siam, Madras, Ballam, m.8 to 11; Rangoon, m.9 to 9¼; cleaned, m.13 to 17½; Bassein, m.9; cleaned, m.12½ to 17; Arracan, m.8½ to 8¾; cleaned m.11½ to 15; Moulmain, m.8¾ to 9¼; Saigon, m.8 to 8½; cleaned, m.13 to 14.

SAGO.—Pearl firm, stock reduced, value m.20 to 26 per 50 kilo; East India quality, brown, m.21 to 23.

TEA.—Firmly maintained, and changed hands 150/8, 69/16 boxes Congou; 190/16 boxes Souchong; for arrival ex steamer Crocus, from Foochow, 81/4, 325/8 boxes Souchong. Quotations are: Congou, ordinary to good ordinary, 1.00 to 1.15 marks per half kilo.; ditto middling to fine, 1.35 to 4.00; Souchong, ordinary to good middling, 1.20 to 1.70; ditto fine, 2.60 to 4.00; Caper, 1.50 to 2.00; Souchong, 0.90 to 3.00; Pecco, ordinary to good middling, 1.80 to 2.40; ditto fine, 3.80 to 5.00; ditto orange, 1.25 to 3.40; Haysanschin, 0.90 to 1.80; Tonkay, 0.90 to 1.80; Younghaysan, 1.10 to 2.70; Haysan, 1.70 to 3.60; Imperial, country, —; ditto, Canton made, 0.90 to 1.70; Gunpowder, country, —; ditto, Canton made, 0.85 to 2.60.

EXCHANGE.—London: 3 months, m.20.16 to 20.10 per £.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, NOV. 3

The Railway Bill was carried by 65 against 7 votes, after almost all the amendments proposed had been rejected. It must be agreed alike by friend and foe that this result is a great success for Mr. Heemskirk, who, after a nine days' debate, won the battle most gloriously. After such a warm debate it was of course reasonable that the members should take a short recess, which will last till the 9th of this month, when they will be occupied for several weeks with the different Budgets.

Prince Alexander will leave the Hague on the 5th inst. to stay five months at Algiers, in order to restore his health. The fact that he is very feeble, and that the Prince of Orange has no intention to marry, makes it very improbable that there will be male descendants in direct line after this generation. Prince Henry has no children, and Prince Frederick only one daughter, the Princess Von Weid.

The question about the *Phoenix*—the Danish steamer which was stopped by our authorities near Flushing—will probably involve no diplomatic difficulty. Everyone is convinced that our authorities were quite in the right, acting as they did. The matter has not yet been settled, as at the moment when the Court was about to pass a verdict the ship owners asked for a delay of six weeks.

Some days ago a public dinner was given at the Amstel Hotel to Mr. Burgers, President of the Transvaal Republic, in South Africa, where there are a mass of Dutch residents; he is now in Europe, especially with the object to promote the wellfare of his dominions. Mr. Burgers is much glorified here as the pioneer of a new but independent colony, established by Dutchmen who decline to be ruled by foreigners.

On Friday last a meeting was held here in order to discuss the question about the harbour of Batavia. Those present were for the most part shipowners, and captains of vessels. Messrs. Jaski, von Ketwich, Henny, Abrahamz, and Bienfait opposed the idea of constructing a harbour at Tandjong Priok. They urged that the present Batavia harbour should be improved, by the construction of a breakwater. Several other gentlemen defended the plan of the Government. An address which will be forwarded to the Second Chamber, was underwritten by a great many present. In this document the necessity is demonstrated that a harbour should be formed on "Rynland groatheid," and that a breakwater should protect that harbour against the west monsoon, while, if necessary, the eastern part of the breakwater should be made to provide steamers with a sheltered place for unloading. In any case the Chamber is asked not to agree to the plan of the Government to construct a harbour at Tandjong Priok.

I regret to record the death of Jhr. H. Steengracht van Aosterland. He was the owner of a rich collection of pictures, and his cabinet enjoyed a European reputation. His works of art will shortly be brought under the hammer, and it is to be feared that the greater part of it may pass into the hands of foreigners.

An excellent improvement has been introduced by our Post-office regarding our communications with Java. It has been advertised that letters, destined for our East Indian Colonies, can be posted six days after the departure of a steamer of the Company Nederland. They will reach the steamer at Naples, and will arrive at their destination within thirty-four or thirty-five days, and only cost thirty cents each. This is both cheap and speedy.

Last week I told you something about the Scientific Expedition, which will be organised in order to explore some unknown parts of the island of Sumatra, for which purpose a sum of f.25,000 is required. The subscription list has been signed by Prince Henry for f.500, the Dutch Trading Company for f.1,000, and the East India Trading Bank f.300.

The Dutch Trading Company will sell in the last days of this month in public auction an important collection of Japanese and China goods, the value of which is said to exceed f.300,000.

According to the *Staat Courant* our representant at Caracas has been recalled, and has left Venezuela.

PRODUCE MARKETS.

The Colonial Produce markets remain dull, and, the auctions excepted, there has been only a demand for direct wants. Both speculators and exporters hold back.

TEA.—The auctions of Java went off satisfactorily, and the trade is now inspecting the 2,418/12, 601/16 chests China Congou, and 1,042/12 and 601/16 chests Souchong from Foochow, which will shortly be offered.

INFLUX OF CHINESE INTO QUEENSLAND.

SOME time ago we alluded to the encouragement given by the Queensland Government to certain parties who were introducing Chinese labour into that flourishing Australian colony, and the protection of the emigrants on their arrival. The terms on which they were to be hired by the settlers formed the basis of a contract as favourable to them as to any other immigrants in the country. Under these regulations it was expected that abundance of cheap and useful labour would be secured for sheep and cattle stations, the increasing sugar plantations, and agricultural farms generally. Although the movement inaugurated under such favourable auspices was responded to by the arrival of several ships freighted with Chinamen, yet these did not meet the requirements of the colonists, as many of them refused to hire themselves to masters in the country, preferring to pick up a living in the towns. These first arrivals were landed at Brisbane, the capital, which is situated in the southern section of the colony, while the northern districts were comparatively overlooked by them. Recent advices from the latter state that a new system of emigration from China has set in there, independent of the former movement; and the influx is so great that already the Chinese outnumber the British and other European settlers in the principal district of North Queensland. The region which has attracted them is within the tropical zone, on that part of the East coast of Australia where the great circumnavigator, Captain COOK, put in to refit his ship *Endeavour*, after being nearly wrecked on a reef in the Coral Sea. Here a settlement has been established and named Cooktown. It is within a comparatively short distance of Singapore, Hong Kong, and Canton, to the more southern Australian settlements, and the cost of the passage thither is proportionately less. But the great attraction is the fact that an extensive gold-field had been previously discovered on the Palmer River, within fifty miles of the seaport of Cooktown. This came to the knowledge of certain Chinese merchants in Hong Kong and Canton, who excited the cupidity of their countrymen by circulating the most extravagant accounts of the riches of the Palmer gold-fields. These were believed in, and hundreds soon applied for passages in the steamers chartered by the native promoters of this new emigration to Australia. The mail steamer *Singapore* was the first to arrive with 470 passengers, followed the same evening by the *Adria*, with 600 more, and within ten days afterwards the steamers *Namoa* and *Egeria* landed 1,200 Chinese at Cooktown. At once this quiet township became an indescribable scene of bustle and excitement. Being in a tropical climate the immigrants, accustomed to the same, suffered little or no inconvenience by camping on shore. Each man had his cooking utensils, and there was abundance of rice and other food suited to their tastes brought in the ships. But few rested there; not a day was lost to reach the Palmer gold-field, of which they had heard so much. Soon they were seen in single file tramping merrily along the road. Their loads consisted of the most miscellaneous articles—tinware, chests of tea, bags of rice, tents, clothes, picks, shovels, and all the necessary equipment for mining operations. Sometimes a whole shipload of these immigrants might be seen patiently jogging onwards to the Palmer Eldorado. Those who remained in the township were no less active in the pursuit of wealth by settling down as storekeepers. The promoters of the movement had sent representatives, who soon commenced to erect large warehouses for the storage of merchandise. Others who had come with means to speculate did so, not only in long-handled shovels, but in the purchase of landed property. Among other buildings sold was "The Captain Cook Hotel," for which £800 cash was given. So elated were these Chinese with the success of the movement, and the prospects of increased immigration, that some of them said in *pidgin* English, that by-and-by Cooktown "all same numpah two Canton." By last accounts not less than five thousand are reported in the *Cooktown Courier* to have arrived and gone to the Palmer, and it was anticipated that by this time that number would be doubled. Indeed it would appear that if the "diggers" are at all successful there is no saying how great this Chinese invasion may become. Apprehensions were at first entertained by the authorities in Brisbane that collisions might take place between the Chinese and the Europeans already on the field, and steps were being taken to prevent anything of the kind. The result so far has been that there is room for everybody, and there is no likelihood of order being disturbed. We shall watch with interest the progress of this new Chinese migration to Australia, where there are already upwards of fifty thousand in the more southern colonies.

THE BLOCKADE OF HONG KONG.

IN a late issue we noted the return of Sir ARTHUR KENNEDY to Hong Kong. On arrival he will find several important subjects demanding his attention, among which stand prominently the Praya question, the water-works scheme, and, above all, the troublesome matter of the blockade by the Customs cruisers. The last is of such paramount importance that we trust Sir ARTHUR will not allow forty-eight hours to elapse after his arrival before taking active steps in regard to it. The trouble has been that from the first the Chinese authorities adopted a wrong position in the matter. They assumed that representations on their part made in the proper form and through the proper channels to the British Government would be disregarded; and they weakened their own position and raised needless opposition by endeavouring to carry by high-handed measures what they might probably have easily secured by simply representing the merits of the case in a proper manner. It is perhaps hardly surprising that the Chinese should have fallen into this error, as the result of hostilities is always to breed distrust, and they may be pardoned if they formerly had little confidence in the justice of the victorious outer barbarian. On the other hand, it was equally natural that the measures which the Chinese, acting upon this view, thought fit to adopt, should have been vigorously opposed by the Colony, and that an energetic Governor like Sir RICHARD MACDONNELL should have taken very prompt steps to put down the illegal attempts of the Chinese to establish taxing offices in the Colony, and to exact the taxes from the junks in what, whether they had a right to the taxes or not, was an illegal manner of obtaining them. The matter, however, has now gone on so long that it would be highly satisfactory if it could be settled upon some equitable footing; and we believe if the subject were thoroughly considered on all sides, and in all its bearings, this desirable end might be attained.

The chief difficulty under which we have hitherto laboured in dealing with this subject is, that we have never yet been informed of the nature and amount of the duties, which the Chinese claim to levy; and the first step towards arriving at any practical end would be to demand of the Chinese authorities what is claimed, and we could then decide what steps we could take, either by our own officials in Hong Kong, or in conjunction with the Chinese authorities, to aid them in collecting the revenue, and in preventing our colony being made use of by Chinese junks as a means of evading it. There is no doubt that the position of Hong Kong is such that it affords great facilities to junks to evade the payment of legitimate dues; though, on the other hand, it is not to be denied that the Chinese have, by means of their revenue cruisers and other arrangements, far exceeded their legitimate position, and have brought undue pressure to bear upon the trade of Hong Kong. Our position is that we

Digitized by Google

wish only to put an end to the latter elements in regard to the duties; and to do so it would be only reasonable to aid the Chinese in respect to legitimate duties, provided we can do so without injury to the independence of the Colony and its trade. It is, however, intolerable that these cruisers should march through the harbour without reporting, and this should at once be stopped by our naval forces, on the requisition of the Governor.

Upon these grounds, the soundness of which will scarcely be disputed in the present day, three courses have been suggested as a means of adjusting the difficulty; first, our collecting the duties ourselves on behalf of the Chinese Government, or undertaking to forward them the information necessary to enable them to do so; secondly, our agreeing to the appointment of a Chinese Consul in the Colony, and aiding him in supplying such information or in collecting the duties; and, lastly, by means of a branch of the Foreign Inspectorate of Customs. It is doubtful, however, whether any one of these courses would prove altogether satisfactory; any attempt to collect duties ourselves on behalf of the Chinese Government would be open to two serious objections — first, that such a step would be unadvisable as avowedly doing away with the freedom of the port; and, secondly, that, even if this objection did not exist, it is almost certain that the difficulty of the task would be such that it would be almost hopeless to accomplish it, especially in the face of the opposition which would certainly arise on the part of petty local officials whose vested interests would be interfered with. To the second plan, that of allowing a Chinese Consul to see to the duties, there is a strong objection on account of this being extremely likely to establish an *imperium in imperio* in regard to the native population, and to cause them to be subjected to squeezes, and otherwise harassed in a manner detrimental to the interests of the Colony. The last-named plan would appear at first sight most feasible; but the fact of the Inspectorate of Customs being an Imperial institution would be fatal to its being employed as a medium for collecting the Hoppo's dues. Some other plan must, therefore, be devised which will put an end to existing disputes; but it is clear nothing can be done until some machinery be set in operation which will have the effect of eliciting the exact facts connected with it. As an initiative, it is probable that considerable good may be done by the establishment in Hong Kong of a Mixed Court, to decide on cases of smuggling. This, at least, would have the effect of securing that the charges would be equitably inquired into, and might be the means of eliciting such information as should form the basis for more complete action; or it might be the means of "improving off" all the transgressors in the way of smuggling.

MAJOR GRAY, who has been appointed by the Colonial-office to the post of Superintendent of the Convict Prison at Singapore, will leave by the next P. and O. mail *viâ* Brindisi. We understand that the directors of the Mill bank and Chatham Convict Establishments have given most satisfactory testimonials as to his fitness in all respects for the post. This, combined with his long experience of Asiatics and other native races, his tact and temper, will, we think, enable him to discharge the duties to the satisfaction of the Colonists of Singapore. Major GRAY served in the West Indies in 1845, subsequently in the Ceylon Rifles, and from 1850 to 1854 was stationed at Hong Kong. In the second China War in 1860 he commanded the Transport Corps, which included a number of Chinese. In 1863 he was engaged in the Maori War in New Zealand, and has evidently been selected as possessing the best qualifications for the office. We cannot refrain from noticing the smallness of the salary; £600 a year is quite inadequate to such a post; and while we have on many occasions pointed to salaries which require to be cut down, we are of opinion that this one should be raised to £1,000.

THE appointment of Mr. HERBERT TAYLOR USSHER, C.M.G., lately Governor of Tobago, as Governor of Labuan and Consul-General of Borneo, which we announced in August, has been notified in the *London Gazette*. Mr. USSHER will proceed by an early mail to take up his post, and we trust that the Foreign-office will give him special instructions as to the action of the Spanish men-of-war in regard to the Sooloo captures which we have lately reported. The seizures have been altogether irregular, and the so-called blockade of Sooloo ports and harbours is entirely at variance with the law of nations, and our Government have too long delayed action in the matter. In connection with Labuan we may notice that Mr. CALLAGHAN, a former Governor, has been appointed Governor of the Falkland Islands.

THE first misfortune has fallen on our newly-acquired Malay States. By a telegram, which we give in another column, it will be seen that Mr. BIRCH, the Resident at Perak, and late Colonial Secretary at Singapore, has been murdered. No details are given, but we trust that it has not occurred from any want of foresight on the part of Governor JERVOIS in giving him proper protection at such a place. Our warning in this respect will now have painful significance.

FRANCE IN THE FAR EAST.

BY F. GARNIER.

The above paper, of which we gave a *résumé* in our last issue, is of so much interest that we subjoin translations of the first and last chapters:—

The extreme East, with its immense aggregations of men, its advanced industry and varied products, of which some, such as tea and silk, have now become necessaries in Europe, with its stocks of oil and metals, which will probably ere long supply the place of the exhausted sources in the West, is daily attracting more attention on the part of the Statesmen. When the barriers which still exist between the two worlds shall have disappeared it will be from this quarter that a social and economic revolution will come upon us. In the present paper we purpose to inquire by what means the Chinese nation may be induced to enter into the comity of European nations, and what future is reserved for France in these rich countries.

Of the two great nations of the extreme East—Japan and China—the first has resolutely thrown itself in the way of progress. She is endeavouring to appropriate to herself European science, and its magnificent material results. Telegraphs, Railways, Mints, Observatories, and even our very customs—she adopts all with enthusiasm. It may be even feared that she may undertake with more precipitation than wisdom a reformation which grates against many prejudices, and which violates all the national habits. It is not to be forgotten, in short, that Japan has remained during two centuries more hermetically sealed to Europe than China herself.

The latter, still bleeding from the wounds inflicted on her national pride, rejects the benefits of civilisation, and accepts from them only the means of producing engines of war. She asks Europeans to teach her to cast cannon, to manufacture guns, to construct vessels of war. She endeavours to make use of their own arms to fight them; she accepts in advance a new struggle rather than consent to the radical transformation with which she is menaced by contact with Western nations.

In order to estimate this resistance it is necessary to remember the immense superiority which China has enjoyed from time immemorial over neighbouring nations. Surrounded by barbarous peoples the Chinese succeeded in imposing on them their customs, their laws, and their written language. Often conquered by invasions from the North, they have always absorbed their conquerors, who have hastened to accept the civilisation of the conquered, and to deny their own nationality. During centuries, in fact, China has been in reality in the right in claiming for itself the title of the Middle Kingdom, and in thinking itself the first nation in the world. At the commencement its relations with Europeans, far from lowering its pride, could only further exalt it. The navigators who, in the sixteenth century reached the coast of China, speak only in terms of admiration of this immense Empire, and only approach its sovereign kneeling. Fear of compromising commercial interests, the *prestige* of this mysterious East, of which the real power was exaggerated, caused them to adopt for a long time towards it a dependent and undignified attitude. The Opium war at last broke the charm, and revealed the feebleness of the colossus, but it was not calculated to raise Europe in the opinion of a polished and learned nation. The thunder-clap of 1860, and the pillage of the Summer Palace, brought the rancour and resentment of the Chinese Government to the full.

If China is ignorant of the greatness and extent of European civilisation; if she is wrong in not perceiving that the barbarians of the sixteenth century are her masters to-day; if there is something evidently puerile in her obstinacy in looking back and anchoring herself immovably in the past, while progress like an irresistible wave is bearing all nations towards the marvellous hopes of the future, it must be admitted that her ignorance of the West has its counterpart in Europe. The imaginary colloquy by Voltaire, between some European philosophers and a

Digitized by Google

Chinese scholar, will be remembered. The latter was astonished not to find in the "Discourse on Universal History" even the name of his country. This empire, the largest in the world, of prodigious antiquity, of refined civilisation, was not deemed worthy of any mention in it. Have we become, therefore, much more instructed since that time, and have not the Chinese preserved the right to treat lightly our pretensions to universal knowledge?

Have not foreign merchants, who have never seen in China anything but a place to be turned to the best account by creating by force the strangest wants, given her reason to doubt the justice of a civilisation of which we are so proud? On both sides how many ridiculous prejudices, how many hateful recollections, how many resentments profoundly separate these two nations, who have so much interest in understanding one another?

There was a time, even the time of Voltaire, when it was possible to hope to see this desirable revolution peacefully accomplished—this establishment of intimate relations between two civilisations and two nations which embrace in the present day all the active principles of the worlds. At that time Chinese science was being renewed little by little, thanks to the work and the efforts of the Jesuits, who played so important a part at the Court of Kang-hi, the Louis XIV. of the East. Then the historical riches of the Chinese annals commenced to be unveiled to Europe, and people learnt to appreciate that democratic and equalising constitution which might have given the Chinese a model Government; then, in short, it was found, not without surprise, that nearly all the discoveries of the West had been made and often applied by Chinese industry, and that we had much to find among the treasures of an experience of over fifty centuries.

It is known, after what deplorable quarrels, a rival congregation, that of the Dominicans, contrived to destroy the influence of the Jesuits, and stopped China in the liberal career which she was commencing—the Peking Government persecuted Christianity, and hastened to return to its systematic isolation. With a people whose aptitudes are varied, and whose intelligence is open and accessible, this isolation still remaining so complete, this turning back of a civilisation which had shown itself marvellously precocious and powerful, will remain an inexplicable phenomenon if we did not here indicate a cause upon which our attention has not sufficiently rested up to the present day, namely, its hieroglyphic writing.

After reviewing the present state of China and the position and interests of France in that country, the writer concludes as follows:—

Can it be said that we are unable to derive any benefit from our situation? Shall we resign ourselves to aid the immense commercial movement, of which China is the theatre, without attempting to take a place there more consonant with our productive capabilities? We have founded at the ports themselves of this immense Empire, in the midst of populations belonging to the same race, and of which the legislation, the written language, and official customs are those of China, a colony whose future destiny is not doubtful, if we only learn to bring a little steadfastness and perseverance to bear in our efforts. To create direct and fruitful relations between Cochin China and the Celestial Empire we need only desire to do so. Tongking, the cradle of that Annamite nation called to become French, is watered by a great river flowing into Yunnan, the most Southern province of China. Two steamers commanded by an adventurous Frenchman, Mr. Dupuis, have recently ascended this river, which seems, according to the results of this fortunate experiment, to offer a commercial route as rapid as cheap, between Saigon and Southern China. It is therefore indispensable for the security of our Indo-Chinese possessions that we should impose upon the whole Empire of Annam, a protectorate which will bind up its interests with those of France, and thus put out of consideration all chances of ulterior political complications. The French Commission which explored Indo-China and China five years back has collected the most favourable information on the value of the metallic products of the province of Yunnan. Left to the results of imperfect working and separated from any commercial outlet, these riches lie buried in a country which they might render marvellously prosperous. The opening of a route faciliating the transport of goods in quantities hitherto unhoped for, and thus abridging the immense distance which separates Southern China from Europe, would produce commercial and industrial results of such importance that the solution of the problem has long occupied the attention of England. It is time that we in our turn should pay some attention to the interests and rights which are created by our situation in the Indo-Chinese Peninsular, to the part which it calls upon us to play in these regions, formerly distant, but which the rapidity of intercommunication has placed at our doors. It is, above all, necessary to watch over the integrity of the Chinese Empire, and to prevent any conquest or rebellion separating the southern provinces of the Empire from Peking, and shutting us out from access to them. We shall recur later to the study of this question, which demands of itself lengthened consideration. At present we shall confine ourselves to pointing out its gravity. The economic problems which it raises are of the highest importance in our country. Some unexpected compensation for our recent misfortunes may be found in these rich countries. Following all the great crises of our history, a movement has been produced towards the exterior productive of useful and glorious results. Let us learn to give it birth; let us learn to direct it; let us return to those colonising traditions which we have abandoned to a rival nation of which they have made the power and the riches. Indo-China may become for us the equivalent of that Empire of India, which a Dupleix would have given to France, and which the weakness of Louis XVI. caused us to lose for ever.

THE LATE REV. B. P. KEASBERRY.

A quiet unobtrusive life spent almost wholly in doing good is not so common a thing, even in missionary records, that we can allow one such to pass away without the tribute of respect and regret. Mr. Keasberry, whose death occurred last month at Singapore, went out originally as one of the agents of the London Missionary Society; and when, soon afterwards, their mission was transferred from the Straits to China, he elected to remain alone at a post for which he had already qualified himself by the acquisition of the Malayan language, and of which he was for many years past the most accomplished master. Supporting himself in old apostolic fashion by the work of his own hands he succeeded in establishing a large school, at which he educated many sons of Malay Rajahs and nobles, and in keeping up a Christian mission not only in Singapore, but in the neighbouring islands. Backed by no great organisation in this country, he went about doing good in so unostentatious a way as to be unknown outside the circle who were watching his work. We cannot disguise from ourselves that in attempting the conversion of Mahometans, Mr. Keasberry was the leader of a forlorn hope; but his influence with them was all for good, while his labours among the Chinese were, it may be fairly hoped, a success. His special mission was to children, and it will be for others to reap the harvest of his sowing. But whatever be the visible results of his teaching, his life had in it more of the heroic than is often met with in these days, and may well serve as subject for thought and imitation. So long as Christendom agrees in accepting as its ideal a life of simplicity and self-sacrifice, so long will a career such as Mr. Keasberry's was prove that a very near approach to that ideal is not unattainable. It seems almost superfluous to say that Mr. Keasberry's means were insufficient to allow of his making provision for his family. It is with great satisfaction that we see a subscription is being raised to enable his wife and daughters to secure the means of support. The list in our advertising columns shows that the appeal is being generously answered; and we shall be surprised if the names of any connected with the Straits are wanting in this testimony to a noble life, and in recognition of its work.

CONSULAR REPORTS ON THE TRADE OF CHINA.

THE Consular Reports on the trade of the year 1874 at Chefoo, Newchwang, Chinkiang, Shanghai, Takow, and Taiwan have been issued from the Foreign-office. We subjoin a summary of the Reports:—

CHEFOO.

Mr. Lay reports that the trade presents no new feature of striking importance. The returns show a total of £2,597,058, as compared with a total of £2,411,034 for 1873, being an increase of nearly 8 per cent. As compared with last year the most notable change in the shipping returns is the increase in Chinese-owned merchant steamers, the numbers being 46, as against 15 in 1873, and *nil* in 1872. These steamers belong, as was remarked in last year's report, to a native merchants' company (said to be largely subsidised from official sources), formed for the purpose of conveying tribute rice from the provinces to Tientsin, and for competing with foreign lines of steamers for the general carrying trade on the coast. It was anticipated that a great reduction in the rates of freight would follow this competition, but, so far, this had not taken place.

The attempts that have from time to time been made to lay down British manufactured goods direct have not, as a rule, been successful. The saving thereby effected on freight had been more than counteracted by the disturbance in the local market, caused by the sudden arrival of supplies far exceeding the demand; and the native dealers are shrewd enough to refrain from outbidding one another, till in the end the importer may be forced to sell on their terms. Of the total amount of direct British trade more than half was made up of re-exports of foreign manufactures from Hong Kong. Shipments to the extent of only £37,584 were made direct from Great Britain, and the balance consists of coals from Australia and miscellaneous items from the Straits Settlements.

There had been a considerable increase in the importation of

Digitized by Google

opium, the quantity for the year being greater than that for any previous year for a long period. It does not necessarily follow, of course, that the actual consumption of the drug has increased in the same proportion; but from a comparison of the last five years it seems that, as a matter of fact, a gradual increase has been going on. Malwa almost entirely commanded the market here, there being only a very insignificant demand for other kinds. The consumption of cotton manufactures continued on the same scale as during the year 1873, both years having largely fallen short of the figures for previous years. The falling off is particularly noticeable in T-cloths. The decrease is not peculiar to this port, and is, moreover, readily accounted for by the notorious overtrading and glutting of all the native markets during the latter of the above-mentioned periods, a state of things that was still further aggravated by plentiful cotton harvests all over the Empire.

NEWCHWANG.

Mr. Adkins' Report says that trade at this port for the year 1874 may be considered as having been as unsatisfactory in a commercial point of view as elsewhere in China, but there are many reasons for hoping that the year 1875 will have a different tale to tell. The report states that—

There is one great obstacle standing in the way of permanent prosperity in the provinces of Manchuria. I allude to brigandage, which is caused by bad Government, and of which the remedy is almost worse than the disease. The trader who wishes to convey inland goods purchased at this port-town has, in fact, to pay for a free pass by employing a convoy, between whom and the mounted banditti there is a mutual understanding. The convoyed property is not molested by the robbers, and the robbers are not denounced when they fall upon unconvoyed property. There are armed men enough in Government pay in this port town alone to drive every robber far away from the borders of this district; but the foreign-drilled battalion, which arrived here in 1866, has sunk into such a lamentable state of inefficiency that for offensive operations, at any rate, it is quite useless. There are also in this province at least two localities where the Government exercises no control whatever, and which, consequently, are dangerous foci of disorder. We have no very definite or reliable information about either locality, but the one may be described as the gold region south-east of Kérin, and some 500 miles north-east of this port, the other as the colony of outlaws in the Yalu valley. With regard to the first fabulous stories are told of the richness of the gold washings. The region appears to be difficult of access, and to be strictly guarded by its inhabitants, who live there under a species of rude feudality. The place has sprung into existence within the last three or four years. It may be noted here that the colonisation of these provinces, and of Eastern Mongolia, is proceeding with great rapidity. The palisades no longer mark the limits of settled country, the forests are fast disappearing, and large tracts of country are being added to the productive area of this part of the Empire. The Government sanctions the colonisation of Mongolia by the Mongolian Princes, but the settlers in the Yalu valley are there in defiance of the law. They are gold miners, ginseng diggers, and lumberers. The valley of the Yalu is on the Korean frontier, and from its port, Ta-ku Shan, a considerable trade in timber is carried on with Tientsin; but the place has been a thorn in the side of the Manchu authorities for many years past.

As compared with the year 1873, imports show a decrease of Tls. 700,000. The most remarkable falling off is in the import of opium. There can be no doubt that this is mainly due to the increased production of the native drug. The value of a picul of native opium is about Tls. 300. The quality is said to be improving. The drug is eaten as well as smoked. The cultivation of the poppy is sure to spread, for the crop is most profitable in ordinary seasons.

The trade in piece goods at this port has suffered greatly from nefarious practices of the packers and exporters in England. It frequently happens here that the foreign merchant has to make a large abatement from the invoice prices of goods he has sold to Chinese constituents. In consequence of adulteration and short lengths, the amount of T-cloths sold during the year is about half the consumption of 1873. The more durable cotton goods are somewhat more in favour. Some 200,000 Tls. worth of white and grey shirtings were disposed of to the Corean traders during the year. The rumours of an intention to relax the restrictions on the trade between Chinese and Coreans at the frontier fairs turned out to have no foundation in fact.

Mr. Adkins concludes with the following remarks :—

The question of the working the minerals of the province is one which must ultimately become of pressing importance. In no part of China accessible to foreigners are iron and coal found in such close proximity to each other. If a railway would pay anywhere it would pay here, between Monkden and this port. It would pass through a closely cultivated and populous plain, touching three large cities on the way. A branch twenty miles long would tap the iron and coal district. The coal and iron mines rudely worked, and accessible only by the hill roads and rude native carts, now send their produce 100 miles to this town in the south, and to cities at similar distances in the north. Worked by the aid of steam machinery, and accessible by railway, the carriage of these materials would of itself soon become an appreciable item in the success of the latter undertaking,

CHINKIANG.

Mr. Baber's Report states that the total value of the trade, import and export, of Chinkiang during the year amounted to £3,844,343, showing a slight advance on that of the previous year. In spite, however, of this apparent improvement, which is to be attributed solely to the increased importation of opium the condition of trade had been far from satisfactory, and does not show that buoyancy which the central situation of the port and the energy of the foreign merchants might be expected to command. At the same time, not to take too gloomy a view of the situation, it should be remembered that the China trade generally has undergone a period of unusual depression, which is unlikely to be more than temporary. The total value of imports amounts to £3,527,066, as against £3,566,765 during the previous year. With the exception of opium, the sale of which has steadily advanced since the opening of the port, all the principal articles of import exhibit a decline.

The exports for 1874 show a considerable improvement. The total value was $317,277, as against £257,532 during the previous year. This is somewhat reassuring when it is remembered that the trade had to bear up against the refusal of the native authorities to issue transit passes even for *bonâ fide* foreign-owned goods. The rapid improvement in raw silk is remarkable, but unless transit passes can be obtained, as provided by treaty, it is feared that this item of export will gradually disappear.

Mr. Baber sums up his Report with the subjoined observations :—

The real obstacle to any decided and lasting improvement in the material condition of the people is one to which it is a weary task to have to draw repeated attention, viz., the injury inflicted upon producers by barrier and lekin dues, and other official exactions which impoverish the people, deaden foreign trade, and what is more to the purpose of the Mandarin, could he be brought to realise it, go far to account for diminished revennes.

Although not strictly within the province of a Trade Report, it may be well to ask attention to the position which Chinkiang has lately assumed as a centre of military movement and organisation. This became more particularly prominent at the time when war with Japan upon the Formosa difficulty appeared imminent. Numerous bodies of the Chinese militia, known as "braves," were assembled at this port, in expectation of the outbreak of hostilities; but it would seem that they were intended more especially for purposes of defence, and to garrison the numerous forts that were constructed at the time in our immediate neighbourhood. Several mud forts, large and small, of the usual Chinese pattern, command the approach to Chinkiang from Shanghai; but the most important works are situated on Silver Island and the two shores, being three iron-plated batteries of ten or more guns, smooth-bore, 68-pounders, which are laid to direct a converging fire on the reach immediately below Chinkiang. The plates, placed without intermediate backing on walls of concrete, are not more than one inch in thickness, except over the embrasures, where they measure about five inches. The magazines are situated in chambers between the guns, and the whole is covered with what is intended to be a bomb-proof roof. They are all in a very backward condition, and do not promise to be formidable; but were they completed, and well-manned and fenced, as seems probable, with a fringe of torpedoes, the trading communities at the three river ports would, in the event of sudden hostilities, be cut off for a time from all communication with Shanghai, and would find themselves for the moment in a position of imminent peril.

SHANGHAI.

Consul Medhurst's Report on the Trade of this Port commences as follows :—

After the deplorable falling off which my last annual report had to record in the total value of foreign imports of 1873, as compared with those of the preceding years, it is somewhat encouraging to observe from the past year's returns that this tendency to declension has not only found its limit, but has given place to symptoms of a reaction in the contrary direction, as will be seen from the following figures, showing the comparative values of foreign imports for the past three years :—

	Taels.
1872	57,062,288
1873	52,283,955
1874	52,902,102

This slightly favourable result, however, is merely traceable as far as the aggregate imports are concerned. If the importing countries are taken in detail, it will be found that the values of direct imports from Great Britain continue to exhibit the downward tendency, remarkable considering the increased import of manufactures, deducible from the returns of 1873, although those from her Dependencies remain still on the increase. An advance is noticeable, likewise, in imports from the United States and coastwise, whilst those from France and Japan have declined considerably. Hong Kong continues to maintain the prominent position as an importing depot, fully one-tenth of the imports of the British territory, and nearly that proportion of the aggregate imports, being traceable to this source.

The port appears to have made no material progress as an exporting depot for foreign goods, the total value of this class of merchandise re-exported coastwise being Tls. 40,773,269, and that of goods carried Japanwards being Tls. 2,358,028, against a value of Tls. 41,272,973 and Tls. 1,991,462, conveyed in those several directions during the previous year. The ports coastwise, moreover, appear strictly to have maintained the relative positions as consumers of re-exported foreign imports, which they held during 1873, although of the northern ports, Chefoo, Kiukiang, Chinkiang, and Ningpo, and of the southern, Foochow, took an increased share, while the rest all fell off. The gross value of re-exports of foreign imported goods may thus be put down at Tls. 43,764,978, which falls short of the estimated value of the same re-exports for 1873 by some Tls. 126,000; owing, however, to the increase in the aggregate value of foreign imports for the year 1874, as already noticed, the net imports of foreign goods for the year show a slight advance upon those of 1873. In the imports of native goods

Digitized by Google

on the other hand, a falling off of Tls. 4,000,000 in estimated value has to be recorded. This is to be accounted for by the material decrease in the imports from Hankow, Kiukiang, and Canton, which has been only partially counterbalanced by the increase in the receipts from Chinkiang, Ningpo, and Newchwang.

In the course of the general remarks appended to the Report, Consul Medhurst says :—

Notwithstanding numerous complaints, the trade in piece goods for 1874 has been fairly prosperous. The quantity imported shows a considerable increase over last year, and the deliveries have generally kept pace with, and in some cases outrun, the imports. The consequence is, that the stocks at the close of the year compare favourably with those of previous years. In the two articles, for example, of T-cloths and White Shirtings, the stocks in hand are estimated at about 587,000 and 51,000 pieces, against 1,782,000 and 204,000 pieces respectively at the close of 1872. While, however, the trade as regards the British manufacturer is so far satisfactory, its results had not been remunerative to the importer. For this several reasons have been assigned, but the main reason is simply that the shipments for the last three years, as a whole, have been largely in excess of the demand. While the consumption has been going on at a steady and slightly advancing rate, a large increase in the deliveries in 1872 produced at once a glut in the native market, and a flood of shipments from England. The natural consequence was an accumulation of stocks, which in some staples it has taken from that time to this to work off, and generally at prices which barely paid actual expenses. Of T-cloths there were imported during the two years of 1871-72 no less than 8,288,361 pieces, against an annual average consumption (for the last six years), of about 2,500,000 pieces. So long as the natural law of supply and demand is thus grossly violated, nothing but loss to the trader can be looked for. The remedy is in his own hands, and in his alone. The evil is not peculiar to time or country, though here, indeed, it is aggravated both by the powerful combination which exists among Chinese merchants, enabling them to "bear" or "bull" prices as they wish, and by the jealousy and disunion among foreigners, which render them powerless to oppose such practices.

Another cause of complaint, which, however, affects not importers in particular, bnt the whole trade, is the long-standing one of official obstructiveness to the free transit of goods in the interior. Scarcely a year has passed since the conclusion of the Treaty of Tientsin without its burthen of grievances under this head ; and in too many cases, it must be admitted, they are well founded. The transit pass system, by which all inland barrier dues of whatever kind were commuted for a single cash payment, made to the foreign managed Custom-house at the port of entry, has never worked smoothly. In places round the Treaty ports, where the battle has been fought over and over again, the barrier officials have been forced into a sort of sullen acquiesence ; but in all new districts where the pass is tried for the first time, the same old complaints of delays, squeezes, and confiscations recur time after time, until the unhappy trader who has made the venture is ruined, and others are effectually deterred from making similar attempts.

Another cause which is said to have had a considerable influence in checking the demand for Manchester goods is the abundant cotton harvests for the past two years in this and other provinces. There can be no doubt that any serious fluctuation in the yield of cotton would materially affect foreign imports. Roughly speaking, the working classes all over China are still clothed entirely with native fabrics manufactured from native-grown cotton. The extent to which English manufactures are used as part of ordinary wearing material is almost inappreciable ; the reason simply being that the native article is cheaper. The difference in price, however, is not very great, and any cause that would raise or lower the price of cotton would immediately influence the demand for the foreign manufactured article. A serious enhancement in the price of raw cotton might multiply the consumption of our products to an incalculable extent. There is, however, no immediate prospect of this. Of late years, owing to the increased facilities for coast and river traffic, the price has gone up, but this province has responded by an increased supply which, as far as one can see, is capable of indefinite expansion.

The great obstacle to China's becoming a consumer of English fabrics to an extent that the enormous size of the country and its swarming population would lead one to anticipate, is, therefore, not the le-kin impositions and other official obstructions, for these equally retard the free circulation of native products, but the fact that she herself can produce an article of more durable quality, and better suited to the wants of the people, at an equal or lower cost. There are many purposes, of course, for which the English fabric is more suitable, and there is a large and increasing class who can afford to pay for, and who'prefer a finer quality than the native looms can produce; and, as far as these wants are concerned, the trade is unquestionably on a sound basis, and is bound to increase. Every additional facility for internal transport will, by enabling goods of this class to reach districts hitherto inaccessible, give an additional impetus to the demand. But so long as the native looms continue to produce cloth at the same cost as at present, our manufactures cannot seriously enter into competition with it for the supply of the wants of the million. In view of these considerations, it is matter for serious regret that the quality of home products should have, through the excessive use of size, deteriorated of late. It is said that during the past year shipments of the inferior quality have paid the importer better than the higher-priced and more genuine article, as the proportion between the selling prices here was less than that of the cost prices at home. This is readily accounted for by supposing that the consumer has not yet learned to discriminate between the two, but this is a knowledge that he will certainly gain sooner or later, and it is much to be feared that it will react, not alone on the particular class, but on all kinds of English manufactures. This is a warning that has been repeated in many quarters, and I need not do more here than simply allude to it.

With reference to Exports, the Report shows a continued tendency in a retrogressive direction, the total values for the year 1874 being Tls. 57,488,023 against Tls. 64,814,710 for 1873, showing a difference of nearly Tls. 7,500,000. It is in exports and reexports to Great Britain and the United States that the falling off entirely occurs, those coastwise having on the whole experienced a considerable increase. The report says :—

The actual quantity of silk exported exceeds the export of 1873 by over 12,000 bales, and yet the total value is less by Tls. 4,772,000. Had the price continued steady during the two years, instead of any decrease, there would have appeared an increase in this staple of nearly Tls. 6,000,000. Taking the value published in the Customs Returns as correct, the average price of a bale of silk in 1873 was Tls. 468, while in 1874 it was only Tls. 314. The next important article of export is tea, and this also shows a decrease of Tls. 3,727,000. The actual quantity exported was less by 79,162 piculs, or, say, 11,188,546 lbs. than in 1873, and there appears to be a fall of price as well. The average value, taking the Customs Returns as before, in 1873, was Tls. 25·30 per picul, while it barely reached Tls. 23 in 1874. Both these phenomena, however, are probably partly accounted for by the fact that an increasing number of steamers load at Hankow for London direct, in the early part of the season, when the highest-priced teas are on the market, whose cargoes consequently do not figure in the Shanghai Trade Returns. It does not appear, as a matter of fact, that the total export of black teas from all the northern ports is less in amount or value than in previous years. There is, however, a marked decrease in green teas, both in regard to amount and value, as compared with last year, chiefly on the shipments to the United States.

The two articles of tea and silk figure in the returns as together showing a falling off of Tls. 8,500,000. About 1,000,000 of this is counterbalanced by a gain on cotton, leaving all other articles at similar figures to those of 1873.

Of British vessels entered and cleared in 1874 there was a total of 1,462, of 1,071,647 tons, against 1,511, with a tonnage of 934,900 tons in 1873. The tonnage of British sailing ships entered during 1874 was only 75,131, against an aggregate of 464,368 tons of steamers, or about 14 per cent. of the gross amount. The proportion of steamers to sailing vessels under the French and American flags was even greater. Nearly all the traffic between France and China is carried on in steamers of the Messageries Maritimes ; and the bulk of the tonnage under the American flag is made up by the weekly steamers from Shanghai to Japan, and by the steamers of the Shanghai Steam Navigation Company, which run three times a week on the Yangtsze, and twice a week to the northern ports.

Mr. Medhurst concludes the exhaustive Report with the subjoineed observations :—

My relations with the Chinese authorities continue to be characterised by friendliness and courtesy on their part. They, however, fail to exert themselves as they might, in procuring me redress in cases where Chinese subjects are defendants. They invariably take up such suits *ab initio* with a strong bias against the foreigner ; and in the course of the proceedings so shift and twist the plainest evidence in order to suit the subjects of their advocacy that their action becomes tantamount to a practical shielding of their people from justice. The Mixed Court, notwithstanding the commendable efforts of the presiding magistrate, Chên, an exceptionally well-intentioned official, to do his duty by foreigners as well as by his own countrymen, continues to attract public attention by its entire inadequacy for the purpose for which it was originally instituted. The three chief desiderata, to my mind, are—first, a jurisdiction and authority, both civil and criminal, more adequate to the necessities of the Settlements than that which is now confided to the presiding magistrate ; secondly, a more independent and honest fulfilment of the official obligations involved ; and, thirdly, a more complete process of ridding the Settlement conclusively of bad characters after conviction and punishment.

The foreign Settlement showed during the past year, on the whole signs of increasing wealth and prosperity ; but at the same time there was observable a marked tendency towards the reduction of the larger mercantile establishments, and the utilisation of land, situated in the most central parts of the Settlement, for purposes of Chinese occupation. The latter feature is attributable to the difficulty found in obtaining remunerative rentals for houses constructed on the large and expensive scale which befits foreign tenure ; whilst buildings suitable for Chinese can be run up at a comparatively small cost, and, if well situated, are certain to find tenants rapidly, and at paying rates. Property of this class is valued at six to seven years' purchase, and returns easily 12 to 15 per cent. on outlay.

Takow and Taiwanfoo.

Mr. Gregory's returns show a flourishing trade, notwithstanding the political alarms of the year. There is a full recovery from the depression of 1873 ; in fact, the trade of 1874, taking the value in dollars as estimated at the Custom-house, exceeds that of any former year, though the value stated in sterling is a little below that of 1871, the rate of exchange being lower. The following is a comparative table for five years, with values in sterling, at the rates of exchange taken in the Consular Returns for the several years :—

Year.	Exchange of the Dollar.	Net Imports.	Exports.	Total.
1870	4s. 6d.	£306,244	£431,076	£737,320
1871	4s. 4½d.	£364,421	£396,888	£761,309
1872	4s. 4½d.	£322,330	£399,315	£721,645
1873	4s. 3⅞d.	£297,280	£305,657	£602,937
1874	4s. 3d.	£356,757	£391,003	£747,760
		£1,647,032	1,923,939	3,570,971

The import of opium shows a great increase (of about 28 per cent.) upon the three preceding years. In cotton piece goods a large increase appears, though the amount falls far short of the exceptional import of 1871. The import of treasure also shows a striking increase.

Digitized by Google

Monetary and Commercial.

The P. and O. Company have made application to the Government for powers under the Company's charter to issue Five per Cent. Debentures to the amount of £800,000. This, it is necessary to state, will not involve any increase in the Company's capital, inasmuch as the debenture stock proposed to be issued is "on and subject to the express condition that the amount raised thereby shall be appropriated solely and specially to the conversion or redemption of debentures of the said Company of the like aggregate amount."

Tenders for £700,000 in bills on India were received on the 3rd inst. at the Bank of England. The amounts allotted were:—To Calcutta, £612,600; to Bombay, £86,700; and to Madras, £700. Tenders on all the Presidencies at 1s. 9¾d. will receive about 15 per cent., above in full. These figures show rather less demand for remittances to the East.

The annual meeting of the shareholders in the Bank of Alexandria was held on the 3rd inst., when Mr. T. S. Richardson, who presided, warned the public against confounding Egypt with Turkey in the matter of finance. The money borrowed by Egypt had been laid out in works of various kinds, which would at no distant period be remunerative. That money had been expended upon railways, the docks at Alexandria, the port of Alexandria, telegraphs, and the irrigation by canals which had brought under cultivation thousands of acres of land. Those works would shortly bring in a largely increased revenue.

A meeting has been held of the creditors of F. H. Ewen and Co., Manchester, merchants. The statement showed liabilities £12,723 15s. 3d., and assets £2,523 10s. 2d. The creditors agreed to accept a composition of 4s. in the pound, payable in three instalments at two, four, and six months, the last instalment secured.

At a preliminary meeting of the creditors of Mr. G. D. Neroutsos, merchant, of London and Manchester, a committee was appointed. The liabilities amount to £22,603, and assets to £12,869.

The total quantity of tea delivered from the bonded warehouses in London during the week ending the 30th ult. was 3,795,038 lb., of which 2,145,459 lb. was for home consumption, 860,035 lb. was removed coastwise, 678,020 lb. was exported, 102,780 lb. was removed coastwise for exportation, and 6,744 lb was for ships' stores.

The Nederland Steamship Company's steamer *Prins Hendrick*, Captain Braat, sailed from Southampton on the 2nd inst. for Padang, Batavia, &c., with the Netherlands mails, fifty-four cabin passengers, 250 troops, a full general cargo, and £2,000 in specie. This vessel is the first under the new contract with the Nederlands Government by which the steamers of the line carrying the mails will sail from Holland (*via* Southampton to Batavia) every four weeks.

In regard to the paragraph which appeared in our last issue as to the *Thermopylæ*, we have to point out that she left Foochow on the 9th July, and arrived off the Start on the 28th Oct., making a passage of 111 days, thus maintaining her reputation as one of the fastest clippers in the trade.

The return of the Indo-European Telegraph Company reports that the average time in transit *via* Teheran of all outward messages to India, including those for Penang, Singapore, China, Japan, Java, and Australia, during the week ending October 29 was fifty seven minutes.

The Eastern Telegraph Company's traffic receipts for the month of October, 1875, amounted to £35,757, and for the corresponding period of 1874 to £32,853. The traffic receipts of the Eastern Extension Australasia and China Telegraph Company (Limited) for the month of October, 1875, amounted to £19,604, and for the corresponding period of 1874 to £16,584.

The traffic receipts of the Great Northern Telegraph Company for the month of October were this year f.387,084; last year, f.420,885. The total receipts from 1st January to 31st October were this year f. 3,574,032; last year, f. 3,748,925.

Bar Silver has slightly declined in value, only 56 15-16d. per oz. having been obtained. Mexican Dollars, about £90,000 in value, have been sold at 55 7-16d. per oz., showing a reduction in price of ⅛d. per oz. They were taken chiefly for refining purposes.

The amount of bullion per P. and O. steamer *Assam*, from Southampton on the 4th inst., was:—In gold, to Galle, £600; in silver, to Hong Kong, £23,151.

ARTICLES OF IMPORT.

TEA.

Messrs. Arthur Capel and Co.'s Circular says:—Our market has been very quiet during the past week, and prices at public auction have in some instances gone rather easier, the demand both for home trade and export being dull. The cargoes of the vessels arrived, as noted below, have not as yet been generally placed on the market, and buyers are waiting to see samples. The public sales have comprised 16,618 packages, of which the whole have been sold without reserve. The stock in the United Kingdom on the 30th ult. was estimated at 86,922,000 lbs. against 77,981,000 lbs. last year, and the quantity afloat (advices by letter) 18,065,000 lbs. against 26,055,000 lbs. of China tea, and 2,253,000 lbs. against 2,067,000 lbs. of India tea.

Congous.—Red-leaf kinds: Siftings remain firm from 8½d. to 9½d. per lb. Old season's common have sold at previous prices. In new, sales have been made at ¼d. to ½d. per lb. decline. Fair to good Saryune kinds show no change. Good to fine Kaisow kinds remain firm, but in finest we hear of no sales. Good Pak Lin kinds remain saleable, but for fine there is but little inquiry. Black-leaf kinds: Old season's common to fair have sold from 10½d. to 11½d. per lb., showing no change. In new, common have sold from 9¾d. to 10½d. per lb., showing ½d. per lb. decline. Fair to good medium remain without alteration. In good to fine the few sales made have been at previous rates, finest being only in limited request. New make kinds have been firm at last week's prices, the better kinds being still in request. Oolongs have been sold, both privately and at public sale, without further change in prices. In Souchongs, good quality, about 1s. 6d. to 1s. 7d. has been wanted, other kinds being without change. *Scented Teas:* Canton Capers remain firm for all fair to good and fine descriptions; common, at public sales, have sold rather lower. Orange Pekoes have been steady without change in prices. Foochow Capers have been difficult of sale. Orange Pekoes: Good quality have sold at public sale from 1s. 3½d. to 1s. 3¾d. per lb.; finest are saleable up to 1s. 10d. per lb., but it is difficult to get over that figure for anything but choicest. *Green Teas:* There is no change to notice, the quantity offered has been moderate; the prices for the finer lines of Gunpowder remain firm, but common to good grades of Gunpowder, and more especially of Young Hysons, are selling at very low rates.

Messrs. James Goddard, Jun., and Co.'s Circular says:—The market has become flat during the week, with a little more desire in some quarters to make sales. The indisposition of the trade to buy the common qualities of Congou, chiefly the black leaf kinds, and the absence of any shipping demand, have brought these sorts forward at auction "without reserve," and business has been done at 9¾d. to 11d. Old season's is still occasionally offered, and what has been of a much higher class is still being sold at about these rates. The arrivals of second crop of the D and E grades have very fully supplied the market, and prices are not quite so strong. The clipper ship Thermopylæ, from Foochow, has arrived, and her cargo partly showing, but the trade are by no means eager buyers. Canton Congous are still in fair demand. Scented Teas of all kinds have fallen flat from an increased supply. Green Teas are still offered at auction, choice chop of Moyunes, "Tung Hing," obtained—Gunpowders Nos. 1 and 2, 3s. 1½d. and 1s. 10½d.; Imperials, 1s. 3½d. and 10½d.; Young Hysons, Nos. 1, 2, and 3, 1s. 7½d., 1s. 1½d., and 8¾d.; Hysons, Nos. 1, 2, and 3, 3s. 4d., 1s. 1d., and 7d.

	1875. lbs.	1874. lbs.
United Kingdom stock, on the 31st Oct. 1875, was estimated at ...	87,000,000	77,500,000
Cargoes of vessels arrived up to date, but not included in the above stock, with portion of other cargoes only partially included	9,400,000	5,255,000
Amount on the water advised by telegraph to 30th Oct., against actual shipments to same date last year	30,858,000	50,250,000
	127,258,000	133,005,000

SILK.

Messrs. Durant and Co.'s Circular says:—We have little new to report. The market continues much as in former weeks, "moderate daily doings for consumption without change of prices"—speaking generally with a hardening tendency. The deliveries of the month are fairly good, but show diminishing figures, as also unfortunately do the arrivals Japan Silk does not take that place in the general consumption which the low quotations would seem to justify. It may be that with the new Silk this may be all changed; but at present little has come forward to tempt buyers. In Canton Silk the transactions have been limited by the large quantity sold in the public sales without reserve.

Mr. John Kershaw's Circular says:—Since the public sales the market for China Silk has remained very firm; the business doing has not been by any means large, but it has been daily and steady. Importers hold their silk very stiffly, and buyers do not get the least concession from asking prices. Notwithstanding the falling off in the deliveries of China Silk, the stocks are again reduced, owing to importations being so small—only 1,611 bales in October. There is not much doing in Canton Silk; No. 4 Tsatlee Reel is held at 11s. to 11s. 6d.; for "Loong Kongs" there is no inquiry. Japan Silk is still very difficult to move even at the present low quotations.

	Stocks. Oct. 30.		Imports. Jan. 1 to Oct. 30.		Deliveries. Jan. 1 to Oct. 30.	
	1874. Bales.	1875. Bales.	1874. Bales.	1875. Bales.	1874. Bales.	1875. Bales.
China ...	26,195	16,181	29,109	18,401	31,118	32,921
Canton ...	4,552	5,587	2,477	5,806	5,989	5,344
Japan ...	5,459	3,769	5,166	3,769	6,952	5,520

Coffee.—A very small supply of plantation Ceylon at auction early in the week, consisting mostly of ordinary, sold readily at fully previous rates, viz., triage at 88s. to 98s. 6d., small to low middling at 102s. to 108s. 6d., middling 111s., pea-berry at 124s. During the last few days public sales have been suspended, but business has been done privately at steady rates. Nine bags Penang have been sold at 95s. per cwt.

Cotton.—There has been rather more demand at previous rates, and the market is steadier, but the sales amount to only 600 bales.

China Straw Plait.—At auction 288 bales were mostly disposed of at late rates (chiefly white) from £6 15s. to £10 for the commoner kinds, £11 5s. to £15 for medium qualities, and £16 10s. to £25 15s. per bale for a few fine lots.

China Preserves.—In public sale 50 cases dry Ginger were bought in at 1s. per lb.

Cocoanut Oil moves off slowly, Cochin at £42, Ceylon at £38 15s.

Digitized by Google

to £39. In public sale 100 hogsheads Ceylon were bought in at £39 10s. per ton.

CUTCH.—Privately business has been done in fine Pegu. Cock at 26s., Elephant at 27s. per cwt. At auction 200 boxes fine new Pegu (Cock brand) were bought in at 26s. 6d.

GAMBIER.—A further decline has occurred, at which a considerable business has been done. Privately about 700 bales have been sold at 27s. to 27s. 3d. At auction 252 bales damaged cubes sold at 33s. 6d. for 1st class; and 506 bags rather heated and blocky cubes were bought in at 40s. per cwt.

HIDES AND HORNS.—Messrs. Dyster, Nalder, and Co.'s Monthly Report says:—Singapore, Penang, and Rangoon, &c., Ox and Cow Hides have been in limited demand at the public sales, but for those sold late rates were realised. The sales are 2,044 Singapore, &c.; light, seconds, 11¾d.; thirds 7d.; fourths 5d.; small, seconds 10½d. per lb. 864 Rangoon; light, seconds 10½d.; heavy, seconds 7d. per lb. Singapore, Penang, &c., Buffalo Hides have been in moderate request, at about previous prices. The sales are 2,891 Singapore, &c.; fair, 1st heavy, average 27 to 32¾ lb., 5¾d. to 5¾d.; 2nd heavy, average 25½ lb., 5½d.; light, average 10⅜ to 16½ lb., 5¾d. to 6¾d.; ordinary, 1st heavy, average 29⅝ to 31¼ lb., 4¾d. to 5¼d.; 2nd heavy, average 31⅝ lb., 4⅞d.; thirds, 3¾d. per lb. 100 Rangoon; heavy, average 41¼ lb., 5¼d. per lb. Java Hides.—No sales of Ox and Cow. The demand for Buffalo Hides is limited, and the sales are only 852 hides; unshaved, 2nd heavy, average 22¼ to 24⅞ lb., 5¾d. to 6½d.; light, average 15¾ to 17½ lb., 5⅞d. to 7¼d. per lb. Horns.—In the absence of the periodical sales, there are no transactions of importance to notice.

INDIA-RUBBER.—In auction 45 baskets 2 bags ordinary Java of old import sold (without reserve) at 8¾d. to 10¾d. per lb.

JAPAN WAX.—In the public sales of 447 boxes offered 88 cases sold, good middling to good yellowish saucers at 43s. 6d. to 46s. 6d., the remainder being bought in, thick saucers at 49s. to 50s., slabs 48s. to 49s. per cwt.

PEPPER.—*Black:* A good supply, amounting to 4,001 bags, has been offered by auction, and there being more disposition to sell prices declined 1-16d. per lb., at which fully one-half was disposed of. Of 1,901 bags Penang 650 bags sold, fair at 4⅝d., West Coast at 4⅝d., with a few at 4¾d., 141 bags Trang bought in at 5½d., 428 bags Tringano 5⅛d. to 5¼d., chiefly the latter price; of 1,351 bags Singapore 1,100 bags good sold at 5⅜d. to 5½d., fine at 5½d., 180 bags Saigon bought in at 5¼d. *White:* In auction 945 bags were offered, but barely one-half sold, and prices were occasionally easier; of 790 bags Singapore 450 bags sold, fair to good fair at 7¾d. to 7⅞d., fine bright at 8¾d. to 8½d., superior bold clean at 8¾d.; 155 bags Penang bought in at 7¾d.

RICE.—The market has been inactive. A cargo of Necrancie Arracan, comprising 900 tons, sold at 7s. 6d.; one of 1,000 tons at 7s. 9d.; 800 tons Field Siam at 7s. 6d. ex ship Transactions on the spot have been of limited extent, including White Bengal at 11s. 6d. to 11s. 9d. per cwt.

SAPANWOOD.—At auction 6 tons Ceylon were bought in at £13 5s.

SAGO.—The limited supply brought forward has only partly found buyers on former terms. Of 514 bags by auction, 200 bags sold at 17s. to 17s. 6d. per cwt. for fine small grain.

SPICES.—*Cassia Lignea:* In auction 584 cases unworked were chiefly bought in at 57s. to 58s., only 145 cases first-class sea-damaged selling at 54s. to 56s. *Cinnamon:* 4 bales Ceylon withdrawn, 230 boxes broken China bought in at 10d. *Chips:* Of 245 bags Ceylon 145 bags coarse bark of old import sold at 2½d. to 2⅝d., the remainder bought in, fair chips at 6½d. *Cloves:* The large supply of 760 bales Zanzibar at auction met little demand, and the bulk was bought in. Of 89 cases 108 bales Amboyna only 8 cases good sold at 1s. 7½d., being fully ½d. lower, the remainder bought in at 1s. 8d. to 1s. 9d. also 5 cases Penang of old import at 2s. 6d. *Nutmegs:* 56 cases 14 boxes Penang sold readily at steady rates for small, to fully 1d. advance for bold; average 65 nuts to the lb., at 4s. 2d. to 4s. 6d., 70's to 68's at 4s., 81's to 76's at 3s. 9d. to 3s. 10d., 85's at 3s. 8d., 115's at 2s. 10d. to 2s. 11d., limed 135's at 1s. 11d., defective 1s. Of 10 casks 28 cases Java limed a few lots sold, 92's at 3s., medium 2s. 7d., 135's at 2s.; 162 bags wild Singapore bought in at 8d. *Mace:* 17 cases 10 boxes Penang met a steady demand, and 14 cases 10 boxes sold at full prices for good, and at former rates for middling, good bold at 3s. to 3s. 2d., middling red 2s. 5d., pickings 1s. 2d. to 1s. 4d.; 4 cases 20 boxes Java bought in at 2s. 4d. per lb.

SUGAR.—The demand from the trade has been slow, and business therefore moderate; prices, however, are supported, privately 900 tons unclayed Zebu Manila have been sold at 15s. 6d., also 7,000 bags unclayed Ilo Ilo at 15s. 6d.; privately 1,700 baskets date Penang have been sold at 15s. 6d., 1,000 bags soft brown at 17s. 9d., and about 200 tons date sort in bags chiefly at 15s. 9d. per cwt.

TAPIOCA.—Of 1,862 bags Singapore offered, rather more than half sold at 2d. to 2¼d. A portion withdrawn at 2⅜d. for bold Malacca. 162 bags Penang about half sold at 2⅝d. per lb. for 1st class sea damaged. *Pearl Tapioca:* 200 bags were partly disposed of at 20s. per cwt. for fine small grain.

TIN.—The small fluctuations in values during the past month, and the entire absorption of our heavy arrivals, point to absence of speculation and a very large consumption of this metal. The total supplies of the year will show a heavy increase, but holders are still confident that the present low range prices will eventually have great effect upon production. Quotations show a slight decline upon those given for last mail, being, Straits on the spot £84 10s., afloat £84, Banca £91, Billiton £86 per ton.

ARTICLES OF EXPORT.

MANCHESTER GOODS.

There has been no change in the position of this Market; the demand has ruled moderate, but previous rates have been paid in almost all transactions, producers for the most part showing no anxiety to sell, and holding for their quotations.

CASUALTIES.

Rotterdam, Nov. 3.—The Torrington (str.) from Batavia for this port, grounded near Maasluis on the 2nd inst., and was floated after lightening.

Cadiz, Oct. 26.—The Batrak (str.) from Liverpool for Singapore, has put in here with slight defect to a piece of machinery. She will proceed to morrow.

New York, Oct. 20.—The William Woodbury, which arrived here on the 18th inst. from Ilo Ilo, reports:—Sept. 15, in long. 26 W., had heavy westerly gales off the Cape, then moderate weather to lat. 20 N., thence heavy variable gales; lost and split sails, and received other damage.

St. Helena, Oct. 11.—The Mirzapore, from Saigon, arrived here on the 1st inst., experienced very heavy weather from the 1st to 15th Sept.; off Cape of Good Hope lost and split several sails.

Manila, Oct. 6.—The Hastings, from Swatow for Newchwang, in ballast, has put in here leaky, having been driven out of her course.

Hong Kong, Nov. 1.—The Braemar Castle (s.), from London, has had steering gear damaged, and lost wheel, having encountered heavy gales.

The Weymouth, for San Francisco, which left here Oct. 2, has put back with loss of fore and main topgallant masts.

MISCELLANEOUS.

Brouwershaven.—815 blocks of tin have been landed by divers from the wreck of the Thomas Sorby (str.), Java to Rotterdam, which stranded Oct. 8, at Oo erbank.

Malta.—Arrived, Nov. 1, Glenroy (str.), from London, for Shanghai; 3, Erl King (str.), from Shanghai, for London.

Port Said.—Arrived, Nov. 1, Pontianak, from Greenock, for Singapore; Ajax, from Liverpool, for Shanghai.

Suez, Oct. 30.—Arrived, Glenartney, from Amoy, for New York; 4, Orestes, from Shanghai, for New York; Flamingo, from Shanghai, for London.

St. Helena.—Arrived, Sept. 23, Maria Rickmers, from Rangoon, and left for Geestemund; 26, Aydon Forest, Maulmain, and left, 27, for Falmouth; Oct. 1, Mirzapore, Saigon, and left on the 2nd for Belle Isle; G. Broughton, Bassein, and left for Liverpool; 3, Conte Geza, Scapary, Rangoon, and left, 4, for Falmouth; 4, King Cedric, and left for Cork; Benedetto M, Bassein, and left, 5, for Falmouth; 5, Denbighshire, Hong Kong, and left for London; 6, Cordelia, Manila, Star of Peace, Singapore, both left, 7, for Liverpool; 7, Bremontier, Manila, and left, 8, for Falmouth; 8, Ludovic and Charles, Ilo Ilo, for Cork; Slieve Bloom, Bassein, and left for Cork; Rowena, and left for Liverpool; Bremero, Akyab, and left, 9, for United Kingdom; 9, J. A. Brown, Batavia, and left for Boston; Louis de Geer, Maulmain, for Hamburg; Star of India, Rangoon, for Cork; Tecumseh, Singapore, and left for Liverpool; Emma and Robert, Batavia, Duke of Northumberland, Bassein, both for Falmouth; Annie Florence, Colombo, for London; Magnolia, Rangoon, Annie Torrey, Maulmain, Florence Treat, Rangoon, all three sailed, 11, for Falmouth; India, Rangoon, for United Kingdom; 11, Florence, Singapore, for London; Cuba, Rangoon, for Liverpool; Arakan, Akyab, for Nantes; Othello, Rangoon, for Falmouth; Les Bon Fils, Batavia, for Marseilles; Amstelstroom, Batavia, for Amsterdam; West, Rangoon, and left, 12, for London.

Passed.—Oct. 11, J. T. C. K., from Bourbon, for St. Nazaire; Admiral Tegethoff, Manila, for Cork.

Oct. 11, the Regent, from Manila, for New York, having landed her rudder, a survey was called on Sept. 27, when surveyors found it to be in such a defective state that they recommended the same to be condemned and a new rudder procured. Another survey was held on Sept. 30, when the hull, sternpost, stem, mainmast, and other spars were found very defective. Surveyors recommended a further discharge of cargo until the vessel be lightened to the extent of two sheets of copper out of water, and then to be again surveyed, which, having been carried out, a survey was held on the 4th inst., and recommended the following, viz.:—To procure and fit a new mainmast, a new foreyard, and upper mizen topsailyard, new port cathead and port bumpkin, caulk the vessel outside and put in graving pieces where required, fasten woodends, caulk decks, repair bulwarks, &c., forward and ends of beams on topgallant forecastle.

Port Elizabeth.—Arrived, Sept. 26, Carl, from Hong Kong; Isurium, from Maulmain.

Ascension.—Passed, Sept. 26, Banquereau, from Philippine Islands, for London; Oct. 12, Star of Peace, Singapore, for Liverpool; 13, Queen of the North, Colombo, for London.

LAUNCHES.

On the 18th Oct. Messrs. John Elder and Co. launched from their yard at Fairfield, Govan, a handsome iron screw steamer, 2,900 tons gross register, and of the following dimensions:—Length between perpendiculars, 376 feet; breadth, moulded, 37½ feet; depth, moulded, 29 feet; engines, 500-horse power. This vessel has been designed and constructed for a new mail service between San Francisco, New Zealand, and Sydney, and is most beautifully fitted up, having accommodation for 170 first, 30 second, and 100 third-class passengers. On leaving the ways she was named Zealandia, the ceremony being performed by Miss Russell, daughter of Mr. Thomas Russell, special postal commissioner for New Zealand. A large number of ladies and gentlemen who witnessed the launch afterwards sat down to luncheon in the offices of the builders. She will be commanded by Captain J. S. Ferries, formerly of China. The London agents for the line are Messrs. Lawrance, Clark, and Co.

On the 2nd inst. Messrs. A. M'Millan and Son launched from their yard at Dumbarton, a beautiful iron clipper sailing ship of 1,015 tons, built to the highest mark at Lloyd's, and to the order of Messrs. Hatfield, Cameron, and Co. as an addition to their "Bay" line of sailing ships; she received the name of Duart Bay from Miss Alice S. Hatfield, daughter of the managing owner. This vessel was launched with her spars aloft, and, being almost completed, will in a few days take her berth at Glasgow to load for Shanghai. She will be commanded by Captain Millar.

The Loss of the Thomas Sorby.—A Board of Trade Inquiry has been held at Middlesborough, before the stipendiary magistrate and Captain Nicholas and Ronaldson, nautical assessors, into the loss of the screw steamship Thomas Sorby, Captain Jackson, on the Ooster Bank, coast of Holland, on the 6th October, while on a voyage from Batavia to Rotterdam. The inquiry resulted in the certificate of the captain being suspended for six months.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, August 30, 1851.

PAID-UP CAPITAL, £1,500,000.

RESERVED FUNDS, £500,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Colombo, Foochow, Hiogo, Hong Kong, Kandy, Madras, Mauritius, Melbourne, Point de Galle, Pondicherry, Port Elizabeth, Shanghai, Singapore, Sydney, Tellicherry, and Yokohama on terms which may be ascertained at their Office. They also issue Circular Notes for the use of Travellers by the Overland Route.

They undertake the agency of parties connected with India and the Colonies, the purchase and sale of British and Foreign Securities, the custody of the same, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named Dependencies.

They also receive deposits of £100 and upwards for fixed periods, the terms for which may be ascertained on application at their Office.

Office hours, Ten to Three; Saturdays, Ten to Two.

Threadneedle-street London, 1875.

THE AGRA BANK (Limited).

Established in 1833.

CAPITAL, £1,000,000.

Head Office:—NICHOLAS-LANE, LOMBARD-STREET, LONDON.

Branches in Edinburgh, Calcutta, Bombay, Madras, Kurrachee, Agra, Lahore, Shanghai, Hong Kong.

Current accounts are kept at the Head Office on the terms customary with London Bankers, and interest allowed when the credit balance does not fall below £100.

Deposits received for fixed periods on the following terms, viz.:—At 5 per cent. per annum, subject to twelve months' notice of withdrawal. For shorter periods deposits will be received on terms to be agreed upon. Bills issued at the current exchange of the day on any of the Branches of the Bank free of extra charge; and approved bills purchased or sent for collection. Sales and purchases effected in British and Foreign Securities, in East India Stock and Loans, and the safe custody of the same undertaken. Interest drawn, and Army, Navy, and Civil Pay and Pensions realised. Every other description of Banking Business and Money Agency, British and Indian, transacted.

J. THOMSON, Chairman.

HONG KONG AND SHANGHAI BANKING CORPORATION.

Capital, $5,000,000. All paid up.

Reserve Fund, $100,000, at exchange of 4s. 6d.—£22,500.

COURT OF DIRECTORS AND HEAD OFFICE IN HONG KONG.

MANAGER—D. McLean Esq., 31, Lombard-street.

BANKERS—London and County Bank.

BRANCHES AND AGENCIES.

Hong Kong	Hankow	Saigon
Shanghai	Yokohama	Singapore
Foochow	Hiogo	Bombay
Ningpo	Manila	Calcutta

The Corporation grant Drafts upon, and negotiate or collect Bills at any of the Branches or Agencies; also receive Deposits for fixed periods, at rates varying with the period of deposit.

The Corporation issue Letters of Credit and Circular Notes, negotiable in the principal cities of Europe, Asia, and America for the use of travellers.

They open Current Accounts for the convenience of constituents returning from China, Japan, and India.

They also undertake the Agency of constituents connected with the East, and receive for safe custody Indian and other Government Securities, drawing Interest and Dividends on the same as they fall due.

Dividends are payable in London in April and October, on receipt of the advice of meeting in Hong Kong, held in February and August.

THE NATIONAL SAFE DEPOSIT COMPANY (Limited).

1, Queen Victoria-street, Mansion House, London.

Capital, £500,000. Subscribed, £250,000.

DIRECTORS.

J. H. Pulleston, Esq., M.P., Chairman.
Lawford Acland, Esq., Chairman Ceylon Company.
George Arbuthnot, Esq., Chairman Oriental Bank Corporation.
George W. Barnett, Esq., Barnetts, Hoares, Hanburys, and Lloyd.
Horatio S. Coulson, Esq., Director United Discount Corporation.
Lord Wm. M. Hay, Director Eastern Telegraph Company.
Hugh F. Sandeman, Esq., Director Scottish Union Insurance Company.

The Company is now ready to let to approved applicants Safes in their Fire and Burglar-proof Vaults, at rents from £2 10s. to £30 per annum.

No insurance is necessary.

The main object of the Company is to provide the public with a perfectly secure, yet inexpensive repository for valuables of every description, and relieve them from the harassing and wearing strain occasioned by the personal care of such property. The Company take for safe custody all kinds of securities, valuable property, bonds, wills, marriage settlements, and other documents, and guarantee their value when required. Drawn bonds, coupons, &c., collected.

The Company undertake the duties of trustees, receivers, and executors, and act in other confidential capacities.

The Great Vault is superior to any building in the world intended for similar purposes. The utility of these Safes, which are entirely underground, is undeniable, as bankers are not responsible for deposit of valuables.

The loss of many kinds of securities is irreparable, the loser having no recourse against the Government or other party issuing them. A constant watch is kept both inside and outside the building. There is a room especially adapted and reserved for ladies. The premises can be inspected, and further particulars obtained on application. HENRY WEST, Manager.

BANK OF CALIFORNIA.—THE ORIENTAL BANK CORPORATION are prepared to ISSUE DRAFTS at sight on the Bank of California, San Francisco, the terms for which may be ascertained at their Office.

Threadneedle-street, 1875.

STANDARD LIFE ASSURANCE.

REDUCED PREMIUMS.

CHINA and JAPAN.—The Directors of the STANDARD LIFE ASSURANCE COMPANY have reduced the rates of premium to be hereafter charged for residence in certain parts of China and Japan, and full particulars as to terms, regulations, and conditions may be had at the offices of the Company.

Local Boards and Agencies in India, China, and all the colonies.

Moderate premiums, at rates suited to each climate.

Immediate reduction to home rates on return to Europe or other temperate climate.

Loans advanced to civilians and military officers.

The next division of profits will be made among policies in existence at 15th Nov., 1875, and all who assure before that date will rank for profits on that occasion.

Annual income of the Company upwards of £700,000 sterling. Invested capital and accumulations upwards of £4,500,000.

H. JONES WILLIAMS, Gen. Sec. for England 82, King William-street, E.C.

JOHN O'HAGAN, Res. Sec., West-end Office 3, Pall-mall East.

Edinburgh ... 3 and 5, George-street.
Dublin ... ... 66, Upper Sackville-street.

COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1854, and 31st December, 1866.

Recognised by the International Convention of 30th April, 1862.

CAPITAL, fully paid up, £3,200,000.

Reserved Fund ... ... £20,000,000 ... £800,000.

HEAD OFFICE—14, Rue Bergere, Paris.

AGENCIES AT—Lyons, Marseilles, Nantes, Mulhouse, Roubaix (France), Brussels (Belgium), Alexandria (Egypt), Calcutta, Bombay, Hong Kong, Shanghai, Saigon (Cochin China), Bourbon (Reunion), and Yokahama (Japan).

LONDON BANKERS.—Bank of England and Union Bank of London.

LONDON AGENCY.—144, Leadenhall-street, E.C.

MANAGER.—Theod. Dromel.

SUB-MANAGER.—H. DUVAL.

The London Agency grants Drafts and Letters of Credit, and purchases or collects Bills payable at the above-named places.

The Agency will conduct Banking business of every description with the Continent, India, China, &c., upon terms to be ascertained at the Office.

Office hours, 10 to 4; Saturdays, to 2.

COWASJEE DINSHAW,

THE JUMMOO AND KASHMIR TERRITORIES. A Geographical Account. By FREDERIC DREW, F.R.G.S., F.G.S., Associate of the Royal School of Mines, late of the Maharaja of Kashmir's Service.

"It has rarely been our good fortune to read so lucidly planned a book as Mr. Drew's. . . . Every chapter is deeply interesting. The importance and value of the work in a scientific point of view are very great, and the five maps, which are arranged respectively as the general, the snow, the political, the faith, and the race maps, are the most complete within our knowledge."—*Spectator.*

"It is pre-eminently a storehouse of valuable facts. Each of these facts is plainly put before the reader, and no one can rise from a perusal of Mr. Drew's volume without knowing very much that is fresh about the countries treated of. Mr. Drew's work is most methodically arranged, and a good index renders it still more valuable as a book of reference. . . . We imagine—so precise and full is the book before us—that many years will pass before any other author will attempt to treat of a subject which Mr. Drew has so thoroughly exhausted. . . . The maps which conclude the volume are, in our opinion, by far the best of the region yet published."—*Athenæum.*

"One of the most valuable additions to our knowledge of Indian Geography which we have been called upon to notice for some years past. . . . We are able to speak of the author's work in terms of unqualified praise. . . . The maps deserve more than a passing notice, for it is but rarely that English works of travel are illustrated cartographically in so liberal and unexceptional a manner."—*Geographical Magazine.*

Second Edition, crown 8vo, pp. 552, cloth, with Map, 8s. 6d

THE PRINCES OF INDIA. An Historical Narrative of the Principal Events from the Invasion of Mahmoud of Ghizni to that of Nadir Shah. By Sir EDWARD SULLIVAN, Bart., Author of "Letters on India," "Trip to the Trenches," "Rambles in North and South America," &c.

The following pages were commenced after a journey through India and Ceylon some years ago; they do not lay claim to the rank of history; neither will they satisfy the "immortal longings" of the real student, but they may perhaps help to turn more attention to the romantic chronicles of a country unequalled in the world for the magnificence of its natural aspects, and that has produced some of the noblest sovereigns, warriors and statesmen that adorn the annals of any age, people, or country. The author has inserted nothing without authority, and he believes he has consulted every work or article that has been written on India, in the English or French languages.—*Extract from Preface.*

With Coloured Map, crown 8vo., cloth, 6s.

CHINA.—THE FOREIGNER IN FAR CATHAY. By W. H. MEDHURST, H.B.M. Consul, Shanghai.

CONTENTS.—Position of Foreigners—Customs of the Chinese—Shop Signs—Advertising—Mandarin Yamens—Opium Smoking—Infanticide — Eating and Drinking—Social Institutions—Modes of Sepulture—Character of the Chinese—Specimen of Chinese Music, with Origina Words and English Literal Translation, &c.

"It is a volume which will amply repay perusal, and that man must be very impervious to knowledge who lays it down without having gained from its pages an intelligent insight into the strange and much misrepresented world of China."—*Saturday Review.*

"We must be thankful to the author, who has given us much that is thoroughly reliable of China as it is, which we should look for in vain elsewhere."—*Spectator.*

"There is not an intelligent reader in Europe who will not be edified and amused by a perusal of this little book."—*London and China Telegraph.*

New Edition. Scale, 90 miles to an inch; size, 26 inches by 22.

CHINA. — MAP OF CHINA. By J. ARROWSMITH. Sheet, Coloured, 3s.; mounted, in case, 5s.

New Edition. Scale, 86 miles to an inch; size, 29 inches by 33.

INDIA.—STANFORD'S NEW PORTABLE MAP OF INDIA: Exhibiting the present Divisions of the Country according to the most recent Surveys; showing also the adjacent territories of Beluchistan, Afghanistan, Turkestan, the Chinese Empire, Burmah, and Siam. The Railways, Rivers, Canals, Mountain Passes, and the Elevations above the Sea are clearly indicated: and the Boundaries of the Provinces, the Bengal, Bombay, and Madras Presidencies, the Districts under British and Native Government, and the French and Portuguese Possessions, are distinctively coloured. Price, Coloured, 6s.; mounted on linen, in case, 8s.; or on roller, varnished, 11s.

Scale, 33 miles to an inch; size, 27 inches by 33.

BURMAH, &c.—A Map showing the various Routes proposed for connecting China with India and Europe through Burmah, and developing the Trade of Eastern Bengal, Burmah, and China. Prepared under the direction of JOHN OGILVY HAY, F.R.G.S. Coloured, 3s.; mounted, in case, 5s.

"A map, prepared under the direction of Mr. John Ogilvy Hay, F.R.G.S., has just been published, 'showing the various routes proposed for connecting China with India and Europe through Burmah, and for developing the trade of Eastern Bengal, Burmah and China.' It must not be supposed from this description that the area embraced by the map extends from China to Europe. It includes simply Assam, Pegu, Eastern Bengal, and West Yunnan or that part of the Indo Chinese countries in which Englishmen are most directly interested. The scale, thirty miles to the inch, has enabled the engraver to use large letters in printing the names of places, and to represent, without crowding or confusion, a considerable number of the routes followed by recent travellers, or suggested as new lines of commercial intercourse."—*Times.*

TANJONG PAGAR DOCK COMPANY, LIMITED.

REPORT OF THE DIRECTORS.

GENTLEMEN,

Your Directors now have the pleasure of presenting you with the Balance Sheet and Profit and Loss Account for the half-year ending 30th June last.

After making allowance for all necessary payments for that period, including depreciation on property and plant, as well as $13,908.62, the cost of maintenance and repairs effected thereon, and depreciation on tug boats, there remains $40,886.08, which, added to $25,426.37 brought forward from last half-year, makes $66,312.45 to be disposed of.

Your Directors recommend that from this sum an interim Dividend at the rate of 10 per cent. per annum be declared, leaving $36,312.45 to be carried forward.

The claim against the Company in consequence of the accident to the ship *England* has been settled, the vessel taken over, repaired, and sold. The loss on this account amounts to nearly $50,000, and it is to assist in meeting this contingency that it is recommended to carry so large an amount forward.

Mr. Parkes, the Engineer, engaged to determine the site of, and to make plans and estimates for the New Graving Dock, having completed his surveys, has returned to England, where he will act on the Company's behalf as non-resident Engineer, and Mr. Edward Jackson has been engaged for the actual supervision of the work under Mr. Parkes' directions.

Mr. Jackson is now in Mr. Parkes' office preparing the working plans of the New Dock, and is expected here, to commence work, in October next.

Mr. Parkes estimates that the cost of the New Dock will be about £30,500.

Mr. E. M. Smith returned from his year's leave of absence on 15th May, and resumed charge of your business; Mr. S. A. A. Muggeridge being appointed Assistant Manager and Assistant Secretary.

(Signed) THOS. SCOTT, Chairman.

THE LATE REV. B. P. KEASBERRY,

OF SINGAPORE.

THE late Rev. B. P. KEASBERRY, whose sudden death occurred last month in Singapore, has left a widow and a family of girls almost wholly unprovided for.

It is almost unnecessary to remind old residents in The Straits of the faithful and disinterested services of Mr. Keasberry, in the teaching of the Christian faith, and the spread of education.

These services, which extended over a period of thirty-six years, it is proposed to recognise, to some extent, by the collection of a sum of money, to be placed in the hands of the Hon. R. Little, M.D., and William Adamson, Esq., of Singapore, as Trustees, leaving power to them to invest the whole or a part at their discretion, or to apply it wholly and at once for the benefit of Mrs. Keasberry and her daughters.

Cheques should be made payable to P. F. Tidman, 34, Leadenhall-street, by whom Subscriptions will be acknowledged.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.

Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,

HOMŒOPATHIC CHEMISTS,

48, Threadneedle-street, and 170, Piccadilly. Works:—Euston road and Camden Town, London.

Makers of Epps's Glycerine Jujubes (throat irritation).

T. W. JACKSON,

COMMISSION AGENT
SAN FRANCISCO.

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the Faky that I was a doctor, and that I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

HERTSLET'S MAP OF EUROPE BY TREATY.

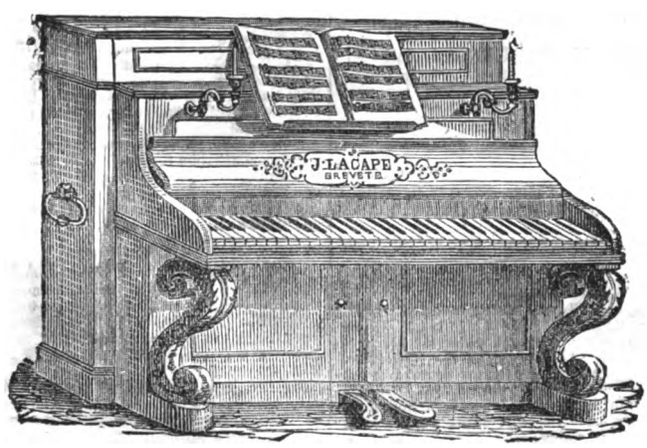
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29, BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

TANJONG PAGAR DOCK COMPANY
(LIMITED).

VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all description of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

LONDON AGENTS.
Messrs. MACTAGGART, TIDMAN, and Co., 34, Leadenhall Street.

E. M. SMITH, Manager.

Wuste, Mr. Voute, Mr. Van Delden, Mr. and Mrs. Verkouteren. To Singapore: Mr. Baumgarten and family, Mr. Thos. J. Broome, Mr. Hinnekind and family, Mr. Sohst and family, Lieut. H. F. Braddel, Mr. F. A. Hervey. To Galle: Mr. A. MacFarlane, Mr. E. G. von Glehn, Mr. J. Tarn, Mr. and Mrs. Young, Mr. Bosanquet, Mr. Atkinson.

Per steamer *Glengyle*, from London, Nov. 15.—To Singapore: Capt. Grandin. To Shanghai: Miss Mealand, Capt. Burdis.

Per steamer *Sarpedon* (Holt's line), from Liverpool, Nov. 5.—To Shanghai: Mr. Bramfitt, Miss Dawson. To Hong Kong: Mrs. Lilly and child, Mr. and Mrs. Parkes and family.

TELEGRAMS FROM THE FAR EAST.

MURDER OF THE BRITISH RESIDENT IN PERAK.

(REUTER'S TELEGRAMS.)

PENANG, NOV. 9.—The *Pluto* has returned here from Perak with the news that Mr. Birch's body has been recovered in a mutilated condition. In the fighting with the Malays Captain Innes has been killed and Lieutenant Elliott (10th Regiment) seriously wounded. Lieutenant Booth and eight men of the 10th Regiment have been slightly wounded.

SINGAPORE, NOV. 10.—Governor Jervois has returned here from Perak. According to the latest reports the body of Mr. Birch was found in the river. Fifteen hundred British troops are on their way from Calcutta and Hong Kong to take part in the further operations against the Malays.

PENANG, NOV. 12.—The Residency at Perak is now garrisoned by 803 British troops, supported by the gun-vessels *Thistle* and *Fly*. Sultan Abdullah is friendly to the British. The murder of Mr. Birch is believed to have been unpremeditated. The Malays, however, are arming for defence. Governor Jervois is preparing to undertake military operations.

HONG KONG, NOV. 11.—Major-General Colborne, eleven officers, and 300 men of the 80th Regiment left for Singapore by the English mail steamer to-day.

SHANGHAI, NOV. 12.—Vice-Admiral Ryder, commanding the squadron on the China station, left to-day for the south.

(COLONIAL-OFFICE TELEGRAMS.)

Telegraphic intelligence has been received from Singapore that the besieged British Residency on the Perak River was relieved on the 6th inst. by Captain Innes. On the 7th a force composed of a detachment of the 10th Regiment, the armed police, and the sepoys of the Resident's guard attacked a stockade further up the river, and near the scene of Mr. Birch's murder. The attack failed, Captain Innes was killed, Lieutenants Elliott and Booth and eight men of the 10th wounded, and one reported missing. The Governor was on his way to Batu Rabit, a point on the river half-way between the sea and the British Residency. Orders have been given for the immediate despatch of reinforcements from Hong Kong and Calcutta.

Later telegrams throw some additional light upon the circumstances attending the murder of Mr. Birch in Perak. It appears that a proclamation had been issued and had been posted throughout Perak on the 1st November. Mr. Birch on that day telegraphed to Sir W. Jervois that the proclamation had been well received, and that all was quiet in Perak. On the following day, however, a Malay tore down the proclamation posted at Passir Sala, where the Resident was, and on being struck by the interpreter of the Residency, at once stabbed that officer. An affray followed in which Mr. Birch, who was in his bath, was murdered. The force sent to punish the perpetrators of this outrage consisted of Captain Innes, R.E., Lieuts. Booth and Elliott, with sixty men of the 10th, Lieut. Abbott, R.N., sixty Sikhs, and 50 Police and Malays with rockets. They arrived at the Residency on the 5th, and on the 6th marched through the jungle against the Maharajah Lela, in whose village the murder was committed, and who was found occupying a stockaded position. After an hour and a half's fighting the European troops charged the stockade; in this charge Captain Innes was killed, and Lieutenants Booth and Elliott were wounded, and it was considered necessary to order a retreat, which was effected in an orderly manner, and not before the enemy had abandoned the stockade. The Governor telegraphs that the principal chiefs of Perak remain unshaken in their loyalty, and that the Sultan has offered to assist with men and boats. He reports that the disturbances are still confined to a limited area, and that the Residency on the Perak River is securely held. He has at his disposal between 700 and 800 European troops, besides 80 artillery, and two men of war are on the station; others are expected, and, in addition, Major-General Colborne sailed with 300 men of the 80th Regiment on the 11th for Singapore.

(TIMES' TELEGRAMS.)

PENANG, NOV. 9.—The body of Mr. Birch has been found, tied to a tree. All this side of the Malay peninsula is greatly excited, and a general outbreak is feared. Governor Jervois is at Perak. Troops have been telegraphed for from Hong Kong. The *Modeste*, man-of-war, from Labuan, and the *Thistle* and *Fly*, gunboats, have arrived near Perak. There are about 400 troops at Perak.

PENANG, NOV. 10.—The Rajah of Lilla *(sic.)* has ordered the districts of Larut, Salangore, and Perak to take up arms. Johore and Queda are friendly. The troops have retired to Baturabet, Sultan Abdoolla's residence, ten miles below the Residency. The *Ringdove* and *Egeria* gunboats are expected from China. One thousand men with artillery are on their way from India. The Malays are ejecting the Chinese inhabitants who are friendly to the English, and are recruiting their forces in the outlying districts. A religious war is expected.

HONG KONG, NOV. 12.—In consequence of the outbreak at Perak, General Colborne, with Captain Huskisson as Aide-de-Camp, 300 men of the 80th Regiment, under the command of Major Amiel, Captains Tyler, Creagh, and Howard, Lieutenants Prior, Cole, and Walmesley, Surgeon L'Estrange, and Commissaries Johnston and Skinner, left yesterday for Singapore

PERAK, via PENANG, NOV. 12.—The Malays are stockaded within seven miles of the Residency. The gunboats are at Sabathang, ten miles lower down. The troops are intrenching at the Residency, and await reinforcements before attacking. We expect news of offensive operations seven days hence.

CALCUTTA, NOV. 14.—The 3rd Buffs, now quartered here, a Goorkha regiment, and a battery of Mountain Artillery, in the aggregate numbering 1,000 men, of whom about half are Europeans, have been directed to hold themselves in readiness to start for Perak. The British India Steam Company has been requested to have transports ready. If final orders are issued, the force will probably start by the middle of the week.

THE MURDER OF MR. MARGARY.

(REUTER'S TELEGRAM.)

SHANGHAI, NOV. 11.—The Commission, consisting of Messrs. Grosvenor, Baber, and Davenport, left Hankow on the 5th inst., on its way to Yunnan.

Digitized by Google

THE SINGAPORE LEGISLATIVE COUNCIL.

The following is the full text of the opening passages of the address delivered by Sir William Jervois at the opening of the Legislative Council of Singapore on the 7th ult. The concluding paragraphs of the speech, which refer to the policy pursued towards the native States of the Malayan Peninsula, were given in our last issue.

The Session of this Council which was held during the earlier part of the year having been closed, in consequence of the departure of my predecessor, before the necessary Financial measures could be introduced, I have invited your attendance at this Supplementary Session for 1875, mainly with the object of bringing such financial measures before you. But I propose further, so far as the brief time before us will permit, to take advantage of your presence in Council to invite your assistance in maturing and passing, before the close of the Session and the year, certain other measures,—some of which you have already had before you, and some which will be introduced for the first time.

The Financial measures are two in number, the Final Supply Bill for 1874, and the Supply Bill for 1876. As regards the former of these measures, a report by the Acting Auditor-General on the accounts of the Colony will be laid on the table, from which full particulars may be learnt in regard to the revenue and expenditure for 1874, and from which it will be seen that in regard to certain detailed items of expenditure the payments have been in excess of the amounts provided to the extent of $81,301.85, for which a covering Ordinance is now necessary; but taking the expenditure as a whole, and thus setting the savings on certain votes against the excesses on others, the expenditure fell short of the amounts provided by the original, supplementary, and surplus supply Ordinances to the extent of $73,642.98. It will be my object in the coming year, when the estimates which are now about to be introduced have come into force, to endeavour to keep the expenditure as nearly as possible in accordance with the detailed provisions; but at the same time, the Council must be aware that unless a margin were allowed to every detailed vote such as would greatly increase the aggregate of the estimates, and at the same time offer an opportunity and a temptation to undue outlay, it cannot be expected that the expenditure can always be covered by the estimates in every particular. While keeping the expenditure as a whole within the amounts provided a certain degree of latitude must be allowed to the Government to make the necessary re-appropriations when it is found that any detailed votes (whether through unforeseen circumstances or through want of foresight on the part of the framer of the estimates) are insufficient for the due performance of the public service. The financial statements will show that at the beginning of 1874 there was a balance to the credit of the colony of $745,000, and that this amount by excess of expenditure over revenue was reduced by the close of the year to $614,000, of which $523,000 was appropriated to certain specified public works; so that the available balance at the beginning of this year was only $91,000. The balance to the credit of the colony at the present time is, however, estimated to exceed $200,000.

Several Bills will be introduced that have already been laid before the Council in previous sessions, and I hope that the matters to which they relate will be finally settled during the present session. Amongst these are the Civil and Criminal Procedure Bills and the Repeals Bill, which have now for some time been before the public. I have not been able to bring into operation Ordinance No. IX. of 1875, entitled An Ordinance for regulating the Immigration of Native Labourers from "British India." Finding that the Government of India had been parties to the measure, and that, in the Ordinance as finally agreed to by this Government, the suggestions of the Government of India had only been partially adopted, I thought it advisable to await the result of a communication which I made to the Indian Government on the subject. I have received an intimation from the Government of India that the Ordinance, in its present form, does not meet their concurrence. Under these circumstances, therefore, I cannot submit the Ordinance to the Secretary of State for the assent of Her Majesty. The Government of India have promised full explanation by letter, and, after the receipt of their despatch, the question will again be submitted for your consideration. I have given much consideration to the course which should be adopted with reference to the Chinese Immigration Ordinance No. X. of 1873. My predecessor, a few days, before my arrival here, when addressing the Secretary of State relative to the circumstances under which the Ordinance had not been brought into operation, stated his opinion that the protection of Chinese Immigrants and Emigrants could be effected by giving some additional powers to the Police, and by a modification of the Registration system in force at Hong Kong, but worked under the Municipal Commissioners instead of under the central Government. The preparation of a Bill had accordingly been commenced for dividing the town of Singapore into wards, and for electing Wardmasters and Custodians upon whom it was proposed that certain powers should devolve. On being requested by the Secretary of State to report my views on this proposal, I stated that it appeared to me that the system in operation at Hong Kong would not be applicable to Singapore, and that it would not be advisable to hand over to the Municipal Commissioners, whose hands are already full, business relating to the protection of Immigrants and Emigrants.

I am of opinion that a well considered master and servant's Ordinance, somewhat on the principle of the Ceylon Master and Servant's Act, in conjunction with the Straits Settlements Passenger Ordinance, No. VI. of 1874, would meet the objects proposed to be obtained by Ordinance No. X. of 1873. This mode of proceeding will, moreover, possess the advantage of dealing with all sections of the community, instead of being applicable exclusively to Chinese immigrants; and certain other questions having reference to the relations of employers and employed would, at the same time, be dealt with. I propose that a Bill dealing with the relations of masters and servants and with other matters to which I have referred, shall, in due course, be laid before you. In pursuance of arrangements that were made before my arrival, a Bill for incorporating the trustees of the Raffles Museum, Library, and the Horticultural Gardens will be laid before you. As you are doubtless aware, a Bill has been framed for the purpose of reclaiming a portion of the foreshore at Georgetown, in Penang, by building a seawall and making a public quay there. The measure has been much discussed, and considerable difference of opinion has been expressed as to the extent to which the scheme should be carried. So soon as a definite conclusion has been arrived at upon this point, I shall ask you to consider the proposal. A Bill will also be laid before you for the purpose of dealing with the Malacca land question.

A question having arisen as to the right of aliens to hold lands in the Straits Settlements, a Bill will be laid before you for the purpose of removing any doubts that may exist upon the subject. A Bill will also be laid before you for the purpose of dealing with the question of Registration of Titles to Land, and you will be asked to consider, apart from the main question, whether it would not be advisable under the circumstances in which we are placed, to introduce, at the same time, provisions for the compulsory or voluntary registration of some securities for the repayment of money, and other documents of a like description. Several papers will be laid before you upon various subjects on which legislation will probably be required before long, viz.: 1, Mahomedan Marriage Bill; 2, New Land Act—Consolidation of Indian Acts; 3, Assimilation of S.S. laws with Indian Government Laws respecting Native Shipping; 4, Consolidation of Shipping Ordinance; 5, Excise Amendment Bill; 6, Quarantine Laws. None of the matters to which they relate are, however, as yet in a sufficiently advanced stage to be dealt with at present. In the meantime I would commend them to your attention.

The Public Works included in the ordinary Estimates for the year are progressing satisfactorily. As regards those for which you have voted sums from the surplus revenues of the colony, I desire to notice specially that the building for the accommodation of the law courts has been completed, and that steady progress is being made in the works for the supply of water to the town of Singapore. The prison at Penang, which is built on the cellular principle, is now approaching completion; the new prison buildings at Malacca are also nearly completed. In Province Wellesley the approaches and abutments of the new iron bridge over the Prye river have been commenced, and steps are being taken with a view of obtaining the iron work of the bridge from England. The addition of a wing to the Raffles Institution, for the reception of Malay students, is being proceeded with, and plans for the building of the Raffles Library and Museum are under consideration. A commencement has been made in the works for a lighthouse at Pulo Pisang, near Singapore, and at Muka Head, Penang. A new light has been provided for the harbour of Singapore. The supply of the lights required for the new lighthouses, which have been authorised, has been delayed, pending a further reference to the professional advisers to the Board of Trade. I should add that his Highness the Maharajah of Johore has shown his interest in the establishment of a lighthouse at Pulo Pisang by a free grant of the land required for this object. A proposition for a light on the Sultan Shoal, with accomodation for pilots, will be submitted for your consideration.

I have directed to be laid upon the table, for serious consideration two reports of a Commission appointed to inquire into the causes o the outbreak last February in the Criminal Prison at Singapore. f confidently look forward to your support and co-operation to enablI me to adopt the recommendation made by that Commission for th erection of an entirely new Prison, constructed upon proper principles in lieu of the existing confused cluster of buildings, in which it is impossible either to ensure the maintenance of discipline or the security of the prisoners therein confined. The want of a properly organised Hospital for the especial use of the European community frequenting this port has been brought to your notice on a previous occasion, but as yet no steps have been taken for providing such an establishment. I propose submitting this subject to your consideration with a view to the erection of a suitable building to meet this long admitted want. Your attention will also be drawn to an application for improved hospital accommodation at Penang; and papers on the subject will be laid before you. The plans of a Town Hall, which is much required at that Settlement, have been prepared, and I shall propose to you that certain moneys, paid in 1869 into the Treasury by the proprietors of land on the Beach, in addition to a sum of $10,000 to be granted by the Municipality, in whom the building will be vested, shall be devoted to this object. In connection with the Penang public works, I shall also submit for your consideration that a residence should be provided on the Plain for the accommodation of the Governor of the Straits Settlements when he visits Penang.

In directing my attention to matters relating to the conduct of public business in this place, it has appeared to me that many advantages would be obtained by a concentration of the Public Offices. The Departments would thus be able to communicate more readily; a good deal of writing may perhaps thus be dispensed with,—an economy both in time and money effected. A proposal will accordingly be laid before you for providing in an economical manner the requisite accommodation for placing all the offices except the Post Office, and, perhaps, the Master-Attendant's, under one roof. On my arrival in this Colony I was struck with the great want of topographical information respecting the States of the Malay Peninsula, and I have taken some steps to secure a more accurate map of the country than we at present possess. A survey party which I recently sent across the Peninsula has satisfactorily performed a difficult task, and added much to our informatiou of the part of the country explored. I have also sought the co-operation of the Admiralty in a fresh survey of the Coast and prominent features n the interior of the Peninsula. Of surveys of these Settlements there ill shortly be ready for publication a fresh survey of the Town of Singapore, and of Penang; a trigonometrical survey of Province Wellesley is now in progress; and the allotment surveys at Malacca are being ushed forward with vigour.

CONSULAR REPORTS ON JAPAN.

The Reports of Her Majesty's Consuls on the trade of Japan for the past year have been issued by the Foreign-office. The major portion of the figures have already appeared in Japan, and we therefore confine ourselves to giving as a matter of record the more important amounts, and extracting such general observations from the different reports as have a permanent value. The trade for the year 1874 again shows a falling off as compared with that of 1873. The extent of this decline is illustrated by the following table :—

	Imports.	Exports.	Total.
1872 ...	$26,188,441 ...	$24,294,532 ...	$50,482,973
1873 ...	27,444,068 ...	20,660,994 ...	48,105,062
1874 ...	24,223,629 ...	20,001,637 ...	44,225,266

The falling off in woollen manufactures is very marked, the imports of 1874 being only $1,585,896, against $4,879,140 in 1873. On the side of exports the total exports of raw silk show a decrease in value of $1,545,166, and silkworms' eggs of $2,301,185. For the loss in these two staples of nearly $4,000,000, compensation is provided in the increased export of tea, which shows an advance of $3,393,533. Mr. Gubbins, H.B.M.'s Consul at Niigata, says :—

The trade of Niigata cannot fairly be judged by the amount of foreign shipping visiting the port. If we judge by this alone, then the trade of the place may be said to have declined. But if we look at the fact of the town having increased considerably in size within the last two years, while the population has increased in the same proportion ; if we take into consideration that the people of other towns are deserting them to take up their residence in Niigata, and mark the various other signs which go to show that the place is really prospering ; and if we reflect that it has done this whilst labouring under the double disadvantage of having a harbour, which is no harbour at all, and of bad road communication with the capital, then I think it may be fairly argued that, though trade in foreign goods and foreign manufactures in foreign bottoms may not be extensive, still that a great trade is being carried on—a trade under the influence of which Niigata is steadily growing in size and prosperity until it bids fair some day to take rank with the principal towns of Japan.

Mr. Marcus Flowers, Consul at Nagasaki, calls attention to the *Go-rin-gin*, a tax which is opposed, and which he says is not only detrimental to the best interests of foreign trade, but is imposed in direct opposition to Treaty stipulations. He writes as follows on this point :—

At Nagasaki, whenever a Japanese merchant sells goods to a foreigner, whether for export or not, he has to obtain a permit from the Department called "Shonin-sewa-kawa," and to pay a tax of ½ per cent. on the value of the goods sold. Should he fail to comply with this regulation, his goods would be liable to be forfeited. The same is the case with all purchases made from foreigners by natives, but there is no equivalent tax on their transactions with one another. The "go-rin-gin" is levied even upon such articles as curios (if brought to a house for sale), milch cows, house furniture, white lime, and other items of domestic use or consumption; but, beyond the annoyance, it is not much felt, except in large mercantile transactions, where it not only has the effect of an increased export or import duty, but places foreigners at a disadvantage with native merchants in local traffic. I am informed by merchants here that they have not unfrequently been required by sellers of tea to raise their offers by ½ per cent., so as to place them on a par with offers of the same prices made by Yokohama native dealers, clearly showing that the tax ultimately comes out of foreign pockets. The Japanese authorities, I believe, defend the imposition, on the ground that it is a local rate intended for native municipal purposes, and not levied by the Central Government; but its payment is enforced by Government officials.

Mr. Russell Robertson, in his report on the trade of Kanagawa, gives an interesting account of the manner in which the Japanese Government turned the steamers, originally purchased for the war with China, to peaceful account. He states :—

The prospect of a rupture with the Chinese Government in consequence of the action taken by the Japanese Government against the savage tribes inhabiting the southern portion of the island of Formosa, induced the Japanese Government to make several purchases of foreign steamers during the summer of last year to be used as transports. In this work the vessels so purchased were employed for a short period, but, a peaceful solution of the difficulty having been arrived at, the greater number have since been utilised as mail and cargo steamers trading between this and coast parts, and to Shanghai, under the management of a Japanese company. The purchases under this heading amounting to 1,127,300 dollars.

(To be continued.)

A CHINESE VERSION OF THE LORD MAYOR'S SHOW.

(TRANSLATION FROM A NATIVE LETTER.)

The English Capital, *Nov.* 9.

It happened that the day on which I reached the English Capital was that devoted to the installation of the Taoutai, and I had an opportunity, in consequence, of witnessing a most curious and interesting barbarian spectacle. You must know that in this country (to such boundless length has popular licence proceeded) the people elect the Taoutai just as we allow the villagers in our country to choose the Te-paous. In order to gratify the mob *(po-sing)* the Lau-Mah (Lord Mayor, lit. old horse) as the Taoutai is called, proceeds in State to his yamen ; and so great a crowd assembles to witness the ceremony that the streets are crowded with many ten thousands of people. I managed with my foreign guide to force myself across the road, coming into close contact with the heads of two barbarian horses, which are very large and fierce, and pushed my way through the crowd to a convenient place wherefrom to witness the procession. On the way I was much struck by what seems to me a positive proof that foreigners sell children for the purpose of making medicines from their eyes and livers. In all the shop windows there were many tens of young children, both girls and boys, thus exposed for sale, and behind them stood haggard old women and old men, for whom even the doctrines of Confucius failed to evoke any respect, grinning blandly as they were bargaining for the sale of their unhappy offspring. After I had waited some time—not without rude interference on the part of a barbarian Yamun runner dressed in blue, who, using coarse language, called me a *dah-muh-fuh*—a movement in the crowd indicated that the procession was about to appear. It was heralded by a loud explosion of crackers,* just as is the case when our Taoutais appear in the streets (the idea evidently being taken from us), and, to the inharmonious strain of barbarian music, the Che-Hien and other officers were drawn through the streets in their carriages—some of which had as many as four horses, and were extremely handsome—that of the Taoutai being, as my guide assured me, of pure gold—such is the magnificence of these foreigners (*fan*), many of whom have never even heard the name of Confucius. I caught sight of the Lau-Mah as he passed. He was not so bad looking for a foreigner, and was dressed in robes which were evidently costly ; but they were gaudy, and lacked the taste of those worn by our officials on State occasions. After the procession had passed, I had great difficulty in getting away with my guide to one of the fire-wheel carriages which I described to you in my last letter. In the capital these carriages run under the ground, so as not to spoil the *Fung-shui;* and the screeching of the engines (lit. "breath-horses") and rattle of the carriages is truly deafening. Ah-yah ! the foreigners are clever people if they were only civilised and had the comfortable chairs which we have everywhere in China. However, I at last arrived at our home, with my devil friend, and lost no time in telling you of my first experiences in the English capital. By the bye, I fear political matters look threatening. On passing some of the landing-stages of the fire-wheel carriage road, I noticed a most insulting placard, in which one of our countrymen is represented dancing in an undignified attitude, and holding a plate before him. This clearly indicates contempt for the Chinese, and is intended to liken the stability of our country to the frangibility of porcelain. My guide assures me this is only an advertisement of a theatrical performance, but I am certain it has a deep hidden meaning, and is designed to inflame the populace. What has a Chinaman or a plate to do with barbarian dramas ?

P.S.—Nov. 10th.—I went again to-day to the "City," or business part of the capital, but did not see any more children exposed for sale. My friend assures me that those I saw yesterday were only in the windows to witness the show ; this may be true or may not be so, but the circumstance is at least worthy of note.

* Probably the preliminary performance on the kettle-drums which to some extent resembles the sound of Chinese crackers.—*Translator.*

THE YUNNAN EXPEDITION.

(To the Editor of the *London and China Telegraph.*)

SIR,—From your issue of the 1st inst. I gather that people in the North of China suppose that the Yunnan outrage affair is practically settled, and that we are to have another show of Chinese officials in London. Now, if our Minister at Peking has no better guarantee than two Chinese officials coming to our Capital to reiterate the promises made to him in Peking, on this head, I for one do not think much of the settlement which is reported to have been made. That the Chinese Government will pay a money indemnity for the murder of Mr. Margary I have no doubt ; but that they will ever assist in bringing the actual murderers to justice I do not believe ; for, had they ever contemplated doing so, most of us know that they could have done it long since. Up to the present time our mode of transacting diplomatic business with the Chinese Ministers has, I think, been anything but satisfactory ; that our Minister at Peking has been thoroughly hood-winked in this affair I think is pretty patent to most people who know anything of China. One London journal has already hinted at Mr. Wade's recall from Peking. If such be the case, it is to be hoped that some judgment of character will be exercised in appointing his successor, and that we shall not have another of the Chinese book-worm class—one who will make Chinese literature more his study than his country's interest. It is well known that a student of Chinese, when studying the language under a Chinese tutor, is very apt, after being daily from morning to night closeted with the teacher, to become imbued with Chinese theories, without the cunning which all Orientals and Asiatics have, as a rule ; the consequence is that such men are practically unfit to cope with a Chinese in business or any other matter where brain and a knowledge of people is wanted—without going out into the world again ; I have known many in the British Consular Service in China such as I allude to. I do not

Digitized by Google

depreciate the knowledge of the Chinese language, but I think a knowledge of the people would have been of very material service to our Minister at Peking, in the Yunnan outrage affair, and in many others.—I am, &c., OLD CHINA.

10th November, 1875.

THE MURDER OF MR. BIRCH AT PERAK.

(THE TIMES.)

The intelligence of Mr. Birch's death has been followed by news from the Straits Settlements, which may contain the seeds of another "little war." It may be presumed that an Administration presided over by a Minister who denounced as "an act of folly or of ignorance rarely equalled" the abandonment of the Treaty rights which gave us the exclusive command of the Straits of Malacca will be careful to secure our dominions on the Peninsula. As yet, however, little is known of the outbreak at Perak, except that it has cost us the life of Mr. Birch and an unsatisfactory conflict between a mere handful of British troops and the Malays. Whether the Malays have only broken out in a momentary spasm of that savage frenzy peculiar to their race we must wait patiently to see. It is fortunate that the supreme power in those regions is in the hands of an energetic and prudent Governor, Sir William Drummond Jervois, and not less that forces probably adequate to any operations that are likely to be needed are accessible. Troops were ordered up from Singapore immediately on the receipt of the startling news from Penang, and 400 men, according to the despatch we have received, are now at Perak, supported by a British man-of-war from Labuan and two gunboats. Further reinforcements have been summoned from Hong Kong. The Government of India, too, would not hesitate to give instant help in case of an emergency, and the naval squadron assembled at Bombay to do honour to the Prince of Wales would be immediately available, if necessity should arise for more serious service. The Malay Peninsula is thinly peopled, and the petty Princes who bear rule outside the limits of the British Settlements are too weak and too divided to threaten any prolonged resistance to European forces. Nevertheless, the fortunes of the Dutch in the north of Sumatra, where the Atchinese are still unsubdued, have not been of a kind to make us ambitious of the gains or glories of a Malayan quarrel. The story of Mr. Birch's murder is still unknown to us in any detail, and we can only hope to interpret the meaning which underlies the meagre facts supplied in the despatches by a general review of our position, relations, and interests in the Straits Settlements. These Settlements are among the oldest European stations in the Eastern Seas; the Portuguese held them first, but Holland displaced Portugal as the mistress of those seas, and in each interchange of power the Settlements on the Straits of Malacca fell to the ascendant nation. But the stations on the main land have in modern days become obscure when compared with the quicker growth of the two islands, Penang and Singapore, which were rescued from Malayan pirates, the former by a private adventurer in the last century, the latter by Sir Stamford Raffles some sixty yeare ago. The trade of these islands is considerable, and that of Singapore must always be great, standing, as does "the little shop," — such is said to be the signification of the name,—in the gateway between the Indian and China Seas. But, besides, we retain on the mainland of the Peninsula two "Provinces"—Wellesley, opposite Penang, and attached to that Lieutenant-Governorship, and Malacca, two hundred and forty miles to the south at the narrowest point of the Straits. The former is held by us subject to a tribute to the Rajah of Quedah, who is himself a vassal of the Siamese kingdom. But south of Wellesley Province and surrounding Malacca are several small States—Perak, Salangore, Pahang, and Johore—claiming complete independence, and most of them in alliance with the British Crown. We have Treaties of Commerce with all of them, and have defined by Treaty the boundary questions which gave at one time not a little trouble on the borders of Malacca. The kingdom of Perak lies along the coast between the southern frontier of Wellesley Province and the northern frontier of Malacca, and its capital, on the river of the same name, enjoys the presence of a British Resident. Down to 1867, the Malayan Settlements, which had been a part of the dominions of the East India Company, were attached to the Presidency of Bengal, and probably the character of the relations between the British and their native neighbours still retains in some measure the impress of Indian policy. We are not unfamiliar with the difficulties that arise in India itself when well-intentioned but somewhat peremptory English officers attempt to correct from the Residency the perversity or the stolidity of a Native Prince. But, compared with the Malay Mussulman Rajahs of the Peninsula, the most capricious and perverse of Hindoo rulers must be easy to guide.

(SECOND ARTICLE).

A revival of the old fanaticism has for some years been spreading through the Mahomedan world, and the Dutch in Atchin have encountered of late most unwelcome evidence of the vigour with which it had seized upon the Malay population of the north of Sumatra. The success of the Atchinese in resisting the Dutch invasion would tend to add fervour to this fanaticism; and nothing is more probable than that it would pass from the western to the eastern sides of the Straits of Malacca. Should this prove to be really the case, we must expect to have to deal with a troublesome foe. The Malay when roused is singularly fierce and reckless of life, and if reanimated by Mahomedan enthusiasm is not likely to submit after a first defeat. We need not anticipate anything like the difficulties the Dutch have had to encounter; but we must not expect the successes of our troops to be immediately decisive. On the other hand, it is not impossible that the local apprehensions of the hour may somewhat exaggerate the indications of a religious war; and there are not wanting, as we have said, some considerations to justify a hope that this may be the case. On the one hand, if such a war were being set on foot, it would seem somewhat remarkable that even two of the Native States should adhere to us. It may be remembered, indeed, that there have been of late years continual quarrels between some of these small communities, and, unless the religious fervour aroused be very warm, it ought to be possible to prevent their uniting. We may reasonably indulge a hope that the matter is somewhat less serious than it may at first seem. If it arose in any way from diplomatic intervention, it may, after a sufficient display of force, be permanently settled by the same means. But, whatever may be the course of affairs, it is to be hoped we shall be warned to restrict within the smallest limits possible our further intervention between these wild and inflammable communities. It ought to be well understood by this time that to appoint Residents, without whose advice and assistance nothing of political or commercial importance can be done, is practically to undertake the indirect government of such States, and to entangle ourselves in all their disputes. Of course, piracy must be put down and peace maintained in a channel of such importance to commerce as the Straits of Malacca, but the more this can be effected by external rather than by internal pressure the better. It will now be necessary to avenge the deaths of our representatives and to vindicate the supremacy of our flag; and we may fairly hope the cost will not be heavy. But when this has been accomplished, we trust the lesson will prove sufficiently effectual not to need inculcation by the personal presence of British Residents at Malay Courts.

(THIRD ARTICLE.)

The trouble seems to spring, in the first instance, from the usual cause—the irrepressible demands of commerce. If the Malay Peninsula possessed no attractions and were simply a nest of pirates we might have contented ourselves, as we have done elsewhere, with maintaining the Police of the Seas by inflicting severe punishment on the natives for acts of piracy. But the Peninsula is a very rich country. Not merely, as we stated the other day, does it contain valuable mines of both the common and the precious metals, but its almost virgin soil is extraordinarily productive. It is rich in alluvial deposits, and the climate is both salubrious and unvarying. There is never any difficulty in obtaining Chinese labour; and a letter we published last December described the profits realised on such commodities as tapioca, sugar, and tobacco as varying from 20 to 100 per cent. The Chinese labour needs only to be directed by European experience, and this, of course, is forthcoming; our Flag being assumed to be always at hand to afford protection in emergencies. The native chiefs, moreover, appear acute to perceive that their revenues are likely to be augmented by such enterprises, and last December our correspondent furnished some curious details of the introduction of civilised agencies among them. The Maharajah of Johore, then, as now "our fast friend," was said to be developing eagerly the resources of his Province. His steam sawmills were constantly at work, roads were being formed in various directions, and he had secured the services of an eminent civil engineer from the North-West Provinces of India to superintend his improvements. A line of railway, even, had been commenced some two years before, and was being rapidly pushed forward. Another young Malay Sovereign, disregarding a prophecy that evil would attend the Ruler who first allowed minerals to leave his country, had visited Singapore with the view of opening up its resources. At Salangore the Sultan not only defrayed voluntarily, by punctual payments into our own Exchequer the expenses of a British Resident at his Court, but had issued a Proclamation notifying that he had been pleased to consent that in future all revenue should be collected by the Agent of the British Government, and that he would grant concessions on liberal terms to all settlers, guaranteeing to them the same protection for life and property that they would find under the British Flag. His territory is said to be admirably adapted for the cultivation of tobacco, sugar, and tapioca, and it was expected that many settlers would avail themselves of the offer. The State of Perak was, at that time, described as "most interesting" for a different reason from that which now attracts attention to it. In that district of the State known as Laroot, the industrious Chinese were busily working the tin mines, and with such effect that the revenue derived from that district alone was estimated at a hundred thousand dollars a-year. The then Acting Resident, Captain Speedy, was actively opening up roads, forming reservoirs of water for the mines, and employed upon other works of public utility. Meanwhile, their dawning perception of the pecuniary value of commerce did not prevent these chiefs from indulging their old feuds; and we were told of the Bandahara of Pahand quarrelling with the Maharajah of Johore, and of Sir Andrew Clarke proceeding in person to the disturbed district, accompanied by Her Majesty's ships *Charybdis*, *Hart*, and *Avon*, and there arranging the terms of an accommodation, the matter ending with a request from the Bandahara for the Governor's good offices in procuring for him labour to reopen the rich gold mines of his country. These are the strange, incongruous Principalities with which we have been negotiating in due diplomatic form, and with the successive governments of which we have been interfering. It seems that the Treaty of Pulo Pangkor, negotiated last year, and destined, perhaps, to be famous as the starting point of new relations, was by no means a new experiment. Its preamble recites, among other reasons for its acceptance, that, "whereas a state of anarchy exists in the kingdom of Perak, . . . and whereas Her Majesty's Government is bound by Treaty stipulations to protect the said kingdom and to assist its rulers: Now, Sir Andrew Clarke has proposed the following Articles of arrangement." We take the opportunity to annex more territory, as a pledge that the Chinese miners will keep the peace towards each other; and we bind over their head men to well and truly pay a sum of $50,000 to Her Majesty, her heirs or successors, in any of her treasuries in the Straits Settlements.

One conclusion, it would seem, may be pretty safely drawn from this review of the facts. It is in the highest degree improbable that States which have for some years been eagerly taking advantage of the temptations which our commercial enterprise offers them would be suddenly drawn into religious war. On the other hand, "A Straits Resident" adduced specific evidence that our interposition in Perak had failed, and that the conditions necessary to insure the observance of our Treaty were wholly absent. Sir William Jervois, the present Governor, in his opening speech last October, said that in Perak "the re-

Digitized by Google

lations between the adviser and the advised have been unsatisfactory from the very commmencement. While Her Majesty's Government hold the chiefs responsible for keeping the engagements entered into by them with the British Government, there is scarcely one of those engagements which has not been violated by them. The Resident's advice is disregarded, and he must either passively look on while acts are committed which he disapproves but cannot control, or he must assume to himself a power which is inconsistent with his position as adviser, thus practically taking upon himself the Government of the State so far as the opposition of Rajahs and Chiefs will permit him to do so." "The result," the Governor presently concludes, "is eminently unsatisfactory to all concerned." These people have, in a word, seen enough of our money to want our assistance, and too little of our power to understand the necessity of keeping faith with us. It is not easy to see the way out of such a complicated entanglement. Of course there are those, especially Residents in the Straits, who say that if the Malays cannot govern their country as we like we must do it for them. People, however, with a less direct interest in the matter will expect the Government by all means to avoid burdening us with so troublesome a responsibility. Meanwhile, there is the tin, the silver, the gold, and the alluvial soil on the one side and English traders, with strongholds at Penang and Singapore, on the other; and how they are to be kept at a prudent distance it will be every year more difficult to say. We may hope for the best in the present local disturbance; but it is evident that we have sown the seeds of a plentiful growth of difficulties in the future.

(STANDARD.)

The immediate effect of Sir Andrew Clarke's intervention was eminently satisfactory. The Sultan ascended the throne with the concurrence of his subjects, the civil war came at once to an end. Piracy at sea and the "squeezing" of traders on land by petty chiefs ceased, and industry and commerce revived. Indeed, the material progress of the country within a few months was remarkable, and nothing more was heard in England of Perak till the news of the assassination of Mr. Birch reached us a few days ago. It is easy to conjecture who was the author of the outbreak, and the latest telegram confirms our suspicion. It was scarcely reasonable to suppose that the chief who, for nearly four years, had occupied the throne would cheerfully accept a subordinate position, and advices from Penang tell us that Ismail is reported to be collecting large forces, with the object of expelling the British. All the Rajahs—*i.e.*, the chief officers of State—are suspected of complicity in the murder, and we may therefore regard ourselves as on the eve of another little war. It is some consolation to think that Sir William Jervois is equal to the occasion. On the 4th, that is to say, the day after the arrival at Singapore of the news of Mr. Birch's murder, troops and a detachment of native police were despatched to Perak, and the next day the Governor himself started for the scene of operations. We believe that besides the 1st battalion of the 10th Regiment, or a portion of it, there are a battery of artillery and some Madras Sepoys at Singapore. These will furnish, with the aid of the navy, a tolerably substantial force, but it must not be supposed that we have an easy task before us. The Malays are fierce, turbulent, and addicted to bloodshed. Those on the coast, too, are hereditary pirates, who have at various times engaged in resolute contests with our men-of-war. The Malays, moreover, have plenty of arms and ammunition, and are well skilled in constructing stockades. Indeed, our first conflict with them shows that they are capable of fighting with resolution. Apparently, as soon as our troops disembarked they proceeded to raise the iege of the British Residency.

(PALL MALL GAZETTE.)

Should the outbreak prove only to be the partial and comparatively unimportant affair it was at first considered, we shall probably not have to wait long for its suppression. Should it definitely declare itself in the more serious sense which is now feared, we shall at least have spared no effort to take it in time. On the whole, we may still hope that the former view of the matter was and remains the correct one, and that we have only a race insurrection and not a religious war to deal with. In the former case it will be some slight comfort to reflect that in quelling the outbreak we shall be at the same time "avenging the death of our representative and vindicating the supremacy of the flag." War with a savage race is always a wretched and inglorious business, but it is just one degree better to find ourselves engaged in it in self-defence that to have to undertake it in cold blood as a measure of punishment following upon fruitless attempts at obtaining peaceful redress.

(DAILY NEWS.)

Our immediate duty is happily clear. We must show the populations around our Settlements that no temporary successes will avail to secure impunity to those who have committed this great crime. Already troops and seamen are on their way to Penang from China and India; and, were it necessary, the fleet which assembled at Bombay in honour of the Prince of Wales would contribute a powerful force for the assertion of our power. It is not, however, probable that any very large number of men will be required for this purpose The picture which has been drawn of a stubborn resistance to our advance, such as the Dutch have encountered on the part of the Atchinese, does not represent the expectations of those who best know the country and people. The Malays are a waspish race, but they are not important as a political or military power, and are, perhaps, on the whole less dangerous in the field than in civil life. Whatever their power, however, it must this time be effectually broken. Our interests in the neighbourhood of Perak are too great to allow us to permit turbulent Malay chiefs to bring our authority into question. A new etymology of Singapore has been offered within these few days, according to which it means "the little shop." If such is the interpretation now current in the Straits, it is time to revive an older derivation, according to which Singhapura signified "the Lion's Town." A grave question, however, lies in the background, whether we shall assume the government of Perak when we have reduced its chiefs to subjection. There are plenty among us who would settle this question off-hand, and for whom it is a doctrine beyond discussion that the British Empire is to be enlarged at all times, in all places, and by all means. Lord Carnarvon has lately shown that that is not the view he takes of British duties or British interests, and if he approves of any further extension of our government to Malay territory it will probably be not because such an annexation is desirable on its own account, but because events have made it inevitable.

(MORNING POST.)

The account, meagre as it is, of the murder would lead to the conclusion that the unfortunate officer was engaged in making a kind of tour of inspection, and that some of the lawless chiefs whom his presence in the country kept in check seized the opportunity of despatching him. Success in this matter no doubt encouraged them to proceed further to attack the Residency, which, it is presumed, is at Bandar. If Passir Sala and the latter place are at any distance from each other the occurrence of the murder at the former and the besieging of the residence at Bandar would produce the impression that the disaffection to the system lately introduced into the State is wide spread, but we are not at all disposed to think the feeling is a general one, believing it to be really confined to a few disappointed petty Rajahs who are interested in keeping up the old lawless condition of the country. The latest telegram goes to support the view that there is no general dissatisfaction in the Peninsula, inasmuch as it states that the Assistant-Resident at the neighbouring State of Salangore is safe; and the opinion we have formed as to the identity of the perpetrators of the murder that has been committed and the authorship of the outbreak is confirmed by the statement that "the native Rajahs" are suspected of being concerned in those crimes. These Rajahs are doubtless some of the men referred to by Sir Andrew Clarke as likely to be guilty of intrigues, and by the late Resident himself as "freebooting chiefs," who, driven from other States, thought that in the probable grievances of the ex-Sultan they saw a chance of future difficulties by which they would benefit. The telegram speaks directly of the complicity of Ismail in the present disturbance of the peace that has reigned in Perak for upwards of a year, and of his collecting large forces with the object of attempting to expel the British. There is ample reason to question the sincerity of Ismail's acquiescence in the arrangements made by Sir Andrew Clarke, and the symptom of his having played a double part is that he never surrendered to the Sultan Abdullah the regalia of which he possessed himself when he usurped the throne. It is true that he expressed his willingness to give them up whenever the Sultan chose to go to his residence and fetch them, but the restored Monarch did not seem to have sufficient confidence in the good intentions of his dethroned predecessor to trust himself in his immediate neighbourhood. In fact the relations between these two chiefs have not been cordial since Sir Andrew Clarke decided the question as to which of them was the rightful Sovereign. Ismail no doubt felt deeply aggrieved at his removal, for, although it was legally done, he was called to the throne by the voices of a number of chiefs, who supported him in preference to the rightful successor, because he was old, lived a retired life a long way up the Perak River, and was less likely to interfere in the government of the country than a young, active, and determined person like Abdullah.

(DAILY TELEGRAPH.)

Of course, the question that will be asked on all sides is whether these proceedings on the part of the British authorities at the Straits have been wise. We fear little glory can be achieved in fighting a set of piratical miscreants in a small Malay State, so insignificant that its boundaries are hardly marked in our best atlases. But nowadays we fight from a sense of duty rather than from a vain appetite for glory, and we are morally bound to avenge the murder of Mr. Birch, and uphold the authority of the Sultan Abdullah, whom we seated on the throne of Perak, becoming at the same time security, as it were, for the orderly government of his anarchical kingdom. More than that, we have placed the other native States of the Malay Peninsula under British protection also. In each of them a British Resident is stationed to "advise and control" the native Government. We have no reason to believe that steps have been taken to afford these officers greater safety than that which Mr. Birch enjoyed. At any rate, it is very clear that if we submitted to have our Resident assassinated at Perak, we could hardly consider the lives of his colleagues at Sangalore, Rambow, or Sunje Ujong worth six months' purchase. It is too late now to go back in our dealings with these States. Indeed, it would be the height of absurdity to conclude that the policy of protection initiated by the late Liberal Government in September, 1873, has been a failure, merely because, in one of the States affected by it, and that the most chaotic and disorderly, the British representative has been assassinated. It must be remembered that our flag was perpetually suffering outrage under the old system of non-intervention. Lord Kimberley gave the first indication to the Governor of the Straits Settlements to take decisive action in restoring order in the Malay Peninsula in a despatch to Sir Andrew Clarke, dated 3rd September, 1873, when he wrote that "Her Majesty's Government find it incumbent to employ such influence as they possess with the native Princes to rescue, if possible, these fertile and productive countries from the ruin which must befall them if the present disorders continue unchecked." And in his Lordship's instruction to Sir Andrew to try "whether it would be advisable to appoint a British officer to reside in any of these States" is the germ of that policy of disguised annexation which in the case of Perak has had the murder of Mr. Birch for its first fruits. But it does not at all follow that had Lord Kimberley abstained from even entertaining the idea of placing Perak under "protection" we should have escaped outrage. During that period of non-intervention when, in the words of Governor Sir Harry Ord, our policy towards Malacca was "unconnected, inconsistent, and incongruous," Perak was a seething cauldron of internecine warfare, which every now and again boiled over on to British territory in Wellesley Province. The police-stations there were frequently attacked by some one or other of the Malay and Chinese combatants in Larut. The boats of Her Majesty's war-ships were assaulted off the coast; and if a policy of non-intervention had been continued much onger, the Perak succession war and the faction struggles of the

Digitized by Google

Chinese miners at Larut would have been beyond doubt fought out in the very streets of Penang.

(ARMY AND NAVY GAZETTE).

The murder of the British Resident at Perak is likely to have serious results. Our first attempt to avenge his death has been unsuccessful, and involved the death of one officer and the wounding of two officers and eight men. This failure seems to have so encouraged the Malays that it is probable that the whole peninsula has by this time taken arms against us. Reinforcements have been telegraphed for, and are said to be on their way. We may, therefore, soon expect to hear of sharp fighting, for the Malays are desperate adversaries, and possess no little cunning in fortification. It strikes us as disgraceful that the Governor of the Straits Settlements should be left in so helpless a condition as to be unable, from his own resources, to bring the natives of Perak to their senses. Had he been in a position to have at once despatched a substantial force to the scene of the outrage it is probable that the enemy would have dispersed; whereas, owing to the necessary delay for reinforcements, that which was at first but a spark is rapidly becoming a wide-spread conflagration. The 1st battalion 10th Regiment is distributed throughout the Straits Settlements, and there is also a battery of garrison artillery, and some armed police. No Sepoy regiment, however, seems to be there. If the Governor was unable to send more than a detachment to Perak, there was no reason why he should have sent in command, as apparently he did, a captain of Royal Engineers. Captain Innes was doubtless a very clever and gallant man, but he must have been quite without any practical knowledge of soldiering, for from his entry into the service up till 1870 he was employed in constructing permanent fortifications, repairing barracks and butts at Shoeburyness, and acting as aide-de-camp to Sir William Gordon when that officer was Director-General of Engineers. From 1870 till the day of his death he was Assistant-Colonial Engineer at Singapore. Such a training certainly did not fit him for the task so unfortunately entrusted to him.

The following letter from Lieut.-Col. Palmer has also appeared in *The Times*:—

Penang was better known as the Prince of Wales's Island, belonging to the King of "Quedah," whose daughter married the late Captain Light, of the Hon. the East India Company's maritime service, and received the Prince of Wales's Island as her dowry, and this lady, or Princess, was the mother of Colonel Light, who distinguished himself during the whole of the Peninsula War as the confidential aide-de-camp of the late Duke of Wellington, and who subsequently, at the Duke's suggestion, on the 1st of May, 1836, went out as Surveyor-General of South Australia, whose colleague, Rear-Admiral Pullen, now survives him. Colonel Light's father, Captain Light, after his marriage with the Princess of "Quedah," sold the Prince o Wales's Island to the Hon. the East India Company. Hence it came into possession of England. Colonel Light was originally in the Royal Navy, which service he left to join the Duke of Wellington's Staff. He landed with him in the Peninsula, and remained upon his Staff until after Waterloo. After that he went back again to his old profession, the Navy, and commanded a line-of-battle ship for the Pasha of Egypt, which position he gave up to go out to Australia as Surveyor-General of South Australia, to found, or at least to try the experiment of founding, the colony upon Mr. Edward Gibbon Wakefield's plan of being self-supporting, which experiment his old commanding officer, the Duke of Wellington, expressed himself extremely anxious should be tried, and which has proved a most triumphant success, without costing England a single shilling.

A Straits Resident, in a letter to *The Times*, says —

Mr. Birch, the Colonial Secretary of the Straits Settlements, was ppointed Resident of Perak, and how matters have been going on since /e read in the opening speech of Sir Wm. Jervois, the newly-appointed lovernor of the Straits, delivered on the 7th of October :—

"In Perak . . . the relations between the adviser and the advised have been unsatisfactory from the very commencement. While ler Majesty's Government hold the chiefs responsible for keeping the ngagements entered into by them with the British Government, there s scarcely any one of those engagements referred to which has not een violated by them. The Resident's advice is disregarded, and he ust either passively look on while acts are committed which he dispproves but cannot control, or he must assume to himself a power hich is inconsistent with his position as adviser, thus practically aking upon himself the government of the State so far as the opposi- ion of rajahs and chiefs will permit him to do so. The result is emiently unsatisfactory to all concerned."

This is sadly commented upon by the news since received by telegram—the murder of the Resident and the civil war between Abdullah nd Ismail. The disturbance, however, is strictly confined to Perak. A erak chief, such as the Rajah Lela, may send requests, but can send o commands to Salangore. The Malay population is thinly scattered long the coast and the rivers, and can offer no such resistance as the tchinese have done to the Dutch. The moral which those who know he Straits draw from these troubles is this:—If the Malays cannot overn their own country we must do it for them. The interests held n it by British subjects are too extensive to be ignored.

There is no such person as the Rajah of Lilla. The Maharajah Lela s probably what is meant, and this is merely the title of one of the fficers of State in Perak. The States of Perak, Salangore, Kedah, nd Johore are totally independent of each other; the quarrels and ifficulties in which we have been forced to take part of late years are ifferent in each case, and there has been nothing as yet to lead us to ear that the unfortunate outbreak in Perak has extended beyond that ingdom.

Since the establishment of our settlements in the Straits of Malacca he inability to profit by the natural advantages of the rich country ing close to them has been a constant source of complaint to the ercantile community. Representations and entreaties for protection ave repeatedly been made to Indian and Colonial Governments, but, fearing the probability of being drawn into petty wars, they for many years turned a deaf ear, and, strictly enjoining a policy of non-interference on the Straits Governors, warned the merchants that they must venture into native territory at their own risk. What was wisely denied to the interest of a few traders was, however, forced upon us at last by the internal warfare and misgovernment of the Malayan kingdoms themselves. They might be left alone as long as they confined their quarrels to the limits of their own territory, but they are too close neighbours to our colony for this to be possible; and when the coast became unsafe, when trading vessels belonging to British subjects were seized and robbed, when the river communication with a friendly State was stopped by a score of freebooting rajahs, when the Penang house of the Mantri of Larut was blown up, and the large Chinese population was threatening to fight out Larut quarrels on our soil, it was about time to interfere for the sake of the peace of our own settlements.

The Government in the Malay States, though nominally in the hands of one Sovereign, is really divided between a number of chiefs. These, like the feudal barons of old, are independent masters of their own bit of territory; they levy their own taxes, and are perpetually encroaching on, and being encroached upon, by their neighbours. Each chief has a swarm of needy brothers, cousins, and followers, who consider themselves bound to be supported by him in dignified idleness, for to work is unfashionable, and to rob as ungentlemanlike a mode of living as it was among the Highlanders a century ago. It is easy to conceive in what degree such a class would appreciate the blessings of a common treasury and settled Government, the aims towards which our interference has tended. The ruling Sovereign may be well disposed towards us and anxious to improve his country, but his nobles do not consider themselves bound by his engagements, and he has no power to control them. Another fruitful cause of trouble in these States is the question of succession which is differently regulated in all. In one succession is hereditary, in another elective, in a third it goes to the nephew; but the rules are so vague that the death of a sovereign is usually the signal for a fight for succession.

So much for the Malay aristocracy to which I have given precedence, but the element in the Native States, which is of most importance and which connects our interests with them, is that of the Chinese population. The Chinese are the mainstay of the Straits Settlements. They come down in thousands yearly, and supply the labour market of the Colony. From this numbers go across to the Malay States to work the tin mines, and settle into different trades, which they find as profitable in the fancy prices which a country rich in minerals alone can afford to pay for produce. It is curious to find in a wild Malay State the gardeners, carpenters, goldsmiths, &c., all Chinese. The tin mines are, in fact, worked by the capital of Chinese merchants settled in the Colony, who send their labourers from there, and who make the prosperity of the Malay kingdom as they do of our settlements.

In Perak (to give it its right pronunciation) there has been a complication of quarrels. Its Northern province, Larut, adjoining Province Wellesley, was governed by the Mantri (minister) of Perak—an officer sixth in rank of the fourteen chiefs who govern that unlucky kingdom. Larut was rich in tin, and the Mantri gave a concession to work its mines to a rich Penang Chinaman. Not able to resist the temptation of immediate profit, however, he sold the mines again to a second applicant, and soon had two rival clans of Chinese settled, or rather fighting tooth and nail, on his territory. The Mantri wished to make himself independent, and set up Larut as a separate kingdom, and his refusal to pay tribute to Perak brought about a quarrel between him and the Sultan. This was further complicated by the quarrel for succession on the death of the Sultan. It is said to be necessary, according to Malay customs, that on the death of a Sovereign his successor should be present at the funeral ceremonies. On the death of Sultan Ali, of Perak, accordingly, the heir whom he had recognised in his lifetime, Rajah Abdullah, was summoned to attend. Whether he feared treachery among the chiefs or had not proper notice does not appear clearly. At any rate, he failed to appear, and, it being necessary that the body should be buried the chief next in rank, Rajah Ismail, was elected, and performed the funeral obsequies. Abdullah contended for his rights; half the chiefs sided with him and half with Ismail. The Mantri backed Ismail to try and gain his object of an independent sovereignty, and each took a side with the Chinese miners of Larut to gain their important support.

The effects of our non-interference policy were now somewhat amusingly illustrated. Help or permission to buy arms and ammunition was strictly denied to the Malays, but the Chinese fitted up their war-boats in our harbours, sent provisions and reinforcements from Penang, and even brought their wounded to our hospitals. At last, as I mentioned already, a house in Penang belonging to the Mantri of Larut was blown up, and it was seriously feared that the quarrel would be fought out in Penang.

Such was the state of things when Sir Andrew Clarke arrived as Governor in the Straits in November, 1873. He at once seized the situation and the remedy. He went to Perak, summoned a Council of chiefs, and throwing the weight of his influence into the scale of Rajah Abdullah, induced them to accept him as their Sultan. The Mantri was allowed to retain Larut as a Governorship, and an agreement was signed by which all revenue was to be collected for the Sultan of Perak. A specific charge on it was to be made for the salaries of the chiefs, and British Residents were to be placed in Perak and Larut to "advise" on the Government of the country. Most of the chiefs agreed to this arrangement, and signed it. They would not have considered it civil to refuse what an English Governor asked them; but as soon as his back was turned they reverted to the old state of things. Rajah Ismail retired to the jungle, accompanied by several chiefs, and carrying with him the regalia. Polite requests were made to him from time to time to give it up, but when he declined no attempt was made to enforce our demand or to show the Malays we must be obeyed—a fatal mistake. Sufficient importance was not attached to the defection of the discontented chiefs, and it is evident that this discontent and rebellion has gained strength with time.

THE PRIME MINISTER ON CHINA.

At the banquet which was given at the Guildhall on the evening of Lord Mayor's Day Mr. Disraeli spoke as follows on the subject of our relations with China :—

Had it fallen to my lot only a month ago to have returned thanks I should, perhaps, have had to announce a war between this country and one, friendly relations with which it is the interest and wish of the citizens of London especially to maintain and cherish. A war with China, which was then impending, would have been a war with a country with which of all others England would not be placed in collision. We have no wish to invade or appropriate their territory. Although I cannot but believe that any military proceedings on our part with them must be certain of success, the result, though successful, would scarcely be triumphant. Besides, it is our interest to strengthen the centralised Government which seemed to be prepared to make war upon us, and which always becomes more feeble when war is waged by them. Fortunately, that evil has been averted. The good sense of the Chinese Government, and in a great degree the energy and resource of Her Majesty's Minister in that country, have, I believe, prevented that evil, and I think we may fairly count now upon that calamity not occurring. For myself, I have always been of opinion that the longer peace was maintained with China the greater was the chance of that peace being permanent, because the more the people are enriched by commercial communications with Europe the more contented and less troublesome they become to that Central Government which it is our wish and interest to strengthen. I have referred to the labours, the successful labours, of Mr. Wade, Her Majesty's Minister in China; because we are too apt to forget when men are toiling thousands and tens of thousands of miles from their native country in the public interest, how keen is the appreciation, on their part, of any sympathy which may be expressed for them by the country they represent; and I cannot but believe at this moment, when Mr. Wade, at Peking, hears that on the Lord Mayor's day there was such an expression of sympathy in this assembly of his fellow-countrymen with his labours and his position, he will experience a reward which perhaps no honours can rival, and certainly few can exceed.

The Times, on the subject of Mr. Disraeli's remarks, writes as follows :—

Mr. Disraeli performed his task (at the Lord Mayor's banquet very satisfactorily. His topics were well chosen, and his statements) were reassuring. Last year he told his audience that to pretend that there was no cause for anxiety in the state of affairs on the Continent would be to trifle with any body of intelligent men, and he declared that Her Majesty's Government would spare no efforts to preserve for Europe the inestimable blessings of peace. For language of this kind, disquieting even when accompanied with the most hopeful anticipations, there is no need this year. For the time, at least, there is a lull. Mr. Disraeli is able to contemplate foreign affairs as more immediately associated with British interests, and he begins by carrying his hearers to the most distant regions of Asia. He congratulates them that a war with China has been avoided by the energy and resource of the Queen's representative in that country, and by the good sense—that is, we must suppose, the prudence—of the Chinese Government. If it had been his duty to speak a month ago, he might have had to announce a war with China, but that danger is at an end. This declaration will be very satisfactory to the public. Our concerns with the vast and still almost unknown Empire of China are of more real importance to the British Empire than Continental disputes about a province or a river. Our ships hover on every point of the Chinese coast; our merchants peer with eager curiosity into the interior, and every one acquainted with those regions is possessed by the conviction that there the next generation, if not the present, will witness one of the greatest revolutions of humanity. What is to be our policy in presence of an immense political mass concerning which the most discordant predictions are hazarded, one man thinking that its parts may be welded together by an energetic Ruler into a Power formidable to all Asia, another holding that disruption is inevitable? The prevailing opinion in this country is that, whatever forces are at work in China should be permitted to have their play without interference from us, since we are really ignorant of their nature and have no capacity to direct them. Now, war with China must mean the acquisition of territory and the assumption of immediate political power. The experience of former wars and their results show that the mere infliction of punishment will make no essential change in the demeanour of the Chinese and in our relations with them. We may capture fortresses, we may sack a palace, we may levy contributions, we may exact an indemnity; but as soon as we withdraw, the Chinese will hedge themselves in with almost the same exclusiveness, and return after a short interval to the old provocations. They do not need any further proof of the superiority of Europeans in arms. They recognise it, and the recognition is now the dominant influence on their policy. A new war would be looked upon as futile if at the close we returned to our former limits, and took no guarantees for the future submissiveness of Government and people. What this would lead to in the end need not be dwelt upon. We should have, with or without allies, to take upon ourselves the tutelage of the most populous Empire in the world. It is better, therefore, to avoid as long as possible the use of force, which would lead to the assumption of unlimited responsibility, and to hope that peaceful influences will gradually remove the difficulties which now beset our dealings with the Chinese race.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Nov. 10

The First Chamber has voted the several Bills which were laid before the members. The Railway Bill was carried by a majority of thirty-two against two, after a very short debate, whereupon the Chamber took recess. At the same time Parliamentary business was opened again by the Second Chamber, when Mr. Van Heemstra, who has been elected M.P. for the district of Haarlemmermeer, took his seat. The public debate upon the East India Budget will begin on Thursday, but the discussions will be, it is said, very quiet, except upon some cardinal points. The task of the Ministers of the Home and Financial Departments in defending their respective Budgets will be more difficult. The section report is as sharp and critical as possible, and the struggle will be a hot one. It is thus anything but improbable that we may be involved before the end of the year in a Parliamentary or Ministerial crisis. Several Liberal papers condemn these party-manœuvres, and protest against endeavours to overthrow the Ministry without any plausible reason for it. This policy of the "Rotterdam Coterie" is the less justifiable, because the Liberals are not backed by a sufficient majority to assume the reins of Government with any chance of success.

The topic of the day in our literary and colonial circles is the fact that Mr. Funke has published the fourth edition of Multatuli's "Max Havelaar, or the Coffee Auctions of the Dutch Trading Company"—a book that fifteen years ago struck the whole country with horror, as Baron Van Hoewell stated in the Second Chamber. The new edition is highly remarkable, because a mass of notes and elucidations are added to it, most of which are of a very startling character. A few days ago a translation of the first edition was published in Berlin, which is a horrible piece of literary work. That the translator, a certain Mr. Stromer, does not understand the Dutch language is certain, and that he was even destitute of a good dictionary is probable. Whole pages remain untranslated, and in others the most ridiculous mistakes are made. "Max Havelaar oder die Hollander auf Java" is a mere parody of a book which does our national literature the greatest credit.

On the 3rd inst. our Queen was suddenly attacked by a marsh fever of so violent a character that a second attack would have placed her life at once in danger. Happily only a partial relapse occurred, and Her Majesty is now much better, although her condition is still critical. The King, who was at *Het Loo*, returned express to the Hague, whilst the Prince of Orange came back from Paris. The voyage of Prince Alexander has, of course, been delayed. A bulletin is published daily by the *Staatscourant*.

The Minister of the Colonial Department announce that no open competition for the manufacture of the rails of the Sourabaya Passaeroean Malang line was necessary, because the well-known Krüpp of Essen offered to deliver them at his own risk in Java at a very advantageous price, whilst he would guarantee their good quality. This secret contract is disapproved both by the Chamber and by the press.

I regret to record the death of Mr. J. B. van Son, ex-Minister. He died at Blois le Duc, at the age of seventy-one. His demise is a great loss to the Ultramontane Party, of which he was an eminent leader. Mr. J. Fransen Van de Putte, member of the First Chamber, is very seriously ill, and there seems to be a very small chance of his recovery.

The greatest quietude prevails in our market for Colonial Produce, but the auctions, however, continue satisfactory. Second hands being badly provided a revival of trade is probable. The prices of most articles remain unaltered. Some demand has prevailed for Raw Sugar, and October prices are fully maintained.

According to a statement of the Minister of the Colonial Department, given in the to-day's sitting of the First Chamber, the net receipts of the coffee sold here during the current year will be f.6,000,000 more than the valuation in the Budget.

BIRTHS, MARRIAGES, AND DEATHS

BIRTHS.

BOONE—On the 13th Sept., at Shanghai, the wife of the Rev. Wm. J. Boone, of a son.

CAIRNS—On the 12th Sept., at Hong Kong, the wife of R. H. Cairns, of a daughter.

FERRIES—On the 11th Nov., at Canton Villa, Forres, N.B., the wife of Capt. I. S. Ferries, str. *Zealandia*, of a son.

HAGEDORN—On the 28th Sept., at Singapore, the wife of Egmont Hagedorn, of a son

JONES—On the 10th Nov., at 14 Belgrave-terrace, Lee, S.E., the wife of E. Duffield Jones, M.A., late of H.M.'s Consular Service in China, of a daughter

RICKARD—On the 29th Oct., at Hong Kong, the wife of G. P. Rickard, Royal Naval Yard, of a son.

VOGEL—On the 27th Sept., at Macao, Mrs. E. Vogel, of a son.

MARRIAGES.

ALABASTER—MACGOWAN.—On the 15th Sept., at the Cathedral, Shanghai, by the Right Rev. Bishop Russell, assisted by the Very Rev. Dean Butcher, Chaloner Alabaster, H.B.M. Consul at Taiwan, to Laura Abbie, daughter of D. J. Macgowan, M.D., of New York and Shanghai.

DEATHS.

HEAD—On the 2nd Nov., at 2, Church-road, St. Leonards-on Sea, Jane Elizabeth, widow of the late Lieut.-Colonel Charles Franklin Head, aged 67 years.

STEWART—On the 4th Nov., at 14, Sussex-gardens, Hyde-park, Algernon Stewart late of the Ceylon Civil Service, aged 64.

LONDON: MONDAY, NOV. 15, 1875.

THE ASSASSINATION OF THE BRITISH RESIDENT AT PERAK.

It will be within our readers' remembrance that for some years, under Governor ORD'S misguiding leadership, we openly supported the Mantri of LARUT in his attempts to establish his independence against the Sultan of PERAK. Subsequently we found out—to quote official documents—"that the Mantri is undoubtedly lowest in rank of the "four principal officers of the Perak Government, and "has assumed in Perak a position of independence which "his office and rank do not justify;" so that finally we had, in our late convention, to restore the present Rajah to supremacy, relegating the Mantri to a subordinate jurisdiction. First we allowed arms to be supplied to one side, and then we turned round and aided the other. Neither Rajah nor Mantri can ever have entertained any real friendship for a predominant foreign race; and as by our own error we contrived to affront both, we shall not have to travel far in search of motives which *may* have—we do not say which *have*—brought about the tragic end of our unprotected representative. If the Malay tribes are really getting riotous; if they are indeed working up their easily excitable blood, and preparing for a foolish, hopeless, and deplorable struggle against British interference, two very serious and instructive reflections are forced upon us.

The murder of a British official by a Malay kris is no common occurrence. Passionate, violent, and revengeful as the race undoubtedly are, it is still true that to find a precedent for a tragic incident of this sort we must go back more than fifty years. Half a century ago, when our power and authority in the Straits were not nearly so consolidated as now, the British representative at Bencoolen was similarly assassinated; and we much fear that the present outrage would not have been attempted, and Mr. BIRCH might still have been alive, had we but acted more promptly in the matter of Mr. MARGARY'S death, instead of allowing his blood to be still practically unavenged, and thus leading other native races to believe—for notions of this kind very readily pass from mouth to mouth—that by cutting down a British officer they will get rid of their difficulties without fear of retribution. Again, how comes it that the Malays of the Peninsula are thus fingering their krises, and on the itch for a struggle? Why is the fever for war seemingly so rife? Plainly the long-lingering hostilities in Sumatra have produced their natural consequences; a native Potentate is there seen for years holding his own against the hitherto invincible Whites; the sympathies, the hostile feelings, and the warlike instincts of the tribes on the mainland have therefore all been aroused, and can with difficulty be held in check.

Our Government should have foreseen these things, or, at least, should have discovered the mischievous influences at work; and the conclusion they would have properly drawn would be that we ought to press the Dutch to make speed to bring their campaigns to a conclusion, so as to restore peace and order to the districts which, by a not very defensible treaty, we made over to their rule. We have repeatedly urged the necessity of the case, and begged the intervention of our Government as the wisest course to pursue. It must also be remembered that though we approved of the policy pursued by Sir ANDREW CLARKE towards those Malay Rajahs who were directly in treaty with the Straits Government, something more has lately been done with which we are by no means so content. Before the newly organised States have yet had time to put their affairs in order, before—as events now prove—we have finished our work in Perak, Larut, and Salangore, we see the Governor of Singapore interfering in the affairs of Tringanu—a province entirely under Siamese control—and thus unnecessarily sadling himself with a fresh complication, spreading uneasiness among the native populations instead of allaying it, and trying his new experience in places where it is certain not to be useful. before he yet knows whether what we have been doing in Perak and elsewhere is going to turn out good or ill. We believe that, all circumstances considered, Sir ANDREW CLARKE'S experiment—the scheme which leaves the Rajahs a very considerable share of independence within their own dominions, conceding them full power over all matters affecting religion and Malay custom, while it enables us to control their general administration and supervise their finance through a Resident Political Agent—was the best one that could be adopted; and it has yet to be proved that this plan will miscarry. Nevertheless there are men who ought to know, who have been saying for some time back that the Malay Straits are in a great mess, and that the policy of appointing Residents has turned out a failure.

If this view be correct it is to be regretted, for in the face of the outrage on our official we cannot go back; we must go forward. And the only step forward which is still left for us to take is annexation. No one will ever accuse us of having cried up annexation; if trade can be peacefully conducted; if there are no pirates; if life and property are safe, all that British commerce requires can be obtained without robbing natives of their territory or burdening our Government with fresh duties and additional expense; but what can we do with these hopeless Malay Principalities? We must either make them over to the tender mercies of rival chieftains and turbulent Chinese; or if we cannot keep them in order by means of political agencies, we have nothing for it but to take their territories completely under our control on such terms as may be fair to all the hereditary ruling families.

By a special telegram from Penang to *The Times* it is stated that Mohammedan fanaticism is mixed up with the outbreak. This is an unpleasant aspect, but we are inclined to think that the telegram gives an exaggerated and excited view of the whole matter; indeed, some items, such as that about the "Rajah of Lilla," are simple nonsense. We must condemn the expedition in which Captain INNES lost his life as premature and abortive. It was of the last importance not to be defeated in our first raid on the enemy. The action of Governor JERVOIS in asking for reinforcements is approved by those who know the position of affairs in the Straits; but it is hoped that the use of them will be confined to the vicinity of the outrage, and for this purpose it is believed that the forces reported to be proceeding from Hong Kong and Calcutta are far in excess of the requirements. According to a telegram from Calcutta, dated yesterday, it appears, however, that the troops have not actually started, and we judge that Governor JERVOIS will countermand them, as it is clear that no general rising of the Malays need be feared, though it looked like it in the early stage of the affair.

THE PACIFIC MAIL COMPANY.

AFTER a long course of mismanagement and chicanery, the Pacific Mail Company at last shows signs of being placed under satisfactory management. Mr. G. S. SCOTT, the Vice-President, is now in Europe, and it may be assumed that the object of his visit is to place the agencies and connections upon a proper footing. As an instance of the policy which is being taken up by the new board of directors, we may mention that an end has been entirely put to a very costly opposition on one of the Company's lines. Arrangements have been made for the transfer of the Pacific Mail Company's vessels on the Yokohama and Shanghai line to the Japanese Company. We have always been of opinion that the Company's legitimate field was on the main line between San Francisco, Yoko-

Digitized by Google

hama, and Hong Kong, and that any line supported by them, to act as feeders to their vessels, would certainly, considering the enormous number of local vessels employed on the China and Japan coasts, have very little chance of working with profitable results.

We understand that the following details of the Company's fleet, taken at a recent date, may be relied upon. The vessels on the Japan line, which, as above mentioned, have been sold to the Japanese, consisted of four wooden side-wheel steamers, the *Nevada*, *Golden Age*, *Oregonian*, and *Costa Rica*, old boats, which were run last year at a loss to the Company. The Japanese Company, which receives a subsidy from Government, will run steamers in connection with the Pacific Mail line from San Francisco to Japan, on equitable terms. The price obtained by the Pacific Mail Company for these steamers is 700,000 Mexican silver dollars, which will realise in American currency about $800,000. The fleet in its present enlarged and reorganised state consists of twenty-seven vessels, with an aggregate measurement of 71,451 tons, as follows :—*City of Peking*, 5,079 tons ; *City of Tokio*, 5,079 tons ; *City of San Francisco* (new), about 3,500 tons ; *City of New York* (new), about 3,500 tons ; *City of Sydney* (new), about 3,500 tons ; *Colima*, 2,905 tons ; *Acapulco*, 2,572 tons ; *Granada*, 2,685 tons ; *Colon*, 2,714 tons ; *City of Panama*, 1,490 tons ; *Great Republic*, 3,831 tons ; *China*, 3,836 tons ; *Colorado*, 3,727 tons ; *Alaska*, 4,510 tons ; *Constitution*, 3,575 tons ; *Arizona*, 2,793 tons ; *Montana*, 2,676 tons ; *Henry Chauncey*, 2,656 tons ; *Costa Rica* (side-wheel), 1,917 tons ; *Costa Rica* (propeller), 1,457 tons ; *Dakota*, 2,135 tons ; *Golden Age*, 1,869 tons ; *Honduras*, 2,700 tons ; *Salvador*, 1,065 tons ; *Winchester*, 730 tons. In addition to these the Company have British iron steamers under charter. The latest additions, namely, the *City of San Francisco*, the *City of New York*, and the *City of Sydney*, are described in the New York *Nautical Gazette* as vessels of the most magnificent build, being what is known as "three-deckers," with all the latest improvements. Their dimensions are, length 353 ft., and breadth of beam at widest 40ft. The frames are of iron, and each vessel has six water-tight bulk-heads. They were built expressly for the Company on the Delaware by JOHN ROACH, and under the special inspection of Bureau Veritas, and are classed in the first division of that registry.

A postal contract has been entered into by the Pacific Mail Company for the conveyance of the English mails between San Francisco and New South Wales and New Zealand for a period of eight years from the present time ; and the vessels for this line, which are of 3,000 to 5,000 tons register, have been built expressly for the route, are of great strength and power, and have passenger accommodation of the highest character. The Company also run a line of steamers every ten days to Victoria, British Columbia, for which they receive a subsidy from the Government for carrying the mails.

The accounts of the Company were taken in hand by Mr. SCOTT upon his assuming office, and he at once set about systematising the Department so as to arrive at the monthly earnings and exponses, the result being the publication of a statement showing the figures for the months of July and August, 1875, which were—

	July, 1875.	August, 1875.
Gross earnings	$485,308.82	$516,912.17
Total expenses	396,014.74	373,674.94
Net earnings	$89,294.08	$143,237.23

The total net earnings for two months are $232,531.31, an increase of $147,299.94 over the corresponding months of 1874 ; while a statement of the general financial results of the Company's business since March, 1875, shows a net reduction of the liabilities from that date to the end of September of $1,467,234, so that the position and credit of the Company have steadily and materially improved under its new management. It may be hoped, therefore, that the Pacific Mail Steam Company have now completely got over the troubles which they have so long had to contend against; and that they have before them a future of success well merited by the original enterprise they showed in establishing the line, and the energy which has of late been displayed in overcoming difficulties such as would certainly have been sufficient to baffle any ordinary men of business.

AFTER a protracted delay the award on the "Opium Essays" has been announced. The committee of examination consisted of Sir C. E. TREVELYAN, Sir BARTLE FRERE, and Sir LOUIS MALLET. The first prize is £200, and the second £100, and the donor is Mr. EDWARD PEASE, of Darlington, who invited the competition with a view to elucidate and expound what is known as the Opium trade, and the connection of our Government with the same. Mr. PEASE is an active member of the Anti-Opium Society, which we have frequently noticed, and it was chiefly through the medium of the Society that the Opium debate was introduced into the House of Commons last June. On that occasion Mr. J. W. PEASE, M.P., most ably expounded the subject. The first prize has been awarded to Mr. SPROAT, Agent-General for British Columbia, and the second to the Rev. F. S. TURNER, Secretary of the Anglo-Oriental Society for the Suppression of the Opium Trade.

WE understand that, at the recommendation of the Premier and Secretary of State for Foreign Affairs, the QUEEN has been pleased to bestow on Mr. WADE, our Minister at Peking, the dignity of Knight Commander of the Order of the Bath. It is our lot to differ from the course pursued by Mr. WADE as the representative of British interests in China, but we most heartily congratulate him on the honour bestowed on him. It is a fitting tribute to his ability and services.

WE hear that the long-pending disputes between the Home and Indian Governments in regard to the cost of the last China War are to be taken in hand and concluded by a Committee representing the various departments. We believe that Mr. RAVEN, the senior clerk at Greenwich College, will represent the Admiralty, and Mr. KNOX the War Department.

Naval and Military.

In the present position of affairs in the Malay States it will be of interest to state that the military force now stationed at Singapore consists of the 1st battalion 10th Regiment 500 strong, and a detachment of artillery, No. 9 battery 2nd brigade (120 gunners and 4 officers). It is telegraphed that reinforcements have been sent for by the Governor of the Straits Settlements from Hong Kong and Calcutta. These will amount in all to about 1,500 men, and it is announced that Major-General Colborne will accompany the 80th Regiment from Hong Kong.

Volunteers from the infantry regiments at Aldershot, including ninety-four men of all ranks, with five women and four children, to the 28th Regiment, which is under orders to proceed from Malta to China, will go to Portsmouth on the 18th inst., and embark for Malta to join head-quarters.

Captain T. St. C. Smith, 49th Regiment, has been selected to succeed Captain Brooke, 15th Regiment, as Brigade-Major at Hong Kong. Captain Smith joined the army December 19, 1862 ; became lieutenant July 4, 1865, and captain April 7, 1875. He passed from the Staff College in December, 1872, and was afterwards adjutant of his regiment.

Some misconception has arisen in the papers here with reference to the death of Captain Innes in the attack on the stockade at Perak. The telegrams not being clear on the subject, it was assumed that he was an officer in the 10th Regiment; but as our readers will of course be aware, Captain Innes was for some time Assistant Colonial Engineer, and we presume he was sent up on the special emergency. In a letter to *The Times* on the subject Sir Harry Ord, the late Governor, says :—

Captain Innes held the appointment of Assistant to the Colonial Engineer of the Straits Settlements, and had been for some time employed in the superintendence of civil works at Penang. His position and duties entirely exonerated him from the necessity of taking part in any military operations; but it is probable that, knowing, as he would, the importance of immediate activity, and seeing the smallness of the force available for the purpose, he thought it right, as he did under somewhat similar circumstances in 1873, to place his military experience and services at the disposal of the authorities, and, having relieved the Residency, he lost his life in the attack on the stockade on the following day. In him the Service and the Straits Government have lost an officer of great intelligence, ability, and zeal, combined with sound judgment, and the Royal Engineers one of their corps whose past career gave high promise for the future.

Another correspondent, signing himself "In Memoriam," concludes with a well-merited tribute to Captain Innes' memory, as follows :—

This occasion is an appropriate one to note that, although unworthy exclusiveness has hitherto succeeded in virtually depriving the branch

Digitized by Google

of the profession to which it was his pride to belong of all hope of occupying those higher posts of military command which are the legitimate objects of every soldier's ambition, and has even recently procured the exclusion from any claim to staff employment of those Engineer officers who have passed the Staff College, they yet are ever ready to take the foremost place in the post of duty and danger, and are not excluded from the privilege of sacrificing their lives for their country.

The *Army and Navy Gazette*, on the subject of the recall of Assistant-Controller Malony from Hong Kong, says :—

Without entering fully into the circumstances, it appears that certain orders given by the general officer commanding were demurred to by the Controller, and it was only by rigorous measures the General was enabled to have instructions carried out at such a distance from the War-office. The Control Regulations enable the Control Department to put their own construction upon these regulations, and which has in this case tended to put the authority of the officer commanding at defiance. When the Control Department was formed it was feared that collision must ensue—the entrusting of so much authority to the Civil Department of the Army, as represented by the War-office under the name of Control—and although the Department ran its course, the predictions have been fulfilled. The War-office, by the prompt recall of the Controller from Hong Kong, must have been fully cognisant that the Service could not be carried on if their orders were to be in opposition to the authority of the general officer in command of the troops. The appointment of Controller at Hong Kong is a very lucrative one, and the sudden withdrawal of that officer is doubtless a hardship, but discipline must be considered before everything.

The correspondent of *The Times* at Hong Kong writes :—

Her Majesty's ships of war in harbour are the Modeste, Ringdove, Midge, and Lapwing. Commodore Parish returned from three months' leave of absence on the 22nd of September, and hoisted his flag on board the Victor Emmanuel. Her Majesty's ship Lapwing arrived from Singapore on the 19th of September. On the receipt of the news of the wreck of the Peninsular and Oriental Company's steamer Sunda off Turnabout, on her way to Japan, the Company's agent applied to the naval authorities for a diver to proceed to the wreck. The application was at once granted, and a warrant officer with an experienced diver proceeded to Station Island in the Peninsular and Oriental Company's steamer Bombay, on the 21st of September. As soon as the news of the wreck was known at Foochow Her Majesty's ship Hornet at once went to guard the Sunda, but, previous to her arrival, pirates had stripped the steamer of the whole of the cabin fittings and furniture. The Hornet remained at Station Island on the 20th of September. Assistant-Controller Maloney, late in charge of the Control Department, proceeds by mail steamer to-day to Southampton. Official intimation has been received that the 80th Regiment, stationed here, will proceed to Singapore in February next, on being relieved by the 28th Regiment, now at Malta Quartermaster Hyde, 1st Battalion 10th Regiment, at Singapore, has an extension of leave from the 1st of January next until the arrival of the battalion at Gibraltar. Lieut. W. Sheppard, R.A., having completed his examination for promotion, has been granted two months' leave to the 25th of November, 1875. The United States gunboat Ashuelot left for the north on a cruise on the 23rd. The Spanish transport Marques de la Victoria, 2 guns, arrived from Manila on the 24th of September.

The correspondent also writes under date October 2 :—

The Ringdove went to Canton on the 28th of September. The Lapwing was sent into the dock of the Hong Kong and Whampoa Dock Company on the 29th of September, and returned to her moorings on the 1st of October. She is to undergo a thorough refit by the naval yard authorities. The Ocean Steamship Company's steamer Orestes sailed for London on the 30th September, after having embarked sixteen time-expired men of Her Majesty's 80th Regiment, including four prisoners from the same regiment. The Spanish transport Marques de la Victoria went into dock on the 27th September; remains here refitting.

In accordance with instructions from the Horse Guards received at Aldershot Thursday, reinforcements of all ranks of the 1st battalions of the 6th and 9th Foot are held in readiness to proceed, *viâ* Suez Canal, to join the service companies of their battalions in India.

The Avon gunboat, which has seen much service in Chinese waters, was placed under the shears in the ship basin at Portsmouth on Friday in order to have her engines and boilers lifted. She is in a very dilapidated condition, and will require new boilers and a thorough overhaul.

Miscellaneous.

THE TRAGEDY ON BOARD THE "QUEEN OF ENGLAND."

The following has been received at Lloyd's, from Hong Kong :—

"P. Dethleffson, master of the Siamese ship *Queen of England*, reports :—Left Hong Kong August 8, bound for Bangkok ; had a continuation of S.W. monsoons, and was beaten down to lat. 10 N., long. 113 E. At two A.M., Aug. 9, when on the poop on watch, a seaman named Noan came up, I thought for a lamp, but he seized a belaying pin and attempted to strike me. I caught hold of him, and grasped a knife in his hand, cutting my arm. The man then jumped on to the main deck. I cried out for the mate, but he gave no answer, so I went down, but stopped at the wheelhouse, where I found the helm deserted. I then went below, and found the chief mate with his throat cut, and his head nearly severed from his body. I reprimanded the man for leaving the wheel, and asked his reason for so doing. The man replied that Noan had threatened to kill him, therefore he left the helm, and fell down on the deck, pretending to be dead. Seeing the state of affairs I went to the cabin, procured my revolver, and returned to the main deck. The night was very dark and squally, and I could not see the murderer. Through loss of blood I became insensible, and fell on deck. In falling the revolver went off, passing through the forefinger of my left hand. I remained insensible till daylight. When I recovered I asked a Chinaman to get me some water, which he did. I then called for the serang, and asked him where the man who had attempted to murder me was. He answered that the man was aft, that he had thrown the compasses, chronometers, charts, instruments, clothing, lamps, &c., overboard. He had also broken and was still breaking up the furniture in the cabin with a handspike. I asked the serang why, if there was only one man mutinous, the crew did not seize him, and they immediately got different implements and attempted to secure the murderer, who, upon seeing them coming towards him, jumped overboard from near the wheelhouse. The Chinese supercargo received a cut on the right side of the head from Noan, who was not seen again after he leaped into the sea. The charts, chronometers, &c., being lost, and the ship having been without a helmsman for some time, her position was not known; but, after making several observations, we ultimately succeeded in making for Lyeemoon Pass, and anchored inside Green Island at seven P.M. on the 26th of September. The man Noan was suffering from a disease known amongst the Malays and Siamese as gillah or amocque. It takes the form of ringworm, and is attended in every case by madness of more or less severity.

A LETTER from St. Petersburg says that a courier from Japan has arrived there with the news that the treaty for the cession to Russia of the island of Saghalien, in exchange for the Kurile islands, has been signed at Yedo by the Russian and Japanese Plenipotentiaries. Immediately after the ratification of the treaty, a Russo-Japanese Commission proceeded to Saghalien on board the Russian ship-of-war *Wsadnik*, and another to the Kurile islands on board the Japanese steamer *Hokio-Matchi*, in order to place the two States in possession of their new territories. The Russian diplomatists and naval officers had an audience on the occasion of the Mikado and his young wife, and the head of the Russian Commission was presented with their portraits. Russia will convert her new possession into a great naval station, and make penal settlements in the interior which are to take the place of those now in Siberia; while Japan, by the acquisition of the Kurile islands, rounds off her territory on the north and obtains in the rich fisheries of the neighbouring waters an inexhaustible supply of the chief article of food consumed by her population.

MESSRS. ELKINGTON, the eminent silversmiths, have on view at their establishment in Moorgate-street, a magnificent Hunting Knife, formerly the property of the King of Portugal. This wonderful production is by Raphael Tez, who was eleven years engaged on the work. The sheath which is of solid silver is magnificently carved—representing nearly every animal of the hunting-field, the grouping and execution of which is perfectly marvellous. As a work of art and for elaborate chasing it is perhaps unsurpassed. The price is £10,000. It will be remembered that it was recovered from the wreck of the steamer *Cadiz*, which foundered while on a voyage from Lisbon to London in May last.

A CORRESPONDENT of the *English Independent* calls attention to a very important proclamation issued by the Chinese authorities at Foochow warning the people that persecution of Christians is illegal. It bears the name of a man associated with the Viceroy and other mandarins of high rank, and is looked upon by the correspondent who notices it as of so much importance as to deserve the name of the Christian Charter. We observe that the first prizeman for the best essay on Christianity, offered by the committee of missionaries at Canton, is stated to be the preacher of the London Mission Chapel at Hong Kong.

RUSSIAN MISSIONS IN JAPAN.—The "Holy Synod" of Russia has ordered a general collection to be made throughout the empire in aid of the orthodox Greek missionary service in Japan. That service was founded in 1875, and comprises four priests, residing partly at Yeddo and partly at Hakodadi. There is a school in either place, the two being attended collectively by 110 children for general instruction and thirty adults for instruction in religion. A third school, with a hall for prayer attached, is about to be established at Sendai.

A ST. PETERSBURG telegram states that China has postponed the war against Kashgar, because of the continuance of serious disorders in several of the Western Provinces.

TWO Japanese students, says the *Allgemeine Zeitung*, have taken the degree of Doctor of Philosophy, *in signi cum laude*.

A RUSSIAN missionary in the province of Irkutsk has, it is stated, baptised four Chinese lamas.

Monetary and Commercial.

Telegrams from New York report that the late unsatisfactory condition of the Tea market is likely to cause the failure of houses engaged in the trade, but none of any importance are spoken of. From Manila a report comes of the stoppage of Messrs. Russell, Sturgis, and Co., an old-established American house, but not to be confounded with Messrs. Russell and Co., of China, whose interests are quite distinct.

The Hong Kong and Shanghai Bank have appointed a London committee of supervision to work in co-operation with the directors at Hong Kong. This arrangement was recommended by many shareholders as likely to be conducive to the Bank's interests. The committee consists of Mr. A. H. Phillpotts, director of the London and County Bank ; Mr. Albert Deacon, of Messrs. E. and A. Deacon, London ; Mr. E. F. Duncanson, of Messrs. T. A. Gibb and Co., London. We hear that Mr. Greig, the manager at Hong Kong, comes home on leave, and that Mr. Jackson, lately acting in London, takes charge there.

Digitized by Google

From the report of the Canton Insurance Company received by last mail we gather that the accounts for 1873-4, and up to the 25th April, 1875, stand as follows :—

1873.		
First dividend, $150 per share		$45,000
Second „ 14½ „		4,350
First return to contributors, 13.80 per cent. ...		90,000
Second „ „ 1.33 „ ...		8,700
		$148,050
Reserve fund		50,000
		$198,050
1874.		
To reserve		$25,000
First dividend		45,000
First return to contributors, 9 per cent.		60,000
Balance		47,967
1875—to 25th Sept.		
Premium		$597,520
Returns and reinsurances	$48,904	
Charges	9,337	
Commissions	36,723	
Losses	355,421	
		450,385
Balance		$147,135

The Bank of New Zealand has declared a dividend of 10 per cent. per annum and a bonus of 5s. per share for the half year ending 30th September last, being equal to 15 per cent. per annum on the paid-up capital.

The directors of the Otago and Southland Investment Company (Limited) announce that the accounts of the company for the half-year ending the 31st of July last have been duly audited, and the result enables them to declare the usual interim dividend at the rate of 10 per cent. per annum, free of income-tax.

The agents of the London Chartered Bank of Australia show the balance of profit and loss for the half year ending June 30 (including £9,657 brought forward) to amount to £48,917, from which it is proposed to pay a dividend of 4 per cent. on the paid-up capital for the half year free of income tax, carrying forward £8,917.

The Stock Exchange Committee have allowed the scrip and bonds of the Six per Cent. Debentures (1875) of the Eastern Extension, Australasian, and China Telegraph Company (Limited) to be quoted in the official list.

The total quantity of tea delivered from the bonded warehouses in London during the week ended the 6th inst. was 3,366,689 lb., of which 2,202,433 lb. was for home consumption, 826,268 lb. was removed coastwise, 270,784 lb. was exported, 62,484 lb. was sent coastwise for exportation, and 4,720 lb. was for ships' stores. The duty received amounted to £55,061, which, when compared with that of the preceding week, exhibits an increase of about 2½ per cent.

Our readers will recollect the curious circumstances under which the French Brig *H. and L.*, of Nantes, put into Macao, in October last year, when the men on board her were taken into custody by the French Consul, on suspicion of having thrown the captain overboard. The men are now being tried at Brest, to which port they were taken, but the case is likely to last some days, on account of its being necessary to employ interpreters for all the witnesses.

In the Bankruptcy Court a sitting has been held for the passing of the public examination of Mr. E. M. De Bussche, who has been a large steam-ship owner. The debts and liabilities were about £160,000, a great portion of which were secured. It was understood that the unsecured debts were about £80,000, and the assets about £20,000. On behalf of the bankrupt a further adjournment was granted to carry out an arrangement with the debtors by which the case could be taken out of the Court.

The Court of Bankruptcy has confirmed the arrangement entered into by the creditors of Mr. W. J. Henley, telegraphic engineer and cable manufacturer, of Woolwich, by which a company is to be formed to take over the works, the creditors receiving preference shares for their debts at par, with the option of receiving 7s. 6d. in the pound by three annual payments.

The Swinging Saloon Steamer Company (Bessemer), which is now in course of liquidation, will not be able to make any return to its original shareholders, and there is no probability of a revival of the invention.

The liquidation of the estate of Robert Scheibler and Co., of London and Shanghai, who failed in 1873, is now closed, and a final dividend, making with the previous dividends 9s. 8d. and a fraction in the pound, is payable to-day at the offices of Messrs. Cooper Bros., and Co.

The amounts of Bar Silver to hand during the week have been sold at 56 15-16d. per oz. principally for Spain. The market is very quiet, and there is now no demand for India. Mexican Dollars have been placed at 55 7-16d. per oz., showing no alteration in price.

The submarine cable between Madras and Penang is interrupted.

THE BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month of October show, as far as the exports are concerned, the present contracted state of our foreign trade, the total for the month being £18,474,744, against £21,918,528 in October last year, or a decline of 15¾ per cent., and compared with the corresponding month in 1873 a decline of 17¼ per cent. The total for the first ten months of this year is 7¾ per cent. less than the same period in 1874. The large decrease in the export total is spread over all the chief articles, and not only has there been a diminution in value only, but the quantities, with one or two unimportant exceptions, exhibit a considerable decline. In textile fabrics cottons have fallen 10¾ in quantity and 13 per cent. in value ; jute stuffs, 39¼ per cent. in quantity and 44 per cent. in value ; linens, 4 per cent. in quantity and 6¾ per cent. in value ; woollen cloths, 10 per cent. in quantity and 17¼ per cent. in value ; and worsted stuffs 10¼ per cent. in quantity and 9¾ per cent. in value. Of coal the quantity exported has been 1,338,675 tons, valued at £847,291, against 1,399,389 tons, valued at £1,086,456 in October last year, equal to 4½ per cent. in quantity and 22 per cent. in value. Of iron and steel the quantity has diminished 20 per cent., and the value 32 per cent., and among other articles which show a decrease in their value totals the following are the most important, viz. :—Alkali, 26 per cent; beer, 30¾ per cent. ; cotton yarn, 11¼ per cent. ; haberdashery, 31 per cent. ; hardware, 13¾ per cent. ; machinery, 18¼ per cent. ; silk manufactures, 21¼ per cent. ; and woollen yarn, 23½ per cent. The only favourable changes have been in arms and ammunition, which have increased in value 31½ per cent. ; copper, 9¼ per cent. in quantity and 9½ per cent. in value; and seed oil, 20¼ per cent. in quantity and 10½ per cent. in value. The export account, taken as a whole, is one of the worst published for a long time, and fully bears out the anticipations formed after the Collie failures in July, that our shipping trade would show in the course of a few months the extent of the mischief done to legitimate commerce. For the ten months the totals are — £187,840,338, £202,859,436, and £216,016,759—in 1875, 1874, and 1873 respectively.

The import total shows a slight improvement, the value in October being $29,196,220, against £27,912,351 in the corresponding month last year, or 4½ per cent. more, but 7¾ per cent. less than in October, 1873. The total for the ten months is about ⅛ per cent. higher than that of the corresponding period in 1874, but 1 per cent. less than 1873. Of wheat the quantity imported has been 5,144,080 cwt., against 3,758,934 cwt. in October last year, or an increase of nearly 37 per cent., while the value shows an augmentation of 45½. Maize exhibits an important rise, viz., from 902,494 cwt. to 2,232,994 cwt.; but of other cereals and flour the supply has been less. Raw cotton has diminished from 668,893 cwt. to 605,828 cwt., or 9½ per cent., while the corresponding value has fallen 17 per cent. The total for the 10 months was £310,710,915, against £311,232,178 in 1874, and £307,322,729 in 1873.

The following is an extract from the figures which refer to our Export trade with China and the Far East :—

COTTON YARN.

To		1873.	1874.	1875.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Nov. 10, at Rotterdam, from Batavia, County of Sutherland (str.); at Liverpool, from Manila, Buenaventura (str.); 10, at Hamburg, from Rangoon, Gutenburg; from Sourabaya, Goodall; at London, from Colombo, Letty Gales; 11, off Dungeness, from Batavia, for Nieuwe Diep, Voorwaarts (str.); 12, at Falmouth, from Bassein, Sapphire; at Liverpool, from Akyab, Jorgen Bruhn, Affezione Seconda; at Queenstown, from Rangoon, Antonio Ferraro; 10, at St. Nazaire, from Reunion, Argus; Oct. 6, at Callao, from Yokohama, Abana; 15, at London, from Shanghai, Diomed (str).

DEPARTURES.—Nov. 9, from Glasgow, for Batavia, County of Forfar; 7, from Hamburg, for Shanghai, Altona (str.); 6. from Flensburg, for Rangoon, Doris Brodersen; 10, from Liverpool, Childers; 11, from Cardiff, G. F. Haendel; 9, from Amsterdam, for Padang, Gezusters; 12, from London, La Sofia; from Cardiff, for Yokohama, J.M.R.A.; 11, from Aberdeen, for Rangoon, Bay of Naples; 12, from Cardiff, for Yokohama, Trino; 11, from London, for Rangoon, Alpi; from Sunderland, for Singapore, Caldew, Charmer; from Liverpool, for Galle, Windsor; 15, from London, for Shanghai, Glengyle (str.).

SPOKEN.—Duke of Edinburgh, from New York to Japan, Oct. 1, 11 N., 27.20 W.

CASUALTIES.—The Jonge Jan, from Rotterdam, for Batavia, and the Marjory, of Arbroath, have been in collision in the Downs; both vessels sustained damage. Plymouth, Nov. 12.—The Cheops (str.), Dryden, from London for Shanghai, has put back with loss of bulwarks, stanchions, bridge smashed, and four boats damaged, having experienced heavy weather. Cardiff, Nov. 12.—The Alma, from this port for Hong Kong, has put back with loss of anchor, and other damage. Amsterdam, Nov. 11.—The Kennemerland, De Jong, arrived at Nieuwe Diep, from Batavia, reports having experienced very heavy weather off the Cape of Good Hope, durlng which she sustained some damage about the bow, and lost several sheets of copper. Very heavy weather was also encountered on the 6th and 7th Nov., and on the latter day the vessel, while in charge of a pilot, struck the ground near Kamperduin three times, so heavily that the deck seams, &c., were started. The vessel also shipped heavy seas. On sounding the pumps she was found to be making little or no water. St. Thomas, Nov. 10.—The J. A. Brown, from Batavia, for United States, has put in here with loss of jibboom, jib, and flying sails.

MISCELLANEOUS.—Gibraltar, Nov. 7, passed, Prins Hendrik (str.), from Nieuwe Diep, for Batavia; at Gibraltar, the Isabella Ridley; from Java, and cleared on Nov. 3, for Marseilles.—Aden, arrived Nov. 12, Teviot (str.), from Shanghai, for London.—Suez, Nov. 11, arrived, John Howard, from Batavia for Rotterdam.—Barbadoes, Oct. 24, the Frederick Keating, from Cardift for Manila, has arrived here from lat. 7.40 N., lon. 20.30 W.. with the crew in a state of mutiny.—Port Said, arrived, Nov. 13, Deucalion, from Liverpool, for Shanghai.—Suez, Nov. 13, arrived from Batavia, for Nieuwe Diep, Prins Van Orange.

ARTICLES OF IMPORT.

TEA.

The market has remained in an inactive state, dealers being well supplied, and are not buyers, except at some further concession in prices; and this they have obtained where Teas have been for absolute sale. The commercial difficulties in Russia, and the high cost of Teas sent there from China direct this season, have told their tale, and a regular breakdown has occurred which has more or less reacted on this market. The export from China to latest advices is about the same as last year, and it would seem the war rumours during September induced operations in China at advanced prices, and, it is quite likely, will tend to a full total supply in excess of last season. There is little encouragement, however, to ship the common kinds of Tea to this country, as there is now an over-supply, the consumption being more on good quality, bought at very low prices during July and August, owing to the injudicious action of one or two large importers. With increased imports of Canton Scented Caper, and not of desirable quality, prices are hardly so firm, though in comparison with those ruling three and four months ago the range on common is 1d. and 2d., and medium to fine quality 3d. per lb. advance. Green Tea (except, perhaps, Hyson for export) sells lower and lower, and must tire out even those sanguine importers who have so long been hoping for the favourable change.

The report of the Silk Association of America gives the following comparative tabular statement of Imports for the month of Oct.:—

	Oct., 1875.	Oct., 1874.
Silks	$885,181 ...	$755,862
Satins	3,086 ...	19,819
Crapes	35,603 ...	19,262
Pongees	— ...	—
Plushes	1,999 ...	11,167
Velvets	125,469 ...	131,439
Ribbons	179,612 ...	179,778
Laces	50,876 ...	54,464
Embroideries	— ...	—
Shawls	410 ...	—
Gloves	850 ...	—
Cravats	16,400 ...	10,969

Silk and Cotton... ...	134,643 ...	216,639
Silk and Linen	— ...	591
Total	$1,525,619	$1,544,317

CAMPHOR.—The market is inanimate, and there are no sales to report.

COCOANUT OIL has been steady, but transactions have been limited. Cochin is obtainable on the spot at £42 for fine, £41 to £41 10s. for good, and at £40 to £40 10s. for medium. Ceylon has changed hands at £39 for pipes, £39 5s. for puncheons, and at £39 10s. for hogsheads.

COIR GOODS.—At the public sales the following supplies were brought forward, viz., Yarn 895 bales 171 tons, and Fibre 200 bales 37 tons. There was a good demand for Yarn on the whole, but second-hand parcels went off slowly, prices were very irregular, varying from previous terms to a further advance of £2 per ton. Common Ceylon Fibre also sold rather dearer.

INDIARUBBER.—In auction 45 baskets 2 bags ordinary Java of old import sold (without reserve) at 8¾d. to 10¾d per lb.

SPICES.—*Nutmegs:* At the public sales 65 cases Penang went at rather easier rates for small shipping kinds; brown 110 to 112's at 2s. 10d.; 91's, 3s. 5d.; 82 to 78's, 3s. 8d.; 67's, 4s. 3d.; one case bold, 59's, at 4s. 6d. Some of the small sizes were bought in. Low and defective limed sold at 1s. 10d.; 31 boxes brown, badly sea-damaged, sold at 1s. 10d.; 2 cases bold brown Dutch, 86's, *realised 3s. 5d. Mace:* 20 cases Penang and 13 cases Batavia, by auction, were chiefly taken in above the previous value. A few lots of the former sold; good, rather bright, at 3s. 3d.; pickings, 1s. 2d. to 1s. 4d. per lb. *Cloves:* There have not been any public sales of Zanzibar; 84 bags Ambóyna were part sold at 1s. 7½d. per lb. for good quality. *Cinnamon:* The quarterly public sales will take place on the 29th inst.; they are expected to con-

Digitized by Google

tain about 3,000 bales; 242 bags chips by auction this week went at 4½d. to 4⅝d. for mixed of middling to fair quality; a few lots dust at 2d. to 2¼d.; 174 bags ordinary bark at 2⅝d. per lb.

SAGO.—In public sale 1,335 bags met a steady demand, and 1,000 bags sold, fine bright small pearl at 17s. to 17s. 6d., one lot 18s., fair ditto 16s. 9d., large at 16s. 6d., medium also at 16s. 6d. *Flour:* Of 1,141 bags Borneo 400 bags sold at 13s. to 13s. 6d.; the remainder bought in at 13s. 6d. to 14s.

TAPIOCA.—Of 2,062 bags Singapore 1,050 bags sold at steady prices, consisting chiefly of good white small at 2¼d. to 2¼d., bold Malacca kind at 2½d., medium ditto at 2d. Of 162 bags Penang 65 bags damaged sold at 2⅝d. for first-class. *Pearl Tapioca:* Of 1,069 bags offered 519 bags good medium sold at 18s. to 18s. 6d., being barely previous rates, the remainder small only partly sold at 20s.; privately 250 bags medium have been sold at 18s. 3d. *Flour:* 580 bags Singapore were bought in at 2¼d. to 2⅝d.; 380 bags fine white Alma Penang withdrawn.

TURMERIC.—Scarce, and wanted. Market very firm for all kinds; 100 bags sliced Java, of low quality, sold at 10s. 3d. to 10s. 6d. per cwt.

TIN.—The news of the disturbances in the Malay States has caused an advance in the price of Straits, which is now quoted £86, both on the spot and afloat. Banca stands at £91, showing no change, and Billiton at £85, being £20 per ton lower.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 28s To Singapore: 14s. To Batavia and Sourabaya: 20s. To Galle: 18s

CASUALTIES.

LIVERPOOL.—Nov. 5, the Sarpedon (str.), which left here yesterday for Shanghai, collided with the schooner James, which vessel sank; crew saved; the former proceeded, apparently uninjured.

PORT ELIZABETH.—Oct. 13, the Ceylon, from Zebu, for New York, has arrived here leaky; will have to discharge; extent of damage not yet ascertained.

BATAVIA.—Nov. 10, the Dutch mail steamer Willem Kroonprins der Nederlanden, from Singapore for this port, with London mails of Oct. 1, collided at entrance of Banca Straits with Dutch steamer Atjeh, and sank immediately; passengers and crew, except two, saved; latter vessel slightly damaged,—later, divers will be sent down to try and save all that is possible from the Willem Kroonprins der Nederlanden, but the salvage will be a very difficult operation, as it will be impossible to do anything except in fine weather. Arrangements have been made to salve ship and cargo at 50 per cent. value when recovered, after deducting expenses; salvers themselves will pay all charges and disbursements if nothing can be saved.—The Domenico Galliano, from Cardiff to Singapore, took fire at sea Oct. 17, and has put in here; extinguished the fire; must discharge; extent of damage not yet ascertained.

HONG KONG.—Nov. 9, the steamer Ocean, from Saigon, arrived here, encountered heavy gales, during which she had boats stove, and everything movable on deck washed overboard.

The Viking (str.) arrived here on the 8th inst. from London, encountered heavy gales after leaving Singapore, and lost boats; had sails split, wheel and steering gear damaged, and deckhouse stove.

AMOY.—Nov. 10, the Glengyle, coasting steamer, from Shanghai for Swatow, struck on a sunken rock in Three Chimneys Head Passage, Namoa Island, and foundered; master, third mate, and fourth engineer missing.

YOKOHAMA.—Sept. 19, the Wm. v. Name, arrived here from New York, reports having experienced heavy weather off the Cape of Good Hope, during which she split sails, had decks swept, water casks stove, and boats damaged.

MISCELLANEOUS.

HAVRE, NOV. 2.—The master (Rousseau) of the Bremontier, from Manila, for Falmouth, which vessel arrived at St. Helena Oct. 7, died at sea.

ROTTERDAM, NOV. 4.—The Torrington (str.), which grounded on the 2nd inst. near Maasluis, has arrived here uninjured.

GIBRALTAR, NOV. 5.—Arrived, Voorwaarts (str.), from Batavia, for Nieuwe Diep; 7, Galley of Lorne (str.), from Shanghai, for New York, and proceeded.

MALTA, NOV. 2.—Passed, Diomed (str.), from Shanghai, for London.

SUEZ, NOV. 7.—Arrived, Glenroy, from London, for Shanghai; 9 Cybele, from Shanghai, for London.

ST. HELENA.—Arrived, Oct. 14, Black Prince, from Foochow, for London; 16, Loyola, from Ilo Ilo, for Cadiz; Ugglan, from Akyab, for Antwerp; 18, Spotorno, from Rangoon, for Channel, f.o.; 19, Societa, for Havre; 20, Hougomont, from Penang, for London; 21, Maggie Douglas, from Zebu, for Falmouth.

PASSED.—Oct. 13, Blackadder, from Shanghai, for London; 14, Trio, from Maulmain, for Falmouth; 15, Quorn, from Rangoon, for Channel, f.o.; 17, N.K.C.F., from Samarang, for Amsterdam; 18, Black Prince, from Bassein, for Queenstown.

SAIGON.—Oct. 6, the Calabar (str.) arrived here on the 3rd inst. from Hong Kong; reports that owing to some defect in the feed pipes one of the boilers had run dry, and consequently gave out. After the accident steam was kept up in one boiler, and when off Cape St. James signalled for a tug, which brought the steamer in here. The repairs will cost about $3,000, and will be completed in about fourteen days.

SWATOW.—Nov. 11, the Sally, of Shanghai, will probably be a total loss at Cupchi Point.

FOOCHOW.—Sept. 28, about 200 bales of Manchester goods, probably all more or less sea damaged, have been salved from the Sunda (str.), and are being brought here.

THE NATIONAL SAFE DEPOSIT COMPANY (Limited).

1, Queen Victoria-street, Mansion House, London.
Capital, £500,000. Subscribed, £250,000.

DIRECTORS.

J. H. Pulleston, Esq., M.P., Chairman.
Lawford Acland, Esq., Chairman Ceylon Company.
George Arbuthnot, Esq., Chairman Oriental Bank Corporation.
George W. Barnett, Esq., Barnetts, Hoares, Hanburys, and Lloyd.
Horatio S. Coulson, Esq., Director United Discount Corporation.
Lord Wm. M. Hay, Director Eastern Telegraph Company.
Hugh F. Sandeman, Esq., Director Scottish Union Insurance Company.

The Company is now ready to let to approved applicants Safes in their Fire and Burglar-proof Vaults, at rents from £2 10s. to £30 per annum.

No insurance is necessary.

The main object of the Company is to provide the public with a perfectly secure, yet inexpensive repository for valuables of every description, and relieve them from the harassing and wearing strain occasioned by the personal care of such property. The Company take for safe custody all kinds of securities, valuable property, bonds, wills, marriage settlements, and other documents, and guarantee their value when required. Drawn bonds, coupons, &c., collected.

The Company undertake the duties of trustees, receivers, and executors, and act in other confidential capacities.

The Great Vault is superior to any building in the world intended for similar purposes. The utility of these Safes, which are entirely underground, is undeniable, as bankers are not responsible for deposit of valuables.

The loss of many kinds of securities is irreparable, the loser having no recourse against the Government or other party issuing them. A constant watch is kept both inside and outside the building. There is a room especially adapted and reserved for ladies. The premises can be inspected, and further particulars obtained on application. HENRY WEST, Manager.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, August 30, 1851.
PAID-UP CAPITAL, £1,500,000.
RESERVED FUNDS, £500,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Colombo, Foochow, Hiogo, Hong Kong, Kandy, Madras, Mauritius, Melbourne, Point de Galle, Pondicherry, Port Elizabeth, Shanghai, Singapore, Sydney, Tellicherry, and Yokohama on terms which may be ascertained at their Office. They also issue Circular Notes for the use of Travellers by the Overland Route.

They undertake the agency of parties connected with India and the Colonies, the purchase and sale of British and Foreign Securities, the custody of the same, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named Dependencies.

They also receive deposits of £100 and upwards for fixed periods, the terms for which may be ascertained on application at their Office.

Office hours, Ten to Three; Saturdays, Ten to Two.
Threadneedle-street London, 1875.

THE AGRA BANK (Limited).

Established in 1833.

CAPITAL, £1,000,000.
Head Office:—NICHOLAS-LANE, LOMBARD-STREET, LONDON.
Branches in Edinburgh, Calcutta, Bombay, Madras, Kurrachee, Agra, Lahore, Shanghai, Hong Kong.

Current accounts are kept at the Head Office on the terms customary with London Bankers, and interest allowed when the credit balance does not fall below £100.

Deposits received for fixed periods on the following terms, viz.:—At 5 per cent. per annum, subject to twelve months' notice of withdrawal. For shorter periods deposits will be received on terms to be agreed upon. Bills issued at the current exchange of the day on any of the Branches of the Bank free of extra charge; and approved bills purchased or sent for collection. Sales and purchases effected in British and Foreign Securities, in East India Stock and Loans, and the safe custody of the same undertaken. Interest drawn, and Army, Navy, and Civil Pay and Pensions realised. Every other description of Banking Business and Money Agency, British and Indian, transacted.

J. THOMSON, Chairman.

COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1854, and 31st December, 1866.
Recognised by the International Convention of 30th April, 1862.

CAPITAL, fully paid up, £8,200,000.

Reserved Fund ... ... f.20,000,000 ... £800,000.
HEAD OFFICE—14, Rue Bergere, Paris.

BRANCHES AND AGENCIES.

Hong Kong	Hankow	Saigon
Shanghai	Yokohama	Singapore
Foochow	Hiogo	Bombay
Ningpo	Manila	Calcutta

The Corporation grant Drafts upon, and negotiate or collect Bills at any of the Branches or Agencies; also receive Deposits for fixed periods, at rates varying with the period of deposit.

The Corporation issue Letters of Credit and Circular Notes, negotiable in the principal cities of Europe, Asia, and America for the use of travellers.

They open Current Accounts for the convenience of constituents returning from China, Japan, and India.

They also undertake the Agency of constituents connected with the East, and receive for safe custody Indian and other Government Securities, drawing Interest and Dividends on the same as they fall due.

Dividends are payable in London in April and October, on receipt of the advice of meeting in Hong Kong, held in February and August.

BANK OF CALIFORNIA.—THE ORIENTAL BANK CORPORATION are prepared to ISSUE DRAFTS at sight on the Bank of California, San Francisco, the terms for which may be ascertained at their Office.

Threadneedle-street, 1875.

OPIUM.

"BRITISH OPIUM POLICY, AND ITS RESULTS TO INDIA AND CHINA."

We award the First Prize of £200 to the writer of "Let Providence Provide." And the Second Prize of £100 to the writer of "Fiat Justitia."

In so doing we wish to express our high appreciation of the excellence of many others of the seventy-five submitted to us.

C. E. TREVELYAN,
H. E. BARTLE FRERE,
LOUIS MALLET.

London, Oct., 1875.

NOTE BY THE DONOR.

The Author of the First Prize Essay is GILBERT MALCOLM SPROAT, Esq., Agent-General for British Columbia.

That of the Second is Rev. F. S. TURNER, Secretary of the Anglo-Oriental Society for the Suppression of the Opium Trade.

To prevent misapprehension it should be stated that two other writers had adopted the motto "Fiat Justitia," but with the additional words "ruat coelum."

SELECTED LIST OF MAPS OF ASIA, INDIA, BURMAH, CHINA, &c.,

PUBLISHED BY
EDWARD STANFORD,

55, CHARING-CROSS, LONDON, S.W.
(Removed from 6, 7, and 8, Charing-cross.)

ASIA. — STANFORD'S LIBRARY MAP OF ASIA. Scale, 110 miles to an inch; size, 65 inches by 58. Coloured and Mounted in Morocco Case, £3 13s. 6d.; Roller, Varnished, £3; Spring Roller, £6.

This new and original work exhibits the Empires and other States of the Oriental world with a stricter regard to their actual boundaries and divisions than any other publication has yet attempted Although the size of the Map extends to the limits of convenience, its scale of 110 miles to an inch serves to show how inadequate a small Map must be for the representation of so large an area.

CENTRAL ASIA. — STANFORD'S MAP OF CENTRAL ASIA, including Teheran, Khiva, Bokhara, Kokan, Yarkand, Kabul, Herat, &c. Scale, 110 miles to an inch; size 22 inches by 17. Coloured Sheet, 2s. 6d.; Mounted in Case, 5s.

INDIA. — STANFORD'S MAP OF INDIA. Based upon the Surveys executed by order of the late Hon. East India Company, the Special Maps of the Surveyor-General and other Authorities, showing the latest Territorial acquisitions of the British, the Independent and Protected States, the Railways, Canals, Military Stations, &c.; together with a Continuation of the British Trans-Gangetic Provinces, and Diagrams exhibiting Distances and Bearings from the three Presidencies of Bengal, Madras, and Bombay. Scale. 55 miles to an inch; size, 50 inches by 63. On Four large Coloured Sheets, 21s.; Mounted in Case, 30s.; Roller, Varnished, 35s.; Spring Roller, £4 4s.

INDIA.—STANFORD'S NEW PORTABLE MAP OF INDIA: Exhibiting the present Divisions of the Country according to the most recent Surveys; showing also the adjacent territories of Beluchistan, Afghanistan, Turkestan, the Chinese Empire, Burmah, and Siam. The Railways, Rivers, Canals, Mountain Passes, and the Elevations above the Sea are clearly indicated: and the Boundaries of the Provinces, the Bengal, Bombay, and Madras Presidencies, the Districts under British and Native Government, and the French and Portuguese Possessions, are distinctively coloured. Scale, 86 miles to an inch; size, 29 inches by 33. Coloured Sheet, 6s.; Mounted in Case, 8s.; Roller, Varnished, 11s.

INDIA.—MAP OF INDIA. By J. ARROWSMITH. Scale, 90 miles to an inch; size, 22 inches by 26. Coloured Sheet, 3s.; Mounted in Case, 5s.

INDIA.—MAP OF INDIA, indicating the probable Route and Date of Visit of the PRINCE OF WALES. Scale, 100 miles to an inch; size, 17 inches by 22. Price, Folded, 1s.

ASIATIC ARCHIPELAGO. — MAP OF THE ASIATIC ARCHIPELAGO; including on the North, Canton; on the East, the Ladrone Islands; on the South, the North Coast of New Holland; and on the West, Sumatra and Malay. By J. ARROWSMITH. Scale, 156 miles to an inch; size, 26 inches by 22. Coloured Sheet, 3s; Mounted in Case, 5s.

BURMAH, &c.—A Map showing the various Routes proposed for connecting China with India and Europe through Burmah, and developing the Trade of Eastern Bengal, Burmah, and China. Prepared under the direction of JOHN OGILVY HAY, F.R.G.S. Scale, 33 miles to an inch; size, 27 inches by 33. Coloured Sheet, 3s.; Mounted, in Case, 5s.

BURMAH AND ADJACENT COUNTRIES. Compiled from various M.S. and other Documents. By J. ARROWSMITH. Scale, 24 miles to an inch; size, 22 inches by 26. Coloured Sheet, 3s.; Mounted in Case, 5s.

CHINA AND JAPAN.—STANFORD'S MAP OF THE EMPIRES OF CHINA AND JAPAN, with the adjacent Parts of British India, Asiatic Russia, Burmah, &c. Scale, 110 miles to an inch; size, 38 inches by 24.

[New Edition preparing.

CHINA. — MAP OF CHINA. By J. ARROWSMITH. Scale, 90 miles to an inch; size, 26 inches by 22. Coloured Sheet, 3s.; mounted in Case, 5s.

CEYLON.—MAP OF CEYLON. Incorporating the Map of the Kandyan Provinces, already published, and Constructed from a Base of Triangulations and corresponding Astronomical Observations during his Employment on the Staff of the Colony, by Major-General JOHN FRASER, late Deputy Quartermaster-General. Reconstructed, incorporating a great number of Original Documents, and connected with the Great Survey of India, by JOHN ARROWSMITH. Scale, 4 miles to an inch size, 52 inches by 78. Eight Sheets, Coloured £2 5s.; Mounted in Case, £3 13s. 6d.; Roller, Varnished £4 4s.; Spring Roller, £6 16s. 6d.

CEYLON.—MAP OF THE ISLAND OF CEYLON. By J. ARROWSMITH. Scale, 22 miles to an inch; size, 13 inches by 15. Coloured Sheet, 1s.; Mounted in Case, 2s. 6d.

*** FOR FULLER LISTS see STANFORD'S GENERAL CATALOGUE of ATLASES, MAPS, DIAGRAMS, &c. Gratis on Application, or by Post for 1d. Stamp.

THE LATE REV. B. P. KEASBERRY, OF SINGAPORE.

THE late Rev. B. P. KEASBERRY, whose sudden death occurred last month in Singapore, has left a widow and a family of girls almost wholly unprovided for.

It is almost unnecessary to remind old residents in The Straits of the faithful and disinterested services of Mr. Keasberry, in the teaching of the Christian faith, and the spread of education.

These services, which extended over a period of thirty-six years, it is proposed to recognise, to some extent, by the collection of a sum of money, to be placed in the hands of the Hon. R. Little, M.D., and William Adamson, Esq., of Singapore, as Trustees, leaving power to them to invest the whole or a part at their discretion, or to apply it wholly and at once for the benefit of Mrs. Keasberry and her daughters.

Cheques should be made payable to P. F. Tidman, 34, Leadenhall-street, by whom Subscriptions will be acknowledged.

TO PARENTS AND GUARDIANS.

AN ENGLISH WIDOW LADY, who has been residing many years on the Continent, is desirous of obtaining two pupils (English) to educate with her own daughters. She offers a comfortable home, and a mother's care, with all the advantages of the best professors and an excellent governess, combined with that of French, English, and German. Is now residing in the neighbourhood of Versailles which abounds with charming walks, where there is an English church, as well as similar cours or classes conducted by the same professors as at Paris. References exchanged.

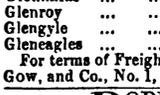
Steamers.	Class.	Tons.	Horse-power.	Date of Sailing.
Glenlyon	100 A1	2,119	275	Dec. —
Glenartney	100 A1	2,106	330	To follow
Glenearn	100 A1	2,120	330	To follow
Glenfalloch	100 A1	2,126	275	To follow
Glenfinlas	100 A1	2,120	330	To follow
Glenroy	100 A1	2,121	250	To follow
Glengyle	100 A1	1,676	200	To follow
Gleneagles	100 A1	2,120	300	New boat

For terms of Freight and Passage apply to McGREGOR, Gow, and Co., No. 1, East India-avenue, London.

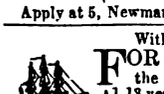


ROBERTSON and CO.'s INDIA, CHINA, and JAVA LINES of STEAM and SAILING SHIPS:—

Port.	Ship.	Class.	Dock.	To sail.
Hong Kong..	Evelyn	A1 13 yr.	S.W.I.D.	With des.
Yokohama & Hiogo	Tamesa	A1 16 yr.	S.W.I.D.	With des.
Do.	Ziba.....	AA1 13yr.	S.W.I.D.	To follow

Apply at 5, Newman's-court, Cornhill, London, E.C.

With quick despatch.



FOR HONG KONG DIRECT, the favourite China clipper EVELYN, A1 13 years, 762 tons register. South West India Docks; HENRY KNOWLES, Commander.

For Freight or Passage apply to JOHN WILLIAMSON, York-chambers, 55, King-street, Manchester; or to ROBERTSON and Co., 5, Newman's-court, Cornhill, London, E.C.

Steam via the Suez Canal. To sail Nov. 16.

FOR YOKOHAMA and HIOGO, calling at PENANG, SINGAPORE, and HONG KONG, the splendid screw steamship, GENOA, 100 A1, 1,271 tons register, 1,963 tons gross register, 180-h.p. nominal, 900-h.p. effective; Victoria Docks. This fine new high-classed steamer, just built especially for the China trade, is strongly recommended to shippers.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 1, Fenwick-street, Liverpool; Bridgewater-buildings, Albert-square, Manchester; 51, Pall-mall, S.W.; and 109, Leadenhall-street, London. E.C.

FOR CHINA AND JAPAN.—The following splendid first-class STEAMERS will be despatched as under:—

Port.	Ship.	Class.	Dock.	To sail.
Sing., H. K., Yoko., & Hiogo.....	Benledi ...	100 A1	S.W.I.D.	Nov. 17
Pen., Sing, Hg Kg., Yoko., & Hiogo.....	Oxfordshre	100 A1	S.W.I.D.	To follow

For Freight or Passage apply to NORRIS and JOYNER, 126, Bishopsgate street Within, E.C.

Steam via the Suez Canal.

TO SINGAPORE, HONG KONG, YOKOHAMA, and HIOGO (if sufficient inducement offer), taking cargo for transhipment to Java, Australia, &c., at through rates at shippers' risk, last shipping day 16th Nov.; the favourite Clyde-built full-powered screw steamer BENLEDI, 100 A1, 1,557 tons gross, 1,000 tons net, 160-horse power nominal; J. W. BUCHANAN, Commander; South West India Docks. This fine steamer is well and favourably known in the China trade, and has splendid accommodation for saloon passengers.

For Freight or Passage apply to NORRIS and JOYNER, 126, Bishopsgate-street Within, E.C. (corner of Cornhill).

SHAW, WILLIAMS, and CO will despatch the following high class vessels as under:—

Ports.	Ship.	Class.	Tns.	Dock.	Sailing.
Sing ,H.K.,& Shanghai..	Lord of the Isles s.s.	100 A1	1846	S.W.I.	Nov. 25
Hong Kong	Belted Will	A1 15 yr.	812	S.W.I.	With des
Shanghai ...	M.A.Dixon	A1 14 yr.	415	S.Kath	With des

Apply to SHAW, WILLIAMS, and Co., 9, Fenchurch-street, E.C.

LONDON TO COLOMBO and SINGAPORE, calling at Portsmouth to embark troops, the splendid and powerful steamship THAMES, A1 100, 1,687 tons register, 180-h.p. nominal, A. CAMPBELLI, Commander, carrying goods at through rates for Manila, Batavia, Samarang, Sourabaya, Macassar, Padang, Bangkok, and Saigon. Has very superior accommodation for chief cabin passengers, and carries a surgeon Last shipping day 18th Nov. Loads in the Victoria (London) Docks.

For Freight or Passage appty to TEMPERLEYS, CARTER, and DARKE, 21, Billiter-street, E.C.

CASTLE LINE of STEAM PACKETS from LONDON.—For SINGAPORE HONG KONG, and SHANGHAI, taking goods at through rates for Java, Japan, and Eastern Australian ports, the magnificent steamship CROCUS, 100 A1, 2,000 tons register, 225-h.p. nominal; R. H. JOY, Commander; will load in the South West India Dock. This splendid steamer, well known in the China trade, has superior accommodation for passengers.

Apply to THOMAS SKINNER and Co., 5, East India-avenue, London, E.C.

FOR Tanjong Pagar, SINGAPORE.—The following VESSELS are now on the berth in LONDON.

* By Pacific mail *via* San Francisco, received Nov. 18.

THE MAILS, &c.

The P. and O. mail, bringing the above advices from China and the Straits Settlements, was delivered, *via* Brindisi, this morning, its due date. The Pacific mail, with the Japan advices, reached London, *via* San Francisco, on the 18th inst. The next inward (French) mail, with a week's later dates, viz., Shanghai 15th, Hong Kong 21st, Singapore 25th Oct., which is due, *via* Marseilles, on Monday next, the 29th inst., left Suez on the 16th inst., three days early.

The lines of the Eastern and Great Northern Telegraph Companies are both out of order.

List of Passengers.

PASSENGERS INWARD.

By this mail to Brindisi, per P. and O. steamer *Baroda*, arrived Nov. 18.—None. To Venice, arrtved Nov. 21.—From Shanghai: Mr. W. Evans. From Hong Kong M. Peterman. From Batavia: Mr. L. L. Ledebaer.

To Southampton, per P. and O. steamer *Australia*, expected to arrive Nov. 27.—From Yokohama: Mrs. Shepherd and three children. From Shanghai: Mrs. Evans and infant, Mr. W. Shepherd. From Hong Kong: Mrs. Creagh, Mr. W. Craig, Mr J. Thomas, Mr. D. Lester, Mr. F. Howaldt. From Singapore: Mr. A. D. Macdougal-

Per steamer *Orestes* (Holt's line), arrived in London Nov. 21.—From Shanghai Mrs. Westphal, infant, and three children. From Foochow: Mrs. Lark. From Hong Kong: Capt. Shearer. From Penang: Mr. James Hoomam, Mr. Wood.

PASSENGERS OUTWARD.

Per French steamer *Amazone*, from Marseilles, Nov. 21.—To Yokohama: Mr. Bourgoin, Mr. Hewens, Mr. Caillens. To Shanghai: Mr. MacCarttry, Mr. Turner, Mr. Budd, Mr. Juver, Mr. Moudon, Mr. Hellana, Mr. and Mrs. Little. To Hong Kong: Mr Macedo, Mr. Meyer, Mrs. Bailey. To Saigon: Mr. Tournier. To Batavia: Mr. Voute, Mr. Van Delden, Mr. Gillespie. To Singapore: Mr. Baumgarten and family, Mr. Thos. J. Broome, Mr. Hinnekind and family, Mr. Sohst and family, Lieut. H. F. Braddel, Mr. Kumpen, Mr. F. A. Hervey, Colonel Smith, Mr. Koger, Lieut.-Colonel Smith, Mr. Verkouteren, Mr. Pfeiffer. To Galle: Mr. A. MacFarlane, Mr. E. G. von Glehn, Mr. J. Tarn, Mr. Bosanquet.

Per French steamer *Anadyr*, from Marseilles, Dec. 5.—To Yokohama: Mr. and Mrs. Fanconnet. To Shanghai: Mr. Godeaux. To Saigon: Mr. Alquier. To Batavia: Mrs Van Lawick, Mr. H. D. Lyon, Comte Zichy, Mr. Frolke. To Singapore: Comte Herngasze. To Galle: Mr. Boustead, Mr. Northmore.

Per French steamer *Djemnah*, from Marseilles, Dec. 19.—To Yokohama: Mr. Kreitmann, Miss Seymour. To Hong Kong: Mr. and Mrs. Pelham Warren. To Port Said: Monsr. de Lesseps and family.

Per French steamer *Ava*, from Marseilles, Jan. 2.—To Galle: Mr. Newman.

Per P. and O. steamer *Malwa*, from Southampton, Nov. 18.—To Shanghai: Mr. H. A. Johnstone, Mr. Yard. To Singapore: Mr. A. P. Talbot, Mr. Hoatson, Mr. A. Manners. To Penang: Mr. Dirk van Rossum. To Ceylon: Mr. C. F. Hill.

Per P. and O. steamer *Baroda*, from Brindisi, Nov. 29.—To Penang: Mr. T. C. Brown.

Per P. and O. steamer *Surat*, from Southampton, Dec. 2.—To Hong Kong: Mrs. J. Dixon. To Ceylon: Sir J. W. Copley. To Galle: Mr. V. Hamilton.

Per P. and O. steamer *Hindostan*, from Venice, Dec. 10.—To Singapore: Mr. and Mrs. MacVicar.

Per steamer *Priam* (Holt's line), from Liverpool, Nov. 17.—To Shanghai: Miss Meyrick. To Singapore: Mrs. Gottlieb and family, Mrs. Johnson and family. To Penang: Mr. Van der Honert, Mr. Pasteur.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present P. and O. mail brings advices from this port to the 5th Oct., and by the Pacific mail we have news to the 11th Oct.; the P. and O. mail from London, Aug. 6, arrived out on the 25th Sept.; the French mail of Aug. 13 on the 30th Sept., and the P. and O. mail of Aug. 20 on the 3rd October The *Japan Herald* supplies the following items of news:—

News has arrived of an occurrence which has caused much excitement here, and may eventually exercise an important influence on Eastern affairs generally. Until within a few days ago, the Government has deemed it prudent to observe a strict reticence with regard to its relations with Korea. The truculent missives, teeming with invective, despatched some three years ago by the Koreans to the Japanese, were denied by Soyeshima, the then Minister for Foreign Affairs, as having been received —though not a doubt remains but such was the fact. Brooding over these repeated insults, the Japanese have anxiously awaited an opportunity to avenge them; but circumstances have been adverse to the consummation of their desire. Meantime the project of an invasion of Korea has been steadily entertained, and with the object of acquiring information in respect to the Korean coast and harbours, two ships were secretly despatched some months since, and have been actively engaged in that service up to within a recent period. As might have been anticipated, the hostility of the Koreans towards the Japanese has led to one of these ships being fired into; and a reprisal has been made, by an assault on the attacking fort, and its dismantlement. After the affray thirty Koreans were found dead, and many more jumped into the sea and were drowned. Ten prisoners, thirty-six cannons, ten rifles, and many other things were taken. One Japanese was killed and another badly wounded. This act

Digitized by Google

has precipitated a crisis, and the Japanese Government has issued the subjoined notification:—

Some time ago our ship the *Unyo-Kan* coasted round the eastern and southern shores of Korea. She was then further proceeding along the western coast in the direction of Newchwang in China, and in the course of her voyage was passing the neighbourhood of the Korean island of Kôkwa on the 20th September when she was suddenly fired upon by the Koreans. Our men were landing to inquire the reason of this, when a hot fire was opened upon them which the ship was obliged to return. The next day a landing was made, the fort was captured, and its armament seized. Two of our men have been wounded. The ship has returned to Nagasaki. The above intelligence having been received by telegraph it is herewith communicated for your information.

Apparently it is sought to create the impression that the *Unyo-Kan* was merely passing the island of Kokwa, in prosecuting her voyage in the direction of Newchwang, and that the outrage upon the Japanese flag was both unprovoked and unexpected. But it has been no secret that the presence of Japanese ships-of-war in Korean waters taking soundings has been extremely distasteful to the Koreans, who by gestures warned the Japanese to desist, but without the effect of causing them to depart; as they continued to persist, being within range of the Korean guns, they were fired upon. On the part of the Koreans we have no information of the amount of their loss; but two Japanese were wounded, and the ship then returned to Nagasaki, and reported by telegraph the occurrence to the Government. The latest that we hear is that a gunboat is to be forthwith despatched to demand explanations, and to inquire whether the firing on the Japanese flag was an act of mere local hostility, or whether it was by order of the Government itself? Of the latter we apprehend there is but little room for question, and now that blood has been drawn, the gunboat, if she comes within reach of Korean ordnance, it is probable, will also be fired at. It is not to be expected that the barbarous Koreans should observe any of the preliminaries to war which are recognised by civilised States; and since it is not likely that the Koreans will abate anything of the belligerent attitude they have assumed, the two countries may in point of fact be regarded as being actually at war. The Government has a large stock of war material on hand, and a fleet of steamships available for transport service, which would render possible,—taking the Island of Tsushima as a base of operations,—the throwing quickly upon the Korean Peninsula of an army of some 25,000 to 30,000 men armed with weapons that would give them a tremendous advantage over their foes, which, with reinforcements following, would in all likelihood enable them, as Taikosama did before, to conquer the country. In that case, would the Japanese be disposed to retire? or would they not rather, having subjugated the Peninsula, permanently occupy it, and annex it to the Empire.

The Government is not without hope that the difficulty between England and China, arising out of Mr. Margary's murder, may so far embarrass the Chinese Government as to prevent it rendering any assistance to its neighbour. Amongst the members of the Cabinet disunion prevails, but the party in favour of war has the majority. Okuma, the Finance Minister, who so strongly urged the Formosan expedition, is understood to be opposed to war with Korea, pleading the poverty of the treasury as his principal reason. Kido has resigned, and Iwakura, officially sick, has ceased to attend the sittings of the Council of State. Discontent prevails generally among the *samurai*. To pass over the Korean outrages is felt to be lowering to the national dignity, and may lead to a civil war, because there is no occupation or outlet for the warlike energies of the fighting class. On the other hand, the Japanese treasury is too exhausted to meet a protracted drain upon it, such as China coming to the assistance of the Koreans might involve. There is, however, abundant national spirit amongst the military classes of the Japanese; if they thought the honour of the nation is at stake, they would devote themselves with ardour to the contest.

During the early hours of the 1st Oct. the Settlement was visited with a storm of wind and rain, which though short, was of the most violent description, approaching in force almost to the strength of a typhoon. But little damage is to be seen in the Settlement, the most noticeable loss being the Governor's flagstaff, but tiles, shutters, plaster, pigeon cots, &c., as usual in such cases, came to grief. The roofs of houses and godowns were severely tried by the torrents of rain that fell, and many are the complaints of damages sustained through leaks. Many casualties occurred to native buildings, which always happens whenever the weather becomes anything out of the common. Several of the streets in the native town were flooded, and converted into little rivers, through the defective drains being unable to carry off the water. These streets did duty as channels for the water to run off, and they received such a cleansing as they had not had for many a day.

The first lot of silk worms' eggs made their appearance on the market on the 9th Oct., and a total of some 32,000 *cartons* has arrived. No business has yet been transacted, but the Japanese seem to count on a medium price of $1 for the ordinary classes; whilst for the extra qualities, such as those from Shimamura, &c., they expect to receive from $2 to 2.50. In this view we think that they will find themselves mistaken. The number of *graineurs* who have arrived is this year very small, and, in consequence of the nearly entire disappearance of the disease in Italy and the consequent large production of eggs, coupled with the bad result given by the imported Japanese seed, but few of these have orders to fulfil. These gentlemen are therefore acting on their own account, and from what we can learn, they do not feel inclined to speculate unless the Japanese agree to their prices, which would be about an average of twenty-five to thirty cents per card. Between these and Japanese views there is a wide difference, and we fear that the natives will again have to resort to the burning process, always provided that they found its results last year to be satisfactory.

On the 30th Sept. a large casting was most successfully made at the engineering establishment of Messrs. Whit field and Dowson, on the Creek. The casting consisted of an ordinary four-bladed propeller (for the Mitsu Bishi Mail Co.'s s.s. *Kishiu Maru*), weighing two tons, and having a diameter of ten feet. The screw was dug out of the mould next day, being still quite hot, and was found to be as perfect as could be desired. Owing to recent additions of machinery, of all descriptions and of the newest designs, to the plant of Messrs. Whitfield and Dowson, that firm now possesses very superior facilities for turning out engineering work of all kinds.

The members of the newly re-organised Dramatic Corps are already giving signs of their good intentions. Having taken over the Public Hall, with all its outstanding liabilities, it therefore behoves them to be stirring. The pieces in rehearsal are "The Wonderful Woman," and the farce of "An Ugly Customer," and the opening performance will probably be given towards the end of October. With the really good actors which the corps possesses there is every reason to hope that the approaching season will be a success, both financially and otherwise.

One of the severest shocks of earthquake experienced for some years occurred on the 6th October. It seems to have been felt most severely on the Bluff, where the tops of some chimneys, tiles, and plastering were thrown down, but no damage of material consequence resulted. In connection with this subject, it may be mentioned that the volcano of Asamayama has lately shown increased symptoms of disquietude.

The Kobusho (Department of Public Works) has become restive under the criticisms on the incompetency of its native officials, and has issued an order forbidding any of its foreign *employés* to give information respecting the business of the department.

A rowing match between the English and Scotch fours took place on the 7th Oct., and was won by the former.

Signora Palmieri has given several concerts, both here and in Yedo, with great success.

The Mikado visited the *Kadzoku Kuaikuan* (or Daimio's Club) on the 7th Oct. H.M. was received and entertained by the members with the usual ceremonials.

The acting-editor of the *Akebono Shimbun* has been awarded thirty days' imprisonment for a contumelious article on revenue stamps published in a recent issue of that journal.

CHINA.

—o—

PEKING AND TIENTSIN.

The Tientsin correspondent of the *North China Herald* writes as follows:—

We have at last more definite news from Peking, which, though not authentic, seems to be reliable. Briefly, the Tsung-li Yamen want to refuse to ratify honestly the terms of settlement arranged between Mr. Wade and the Viceroy at Tientsin. They are willing to promise in a general way that the guilty parties in Yunnan shall be punished, that a letter of apology shall be sent to the Queen, and that the Province of Yunnan shall be opened to trade, but they want to do these things China fashion, and Mr. Wade insists on having them done properly and in good faith. In short, when it comes to the pinch, the Chinese want to put England off with vague promises, and Mr. Wade finds that his long negotiations with Li-Hung-chang have advanced him very little. It is rumoured that the execution of Li-Si-tai is demanded, and the punishment is fully deserved; but we can well believe that the Chinese shrink from the determined measures, involving the probable use of force, which it would involve.

Mr. Wade has notified the Foreign Legations that he would haul down his flag on the 30th Sept., should the Government not accede to his demands. So we must have definite information in a very few days. It is reported that the state of affairs is becoming known among the Chinese, and that some are leaving Tientsin under the impression there would be a fight. But possibly the Mandarins may encourage this idea, in order to appear in the eyes of the people to the last as heroes ready to die; so that if they do yield they may be at least able to say—"We resisted to the last." It is evident from all this that the report of a *settlement* of the Yunnan affair having been arrived at before H.M. Minister left for Peking, was premature. A basis of agreement had been discussed between Mr. Wade and the Governor-General Li Hung-chang; but conclusive negotiations remained to be carried on with the Tsung-li Yamen at Peking; and the difficulties opposed by the latter appear to be much the same

Digitized by Google

that harassed the Viceroy. It is reported among the Chinese in Tientsin that the Yamen object to the regulation of the transit dues demanded by Mr. Wade, and the punishment of Yunnan officials—which were practically the leading features in the programme. In fact, they would like, of course, if they could, to reduce the whole terms to meaningless generalities.

It will be remembered that one of the conditions laid down by Mr. Wade at Tientsin was free intercourse between the British Minister and the heads of the chief departments of Government, other than the Tsung-li Yamen ; the purport of the demand evidently being to place Foreign Ministers on a proper footing. The following Imperial decree, published in the *Peking Gazette* of the 28th September, seems to yield this point ; and it may be that this concession has determined Mr. Wade to continue negotiations :—

The Tsung-li Yamen has presented a memorial praying a declaration from the Throne on the subject of certain prescriptions in our decrees, and regarding the conclusions arrived at (by the Yamen) in the matter of intercourse between the chiefs of the principal departments of State and the Foreign Ministers residing in the capital. The explanation of the prescriptions that apply to the decrees is perfectly correct. As regards intercourse with the chiefs of departments, We command that action be taken in the manner the Yamen has proposed.

We are informed that the Yamen's memorial (referred to in the edict) is satisfactory in tone, and will be published in due course. The publication of the edict before the memorial which called it forth is habitual, and to be noticed in every day's *Gazette*. We believe that in the edict quoted above the proper designation for foreign Ministers appears for the first time in an official document of this kind.

While all must feel much anxiety concerning the present state of affairs at Peking, we think the feeling prevails that there is no immediate or serious cause for alarm. Business—everything indeed—seems to be pursuing the even tenor of its way, as if nothing serious was disturbing men's minds. But a very decided interest will be felt in the developments of the next few days.

The remains of the late Emperor are to be removed from the capital to the Imperial Cemetery at the beginning of the next Chinese month. We understand that Li Hung-chang leaves in a few days to participate in the imposing ceremonies connected therewith.

A large tract of country east of the Pei Ho has been flooded recently, consequent upon the breaking of the banks of the canal dug by Governor Li more than a year ago, and intended to connect the Pei Tang Ho and the Pei Ho. It is reported to be over two feet deep around the arsenal. The weather continues fine.

SHANGHAI.

The present mail brings advices from this port to the 8th October ; the French mail from London Aug. 13 was received on the 25th Sept., and the following P. and O. mail of the 20th Aug. arrived out on the 30th Sept. The following summary of news is from the *North China Herald* :—

At the meeting of the China and Japan Marine Insurance Company the report and accounts (including the proposal to pay a dividend of 4 per cent. on the half year) were passed. The proposal to wind up the company involved some discussion, and ended in an adjournment till the 19th Oct. The show of hands was in favour of the proposal to wind up. The directors (under clause sixty-one of the Deed of Settlement) fixed the 18th for taking a poll, which will be held at the company's office on that day, when it will, we believe, be open to all shareholders on the register to vote.

The minutes of a meeting of Treaty Consuls held on the 27th September do not show very definite results on any of the points mooted. The question of Bund line of the French Concession is to be brought before the Taoutai.—Correspondence regarding the passage of troops through the Settlements is going on.—The Taoutai simply denies responsibility in regard to cleansing the Soochow Creek, and leaves the matter in the air.—Several letters have passed between the Council, the Consuls, and the Taoutai regarding Wharfage Dues, but nothing has been elicited from the latter except a complaint that foreigners help Chinese to evade Lekin taxes, and that his revenue therefore falls short. —An alteration is mooted in the Harbour Regulations, to enable kerosine oil-laden ships to come nearer the Settlement. They would then be confined to the Pootung side, in the 9th Section. —Mr. Haas is preparing a report on the subject of Lekin taxes. —The better protection of foreigners travelling in the interior has also been subject of correspondence.

We hear by telegram of the loss of the ocean str. *Hector*, which left Shanghai for London, *vid* Amoy, on the 2nd inst. The information is very meagre, merely stating that the ship had run on shore on the island of Chih-seu, at the entrance to the last named port, and was likely to become a total wreck, her hull having parted, admitting water to the depth of, at least, eight feet. Fortunately no lives are reported lost, and as soon as the news was received in Amoy the steamer *Formosa* was despatched to the assistance of the stranded vessel, and in the hope of saving cargo. At the time of the latest despatches about 1,000 packages had been saved. The O. S.S. Company, to which the *Hector* belonged, have been particularly fortunate in their freedom from losses at sea, and accidents of any kind to their ships, the foundering of the *Ajax* (afterwards raised) in the Hwangpoo, and the comparatively trifling accident to the *Ulysses* in the Red Sea, being the only ones of any moment until the present.

The purchase of new plant for the Fire Department, to the amount of Tls. 2,500, was sanctioned at the last meeting of the Municipal Council. The sum seems a large one, unless it is intended to cover the cost of a new steamer to replace the *Deluge ;* in which case it might have been as well to say so.—The purchase of land for the extension from the Cemetery to the Sikawei-road is in the hands of Mr. Haas. We hope, now fine weather has returned, to hear soon that arrangements have been completed, and the work begun.—Debentures to the amount of Tls. 28,000, bearing interest at 8 per cent., are to be issued for the purchase of and repairs to the Tunsin property.

Owing to the new magistrate at the Mixed Court sentencing so many native convicts to imprisonment, pressure for room is already beginning to be felt in the cells of the municipal police stations, the gangs of cangued prisoners, for whom nightly accommodation has also to be found, adding to the difficulty. At the present rate of police activity and magisterial impartiality there will soon be a demand for more cells.

The programme has been published of the Autumn Prize Meeting of the S.V.C., which will be held on the 15th, 16th, and 18th Nov. There appears to be more interest attaching to this competition than has been the case for several meetings past ; that is, judging by the lately increased attendance at the range for practice. It is supposed that the list of competitors will reach over a score, which, although giving an improvement on the too frequent repetition of the same names (all praise to their owners nevertheless) which has marked late meetings, is not nearly so great a number as it is desirable to see at the targets. Still, as betokening a growing interest in rifle shooting, the increase must be accepted with congratulation, and in the hope that on future occasions there will be further additions. The list of prizes includes, on the first day, the National Rifle Association Silver Medal, the winner of which is entitled to shoot once for H.R.H. the Prince of Wales's prize (aggregate value £200) at Wimbledon, under rule 7 of the National Rifle Association—and the Municipal Challenge Cup ; on the second day, the Officers' Cup and the Ladies' Purse ; and on the third day, the Companies' Match and the Consolation Prizes. The Gold Cross and Championship of the meeting will, as usual, go to the highest total scorer in competitions one to four, and in the individual firing in five. The Defence Committee have ordered sixty rounds of ball cartridge to be supplied annually, gratis, to each member of the corps—thirty rounds each for the spring and autumn competition.

Three officers of the United States Army, Major-General E. Upton, Brigadier-General G. A. Forsyth, and Major P. Sanger, have been visiting Shanghai. They are appointed by their Government as a kind of commission to make a tour round the world for the purpose of inspecting, as far as can be permitted, all the recent improvements in naval and military armament among the nations. While in Japan, we are informed, not the least hindrance was offered to them—they went where they listed and their questions were answered with perfect freedom. The same degree of facility was, it seems, afforded them among the Chinese in this district at least, for they visited the Arsenal at Kiangnan, where probably they were deeply impressed, not only with the strength and beauty of the first native iron-clad, now lightly floating on the Hwangpoo, but also with the other excellent imitations of Western skill to be found at that institution. The visitors have proceeded to Peking, and on their return will probably make a voyage up the Yangtsze.

As the time for holding the Autumn Regatta approaches much interest is beginning to be felt in several of the contests, more especially in that for the blue ribbon of the meeting, between the English and Scotch Eights, the crews for which have been selected and are now in active training on the upper waters of the Soochow Creek. The Scotch are by far the heavier crew, averaging forty-eight stone a side, against their adversaries' forty-three. But neither are well down to their work yet, and it is too early to say whether skill will beat weight, or whether weight and skill will put the lack of both to the blush. Barring accidents or illness, the following crews will pull the race :—

Scotch.		English.	
Shepherd...	bow	Bois	bow
Hall	2	Pryer	2
Sharp	3	Cheetham	3
Scott	4	Glover	4
Andrew	5	Wyatt	5
Campbell...	6	Westall	6
McLeod	7	Morriss	7
D. Glass	stroke	Lewis	stroke
B. Clarke	cox.	Dowdall	cox.

At a meeting of the "three-year-olds," it was unanimously agreed to accept the challenge of the "Veterans" to row an eight-oared race at the forthcoming Regatta, and Haslewood was elected Captain. We hear that the crew will be the same as last year's "two-year-olds," with the exception of Johnston, last year's stroke, who is unable to row through ill-health. His

Digitized by Google

place, however, will be well filled, if, as we hear is likely, Burrows takes the stroke oar.

We have received from Mr. Tapp, H.M. Registrar of Shipping, two volumes containing a useful digest of information regarding the surveying and registration of ships: one entitled "Instructions to Consuls in China and Japan concerning their Duties in respect of the Registration of Ships;" the other, "Instructions to the Surveyors in China and Japan employed in the Measurement of Shipping," &c. A work entitled "The Treaty Rights of the Foreign Merchant, and the Transit System in China," by the late Baron von Gumpach, has been published at the *Celestial Empire* office.

The engineers' storekeeper of the steamer *Patroclus*, Henry Jordan, has been drowned under somewhat peculiar circumstances. Deceased had been on shore, and returned on board early. Some "skylarking" then ensued between him and his shipmates, and he fell against a rope stretched across a side gangway. The rope being slack he fell over it, and it is surmised that he must have struck something in his fall, as he never rose again, although every effort was made to rescue him. An inquiry was held at the Consulate, before Mr. Mowat, respecting the occurrence, and the death was proved to have been accidental.

The *Taitsing*, which has just arrived, reports having experienced awful weather when in the Batshi channel, between Formosa and the Manila Islands, consequent on the change of monsoon. Three of the crew were washed overboard and drowned, and five others disabled, the vessel herself receiving much damage.

A few days since a large native cargo boat, heavily laden with cotton bales, capsized during a squall near the Yang-tsze-poo Creek. The crew and several passengers were picked up by some passing boats, as well as about thirty or forty packages of cargo. The boat was afterwards righted, and towed to Shanghai by the steam life-launch.

The M.M. steamer *Anadyr*, while steaming down the river, came into collision with the steamer *Teviot*, which was being towed into the stream. The *Teviot's* port gangway and one boat were smashed. The mail steamer received some slight damage to her bow.

The entries for the Shanghai Autumn Races closed on Saturday, and compare favourably with former meetings. The entries are for the Griffins, thirty-two; Criterion, twelve; Leger, twenty-one; French Challenge, eighteen; Mongol, twenty-five; Engineers' Challenge, twenty-one; Consolation, forty-seven. The total amount is Tls. 2,600.

A cricket match has been played at Chinkiang, between the Chinkiang Cricket Club and eleven of H.M.S. *Swinger*. The former were victorious. The cricket match Mih-ho-loongs v. the Club has been won by the latter.

Mr. Dave Carson and his troupe have been giving a series of amusing entertainments in the Lyceum Theatre.

The following land lots have been offered at auction by Messrs. Bisset and Co.:—

1st, the premises in Peking-road, occupied by Messrs. Hyde, Hertz and Co.; 2nd, a building site on the Bubbling Well-road; 3rd, a lot of land in rear of the P. and O. Co.'s Pootung premises; 4th, the property at Pootung Point, formerly belonging to Messrs. Collyer and Lambert. The first lot was started at Tls. 5,000 and bid up to Tls. 5,500, but it was not sold, the reserve being Tls. 9,000. Second lot was offered at the upset price of Tls. 100 per mow, but there was no bid made. Third lot was started at Tls. 1 and knocked down for Tls. 26 per mow. Fourth lot, the only bid made was Tls. 500, when the lot was withdrawn, the reserved price being stated to be Tls. 5,500. For the fifth lot, a property situated west of the Woosung-road, Hongkew, registered at the U.S. Consulate, title deed No. 123, containing two mow eight fun—the highest bid was Tls. 25 per mow, but as this did not reach the reserved price, the lot was not sold.

FOOCHOW.

The subjoined items of news from this port are taken from the *Foochow Herald*:—

A telegram received on the 30th Sept. narrates a tragedy which has occurred on board the German schooner *Anna*. The crew was composed of Chinese, who, as alleged, when not far from Foochow, mutinied and murdered the captain and mate. Having thrown their bodies overboard, they made off with the xessel, and will doubtless run her on shore somewhere in the vicinity. Meanwhile the German despatch-boat *Cyclops* has gone in pursuit, and will, it is to be hoped, succeed in overhauling the rascals.

Apropos of the Huang Kow riot, we hear that at the eleventh hour a few houses have been burnt (a barbarous and senseless proceeding, we think), and *mirabile dictu!* five men have been arrested, one of whom has, we understand, received four hundred strokes of the bamboo, while the rest have been cangued for short periods. The strangest part of the story has yet to be told. If we are correctly informed, these five men were drawn by lot, so that there is no absolute certainty that any of the really guilty parties have been punished. In the case of Mr. Blacklock's murder, a few months ago, men were found willing to personate the murderers for a pecuniary consideration. In the present instance the culprits, in a serious attack on foreign property, are, practically speaking, allowed to go unpunished.

Kwo-Sung-Tao, the recently appointed Ambassador to England, together with the Fantai, visited the Torpedo College and made a lengthened inspection of the very beautiful collection of scientific apparatus which Mr. Betts has recently received from England. Kwo-Sung-Tao was so much pleased with the experiments shown that he decided to take Mr. Betts to Peking with him, in order to carry out a course of experiments in Torpedo Engineering before Prince Kung and Li Hung-Chang. Mr. Betts will accordingly leave in company with Kwo-Sung-Tao in the *Ching-An*, Chinese gunboat. There is, we understand, a great probability that the Torpedo College may be permanently removed to Tientsin.

The autumn inspection of the "Bow and Arrow" troops will take place at the South Camp next month. The battalion of Honan men, has been packed off to Formosa. The men will there have ample opportunity—if so minded, for displaying to the full, their belligerent qualities.

Great preparations are being made in the city for the military examinations, which—like the civil examinations—just concluded—are triennial. The coming series are, however, especially ordered by the new Emperor, to commemorate his accession to power.

We understand that the recently-constructed forts in Formosa are tumbling to pieces. They were probably erected on the same economical principles as in former times influenced the manufacture of the wooden cannon with which many of us are familiar.

The Futai, or Governor of the Province, is expected from Formosa next week. His Excellency is said to be far from satisfied with his new location, which, to say the least, cannot be, under existing circumstances, an enviable one.

HONG KONG.

Our advices by this mail extend to the 14th Oct.; the P. and O. mail from London Aug. 20 was received on the 25th Sept., the following French mail of Aug. 27 arrived out on the 3rd Oct., and the P. and O. mail of Sept. 3 was received on the 11th Oct., the last-named mail being brought on by the steamer *Agamemnon*, owing to the detention of the P. and O. steamer *Kashgar* at Singapore by an accident to her engines. The following items of news are from the *China Mail*:—

The position at Peking may be thus defined. About the 24th Oct. Mr. Wade notified the other foreign representatives that, unless his terms were acceded to on the 28th, he would two days afterwards haul down his flag and leave the capital. The stipulated time expired, but although no intimation was made public that the Chinese had given in, Mr. Wade gave no signs of departure. In the *Peking Gazette* of the 28th there appeared an edict conceding the right of personal correspondence on the part of the foreign Ministers with the chief officers of the Chinese Government, thus setting aside the Tsung-li Yamen as a medium of communication. The same *Gazette* also contained the text of a memorial and edict respecting the dilatory action of the authorities, in regard to inquiring into the Yunnan outrage and directing greater speed and vigour. The appearance of these documents, which embodied two of Mr. Wade's demands—the use of a proper title as applied to foreign Ministers and permission for them to deal directly with the Government—is supposed to have led Mr. Wade to postpone any declaration of hostilities. Since the date above-named the advices from the north have reported that "War is averted for the present," and that strong hopes are entertained of a peaceful solution. Much excitement prevails to learn the actual state of affairs, but as no communications are allowed to be made to the press, great uncertainty still exists. The impression of the majority is that there will be no war. The effect of the uncertainty on the import trade is most disastrous, and Mr. Wade's action in listening to further negotiations, after once fixing a definite time for his departure, is freely criticised.

A confirmatory meeting of the shareholders of the Chinese Insurance Company took place on the 6th Oct., at the head office, Messrs. Olyphant and Co.'s, to confirm the special resolutions passed at the last extraordinary meeting. There were present:—Messrs. A. André (in the chair), Belilios, Burrows, C. M. Kerr, Geary, Hayllar, Q.C., Brereton, E. Sharp, McCulloch, Chun Kum, Kwongkee, Foong Ming Shan, Fung Tang, J. H. Cox, Simonis, and others. The Chairman read the notice of meeting, and then proposed the confirmation of the special resolutions. Mr. Belilios having seconded the proposition, it was carried by a large majority, as the Chairman declared, the dissentients being only Messrs. Sharp, McCulloch, Cox, and Simonis.

We hear from Taku that another of the rowdy outbreaks which occur at intervals there took place on the 26th September. A foreign lady, who was passing in a chair near Hopkee, the compradore's house, was mobbed and insulted by a crowd of villagers. She was in a close chair, and the ruffians banged this about and pulled open the door, shouting at and insulting her, and of course very seriously alarming her. There seem to have been other foreigners in the party, including another lady, who escaped molestation. The whole party took refuge in Hopkee's, and Captain Hunter went to the British Consulate to report, a

Digitized by Google

large crowd being assembled outside the door. Not a single mandarin was to be found—in fact, the Taku mandarins are only head policemen at the best—so Mr. Middleton went down in person with the Consulate Constable and another foreigner who was at hand. News reaching the crowd that an official (and the Taku people seem to have more respect for foreign officials than their own) was coming, they broke up; and when the relief reached Hopkee's the Chinese about were perfectly quiet. After waiting some time for the mandarin, who did not appear, the whole party left, and proceeded without annoyance or hindrance to the Pilot town. No reason whatever is assigned for the outbreak of rowdyism, and it is curious that only one member of the party seems to have been annoyed. It would seem likely that she must have been rather behind, and separated from the rest of the party, but no such explanation is given.

In the Supreme Court on the 12th Oct. Mr. Snowden delivered judgment in a Chinese case which had occupied a great deal of the time of the Court. The claim was originally brought before the Court for the recovery of $40, alleged to have been borrowed by the wife of the defendant of the plaintiff's wife. At the first trial, his Honour saw fit not only to nonsuit the plaintiff, but to fine her $15 for perjury, promising her at the same time that if she prosecuted the second defendant and her witnesses for perjury, and succeeded in convicting them, he would remit the fine. The plaintiff's husband being absent at the time, she was unwilling to take the necessary steps, but applied for a re-hearing, and this his Honour granted, merely with the object of allowing the fined plaintiff an opportunity of clearing her character. In the re-hearing, which occupied the Court many hours, the same conflicting evidence as at the first trial was given, but his Honour saw sufficient reason to remit the fine of $15; his decision of a nonsuit was, however, confirmed. The above was the purport of the judgment which his Honour delivered on the second trial of the case. Mr. Brereton appeared for the appellant.

We regret to announce the death of Mr. D. R. Caldwell, one of the oldest residents in this colony, and in native judgment the most perfect master of the colloquial who ever owned European parentage. Mr. Caldwell passed through several vicissitudes during his long connection with Hong Kong, and his acts at one portion of his career became the theme of bitter comment for and against him. Few present residents, however, are able to recall those troublous times, and of late years Mr. Caldwell has been chiefly known to us as an experienced and courteous authority on matters Chinese. He was a member of the Masonic fraternity, in which he held high office, and had gained the hearty respect of his fellow masons, who will very sincerely regret his loss.

We see by an advertisement in the *Chinese Mail* that the Dutch Government desires to induce Chinese emigrants to settle in Atchin, and for that purpose promises to employ all those who may feel inclined to try their fortunes there. The remuneration will, it is stated, be $8 per month for an ordinary labourer, $15 to $20 for carpenters, $12 for gardeners, and $14 for fishermen, with food, lodgings, and medical assistance to all of them. Labour under these conditions is guaranteed to immigrants for two or three years, but no contracts are made; and it seems that the Dutch Government trusts to the high rate of wages as a sufficient inducement to keep these workmen long enough to become accustomed to the country and make them form a permanent settlement.

The ordinary general meeting of the Canton Insurance Company was held on the 24th Sept. The accounts for 1873, showing net profit of $198,050, were finally passed. In those for 1874 the open account showed $162,967.66 at credit, which allowed of a payment of $25,000 to reserve fund, of a first dividend of $100 per share and first return to contributors of 9 per cent., leaving $47.967.66 to meet further possible liabilities and pay final dividend. The closing of the 1874 office was authorised without further reference to the shareholders. For 1875 the accounts showed a balance of $147,134.13 at credit.

The following account, duly certified, of the averag amounte of bank notes in circulation and specie in reserve in Hong Kong during the month ending 30th Sept. is published in the *Gazette*:—

Banks.	Average Amount.	Specie in Reserve.
Oriental Bank Corporation ...	$451,830	$200,000
Chartered Mercantile Bank of India, London, and China ...	452,386	160,000
Chartered Bank of India, Australia, and China	521,023	200,000
Hong Kong and Shanghai Banking Corporation	1,430,812	500,000
Total	$2,856,051	$1,600,000

Great indignation has been caused at Macao by the high-handed action of the Hoppo, who has commenced to tax provision junks as well as strictly enforcing the squeeze on those carrying ordinary merchandise. A Portuguese official has been sent to Canton to remonstrate, and reprisals are threatened as soon as two men-of-war now on their way out arrive. Trade at Macao is said to be almost extinct.

The chief officer of the Chinese revenue cruiser *Anlan* was brought before the Mixed Court at Canton, on the 27th Sept., to answer the charge of causing the death of the Chinese steward on board, surnamed Cheong. It was alleged that the chie officer gave the steward a push while he was leaving the vesse on resigning his post, and was knocked into the water, from which he never came out alive. Mr. Murray—the officer referred to—was acquitted.

The Viceroy of Canton transferred his seals of office to the Governor on the 30th Sept. He is now buttonless, and is in a position no better than one of the subjects over whom he lately ruled. His career in Canton barely lasted six months, he having assumed office on the 1st March last.

Another pump has been ordered to be sent to the disabled steamer *Sunda*, so as to enable those engaged upon the vessel to pump her out entirely, between the tides. It is hoped that we may see the *Sunda* in harbour in about a fortnight's time, as she will float as soon as the accelerated pumping power is brought to bear—three-fourths of the hull being perfectly sound.

The first cricket match of the season—Club Eleven *versus* Twenty-two—took place on the 2nd Oct. The ground had been got into fair condition, and some good play enlivened the afternoon.

At a meeting of the Hong Kong Yacht Club Mr. W. H. Forbes was elected Commodore, Mr. J. McLeod Vice-Commodore, and Messrs. C. F. Nunn and A. MacG. Heaton as members of Committee. Mr. E. Beart was re-elected Honorary Secretary and Treasurer.

W. C. Edwards and S. R. Rozario, bankrupts, appeared on the 4th October to apply for their discharge, but the application in each case was adjourned *sine die*.

Captain Templer and the divers employed at the wreck of the steam-ship *Japan* have given over operations for the season and returned here.

H.M.S. *Princess Charlotte* has cleared for Canton, where she will be broken up.

It is rumoured that the Chinese intend to establish a company of merchants and commission agents for silk and tea, with a capital of 100,000 taels, a branch of which is to be opened in Lombard-street, London.

The condition of the River Min between the Anchorage and Foochow is again attracting attention. It is filling up very fast, partly through junks being allowed to discharge their mud ballast in the fairway, partly through the neglect of the authorities to provide steam dredges.

An edict has been published in the *Peking Gazette* confirming the appointment of Kwo-Sung-Tao and Hu K'ien-shon as envoys extraordinary on a mission to England, and conferring the button of the second rank upon them.

It is stated that Li Hung-chang has sent to Europe for six iron steamers, to be built to carry two 160-pounder guns, each gun to fight all round. The builder is to decide if the ships shall be turretted. It is believed they are intended for the defence of the Peiho.

PHILIPPINE ISLANDS.

MANILA.

(Translated for the *Straits Times*).

The Manila *Comercio* gives some further particulars of the novel construction of large vessels as well as small craft, introduced by Mr. Jackson, of that city, which, on experiment, are found to have many advantages over former plans, both in speed and capacity. A newly designed craft on this model, named the *Ensayo (i.e., The Trial)*, has lately been launched at Manila. The *Comercio*, after stating that its trial trip on the river there gave satisfactory results, concludes a notice on this subject as follows:—

It is now intended to try it in the bay, and, if the experiments result in showing the goodness of the system, it may be said that before long a complete transformation of the class of vessels now used for carrying purposes will be effected. Once more have we to praise Mr. Jackson for his unwearied desire to solve problems relating to ship-building, a subject with which he has given proofs of his fitness to deal.

It would appear that the *Ensayo* is, in fact, a sort of modified lorcha.

Respecting the construction of railways in the Philippines, the *Comercio* says:—

We reproduce in our issue from the *Gaceta*, the Royal decree relating to concessions for, and the construction of railways in these islands, a subject which, although it does not attain here the importance it possesses in other countries, may, and doubtless will, become important at a not distant date. Surveys are now being made for a railway to the Pambanga, and, we believe, as far as Pangasinan, which, as is supposed, is to be the first one to be constructed. Members of the mercantile community here do not fail to collect information respecting whatever bears upon the subject, in order to turn it to account, and to utilise the matter when it is taken in hand.

SIAM.

BANGKOK.

In a recent issue we noticed that some excitement had been caused at Bangkok, through the approach of a body of Chinese marauders, supposed to be from the Province of Yunnan; and,

Digitized by Google

by the mail just in, we observe that a correspondent of the *Straits Times* at that port gives further details of the matter. It appears from his account that the nucleus of the 1st Corps of the Siamese Army left Bangkok about a fortnight ago, and was early in October last at Saraburi, seventy miles N. by E. of Bangkok, collecting transport for its advance to Korat and North Eastern Siam. The nucleus of the Army of the North was to leave on the 10th of that month and establish its headquarters at Pi-chai, two hundred miles north of Bangkok. The third Army, the principal army, of which the 1st Corps is but the advanced guard, was to leave one month later, and march to North Eastern Siam *vid* Korat, which was to be its base. The 1st Corps consists of six thousand men led by Chao Phya Mahindr. This General will be under the orders of his Royal Highness Somdet Krom Pra Bamrap Parapax, the King's Uncle, Commander-in-Chief in the Army of the North-East. The Army of the north was commanded by the Minister of the North in person. The number fixed for these armies was not ascertained, but it was believed that at least thirty or forty thousand men would be engaged. Strange to say, scarcely anything was known of the enemy, the Haw Chinese. It was, however, reported that they were rebels driven from China, who first with permission of the King of Cochin China established themselves in Tonquin, and were extending their dominion into North-Eastern Siam. It further appears that in consequence of Yunnan having been for many years the scene of civil war, a large number of its more peaceably disposed inhabitants have been driven to Siam and Cochin China for refuge. The Imperial armies of China were long defied by the Mahometan rebels of Talifoo, but ultimately crushed them, and with less difficulty put down the rising of the true Chinese, who, emulous of the success of the Tae Pings, and believing in some prophet who announced the end of the Tartar rule, rose to the war cry of "China for Chinamen." These defeated patriots are supposed to be the present invaders of Siam. A number of them have been for several years established in the city of Chieng Kwang, otherwise called Pruen, and their rule has extended over the eight nearest cities, and eight or ten thousand square miles of country inhabited by Laos people called Puen, and by numerous tribes of Kha and other savages.

From private advices of a later date we have reason to believe that the expedition has been entirely successful, and that these marauders have been effectually expelled. The affair has not been without some use, as it has afforded the Siamese an opportunity of practising themselves in the expedition of troops somewhat upon the European principle.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 21st Oct.; the P. and O. mail from London Sept. 17 was received on the 16th Oct.. We take the following items of intelligence from the *Straits Times*:—

The criminal Assizes were opened in the commodious and elegant new Court House, facing the Esplanade, and the Bench was graced on this occasion by a number of ladies. The Chief Justice made a congratulatory address to the members of the Bar, to which the Deputy Attorney-General replied, and the ladies were afterwards entertained at tiffin in the Judge's Chambers. The only case of public interest tried so far has been the prosecution of seven well-known Boat Quay gambier and pepper traders on a charge of rioting, with minor counts, in having broken into houses where coolies were kept in confinement, during the excitement about "kidnapping" which prevailed in the latter part of last year. The traders were tried before a special jury, who, after hearing the evidence for the prosecution, submitted to the court that they were able to arrive at a verdict without hearing evidence for the defence, they being in favour of acquittal by a majority of five to two.

Sir William Jervois gave no explanation of his policy towards Perak in Council but a proclamation was issued in the *Government Gazette Extraordinary* reciting that whereas the Sultan and chiefs of Perak had all failed to fulfil their part of the Pangkor Engagement, and had requested the British Government to undertake the Government of Perak, this Government will appoint Commissioners and Deputy Commissioners to administer the affairs of that State with the assistance of a Council of the Malay chiefs. This is a long stride in advance of the system under which the residents have hitherto been vainly endeavouring to establish order and good government, with no further power than that of advising of the native rulers, and at the same time is better than annexation, which would be attended with difficulties, and might seriously embarrass this Government in its dealings with the other Native States.

PROCLAMATION.

By His Excellency Sir William Francis Drummond Jervois, Companion of the Most Honourable Order of the Bath, Knight Commander of the Most Distinguished Order of Saint Michael and Saint George, Colonel in the Corps of Royal Engineers, Governor, Commander-in-Chief and Vice-Admiral of the Colony of the Straits Settlements, &c., &c., &c.

WM. F. DRUMMOND JERVOIS.

Whereas on the 20th day of January, 1874, an engagement was entered into at Pulo Pangkor between certain Chiefs of Perak among themselves and with the then Governor of the Colony of the Straits Settlements, Colonel Sir Andrew Clarke, R.E., K.C.M.G., C.B., on behalf of the British Government; whereby, after reciting that a state of anarchy then existed in the Kingdom of Perak, owing to the want of settled Government in that country, and the non-existence of any efficient power for the protection of the people and for securing to them the fruits of their industry; that large numbers of Chinese were employed and large sums of money invested in tin-mining in Perak by British subjects and others residing in Her Britannic Majesty's possessions, and that the said mines and property were not adequately protected; that piracy, murder, and arson were rife in the said country, whereby British trade and interest greatly suffered, and the peace and good order of the neighbouring British Settlements were sometimes menaced; and after further reciting that certain Chiefs of the said Kingdom of Perak for that time then being had stated their inability to cope with their then difficulties, and together with those interested in the industry of the country, had requested assistance; and that Her Majesty's Government was bound by treaty stipulations to protect the said Kingdom and assist its Rulers, articles of arrangement as therein specified were agreed to with a view of establishing order and good government in the State of Perak.

And whereas the then Governor of the Straits Settlements on the 2nd day of November, 1874, issued a Proclamation informing all people that a letter had been received from the Right Hon. Earl of Carnarvon, of Highclere Castle, Newbery, High Steward of the University of Oxford, Constable of Carnarvon Castle, Doctor of Civil Law, Principal Secretary of State to Her Most Gracious Majesty Victoria, of the United Kingdom of Great Britain and Ireland, Queen and Empress of India, Minister of the Great Queen, in which the Minister of the Great Queen giving the Orders of the Great Queen's Government says that the said engagement is approved of by the Great Queen, and the Minister charges the Governor to acquaint the several Chiefs who have entered into these agreements that Her Majesty's Government will look to the exact fulfilment of the pledges which have now been voluntarily given, and will hold responsible those who violate the engagement which has been solemnly agreed upon;

And whereas copies of the said Proclamation in the Malayan language were delivered to all the Chiefs who signed the said engagement, and were distributed throughout the country of Perak and otherwise made known to the Chiefs and people of Perak;

And whereas the said articles of engagement have been fulfilled in every respect on the part of the British Government, but the said Chiefs of Perak have not fulfilled, and are now unable to fulfil, the said engagement on their part, and they have no efficient power to administer the Government of the country of Perak, nor to maintain peace and order therein, and unless timely steps are taken, the said country is likely to revert to a state of anarchy and confusion, whereby British trade and interests must greatly suffer, and the peace and good order of the adjacent native States under British protection, as well as of the neighbouring British Settlements be seriously endangered;

And whereas the people in Perak are greatly oppressed by certain lawless Chiefs and Rajahs, whilst no steps are taken by the Sultan and other native authorities to put a stop to these evils, so that the gravest crimes are committed without fear of inquiry or punishment;

And whereas this conduct of the Perak Chiefs, with the absence of all law to protect life and property, has hitherto deterred foreigners from investing capital in Perak to any considerable extent, and the resources of the country are still undeveloped and likely to remain so, without some radical change in the Government and administration of justice; and whereas the Rajahs and Chiefs of Perak are divided into factions, parties, and individual interests, fostering and encouraging jealousies and enmities which they confess themselves unable to reconcile; and whereas certain persons, British subjects and others, not subjects of the State of Perak, have engaged and are engaging in illegal transactions with certain chiefs of Perak which tend to create interests subversive of order in the State and hostile to the interests of the Straits Settlements; and whereas the British Government has incurred, on behalf of the Government of Perak, financial responsibilities for which there is no adequate security under the present system of government; and whereas the Sultan of Perak and other chiefs of that country, with the view of reconciling opposing factions and promoting order and good government in the country of Perak, have requested Her Britannic Majesty's Government to administer the government of Perak in such way and manner as Her Britannic Majesty's Government may think most beneficial;

Now, this is to make known to all people that, in compliance with the request of the said Sultan and Chiefs of Perak, Her Britannic Majesty's Government have determined to administer the government of Perak in the name of the Sultan, and to this end His Excellency the Governor of the Straits Settlements is about to appoint Officers, who will be styled Commissioners and Assistant Commissioners of Her Majesty the Queen, to carry on the Government of that State under His Excellency's instructions; further, that the Sultan of Perak has invested such British Officers as are or may be accredited to his Highness from time to time as such Commissioners or Assistant Commissioners, as aforesaid, with powers to issue and enforce Proclamations and Orders, and generally to administer the Government of Perak.

And this is further to make known that a Malay Council, consisting of Rajahs of Perak of the highest rank, will be appointed to aid the aforesaid Commissioners in matters touching the affairs of the Government of Perak. And this Proclamation is especially to make known to all the inhabitants of Perak and others whomsoever it may concern, that the Government of Perak will hereafter be carried on in pursuance of the arrangement herein proclaimed, and to warn all people

Digitized by Google

to conduct themselves accordingly. Given at Singapore, this 15th day of October, 1875, by his Excellency's command, C. J. IRVING, Acting Colonial Secretary.

The distinguished Russian traveller and explorer, M. Mikluho-Maclay, returned to Singapore, and has furnished the following brief details of his very venturesome journey up the Malay Peninsula. He traversed the States of Johore, Pahang, Kalantan, Lege Sa Rumen, Jalor, Patani, Todion, Teba, Tscheno, and Sangora, and he went back to Quedah, after a journey on foot, and in part upon elephants, of one hundred and thirteen days.

M. M. Maclay states that he found all the Malay Rajahs (always excepting his Highness of Johore) anything but glad to see him, and in fact he was regarded with the greatest mistrust, which oftentimes retarded his journey. The conduct of the Siamese Rajahs, however, was a striking as well as welcome contrast to the distrust and bad will of the Malays. In spite of all obstacles, the good and bad wishes of friends and foes, the world generally will be glad to learn that M. M. Maclay made good his way and performed a feat which has never before been achieved by any European. He declares himself satisfied, moreover, with the scientific results of what we venture to call one of the most difficult and dangerous journeys ever undertaken by an European. M. Maclay was in danger of his life at any moment after leaving Johore, and we heartily congratulate him on his safe arrival back, as well as his success. We learn M. Maclay proceeds to Java to repose and recruit in the cool retreat of Buitzenzorg.

We learn that Mr. Daly, one of the surveyors who recently surveyed the country up the Moar river and across to Pahang, is about to make a second attempt to survey the district between Sunghie Ujong and the Moar river. The opposition of the Rumbowe people was, it is believed, due to the fact that the surveying party were going to Pahang, a State to which the Rumbowe people are very unfriendly; but in order to prevent molestation in the present excursion, we understand Mr. Daly has asked for a military escort from the troops stationed at Sunghie Ujong.

The Colonial steamer *Pluto* left for Klang, taking down Mr. Davidson, the Resident. After effecting the relief of the light-house in Malacca Straits, the *Pluto* touched at Malacca, and returned to Singapore.

His Highness the Maharajah of Johore has been invited to proceed to India to attend a grand investiture of the Star of India, during the visit of H.R.H. the Prince of Wales.

The United States frigate *Tennessee*, the flagship of Rear-Admiral Reynolds, commanding the Asiatic squadron, anchored in the harbour this forenoon, and saluted the British flag, the salute being returned from Fort Canning.

The public will be glad to learn that his Excellency Sir William Jervois intends to have an office in the Public Buildings, where he will usually attend on two days of the week for the transaction of business. This arrangement is made for the convenience of the various departments, with a view to diminish the numerous and frequently vexatious written references to his Excellency now rendered necessary by the scattered location of the various offices and their distance from his Excellency at Government House, and it will enable all who have business with his Excellency to do so without the trouble and loss of time now entailed by having to go to Government House for this purpose.

It may not be generally known that, in addition to his duties at St. Andrew's Cathedral, the Venerable Archdeacon Hose also officiated as military chaplain at this station. The duties at St. Andrew's are being performed by the Rev. Mr. Gomes, and we are glad to learn that the Rev. Frank Smith will officiate as military chaplain during Mr. Hose's absence.

A telegram announces that the screw-steamer *Medina*, Captain Black, belonging to the Singapore Steamship Company, has gone ashore near Aden, and there is no hope of saving the vessel; she was on her voyage to Jeddah, with pilgrims. The steamer *Timour* has been chartered to take on the pilgrims, and no lives were lost, so far as is known. The block of the vessel, we believe, was insured in London.

PENANG.

The *Penang Gazette* of the 21st ult. contains the full report of Lieut. Governor Anson for the year 1874, which was laid before the Legislative Council. The Finances of the Settlement again exhibit a considerable increase. The excess of Revenue over that of 1873, was $51,529.83; the result of an increase of $56,417.55, and a decrease of $4,887.72. The value of the imports and exports together was $36,006,634, being an increase over their value in 1873 of $4,190,073. The value of the imports alone was $17,023,461, being an increase over that of the imports of the previous year of $2,449,211. The increase took place principally in the imports from the United Kingdom, $241,256; British India, $435,650; Hong Kong, $466,956, Singapore and Malacca, $890,915; China, $192,195; Germany, $8,827; Italy, $1,570; Japan, $38,040; Malayan and Peninsula, $338,505; Portuguese colonies in India, $1,586; and Sumatra, $179,217. The actual increase was thus distributed: United Kingdom, $241,256; British colonies, $1,625,336; Foreign countries, $582,519. There was a decrease in the value of imports from British Burmah $117,705; from Ceylon of $20,400; from Africa of $19,325 from Arabia of $6,520; from France of $18,876; from Java of $3,300; from Siam of $127,388; and from Sicily of $2,672. A rather serious error in regard to finances (which it is to be hoped will be at once remedied) is pointed out in the report. It appears that the expenditure, as shown in the Penang returns, does not represent the true expenditure of the settlement; several items, some of which—such as military contribution, conveyance of mails, stationery, printing, &c., are considerable, being included in the estimates and accounts of the Settlement of Singapore. This has misled the public of Penang into the belief that the revenue of this Settlement far exceeds the actual expenditure, and that, in consequence, the surplus revenue thus accruing must be very considerable; and in this belief they have often complained that the assumed large surplus has been expended on works of public utility in Singapore, instead of in Penang.

The sub-committee appointed by the Penang Association to report on the Government reclamation scheme for Beach-street have sent in their opinion with reference to the late Governor's scheme. Having consulted the various owners of property adjoining the sea, they have to report that there is only one opinion with reference to that scheme, and that is, that such an extensive reclamation as is therein contemplated is not called for, and far exceeds what was aimed at by those who signed the petition to Government in October, 1873. To ascertain, however, what their wishes really were on the subject of a reclamation on a smaller scale, an amended scheme was proposed, but on its being laid before the owners of the various properties from the Jetty to China-street Ghaut—ten in all—only a minority were in favour of it, and the majority, considering that the public roadway would rather increase than diminish the existing difficulties of shipping cargo, and that such a reclamation would decrease the value of their properties, declined to move in the matter.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—For some little time after date of last report (25th Sept.) transactions continued on a fair scale, but had since gradually lessened, and values had for the most part, declined. Yarn was in limited demand, though more inquiry was apparent for low qualities of 16/24; 24/32 was quieter. Shirtings, with exception of 7 lbs., were lower, and, at the moment, it was difficult to effect sales. T-Cloths, 7 lbs., had been in better demand. Small sales had been made of Drills, Indigo Shirtings, Turkey Reds, Cotton Sateens and Prints; but Velvets were neglected. For Woollens the inquiry had been limited to Black Lustres (of good quality,) Mousselines and Blankets. Sales of various kinds of Cloth had been made at ruinous rates. In metals there had been more doing, a small advance offered by dealers having induced business.

NEWCHWANG.—Messrs. Bush Brothers Circular says:—Business continues dull. Manufactures are neglected. Small lots of American Drills found buyers at Tls. 3.20; English Drills, 15 lb., at Tls. 2.35; 6 lb T-Cloths, at Tls. 1.13; 7 lb. do., at Tls. 1.35.

HANKOW.—Woollens are reported in moderate demand. Cottons very dull.

CHINKIANG.—Messrs. Spencer and Wolff write:—There has been hardly anything doing in Piece Goods. Some few dealers have arrived, but as yet their transactions have been of too trivial a nature to establish quotations. Grey Shirtings: The only goods inquired for are those saleable at Tls. 1.58 to 1.65 per piece, the better makes attracting no attention. T-Cloths: Here again dealers refuse to look at anything but cheap makes of 6 lb. and 7 lb cloth. English Drills still continue scarce and wanted. Fancy Cottons and Woollens have ruled very dull.

SHANGHAI.—The Chamber of Commerce Circular says:—Grey Shirtings: Although the market has not been at all animated, there has been all through a steady demand for the lowest qualities of 7 and 8¼ lbs. both for local and outport consumption, and for Japan. The sales of such goods aggregate a large total, and it is only there comparative scarcity that prevents further extensive business at the same, or perhaps even better prices. In medium and best goods there has been little doing, and old rates can hardly be said to be maintained. Heavy Shirtings are quite neglected, and of nominal value only. White Shirtings have been very little inquired for. Where business has resulted it has been at lower prices, the more marked reduction being in the finer counts. T-Cloths of all descriptions may be quoted lower. Transactions have been only moderate, and confined to common qualities. Mexicans are quite out of demand. American Drills and Sheetings are saleable at a reduction. Jeans are out of stock. English Drills may be quoted a little lower, but sales have been made freely, and demand continues. In Jeans sales have been made at lower prices, but inquiry has been extremely limited. English Sheetings have been quite neglected, and are lower in value. Dutch Drills are saleable at a decline, but stocks are increasing. Fancy Cottons show little change.—Assorted Chintzes are scarce and the turn higher. Velvets on the contrary are only saleable at lower prices. Woollens.—Spanish Stripes have been sold both privately and at auction at old prices to a slight advance, and continue in fair demand. Medium Cloth of common quality is wanted, but the better descriptions are extremely dull. Camlets and Long Ells have been offered freely at auction, but competition has barely sufficed to maintain old rates. Common Lastings are in moderate demand, but the better qualities are not wanted, and are lower. Figured Orleans can be placed at low prices.

Digitized by Google

TIENTSIN.—Common Shirtings were readily saleable; in other Cottons there was little doing. C. P. H. Camlets were inquired for.

HONG KONG.—Business had continued dull. Cotton Yarns: Values had undergone no change, and the sales reported are very moderate; the only inquiry of any importance was for Nos. 28 to 32, which were very scarce, and were held for figures above the ideas of dealers. Piece Goods: A fair inquiry existed for 7lb. Grey Shirtings of certain qualities, but 8·4lb. were not in immediate request, and the heavier weights were altogether neglected. White Shirtings continued very dull of sale. 6lb. T-Cloths of best make were scarce and wanted; ordinary 7lb. entirely neglected; but 8lb. of superior quality had been freely bought. English Drills of 14lb. weight had been in request, and had commanded a slight improvement in price. Woollens: But little business had been done in articles under this head, and few changes were reported.

CANTON.—Lead: There had been some small inquiry, and quotations were—L B, $8.25 to 8.30; W B, $8.35 to 8.40. Quicksilver: Prices have advanced to $110 to 112 per picul.

BATAVIA.—There had been no improvement in the state of the market for Cotton Manufactures, if anything the demand had been duller, which may be partly attributed to the occurrence of the Native Fast. Sales had been of an extremely unimportant nature, and prices of nearly all descriptions of goods had further given way.

SINGAPORE.—The market had been quiet, although the inactivity had been less extreme than previously; the market had been benefited by the continuance of some demand for Siam, and also by the commencement of inquiry for the Bugis traders, who had arrived in large numbers, although they had not yet begun to buy freely.

PENANG.—The market had been in a very stagnant condition, and only a small business had been practicable at generally unaltered rates.

EXPORTS.

—o—

TEA.

YOKOHAMA.—Business had been restricted, and towards the close was almost suspended, owing to the general unfavourable tenor of advices received from New York by wire. Native holders were not so far prepared to reduce their demands to meet home rates, and, in consequence, quotations were in a measure nominal. The sailing vessels Ambassador and Cremona were on the berth for New York at £2 per ton of forty cubic feet; the steamer Fleurs Castle, loading at Shanghai for New York, via Suez Canal, had engaged from here, about 660 tons tea freight, at £3 15s.

HANKOW.—Messrss. Evans Pugh, and Co's. report says:—Our last bore date of the 13th September, since when a considerable amount of business has been transacted, the settlements reported having amounted to about 11,500 chests, against 6,000 Chests during the corresponding period last season. Shipments to Shanghai, consisting of the commoner grades, we estimate at 8,500 Chests, against 10,000 Chests in 1874. Prices of the better classes have been fully maintained. Medium kinds may be quoted about a tael a picul higher, the advance being caused chiefly by advices of the rates paid in Shanghai for such. No transactions have been reported in Oonahms, so the quotations we give below for these descriptions must be considered as nominal. Supplies of third crops are rather heavier than those coming to market at the same time last year, but the total Export for the season is not likely to be at all excessive. The Export of Hankow Teas per Customs Returns is now 52,774,192 lbs. against 51,966,600 lbs. in 1874. Quotations are:—For Second and Third Crop Oopacks, Tls. 11.00 to 16.50; ditto Oanfas, Tls. 11.75 to 13.50; ditto Oonahms, Tls. 10.00 to 11.00.

KIUKIANG.—Black: Supplies had been fairly liberal for the time of year. A few chops had been settled on this market, but the bulk of the arrivals had gone forward to Shanghai on native account. Export from the commencement of season to 30th Sept., 1875, 20,851,746 lbs.; do., 1874, 20.058,056 lbs.

SHANGHAI.—Black: A fair demand had existed, and settlements as a rule showed worse value than those previously reported. The market closed firm. Supplies had been moderate even for the time of year, and the stock on offer was reduced to a small compass. Settlements for the fortnight, 12,086 chests; stock, 7,050 chests. Quotations, duty paid:—Hohow, 9½d. to 1s. 7d.; Oonam, 9¾d. to 1s. 0½d.; Ningchow, 1s. 0½d. to 1s. 9d.; Oopack, 10d. to 1s. 2¼d. Green: In the early part of the interval a good demand existed at prices last quoted. Telegrams having been received giving unfavourable valuations of opening settlements, less business was being done, and stocks were accumulating. Pingsueys found little favour with buyers generally, notwithstanding that they were being offered at reduced prices. The following were about the prices paid;—For Country Tea, Tls. 23 to 3 8 per picul; Pingsuey, Tls. 29 to 32; Local-packed, Tls. 21 to 21.5; stock, 93,950 half chests.

FOOCHOW.—Messrs. Westall, Galton and Co.'s weekly letter says:—Buying has continued on a moderate scale, operations in Congou being almost entirely for the London and Continental markets. Congou.—Settlements during the past few days, in the common to good common kinds, show rather better value, but with this exception, prices for all grades remain unaltered. The stock and daily arrivals are now mostly composed of very undesirable Teas, and parcels with any pretensions to quality continue to realise extremely full values. Souchong.—Business has continued to about the same extent, prices having rather a hardening tendency towards the close of the week. Oolong.—A few small strings have been taken for America at former rates. Flowery Pekoe.—No transactions to report. Scented Teas.—Settlements show no change.

CANTON.—Messrs. Deacon and Co.'s Report says:—During the interim a fair amount of transactions in tea had been made, and the advanced rates then advised had been maintained. Congous: Shipments from both this port and Macao have consisted chiefly of contract teas, musters of which have not been generally shown on the market; the few market settlements reported show no change on the business of last English mail. Scented Teas: There has been a continued inquiry for Capers, and purchases, which include many parcels of undesirable tea, have generally been made at fully the advance quoted in our last report. There has latterly been a better selection on offer, but at the close teamen are demanding most exorbitant rates. From the anxiety to buy leaf in the country, and from the reckless prices paid there, it would appear that natives have entered into some considerable contracts. Pekoes have been dealt in to a fair extent, and we quote no alteration, fully previous rates having been paid: "long leaf" kinds still form the bulk of the settlements, "new makes" being very scarce. Canton Greens: No transactions are reported.

SILK.

YOKOHAMA.—Subsequent to the date of last report, and on receipt of more favourable telegrams from Europe, a large business was done at stiffening rates; since then the market had become quieter, and there was more disposition amongst dealers to sell currently. Transactions, which included a few parcels of Filature Silk at $550 to $670 (London cost 20s. 6d. to 24s. 9d., Lyons cost f.57 to f.69), consisted principally of Hanks. The arrivals of Oshius were small, and had been readily taken at previous quotations. Silkworms' Eggs: Total arrivals 300,500 cards, and there had been no transactions. Last year, at same date, the arrivals were 1,450,000, and the settlements 400,000 cards.

SHANGHAI.—Business during the fortnight had been only on a fair scale. The higher prices in many instances asked by holders had driven most English buyers out of the market (especially as the lower costing grades of Tsatlees and Taysaams showed a sad alteration as regards packing and sorting when compared with earlier shipments), and Continental houses, although still buying, were hardly so energetic as when the lower Silks were better. Kiahings were still in great request, and prices in some instances Tls. 30 above the lowest point of the season, and a large business had been done in re-reels for America at rather higher rates. The general market closed very inactive; holders, although possessing a large stock, did not show any uneasiness, although rather eager in their demands for offers at "market rates." We hear of hardly any known chop Silks having been settled. Settlements, Chinas, 4,600 bales. Total settlements since June 1, 1575, 37,800 bales, against 1874-75, 46,000 bales; 1873-74, 32,700 bales. Comparative unsold stock on this market, at date 1875, 15,000 bales; 1874, 11,000 bales; 1873, 6,000 bales.

CANTON.—A fair business had been transacted. Shipments per last French mail steamer were 387 bales, and since then 700 bales are reported to have changed hands. Fine descriptions had hardly been dealt in, and the demand had run steadily on No. 4 and common quality. Prices had ruled as last quoted, and there was no prospect of a decline. About 1,000 bales of fifth-crop Silk had been received from the country, the sixth yield was expected to be somewhat short, as leaves were reported to be scarce.

JAMES WEST, PUBLISHER,
79 GRACECHURCH STREET, LONDON, E.C.

The London & China Telegraph.

LONDON: MONDAY, NOV. 22, 1875.

THE official career of Mr. WADE, who, as reported in our last issue, has just been made a K.C.B., extends over a period of more than twenty years. He first landed in Hong Kong in the year 1842. He was born in the year 1820, and entered the Army as ensign in the 81st Foot in 1838, and served afterwards in China and elsewhere in the 42nd Highlanders and the 98th Foot, from which he retired as lieutenant in 1847. He was appointed Interpreter in the Canton Dialect to the Supreme Court, Hong Kong, in 1846, and in 1847 Assistant Chinese Secretary; in 1852 he was made Vice-Consul at Shanghai, and subsequently was appointed an Inspector of Customs for the Chinese Government. In 1855 we find him appointed Chinese Secretary at Hong Kong, in succession to the well-known Dr. GUTZLAFF, and in the same year sent by the late Sir JOHN BOWRING on a special mission to Cochin China. Owing to his familiarity with the native character and language he was attached to Lord ELGIN'S Mission to China in 1857-59, and in the last-named year he was appointed Chinese Secretary to our Mission at Peking. In this capacity he accompanied Lord ELGIN'S Special Mission to Peking in October, 1860. In 1861 he was nominated a Companion of the Bath, Civil Division; in the following year he became Chinese Secretary and Translator to the British Legation in China, and was Acting Chargé d'Affaires at Peking from June, 1864, to November, 1865, and again from November, 1869, to July, 1871, when he was appointed Envoy Extraordinary and Minister Plenipotentiary and Chief Superintendent of British Trade in China.

BY the telegrams, official and other, which we give elsewhere, with reference to the outrage at Perak, we are glad to find that the fears at first entertained that there might be a general rising prove unfounded, and that the matter is, as we suggested, confined strictly to the district of Perak. It is also a subject of congratulation that some unsatisfactory rumours which had gained currency as to the origin of the quarrel also prove to be groundless. It is to be regretted that a journal of the influence of *The Times* should have suggested so miserable a policy as that which it indicated upon the assumption that the whole difficulty had been caused by "irrepressible commerce." Nothing could be more weak or more unsuited to such a contingency as that which has arisen than to withdraw the Resident and retire from what we have undertaken. So obviously futile and dangerous a policy need not be discussed in writing for people possessing any kind of knowledge of the subject. We have only one duty to perform, and that is to re-establish the Residencies upon a stronger basis, and under better and more favourable conditions than those entered into by the treaty between Sir ANDREW CLARKE and the native Rajahs.

A STATEMENT is made on the authority of a REUTER'S telegram to the effect that the Portuguese Government will take steps to put a stop to the blockade of the port of Macao and the arbitrary action of the Chinese cruisers in those waters. We trust that this may be made an opportunity of strengthening Sir ARTHUR KENNEDY in the action which he is taking in reference to the blockade of Hong Kong by the Customs cruisers. The point is of much importance; as if the Portuguese should be able to withstand the action of the cruisers, and thus afford protection to the native traders which they cannot obtain at Hong Kong, the effect would obviously be to divert a considerable amount of trade from the latter place.

THE HONG KONG BLOCKADE.

(To the Editor of the *London and China Telegraph.*)

SIR,—Referring to the article on the Blockade of Hong Kong, in the 8th November issue of your paper, I beg leave to direct your attention to a point which seems to have escaped your notice, as well as that of others, who have considered the much-discussed question of the advisability of allowing the Government of China to appoint a Consul to represent the Empire within the colony of Hong Kong, viz., that such an official should not necessarily be a Chinaman. In the event of a foreigner holding such an office there would be no reason to apprehend that the appointment would, to quote your own words, "establish an *imperium in imperio* in regard to the native population, and cause them to be subjected to squeezes, and otherwise harassed in a manner detrimental to the interests of the colony." I do not wish to express an opinion upon the important Blockade question, which will no doubt engage the earnest attention of Sir Arthur Kennedy on his return to Hong Kong; but merely to point out a circumstance in connection with the suggestions, respecting the appointment of a Consul for China, which has hitherto been lost sight of.

Should it be deemed prudent to let the Chinese Government be represented in the colony at all, surely it will not be difficult to find a European or American, possessing a sufficient knowledge of the Chinese language, able to form a connecting link between the different interests now at work, and thus be the means of settling the irregularities which threaten to ruin the trade of Hong Kong entirely.—I am, &c.,

D.

London, Nov. 15, 1875.

Literature.

The Language and Literature of China. Two Lectures, by ROBERT K. DOUGLAS, of the British Museum, and Professor of Chinese at King's College, London. London: Trübner and Co.

The above two lectures, which we noticed at the time they were delivered, will form a valuable text-book for scholars, as well as an interesting and concise dissertation upon a very important subject for general readers. In the first lecture, Mr. Douglas reviews the construction of the Chinese characters, giving the well known-instances which tend to the idea that they were originally hieroglyphic; but his examples of the various divisions under which Chinese scholars themselves divide the characters go far to show that probably, from a very early period, the writing partook of both elements, and was in part hieroglyphic and in part phonetic, increasing in the latter direction as the language advanced, and it became necessary to make more accurate definitions. It is probable that the old controversy as to whether the original Chinese writing should properly be considered hieroglyphic or phonetic will never be thoroughly decided; but there can be no doubt that in its fully developed state the written language of China partakes of both elements. In regard to grammar, Mr. Douglas follows Stanislas Julien in holding that, although there are no inflexions in the Chinese language, it nevertheless possesses a grammar which is dependent upon the position of words and their connection in the sentences in which they occur. Mr. Douglas alludes to the benefits which might result from the introduction of an alphabetical system, but states that from a Chinaman's point of view the written character is looked upon as unchangeable. The Lecture upon the Literature of China is one of the most interesting which we have read on the subject. It has the great merit of being concise without being spiritless, and gives a large number of facts within a small space, with just sufficient well-digested thought and opinion to keep up the flow of idea necessary to sustain interest in the reader's mind. We regret that our space does not permit of our going at greater length into this subject, but heartily recommend Mr. Douglas's work to all interested in the Language and Literature of China.

Genesis and Science. By the Rev. MUCHLEISEN ARNOLD, B.D., D.D. London: Longman, Green, and Co.

In the course of the above essay, in which the author (who was formerly Colonial Chaplain at Batavia) attacks many of the materialistic views prevalent in the present day, some valuable remarks are made on the subject of Chinese Antiquities. Observing that it is universally admitted that no ancient nation possesses any *historical* record as old as the Hebrews, the writer goes on to notice that Egyptian, Chinese, and Babylonian records will help us greatly in ascertaining the real antiquity of our race, if we carefully eliminate the purely mythical from the historical legends. The Chinese allow ten *Ki*, or mythical ages, in which gods and demi-gods ruled for two or three millions of

Digitized by Google

years; and the Japanese also speak of several millions of years, during which seven heavenly spirits governed the earth prior to the commencement of their national history. The author refers to the record in the Shu-King of the deluge of Yu, as confirmatory of the scriptural account of the Deluge. There are also many other parts of this work which, in addition to its general importance, will be especially valuable to readers in the Far East.

Chinese Sketches. By HERBERT A. GILES, of H.B.M. China Consular Service. London: Trübner and Co.

The above work is written in a pleasing unpretentious style, which contrasts favourably with the highly coloured accounts of China, which from time to time emanate from the press. Mr. Giles gives a truthful picture of the ordinary life, and the general tone of thought of the Chinese, and is temperate and just in the opinions which he expresses. His object, as set forth in the preface to the book, is to dispel the idea generally entertained that the Chinese as a nation are an immoral degraded race—that they are utterly dishonest, cruel, and in every way depraved—that opium, a more terrible scourge than gin, is now working frightful ravages in their midst—and that only the forcible diffusion of Christianity can save the Empire from speedy and overwhelming ruin. His own opinion, formed after an experience of eight years, and with which those who know the Chinese best will agree, is that, with all their faults, the Chinese are a hard-working, sober, and happy people occupying an intermediate place between the wealth and culture, the vice and misery of the West. We observe that with reference to opium smoking, the writer of the sketches under notice is of opinion that though opium is a curse, its effects have been greatly exaggerated; and that where opium kills its hundreds, gin counts its victims by thousands.

The *Geographical Magazine* for November contains a notice of a journey made by Mr. M. Maclai to the Malay Peninsular with the object of ascertaining whether there existed any traces of a Papuan population. The journey was an arduous one, but the results are not final. In the course of his journeyings, Mr. Maclai came into contact with the Orang-Raijet or Orang-Utang people (who are doomed to extinction by the Chinese and Malays constantly penetrating into the interior), and he feels convinced that the above race exhibit traces of admixture with some other race, non-Malay, and probably Papuan. Captain Burton furnishes some important criticisms on Mr. Stanley's recent exploration of Lake Victoria Nianza. Mr. Stanley had impugned the accuracy of Speke's observations, and Captain Burton takes up the cudgels on behalf of his late companion; and, while pointing out that the carefulness of his work (which was already notorious) has been strikingly confirmed by Lieutenant Cameron, also shows how Stanley, through want of experience in observations, has gone wrong. He points out that the perimeter of the lake, which Mr. Stanley has set down as amounting to about 1,000 miles, is on the testimony of his own map only 550 miles or thereabouts. After some humorous remarks on Mr. Stanley's "mangroves growing in sweet water," and his apparent credulity as regards native reports, Captain Burton puts on record his own view of Lake Victoria, which is that, when carefully surveyed, it will probably turn out to contain large and wooded tracts, which in the wet season cause the lands about the Eastern-head of the reservoir of the Nile much to resemble the parts lying near its mouth. Captain Burton, however, does full justice to the actual topographical results obtained by Mr. Stanley in defining the limits of the lake and exploring some of its feeders, as well as to the energy and perseverance displayed by him.

Almost Ashore. Words by THOMAS JENNER, and Music by CHARLES DOUST. London: Robert Cocks and Co.—This song has been composed and published with a view of giving the profits to the training ship *Arethusa*, and is dedicated to the Earl of Shaftesbury. The words form a manly and practical appeal to afford aid to one another in trouble and when "almost ashore"; and they are set to a flowing melody in the key of C major, for baritone or mezzo soprano voice, with an easy accompaniment and *ad libitum* symphony; the whole producing a stirring song likely to become deservedly popular.

Map of India; indicating the Probable Route and Date of Visit of the Prince of Wales. London: Edward Stanford.—This map will be acceptable to all who wish to watch the journey of his Royal Highness. Its great merit is its simplicity. It shows at a glance the route to be taken, the cities and towns to be visited, and the probable dates when the Prince will arrive at them.

NOTE.—In our notice of *Rambles of a Globe Trotter* we omitted to give the names of the publishers, Messrs. Chapman and Hall, Piccadilly.

The collection of M. Bing of Japanese bronzes, pottery, and lacquer-ware, which has been lately on exhibition at Paris, has been purchased by the South Kensington Museum. It consists of a large number of vases, bottles, incense-burners, &c., many decorated with a kind of diaper of the meander pattern in relief.

Shipping Intelligence.

ARRIVALS.

At YOKOHAMA.—From London, Oct. 4, Lorne (str.), Punjaub; from New York, Sept. 23, New Republic; Oct. 1, Ugo.

At SHANGHAI.—From London, Nov. 10, Braemar Castle (str.); from New York, Chinaman.

At HONG KONG and CANTON.—From Liverpool, Nov. 10, Achilles (str.); from Cardiff, Meteor; from Hamburg, Irene.

At BANGKOK.—From Monte Video, Oct. 7, Bianca Pertica.

At MACASSAR.—From Sunderland, Nov.—Vice Admiral May.

At BATAVIA.—From London, Oct. 8, Lea Foam; from Glasgow, Sept. 29, Bromo (str.); Oct. 6, Barbadian; from Cardiff, Reichtstag; from Greenock, 8, Grenada; from Bordeaux, 5, Dupuy de Lome; from Rotterdam, 2, Groningen (str.); Hœk van Holland, Elizabeth; 12, Ocean; from Amsterdam, 8, Dordrecht II.; 13, Conrad (str.); from Mauritius, 5, San Giovanni; from Port Elizabeth, 12, Maria Becker; from Buenos Ayres, 5, Connaught; from Monte Video, 9, C.O. Whitmore.

At SINGAPORE.—From London, Oct. 4, Belle of Southesk; from Liverpool, 13, Estrella de Chile; 29, Banian, from reenock; 18, Crested Wave; from Cardiff, 12, Laura R. Burnham; 13, Queen of the Age, G. F. Muntz, Hengist; 15, St. Bernhard, 18, Centaur.

At PENANG.—None.

DEPARTURES.

From YOKOHAMA.—For New York, H. A. Litchfield; for San Francisco, Hants County.

From SHANGHAI.—For London, Sept. 15, Quang-Se (str.); 19, Cybele (str.), Orestes (str.); 26, Flamingo (str.); 29, Olympia. (str.).

From AMOY.—For New York, Nov. 5, Miako.

From HONG KONG and CANTON.—For London, Oct. 3, Ada; for Trieste, 7, Rover of the Seas.

From BANGKOK.—For London, Oct. 3, Josephine; Nov. 3, Lucia.

From BATAVIA.—For Channel, f.o., Sept. 28, Helene; 29, Sea; 30, Louis de Geer; Oct. 5, Saarikoski; 12, Veritas; 14, H. I. Libby; for Marseilles, 13, John Howard (str.); for Holland, 1, Equator; 5, Vrachtzoeker, Cornelia; 6, Zes Gezusters; 7, Kosmopoliet II.; for Copenhagen, 3, Tordenskjold; for New York, 8, Frolic.

From MACASSAR.—None.

From SINGAPORE.—For Channel, f.o., Oct. 13, Adeline; for Marseilles, 21, Chiara.

From PENANG.—None.

VESSELS LOADING.

At YOKOHAMA.—For New York, Cremona.

At HIOGO.—For London, Merse.

At SHANGHAI.—For London, Ascalon, Halloween, Tamerlane; for New York, Challenge, Fire Queen, Wylo.

At HONG KONG and CANTON.—For London, England's Glory, Melbrek, Evelyn Wood; for New York, Thyatira, Midnight, Harwich, Morro Castle.

At BANGKOK.—For London, Attila; for Marseilles, Rollo.

At BATAVIA.—For Holland, Groningen (str.), Kortenaer, Noordzee Canaal, Mindin, Dordrecht II., Oceaan.

At SINGAPORE.—For London, Belle of Southesk, Estrella, De Chile for Liverpool, Adelaide, Hengist; for Marseilles, Nuovo Guiseppno for Hamburg, August Leffler.

At PENANG.—For Queenstown, Alabama.

FREIGHTS AND CHARTERS.

From YOKOHAMA.—To London, by steamer, Silk $500 per bale; Tea, $18.00, per ton of 40 cubic feet; New York, sailing vessel, £2 per ton.

From SHANGHAI.—To London, by steamer, £25 to £2 10s. per 40 feet; sailing vessel, £2 10s. per 50 feet; to New York, by steamer, £3 10s.; sailing vessel, £2 to £2 10s. per 40 feet.

From HONG KONG and CANTON.—To London, per steamer, £2 7s. 6d.; £2 15s. per ton of 40 cubic feet; sailing vessel, £2 10s. per 50 cubic feet; to New York, £2 5s. to £2 10s. per 40 cubic feet.

From BATAVIA.—To Channel; £3 3s.; to Continent £3 5s. 6d.

From SINGAPORE.—To London, by steamer, dead weight, £2 12s. 6d. to £2 15s.; pepper, £3 10s.; measurement goods, £3 10s.; Hides, £4, sailing vessel, dead weight, £2 5s. to £2 7s. 6d.; light freight, £2 17s. 6d.; to New York, £2 5s. deadweight, £3 to £3 7s. 6d. light freight.

From PENANG.—To London, by steamer, tin, £1 10s.; Tapioca Flour, £3 10s.; to New York, Tin £1 10s.; measurement goods, £4 10s.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Nov. 18, at Falmouth, from Rangoon, Conte Geze Scapary; at Liverpool, King Cerdic; 19, at London, from Foochow, Legislator (str.); from Yokohama, Erl King (str.); at Falmouth, from Akyab, Lesseps; at London, from Singapore, Tynedale; at Leith, from Akbab, Vittoria Chnestro; at Queenstown, from Manila, Admiral Tegetthoff; 20, at London, from Shanghai, Orestes (str.), Blackadder; 21, at Liverpool, from Manila, Papa; from Singapore, Bertie; at London, from Shanghai, Flamingo (str.); at Falmouth, from Manila, Dorothea.

DEPARTURES.—Nov. 17, from Southampton, for Batavia, Friesland (str.); from Sunderland, for Singapore, W. W. Smith; 15, from Marseilles, for Reunion, Aline; 18, from Liverpool, for Rangoon, Prince Patrick; from Sunderland, to Singapore, Mary; 17, from Antwerp, for Rangoon, Admiral; 16, from Hamburg, for Singapore, G. H. Wappaus; 17, from Marseilles, for Reunion, Anita; 21, from London, for Hong Kong, Belted Will; for Yokohama, Banda.

SPOKEN.—Wyk-Ann-Zee, from Amsterdam, for Sourabaya, Nov. 8, 49 N., 6 W.; Mogul, from Singapore, for London, Sept. 29, 34.12 S., 17.29 E.; Amstel, from Batavia, for Amsterdam, Oct. 2, 28.18 S., 9.31 E.; George Croshaw, from London, for Singapore, Oct. 4, 20 S., 27 W.; Asterion, from Cardiff, for Singapore, Oct. 15, 6 N., 24 W.; Haidee, from London, for Colombo, Oct. 18, 6 N., 28 W.

CASUALTIES.—Plymouth, Nov. 21.—The Martin Von Rossen (Dutch barque), from Rotterdam, for Batavia, has put in here leaky.

MISCELLANEOUS.—Suez, Nov. 19, from Foochow, Flintshire, from Shanghai, Teviot, both for London; Galle, Nov. 21, passed, Glenearn (str.); Suez, arrived Nov. 21, Sarpedon, from Liverpool, for Shanghai.

THE MAILS.

PRESENT INWARD P. AND O. MAIL.—BRINDISI, NOV. 18.—The P. and O. Company's steamer Baroda arrived here at 8 P.M., and the mail left at 9.40 P.M. for London.

HEAVY PORTION OF PRESENT INWARD P. AND O. MAIL.—PORT SAID, Nov. 15.—The P. and O. steamer Australia left here at midnight for Southampton, where she may be expected to arrive about the 28th inst.

NEXT INWARD MAIL.—SUEZ, NOV. 16.—The Messageries Maritimes steamer Djemnah, with the inward French mails from China and Japan, left here to-day for Port Said and Marseilles. She may be expected at the latter port on the 23rd inst.

INWARD MAIL, DUE DEC. 13.—GALLE, NOV. 18.—The Messageries Maritimes steamer Ava, with the inward French mails from China and Japan, left here to-day for Aden.

OUTWARD MAIL OF NOV. 12.—SUEZ, NOV. 19.—The P. and O. Company's steamers Mongolia and Assam left here to-day for Bombay and Calcutta respectively.

OUTWARD MAIL OF OCT. 22.—GALLE, NOV. 16.—The Messageries Maritimes steamer Sindh, from Marseilles, Oct. 24, left here to-day for Singapore.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BAIN—On the 2nd Oct., at Hong Kong, the wife of George Murray Bain, of a daughter.
CUNNINGHAM—On the 25th Sept., at Kobe, the wife of J. K. Cunningham, of a son.
KNOOP—On the 20th Sept., at Shanghai, the wife of H. A. Knoop, of a son.
KORTHALS—On the 4th Oct., at Yokohama, the wife of W. C. Korthals, of a son.
LAND—On the 27th Sept., at Ningpo, the wife of J. M. Land, of a daughter.
LAW—On the 28th Sept., at Shanghai, the wife of Alexander Law, chief engineer s.s. *Glengyle*, of a son.
LUCAS—On the 28th Sept., at Hiogo, Mrs. Henry Lucas, of a son.
PICHON—On the 6th Oct., at Shanghai, the wife of Dr. L. Pichon, of a son.
PURVIS—On the 12th Nov., at Rogir, Singapore, the wife of John W. Purvis, of a daughter.
SOUZA—On the 11th Oct., at Hong Kong, the wife of A. J. da Silva e Souza, of a daughter.
STRACHAN—On the 5th Oct., at Yokohama, the wife of W. M. Strachan, of a daughter.

MARRIAGES.

DRISCOLL—MERREDEW.—On the 2nd Oct., at St. John's Cathedral, Hong Kong, by the Rev. Heyward Kidd, Thomas Nathaniel Driscoll, of Waterford, Ireland, to Mary Ann Merredew, of Croydon.
MATTHEW—THOMSON.—On the 15th Nov., at Christ Church, St. Pancras, Rev. Walter E. Matthew, H.M.'s Chaplain, Kandy, Ceylon, to Ada M., daughter of the late Mr. William Thomson, C.E., St. Helen's, Lancashire.
OSWALD—RUSSELL.—On the 17th Nov., at St. Margaret's, Lee, by the Rev. John Digby Russell, brother of the bride, Thomas Ridley Oswald, Esq., to Wilhelmina Catherine, youngest daughter of the late Christopher Russell, M.D., of Enniskerry, Co. Wicklow, Ireland.
WILLANS—SHEWARD.—On the 15th Nov., at St. Matthew's, Paddington, by the Venerable Archdeacon Hunter, William Blundell Willans, eldest son of the Hon. W. W. Willans, of Singapore, to Jane Florine, only child of George Sheward, of Leinster-square, London.

DEATHS.

BELDER—On the 19th Sept., at Macassar, suddenly, Carl Belder, late of Singapore.
CALDWELL—On the 2nd Oct., at Hong Kong, Daniel Richard Francis Caldwell, aged 59 years.
FINLAYSON—On the 19th Sept., at Yokohama, Robert Finlayson, engineer, P. and O. Company, son of the late Mr. John Finlayson, Kincardine-on-Forth.
MALTBY—On the 23rd Sept., at Nagasaki, Samuel Maltby, aged 45 years, formerly of Hanwell.
NOYES—On the 15th Nov., in London, Philip Algernon Noyes, C.E., Government Engineer, Ceylon Railway, aged 32.
STEPHENSON—On the 13th Nov., at Holcombe, Georgina Mary, the beloved wife of Thomas Stanley Stephenson, of Manchester. Friends will kindly accept this intimation.
XAVIER—On the 4th Oct., at the General Hospital, Shanghai, M. F. Xavier, aged 38.

Naval and Military.

We are requested to state that the paragraph which we quoted from a military contemporary, respecting the recall of the late Assistant Controller at Hong Kong, was founded on a misconception, and that officer's withdrawal was solely due to the change resulting from the reorganisation of the Control Department, which is about to take place.

The troopship Juno, Captain Poland, will leave Portsmouth for Hong Kong in a few days, with supernumeraries for ships on the station. She will proceed *via* Suez Canal, calling at Singapore.

Major J. P. H. Crowe, of the first battalion of the 10th Regiment (Singapore), V.C., has been promoted to the rank of Lieutenant-Colonel, vice P. B. Lucas, retired on full pay.

Lieutenant H. J. Johnson, of the 80th Regiment (Hong Kong), has been appointed Instructor of Musketry.

The correspondent of a contemporary writes:—I am extremely sorry to hear from China that a Commander who stands tolerably high on his list, though comparatively young, having been promoted by the now obsolete "haul-down" system, has so far overstepped the mark as to administer corporal punishment to one of his men. It was, I admit, a gross case of insubordination, but it certainly did not call for such a punishment. The Commander in question, being at the time on detached service, took it upon himself to call the offence "mutiny," and so thought himself empowered to go to extremes. It is his first, and we may rest assured it will be his last, attempt at straining the regulations to suit his ideas, for the Commander-in-Chief has not forgotten to let his views be fully known both to the Commander and to the Admiralty; and if their Lordships do not give this injudicious officer a caution I shall be much surprised.

THE CHINESE MISSION TO ENGLAND.

The Hong Kong correspondent of the *Cologne Gazette* observes, referring to the appointment by the Chinese Government of an envoy in London, that the Chinese doubtless expect that this mission will be as successful as was that of Chung-How to Paris after the Tientsin massacre. But Napoleon was at that time absorbed in the war with Germany, and the French Republic was satisfied with a ransom and the execution of some coolies bought for the occasion. "The position of the English representative," says the correspondent, "is entirely different, especially under the present Ministry. The mission may go to England if the Government wishes it; but the negotiations will remain in Mr. Wade's hands as before. There are still some important differences of opinion to be settled between the negotiators. The very first point—'the punishment of the guilty'—is beset with difficulties. Mr. Wade includes in the term 'guilty' all who were concerned, whether directly or indirectly, in Mr. Margary's murder. Now, if it be true that the order to cause the English mission to miscarry on the frontier of Yunnan came from the Government at Peking, then Li and Prince Kung are among the 'guilty.' If, on the other hand, the Governor of Yunnan acted on his own responsibility, he would be among the first to be punished, and after him would come the General Lee-see-tai. . . . The Chinese Government holds that only those who were directly concerned in the murder should be punished—namely, the two or three soldiers who pulled Mr. Margary off his horse and then killed him. On the other points, it will be easier to come to an understanding, though, according to Chinese reports, Mr. Wade asks as compensation for Mr. Margary's relatives 150 myriads of silver (£450,000), while the French got for their nuns only about $7,000 each. The Chinese Government at that time bought thirteen poor coolies for execution at less than $200 a head, and paid the money to their relations. A case came under my personal notice in the province of Canton the other day, where a poor man sold his son to take the place of a robber sentenced to death for $80. The average price of a head, which in such cases is called by the Chinese a 'melon,' is $100." The correspondent adds that the Chinese greatly fear the appearance of a British fleet at the mouth of the Peiho. They have neither ships of war, guns, nor money to make an effectual resistance; and they are threatened on the other side by Russia, who, repeating her policy with regard to the Treaty of Paris during the Franco-German war, has taken the opportunity to make some extensive demands on account of the plundering of a caravan in the year 1872.

THE Bishops of the American Protestant Episcopal Church have collated the Rev. Dr. S. I. J. Schereschewsky, a Polish Jew by birth, who became a Christian, a priest of the Church, and then a missionary some fifteen years ago, and was sent out to China under Bishop Boone, to the vacant post of Bishop of Shanghai. We believe that Dr. Schereschewsky declines to accept this post.

The thirty-fifth annual general meeting of the proprietors of the P. and O. Company will be held at the company's offices, Leadenhall-street, on the 7th proximo, for the purpose of receiving the report of the directors for the year ending the 30th September, 1875, and of declaring a dividend; also for the election of two directors, in the room of Mr. Thomas Stock Cowie and Mr. John Ralph Engledue, two of the present directors, who go out of office by rotation; likewise for the election of two auditors, in the room of Mr. Godfrey and Mr. Deacon, who go out of office; the directors and auditors so going out of office are re-eligible, in conformity with the provisions of the deed of settlement of the company, and they offer themselves for re-election. The dividend will be 2½ per cent., with a payment of 1 per cent. from the proprietors' underwriting account, making (no interim dividend having been declared in June) a total payment of 3½ per cent. for the year.

Monetary and Commercial.

Tenders for £700,000 in bills on India were received at the Bank of England on the 17th inst. The amounts allotted were :—To Calcutta, £385,500 ; to Bombay, £293,300 ; and to Madras, £21,200. Tenders on all the Presidences at 1s. 9½d. will receive about 5 per cent., above in full. These figures show a great falling off in the demand for remittances to the East.

The report of the Trust and Loan Company of Canada for the six months ending the 30th September last state that the balance at credit of revenue amounted to £23,245, and a dividend is recommended at the rate of 8 per cent. per annum, with a bonus of 1 per cent. The sum of £7,727 is carried to the reserve fund, and £1,767 to the next account.

The directors of the English Bank of Rio de Janeiro (Limited) have declared a dividend on account of 4 per cent., free of income-tax, on £500,000, the paid-up capital of the Bank.

The directors of the Borelli Tea Company (Limited) have declared an interim dividend of 7 per cent. on the season's operations.

The directors of John Brown and Co. (Limited) have resolved to declare an interim dividend at the rate of 7½ per cent. per annum.

A petition has been forwarded to Sir Stafford Northcote, praying for a remission of the Marine Policy Duty, signed by the principal merchants, members of Lloyd's, and leading marine insurance companies. The duty is 3d. on every £100 or part of £100, and the Government calculate that they derive £125,000 from it. At present underwriters prefer to insure abroad. They suggest that a penny stamp should be affixed to each policy ; and the increase of business would probably compensate the Government for the loss of revenue.

It is notified that the interest and responsibility of Mr. James Bulloch and Mr. William Cunningham Fairley, in the firm of Bulloch Brothers and Co., at Rangoon, Akyab, Bassein, Chittagong, and Moulmein, ceased on the 15th August, and in the firm of J. and G. Bulloch and Co., London, on the 31st ult. The business will be carried on under the same styles as heretofore by the other partners, Messrs. George Bulloch, James Henderson, and John Halliday, London; James Dickie, Glasgow ; and James Matthew Leishman, James Halliday, John Ferrie, William Allan Carswell Hardie, William Charles Grieve, and William Hutton Griffin, in the East.

A circular has been issued by Hooper's Telegraph Works (Limited), announcing the issue of the first portion of the £80,000 Six per Cent. Debentures authorised at the last meeting ; these debentures to rank after the £100,000 to be given to Mr. Hooper.

The total quantity of tea delivered from the bonded warehouses in London during the week ending the 13th instant was 3,336,914 lb., of which 2,142,493 lb. was for home consumption, 751,894 lb. was removed coastwise, 307,854 lb. was exported, 130,898 lb. was sent coastwise for exportation, and 3,775 lb. was for ships' stores. The duty received amounted to £53,562, which, compared with that of the previous week, shows a decline of about 2¾ per cent.

Bar Silver has been very quiet during the past few days, the Indian demand has ceased, and other orders have been almost completed ; the consequence has been that the price which last week was 56 15-16d. per oz. has declined to 56⅝d. per oz. Mexican Dollars have also decreased in value, but the amount now on the market, £70,000 in value, has not yet been placed.

The amount of bullion per P. and O. steamer *Malwa*, from Southampton, on the 18th inst., was : — In gold, to Galle, £1,367 10s.

ARTICLES OF IMPORT.

TEA.

Depression has been the prevailing feature in the market during the past week, and it would seem dealers have gained their point, as importers, to make sales, have again been obliged to give way. As regards the home trade, consumption goes on apace, and all interested have done brilliantly, so far, this season; the difficulty now experienced is the inferiority of teas offering as compared with those ruling at similar prices during the first three months of the current season. The advices from China still insist in stating a shorter total than last season ; meanwhile, however, the export creeps up, and the short shipments to America of Oolong and Green will doubtless come here, for low as these classes rule in the market they are even worse in New York; bad Japan leaf (largely on the increase), still continues to take the lead both in the United States and Canada. Indian Tea is being produced largely in excess of any former year, the imports for the ten months to 31st Oct. being 19,450,000 lbs., consumption 18,930,000 lbs.

Messrs. Goddard and Co.'s Circular says :—The market continues very dull, with a large amount offering out of recent arrivals. At auction prices show a fall. The demand has continued for siftings and broken-leaf Kaisow kinds, although prices are a little less strong ; good quality has ruled up to 10d., and even higher, whilst preferable common Congou is neglected at 10½d. to 11d. ; and common black-leaf kinds also remain very unsaleable. All the higher classes are difficult to place, except at a reduction. Scented Teas of all descriptions are dull of sale, and mostly cheaper. Green Teas are still offered at auction, and are lower. A chop of fine Moyune, of last season : Gunpowder, No. 1, sold at 1s. 10d. ; Young Hyson, No. 1, at 1s. 4d., and No. 2, 10d. Indian sorts have been offered freely ; medium qualities little easier, but finest maintain their value. In public sale 11,958 packages, without reserve, were disposed of during the week. Black-leaf Congou sold from 9⅝d. to 10⅝d., including some second-hand parcels, which showed a fall of about 1½d. per lb. on February sales. Red-leaf Congou obtained 11½d. up to 1s. 7¼d. ; Foochow Caper sold at 1s. 2¼d. to 1s. 2¾d. Deliveries from London, from 1st to 15th inst., inclusive, or thirteen days, 1875, 7,353,418 lbs., against thirteen days, 1874, 7,318,756 lbs. Imports, deliveries, and stocks in London, from Jan. 1 to Nov. 1 :—

	1874.	1875.
Imports...	123,363,249 ...	150,995,281
Deliveries	143,207.208 ...	150,375,690
Stocks	69,480,266 ...	79,053,114

Messrs. Arthur Capel and Co.'s Report says :—

We have had a very quiet market during the past week. The export demand is very limited, whilst the floods in the country have interfered with the home trade. Business has been on a limited scale, and where sales have been pressed prices have ruled in favour of buyers. Scented Teas.—Canton Capers : The commoner kinds have sold rather easier, but good to fine remain firm at full prices. Orange Pekoes : The long-leaf kinds have sold 1d. per lb. lower. Foochow Capers, from 1s. 2d. to 1s. 3d., show 1d. per lb. reduction. Orange Pekoes have sold at the decline quoted last week. Green Teas.—Prices have again given way, the quantity offering being in excess of the requirements of the trade. Common to fair Young Hysons and nearly all grades of Pingsuey Teas must be quoted lower. Fine Gunpowders show no change.

The following is from Messrs. W. J. and H. Thompson's Tea Circular :—

There is little change to notice in the market during the week, although for the last two days there has been rather a better inquiry The late arrivals consist mostly of common grades, and importers are willing to meet the market at the late reduction in prices, but continue firm holders of all good and useful qualities. Foochow Congous.—Siftings and broken leaf are still in demand at 8½d. to 10d.; common to good common, 10d. to 11d., and fair, 11½d. to 1s. 2d., are dull at quotations. Medium to good are more firmly held at 1s. 5d. to 1s. 8d., but transactions have been on a limited scale. Black Leaf Congous : Common to good common continue to be pressed at auction at 10d. to 11d., and these sell at irregular prices; fair to medium and good to fine are dull at late quotations. Tayshans : Common to fair are saleable at 10d. to 1s. per lb. Souchongs : Medium are in demand at 1s. 4d. to 1s. 6d. per lb. Scented Teas : Common Canton Capers, 9½d.; fair, 1s.; medium, 1s. 3d. to 1s. 5d., but the sales are limited. Orange Pekoes, common, 10½d.; fair, 1s. to 1s. 2d.; Foochow kinds sell with difficulty ; medium to good, 1s. 3d. to 1s. 7d. per lb. Green Teas : Large quantities continue to be brought to auction on arrival, and the prices realised are most irregular, but lower for Ping Sueys and old imports.

SILK.

The market has been very dull during the week ; transactions have been on the most limited scale ; prices, however, of China Silk remain very firm, importers not giving way in the slightest degree. Japans and Cantons share in the general quiet. Deliveries during the month are, however, fairly satisfactory, being from 1st to 18th inst. :—China 1,593, Canton 389, Japan 320, Bengal 118 bales ; total, 2,420 bales.

COFFEE.—During the week the supply at auction, although larger than for some time past, has been moderate; and with a slow demand the sales have gone off flatly at a reduction in value of Plantation Ceylon of fully 3s. from last mail's rates. Yesterday a small supply, consisting largely of triage, &c., went off with more spirit, and firmer rates were secured. Closing prices are, triage and ordinary 80s. to 95s., pale 96s., grey to coloury small 96s. to 101s., low middling 100s. to 102s., middling 102s. 6d. to 104s., good middling to bold 104s. 6d. to 108s. 6d., pea-berry 112s. to 118s. 6d. per cwt. No sales of Native Ceylon or of other East India have been made.

COIR GOODS.—Small quantities of Yarn at the public sales yesterday met little demand, and except for fine qualities which brought full rates, prices were occasionally cheaper. Ceylon Yarn sold in bales good at £38 15s., chiefly fine make and colour from £43 5s. to £48 10s., superior at £50, in dholls very common to common at £23 to £26, good common to medium at £27 to £32, good medium to good at £32 15s. to £38 15s.

CHINA STRAW PLAIT.—At auction 297 bales were brought forward, and about 160 bales were disposed of at previous rates for mottled, but rather cheaper for white, the bulk consisting of the latter, ordinary coarse kinds at £8 10s. to £9 15s., middling to good £10 12s. 6d. to £16, a few lots fine £19 15s. to £21 5s., the remainder mottled at £6 15s. for common, and £7 5s. to £10 12s. 6d. per bale for middling to good fair.

COCOANUT OIL has not been in much demand; Ceylon quoted £38 15s. to £39. Cochin £41 10s. to £42 per ton.

CAMPHOR.—Small sales of China have been effected at 69s. per cwt.

COTTON.—There has been an improved demand, more especially for American, which is 1-16d. dearer. East India has been firmer without a decided recovery. Quotations, on the spot :—Tinnivelly 5d. to 5⅝d., Western Madras 5d., Northern ditto 5¼d., Bengal 4¾d., Scinde 5d.

COLOMBO ROOT.—In auction 15 bales dull to fair bright quality were sold at 27s. 6d.

GAMBIER is again easier, small sales of whole bales having been made at 26s. 10½d. down to 26s. 9d. per cwt.

GALLS.—At auction 115 cases China were bought in at the reduced rate of 62s. 6d.

HEMP.—There has been more inquiry for Manila, and sales to the extent of about 1,200 bales have been effected, mixed to good fair from £28 to £30 10s.

HIDES.—At the periodical public sales the moderate supply of East

Digitized by Google

India in the hair, which consisted largely of Dacca sorts, met with fair competition. Singapore, &c., Ox and Cow were well competed for, and realised slightly advanced rates. Of Buffalo, Singapore, &c., and Batavia were only partly sold, without change in value.

JAPAN WAX.—One case good slabs has been sold at 49s. 6d. per cwt.

PEPPER.—*Black:* Very little business has been done by private contract this week; and at auction most of the parcels brought forward were taken in. Of 2,071 bags Penang a few lots West Coast sold at 4⅞d., being a decline of ⅛d.; for the remainder of the parcel 4¼d. bid and refused. 252 bags Trang were partly taken in at 5¼d. for good. Some lots very low grey sold at 4½d. per lb.; 769 bags Singapore withdrawn. *White:* Transactions privately have been upon a limited scale at former rates. At auction 674 bags Singapore and 467 bags Penang were withdrawn, reduced offers only being made.

RICE.—Transactions have been upon an unusually small scale. A cargo of 760 tons Moulmein, off the coast, has sold at 8s. 1½d. for the Continent; two cargoes Rangoon of the new crop sold at 8s. 3d., March and April shipment.

RATTANS.—At public sale 19,171 bundles (38 tons) chiefly sold, Penang at £32 to £34, the bulk damaged Singapore, &c., from £11 12s. 6d. to £20 5s. per ton.

SAGO.—1,827 bags part sold at rather easier rates for small grain; low to good, 16s. to 17s.; a few lots bold at 16s. 6d. per cwt. *Flour:* At public sale 399 bags Borneo sold at 13s. to 13s. 3d. per cwt.

CASUALTIES.

DEAL, NOV. 11.—The Jonge Jan, from Rotterdam, for Batavia, and the Marjory, of Arbroath, have been in collision in the Downs; both vessels sustained damage.

PLYMOUTH, NOV. 12.—The Cheops (str.), Dryden, from London for Shanghai, has put back with loss of bulwarks, stanchions, bridge smashed, and four boats damaged, having experienced heavy weather.

CARDIFF, NOV. 12.—The Alma, from this port for Hong Kong, has put back with loss of anchor, and other damage.

AMSTERDAM, NOV. 11.—The Kennemerland, De Jong, arrived at Nieuwe Diep, from Batavia, reports having experienced very heavy weather off the Cape of Good Hope, during which she sustained some damage about the bow, and lost several sheets of copper. Very heavy weather was also encountered on the 6th and 7th Nov., and on the latter day the vessel, while in charge of a pilot, struck the ground near Kamperduin three times, so heavily that the deck seams, &c., were started. The vessel also shipped heavy seas. On sounding the pumps she was found to be making little or no water.

ST. THOMAS, NOV. 10.—The J. A. Brown, from Batavia, for Boston, U.S., has put in here with loss of jibboom, jib, and flying sails.

MISCELLANEOUS.

GIBRALTAR.—Nov. 11, the Glenartney (str.), arrived here yesterday from Amoy, and proceeded to-day for New York.

The Isabella Ridley, from Java, for Marseilles, left here on the 3rd inst.

MALTA.—Nov. 9, sailed, Orestes (str.), from Shanghai, for New York; 11, arrived Burmese (str.), from London, and proceeded for China and Japan.

PORT SAID.—Arrived, Nov. 13, Ducalion, from Liverpool, for Shanghai; 15, Batrak, for Singapore; Sea Gull, from London, for Colombo; Prins Hendrik, from Nieuwe Diep, for Batavia.

SUEZ.—Nov. 11, arrived, John Howard, from Batavia, for Rotterdam; 13, Prins van Orange, from Batavia, for Nieuwe Diep; 15, Emiliano, from Manila, for Liverpool; 17, Quang-Se, from Shanghai, for London.

BARBADOES.—Oct. 24, the Frederick Keating, from Cardiff for Manila, has arrived here from lat. 7.40 N., lon. 20.30 W., with the crew in a state of mutiny.

ADEN.—Nov. 12, arrived, Tevoit (str.), from Shanghai, for London.

LAUNCHES.

On the 15th inst. Messrs. John Elder and Co. launched from their yard at Fairfield a magnificent iron screw-steamer of 2,800 tons gross, and of the following dimensions:—Length between perpendiculars, 376 feet; breadth, moulded, 37½ feet; depth, moulded, 29 feet. This is the second vessel designed and constructed for the new mail line of steamers between San Francisco, New Zealand, and Australia, by Messrs. John Elder and Co. The engines will be 500-horse power nominal. When finished, the vessel will be fitted up in a very elegant manner, having accommodation for 170 first-class, 30 second, and 100 third-class passengers. On leaving the ways she was named Australia by Mrs. Hepkins, and is a sister ship to the Zealandia, launched on the 18th ult.

On the 17th inst. Messrs. John Elder and Co launched from their shipbuilding and engineering works, Fairfield, a handsomely-modelled screw-steamer of 1,100 tons gross and 175 h.p. nominal, and of the following dimensions:—Length between perpendiculars, 220 feet; breadth for tonnage, 30 feet; depth, moulded, 23 feet 3 inches. This vessel has been constructed to the order of Messrs. Matheson and Co., London, for their China coasting trade, and has been built to Lloyd's special requirements, under the superintendence of Captain Crockett. She is fitted with steam windlass, steam winches, &c., and has large accommodation for Chinese passengers. Her engines, which are to be supplied by the same firm, will be upon their compound principle, having two inverted cylinders, direct-acting, with all the latest improvements. The ceremony of naming her the "Sin Nanzing" was performed by Miss Harvie.

THE NATIONAL SAFE DEPOSIT COMPANY (Limited).

1, Queen Victoria-street, Mansion House, London.
Capital, £500,000. Subscribed, £250,000.

DIRECTORS.

J. H. Pulleston, Esq., M.P., Chairman.
Lawford Acland, Esq., Chairman Ceylon Company.
George Arbuthnot, Esq., Chairman Oriental Bank Corporation.
George W. Barnett, Esq., Barnetts, Hoares, Hanburys, and Lloyd.
Horatio S. Coulson, Esq., Director United Discount Corporation.
Lord Wm. M. Hay, Director Eastern Telegraph Company.
Hugh F. Sandeman, Esq., Director Scottish Union Insurance Company.

The Company is now ready to let to approved applicants Safes in their Fire and Burglar-proof Vaults, at rents from £2 10s. to £30 per annum.

No insurance is necessary.

The main object of the Company is to provide the public with a perfectly secure, yet inexpensive repository for valuables of every description, and relieve them from the harassing and wearing strain occasioned by the personal care of such property. The Company take for safe custody all kinds of securities, valuable property, bonds, wills, marriage settlements, and other documents, and guarantee their value when required. Drawn bonds, coupons, &c., collected.

The Company undertake the duties of trustees, receivers, and executors, and act in other confidential capacities.

The Great Vault is superior to any building in the world intended for similar purposes. The utility of these Safes, which are entirely underground, is undeniable, as bankers are not responsible for deposit of valuables.

The loss of many kinds of securities is irreparable, the loser having no recourse against the Government or other party issuing them. A constant watch is kept both inside and outside the building. There is a room especially adapted and reserved for ladies. The premises can be inspected, and further particulars obtained on application. HENRY WEST, Manager.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, August 30, 1851.
PAID-UP CAPITAL, £1,500,000.
RESERVED FUNDS, £500,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Colombo, Foochow, Hiogo, Hong Kong, Kandy, Madras, Mauritius, Melbourne, Point de Galle, Pondicherry, Port Elizabeth, Shanghai, Singapore, Sydney, Tellicherry, and Yokohama on terms which may be ascertained at their Office. They also issue Circular Notes for the use of Travellers by the Overland Route.

They undertake the agency of parties connected with India and the Colonies, the purchase and sale of British and Foreign Securities, the custody of the same, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named Dependencies.

They also receive deposits of £100 and upwards for fixed periods, the terms for which may be ascertained on application at their Office.

Office hours, Ten to Three; Saturdays, Ten to Two.
Threadneedle-street London, 1875.

THE AGRA BANK (Limited).

Established in 1833.

CAPITAL, £1,000,000.
Head Office:—NICHOLAS-LANE, LOMBARD-STREET, LONDON.
Branches in Edinburgh, Calcutta, Bombay, Madras, Kurrachee, Agra, Lahore, Shanghai, Hong Kong.

Current accounts are kept at the Head Office on the terms customary with London Bankers, and interest allowed when the credit balance does not fall below £100.

Deposits received for fixed periods on the following terms, viz.:—At 5 per cent. per annum, subject to twelve months' notice of withdrawal. For shorter periods deposits will be received on terms to be agreed upon. Bills issued at the current exchange of the day on any of the Branches of the Bank free of extra charge; and approved bills purchased or sent for collection. Sales and purchases effected in British and Foreign Securities, in East India Stock and Loans, and the safe custody of the same undertaken. Interest drawn, and Army, Navy, and Civil Pay and Pensions realised. Every other description of Banking Business and Money Agency, British and Indian, transacted.

J. THOMSON, Chairman.

COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1854, and 31st December, 1866.
Recognised by the International Convention of 30th April, 1863.

CAPITAL, fully paid up, £3,200,000.

Reserved Fund ... ... f.20,000,000 ... £800,000.
HEAD OFFICE—14, Rue Bergere, Paris.
AGENCIES AT—Lyons, Marseilles, Nantes, Mulhouse, Roubaix (France), Brussels (Belgium), Alexandria (Egypt), Calcutta, Bombay, Hong Kong, Shanghai, Saigon (Cochin China), Bourbon (Reunion), and Yokahama (Japan).
LONDON BANKERS.—Bank of England and Union Bank of London.
LONDON AGENCY.—144, Leadenhall-street, E.C.
MANAGER.—Theod. Dromel.
SUB-MANAGER.—H. DUVAL.

The London Agency grants Drafts and Letters of Credit, and purchases or collects Bills payable at the above-named places.

The Agency will conduct Banking business of every description with the Continent, India, China, &c., upon terms to be ascertained at the Office
Office hours, 10 to 4; Saturdays, 10 to 2.

STANDARD LIFE ASSURANCE.

REDUCED PREMIUMS.

CHINA and JAPAN.—The Directors of the STANDARD LIFE ASSURANCE COMPANY have reduced the rates of premium to be hereafter charged for residence in certain parts of China and Japan, and full particulars as to terms, regulations, and conditions may be had at the offices of the Company.

Local Boards and Agencies in India, China, and all the colonies.

Moderate premiums, at rates suited to each climate.

Immediate reduction to home rates on return to Europe or other temperate climate.

Loans advanced to civilians and military officers.

The next division of profits will be made among policies in existence at 15th Nov., 1875, and all who assure before that date will rank for profits on that occasion.

Annual income of the Company upwards of £700,000 sterling. Invested capital and accumulations upwards of £4,500,000.

SELECTED LIST OF MAPS OF ASIA, INDIA, BURMAH, CHINA, &c.,

PUBLISHED BY
EDWARD STANFORD,

55, CHARING-CROSS, LONDON, S.W.
(Removed from 6, 7, and 8, Charing-cross.)

ASIA. — STANFORD'S LIBRARY MAP OF ASIA. Scale, 110 miles to an inch; size, 65 inches by 58. Coloured and Mounted in Morocco Case, £3 13s. 6d.; Roller, Varnished, £3; Spring Roller, £6.

This new and original work exhibits the Empires and other States of the Oriental world with a stricter regard to their actual boundaries and divisions than any other publication has yet attempted Although the size of the Map extends to the limits of convenience, its scale of 110 miles to an inch serves to show how inadequate a small Map must be for the representation of so large an area.

CENTRAL ASIA. — STANFORD'S MAP OF CENTRAL ASIA, including Teheran, Khiva, Bokhara, Kokan, Yarkand, Kabul, Herat, &c. Scale, 110 miles to an inch; size 22 inches by 17. Coloured Sheet, 2s. 6d.; Mounted in Case, 5s.

INDIA. — STANFORD'S MAP OF INDIA. Based upon the Surveys executed by order of the late Hon. East India Company, the Special Maps of the Surveyor-General and other Authorities, showing the latest Territorial acquisitions of the British, the Independent and Protected States, the Railways, Canals, Military Stations, &c.; together with a Continuation of the British Trans-Gangetic Provinces, and Diagrams exhibiting Distances and Bearings from the three Presidencies of Bengal, Madras, and Bombay. Scale. 55 miles to an inch; size, 50 inches by 63. On Four large Coloured Sheets, 21s.; Mounted in Case, 30s.; Roller, Varnished, 35s.; Spring Roller, £4 4s.

INDIA.—STANFORD'S NEW PORTABLE MAP OF INDIA: Exhibiting the present Divisions of the Country according to the most recent Surveys; showing also the adjacent territories of Beluchistan, Afghanistan, Turkestan, the Chinese Empire, Burmah, and Siam. The Railways, Rivers, Canals, Mountain Passes, and the Elevations above the Sea are clearly indicated: and the Boundaries of the Provinces, the Bengal, Bombay, and Madras Presidencies, the Districts under British and Native Government, and the French and Portuguese Possessions, are distinctively coloured. Scale, 86 miles to an inch; size, 29 inches by 33. Coloured Sheet, 6s.; Mounted in Case, 8s.; Roller, Varnished, 11s.

INDIA.—MAP OF INDIA. By J. ARROWSMITH. Scale, 90 miles to an inch; size, 22 inches by 26. Coloured Sheet, 3s.; Mounted in Case, 5s.

INDIA.—MAP OF INDIA, indicating the probable Route and Date of Visit of the PRINCE OF WALES. Scale, 100 miles to an inch; size, 17 inches by 22. Price, Folded, 1s.

ASIATIC ARCHIPELAGO. — MAP OF THE ASIATIC ARCHIPELAGO; including on the North, Canton; on the East, the Ladrone Islands; on the South, the North Coast of New Holland; and on the West, Sumatra and Malay. By J. ARROWSMITH. Scale, 156 miles to an inch; size, 26 inches by 22. Coloured Sheet, 3s; Mounted in Case, 5s.

BURMAH, &c.—A Map showing the various Routes proposed for connecting China with India and Europe through Burmah, and developing the Trade of Eastern Bengal, Burmah, and China. Prepared under the direction of JOHN OGILVY HAY, F.R.G.S. Scale, 33 miles to an inch; size, 27 inches by 32. Coloured Sheet, 3s.; Mounted, in Case, 5s.

BURMAH AND ADJACENT COUNTRIES. Compiled from various M.S. and other Documents. By J. ARROWSMITH. Scale, 24 miles to an inch; size, 22 inches by 26. Coloured Sheet, 3s.; Mounted in Case, 5s.

CHINA AND JAPAN.—STANFORD'S MAP OF THE EMPIRES OF CHINA AND JAPAN, with the adjacent Parts of British India, Asiatic Russia, Burmah, &c. Scale, 110 miles to an inch; size, 38 inches by 24.

[New Edition preparing.

CHINA. — MAP OF CHINA. By J. ARROWSMITH. Scale, 90 miles to an inch; size, 26 inches by 22. Coloured Sheet, 3s.; mounted in Case, 5s.

CEYLON.—MAP OF CEYLON. In corporating the Map of the Kandyan Provinces, already published, and Constructed from a Base of Triangulations and corresponding Astronomical Observations during his Employment on the Staff of the Colony, by Major-General JOHN FRASER, late Deputy Quartermaster-General. Reconstructed, incorporating a great number of Original Documents, and connected with the Great Survey of India, by JOHN ARROWSMITH. Scale, 4 miles to an inch; size, 52 inches by 78. Eight Sheets, Coloured, £2 5s.; Mounted in Case, £3 13s. 6d.; Roller, Varnished £4 4s.; Spring Roller, £6 16s. 6d.

CEYLON.—MAP OF THE ISLAND OF CEYLON. By J. ARROWSMITH. Scale, 22 miles to an inch; size, 13 inches by 15. Coloured Sheet, 1s.; Mounted in Case, 2s. 6d.

LONDON—Show Rooms, 45, Oxford-street, W.
BIRMINGHAM—Manufactory and Show Rooms Broad-street. Established 1807.

THE LATE REV. B. P. KEASBERRY, OF SINGAPORE.

THE late Rev. B. P. KEASBERRY, whose sudden death occurred last month in Singapore, has left a widow and a family of girls almost wholly unprovided for.

It is almost unnecessary to remind old residents in The Straits of the faithful and disinterested services of Mr. Keasberry, in the teaching of the Christian faith, and the spread of education.

These services, which extended over a period of thirty-six years, it is proposed to recognise, to some extent, by the collection of a sum of money, to be placed in the hands of the Hon. R. Little, M.D., and William Adamson, Esq., of Singapore, as Trustees, leaving power to them to invest the whole or a part at their discretion, or to apply it wholly and at once for the benefit of Mrs. Keasberry and her daughters.

Cheques should be made payable to P. F. Tidman, 34, Leadenhall-street, by whom Subscriptions will be acknowledged.

Edwd. Boustead	£100

TO PARENTS AND GUARDIANS.

AN ENGLISH WIDOW LADY, who has been residing many years on the Continent, is desirous of obtaining two pupils (English) to educate with her own daughters. She offers a comfortable home, and a mother's care, with all the advantages of the best professors and an excellent governess, combined with that of French, English, and German Is now residing in the neighbourhood of Versailles which abounds with charming walks, where there is an English church, as well as similar cours or classes conducted by the same professors as at Paris. References exchanged.

Address, Madame E. H., Poste Restante, Versailles.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.

Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,

HOMŒOPATHIC CHEMISTS,

Threadneedle-street, and 170, Piccadilly. Works:—Euston road and Camden Town, London.

Makers of Epps's Glycerine Jujubes (throat irritation).

T. W. JACKSON,

COMMISSION AGENT

SAN FRANCISCO.

THE FRIEND OF ALL!!

HOLLOWAY'S PILLS

These famous Pills PURIFY the BLOOD, and act most powerfully, yet soothingly on the LIVER, STOMACH, KIDNEYS, and BOWELS, giving TONE, ENERGY, and VIGOR to the whole system. They are wonderfully efficacious in all ailments incidental to FEMALES, Young or Old, and as a general FAMILY MEDICINE, for the cure of most complaints they are unequalled.

THE MAILS, &c.

The French mail, bringing the above advices, was delivered, *via* Marseilles, on the 26th inst., three days in advance of its due date. The next inward (P. and O.) mail, with a week's later dates, viz., Yokohama 19th, Shanghai 22nd, Hong Kong 28th Oct., Singapore 4th Nov., is due, *via* Brindisi, on Monday next, the 6th proximo.

The lines of the Eastern and Great Northern Telegraph Companies are still out of order.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Djemnah*, arrived Nov. 23.—From Yokohama: Messrs. Colomb, Petit-Jean, Henon. From Shanghai: Messrs. Lucas, Hoyt, Eldridge, Kelly, Fleury, Dugat, Mr. Hunt and family. From Hong Kong: Mr. and Mrs. Chapman, Mr. Brock and family, Mr. Ross, Mr. Walkinshaw, Mr. Youell. From Batavia: Messrs. Knappers, Vet, Van Oven, Winkeuzin, DeHaad, Arnand. From Singapore: Messrs. Deacon, Behn, Bordoy, Chauritto, Alloin. From Galle: Mr. Bell, Mr. and Mrs. Proust.

PASSENGERS OUTWARD.

Per P. and O. steamer *Baroda*, from Brindisi, Nov. 29.—To Penang: Mr. T. C. Brown.

Per P. and O. steamer *Surat*, from Southampton, Dec. 2.—To Hong Kong: Mrs. J. Dixon. To Ceylon: Sir J. W. Copley. To Galle: Mr. V. Hamilton.

Per P. and O. steamer *Hindostan*, from Venice, Dec. 10.—To Singapore: Mr. and Mrs. MacVicar.

Per P. and O. steamer *Hindostan*, from Brindisi, Dec. 13.—To Hong Kong: Mr. D E. Travers. To Singapore: Mr. A. Black, Mr. Fester.

Per P. and O. steamer *Bokhara*, from Southampton, Dec. 16.—To Ceylon: Mr. E. Corvant, Mr. T. J. Jones.

Per P. and O. steamer *Baroda*, from Brindisi, Dec. 27.—To Singapore: Rev. and Mrs. Aitken.

Per French steamer *Anadyr*, from Marseilles, Dec. 5.—To Yokohama: Mr. and Mrs. Fanconnet. To Shanghai: Mr. Godeaux, Mr. Seul. To Saigon: Mr. Alquier, Mr. Forestier. To Batavia: Mrs Van Lawick, Mr. H. de Lyon, Comte Zichy, Mr. Frolke, Mr. and Mrs. J. Wust. To Singapore: Comte Herngasze. To Galle: Mr. Boustead, Mr. Northmore, Dr. Anthony.

Per French steamer *Djemnah*, from Marseilles, Dec. 19.—To Yokohama: Mr. Kreitmann, Miss Seymour. To Hong Kong: Mr. and Mrs. Pelham Warren. To Port Said: Monsr. de Lesseps and family.

Per French steamer *Ava*, from Marseilles, Jan. 2.—To Galle: Mr. Newman.

Per Pacific mail steamer *City of Tokio*, from San Francisco, Nov. 1.—To Yokohama George V. Culbertson, A. P. Parker, R. Terada, J. D. Babcock, Commander R. S. McCook, W. B. Woodson and wife, Mrs. J. W. Lambreth and child, Mrs. L. Eldridge and two children, Mrs. M. M. Eldridge, Mrs. Fanny Lord, Mrs. M. Loring, E. C. Lord.

Per steamer *Benledi*, from Gravesend, Nov. 25.—To Hong Kong: Mrs. Ball. To Hiogo: Mrs. Kenwick, Mrs. Kannelly and son. To Yokohama: Mr. Matthews, Mr. Stephen, Mr. Marrable.

Summary of News from the Far East.

JAPAN.

Our advices from the Japan Ports by the present mail are of no later dates than those received by Pacific mail on the 18th ult., and published in our last issue.

CHINA.

PEKING AND TIENTSIN.

The Tientsin correspondent of the *North China Herald* writes as follows:—

Little is known about the political *status* at Peking. Very little leaks out. Diplomatic men are very close. It is generally reported that the officials of other Legations do not know the precise nature of the demands made by the British Government. A little while ago we were assured that a settlement had been arrived at; and now we have equally reliable information that a settlement has not been effected, but that Mr. Wade will still not leave Peking. A little while and ye shall see me, and again a little while and ye shall not see me, seems to be the burden of the song. The announcement that Mr. Wade was expected here, though based on credible information, seems to have been premature, inasmuch as he has not come, and—so it is said—is not coming. Mr. Grosvenor arrived a day or two since, *en route* for Shanghai. How much further he is going no one knows. Either England or Yunnan are surmised as his ultimate destination; but no one knows There are some so confident believers in Mr. Wade's secrecy that they doubt whether he even admits to himself what his purposes are. Another surmise is that Mr. Wade has given the Chinese more time, but no one knows. All we do know is that more than eight months have elapsed since Margary's murder, and that nothing has yet been done to avenge his death; and what we may be certain of is that Mr. Wade has nothing to fear from pursuing a firm, definite policy; he is sustained by the voice of the English people, and that carries with it the voice of the English Government. The Governor-General, Li Hung-Chang, has arrived at Peking, and has called on Her Majesty's Minister. He has likewise had several conferences with the Tsung-li Yamen, besides audiences of the two Empresses. Li went to Peking ostensibly for the funeral of the late Emperor. The reason for his going before that event is supposed to be that he may take part in the negotiations.

The memorial of the Tsung-li Yamen regarding intercourse between foreign Ambassadors and Chinese Ministers of State, which called forth the edict we gave last week, has been published in full. It may be interesting to explain that the high

Digitized by Google

State Departments at Peking are the "Nei-ko," or grand secretariat, which is a special Yamen independent of the six Boards, and the "Chun-chi-ch'u," or Grand Council, as foreigners call it, and which is composed of members of boards or other high functionaries indiscriminately. The term used in the edict would include the members of these departments, and it is, we presume, with them that the right of intercourse is acquired.

Peking as a city has shown signs this year of unwonted prosperity. Much building, in a small way, has been done. Shops not tenanted for years before have been painted, gilded, papered up, and opened. Waste pieces of ground have been enclosed. Actually the public roads are having some attention paid them, and are being raised above the rain flood water mark. The surest sign of the prosperity of the place is the flourishing state of the building yards. New yards are opened, and the old ones look more lively. Whence comes all this prosperity? Is it better trade, better harvests, better times for the nation generally? It may be; but I am afraid one cause of the apparently flourishing state of things is the nation's disaster in the end of the career of the late Emperor. When he came of age and married large sums were spent in many ways, much of which was spent in the city. Then again his death, and that of the Empress, necessitated the erection of tombs, and created many other expenses which also benefited Peking. Perhaps, however, these events are not sufficient to account for the increased prosperity, but they have something to do with it.

Great preparations are being made for the double Imperial funeral, which takes place about the 16th October. The road to the Royal tombs is being smoothed and levelled. All summer there have been soldiers encamped in neat huts round the Prospect Hill, in the grounds of which the two coffins rest. The soldiers sometimes had a damp time of it, but made the best of their situation, and in many cases had quite pretty gardens in front of their temporary homes. The two neat temples, where prayers are said for the Imperial souls, still hold up their drooping heads. They looked well enough at first, but now they are battered and weather beaten, and it is just as well that their time is up, for they don't look as if they could hold out much longer.

Cold weather has now fairly set in. Fans have disappeared. The mat awnings that shaded the courts and houses in summer are everywhere taken down and carted away along the street. Everywhere, too, you meet people carrying a little roll of blue cloth in one hand, or a large bundle of white new cotton, folded together and bound by a string, in the other. As you pass the doorway of yards you may see the khang straw mat spread out, and a woman shaping out and sewing up wadded garments, which even now have an attractive look about them.

The *Monocacy* arrived at Tientsin on the 1st October, and is likely to remain through the winter. Generals Upton and Foresyth and Major Sanger arrived on the 1st Oct., and left the following morning for Peking. H.M.S. *Dwarf* is lying in the river, at Mr. Wade's disposal, but whether for despatches or any other purpose does not appear.

NEWCHWANG.

A correspondent writes from this port as follows:—

We have news from Chefoo that politics at Peking are settled for the present, so I suppose the treaty has been signed, with the mental reservation on the Chinaman's side to break it if possible. What could we do if war broke out? No one would leave business, property, &c., unless our Consuls said they could not protect us, and then only on the chance of being well recouped for losses. It is, however, very careless of our Government to leave this port so unprotected as it generally is, especially during the winter. The three gunners we have had for the last two winters are better than nothing, but what use would they be in case of a row amongst the Taoutai's soldiers, or a sudden whim on the part of those soldiers who went into the interior some months ago, and who ever and again come here, either on the way back to Tientsin, or just to have a little "spree?" Why, they would consider it a lark just to stray towards the quarters of the Sisters of Charity, and repeat the doings at Tientsin.

Monsigneur Ridel (Bishop of Korea), with his Secretary, Monsieur l'Abbe Blanc, have started for Korea. Their plan is to travel to the neutral ground, and when the traders meet, at the opening of the gates, to slip into Korea, disguised as mendicants, in company or at the heels of some fellow Christians. I very much fear that they will earn the martyrdom which they escaped from in 1868, when some twelve priests and two bishops were murdered. It is said that the reigning monarch (who upset his step-father some short time ago) is favourable to Roman Catholics.

SHANGHAI.

The present mail brings advices from this port to the 15th October; the French mail from London Aug. 27 was received on the 9th Oct. The following summary of news is from the *North China Herald*:—

The first ordinary meeting of shareholders in the North China Insurance Company, for the present term, was held on the 15th Oct., at the offices, Hankow-road. Present—Mr. E. H. Lavers, chairman; Messrs. J. Hart, F. H. Bell, H. P. Hanssen, M. S. Gubby, and J. M. Vickers, directors; and Messrs. Cameron, P. Maclean, Maitland, Francis, Kirchoff, Love, Pollock, Dalgleish, Campbell, Sutherland, Taylor, Brand, Dyce, Westall, Hogg, Percival, Mackintosh, Bade, and H. S. Morris, secretary—twenty-four shareholders, representing 540 shares. The Secretary read the notice calling the meeting, and afterwards the minutes of the previous meeting, which latter were confirmed without comment, and signed by the chairman.

The Chairman said: We have met to-day for the purpose of laying before you the directors' report and balance-sheet for the first half-year of the term 1875-77. They have been in your hands for some time, and no doubt have had your attention. The premia collected during the half-year amount to Tls. 503,246.51; interest and sundries to Tls. 13,285; making the total receipts Tls. 516,531.51, which is in excess of the receipts for any similar period since the formation of the company. The premia in 1872 from January to June was Tls. 487,054; 1873, Tls. 352,435; and in 1874, Tls. 364,258. The interest should amount to more than it does, but it is now impossible to deposit money at the old rates. You will notice that the expenses of working the company's business amount to about 10 per cent. on receipts, which cannot be considered excessive. The losses paid to 30th June, all by first-class vessels, amount to Tls. 169,812.85, or about 30 per cent. of the premia received, but some salvages may be expected. Since June 30 we have paid further losses to the extent of Tls. 57,000, and we regret to state that owing to recent wrecks—those of the *Deerhound*, *Sunda*, and *Hector*—the company may lose about Tls. 100,000. The premia collected to date, since 30th June, amount to about Tls. 216,000, irrespective of latest returns from London and other distant agencies. The amount carried forward from working account on 30th June, Tls. 290,153.68, may be considered as eminently satisfactory. Many shareholders are under the impression that the directors reduced the company's lines by the first few steamers from Hankow to London, and thus caused great inconvenience. I may state that the company took full risks on nearly every steamer, the average being Tls 81,696. We consider about Tls. 80,000 a full line by first-class steamers. We did not, however, retain the whole amount, but reinsured part of it. At a meeting recently held of the China and Japan Insurance Company, it was stated that this company was the first to make the return of 33⅓ per cent. on local risks. This I must contradict. It is, however, true that this company was the first to make public the reduction alluded to, but other companies had been giving large returns to insurers long before we did so. I do not know that there is anything more for me to say with regard to the accounts before you; but you will perceive in the report that in preparing the present accounts the rate of exchange, which was formerly 6s., is taken at 5s. 6d., which the directors consider a more accurate data for keeping the company's books. This difference of exchange increases such salaries as are made payable in sterling to that extent.

Mr. Hogg said he hoped it would not appear to the directors invidious on his part to call attention to the increase in the item of directors' and auditors' fees, but he had heard the subject mentioned by shareholders, and thought it would be satisfactory to them if it were explained. Of course, everybody must be highly gratified with the way in which the directors had managed the affairs of the company but in these days of economy it was worth while to notice how much the fees had increased. In 1874, from 1st January to 30th June, the amount was Tls. 1,830; from 1st July to 31st December, Tls. 510, or for the year, Tls. 2,340; in 1873, first half-year, Tls. 1,660; second half-year, Tls. 1,640; for the year, Tls. 3,300; while in the first half of 1875 the amount was Tls. 2,350. In future, it might be satisfactory to keep the directors' and auditors' fees separate.

The Chairman, in reply, said it must be borne in mind that the business of the company had increased very much indeed; the present half-year showed a greater increase than before, and the shareholders must admit that, doing so large a business, it was necessary for the directors to devote more attention than would be required by a small one. The directors' fees were placed at Tls. 20 for each meeting, and it was now proposed to make the remuneration Tls. 1,000 each per annum, which would be less than Tls. 20 for each meeting would come to. The directors had to attend at the office more than once a week, and were often called upon by the Secretary to consult on affairs of interest to the company.

Mr. Maitland said, having been a director himself, he thought he was a fit person to speak on the subject of the resolution. The Chairman had taken the words out of his mouth, as to what he could have said about the time it took the directors to look after the interests of the company. He thought the amount of business laid before the meeting in the report and balance-sheet must prove that it required a great deal of time and attention in looking after it. The directors had very often to meet more than once a week, and were frequently consulted by the secretary; and when they considered the members of the Board were merchants, it must be borne in mind that it was something to them to be frequently called away from their business. He thought the original fee of Tls. 10 per meeting was very small, and that Tls. 1,000 per annum was not too much, and therefore had much pleasure in proposing—"That the remuneration of the directors shall be taels six thousand (Tls. 6,000) for the current year."

Mr. D. Brand seconded the motion, and it was carried unanimously.

The Chairman proposed the second resolution—"That the report of, the directors and accounts for the half-year ending the 30th June 1875, as printed and laid before the shareholders, be passed." Mr. H. P. Hanssen seconded, and the motion was carried unanimously. Mr. F. H. Bell moved, and Mr. J. Hart seconded—"That the appointment of Mr. M. S. Gubbey and Mr. J. M. Vickers, as members of the Court of Directors, in the place of Messrs. Maitland and Wood, resigned, be

Digitized by Google

confirmed." Carried unanimously. There being no other business, the meeting broke up with the usual vote of thanks to the Chairman.

A report has been drawn up of the proceedings of the Polytechnic Society thus far, and was approved for publication at a meeting of the committee held on the 30th Sept. The accounts show a deficiency of Tls. 436.55; but donations are promised and expected which will convert this into a surplus. Altogether the institution looks flourishing. The building now being constructed for it in Canton-road will probably be opened in December.

The Municipal minutes go over the same ground in regard to wharfage dues, as those of the meeting of Treaty Consuls. Steps are being taken to build a bridge over the Soochow Creek, opposite Szechuen-road. The subject of new roads is referred to, but no information as to their progress is yet forthcoming. A proposal from the French Council to again defer the separate taxation of wheelbarrows till January was declined. We are glad to see that Chinese prisoners are to be made to work. We are not sure that the substitution of imprisonment for flogging is always desirable, and it is to this change, we believe, that the accumulation of prisoners is in some measure attributable. Certainly, without work, it is no punishment at all; and the effect will be that the Council will become hotel keepers to all the scoundrels in the neighbourhood. The police are to arrest Chinese depositing building or other material on the roads or beach grounds without having obtained a permit.

We hear it is estimated that the cotton crop in this neighbourhood will be, at most, 40 per cent. of an average one. Prices have opened at Tls. 14 and 14½ per picul, for cotton packed for the Hankow market, which is, we believe, some Tls. 5 or 6 over the opening prices last year. It is said that the cotton hongs which last year at this time were buying 50 or 60 piculs a day are now getting only three or four; the country people clinging to what they have, partly, no doubt, in hope of higher prices, but partly also because they think they will not have much more than will occupy the women and furnish seed for the next year.

A few days since thirty boys, who are going to America by the next American mail, called at the United States Consulate-General, to pay their respects to Mr. Seward. Eighteen of them came from Kwangtung, the others from different provinces. They are bright well-clad lads, of from eight to fourteen years of age. It will be remembered that three lots of boys have gone to America in previous years. It is expected that more will go next year—making up the whole number of the Educational Mission to one hundred and fifty youths. Mr. Seward addressed to them a few pleasant remarks, which they received with less indications of appreciation than boys of Western origin would have evinced. It is not unlikely, however, that most of them understood very well what he said, and will remember its purport for the rest of their lives. The sentiment that, in all the long history of China, few events have been so significant as this one of which they are a part, should make an impression upon their minds, undeveloped as they are.—Mr. Kwong Ki-chiu, the compiler of the dictionary recently reviewed by us, will proceed with the boys to America.

Tenders are invited for a new Municipal loan of Tls. 28,000 for the purchase of the Tunsin property. It will be well worth the while of a bank which gives only 5 per cent. on deposits to lend the whole sum at 8 per cent., and calmly pocket the difference. The Council will, however, we think, better meet the wishes of the community by allotting the debentures in small quantities among local investors, than by issuing them to capitalists even on better financial terms. The Municipal debentures afford the best and safest local investment, and the Council should for the moment regard itself as somewhat in the position of a savings' bank.

His Excellency Kwo Sung-pao, the Ambassador Elect to England, has arrived from Foochow. Several of the foreign Consuls called on him on the 13th October, and were visited in their turn forthwith. We hear that he is to leave by the *Shingking* for Tientsin, to get his final instructions.

It is stated that Ting Jih-chang, late Futai of Kiang-su, has been appointed to succeed at Foochow the Commissioner, Shen, who is now daily expected to arrive in Shanghai, *en route* to Nanking to assume the duties of Viceroy of the Two-Kiang. Official notice of the appointment has been here for several days, and a special despatch boat from Foochow has been placed at the service of Ting at Tientsin. He, however, instead of availing of the steamer, has determined to make the trip overland. Age, infirmities, and a dread of sea-sickness, are said to have influenced him to adopt this course. He is expected to reach here towards the close of the present month, and as his appointment is made to include the Arsenal at Shanghai, as well as that at Foochow, he will doubtless delay here some time en route to the latter city, which he will most likely make his residence. Ting is a man of considerable ability, and it is expected by the Chinese that his administration will be one of vigour, progress and improvement in the right direction.

There are thirty-two entries for the Rifle meeting—quite as many as can be conveniently accommodated at a single target, and a slight increase on last autumn, although less than the previous year. There has been some fair practice, and occasionally very good scores have been made. The entrants are, from No. 1, Co. 8; No. 2, 8; No. 3, 4, and the Miholoongs, 12. The latter have a strong team, and are likely to win the company's match; 2 to 1 against them wanted.

Besides the recent auctions of land which have resulted in no sales, we hear that one or two important private sales have been lately effected. Lot No. 81, in the Honan-road, between the Nanking and Kiukiang roads, measuring as per title-deed 5m. 2f., and valued by the last assessment at Tls. 4,000 per *mow*, has been sold with the Chinese hongs upon it for Tls. 45,000. Lot No. 11b, in the Hankow-row, at the back of the Custom-house, measuring 5m. 8f. 6l., and valued in the last assessment at Tls. 4,500 per *mow*, has been sold with all the hongs upon it for Tls. 30,500. The value of the land alone, according to the assessment, would be nearly Tls. 28,000. Lot No. 364, in Hongkew, at the corner of the Hongkew and Nanzing roads, measuring 4m. 7f. 8l. 3h. has, we believe, been also sold, for about Tls. 8,000.

The mafoo whose life was attempted three weeks ago by another mafoo in an opium shop at the back of the Horse Bazaar has died, but not from the effects of the wounds inflicted on him, from which, in fact, he had quite recovered. He was in ill-health at the time of the attack, and on being let out from the hospital to attend the Mixed Court to give his depostition, the magistrate, seeing he still looked very ill, advised him to return there. Instead of returning at once, he went to an eating-house and opium shop, and after gorging himself with rice, &c., smoked several pipes of opium, after which he went back to the hospital, rapidly became worse and died. The accused has been sent into the city for punishment.

A few days ago, a griffin, which had been purchased as a speculation by a mafoo, broke loose from its stable in the Tientsin Road, and galloped off at a rapid pace among the crowds of Chinese who inhabit the lower portions of the road. There was a great stampede, but one young man failed to get out of the animal's way, was knocked down, and his skull fractured, from the effect of which he died. The unlucky mafoo was of course pursued by the deceased's relatives, and has had to compromise matters by the payment of $90.

The ship *John R. Worcester* reports having encountered a typhoon on the 1st October, in latitude 28° 21′ North and 136° 04′ East. During the height of the typhoon, when the ship was lying over with the upper dead-eyes of the lee rigging under water, the cargo shifted, and she began to make water fast. The report narrates how all on board fought manfully through the danger. The lowest point reached by the barometer was 28° 95′.

The steamer *China* reports that, when passing Dodd Island on the 5th Oct., at 11 A.M., a ship's boat was observed on the rock, a boat's mast erected as a flagstaff, and near by a kind of tent, composed of sails and mats. There were no signs of either Europeans or Chinese about. The weather was too boisterous to admit of a landing being effected.

A Cantonese boy, employed on board the steamer *Glencarn*, who had come out from England with the ship, suddenly disappeared a day or two since, when it was found that he had stolen eleven sovereigns, forty dollars, and a valuable gold chain and ring, belonging to persons also employed on board.

The British ship *Leander*, which has arrived in the river, has made the round voyage, from Shanghai to New York, thence to London, Sydney, and back here, in exactly eleven months. Her passage from Sydney to this port was made in thirty-eight days.

For two days the concession at Chinkiang was entirely given up to a rabble of Chinese soldiery waiting the arrival of some "great man;" petty mandarins have been galloping about the place at full speed, to the imminent danger of passers-by, and all this in defiance seemingly of the proclamations that Mr. Medhurst caused the Taoutai to issue after the late trouble.

The graves of British subjects buried on Silver Island have been removed, to make room for the new fort which is being built there.

The cricket match, Scotch *v.* English, has been played, and won by the former.

The following additional items of news are from the *Celestial Empire*:—

A very considerable improvement is noticeable of late in the share market. Not only have most stocks risen in value, but they are difficult to procure. It is not strange that there should be few sellers, seeing that holders as a rule cannot sell at a profit. Hong Kong and Shanghai Bank shares have risen from the lowest point to which they were ever depressed, viz., 30 per cent. discount, to 13 per cent. discount. It is believed that the Bank is doing a good local business, and if the directors in Hong Kong confine their operations to legitimate banking business the shareholders have fair prospects before them. Part of the present appreciation of the stock is probably due to an impression prevailing that some of those securities which have absorbed so much of the Bank's money are improving in value. We are surprised that S.S.N.S. do not improve more rapidly; they are, it is true, some Tls. 3 above their lowest point, but it is difficult to discover any reason for a fall of some 20 per cent. since our last report. As a glance at the Customs' Returns will show, there is a good traffic on the river, and it is understood that what benefits one company is equally profitable to its rival. There are good grounds for believing that the period of greatest depression in shares is past, and we trust it may prove to be so, as

Digitized by Google

the total value of shares in the local joint-stock companies gives a very high average per head to the number of foreign residents in China—something like $3,000. At the same proportion in the United Kingdom, the investment of capital in joint-stock undertaking would represent 21,000 millions sterling.

The *entente cordiale* between China and the faithful little dependency of Japan, Liuchiu, will certainly be strengthened by an incident which occurred a few weeks ago. A Liuchiuan junk, bound from one island of the group to another, laden with fifty bags of tribute rice for the King, somehow got out of her course, encountered bad weather, and was blown away into the Gulf of Pecheli, off a town in the province of Shangtung called Yung-ch'en. Her appearance created a good deal of interest, and the Che-hsien of the district went down to investigate her condition. The crew, twenty-five in number, are described as much resembling the Japanese in physiognomy; the ship was undamaged, and she had been free from pirates, but the unfortunate men on board had exhausted all their provisions and were more than half starved. It says wonders for their conscientiousness and loyalty that although reduced to the utmost verge of hunger the fifty bags of rice, consecrated to the use of the King, were left untouched. None of them could speak Chinese; the purser, however, knew a few Chinese characters, by writing which he was able to inform the mandarin that his name was Ts'ai Teh-Tsz, that the captain was called Tu Ching-tsz, a native of La-pa Fu, how they had got into trouble in the manner above described, and would not touch their rice because it was tribute. The Che-hsien immediately gave orders for their being refitted, and well looked after; then informed the Taoutai of the circumstance. The Taoutai memorialised the Empress Dowager upon the subject, and her Imperial Majesty gave orders for a mandarin-boat to guide them down as far as Shanghai and protect them from pirates on the way.

The imperturbability of the Chinese has at no time been more manifest than during the last few months, when the interest of foreigners in the political questions of the day has run so high. For a very long time it seems to have been simply impossible to stir them up at all upon the subject of impending trouble; the majority of them have pooh-poohed the idea of any such thing, while the remainder have with characteristic apathy hardly given a thought to it either way. But now, owing to the continual references in the foreign and native press, they are beginning somewhat to realise the situation and to show some uneasiness about the future. The general impression in well-informed official circles is that England is taking an undue advantage of her position and attempting to force China to do things which are simply impossible, on pain of immediate hostilities. It is true that the six or seven conditions imposed by Mr. Wade do make up a very formidable demand, and may seem to them rather out of proportion to the offence—viz., the murder of an English official by a Chinese military mandarin; but one must not forget that all the concessions now required ought to have been made years ago, and the murder of poor Margary is only the crowning point of a long list of infidelities and outrages. The Chinese are now talking about hardly anything else, and the other night it was bruited about in all the tea-houses that the gunboat which had arrived had brought news of an open rupture.

A rumour has reached us that the Chinese are at last going to establish a company of merchants and commission agents for silk and tea, with a capital of Tls. 100,000, a branch of which is to be opened in Lombard-street, London. This is a project that has been long talked about but never realised, and we have no means of knowing whether the present report is a well-founded one or not. There is no doubt that if such is the case the Chinese will be able to experience themselves the exact condition of the trade, and will see the futility of demanding enormous prices on this side. Such smart losses as have been sustained during the last few years would soon absorb the capital, unless the Government came to their assistance and supported them as it does the China Merchants' Steam Navigation Company; support worth having in the latter case, seeing that the Company are thereby enabled to pay 14 per cent. dividend while other local companies can hardly pay six. We have heard in former days, in King Cotton's time, 1863-64, of several native Indian firms establishing agencies in London; but they none of them prospered in the land. Perhaps the astuter Celestial may be more successful.

The Municipal finances on the 1st October stood as follows:—Bank deposit account, Tls. 15,000, Bank current account Tls. 7,629.98, and on hand, Tls. 1,638.16; being a total of Tls. 24,268,14. With reference to the deposit of Tls. 15,000, notice has been given to the Hong Kong and Shanghai Bank to hold the sum at the disposal of the Council on the 1st proximo. The Council will thus effect a small saving in the difference between the bank rate of interest and their own offer of 8 per cent., by applying this sum of Tls. 15,000 towards the purchase of the Tunsin property. It has been said that a certain bank would have accommodated the Council with the Tls. 28,000 at the rate of 7 per cent.; but the Council's business is to spend money, not to save it.

Large profits on silk, we believe, are generally considered a sort of thing one reads about, but very seldom sees. We hear, however, that some handsome returns have been lately realised by re-importations of silk from Europe to China, stuff worth about 9s. to 9s. 6d. on the London market, and selling here at Tls. 250 per picul, equal to about 12s. 6d. per lb. A considerable number of bales have been re-imported on this wise, a certain portion of which are common Hainins. The next variation in the China trade will probably be an occasional reshipment of piece goods to Manchester.

FOOCHOW.

We take the following summary from the *Foochow Herald*:—

The foreign drilled battalion, under the command of Captain Macmahon, turned out on Monday morning for inspection by Generals Chung and Tuck. The men, on the whole, went through their movements very creditably, but the marching was, as usual, far below the standard. The bare legs of some of the men, and a number of loose trousers—flying in the air—did not favourably strike our unprofessional eye. Compared, however, with a few companies of gingal men, whose evolutions, or rather antics, we witnessed subsequently, Captain Macmahon's men did wonders, and we quite felt that the foreign officer deserved the warm praise accorded to him by the inspecting generals.

We are now in possession of more definite information with regard to the mutiny and murders on board the German schooner *Anna*. It appears that the vessel was seized by the Chinese crew—consisting of six Foochow men—on the 23rd ult., a little to the north-west of the White Dogs. The captain and mate were, we regret to add, murdered, and their bodies thrown overboard. The vessel was then run in amongst a group of islands, some forty miles north of Matsou, and anchored on the 25th ult. under an island called Hse Yung. Here the cargo was transferred to fishing boats, and generally dispersed among the island villages. The crew, as nearly as can be ascertained, after making the most they could out of the cargo, returned to their homes—three of them being natives of a small village a little below Pagoda Anchorage, and the other three of a village in the Chang-lok district, some eight or ten miles from the Pagoda. One of the three who belongs to the village nearest the Anchorage was arrested by *Mao* (Wai Yuen) and his police the night before last, and handed over to the Min magistrate yesterday (October 14). The arrest of this one is almost sure to lead to the capture of all the others. No part of the cargo has yet been recovered, unless some was found by the German gunboat *Cyclops*, which reached the Anchorage yesterday afternoon. *Mao* (Wai-Yuen) is the assistant of the *Tung San Chü*, stationed at Mamoi, and is a most active and energetic young officer. He deserves great credit, we understand, for the energy and goodwill he has displayed in the matter. We cannot close this brief notice without also commending the energetic action of the United States Consul—to whose promptitude the result now accorded is mainly due.

The Great Northern Telegraph Company have entirely suspended operations on the line to Amoy, pending notice from the Chinese authorities that the necessary protection will be given to the construction party. The higher officials are now, we believe, quite willing to carry out the contract, but have to contend with fierce opposition from the *Literati* and petty Mandarins. Anonymous placards appear nearly every day in the different towns and villages on the route, calling upon the people to resist the innovation. "As you sow, so shall you reap," is a saying that applies with particular force to the present difficulty. Had not those in authority secretly incited the plunder of the company's property in January last, they would not now have to contend with rowdies, in addition to incurring a certain and absolute *pecuniary loss*. Moreover, had the higher officials acted with ordinary honesty and straightforwardness in the first instance, they would not now be put to the humiliating necessity of declaring their inability to reduce a mere rabble to law and order—within a few hours' march of their Yamen gates.

A meeting of the Rowing Club was held at the Club-house. There were present: Messrs. Hickling (Chairman), Sanderson, Tennant, Dunne, Dermer, Gardner, Sayce, Thomas, Robinson, Nind, C. D. Smith, Kinnear, and Weeks (Secretary). The Chairman informed those present that the meeting had been convened hurriedly, as Regatta time was approaching, and then called upon them to assist him in putting through the business before them with promptitude. In the first place, the old committee retired, and a new one must be elected without delay. He therefore begged that they would choose a new one, and regretted that Mr. Haslam and himself had to resign. A new committee was then proposed, and Messrs. Sheppard, Sanderson, Young, Kinnear, and Weeks were duly elected. The object for which the meeting was then called was proposed by Mr. Dermer; it was as follows:—"If possible, there should be a Regatta this year before Christmas;" Mr. Gardner seconded, and it was carried unanimously. Mr. C. D. Smith then proposed that "As the Club had a credit balance of over $600, a cup be given at the Autumn Races;" Mr. Sayce seconded. This, on being put to the meeting, was rejected—we think, rightly, as new boats are required, especially "two pairs;" and the boat-house might be burned down at any time, and the properties destroyed, conse-

Digitized by Google

quently funds should be kept in hand. The accounts, which had been on the table, were then passed. The Secretary was requested to place a list on the Club table—inviting entries for the Regatta; and the programme of last year was thought to be the best one to be adopted.

HONG KONG.

Our advices by this mail extend to the 21st October; no later mail from London had been received. The following items of news are from the *Daily Press*:—

We notice that one of the two European Custom-house officers from Canton who were the cause of some sixty-five balls or so of opium being thrown overboard from the Canton steamer *Kinsham* as she was starting from the wharf here, through showing themselves alongside, has been moved from Canton to Takao. He left yesterday morning in the steamship *Namoa*.

For the last week or ten days a great many Chinese shoemakers have been busily engaged in Circular Pathway, and other bye-streets of Taipingshan, making large numbers of cartridge pouches for the Chinese Government. The pouches are to complete contracts made between dealers of muskets in the Colony and the Canton authorities to supply as many stands of arms as the colony can produce, each to be fitted out with bayonet, pouch and belt complete.

As will be seen by our Shipping Report, the French steamship *Gunga* encountered a heavy gale in lat. 17 N., long. 113 E., on the 13th and 14th instant, which only partly moderated on the 15th. In fact, it may be said to have been a typhoon, propably the same the British bark *Finzel* steered away to get clear of. The deck of the *Gunga* is a complete wreck, the iron work fairly doubled up like tin and broken like wood. On two occasions, when heavy seas completely buried the vessel, the sailors bid each other good-bye, concluding she was gone for ever. The storm was terrific, but fortunately the vessel came out of it with only one Chinese passenger washed overboard. Two of the boats were smashed and carried away, and everything moveable went over the side.

The Honolulu Government is evidently determined to utilise the appropriation for immigration voted by the last Legislature. They offer a bonus of twenty-five dollars a head for bringing free immigrants from China; and this inducement is extended to the transportation either of one-fifth as many women as men.

A Naval Court of Inquiry into the loss of the steamship *Hector* was held at Amoy on the 18th inst. The Court ordered that the master, Captain Robinson, have his certificate suspended for fifteen calendar months.

The port of Tsuruga, in the province of Echizen, on the west coast of Nipon, will, we hear, says the *Japan Gazette*, be opened to foreign trade during the current month.

At the Peak the maximum temperature during the past week recorded in Saturday's *Gazette* was 72·0, the minimum 60·5; at the Harbour Master's Office, Praya West, the maximum was 80·0, the minimum 66·0. The greatest rainfall was on the 10th inst., when 0.12 inches fell.

The Hong Kong Cricket Club played a match on Friday, soon after two, but owing to the want of punctuality on the part of some of the members, and the defaulting of others, the first day's play was not a success, as the team was made up as the afternoon wore on. For the second day there were three substitutes for the West. Messrs. Handley and Anton scored 23 and 22, not out, respectively, and with the help of the extras the innings reached the respectable total of 117. Before play was finished the first day Mr. Griffith bowled three wickets in excellent style. Next day, although requested to attend at one, some of the players displayed the same dilatoriness, and it was past two before the first ball was delivered. A good stand was made, and the score proceeded rapidly from 17 to 85, owing chiefly to the vigorous hitting of Mr. Wodehouse, who was well backed up by Mr. Skinner. Mr. Cole made 29, his chief items being a six and a five. The fielding of the West was very good, but their bowlers could not get on the spot. The match was not finished, but six of the West wickets had fallen when time was called, five to Mr. Greig.

RIFLE CONTEST AT KOWLOON.

The return rifle match between five of the sergeants of the Royal Engineers and five Inspectors of Police took place on Saturday afternoon, at the Military Rifle Range at Kowloon, the conditions being five rounds each at 200, 400, and 500 yards respectively. Some very fair shooting was displayed by both sides, but the Inspectors of Police, who were badly beaten at the Victoria Range, managed on this occasion to keep in front, winning the match by seven points. After the match was finished the sergeants of the Royal Engineers intimated their intention of again challenging the Inspectors of Police.

ACCIDENTS.

On Friday evening about seven as a gentleman and his wife were returning from their evening drive they met with an accident which might have proved serious. It may be known by many people who are in the habit of taking a stroll eastward, that at the Eastern guard-house corner the roads and pathways are being repaired, making it difficult for two carriages to pas abreast. This was attempted by the gentleman, and, we believe, one of the German Community, and to add to the difficulty a chair got between them. The trap belonging to the German gentleman came in contact with the chair, thrusting the poles of the latter through the splash board and lamp of the other's carriage. The lady was frightened and jumped out, the horse became restive, and had it not been for the courage of a gentleman who seized it by the head the accident might have proved more serious.

Another carriage accident happened on Friday evening. A horse and carriage was going along the Praya Central, eastward of Ice House-street, when the horse took fright at a coolie or something in the road, and bolted, running full tilt with its head against one of the pillars at the rear of the Hong Kong and Shanghai Bank. The animal fell down and expired in a very short time, having crushed in the frontal bone over the brain.

A Chinaman, driving a pony and trap, also came to grief on Friday evening. We understand that he had neared the Eastern Guard-house, when either the pony took fright, or, owing to the occupant's bad driving, the trap came in contact with a kerbstone and was upset, the Chinaman being summarily landed in the road.

A fourth carriage accident happened one day last week. Mr. McNulty, the proprietor of the British Hotel, was driving his wife home from Wanchi in his trap, when it came in contact with a stone and jolted him out on to the road. He unfortunately fell with his face on the ground, and his mouth striking a stone, his front teeth were completely knocked out, the lower jaw badly injured, and his mouth severely cut. Fortunately, Mrs. McNulty held on to the trap, and sustained nothing worse than a fright.

A Canton correspondent writes:—

The feud between the weavers' guilds has not yet been settled. Your readers will remember that during the recent fight a boy was accidentally killed. I understand that one of the ringleaders in the affray has been arrested by the Namhoi magistrate, and will probably experience decapitation. I hear there has been a fatal fire in Fatshan, a town some ten miles distant from this city. It occurred on the 13th instant, and originated, as in most cases, in the cook-house attached to a dwelling house. It is reported that three or four children were burnt or crushed to death; several men were also injured. The fire was subdued with great difficulty.

The departure of thirty more Chinese lads for tuition in the United States of America is a fact worthy of record. Three detachments of boys had already been sent there to be educated, and it is expected that more will proceed next year. It is intended to make up the number to one hundred and fifty. The boys who have just left are described as bright and well-clad. Eighteen of them were from the province of Kwang-tung. This Educational Mission is undoubtedly destined to exercise a salutary effect on the future of China. The lads will come back from America with their minds expanded and enlarged, and with a knowledge of Western civilisation and institutions which will be of the greatest value to them. They will, some of them at all events, be taken into the service of the Chinese Government, and a few may one day fill important posts. The rising race are more likely to effect reforms; many of the prejudices of olden times will, it is to be hoped, have melted away in another decade; and it is not impossible but some of these lads may be leaders in the march of progress. They will, no doubt, learn something of a more liberal and enlightened system of government than that of China, and will be able to detect the weak points in their own system on their return. But in any case, whatever they learn or fail to learn, the result cannot but be beneficial to China, and the more Missions of the sort the Chinese promote, the greater good will ultimately accrue to the country.

The steamship *Gaelic*, 2,562 tons burden, W. H. Kidley, master, sailed from San Francisco, Sept. 16th, with 28 European and 567 Chinese passengers, 1,650 tons merchandise, $312,934.000 in treasure, and eighteen bags United States mails. From the 16th of Sept. to 19th had fine weather, on 20th it blew a strong S.W. gale; on 21st there was a high sea with increasing squalls; on 22nd the glass fell from 29·8 to 29·4, while blowing a heavy gale with a high confused sea; 23rd same, 24th to 26th heavy squalls and high westerly sea; 26th, glass fell to 28·52, with a furious gale, which reached hurricane force and blew away the main trysail and stove in the after port of the wheelhouse; 27th to the 1st of Oct., blew a fresh gale with heavy head sea. Oct. 1st at 6 P.M., ship pitching and rolling, great quantities of water across her deck; Oct. 2nd, squally weather and high head sea; Oct. 3rd, glass fell to 28·35, lower by 0·25 than it was when the *Gaelic* was in a typhoon on her last trip to San Francisco, water being shipped. Early in the morning the hatches were secured, as there was much water on deck; a furious gale followed, which lasted all day and night, with a tremendous sea from S.W. At 6 P.M. the ship was rolling and pitching so heavily that dinner was all but impossible, but no ship could bear it or behave better than did the *Gaelic*. Oct. 4th and 5th a heavy beam sea with drizzling rain; the glass rose to 29·4; 6th fine weather set in till the 8th; during the night of 8th and morning of the 9th

Digitized by Google

there blew a heavy gale, but it calmed down under a heavy rain storm about 1 P.M. Fine weather during 10th and 11th; arrived at Yokohama Oct. 11 and at 4·6 P.M. landed mails and cargo and all of our cabin passengers, among whom were seven or eight English gentlemen travelling for pleasure to see the country and who are coming to Hong Kong by way of Shanghai. Left Yokohama Oct. 12th at 6.30 P.M.; had fine weather all the way to this port. Oct. 18th, met and exchanged signals with a steamer bound North, belonging to Messrs. Douglas Lapraik and Co., running between Amoy and Tamsui; reports all well on board. Arrived at Hong Kong October 20th at 7.50 A.M. This steamer brings for this port 1,510½ tons merchandise, $312,934 in treasure, and six bags of mail matter, four European and 567 Chinese passengers and 94 of a crew. Took pilot on board October 19th at 9.30 P.M.

A case of some interest in its bearing on the compradore system has been decided in the Summary Court by Mr. Justice Snowden. Mr. Lembke, a merchant, sued the defendant, one Lai-Ting, for the sum of $688.80 for goods supplied to him. The answer of defendant was, that he had paid to plaintiff's compradore (who had since absconded) the sum of $500 on account, and producing a receipt from that functionary for this amount, he paid a balance of $129.36, which he admitted to be due, into Court. Mr. Justice Snowden, after carefully going into the facts of the case, gave judgment only for the sum paid into Court. He says it was proved by the defendant's books, that as between him and the compradore the mode of business was to pay by large sums, not merely to the exact amount of the signed bills issued by the firm; and that defendant said most positively that the money was paid on a rough calculation of what was due to the plaintiff, and on account of the plaintiff. The Court could not assume the contrary without an atom of proof. Plaintiff had accepted payments on account, and took the excuses made by the compradore as true. The defendant produced a perfectly good receipt, if it was not in the form the plaintiff desired and expected, and no notice was given that payment was not to be made except on presentment of a signed bill. The Judge observed that the simple precaution of a heading to a bill to this effect would be a great protection against a dishonest collector, and concluded by ruling that the payment was proved, and that it was a good one, on the ground that the compradore was the plaintiff's authorised agent to receive payment, and that it was made in the usual course of business.

BORNEO.

—o—

SARAWAK.

The *Sarawak Gazette* says :—

During the past fortnight three schooner loads of coal, amounting to more than 200 tons, have arrived from Sadong. We hear there is a locomotive engine on the way out for Sadong. This will do away with the present slow system of hauling down the coal carriages by buffaloes, and greatly facilitate the working of the mine.

The new steamer belonging to the Sarawak Steamship Company (Limited), which has been named the *Rajah Brooke*, has arrived at Kuching. As several of our Chinese merchants are shareholders in this company, there was more than ordinary interest taken in this arrival, the Taukays being naturally curious to inspect a steamer of which they are part owners. The steamer is a fine vessel; she steams ten knots, burns six tons of coal per diem'; she is fitted with two steam winches and modern improvements for lifting anchor, &c. A deck-house affords very good accommodation for a few passengers, and she is withal a good carrying ship, as we understand she took away about 7,000 piculs of sago-flour. Such a ship must be a paying one, and give the shareholders every satisfaction.

A new road is being made by Government, *i.e.*, the Pinding-road now takes another course. Some distance after passing Padungan Bridge the road diverges and rejoins the old road near Baroness Coutts's estate. The distance by the new route is about the same, whilst it cuts off all the steep hills and will open up a good ridable or drivable road to Pinding.

JAVA.

—o—

BATAVIA.

The following items of news are from the Batavia newspapers of the 14th October :—

From Atchin we hear that the enemy are making preparations to attack our lines in great numbers during the fasting month. A telegram dated the 6th October, received from the Colonel of Infantry, temporarily charged with the functions of civil and military commanding officer at Atchin, contains the following intelligence :—"The Chief of Kigas, on the West Coast, is taking steps to acknowledge the sovereignty of the Netherlands. State of health favourable." In the Batavia Residency, in Palembang, and in Java, cases of cholera are still appearing.

The wreck of the British barque *Derwent* is advertised to be sold by auction at Batavia on the 18th Oct., together with her rigging, sails, two boats, provisions, 130 fathoms of chain, four anchors, three compasses, &c. On the same day it is also intended to sell there by auction the British barque *Adelaide*, 271 tons burden, along with her rigging and inventory complete.

The average price of about 10,000 piculs of Billiton tin sold by auction at Batavia on the 11th Oct. was guilders 54.83 per picul.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 28th Oct.; the French mail from London Sept. 24 was received on the 24th Oct. We take the following items of intelligence from the *Straits Times*:—

At a meeting of the Legislative Council on the 22nd Oct. Dr. Little put the question of which he had given notice at the previous meeting, whether "the editorial which appeared in the *Straits Times* of the 12th October on Perak and Laroot was authorised by Government?" The hon. Doctor explained that when he gave that notice no intimation had been given by Government to the Council as to what was going on in Perak, and he had not then seen the *Government Gazette* Extraordinary which was issued the same day. The members of Council, as also the public, were very anxious for authoritative information concerning the affairs of Perak, and up to the time of giving notice there had been no sound, no word, from Government on this subject, and his object was merely to ask his Excellency whether they were to take what appeared in that paper as an authorised statement, as, for all he knew to the contrary, the information might have been obtained from other and less reliable sources, or might have been merely a creation of the editor's brain. He would therefore ask his Excellency whether that editorial was authorised or not. His Excellency said that the only paper authorised by Government was the *Government Gazette*, and of course he could not undertake to be responsible for what appeared in other prints. He would say, in respect to Perak, that matters had only just been brought to a conclusion, and he had not therefore had an opportunity of coming before Council with a statement. There had, however, been no intention on his part to withhold information from the members of Council; he had conversed freely with several persons on the subject, and he believed, with one member of Council, and had he happened to converse with any of the other members he should have been glad to afford them any information in his power, on this or any other question. It was his intention in due course to lay before the Council a complete statement of what had been done in Perak, but he had been unable to do so hitherto, owing to the non-completion of the arrangements.

On the 21st October five more prisoners charged with taking part in the mutiny on board the schooner *Hawk* were examined before the police magistrate, and four of them were committed for trial at the present assizes; there being no evidence against the other, he was discharged. These prisoners had been rendered up to the Government by the Maharajah of Johore, who, it will be remembered, first asked that the whole of the prisoners in this case should be handed over to the Johore authorities for trial and punishment. These four prisoners will be tried together with the others already awaiting trial. The Criminal Assizes have been adjourned until the 1st November, when we understand the case will come on for trial before a special jury.

The *Pluto* has left for Perak, taking down Mr. Swettenham, who relieves Mr. Davidson at Salangore, the latter officer proceeding to Perak as Commissioner. The *Pluto* also takes down a large number of copies of H.E. the Governor's Proclamation, in the Malay language, for circulation in Perak.

CEYLON.

(FROM A CORRESPONDENT.)

The inhabitants of "the utmost Indian Isle, Taprobane," are resolved that on the occasion of the approaching visit of his Royal Highness the Prince of Wales they will not be behind their fellow subjects of the Indian continent in demonstrations of loyalty and attachment to the throne. The Prince is on his way, and as each day brings him nearer to his destination the enthusiasm of the Ceylonese seems to increase. The visit of the Duke of Edinburgh is not forgotten, but the expectation of standing in the presence of the King that is to be, appears to have inspired the natives of Ceylon with unusual energy and determination. Not content with preparations on a large scale for an exhibition of the celebrated "Tooth Relic" in the great Maligawa temple at Kandy, and a performance of the "Perakarra," or religious procession of elephants by torchlight in the ancient capital of the Kandian Kings, the Singhalese have resolved to commemorate the Royal visit by founding a College for the teaching of Oriental languages, such, for instance, as Singhalese, Elu, Pali, and Sanscrit. In the present day, when so much attention is being devoted in European countries to the study of Oriental literature and Eastern religions, we cannot avoid congratulating the Ceylonese on this excellent resolve. A Co-

Digitized by Google

lombo journal (the *Ceylon Times*) has the following apposite remarks on this proposed undertaking :—

"That the time has fully come for reviving the study of the native languages and literature of Ceylon every one will admit. While European Orientalists are now fully recognising the value of Pali as an adjunct to Sanscrit studies, and while Childers, Fausböll, and others are striving hard to secure for it an interest in the minds of European scholars, it would ill become Ceylon not to do her best to second their efforts. It cannot be denied that the state of education in Ceylon is in a very backward condition. The only places where Pali is taught are the Temple schools and Buddhist colleges, and the best Orientalists among us speak very slightingly of the instruction given there. With some very honourable exceptions, whose names are so few that they might almost be told off on one's fingers, the Buddhist priesthood contains scarcely any members who are entitled to the name of scholars. As proof of the backward state of Pali scholarship we may cite the fact that the Government of British Burmah applied in vain to Ceylon for a person competent to fill the Pali Chair in the new Oriental College at Rangoon, although the terms which the Chief Commissioner was prepared to offer should have been sufficient inducement to any one qualified for the post. And the few good Orientalists that we have among us have done nothing to vindicate the learning of the Island in the eyes of the *literati* of Europe. Mr. Alwis's contributions to Oriental research have been confined to the pages of the local Asiatic Society's Journal, and so far as we are aware, he has never given European scholars the benefit of his extensive knowledge of the language and literature of ancient Ceylon by publishing at Home. The only Pali texts and translations that a Ceylon gentleman has brought out through a European publisher are, in the opinion of our best critics, not such as will raise the character of Ceylon scholarship in the eyes of Orientalists in Europe."

There is one slight error in the above. Mr. Alwis has given to the world other papers than those found in the local society's journal, and his works have been favourably noticed by some of the leading Orientalists of Europe.

The public museum at Colombo is, we believe, to be opened on the occasion of the Prince's visit, and the first stone of the breakwater is on the same opportunity to be laid, with Masonic honours, by the Grand Master of England. For the nonce other matters are allowed to lie over; political discussion and party strife, even the prevalence of leaf disease and consequent short crops, fail to create any movement amidst the excitement caused by the approaching visit. May its advantages be as great as are the preparations for the Royal visitor to the island.

TELEGRAMS FROM THE FAR EAST.

THE DISTURBANCES AT PERAK.

(COLONIAL-OFFICE TELEGRAMS.)

COLONIAL-OFFICE, Nov. 22.—A telegram from Singapore, dated 21st instant, received *viâ* the Nagasaki and Wladiwostock line, states that General Colborne, with 300 men of the 80th regiment, left Singapore for Perak on the 18th inst. The *Ringdove* and *Egeria* had also started for Perak. On the 15th, the troops from the Perak Residency shelled and cook four stockades at the village of Passir Sala, where Mr. Birch was murdered. Some of Mr. Birch's property was found in the house of the Maharajah Lela. The troops afterwards returned to the Residency. Satisfactory news had been received from Mr. Davidson, the Acting Resident in Salangore, up to the 8th instant.

(BY POST.)

COLONIAL-OFFICE, Nov. 23.—A despatch received yesterday throws light upon the action of the Government of the Straits Settlements immediately before the outbreak. It encloses three proclamations, which are apparently those referred to in the first official telegrams as having been posted and subsequently torn down. The first of these proclamations, sealed by Sultan Abdullah on the 2nd October, acknowledges the British residents, and any other British officers appointed to reside in Perak, to be Judges, with power to punish all crimes, and try all cases, and to appoint magistrates. The second, sealed by the Sultan on the same day, acknowledges the same residents and officers to be the Sultan's representatives, to carry out in his name all the affairs of the country, as well as to collect and expend all the revenues, and appoint all the Datus and Punghulus, and, in fine, to set in order all the affairs of the country. The third proclamation, signed by Sir W. Jervois on the 15th October, declares that Her Majesty's Government, in compliance with the request of the Sultan and Chiefs of Perak, have determined to administer the Government of Perak in the name of the Sultan; and that, to this end, the Governor is about to appoint officers, who will be styled Commissioners and Assistant-Commissioners of the Queen, to carry on the Government of the State; and that a Malay Council of Rajahs of Perak of the highest rank will be appointed to aid the said Commissioners in matters touching the affairs of the Government of Perak.

(BY INDO-EUROPEAN TELEGRAPH, *viâ* TEHERAN.)

GALLE, Nov. 24.—Commander Sterling and Captain Whitla, of the 10th regiment, with 250 men, five guns, and two rockets, attacked on the 15th, at noon, and took four stockades. Six cannon were taken. They burnt the Lelor villages; the enemy fled in disorder; three of the British force were wounded. This success may cause the wavering chiefs to acknowledge the British power, and then peace may be restored.

CHINA MARKET REPORT.

HONG KONG, Nov. 18.—Cotton goods very little doing; 8¼ lbs. Grey Shirtings, $2.50; 16-24 water twist, $103. Tea: Canton, limited business. Total exports from China and Japan to Great Britain, from 1st June to date, 132,375,000 lbs.

SHANGHAI, Nov. 18.—Cotton goods nothing doing. Tea: Black, limited business; Green, very little doing. Silk firm. Blue Elephant chop Tls. 325.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

NEWMAN—On the 4th Oct., at Chefoo, the wife of E. Newman, of a son.
PIKE—On the 5th Oct., at Hankow, the wife of C. H. Pike, Imperial Customs, of a son.
PIRKIS—On the 1st Oct., at the British Legation, Peking, the wife of Albert E. Pirkis, of a son.
SHADGETT—On the 6th Oct., at Shanghai, the wife of J. Shadgett, of a daughter.
SOUZA—On the 19th Oct., at Hong Kong, the wife of E. F. de Souza, of a daughter.

DEATHS.

BROWN—On the 27th Oct., on board the steamship *Sumatra*, between Aden and Bombay, James Brown, M.B.C.M. of Glasgow University, surgeon, P. and O. Steam Navigation Company's Service, younger son of Robert Brown, quartermaster 60th Brigade Depot, Hamilton. N.B. Friends will please accept this (the only) intimation.
COATE—On the 8th Oct., at Shanghai, Thomas Acram Conte.
D'ALMEIDA—On the 11th Oct., at Macao, Antonio d'Almeida, late of Singapore, aged 58.
WAKFER—On the 7th Oct., at Shanghai, John Wakfer, Diver to the Customs, aged 58.

THE official announcement of the appointmeut of Mr. WADE, British Minister at Peking, to the dignity of K.C.B. appears in the *Gazette* of the 26th inst.

THE degree of Doctor of Divinity is to be conferred upon the Rev. R. S. COPLESTONE, who will be consecrated Bishop of Colombo in Westminster Abbey on the 28th proximo.

The prospectus has been issued, and will be found in full in our advertising columns of the Real Property Trust (Limited). The capital and funds of this Company are to be employed exclusively in the purchase of, or mortgage on, freehold or long leasehold property in England and Ireland, and heritable property in Scotland. The Trust will besides receive money on Debenture Bonds, with coupons attached, bearing interest at 4½ per cent. per annum, and also deposits. The capital is £1,000,000, composed of 50,000 shares of £10 each, and 500,000 shares of £1 each, and the present issue consists of 25,000 £10 shares, and 100,000 £1 shares. The shares are to bear a fixed rate of interest of 5 per cent., and the directors will only receive remuneration for their services after 5 per cent. has been paid to the shareholders.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Nov. 25, at Liverpool, from Bassein, G. Broughton; at Queenstown, from Manila, Ludovic and Charles; 26, at Liverpool, from Rangoon, Antonio Ferraro; from Bassein, Slieve Bloom; at New York, from Shanghai, Glenartney (str.); 27, at London, from Foocho, Cybele (str).

SPOKEN.—Ulva, from Singapore, to Marseilles, Oct. 6, 29 S., 8 E.; Florence, from Singapore, to London, Oct. 15, 12 S., 10 W(?); P.N.G.F., from Cardiff, to Singapore, Oct. 12, 10 N., 24 W.; Cordelia, from Manila, to Liverpool, Oct. 27, 8.50 N., 28 W.

DEPARTURES.—Nov. 24, from Falmouth, for Singapore, St. Aubin; 22, from Havre, for Saigon, Perseverant; 25, from London, for Rangoon, Onward; from Plymouth, for Shanghai, Cheops (str.); from Southampton, for Batavia, J. B. Walker (str.), Holland (str.); from London, for China and Japan, Benledi (str.); 23, from Antwerp, for China, Assens; 26, from Liverpool, for Shanghai, Ulysses (str.).

MISCELLANEOUS.—The Jacob Hansen, from Cronstadt, for Amoor, Oct. 28, left Elsinore on the 17th inst. The Cheops (str.), from London, for Shanghai, Nov. 5, which put into Plymouth for repairs, left there for her destination on the 25th inst.

Naval and Military.

The Simoom, troop-ship, Capt. M. S. L. Peile, has left Portsmouth for Malta, with volunteers for the 28th Regiment, referred to in our last issue; also supernumeraries for the East India and China squadrons, and a detachment of the torpedo company of Roy Engineers. The Himalaya, troop-ship, Captain W. B. Gran will meet the Simoom at Malta, and embark the whole of the 28th Regiment for conveyance to Hong Kong. Instructions have been telegraphed to Barbadoes, countermanding the previously-arranged detention of the Himalaya at that island, and directing her to proceed with all despatch to Malta. The hired transport Thames, Captain Campbell, will convey a portion of the supernumeraries and reliefs for Hong Kong, there being more than the Himalaya can take.

The following shows the naval movements at Hong Kong:—

The Ringdove returned from Canton on the 5th October, and went out to sea the same day for gun practice, and returned to harbour on the 6th. The Midge, after a thorough overhaul at the naval yard, went for a trial trip of her machinery on the 5th, returning to harbour in the afternoon; she proceeded in the evening with the Colonial Surveyor-General, on an inspection of the lighthouses recently erected at Green Island and Cape d'Aguilar, returning to harbour the next morning. On the 8th she went out to gun practice, returning on the 9th, and left again for Chefoo on the 12th to join the Admiral. The Modeste was docked by the Hong Kong and Whampoa Dock Company at Aberdeen on the 9th, and having been cleaned and had sundry defects made good to her keel proceeded on a cruise. The Spanish transport Marquess de la Victoria is in harbour refitting.

Captain Branke, Brigade-Major, proceedsto England by Messageries Maritimes mail steamer, on leave of abeence till February nect, when he takes up the appointment of Brigade-Major at Shornecliffe. Captain Huskisson, 80th regiment, aide-de-camp to the Major-General Commanding, is appointed Brigade-Major until the arrival of Captain Bran7e's successor. The Spanish transport, Marquis de la Victoria, remains in harbour refitting.

The Admiralty has adopted a system of issuing daily bulletins of the movements of Her Majesty's ships, both at home and—so far as they become known by telegram—abroad. This system will prove of great convenience to the public, and save the Admiralty officials considerable trouble in answering inquiries.

The Juno, Captain Poland, store and troop ship, for the China Station, has not yet embarked the supernumeraries. There has been a delay in consequence of the reports on the gunboats Frolic and Kestrel, rendering it doubtful if they can be recommissioned at Hong Kong.

Paymaster Russell Hill (1870), late of the Cameleon, on the Pacific Station, is appointed to the Victor Emmanuel, for service at the Shanghai Naval Yard.

Captain John Hobhouse Inglis Alexanuer, C.B., aide-de-camp to the Queen, died a few days since, in his forty-sixth year. In April last year, from increasing ill-health, he had to relinquish command of the *Hector*, 18, screw iron ship, armour-plated, coastguard ship at Southampton, in which command he was succeeded by Captain A. H. Hoskins. Captain Alexander had seen a good deal of service, and while in command of the *Euryalus*, 35, screw wooden frigate, during the Japanese war of 1865, was severely wounded, and, being permanently injured, was awarded a pension for wounds, and eventually made a Companion of the Order of the Bath and an aide-de-camp to the Queen.

The steamer Orestes has arrived from Hong Kong, having on board time-expired men, invalid troops, and prisoners belonging to the 80th Regiment. During the passage one death occurred on board.

Some of the ships on the East Indian station being below their proper strength, a number of men will be sent out from Portsmouth and Plymouth during next month by a hired vessel.

The new troopship Assistance, 2,037 tons, 1,300-horse power, will be commissioned at Portsmouth on the 1st prox. by Captain F. M. Prattent.

A telegram announces that the Challenger arrived at Valparaiso on the 19th inst., all well, and that the expedition had been successful.

Legal.

COURT OF BANKRUPTCY.

IN RE ALEXANDER COLLIE AND CO.

This was a sitting for public examination. The bankrupts, Alexander and William Collie, were adjudicated upon the petition of the London and Westminster Bank, in respect of a debt of £1,400 due upon a bill of exchange dated the 4th of January, 1875, drawn by the debtors upon and accepted by Charles Carnie, and payable six months after date; and the act of bankruptcy upon which the adjudication proceeded was the presentation by the debtors of a petition for liquidation. A joint statement of affairs filed by Mr. William Collie returns the following items:—Dr. — Creditors unsecured, £90,025; ditto, subject to payment of their acceptances, £1,274,292; creditors partly secured, less value of securities, £39,418; creditors for rent, rates, &c., £844; and liabilities on bills discounted, estimated to rank £464,579. Cr.—Stock in trade at Manchester, £38,789; book debts estimated to produce £22,767; cash in hand, £9,914; bills of exchange and other similar securities, estimated to produce, £7,363; freehold premises, furniture, fixtures, and fittings, at Aytoun-street, Manchester, estimated surplus after payment of balance of purchase money, £75,000; other property, £32,160; bills of lading in hand, £2,427; surplus from securities in the hands of creditors, £31,046; and sundry assets requiring time for realisation, a judgment against a debtor, and further amounts, estimated at £509,875. A statement of the affairs of Alexander Collie, filed but not signed by him, shows debts of £1,641, with assets £45,054, inclusive of bankrupt's house at Palace-gardens, Kensington, furniture, and effects, subject to lien £28,755; pictures, water-colour drawings, and paintings, £14,500. The debts of William Collie separately are returned at £68, with assets, comprising property of various descriptions, £14,936.

Mr. J. Linklater, for the trustee, said the facts of this case were so notorious that he would scarcely be justified in bringing them before the Court again. The bankrupts failed a short time since, and the trustee had every reason to suppose that one of them would not be in attendance. The other had filed a statement which the trustee considered wholly insufficient, but he was in this difficulty, that he could not examine the bankrupt thereon, seeing that the whole matter was pending before another tribunal, and appointed to be heard on the 18th prox. The Registrar accordingly postponed the proceedings until the 12th January. Upon an application by the trustee to stay proceedings instituted by creditors in the Manchester Court to recover the value of certain parcels of goods rejected by the bankrupts as not being in accordance with contracts with these creditors, but which were at present in the hands of the trustee, forming a part of the property on the bankrupt's premises at the time the petition for liquidation was presented, the Registrar stayed the proceedings at Manchester, holding that the proper tribunal to try the questions at issue was the London Court.

IN RE ALEXANDER, PEARSE, AND COLLIE.

The bankrupts—Nathaniel Alexander, Brice Hugh Pearse, and Alex. Collie—carried on the business of East India agents at Great Winchester-street, and were adjudicated in September last on the petition of the London and Westminster Bank. The joint statement shows total unsecured debts, £239,529 11s. 10d., against assets £34,477 1s. The bankrupts, Alexander and Pearse, now applied to pass their public examination on this statement of affairs. The trustee offered no opposition, and the bankrupts were allowed to pass. The usual memorandum of non-attendance was made against Alexander Collie.

IN RE KILBURN AND KERSHAW.

This was a sitting for the public examination of H. W. Kilburn. Messrs. Kilburn and Kershaw carried on a very large business as silk piece brokers at St. Mary-axe, and were adjudicated in July last. Kershaw absconded, a reward of £200 being offered for his apprehension. The joint statement produced by Kilburn shows a total unsecured liability of £201,456, as against assets of £6,577 12s., his separate statement shows debts of £10,513, against assets £7,300. No opposition was made to the passing of the bankrupt, who was accordingly allowed to pass. The usual memorandum was entered against Kershaw.

Miscellaneous.

CHINESE EDUCATION IN CALIFORNIA.—A Californian paper states:—It may not be generally known that there are now two Chinese Sunday-schools that meet regularly in this city. One is connected with the Presbyterian Church and the other with the Baptist Church, the former having been many months in existence, and the latter only a short time. The attendance is variable, sometimes being as high as thirty at the Baptist Church. Evidence shows that the Chinese attend the Sunday-schools not because they are thirsting for religious instruction, but for the reason that it is a good chance to get an English education. They are indulged in their preference, for it is conceded that labour spent in impressing upon them the primal truths of Christianity would be thrown away while there is no common medium of language by which the teachers and pupils can make themselves understood one by the other. The method of instruction adopted is not the teaching of pupils to translate from one language into the other, as languages are usually taught in the public schools; but, beginning with the alphabet, the written language is taught in the same way as to young children in the primary schools. Most of the Chinese display great, not to say wonderful, aptitude for learning the alphabet and the first reading lessons, and acquiring correct pronunciation. A fact which will certainly be new to most people, namely, that the Chinese are great lovers of music, is mentioned. The paper above quoted from says that the Chinese learn to sing by ear with precision after a short practice, and evidently take great pleasure in exercising their musical powers. A short time since a part of the Chinese who had attended the Presbyterian Sunday-school left it for the Baptist school, and upon inquiry it was found that their principal reason for doing so was that in the latter the teachers sang several pieces every Sunday, while in the former they were accustomed to sing only a few stanzas.

CHINESE GENEROSITY.—A San Francisco paper has the following:—It will be seen in the columns of the *Alta* that the Chinese of this city have contributed quite generously in aid of their fellow-countrymen, and ours also, who have been severely pinched by the devastation of the fire in Virginia City. They have contributed in cash, and also in provisions, and goods, which will aid all the distressed, and have, perhaps unwittingly, reproved delicately those who refused food to the suffering and hungry Chinese in that city of silver and ashes, by requesting that no distinction of country shall be considered in the distribution of their donations. Mark one down in favour of the Chinese. They, in this, act upon the principle enunciated by Christ, although they may worship Confucius and burn Joss sticks in honour of their ill-favoured god. They have given for the good of all the sufferers of that city. Give the Chinamen the credit of this generous and Christian-like action.

Punch of last week makes the following facetious comments upon the paragraph which appeared in our last issue, with reference to the Opium Essays:—Mr. Pease, who appears to be no Free Trader, is an active member of the Anti-Opium Society. He offered the prizes with anti-opium intentions. The Prize Essays have been doubtless conceived in an anti-opium spirit. Yet they are announced under the title of "Opium Essays." Too many essays upon all manner of subjects are found to produce upon their readers the effect of opiates. Let us hope, however, that the Opium Essays may possibly prove so interesting that, on the contrary, they will deserve to be entitled "Anti-Opium Essays," by answering their purpose, and not that of the narcotic they have written against, but for which, in the latter too likely case they may serve as substitutes.

THE KING OF SIAM AND THE ECLIPSE EXPEDITION.—A letter to a contemporary says:—It will be remembered that before the departure of the Eclipse Expedition to Siam in the early spring, an anonymous letter appeared in the *Athenæum*, evidently calculated to prevent the acceptance of the invitation sent by the King of Siam to the Royal Society. The statements made in that letter were at once contradicted by the Siamese Consul, Mr. Mason. Under these circumstances I trust you will allow me to state that the members of the Expedition sent out to observe the late solar eclipse are indebted to his Majesty the King of Siam, not only for an exceedingly liberal entertainment during their stay in his country, but also for very material assistance in the work they had to do. The difficulties the Siamese had to overcome in such a short time were very great. A jungle had to be cleared in order to build the observatory and dwelling-houses; the drinking-water had to be carried by sea through a distance of fifty miles; and a lonely spot on the sea-coast, with only a few fishermen's huts, was converted during the time being into a lively and active village. Down to the commonest workman every one gave willing aid, and no complaint was ever necessary. It should be generally known that his Majesty the King expressed his regret to me that no student of natural science had been attached to the expedition, saying that he would have given him ample opportunity to study the geology, botany, or zoology of the country.

CHINESE AT QUEENSLAND.—"Chinamen and horses," writes the Palmer correspondent of the *Brisbane Courier* of the 10th September, "are dying like rotten sheep on the new track between Cooktown and Edwardstown. I have just got over the journey, and can therefore speak from experience. The Chinese appear to have an impression that the dead should bury their dead; or, at any rate, such is their horror of handling a dead body that they would submit to almost any sacrifice in order to get out of the business. The scene that presented itself to my companion and myself as we surmounted the hillock and looked down on the valley below us, some fifteen miles from Little's Camp, was as follows:—Two Chinamen lay dead and unburied while some half-score of their countrymen were huddled together in a terror-stricken mob, a police inspector covering them with a six-shooter, and a trooper doing the same thing with a Snider. The dead Chinamen and the rest were mates travelling together, and it appeared that when the two succumbed the others would have left them to rot where they had fallen, had not the inspector opportunely put in an appearance and threatened to shoot down the whole of the inhuman crew unless they buried their comrades. John at once caved in on seeing how matters stood. All hands turned to with their picks and shovels, and in a quarter of an hour the bodies were consigned to the earth."

FOREIGN MISSIONS.—The annual meeting of the Glasgow auxiliary of the London Missionary Society has been held. Mr. Allan occupied the chair, and with him on the platform were:—Rev. David Russell, Rev. P. Granville, Rev. Geo. Stewart, Rev. James Troup, Mr. George Smith. Deputies—Rev. J. Sadler, Rev. G. Cousins, Rev. A. T. Saville. The Rev. G. Stewart read the report, showing that the total number of missionaries in the service of the society in May last was 156. The ordinary receipts from subscriptions, donations, and collections had reached a higher amount than in any previous year. For six years running the income of the society had exceeded £100,000; and the directors were now resolved largely to increase the missions in India and China. The society was now prepared to employ female agency more largely than at any former time in their missions in India and China; and a committee of fifteen ladies, resident in and about London, had been appointed to examine candidates, superintend their training, and otherwise to aid in this new work. Among the addresses subsequently delivered was one by the Rev. J. Sadler, of Amoy.

THE SUEZ CANAL.—The following telegram has been received by the Bank of Egypt from Alexandria:—"Egyptian Government sold to English Government Suez Canal shares for £4,000,000 sterling. Minister is authorised to draw this amount on Rothschild at sight." The following may be stated to be the effect of this transaction:—The Khedive having offered to sell to Her Majesty's Government the shares which he holds in the Suez Canal for the sum of four millions sterling, the Government have accepted the offer, subject to the approval of Parliament. The Khedive is the holder of about 177,000 shares out of the 400,000 into which the capital of the Company is divided.

At a meeting at the Theatre Royal, Preston, for the purpose of adopting a memorial to the Indian Government praying for the immediate and total abolition of obnoxious duties levied on cotton goods and yarns imported into India from this country, and from Lancashire in particular, Lord Winmarleigh and Mr. Clifton, M.P., were present, and spoke in favour of the object of the meeting. A memorial to Lord Salisbury praying that the alleged injustice of the tax may be done away with was unanimously adopted.

The *Inralide Russe* states that some functionaries of the Japanese Embassy at St. Petersburg have recently received the insignia of the new Japanese order. That order has numerous classes, and consists of a many-rayed white star, with a red circle in the middle, the arrangement of the colours being similar to that of the Japanese flag—a red sun on a white ground. The ribbon of the order is also red with at white edge.

Intelligence from Orenburg announces that a letter from Shjun-Kho, the Governor of Tchugutchak, dated the 10th day of the 8th moon, states that the expedition of Lieutenant-Colonel Sosnovski has set out from the Chinese provinces of Shang-sea. The Governor also announces that all along the route of the expedition the Chinese Government has placed detachments which will escort the Russians from station to station.

The Messageries Maritimes steamer *Djemnah*, with the present inward mail, arrived at Marseilles at 9 P.M. on the 23rd inst. She brings 54 passengers and a general cargo, including 846 bales of silk, 7,997 packages of tea, and 5,579 of sundries for London, which part of her cargo will be forwarded to its destination per company's steamer *Indus*, due in London on or about the 7th prox.

The P. and O. Company's steamer *Sunda*, which struck upon a sunken rock in the China Sea on the 14th September, and was subsequently beached for temporary repairs, has been safely towed to Hong Kong by the company's steamer *Columbian*.

The Naval Tribunal of Brest, before whom the crew of the *H. L.*, of Nantes, were brought on charges of piracy and murder in the China seas, has declared itself incompetent to judge the case, and has directed the prisoners to be tried by civil law.

The P. and O. Company's steamer *Malwa*, from Southampton on the 18th inst., with the outward India, China, and Australian heavy mails, arrived at Gibraltar on the 23rd inst., and left the same day for Malta and Port Said.

The Eastern and Australian Company's steamer *Bowen* left Singapore for Brisbane on the 17th inst., with London mails of October 15.

Petitions have been presented by the colonists of Natal that the Government will prohibit Chinese immigration.

THE P. AND O. COMPANY.

A letter has appeared in *The Times* from Mr. Bain, in which he reiterates the charges which he made in his Pamphlet against the Company; and the Secretary, Mr. Bethune, has sent the following reply. It is very much to be regretted that *The Times* should have allowed a letter of the kind to appear, when the slightest inquiry would have been sufficient to make it acquainted with the utterly unreliable character—to say nothing more—of its informant. It is due to our contemporary to state that it frankly apologises for the unfortunate error into which it was led:—

"Sir,—In the Money Article of *The Times* a paragraph is introduced about this company, in which it is stated that, before asking for powers to raise further capital, it is incumbent upon the directors to let the public see that nothing can be challenged in the management of the company's affairs. The directors are not aware that the management of the company's affairs has been challenged, unless by one or two discharged *employés* of the company, such as your correspondent, whose attempts to distort the policy of the directors and throw doubts on their integrity have been completely exposed more than once in the general meetings of the company, and whose *animus* in reiterating garbled statements has been strongly condemned by the proprietors assembled at such meetings. On the question of issuing debenture stock, which has given rise to the present criticism of *The Times*, I could hardly select a better illustration of *suppressio veri* on the part of your correspondent than that contained in the letter from which your information is derived. It is there stated that the company have inserted an advertisement in *The Times* of the 30th ult., to the following effect:—'That the company have applied under the Act, 1st Vic., cap. 73, to the Queen in Council to extend the company's powers under its existing charters by enabling the company to create and issue debenture stock not exceeding in amount £800,000 sterling, &c.'

"It is thus intended to imply that the directors have sought power to raise further capital, and your article thus interprets the communication addressed to you.

"But if that part of the advertisement in *The Times* which is really material for the purpose of showing the intention of the directors had been inserted in your correspondent's letter, instead of being disingenuously omitted, you would have found these words, which appear in *The Times* of the 23rd and 30th of October and 6th November:—'That such issue of Debenture Stock is to be authorised on the express condition that the amount raised thereby shall be appropriated solely and specially to the conversion or redemption of debentures of the said company of the like aggregate amount.' You will perceive, therefore, that the object of the directors is not that which is stated in your correspondent's letter, and, as a further explanation of their intentions, I enclose for your information an extract of the draft Annual Report to be presented to the shareholders at their meeting of the 7th December, which was approved yesterday by the Board, and of which, in publishing this letter, you may make any use you think necessary. In conclusion, I have only to observe that if the Editor of *The Times* considers that the interests of the public demand any further explanation than that which the accounts and reports submitted yearly and half-yearly to the proprietors secure, or that which the very full discussions at the meetings of the company elicit, and which are reported in *The Times* and other newspapers, the directors are perfectly ready to answer the challenge and to enter upon such explanations. But they naturally decline a controversy on the subject of the company's affairs with a person in the position of your correspondent, who as the proprietor of £20 nominal capital has already been more than sufficiently dealt with at the company's meetings, and who as a subordinate of the managing directors proved himself unworthy of their confidence.—I am, &c.,

"Nov. 24." "A. M. Bethune, Secretary."

In a subsequent issue *The Times* publishes the following:—

In some respects the following further letter from the Peninsular and Oriental Company is satisfactory, although it does not yet meet the points raised in Captain Bain's letter, one of which was that the separate vessels of the fleet were kept in the list at too high a valuation. We have no wish, however, to advocate his position in any way as against the company. Our only object in calling attention to it at all was rather that opportunity might be given to the Company to make good its title to be considered as sound as in its best days. Anything that should threaten materially to lessen its *prestige* or dim its prosperity would be to be deplored, and we can only hope that what may be lacking in this letter to a complete statement of the Company's position will be made up at the shareholders' meeting. The matter primarily interests them:—

"Sir,—In reverting to the affairs of this Company in your Money Article, you are good enough to say that the letter which I addressed to you yesterday contains on the point which it touches as complete a refutation as could be wished. You at the same time express your regret that my letter deals with the less significant portion of your correspondent's charge, or with matters personal between the company and himself, but that you doubt not that the other and graver charges may be as fully rebutted, although the statement shown to you privately, from which it appears that the company's fleet has been taken at 27s. per ton less value in 1874 than in 1867, does not affect the real question at issue.

"In reply to the latter observation, I may at once state that you will find upon referring to the printed slip handed to you regarding the value of the company's fleet, that you have misread the figures, and you will find that the difference in value in favour of 1874 as against 1867 there stated is not, as in your article, 27s., but £4 19s. 3d. per ton.

"The point which therefore now seems to require to be met is that the directors are alleged to have overvalued the company's fleet, with the motive, as seems implied by your correspondent's letter, of concealing a deficit and of deceiving not only the proprietors of the company, but also the Government, for the purpose of obtaining larger mail subsidies than are necessary from the public exchequer. Your correspondent alleges that this deficit amounts to £1,385,889. Upon the face of the matter common sense suggests the question, Why should the directors do anything so absurd, not to say guilty, and what has become of the £1,385,889?

"Your correspondent arrives at these figures of £1,385,889, or in one place at £1,522,821, by valuing the fleet himself, not as a going concern of great importance, but as if the company were suddenly about to stop, and the fleet be sold off; and he argues this conclusion from the opinion he says he has formed, and which he seems to think must be considered indisputable, as to the relative merits and valuation of the Royal Mail Company's and this Company's fleet.

"Now, if the cost and the various conditions of steam fleets could be tabulated in the same way as that of railways, there might be some utility in discussing this question from a comparative point of view; but it is obvious that in that case we should require to have the comparison of many fleets in an exhaustive manner, and especially of those of equal dimensions and engaged in a similar trade. These conditions certainly do not exist in the case of the Royal Mail Company and this Company, although the directors have little doubt that as the Royal Mail Company have enjoyed for several years past a far more prosperous trade and, in comparison, a far higher revenue than this company, they have been enabled proportionally to write down the value of their fleet.

"During the last eight years, namely, since the commencement of the present mail contract, the directors have called up from the proprietors the sum of £200,000. In that period they have built or purchased for the company twenty-three steamers, aggregating 67,134 tons and 10,880-horse power, and costing upwards of £2,000,000 sterling, a greater tonnage than that of the entire fleet of the Royal Mail Company. During that time the company have also spent important sums in repairing and renewing other portions of their fleet, and they have had the disadvantage of being obliged to sell at a considerable loss many steamers which a few years ago were thoroughly eligible for the company's work, but became prematurely obsolete through the opening of the Suez Canal. Notwithstanding the number of vessels sold, the net increase in the tonnage of the fleet since 1868 is 37,000 tons.

"The figures in the company's books clearly prove that this important addition to the company's fleet has been made not from new capital, except to the very limited extent of £200,000."

It is officially notified that the Board of Trade have received through the Secretary of State for Foreign Affairs a copy of a Report on the Silk Industry of Japan, from Messrs. Jaquemot, British merchants at Yokohama. The Report can be seen upon application at the Statistical and Commercial Department, Board of Trade.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, Nov. 16.

Since my last letter the traffic on our river, especially from Transatlantic ports, has been very lively, and amongst the arrivals have been several vessels that had been retarded outside the channel several weeks by the strong easterly gales which prevailed in the North Sea and channel during the latter part of last and the commencement of this month. The arrivals from East India and China are very few though, and only comprise the *Dorothea*, from Rangoon; *Papa*, from Akyab; *Goodall*, from Sourabaya; and *Gutenberg*, from Rangoon. Of departures I only have to report the before mentioned *Altona*, s.s., Captain Muller, which vessel, after staying a good while on the river, went to sea on the 8th Nov., for Singapore, &c.; the *G. H. Wappaus*, for Penang and Singapore, is announced ready for sailing; *Zylland*, for Hong Kong, has the greater part of her cargo on board, and will soon be ready; *Deutschland*, for Hong Kong, and still loading; the *Candace*, for Yokohama and Hiogo, is also reported as on the eve of leaving; and the *Terpsichore* will soon leave here with a good number of between-deck passengers for Wellington (N. Z.), for which port, as well as for the New Zealand islands, emigration is actively going on. As the greater part of the emigrants from Germany to New Zealand consist of farmers and agricultural labours, it is intelligible that the English Government finds it to its interest to encourage this emigration as much as possible, which, as is universally known, is done by England in the most generous manner. The Deutsche Dampfschiff's steamer *Bellona*, recently arrived from China, has taken the berth, and is advertised to leave here on the 15th Dec.

A strong agitation is going on concerning the affairs of the International Bank, which establishment will be well known to your readers by its affiliated institution, the International Bank of Hamburg and London (Limited). The shares of this Banking establishment are quoted on our Bourse at m.80 to 80½, and a great number of shareholders are discontented at the loss incurred by the German Brazilian Bank, and advocate winding up. The directors and a section of shareholders consider a liquidation not to be the best means for saving the shareholders' money, and, think a reconstruction of the Hamburg establishment and a maintenance of the London branch institution to be the wisest course to be taken.

You will remember that in the year 1873 the two German vessels, *Gazelle* and *Marie Louise*, on their way from Hong Kong to some port on the Philippine Islands, under charge of carrying arms to the insurgents, were captured by a Spanish gunboat, taken into Manila, condemned, and subsequently sold. The German Government protested against the capture; and it is gratifying to state that the owners of the two vessels have been recompensed for the loss of their vessels. That they have received the full value though appears somewhat doubtful, as for the *Marie Louise* only m.14,500 (equal to £700) have been paid.

To diminish the dangers on the shores of our river below Cuxhaven, there has been a fourth light-vessel stationed between light-vessel No. 3 and Cuxhaven. Vessels that might have to enter the river without being able to obtain a pilot will only have to follow the line of the light-vessels, and after passing the fourth one steer right in for the Cuxhaven light, thus going clear of the bank on the south side, which for three or four years past has been increasing, and thus endangering the navigation.

Two engineers, Messrs. Wiese and Paulmann, have constructed a new light for ship signal lanterns, which has been tried against those used in our navy. The navy light dissolved in a distance of one and a half miles while the new light; either red or green, was still visible at a distance of four and a half miles. Our nautical public are well pleased with this new invention.

The *Henriette Behn*, recently reported as bound to the Amoor River, passed Elsinore on the Nov. 7, coming from Cronstadt, her cargo, as we hear, consisting for the greater part of provisions. As she is a fast sailer it is expected that she will reach China too early for the reopening of next years navigation at her port of destination.

As to the weather, it has again been very stormy. In Russia and all Eastern Europe an unusually early winter has set in, and in the opinion of old weather prophets we here also have to anticipate a severe and early frost.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Nov. 24.

The debate about the East India Budget was brought to an end, much to the satisfaction of the Minister of the Colonial Department, and the question still is, which party has made the most concessions, the Tories or Whigs. The Education question gave rise, as usual, to much debate, and Parliament was to a certain degree metamorphosed on this occasion into a synod. Everyone advocated what they thought the best course, but we did not advance one step towards a satisfactory solution. Every *nuance* of Christianity pleaded its cause, and it is only to be regretted that no Mohammedan was present to advocate that his religion should be the one taught. Mr. Van Goltstein defended warmly the rights of the "heathens." No privileges were given to them; the work of the missionaries was not frustrated if this did not become necessary by their own behaviour; statistics proved that the number of schools had increased, and if necessary more money would be asked for their maintenance—and the result of this warm and lengthened debate was that the "Education and Public Worship" votes were approved without being altered. Of more practical interest was the debate upon "Hull Works." The Minister was at once complimented, both by Messrs. Van de Putte and Van der Hoeven (who by mistake was represented in my last as a friend to the "squeezing system," whilst he is in one of the greatest opponents) for his plans about the regulation of the "*Heere diensten*," and the first-named advised the Minister to be as liberal as possible in this respect. A warm debate took place about the question Harbour r. Breakwater, at Batavia. The Minister defended the first project, and asked a credit for this purpose of f.300,000, the costs of which *in toto* will amount to sixteen millions. His opponents were of opinion that a harbour would prove to be unhealthy as well as very costly. The Minister, however, demonstrated that we spend so many millions, which are contributed by Java, upon our own public that it is now more than time to do something on behalf of the colony. By 56 against 11 votes the Chamber agreed to the Ministerial proposal. The debate upon the construction of railways was less fruitful in results.

The vote for war expenditure brought the Atjeh question on the *tapis*. How is the health of our troops, Mr. Nierstrasz asked, and what is done to improve it? Mr. van Goltstein answered, that all was done that could be done. Several members, however, protested that so much was neglected on this head, which cost us a good deal of money, and, what is far more to be regretted, a large number of lives. The necessity was urged that at last the secret documents about this unhappy war should be published, and it was demonstrated that it was of no use any more to postpone this *ad calendas græcas*. This publication was not against the interests of the mother-country. On the contrary, Mr. Van de Putte added, since Mr. de Rochemont published his pamphlet it is necessary that the official documents should be known by every one. The Minister, however, declined to accede to the request; it was of no use, he said, to enter on a retrospective debate, which would lead to nothing better than mutual recriminations. Thereupon Mr. Nierstrasz proposed the following motion:—"The Chamber being of opinion that the documents about Atjeh must not any longer be kept secret, passes to the order of the day." That proposal will be discussed in a future sitting. At the same time, Mr Nierstrasz asked what will be our future position in Sumatra? Must we wait till peaceful proposals are made? Or shall we at once put an end to this war? These are no questions to be put in a public sitting, the Ministr answered, but being pressed to give some definite reply, he assured the Chamber that everything is being done to obtain peace. On the last day of these Budget discussions an important debate took place about the opium question. Mr. Kuyper made a most eloquent speech, in which he sketched the very miserable results of the use of this drug, and he thought it a shame that so little was done by the Government to restrict the traffic therein. "Your speech is most eloquent," Mr. van de Putte said, "and it would make a sensation in an anti-opium league. It is true that the use of opium ought to be restricted, but is this practical? Strong and prohibitory measures were of no use, and bad as the traffic is in Java, it is still worse in British India and China." These are the outlines of the principal questions which were discussed. Let me add that the Minister was very clever in the defence of his Budget, which was approved unanimously.

The Minister of the Financial Department has laid before the members of the Second Chamber some Bills to alter the tariff of Customs duties; increasing the duty on spirits, imposing a duty on tobacco, and abolishing that on meat.

The members of the First Chamber will re-assemble on the 25th inst. for the despatch of business.

According to the *Vaderland*, Dr. L'Ange Huet has been appointed editor of the *Dagblad van Ned. Indie*, in the place of his cousin, Mr. Busken Huet, who will repatriate. It is gratifying to learn that the editor *in spe* is not so excitable as his predecessor.

On our Bourse the greatest dulness prevails, and, the speculation funds excepted, scarcely any transactions of importance have taken place. Speculators have lost a good deal of money, and it is feared that we shall soon hear of some more or less important failures. There is plenty of money on offer, and the rate of discount is very low.

The refiners of beetroot sugar at Roosendaal have addressed themselves to the States General to protest against the treaty between Holland, England, Belgium, and France about the sugar duties. A protest of the same tenor has been forwarded to the Second Chamber by the principal refiners of colonial sugar. Their opinion is that this treaty will seriously injure the interests of this trade.

On the 27th inst. a detachment of 150 soldiers will be shipped on board the steamer *Koning der Nederlanden*, to reinforce our East India army.

The whole month of November has been very stormy and rainy. Some districts have been inundated, but the damage done is not of much importance.

I am happy to state that her Majesty the Queen has quite recovered from her recent illness. Prince Alexander starts to-morrow for Algiers.

PRODUCE MARKETS.

No transactions of importance have taken place in our market for Colonial Produce. The only demand is for direct wants. In most instances, prices, however, are well maintained.

COFFEE.—In waiting for the result of the Trading Company's auction, which will take place to-morrow, a lull has prevailed, and it has been rather difficult to sell private lots. The brokers' valuation of the Coffee which will be brought under the hammer is based on 57c. to 57½c. for good ord.

TEA.—Without business. The market is firm, and prices are maintained.

RAW SUGAR.—Though prices are very low there is no spirit amongst buyers. Some lots of fine quality have been sold at f.¼ to f.¾ under October value. For inferior quality only f.2 to f.2½ can be obtained under October value. About 10,000 mats have changed hands.

RICE quiet. A lot of 6,239 bags table, ex Java, has changed hands at prices that did not transpire.

SPICES very firm. 154 chests Nutmegs and 21 chests Mace were sold at very satisfactory prices. 265 bags Pepper, ex Koning der Nederlanden, have been sold.

JAVA TOBACCO.—Important parcels of sundry marks have been sold, and high prices were paid for quality suitable for cigar covers. In public auction and by private tender 9,500 bales were taken from the market. Inferior quality was more difficult to sell. The stock includes 25,109 bales Java, 293 bales Sumatra, and 7,290 mts. cutten Java.

COTTON.—Large parcels are offered, but buyers decline to operate.

JAVA INDIGO very dull, and the transactions are limited.

LONDON: MONDAY, NOV. 29, 1875.

OUR POLICY IN THE MALAYAN STATES.

THAT the recent outbreak in Perak will very shortly be quelled, and with much less expense and trouble than was at first feared, the latest advices place almost beyond a doubt; it will, however, be time enough to comment on the immediate circumstances of the insurrection when the precise details have come compltely to hand. In the meanwhile, seeing that the entire question of our relations with the semi-independent Malay States must needs be reconsidered, the moment is an opportune one for tracing the ulterior causes which culminated in the murder of Mr. BIRCH. The simple fact appears to be that the Straits Government began lately to discover that the "Residential" system introduced into the native State, under Sir ANDREW CLARKE'S Treaties in 1874, though framed in the most conciliatory spirit, and the outcome of a real effort to present to each province its own autonomy while protecting British interests, and providing against a recurrence of bloodshed and violence, answers very well so long as the advice of the Resident is followed, but breaks down when his counsels are unheeded, and when engagements solemnly entered into are openly set aside. The British representative in such an event has no real power behind him wherewith to enforce agreements; he is a *vox et præterea nihil*, as the obstructives who oppose him very soon find out. Never regarded from the first as anything else but an interloper, he is kept at bay with excuses and procrastination, and his position becomes quickly an untenable one, because where it is his duty to see certain steps taken he has not the power to carry that duty out.

This being in brief the true state of affairs—at any rate in the disorderly province of Perak—Sir WILLIAM JERVOIS, by a proclamation of the 15th of October, published in our last issue—made a somewhat bold change of front. The engagement negotiated by Sir ANDREW CLARKE in January, 1874, has in every respect been fulfilled—so runs the proclamation—by the British Government; but as the Chiefs of Perak have not fulfilled, and are unable to fulfil, the engagement on their part, and have no power to administer their Government or maintain peace; for these and various other reasons set out at length, Her Britannic MAJESTY'S Government—at the request of the Sultan and other Chiefs of Perak—have determined to administer the Government of Perak in the name of the Sultan by Commissioners and Assistant Commissioners, with the further aid of a Malay Council composed of Rajahs of Perak of the highest rank. To this new arrangement, so far as we can ascertain, Sultan ABDULLAH had readily assented, and accordingly the proclamation expressly mentions that what was done was done by the Sultan's desire. ABDULLAH himself, indeed, seems to have been the first to take action. He issued an address to his people a few days before Sir WILLIAM JERVOIS announced his own change of policy; and though we have no copy of the native document yet to hand, we presume that it harmonised, or was intended to harmonise, with the many alterations, and formed in fact the first part in the new programme. It was over one or other of these two proclamations—probably the native one—that the quarrel arose, which ended fatally for Mr. BIRCH. There is really no need to attribute bad faith to "Sultan" ISMAIL, the former claimant to the throne; unwillingly and through dread of superior force, he had been induced to become a party to the original compact devised by Sir ANDREW CLARKE, and now he discovers that the arrangement then made is not to be adhered to, but that instead the country is to be handed over completely to British management. This probably is the way in which Sultan ISMAIL looks at the case, and, under feelings of this sort, one of his too-zealous adherents—either with or without instigation—tore down the hateful Proclamation. We think that Governor JERVOIS has shown the most ample reasons for the course which he adopted; but had he possessed a larger experience of the turbulent, excitable temper of the Malays when they deem themselves affronted, it is probable that before definitely announcing to the people of Perak this fundamental change in the mode of Government he would have sent a gunboat up the Perak river and placed the Resident and the Residency there well beyond the risk of injury. This seems to us to have been the one thing left undone which ought to have been done, and it is a pity that some of the executive officers of the Straits Government did not point out to Sir WILLIAM JERVOIS the necessity—of which they must have been very well aware—of making all things secure. It may not now be nearly so easy to obtain the sanction of the Colonial-office—who, after all, must take the uninstructed opinion of the public at home into account—to measures highly desirable in themselves, and which, but for this unlucky outbreak, would have been certainly approved.

For ourselves we have no kind of doubt that Perak and Laroot must either be made integral parts of the British dominions, or else Sir WILLIAM JERVOIS'S gilded-pill system of governing those Provinces by English Commissioners in the Sultan's name, and with the formal aid of a Malay Council, will have to be firmly and effectively carried out. The view taken by civilised nations is, of course, that a country ought not to be annexed, or an administration formed within it, without consulting the wishes of the people who dwell there. We cannot exactly take a popular vote on such a question in the East, but when we have assured ourselves, as in this case, that the only objects for which we interfere are to prevent anarchy, confusion, misery, and crime, and at the same time to protect our own subjects and their property, which every State is bound to do, it is a further satisfaction to reflect that while the Chinese who inhabit Perak and Laroot will beyond a doubt, and to a man, welcome the establishment of our Government there; the Sultan and some, at least, of his chieftains have positively requested us to take charge of the country. Lastly, as to the Malay community, if they are not better off under us than under their own rulers, we may as well admit at once that there is no difference between civilised men and savages. The present Sultan of PERAK, and his son Rajah MUDA YUSUF, the heir to the Crown, desire nothing so much as that the British Government should take possession of Perak altogether. This we have the best reason to know; as for ABDULLAH, he cares not a fig for doing the business of Sultan; all he cares about is to draw enough money to maintain a numerous retinue, buy expensive clothes, and gratify other more discreditable tastes. The State, however, which he is supposed to administer is very rich, though almost entirely undeveloped, and when order is restored, and the time-honoured system of "squeezing"—the greatest clog that was ever put upon industrial enterprise—has been gradually eliminated, an exceedingly important trade may be expected to spring up, no less to the benefit of the inhabitants than of the world outside. Some of our readers may be inclined to ask what are the real differences between governing a country in the name of its rulers with the aid of a native Council, and annexing it altogether. There are several important distinctions which might be pointed out, but we think it best to reserve them for discussion in a subsequent number.

IT is stated that the Occidental and Oriental Steam Company have chartered the *Stadt Haarlem* and *Stadt Amsterdam*, of 1,800 tons and 450-horse power (built last year for a line to America from Amsterdam), to run on the Panama and San Francisco line in connection with their China and Japan line. They are to load out from Liverpool to Japan, and will probably leave on the 16th December.

THE FRENCH IN COCHIN-CHINA.

CONTINUING the remarks which we recently made with reference to the position of the French in Cochin-China, we now give some details of the route which is available for navigation through Cochin-China into Yunnan. The Kwan-Kwan is the name of the branch river from the Sankai, which communicates with Han Hoi, the capital of Annam, about 200 miles from its mouth; and from Han Hoi to the capital of Yunnan is about another 212 miles, the whole distance of the branch river to be navigated being thus about 412 miles, or one half the distance from Shanghai to Hankow. From June to the end of December the Sankai, from the entrance to the Kwan-Kwan, is navigable for vessels drawing ten feet for 250 miles, and from January to the end of May it is two feet less. Vessels drawing five feet can go the whole distance into Yunnan; so that it is evident that, if the matter be taken seriously in hand, there is nothing to prevent a regular trade route being established in this direction. The chief products of the country are Oil, Silk, and abundance of Rice. From Yunnan there are large exports of Copper, Tin, and Lead, and if a regular route were opened there is no question but that many more articles would be both exported and imported. Both the people and the officials have shown themselves civil to those who have visited them, and there is no question that they would be glad to see foreigners settle in the district for trade. The consumption of Camlets, Lastings, Long Ells, as well as of Grey Shirtings, is described as being large, notwithstanding the high prices which have to be paid for them, owing to the whole having to be sent from Canton. It is thus clear that the French have already done much towards accomplishing what at present we are only feeling our way to do; and it is a question of very great political importance what trade route is first opened with Yunnan and Szechuen, as it is evident that the time is not far distant when these Provinces will have to be brought into direct commercial communication with the outside world. It was notified in the Hong Kong Government *Gazette* of the 4th September last that information had been received from the Acting Consul for France that the ports of Hanoi and Haephong, in Tongkin, would be opened for trade on the 15th of the same month, and this fact has now been officially communicated by the Foreign-office here to the Board of Trade; so that doubtless the attention of our authorities is to some extent directed to this matter.

It will be recollected that the delegates from the Shanghai Chamber of Commerce, who went up the Upper Yangtsze in 1871, reported that river navigable as far as Ichang, and it seems that but for a small part, where there are rapids, communication could be established the whole way to Chung-King, the capital of Szechuen, by this route. In order, however, to do so, it would be necessary to construct a short railway for part of the route; and this set of circumstances would possibly be favourable for inducing the Chinese to make a beginning with railways, as there is no question they would prefer the trade route to be established *vid* the Yangtsze, and to be so in connection with the treaty ports of China than *vid* the Kwan-Kwan, and so in contact with Cochin China and French, rule which they fear may spread itself into China. There can be very little doubt that, if the Chinese clearly see that it is only a question—as in point of fact it is—whether trade communication with Yunnan be established through their own country or through the neighbouring French colony they will, for obvious political reasons, be willing to grant their aid towards furthering the former scheme. It is, therefore, very desirable that the facts connected with the French route be brought to the notice of our authorities, as they will place a very important weapon in their hands in demanding future concessions for trade towards the South-West of China; and for this reason, although some portion of the facts already detailed above are already known, we have thought it well to call attention to them at the present time. So far as foreign trade is concerned, no doubt the opening of the French route would be an advantage; but it would be less so probably than the extension of trading facilities in China itself; and as the whole subject will have to be taken into consideration in connection with the question which has arisen in consequence of the murder of Mr. MARGARY, it would be well, if the opportunity were seized, to obtain further Treaty Ports up the Yangtsze—a plan to which it is stated, on good authority, the more enlightened Chinese officials are not averse.

THE HONG KONG PRAYA.

THE Praya is the White Elephant of the Colony of Hong Kong. It is so, however, only to the extent of its necessitating expenditure, not in any way from its uselessness, or from its being an object of superfluity or luxury, as nothing can be more absolutely necessary to a Colony so situated, and subjected to such natural influences, as affect Hong Kong. But every time a typhoon visits the place an enormous vote of public money is required in order to repair the injury which is done to the Praya; and so much money has been lost in this manner that at present the question is being seriously considered whether it will not be possible to make such permanent repairs as will in the end save the Colony a great deal of useless expenditure and constantly-recurring inconvenience. Most certainly, if this is possible, it is in every way desirable that a plan of the kind should be carried out, and we shall look with much interest upon the results of the measures which have been taken with that object. It was some time back discussed whether it would not be possible to reclaim the land to the westward of the P. and O. Wharf, over which, whenever a typhoon takes place, the waves rush into the buildings alongside; but it appears that the expense of such an undertaking would be far greater than the owners of the property which would be benefited by it would be disposed to subsidise to such an extent as would justify the Government in entering upon it. It is also to be borne in mind, in connection with this part of the subject, that it is a question whether the reclamation of the land in front of the shops would not be an injury to property by throwing the houses further back from the sea.

The portion of the Praya which requires most looking to is that between the Central Fire Brigade Station and Government Wharf. It is opposite the most valuable part of the Colony, and at a part where no reclamations are likely to be necessary; but it is at this spot where the effects of typhoons are most severely felt; and there is no doubt that in the repairs about to be made this should be the *pièce de resistance*, and a structure should be made of a permanent character. It has been proposed, we are informed, to make use of the present opportunity to widen the Praya at this part by ten feet. The improvement would be a valuable one. We understand that the additional cost would not be more than some $12,000, and certainly the advantages which would be gained would be well worth the money. In order to make the work effective, a sea-wall at this part of the Praya, which would cost some $100,000, would be needed. The amount is large, but it would be useless to do the work in a manner which would only necessitate the whole thing being done over again when the next typhoon occurs. With respect to the Praya Eastward, a scheme has for some time past been mooted for the erection of a Praya in front of the Naval Yard and certain military buildings, and some technical difficulties in respect to Departmental jurisdiction over the land had to be referred home; but we understand that Governor KENNEDY, who devoted much time to this and other Colonial matters while in England, had to return without any decision on the point.

The total funds which would be required for the scheme indicated above would be about $200,000 to $220,000; and we believe it will be proposed to raise this money by a loan from the Special Fund, repayable by moderate annual instalments. This would certainly seem a perfectly reasonable plan, and we trust that in some form it may be adopted. The Special Fund has long been lying idle and useless, and the present scheme would be one in regard to which it might be properly utilised, as the natives in the Colony would be even more benefited than the foreign residents by the proper repairs of the Praya. It is clear, however, whatever scheme may ultimately be decided upon, that the time has come when the chief object in view should be the thorough completion of the Praya, so as to prevent the necessity of any expensive works after-

Digitized by Google

wards; and whatever steps may have to be taken to meet immediate requirements, this object ought to be most carefully kept in view; and, if it cannot be attained at once, be worked up to by each instalment of the work that may from time to time be accomplished. The same policy ought also to be applied to the Water-Work question, upon which we hope shortly to obtain some further information. We understand that a scheme has been proposed which would meet the requirements of the Colony completely for something like $150,000; and if a thorough and satisfactory supply of water can be obtained at this price, it would be very desirable that the work should be proceeded with, and there could be no great objection to raising the necessary money from the Special Fund, in a similar way to that suggested for the Praya scheme.

THE Chinese Steam Navigation Company have contracted with Messrs. INGLIS, on Clyde, to build two paddle-wheel steamers intended for the Yangstze trade. Messrs. SCOTT and Co., Greenock, are building two boats for the river service of Holt's line. Many of the yards on the Clyde have discharged all men for the winter season.

THE charter of the steamers *Vasco de Gama* and *Vancouver* to the Pacific Mail Company will shortly expire, and the China Trans-Pacific Company have announced their intention to run these boats, with others building, on the San Francisco, China, and Japan line, for which the company was formed.

WE understand that instructions have been sent to Governor JERVOIS to confine the military operations to Perak, and abstain from acts calculated to lead to annexation of any of the native States. Efficient protection is to be given to all the residents.

CONSULAR REPORTS ON JAPAN.

In our last issue we noticed briefly the Consular Reports for Japan for the year 1874, and now return to the subject. The reports contain some interesting facts; the remarks of H.E. Sir Harry Parkes, summarising the whole of the Consular statements, being of special importance. Speaking of the difference in the value between the Imports and the Exports, Sir Harry Parkes says:—

In judging from the above-mentioned tables, the balance of trade in 1874 seems to be against Japan; that is to say, she appears to have imported foreign goods and raw produce to the value of $21,000,000, or, probably, in consequence of the double entries above named, it would be more correct to say $23,000,000, and to have exported her own produce to the extent of only $20,000,000. These results, however, depend so greatly upon the manner in which valuations are calculated, that it is impossible to assert with accuracy how far the value of the imports exceed that of the exports. For the balance of the account we naturally turn to the Return of Treasure, and there are met with the extraordinary statement, prepared by the Custom-house, that treasure to the amount of $15,278,256 was exported, and only $1,018,589 imported, thus exhibiting an apparent loss to the country of $14,259,667. On examining the Custom-house Returns it appears that of this amount $13,332,792 consisted of Japanese gold and silver coin, which wss exported as bullion to be melted down. Allowing that $3,332,792 went to meet the probable balance of trade above alluded to, and that $2,000,000 more are absorbed in paying the interest on, and in the redemption of, foreign loans, the question then arises, what has become of the remaining $8,000,000 which appear against Japan? Why has this sum left the country, and what has been received in exchange for it? It has not gone to meet the cost of constructing expensive public works, as in 1874 no new works of importance have been undertaken. It does not seem to have been applied in payment of Government orders sent to Europe and America, as the imports on Government account appear in the returns of imports given above, and swell those returns to the amount of $1,809,115. It adds to the mystery to be told that the same drain of native coin continues in the present year (1875). It is natural enough that a depreciated or an inconvertible paper currency should drive the metallic currency out of the country, but the discount on Japanese paper is by no means large (at the present date paper and coin are almost at par), and in sending away their new and admirable gold and silver coins only to be melted down one naturally inquires why this is done, and what do the Japanese gain by the transaction? Replies may doubtless be found to these questions, but they do not appear upon the surface.

Sir Harry Parkes speaks in marked terms upon the necessity of improving the means of intercommunication in Japan. He states that the Government have lately endeavoured to make this subject popular by calling upon the newly-created Assemblies, both local and central, to give it their consideration. In the present state of the roads, Sir Harry observes, it is only the productions that are grown on or near to the outer fringe of the country that can hope to reach the ports at prices that will pay for export. A man may grow rice, tea, tobacco, hemp, &c., on the rich land of the interior, where agricultural labour is cheap, at a slight cost, but by the time he has conveyed such bulky produce to a market on the backs of ponies or bullocks, which form the only means of transport, the price often becomes too high to enable him to compete successfully with the same produce of other countries. Fortunately, however, for the tea trade, which has now exceeded the value of that in silk, much of the leaf is produced near the coast. Mr. Gubbins, in charge of the Niigata Consulate, observes that the trade of that port in native produce and articles of native production is mostly carried on, as heretofore, in Japanese junks, and that no trade, so far as he is informed, in foreign goods is conducted by means of Japanese shipping, but is principally carried on by road communication with Yedo. He adds that it is doubtless to facilitate this, as well as communication in general, that the Mikani route is being repaired.

Consul Ensden, of Hakodate, reports that imports have slightly increased, but exports have fallen off very nearly half from what they were in 1873, which again was less than what they were the year before, which is not to be wondered at, the natives exporting largely in their own steamers direct, four and five of which visit this port regularly once a month.

In the course of his report upon the trade of Yokohama Mr. Russell Robertson gives the following interesting description of the mode in which designs in lacquer are worked:—

The first thing is to trace out on the thinnest of paper the required pattern or design, and the tracing is then gone over with a composition of lacquer varnish and vermilion, afterwards laid on whatever it is proposed to impart the design to, such as the facing of a cabinet, or other piece of work, and well rubbed over with a bamboo spatula. On the removal of the paper the material below will be seen to have received the outline. This is now gone over with a particular kind of soft lacquer varnish. When this industry is pursued in hot weather the varnish speedily dries, and consequently, where the pattern is a good deal involved, such as one representing bunches of flowers or flocks of birds, a small portion only of the pattern is executed at one time, and the gold powder which enters largely into most of the lacquer ware for the foreign market is applied to each part as it is being executed. For this a large and very soft brush is used, and by its aid the gold powder is well rubbed in with the lacquer or varnish. The work is then left to dry for the space of about twenty-four hours, after which the pattern is lightly rubbed over with charcoal made from a particular wood, this process securing evenness of surface. The work is then rubbed with polishing powder, and afterwards carefully wiped. The above description simply applies to the mere outlining on any given surface or groundwork of figures of men, women, birds, flowers, &c. There still remains a good deal of finishing work, such as the tracing of leaves on trees, the petals of flowers, the wings of birds, &c., and so on, according to the particular subject in hand. Into all these gold powder largely enters, the working in of which requires a light brush and skilful hand, so as to insure an even mixture of the powder and varnish. After this has well drid, a particular kind of lacquer varnish known as "yoshinô urushi," is well rubbed in, and the whole then polished with horn dust. The polishing process is done with the finger, and is continued until the gold glitter shows out well. A beautiful polish is said to be thus obtained. Briefly, then, the designing on lacquer ware is done thus: Supposing the subject to be a flower, it is traced out on the paper and imparted to the groundwork of wood. Gold powder is then sprinkled over the work from out of a bamboo tube, well rubbed in with a brush, and then allowed to dry, afterwards polished and a coating of varnish applied. This is repeated several times, until the work assumes a rust colour. The veins or tracery of the leaves are now marked out with lacquer varnish. Before this dries gold powder is again sprinkled over, and then well rubbed in with a brush. When the surface has dried, it is dubbed over with a piece of charcoal, so as to tone down any irregularities. After this it is polished, when the flower will appear in due form.

Mr. Annesley, Acting Consul at Hiogo and Osaka, notes an increase of two and a half million dollars in the exports, which, he says, is almost entirely to be attributed to the large quantity of tea which left the port. The trade on the whole for the year 1874 was peculiarly unsatisfactory. Shipments to Europe and other countries generally met with serious losses, and none more so than the considerable speculations made in rice, which turned out very disastrous to the exporters of this grain. In no former period were stocks so heavy, especially of woollens. The import trade has been highly unprofitable, but the worst was hoped to be past, as manufacturers and shippers at home had correctly guaged the consumptive capacities of this country, and were

With reference to the mines in the neighbourhood, Mr Annesley reports as follows:—

Coal of good quality, as well as gold, silver, and copper, and other minerals, is known to exist in this neighbourhood. The mines in this district number, according to a return furnished me by the Local Government, fifty-nine mines. Out of this number only six mines are worked, and, with the exception of two coal mines, which are at present not worked, their yield is gold, silver, and copper. At Ikouno, in this neighbourhood, a gold and copper mine is worked by foreigners (Frenchmen) on account of the Japanese Government, and the value of this yield, I am informed, amounts from $20,000 to $25,000 per month. As soon as the European machinery is in working order, the yield of that mine will be considerably larger. It is to be regretted that, as the Japanese Government will not permit the employment of foreign capital, these sources of wealth remain at present undeveloped.

MR. MARGARY'S NOTES.

By the last mail, we observe that the Hong Kong and Shanghai papers notice at length some interesting and valuable notes by the late Mr. Margary, giving particulars of the journey which terminated so sadly for himself. In compliance with his instructions, he kept a journal, and the portion of it which records his experiences as far as Ta-li Fu has happily been saved. There are various gaps in it, to be explained probably by the fact that he suffered from time to time seriously in health. The remainder was too probably with him when he was murdered. Believing that, their interest on other grounds apart, Mr. Margary's notes would be regarded as an acceptable souvenir by the many who knew his merits and lament his cruel fate, Her Majesty's Minister sanctioned their publication, and they have consequently appeared in the pamphlet under notice; but it is to be regretted that the publishers seem to have overlooked the field at home, as no copy was sent to us, nor, so far as we can learn, to any other home paper. We have, however, received one from a private source, and are glad to be able to place a few extracts from it before our readers. It is to be hoped that a future volume may be published, embodying the letters written by Mr. Margary from Bhamo, which have appeared here, and thus forming a much more perfect record of his journey. As our readers are aware, Mr. Margary started from Hankow on the 4th September, having decided upon following the advice of the Viceroy, to follow the Yunnan and Kweichow route, as that generally taken by officials. He explains that on September 5 he was overtaken by a messenger from Hankow, with a telegram from Calcutta, telling Mr. Medhurst that the interpreter had better join the exploring party at Rangoon by sea, but that in the absence of further instructions he determined to push leisurely to a place called Loshan, and await further messages; but, not receiving them, he proceeded, as our readers are aware, on his journey. The description of the country is given in a graphic and vivid manner. The following passage conveys a good idea of his intercourse with the officials, and shows how little their ceremonious politeness can be relied upon:—

November 9th.—Travelled 62 li to Ching-ch'i Hsien, and called on the Magistrate, who proved to be a somewhat jovial old man of sixty-two. He had a very pleasant face, a very husky voice, and a chronic laugh tacked on to his words. I had the pleasure of receiving him later, after dinner, when he showed a liking for sherry, and tried to smoke a long pipe of tobacco after trying both cigar and cigarette. The road was very wet and slippery after a shower, and it was by no means easy to have faith in the invariable sure-footedness of one's pony in the rough places and frequent inclines. In fact, mine did fall, without hurting his rider, however, which is fortunately the usual case with these small animals. The country was rather more colonised and cultivated than on the east side of the capital, but still vast tracts of level arable land, bearing distinct signs of former tillage, were completely deserted and covered with long grass. The villages on the main road are of a most miserable description, composed of huts built of the thick straw of the sorghum and plastered with mud or piled up with the stones and debris of former prosperity. They were far apart, and contained a very few inhabitants, who were mostly immigrants from Ssŭ-ch'uan. In these villages, as on the previous route to the capital, food was spread on small tables at every door to attract passing coolies. But it was of a very inferior kind to that which was displayed to view on the eastern side of the capital. I could not find a decent room wherein to breakfast, and sat in the open air under the wondering gaze of the whole population. But everywhere the people were amenable and well behaved. It has been my habit to get out my writing materials whilst waiting for food, and the process always creates extreme astonishment. About midway on this day's route we crossed a very remarkable avenue of hills, extending in a straight line north and south for several miles, with a perfectly flat and narrow strip of fertile land between. Further on the general direction of the valleys was east and west. Wild flowers filled the road sides, and the tea-plant, in full blossom like a single camelia, grew wild all about the hedge rows, developed, untended, into a strong shrub eight or ten feet high.

November 10th.—On leaving Chin-ch'i Hsien, next morning rather earlier than usual on account of the longer stage of 80 li or 26 miles lying before us, the chief military officer, who was only of the rank of a *Ch'ien-tsung*, or say a lieutenant, not only had the civility to send a couple of soldiers to escort me, but gave me the usual salute of three detonating crackers as I passed the city gates; but more than this, he paid me all the honours of a *Ta-jên*, or superior mandarin, by awaiting my arrival in full dress on the road, some two li beyond the gates. The ceremony took me by surprise, more especially as I was first made aware of his purpose by his card-bearer shouting out in loud tones, (as he dropped on one knee in the road and held up his master's official card,) that the *Ch'ien-tsung* had come out to pay his respects to his Excellency Mr. Ma. I dismounted, and thanked the officer for his civility, but the brave soldier appeared to be so frightened by my condescension, that I remounted and passed on without more words.

The subjoined affords an interesting illustration of the Chinese at home at a place called Hŭa-King:—

November 15th.—Mê-k'ou, our resting place last night, was only a village, and to-day's stage of 35 li has brought us to another village named, H'ua-King. These places have not yet recovered their former size and importance on the main road. A river flows past Mê-k'ou beside a dark pebble strand where the people of the place pick up bits of sandstone prettily streaked with quartz (for the latter has reappeared in this region), which they cut and polish to sell to travellers. I gave 50 cash, or about 2d., for a piece which would have cost a shilling at Brighton, and incurred the moral censure of one of my chairbearers, who could not get over such a show of extravagance for a long way, as I gathered from his remarks to the other men. This will serve to show how poor the Chinese are, and how far a few copper cash will go with them. A respectable gentleman only pays 100 cash for board and lodging per night at an inn; that is, about 4d. I bought half a sheep at Ching-ch'i Hsien for a tael and a half, or nine shillings, which was at the rate of 3½d. per pound. It is sufficient to cumshaw an official messenger who has walked twenty miles in the rain for you with the handsome sum of four-pence, which will make him *K'o-t'ou* with joy; a Chinaman would give him two pence. Coolies and bearers can eat and drink their fill for 3d. Many a gentleman is well off with Tls. 25 a year. Imagine an income of £8 6s. 0d. sufficing. My literatus will wrangle for two cash with the poor roadside purveyors. He will also go for any given time without a bath, sleep in the same room with filthy coolies, smoke their dirty pipes, and do an infinity of other unnecessary acts of condescension, which mark China as the true home of Democracy, and the place where Fraternity and Equality have taken root with advantage to the lower orders, but at the expense of a good deal to the more respectable classes. Yet, in ceremonious etiquette, this dirty pauper will claim equality with any one, and seem the polished gentleman.

Mr. Margary describes the capital of Kwei-chow as being very imposing, resting on an uneven plain well supplied with trees and completely surrounded with high hills; and he gives some lively descriptions of country scenes in Hunan and the above-named province. He states that the country people in them have a curious habit of hanging straw on trees instead of stacking it on the ground. A large number of other interesting facts, interspersed with shrewd and amusing comment, are recorded, and it cannot but be a subject of deep regret that one who would evidently have been the means of greatly enlightening us upon parts of China but little known has met with so sad and unexpected a fate.

THE YUNNAN MISSION.

(To the Editor of the *London and China Telegraph.*)

SIR,—We are informed by a telegram from Shanghai, dated the 11th inst., that the Commission appointed to inquire into the Yunnan outrage left Hankow for this purpose on the 5th inst.; but, Sir, if it be true that a Chinese official of high rank has preceded the Commission appointed by the British Minister by some six or seven weeks, and that he has gone to Manwyn *viâ* "The Big Lake" for similar purposes, and will most probably be there a long time ahead of the Legation Commission, what good result do you expect to see effected by the latter? My opinion is, that they will find everything "cut and dried" to baffle their efforts; Lee-see-tai or "Lee-Lo-Yah" will, I expect, be at least 100 miles out of the way; and a few well stupefied jail birds will be brought out, as men who were mixed up in the affair, and punished according to Chinese Law; which is, a life for a life. This is all the Chinese will feel themselves bound to do, and all that they will do, in my opinion; it is well known that a condemned criminal in China can go (if he or his relatives have the money) into a jail and buy a substitute to satisfy what is termed the law, a life for a life; and this without much difficulty; a Chinaman who has been in a China jail any length of time does not care much for his life, and will often sell it, and take the place of the condemned criminal for a very small sum of money, to go to the benefit of his father or mother, or his family; all that he wants to be satisfied of, is, that the purchase money is really going to the benefit of his people. This is called filial duty. When our Minister first found that the Tsung-li-Yamen began to procrastinate, he should have at once said, "Well, my duty to my country is plain. I shall write advising an armed force to be sent from India to Manwyn, and have the perpetrators of this outrage punished on the spot where it took place, at your expense, as my superiors hold *you* and the inhabitants of the town of Manwyn responsible for what has occurred." From my knowledge of Chinese, I think this is the only mode of redressing wrongs that a Chinaman can be brought to understand; at any rate, it would, I think, be more practical than the present mode, and one more in accordance with their own ideas, than what we are doing. We have not settled matters permanently yet. We have only patched things up again is the opinion of—Yours truly, OLD CHINA.

London, Nov. 19, 1875.

THE YUNNAN MISSION.

(THE TIMES.)

Our Shanghai correspondent gives an interesting account of the difficulties which Sir Thomas Wade had to overcome in his recent negotiations with the Chinese Government. The letter, it is true, was written a fortnight earlier than the date of the message in which the Foreign-office announced that he had been so far successful; but our correspondent's letter may serve as a useful warning that the way of peace is not yet absolutely smooth. The Chinese Ministers certainly made important concessions. Our Ministers will be allowed to communicate directly with all the Departments of the State. The *Peking Gazette* has published more than one memorial on the subject of the murder of Mr. Margary. It has also called the attention of the Provincial Governors to the fact that foreigners, when provided with proper passports, have a right to travel through the Empire. The Government has further undertaken to send a Mission to England with a letter of apology for

Digitized by Google

the murder of our countryman. But the most important concession is, of course, the authority given to Mr. Grosvenor and Mr. Baber to go to Yunnan and be present at the inquiry into the murder of Mr. Margary. We shall thus learn from competent official witnesses whether the Chinese Government really strives to bring the criminals to justice. But the task is beset by difficulties which scarcely enter into the calculations of Western jurisprudence, and some of them were brought to light in a very startling way by the investigation which followed the atrocious massacre at Tientsin. The French authorities insisted that stern punishment should be dealt out to the persons who had murdered their countrymen and countrywomen, and the Chinese Government promised to give ample satisfaction after, of course, it had fenced a while. But the result was not satisfactory. It was strongly suspected that the local Governor, if he had not absolutely encouraged the mob to murder the people belonging to the French Mission, had at least purposely held back until the deed had been done. But he was allowed to go free. The Government did bring to execution a number of poor and ignorant wretches; but it was strongly suspected that they were not the real culprits, or that they had at most played a very subordinate part in the massacre. Nay, it was confidently stated that they were innocent, and that the Government had bought them for a small sum a head. As it was necessary to kill some Chinamen to satisfy France, a few common creatures, it was said, were induced to let themselves be put out of existence for a bribe. Such a statement would be absolutely incredible if it were not made on high and various authority, and if we did not know the trivial value which many Chinamen put on their lives. At all events, the foreign residents firmly believed that the criminals had been bribed to go to the scaffold, that compensation had been made to their families, and that, knowing the real state of the case, the people of the town looked on them as martyrs. Such a story is enough to derange all our Western ideas of judicial proceedings. We feel that they may be as much out of place in China as if that Empire were another planet. There can be no doubt that some persons will be punished in Yunnan; but we shall get small satisfaction if the real criminals be allowed to escape because they are high in rank, and if the Government should sacrifice a few wretched creatures whom it can seize or buy. Our Shanghai Correspondent shows that such a result is far from being improbable by giving a conversation between a high official of Shanghai and a foreigner. The mandarin seems to have begun by assuming that the real culprit was Leeseetahi, and he at once put aside the assumption that the Government dared to cut off the head of that adventurous leader. "He is a Mahomedan, and can raise 50,000 to resist us." Nor could the Governor of Yunnan be sent to the scaffold, for if he were threatened he could again light the flame of the Panthay rebellion. The mandarin seems to have thought that the Government dared not punish any but obscure people, and perhaps he rightly conjectured that such a result would be a sorry ending of all our diplomatic negotiations. Some confirmation is given to this theory by the curious memorials which, as our correspondent states, have passed between the Chinese Foreign-office and the Regency which governs the Empire. After referring to the murder of Mr. Margary, the author of the memorials states that on the 19th of June Li-Hung-Chang was ordered to proceed to Yunnan to find out the particulars of the crime, and that the Governor of the Province had likewise been commanded to bring the culprits to justice. Both dignitaries have disobeyed these orders. The Chinese Foreign-office complains that the Provincial Governor has allowed months to pass without having made such an inquiry as would bring the facts of the outrage to the knowledge of the Government, and that Li-Hung-Chang did not announce his intention to proceed to Yunnan until the 18th of last month. Hence the authors of the memorial propose that both Li-Hung-Chang and the Governor should be censured for their neglect of duty. Accordingly, "their Majesties the Empresses" and "his Majesty the Emperor" decree that both dignitaries shall be rebuked, and that if they fail to do their duty at once the consequences will be very serious. Such a correspondence cannot be taken quite seriously, and we must assume that it was intended for the ear of the foreign Legations, to whom it was sent. It amounted to a plea for patience on the ground that the Government was virtuous, but weak. "We have tried to bring the murderers of Mr. Margary to justice," it virtually says, "but we have failed, because Li-Hung-Chang and the Governor of Yunnan have refused to bestir themselves, and they are personages whom we dare not offend. However, we have at last warned them that the consequences of further disobedience will be serious to themselves. But Sir Thomas Wade must well know that, if the Chinese Government had been determined to punish the murderers, neither Li-Hung-Chang nor Ts'en Yu-yeng could have disdained to pay any attention to its orders. The truth is that both dignitaries believed the Imperial Government to be playing the usual game of Chinese duplicity. They fancied, no doubt, that if they would only do nothing the storm of remonstrance would soon blow over. Their refusal to act was, no doubt, the result in large measure of the intense dislike with which the official and literary class regard all Western peoples. We do them no wrong in assuming that they were secretly glad of the fate which overtook Mr. Margary in his attempt to open up Western China to European trade. But it is at least probable that they were also actuated by motives of a more personal force. Li-Hung-Chang, who is the most important official in the whole Empire, is supposed to have been anything but anxious for the success of Mr. Margary's mission, and the Governor of Yunnan may naturally be made uneasy by the prospect of an inquiry into a crime which, without being uncharitable, we may presume that he did not try to prevent or to punish. It may also be true, no doubt, that the Government would not lightly incur the opposition of such officials. Although it is in appearance the most absolute Power in the world, it is nevertheless held in check by the opinion and the unseen pressure of the Mandarin class. It is naturally, also, afraid to stir up opposition in a province which, like Yunnan, was recently the seat of a great rebellion. All these facts may have made the Chinese Government unwilling to take such vigorous means as we deemed necessary for the punishment of the murderers; but it is out of the question to suppose that, months ago, it could not have shown Li-Hung-Chang and the Governor of Yunnan that it was in earnest. At last an attempt will really be made to bring the murderers to justice, and we may trust that Mr. Grosvenor will tolerate no obvious attempt to make the inquiry a mere form. But, bearing in mind the easy way in which the Chinese Government can sacrifice lives which are of no value, we shall do well to moderate our expectations. Mr. Grosvenor's Report will be awaited with much curiosity.

The publication of something like truth in the *Peking Gazette* respecting foreign countries has been peculiarly difficult to obtain. The Mandarin cited by our Correspondent thought that the Emperor might as well abdicate as indicate in the official *Gazette* the fact that such Powers as England dictated terms to China. The literary class, he thought, would be enraged to the pitch of disloyalty by such a confession of the emptiness of the personal and national pretensions which they had made from immemorial time, and he complained that it was hard to make the Empire choose between such a humiliation and war with England. No doubt the alternative is hard. Systematic mendacity always leaves inconvenient consequences. So far as we safely can, we ought to respect even the childish gasconading of the Chinese officials. But, unfortunately, it has a highly practical value, and the only way to let the people know that the lives of our countrymen must be respected is to expose the falsehood that we are an insignificant Power. Such an announcement has not yet been made with sufficient frankness, for the memorials in the *Peking Gazette* have been models of ambiguity. We shall have much to do before we can so beat down Chinese vanity as to obtain a truthful declaration of our power. Meanwhile, the Chinese seem as unable as ever to make good their vanity by force of arms, Our Correspondent gives a sorry account of the forts on which Li-Hung-Chang and other Chinamen have spent much ingenuity. There is no reason to suppose that, relatively to Western means of attack, they are any stronger than they were when the English and French troops marched to Peking. It is not the military preparations of the Chinese that we have to dread; it is the obstinacy, the vanity, and the endless evasions of an official class which does more to shut off China from real intercourse with the West than the Great Wall once did to protect it from the incursions of the Tartar tribes.

With reference to the above, Mr. P. J. Hughes, H.B.M. Consul at Hankow, writes:—"Permit me to point out that the official who has been ordered to proceed to Yunnan to investigate the circumstances connected with the murder of the late Mr. Margary is not Li-Hung-Chang, Governor-General of Chih-li and Imperial Commissioner, but his brother, Li Han-Chang, who holds the post of Governor-General of the Central Provinces of Hupei and Hunan."

THE PERAK OUTRAGE.

Commenting upon the telegrams which have recently appeared with reference to the Perak outrage, *The Times* observes that it is by no means satisfied with the state of things which a careful scrutiny of recent events reveals. Our present business is, of course, to punish the criminals and crush the insurrection in Perak. But when we have done this, we may ask a few questions, to which the Colonial-office must be prepared to give answers. How did we get into the position of which we have now to cut the knot with the sword? Under what authority were the rights acquired, and the obligations incurred by which we are now embarrassed? Is there any creditable way of surrendering those rights and getting free from those obligations? Must we hold to them with all their risks, or make them worth having by enlarging them so as to comprehend complete sovereignty? The country, *The Times* goes on to observe, has a right to explicit answers on these important points, for it certainly appears that the Government of the Straits Settlements has drifted, within the past two years, into quite novel relations with the neighbouring States of the Malayan Peninsula. This revolution in our policy in the Eastern Seas was effected without receiving the deliberate sanction of Parliament, and without being brought under the notice of the people at large. Yet the change was very momentous. It committed the Straits Settlements, and indirectly the Imperial Government, to a policy which led, step by step, to something closely resembling annexation; though scarcely a single person in these kingdoms outside the Colonial-office was aware of the authority which, as it now appears, Mr. Birch was wielding in Perak when he was murdered, and which, for all we know, Mr. Davidson may be at present empowered to exercise in Sangalore, and Captain Speedy in Laroot. Sir Harry Ord had steadily followed the conduct pursued by the India-office, while the Straits Settlements were under its control, and had refused to depart from a policy of strict non-intervention, holding that if persons, knowing the risks they run owing to the disturbed state of these countries (the Malay States), choose to hazard their lives and properties for the sake of the large profits which accompany successful trading, they must not expect the British Government to be answerable if their speculation proves unsuccessful; but from this policy Sir Andrew Clarke departed; and *The Times* condemns his action in unqualified terms, holding that, if Her Majesty's Government deliberately entered upon any such heroic policy in the Straits of Malacca without either consulting or informing public opinion at home, a serious mistake has been made; that the attack on Mr. Birch arose out of the popular dislike of British interference, and finally that, "whether our rule be tolerated or detested is less important than the announcement, which will be equally novel and unsatisfactory to most Englishmen, that we are ruling in Perak at all."

Mr. Richard Barker writes to *The Times* as follows:—

As public attention is somewhat called to the Malays through the recent deplorable murder of Mr. Birch and the subsequent death of Captain Innes, perhaps a few remarks from one who has recently visited those States might be opportunely presented to your readers. In the first place, permit me to pay a passing tribute to the memory of the Hon. J. W. W. Birch, formerly Colonial Secretary at Singapore. I

Digitized by Google

had the pleasure of his personal acquaintance; a finer man never breathed. He was an ornament to Her Majesty's Civil Service, and had seen long years of service in Hindostan and elsewhere. Unfortunately, he has been the unhappy instrument in bringing about the chief political reforms in the Malayan States, and this marked him out as an object of revenge to the adherents of ex-Sultan Ismail. It is a fallacy to talk about a "religious war," as the Malays have no religious prejudice against the Christian. Of course, if a man calls them "pigs" or "dogs," he must look out. I knew one man who did so, but he was very soon shot, though I have explained the Christian religion to them, and freely criticised Mahomet without the slightest ill-feeling on their side. It will naturally be asked, how did it happen that a man like Mr. Birch was left in such an unprotected position, and what is the remedy for the future? Alas! such has been of late years British protection abroad that after a valuable life has been sacrificed we send an armed force to avenge the death of the victim. Mr. Birch, no doubt, anxious to confirm the recent reforms, and being the most competent official in the Government of the Straits Settlements, accepted his appointment with a full knowledge of its dangers, fully aware he must remain at his post of duty without adequate protection, and fully aware that any day he might be "kresed." To remedy the evil I should respectfully suggest that all British Residents at dangerous native Courts be provided with a body-guard of not less than fifty native police, to be paid by our Government. These men would cost £1,000 per annum; but what is a paltry sum like this compared to the loss of valuable men like Birch and Innes? Besides, we have now to spend ten years' costs to avenge their deaths. The pulling down of the proclamation had a much greater political significance than we are at present advised of, and you may depend upon it no common Malay would have done so without orders from his chief. Now for the military point of view. I am not a soldier, but I was staying at the Court of his Highness the Viceroy of Salangore during the little rebellion from 1872 to 1873, and frequently acted as general adviser and interpreter to his Highness. I had therefore the opportunity of seeing the guerilla warfare of the Malays, and can fully bear out the statements of the late Admiral Sherard Osborn as to the many good traits in their character. The attack on the stockade so nobly led by the late Captain Innes was very brave and much to be admired, but the red coat cannot do impossibilities. In jungle and timber, where the usual range is 150 yards, the native has a great advantage over the European, and stockades properly built are not to be despised. We reduced one at Damasarah, on the Klang river, in the following manner:—A steam launch was made bullet-proof; two Chinese tonkangs were made into wooden monitors, mounting one 9 lb. and one 6 lb. gun each. Over the guns were built block-houses. One monitor was commanded by Lieutenant de Cock, a Dutch officer in the service of his Highness the Viceroy, and one by Emam Prang Rousel ('Fighting Prince Rousel'), a Pahang Malay; the crews were all Malays, who served the guns well, and carried out their orders in a very creditable manner. The steam launch was used as a tug to take the monitors into action. The first day they simply got into position and fired three or four shots, the second day they kept up a steady pounding at 130 yards distance, and towards afternoon the splinters began to move about in the inside of the stockade in a lively manner. The enemy did not seem to relish this, and evacuated on the second night, leaving three months' rice in our hands. The third day the stockade was razed to the ground, without the loss of a single man on our side. It was very strong, being built with logs twelve feet to fourteen feet long and ten inches to fourteen inches in diameter, which could only be reduced by cannon. I am glad to see the Government are taking such active measures in sending troops, &c., forward. Our Madras Sepoys or West India Regiments (properly officered, of course), under the command of such men as Sir John Glover, would be found much more useful there than Europeans. Six twin-screw gunboats of about thirty tons, to mount a 7 lb. gun forward and to carry from fifteen to twenty men aft, with covering from sun and rifle bullet, would be found of great service in scouring their rivers. Men-of-war are practically useless in these places for fighting purposes, as they cannot ascend the rivers; but they are invaluable as convalescent homes when men get fever, dysentery, or other such like unpleasant companions peculiar to those climates.

Monetary and Commercial.

An "Ex-Shareholder" in the Globe Telegraph and Trust Company (Limited) writes to *The Times* to complain that—

The directors, on the 30th of July, informed their shareholders that the net revenue of the company for the year amounted to £156,539 4s. 6d., which, with the balance brought forward, made a total of £158,154 1s. 5d., and that, after making certain deductions for expenses, they had made up the dividend for the year, on the preference shares to 6 per cent. and on the ordinary shares to 5 per cent., and that they had paid it; but that they gave themselves credit as an asset for the cost of their investments at the price at which they bought them. The names of the companies in which their investments have been made are detailed in a separate statement, and a reference to the official Stock Exchange price-list shows the actual prices on the following day (the 18th, the date of the balance-sheet, was a Sunday). The difference between these prices and the amount which is inserted as an asset is actually £814,480, or, in other words, at the time that the company were paying a dividend of 5 per cent. on their ordinary, and 6 per cent. on their preference stocks, they had lost more than £800,000 out of a total capital of £2,700,000. The correspondent adds that many of the directors of the Globe are directors of the Eastern Extension Company, and the Globe had lost more than £320,000 by its investments in these companies; several are directors of the Anglo-American Company, and the depreciation in the value of the stock in that company held by the Globe, compared with the price at which they bought, amounted to £335,000. Not satisfied with this, it appears that the directors exchanged their 25,437 shares in the Brazilian Company, and have issued or exchanged preference and ordinary shares still further, until at the present moment they hold, as any one who refers to the company's register may see, upwards of £1,600,000 of Anglo-American Stock; and upwards of half their remaining capital is locked up in a security which is notoriously exposed to the attack of every speculator in London, at a time when the monopoly enjoyed by the company is disturbed by a very tiresome, if not a very powerful, rival, and when the most sanguine supporter of the Anglo-American Company cannot contemplate any permanent increase in the value of his property. This conduct the writer of the letter condemns as in direct contradiction to the very purpose of the company's existence, for which the directors were pledged to distribute their investments in comparatively moderate amounts over a large surface of different telegraph securities.

A letter appears in *The Times* over the signature "Australian Merchants" in which they urge the co-operation of their confreres in China, in endeavouring to bring about an alteration in the tariff and rules for the transmission of messages. They state that the Companies, while admitting that the public is hardly dealt with, declare themselves unable to deal with the matter, which is entirely controlled by the Indian Government, and the St. Petersburg Telegraphic Convention. As a remedy, they suggest that if merchants combined to reduce their telegraphing to a minimum until some reform be effected, the Companies might be brought to reason. The points mainly complained of are stated as follows:—

"1. We are restricted to the use of words not exceeding ten letters, unless, of course, we pay for two words, and thereby not only is a complete revision of many lengthy and expensive codes rendered necessary, but we are debarred from using in their ordinary significance such everyday English words as 'unintelligible,' 'immediately,' 'consideration,' 'opportunity,' &c.

"2. Instead of a tariff of £1 for the first and 10s. for every additional word (through one of the agencies), or of £9 6s. 6d. for twenty words (through the company), on and after the 1st of January next we shall have to pay 10s. 6d. per word, making a message of twenty words cost £10 10s., against £9 6s. 6d. at present.

"3. If we require words which have been mutilated in transmission and are unintelligible repeated, we must pay the cost of the message, asking for the repeat and of the reply, and we shall not get our money back again, even though, as in one instance very lately in our experience, the company have delivered the word 'apt' when our correspondents sent them for transmission the word 'Upnor.'

With reference to the announcement in our last as to the failure of the American house of Messrs. Russell and Sturgis, of Manila, later advices confirm the same; but it is satisfactory to know that the firm's engagements in general business are but small. They used for account of third parties the credits of Messrs. Baring Bros., but beyond this their connections with that firm amounted to nothing, and the statements in the daily papers about their London agents being well able to sustain any loss by their failure is superogatory. The business for many years has been chiefly of advancing to the natives on growing crops, and these funds were mainly derived by deposits from Spaniards, who gladly accepted eight per cent. interest. The business, however, has not been a paying one, and when Mr. Russell died, a few months since, the depositors began to be uneasy and press for their money; the pressure was too great, and the stoppage ensued. No idea of the liabilities and assets has been received. Consequent on this stoppage, we are informed that a run set in on Messrs. Peele, Hubbell and Co., also an American house at Manila, and that a meeting of creditors had been held and time obtained for the payment of their liabilities.

The directors of the Foreign and Colonial Tunnelling and Prospecting Company (Limited) have declared an interim dividend on account of profits for the half year ending 30th September last at the rate of 10 per cent. per annum.

At a special meeting of the shareholders of the Channel Steamship Company, Sir James Carmichael presiding, a resolution authorising the construction of another twin-ship, and the increase by £150,000 of the company's original capital, was moved by the Chairman, seconded by Sir Cecil Beadon, and carried.

Accounts from America represent the Bank of California as progressing satisfactorily. It is contemplated to increase the capital by half a million of dollars. A San Francisco contemporary says:—

This bank is shaping its affairs toward a thorough reorganisation at an early date after the New Year. It is considered very probable that the old business of the institution will then be in such a position that the change may be easily effected. The subscribers to the Relief Fund will form the new organisation, which will take the bank, with its available assets, goodwill, and all its varied avenues of business and correspondence, at their par value, and make a new beginning. Whatever moneys are realised from such assets as are not taken into the reorganisation will go to the credit of the old stockholders. In this way the affairs of the present organisation will be adjusted as early as possible, and the stockholders will probably receive a handsome dividend. The reorganised bank will then have plain sailing before it, and will doubtless grow in strength very rapidly during the next year.

It has been decided by the shareholders of the Thetis Marine Insurance Company to wind up, and it is expected that a call of £5 must be made to pay off liabilities. It is rumoured that other offices are likely to close.

The failure is reported of the Leeds Mercantile Bank (Messrs.

Digitized by Google

John Holmes and Co.), an undertaking established in 1864. The difficulties have been caused, it is understood, by losses in various companies, but the liabilities, representing chiefly sums due to depositors, do not exceed about £65,000. A petition for the winding up of the estate has already been presented in the ocal bankruptcy court.

The failure is announced of Mr. Sloane Richards, metal merchant of Birmingham, with liabilities amounting to £100,000 or thereby. The cause of stoppage is understood to be serious ses through the failure of several of Mr. Richards's customers These losses have crippled his operations for some time past, and a large claim for £50,000, and an alleged contract which could not be carried out, compelled suspension. The assets are set down at £18,000.

Mr. C. E. Ochsenbein, who carried on business as a corn, seed, and oil merchant in Crutchedfriars, has filed a petition for liquidation, estimating his total liabilities at £60,000, of which about £30,000 is expected to rank against the estate, the value of the assets being as yet unascertained.

In the Bankruptcy Court, on the 23rd inst., Messrs. A. and C. Shand and R. A. Robinson, merchants, of Leadenhall-street, also Liverpool, Madras, and Ceylon, trading as Shand and Co., passed their public examination on a joint statement of affairs, showing total unsecured debts £341,980, against assets £38,368. The fully secured liabilities amount to upwards of £240,000.

At a meeting of the creditors of G. D. Neroutsos, of East India-avenue, London, and Manchester, commission merchant, late trading with R. B. Fastnedge as Neroutsos, Portocalis, and Co., a statement was presented showing the liabilities to be £22,771 8s. 3d., and the assets £13,023 9s. 10d. Resolutions were passed to wind up the estate in liquidation.

The total quantity of tea delivered from the bonded warehouses in London during the week ending the 20th inst. was 3,197,019 lb., of which 2,118,363 lb. was for home consumption, 787,212 lb. was removed coastwise, 221,626 lb. was exported, 65,486 lb. was sent coastwise for exportation, and 4,332 lb. was for ships' stores. The duty received amounted to £52,959, against £53,562 for the preceding week, exhibiting a decline of rather over 1 per cent.

A few orders for France have made the market for Bar Silver, somewhat firmer, and fine bars, which at the beginning of the week were selling at 56⅜d. per oz., could now be placed at 56⅜d per oz. Mexican Dollars have also improved, in connection with Silver, and a few have been sold at 55⅝d. per oz. Exchange on India for bank's drafts at sixty days' sight is 1s. 9 9-16d. per rupee.

THE NORTH CHINA INSURANCE COMPANY.

The report for presentation to the ordinary meeting of the above Company for 1875-77, on the 15th October, has been received from Shanghai, and gives a statement of the business to the 30th June last. The first call of Tls. six hundred (Tls. 600) per share has been duly met, forming a paid-up capital of Tls. 600,000, and in addition thereto a balance is carried forward from the working account of Tls. 290,153.68, making a total sum at the credit of the Company on the above date of Tls. 890,153.68. The amount of premia earned during the period to which the accounts refer indicates a steady continuance of the support the Company has always received. The payments on account of losses and claims, it is to be regretted, are unusually heavy, consequent upon serious casualties to steamers engaged in the Eastern trade, which have involved total losses, viz.:—*Hong Kong*, *Duke of Buccleuch* and *Border Chieftain*; also the *Yuentzefei* and *Fusing*, lost on the coast of China. Further settlements since 30th June to date amount to about Tls. 51,000.

BALANCE SHEET, 1872-1874.

We believe the latest telegrams report the total dividends paid of Office. 1872-4, to amount to Tls. 290 per share, and that 24 per cent. has been distributed to contributors.

ARTICLES OF IMPORT.

TEA.

Messrs. Goddard and Co.'s Circular says:—During the week there has been a dull and heavy market, with very large arrivals. The usual indisposition to hold, with the difficulty of selling privately, have induced some forcing of sales at auction, resulting in a further fall in prices, chiefly in common to fair black and red leaf Congous, Scented Teas, and Oolongs. Medium to on fine Congous are better held, but still neglected. Although the quantity afloat is comparatively small, stocks in warehouses and just arrived are large—say one hundred million pounds, or nearly twenty million pounds over last year; such quantities, when dealers are preparing to lighten their holdings (with no export demand) have caused considerable pressure. Green Teas are cheaper at auction. Public sales.—China sorts: 16,277 packages "without reserve," common to fair red leaf sold from 9½d. to 11d., showing a fall of about ½d. per lb.; black leaf of the same grade 9½d. to 10½d., being at about the same reduction; 623 chests, ex Craigforth, realised 9½d. to 9¾d. Oolong and Scented Teas sold lower, as also were Green Teas. Deliveries from London, from 1st to 22nd inst., inclusive, or nineteen days, 1875, 10,500,000 lbs., against nineteen days, 1874, 10,891,962 lbs. Imports, deliveries, and stocks in London, from Jan. 1 to Nov. 1:—

	1874.		1875.
Imports...	123,363,249	...	150,995,281
Deliveries	143,207,208	...	150,375,690
Stocks	69,480,266	...	79,053,114

Messrs. Capel and Co.'s Circular says:—Our market has been very dull and depressed during the past week, and prices generally have ruled in favour of buyers, both by private contract and at public sale, the trade showing much disclination to buy, whilst the export demand is still limited. *Congous.*—Red-leaf kinds: Siftings have been in fair request at about previous prices. Common to good common kinds have been difficult of sale at a decline of ¼d. to ½d. per lb. Fair to good Kaisows have sold rather lower. In fine to finest but little has been done. In Pak Lin kinds there has been but little doing. Black-leaf kinds: Common remain dull of sale, and a chop of recent import sold at public sale from 9½d. to 9¾d. per lb., being rather lower. Fair to good medium show no change, but there is not much doing in them. Good to fine remain firm, but finest are only saleable at lower rates. Newmake kinds show no alteration. In Oolongs the few sales made have been at about previous prices. Souchongs: The good medium kinds have realised former rates; in fine there is but little doing. *Scented Teas.*—Canton Capers have not been in such good demand, and prices must be quoted fully 1d. per lb. lower for fair to good qualities. Orange Pekoes sell only slowly at about last week's prices. Foochow Capers are without demand, even at the low prices current. Orange Pekoes: Fair qualities have sold ½d. to 1d. per lb. lower. *Green Teas.*—There is no improvement to notice. At public auction prices rule very low for common to good qualities of Moyune and Ping Suey kinds; finer Moyune sorts remaining steady.

SILK.

The Market continues extremely dull, all descriptions being to a great extent neglected, but in the absence of pressure on the part of Importers to sell, there is as yet no material alteration in prices. The deliveries are fairly satisfactory, and stock shows a further decrease. Deliveries 1st to 24th inst. inclusive, China 2,079, Canton 524, Japan 384 bales. Total, 2,987 bales.

CUTCH.—The market continues quiet, and only small sales of Pegue have been made at 26s.

COIR GOODS.—Small quantities of Yarn at the public sales met no demand, and except for fine qualities, which brought full rates, prices were occasionally cheaper. Rope, however, sold with more competition at rather dearer rates; Ceylon yarn sold, good at £38 15s., chiefly fine make and colour from £43 5s. to £48 10s., superior at £50; of 106 tons in dholls about 80 tons sold, very common to common at £23 to £26, good common to medium at £27 to £32, good medium to good at £32 15s. to £38 15s.

COTTON.—The market for the most part has continued in a quiet state, a good demand having appeared only at intervals, and prices after slight variations are barely equal to those previously given. Quotations on the spot are:—Tinnivelly, 5d. to 5⅜d., fair to fine; Western Madras, 4½d. to 5¼d., fair to good; Machine-ginned ditto, 5d. to 5⅛d., good; Northern ditto, 5⅛d. to 5⅞d., fair to good; Coconada, 4 13-16d. to 4⅞d., fully fair to good fair; Salem, 5⅜d., good fair; Scinde, 5d., good; Bengal, 4 11-16d. to 4⅝d., good fair; Oomrawuttee, 5d., fully fair.

COCOANUT OIL has continued tolerably steady, but not active, fine Cochin £41 10s. and Ceylon in pipes yellow to fine at £38 10s. to £39 per ton.

CHINA PRESERVES.—At auction of 517 cases Ginger offered, 100 cases were sold before the sale; of the remainder 120 cases Chyloong sold at 8½d. (for large jars).

CAMPHOR continues dull, with small sales of China at 69s. per cwt.

CUBEBS.—Market steady but quiet; 213 bags sold at auction at 24s. 6d. to 26s. 6d. per cwt., for fair a little stalky to good, and of the former 60 bags sold since at same figure.

COLOMBO ROOT has been steady but quiet at 27s. 6d. per cwt. for fair quality.

ESSENTIAL OILS.—*Anniseed* again easier; 50 cases sold, spot at 9s. to 8s. 9d., afloat offering at 8s. 9d. *Cassia* easier; 20 cases sold at 4s. 1d. to 4s. 2d. spot, worked, afloat about 100 cases at 3s. 11d. *Nutmeg* steady; of 7 cases offered 2 sold at 7d. per oz. *Cinnamon* quiet and easier; one case good sweet sold at 5s. 2d., and of 5 cases leaf few sold at 3d. for good. *Citronelle* has been firmly held, but quiet, and of 125 cases offered at public sale one-third sold at 1 15-16d., but further sellers, and some quantity offering afloat. *Lemon Grass* has been quiet, with small sales upon former terms; 80 cases retired.

EBONY has been in good demand at fully previous rates. Ten tons sold under the hammer at £14 2s. 6d. to £20 10s. per ton for fair to good.

GUMS.—*Benjamin:* Siam very firm and rather scarce. *Sumatra* steady. The sales embraced 2 cases Siam retired and 130 cases *Sumatra* half sold, good seconds at £8 17s. 6d. to £9 2s. 6d., brown glassy thirds 92s. 6d. to 95s. *Copal* quiet; 1,300 cases at auction retired. *Damar* firmly held, and small sales of fine Batavian at 62s. 6d.; 30 cases good but specky sold at 59s. to 60s. 6d. *Gamboge* quiet, and of 31 cases offered three-fourths sold at £10 to £10 15s. for fair to good a little run.

GALLS.—China are quiet and without important sales. At auction 115 cases were bought in at the reduced rate of 62s. 6d.

GALANGAL ROOT has been quiet at previous quotations.

GAMBIER is dull and again lower, only a small business having been effected at 26s. 9d. to 26s. 10½d. for whole bales on the spot, closing at the former price. No sales are reported afloat. At auction 55 bales 124 bags pressed cubes bought in at 35s., and 1,000 bags free ditto at 41s. per cwt.

HEMP.—No improvement can be reported in this market; supplies of all descriptions continue in excess of the demand, and prices are generally cheaper. In Manila about 200 bales have been sold by private contract at easy rates, mixed to good fair at £28 to £30 10s. At the auctions Manila attracted little attention, and only a small part sold at lower rates. 1,702 bales were bought in, chiefly good and fine, at £31 to £32, only about 500 bales being sold at and after the sales, brown at £27 10s. to £28, good fair roping at £30 to £30 10s., a good part sea-damaged at £27 to £28 10s. for second and first-class.

ISINGLASS.—Moderate quantities of East India offered have sold readily, except for common; good Penang tongue and leaf sold slightly higher; 19 cases 8 bags Penang sold, fine long selected tongue at 4s. 5d. to 4s. 7d., fair to fine at 4s. to 4s. 4d., ordinary at 3s. to 3s. 5d., good to fine pale leaf at 4s. 6d. to 4s. 10d., ordinary at 2s. 7d. to 2s. 10d., middling to good cake at 1s. 5d. to 2s. Of 18 bales (4,029 lb.) Saigon 12 bales sold, chiefly good to fine thick pale leaf at 4s. 4d. to 5s. 1d., one lot middling 3s. 11d., and tongue at 2s. 9d. per lb.

INDIA-RUBBER.—There has been more inquiry for medium and common descriptions, and 200 cases Borneo have been sold at 1s. 2¼d. per lb. In auction 24 cases Penang bought in at 1s. 9d., and 115 cases Borneo at 1s. 3d.

JAPAN WAX.—The market remains very dull, and of 646 boxes in public sale, only a small proportion sold at 35s. 6d. to 37s. 6d. for badly damaged greasy saucers; sales of fine reported at 49s., but no buyers in quantity at several shillings less.

MUSK.—Auctions have embraced 12 caddies Tonquin, and mostly sold; selected well shaped pods a few skinny and damp at 44s. 6d. to 45s. 6d.; rough skinny and false packed good 18s. 6d. 9 tins Yunan all sold a 37s. 6d. to 38s. 6d. for good, being fully the previous value. 4 tins grain retired.

PEPPER.—*Black:* Late last week, there being more disposition on the part of importers to sell, some 2,000 bags Penang changed hands, West Coast at 4¼d.; common dusty at 4⅛d. to 4 3-16d., but for any greater quantity there were not buyers, and a dull tone was again assumed. The business in Singapore has been very limited, at barely steady rates. At auction, of 5,080 bags offered, only one-fourth sold, last week a few Penang at 4⅜d., this week a large quantity at 4¼d., with a few lots at 4⅜d. Singapore 5¼d.; few lots 5⅜d. Siam 4¼d. to 4⅜d. Afloat, sales of Singapore have been made at 5d.; in Penang nothing yet reported. *White:* Dull and ¼d. per lb. lower; sales of fair of small extent privately at 7⅜d. to 7½d., and at auction, of 2,148 bags, about 500 bags sold; bold bright at 8¼d.; fair bright 7¾d.; ditto rather dull 7½d.; middling 7¼d. to 7⅜d.

PLUMBAGO.—At auction 342 barrels Ceylon met a better demand and were all sold at an advance of fully 1s. per cwt., middling small to good bold lump at 17s. 6d. to 22s. 6d., ordinary chips at 10s., middling to fine bold ditto at 11s. 6d. to 15s., dust at 9s. 3d. per cwt.

RATTANS.—At public sale 19,171 bundles (38 tons) chiefly sold, Penang at £32 to £34, the bulk damaged Singapore, &c., from £11 12s. 6d. to £20 5s., also 11 tons from Boston with all faults at £13 per ton.

RHUBARB.—Value of China unaltered, and less offers. Of 33 cases at public sale nearly the whole sold; well-trimmed but spongy at 2s. 9d.; fairly trimmed medium and bold of good pinky fracture at 2s. per lb.; rough and horny but good fracture 1s. 4d. to 1s. 7d.; middling small and dull 11d. to 1s.

RICE.—This market has been very dull throughout, and transactions are unusually small; on the spot prices of both hard and soft grain kinds are about 3d. cheaper. There has been little demand for floating cargoes, although prices are cheaper, but business has been done in the new crop of Burmah at 8s. 3d. to 8s. 4½d., open charter. On the spot about 1,000 bags white Bengal have been sold, good at 11s. 4½d., and 500 bags field Siam at 7s. 9d.

SAGO steady, but quiet, and of 2,530 bags offered, barely half sold at 16s. to 17s. for fair to good small, and 16s. 6d. good large. *Flour* generally firmly held; of 690 bags at auction two-thirds sold at 13s. to 13s. 3d. for good, and about 1,500 bags Singapore sold privately at 13s. per cwt.

SAPANWOOD scarce, but demand limited, and no transactions of importance can be recorded.

STICKLAC has been very quiet. Of 332 boxes Siam offered about 60 boxes sold, block 64s. to 67s., the remainder bought in at 87s. 6d. to 90s. per cwt.

STAR ANISEEDS.—Good quality scarce and in request; a few lots common sold at £5 7s. 6d. per cwt.

SPICES.—*Cloves:* No business done. *Nutmegs:* 52 cases and boxes Penang went at rather lower rates, a portion being taken in; brown sorts, more or less mouldy, sold as follows: 114's 2s. 7d., 82 to 79's 3s. 5d., 81's 3s. 6d., 68 to 65's 4s. to 4s. 2d., defective limed 1s. 8d. to 1s. 9d.; 7 cases brown Java taken in above the value. *Mace:* Common qualities have sold at rather lower rates; 25 packages Penang went as follows: low to middling red 1s. 9d. to 2s. 3d., broken, pickings, &c., 1s. 1d. to 1s. 3d.; 16 packages Java were bought in above the value.

TAPIOCA.—Quiet, and of 1,220 bags flake offered only a few sold at 2⅛d. to 2¼d. per lb. for good small. *Pearl* quiet; of 1,525 bags about one-third sold, fine small at 18s. 6d. to 19s. per cwt., being 1s. per cwt. lower; large 18s. 6d., being 6d. decline; medium 17s. to 18s. for ordinary to good, being steady. *Flour* quiet; of 461 packages a few in bags sold at 2d. for fair.

TURMERIC.—Scarce and wanted. Market very firm for all kinds, 100 bags sliced Java, of low quality, sold at 10s. 3d. to 10s. 6d.

TIN.—The market has been quiet at previous quotations, viz.:—Straits on the spot and afloat £83, Banca £89, Billiton £84 per ton.

VERMILION.—Small sales of China effected at 5s. 6d.

ARTICLES OF EXPORT.

METALS.

IRON.—Welsh: Rails, £6 10s. to £6 15s.; Bars, £7 5s.; Staffordshire Best: Bars, £8 15s. to £10; Nail Rods, £9 to £9 10s.; Hoop, £10 5s. to £12; Sheets, £11 15s. to £13; Scotch Pig, No. 1, £3 3s. to £3 18s.; Swedes, Bars, Hammered, £15 10s. to £16 10s.; Swedes, Steel in kegs, ½ and ⅝ in., £18 10s. to £19.

YELLOW METAL.—Sheets, 4 by 4 ft., 8d.; Sheathing and Rods, 8d per lb.

TIN.—English Refined, £89. Tin Plates: Charcoal IC, per box, 26s. to 32s. Coke, 21s. 6d. to 26s.

LEAD.—WB, £23 10s.; do., other brands, £22 to £22 5s.; Spanish soft, ex ship, £21 10s.; Sheet, £23 10s.; Shot (kegs extra), £26 10s.; White do., £29 10s.

SPELTER.—Silesian, £25.

QUICKSILVER.—In bottles of 75 lbs. each, £11.

Messrs. French and Smith's Circular says:—Iron without change. Copper dull. Chili Bars may be bought on rather easier terms. Lead firm, at quotations. Quicksilver advanced to £11 per bottle.

MANCHESTER GOODS.

In the absence of any improvement in the demand, the Market has remained very quiet, and the aggregate business transacted has been very small. Where offers have been made at any reduction on the quotations, producers have invariably declined business, and on the whole prices show scarcely any quotable change from last week.

LOADING.

At London.—Steamers via Suez Canal.—For Penang, Singapore Hong Kong, Shanghai, Yokohama, and Hiogo: Bengal, Oxfordshire. For Singapore, Hong Kong, and Shanghai: Lord of the Isles, Crocus.

Sailing Vessels.—For Yokohama and Hiogo: Tamesa, Ziba, Forward Ho. For Shanghai: M. A. Dixon. For Hong Kong: Nestor, Evelyn, Echo. For Batavia, Samarang, and Sourabaya: Inverary. For Singapore: Sir Robert Sale, Tynedale. For Penang: Glenisla. For Colombo: Strathmore.

At Liverpool.—For Penang, Singapore, Hong Kong, and Shanghai: Ulysses (str.), Menelaus (str.), Stentor (str.). For Batavia: La Gaul. For Padang: J. F. Kranz, John N. Gamewell. For Singapore: Gem. For Penang: Invincible.

At Glasgow.—For Shanghai: Duart Bay. For Singapore: Mutlah. For Colombo: Ysuisquiza.

SPOKEN.

Wyk-aan-Zee, Amsterdam to Sourabaya, Nov. 8, 49 N., 6 W.
Mogul, Singapore to London, Sept. 29, 34.12 S., 17.29 E.
Amstel, Batavia to Amsterdam, Oct. 2, 28.18 S., 9.31 E.
George Croshaw, London to Singapore, Oct. 4, 20 S., 27 W.
Asterion, Cardiff to Singapore, Oct. 15, 6 N., 24 W.
Haidee, London to Colombo, Oct. 18, 6 N., 28 W.

FREIGHTS AND CHARTERS.

The rates of freight for steamers on the berth are easier, caused by an over supply of tonnage; sailing vessels remain as last quoted.

Current Rates of Freight for Vessels on the Berth.

Per Steamers via Suez Canal.—To Yokohama: 55s. weight, 50s. meast. To Hiogo: 55s. weight, 55s. meast. To Nagasaki: 60s. weight, 65s. meast. To Shanghai: 45s. weight, 40s. meast. To Hankow: 60s. weight, 55s. meast. To Hong Kong: 45s. weight, 40s. meast. To Singapore: 45s. weight, 35s. meast. To Penang: 45s. weight, 35s. meast. To Colombo: 35s. weight or meast. To Batavia: 60s. meast. To Samarang: 65s. meast. To Sourabaya: 70s. meast.

Per Sailing Vessels.—To Yokohama: 40s. weight, 30s. meast. To Hiogo: 40s. weight or meast. To Shanghai: 32s. 6d. weight, 25s. meast. To Hong Kong: 30s. weight, 25s. meast. To Singapore: 25s. weight, 20s. meast. To Penang: 25s. weight, 20s. meast. To Batavia, Samarang, and Sourabaya: 20s. to 25s. weight, 25s. to 30s. meast. To Colombo: 25s. weight, 22s. 6d. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne, per keel—To Yokohama: £32. To Shanghai: £30. To Hong Kong: £26. To Singapore: £21. To Penang: £23, f.c. To Colombo: £23. To Galle: £23. To Batavia and Sourabaya: 24s.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama: 34s. 6d. To Shanghai: 32s. 6d. To Hong Kong: 30s. To Manila: 27s. To Singapore: 20s. To Colombo: 19s. To Galle: 20s. To Batavia and Sourabaya: 24s.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 28s. To Singapore: 14s. To Batavia and Sourabaya: 20s. To Galle: 18s.

CASUALTIES.

The Belted Will, which left London on the 21st inst. for Hong Kong, has been towed back to the South West India Docks, leaky, having been ashore on the Tongue Sand.

The Cutty Sark, from London, for Sydney and China, in being towed round to moor at the buoy off Gravesend, on the 21st inst., collided with the Somersetshire (str.); the former had maintop-gallantmast carried away and received other damage.

The Marten van Rossem (Dutch barque), from Rotterdam, for Batavia, put into Plymouth on the 21st inst. leaky.

Advices from Port Elizabeth report that the Ceylon, from Zebu, for New York, which arrived at Algoa Bay on Oct. 13, had encountered heavy N.W. gales on the 9th and 10th of the same month, during which she lost sails, bulwarks on both sides, galley and boats. The maindeck was also stove, and at one time the vessel had seven feet water in hold. She continued to leak at anchor, and surveyors recommend the immediate discharge of her cargo. It is feared that she will be condemned. Another account says that the vessel lies with her back broken and five feet water in hold, and pumps bringing up sugar and water.

The Assyrian, of Aberdeen, from Ilo Ilo for Falmouth (sugar and hemp), at Algoa Bay, Oct. 14, reports that from 7th to 11th Oct. she encountered heavy gales; had rudder head twisted off, part of bulwarks stove, and lifeboat destroyed; would have to be supplied with a new rudder, and expected to proceed in 10 or 14 days.

The Minister Fransen v. d. Putte, for Rotterdam from Batavia, put into Port Elizabeth, Oct. 16, leaky; expected to discharge her cargo for survey.

Telegraphic advices from Batavia to the 25th inst. state that the Salak (Nederlands India str.), from Atchin, to Padang, in ballast, has been totally lost off Polsenias, crew and passengers saved.

The Formosa, 380 tons, is reported by telegram from Melbourne, dated Nov. 17, as having been totally wrecked at the Philippines, crew saved.

The Charger, which arrived at Hong Kong, on the 13th inst. from Cardiff, encountered heavy weather during the passage, and lost some of her sails.

MISCELLANEOUS.

Gibraltar, Nov. 23.—Arrived, Aline (Sarawak gunboat), from Clyde, for Singapore, and reports having experienced heavy weather.

Naples.—Arrived, Nov. 21, Prins Van Orange (str.), from Batavia, and proceeded for Nieuwe Diep.

Port Said.—Arrived, Nov. 21, Sarpedon, from Liverpool, for Shanghai; 23, Leon, for Manila.

Suez.—Arrived, Nov. 18, from Nieuwe Diep, for Batavia, Prins Hendrik; from Foochow, for London, Flintshire; from Shanghai, Teviot; 23, Patroclus.

Aden, Nov. 17.—Arrived, Madura (str.), from Batavia, and proceeded on the following day for Nieuwe Diep.

Galle.—Passed, Nov. 21, Glenearn (str.), from Shanghai, for London.

East London, Oct. 24.—Passed, John George, from Singapore, for London.

Penang, Nov. 19.—The Alabama, loading for London, has been surveyed and condemned, and will be sold, as the cost of repairing her would exceed her value by £1,800 (?). The Fifeshire has been chartered to take her cargo.

Sourabaya, Oct. 9.—The wreck and cargo of the Amity, from Ilo Ilo, for London, stranded near Bawean Island, were sold here by auction, Sept. 9, for f.4,700 (Java currency) net. The purchasers have salved nothing as yet, though the expenses incurred have been exceedingly heavy. Before leaving Bawean the crew saved about 146 piculs of sugar, a few sails, and sundry articles, viz., compasses, telescopes, &c., which have been sold. According to the latest reports the wreck was fast breaking up, and there remained but little hope of saving anything except the rigging.

NOTICES TO MARINERS.

China, East Coast—San-Mun Bay—Position of Heroine Rock.—With reference to the several positions hitherto assigned to the sunken Heroine Rock, at the entrance to San-Mun Bay, East Coast of China, the following particulars, by Commander E. O. Matthews, United States ship Ashuelot, have been received from the United States Government, viz.:—When on the passage from Ningpo to Foochow the sea was observed breaking heavily on the Heroine Rock, boats were lowered and soundings taken as near the danger as possible, eight to nine fathoms being found. The position assigned to Heroine Rock by Commander Matthews is on the following bearings, viz.:—South-end of Sanchesan (Triple Island), W. ¼ S.; South-west end of Lea-ming Island, N.W. by W. ¾ W.; West extreme of Montague Island, N. ¾ E. Soundings were also taken over the several positions of the Heroine Rock marked on the charts, but no indication of dangers was found; the native fishermen further stated that only one sunken rock exists in the locality.

Eastern Archipelago—Java Sea—Sunken Rock off Bawean Island.—Information has been received from Mr. George Butchard, master of the s.s. Milton, that his vessel struck on a sunken danger about four miles westward of Bawean Island. This danger (Milton Rock) was found to consist of coral, to extend about 270 yards in a N.W. and S.E. direction, and to have sixteen feet on its shoalest part, deepening all round to 4½ and 6 fathoms, and then to 18 fathoms. The following bearings for the position of this danger are given by Mr. Butchard:—South-west point of Bawean Island, S.E. by E.; North-west point of Bawean Island (Tienio Point), N.E. by E.; small islet (Nusa) N.E. ¼ N. These bearings place the rock in lat. 5° 44′ S., lon. 112° 33′ E.

THE NATIONAL SAFE DEPOSIT COMPANY (Limited).

1, Queen Victoria-street, Mansion House, London.
Capital, £500,000. Subscribed, £250,000.

DIRECTORS.

J. H. Pulleston, Esq., M.P., Chairman.
Dawford Acland, Esq., Chairman Ceylon Company.
George Arbuthnot, Esq., Chairman Oriental Bank Corporation.
George W. Barnett, Esq., Barnetts, Hoares, Hanburys, and Lloyd.
Horatio S. Coulson, Esq., Director United Discount Corporation.
Lord Wm. M. Hay, Director Eastern Telegraph Company.
Hugh F. Sandeman, Esq., Director Scottish Union Insurance Company.

The Company is now ready to let to approved applicants Safes in their Fire and Burglar proof Vaults, at rents from £2 10s. to £30 per annum.

No insurance is necessary.

The main object of the Company is to provide the public with a perfectly secure, yet inexpensive repository for valuables of every description, and relieve them from the harassing and wearing strain occasioned by the personal care of such property. The Company take for safe custody all kinds of securities, valuable property, bonds, wills, marriage settlements, and other documents, and guarantee their value when required. Drawn bonds, counons, &c., collected.

The Company undertake the duties of trustees, receivers, and executors, and act in other confidential capacities.

The Great Vault is superior to any building in the world intended for similar purposes. The utility of these Safes, which are entirely underground, is undeniable, as bankers are not responsible for deposit of valuables.

The loss of many kinds of securities is irreparable, the loser having no recourse against the Government or other party issuing them. A constant watch is kept both inside and outside the building. There is a room especially adapted and reserved for ladies. The premises can be inspected, and further particulars obtained on application. HENRY WEST, Manager.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, August 30, 1851.
PAID-UP CAPITAL, £1,500,000.
RESERVED FUNDS, £500,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Colombo, Foochow, Hiogo, Hong Kong, Kandy, Madras, Mauritius, Melbourne, Point de Galle, Port Elizabeth, Shanghai, Singapore, Sydney, Tellicherry, and Yokohama on terms which may be ascertained at their Office. They also issue Circular Notes for the use of Travellers by the Overland Route.

They undertake the agency of parties connected with India and the Colonies, the purchase and sale of British and Foreign Securities, the custody of the same, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named Dependencies.

They also receive deposits of £100 and upwards for fixed periods, the terms for which may be ascertained on application at their Office.

Office hours, Ten to Three; Saturdays, Ten to Two.
Threadneedle-street London, 1875.

THE AGRA BANK (Limited).

Established in 1833.

CAPITAL, £1,000,000.
Head Office:—NICHOLAS-LANE, LOMBARD-STREET, LONDON.
Branches in Edinburgh, Calcutta, Bombay, Madras, Kurrachee, Agra, Lahore, Shanghai, Hong Kong.

Current accounts are kept at the Head Office on the terms customary with London Bankers, and interest allowed when the credit balance does not fall below £100.

Deposits received for fixed periods on the following terms, viz.:—At 5 per cent. per annum, subject to twelve months' notice of withdrawal. For shorter periods deposits will be received on terms to be agreed upon. Bills issued at the current exchange of the day on any of the Branches of the Bank free of extra charge; and approved bills purchased or sent for collection. Sales and purchases effected in British and Foreign Securities, in East India Stock and Loans, and the safe custody of the same undertaken. Interest drawn, and Army, Navy, and Civil Pay and Pensions realised. Every other description of Banking Business and Money Agency, British and Indian, transacted.

J. THOMSON, Chairman.

GREAT FIRE IN BUNHILL-ROW

London, 23rd Sept., 1875.

Messrs. CHUBB & SON, 57, St. Paul's-churchyard.

GENTLEMEN,—We have much pleasure in informing you that in the great fire in Bunhill-row, on 14th inst. the whole of our books and other valuable documents were saved in two large SAFES of your make. One of the Safes especially had a most severe test, for it fell a considerable depth into the midst of the fire, and while there the brass handles were melted, and the outer plates had evidently been red hot. Notwithstanding this, when the Safe was got at, several days later, the contents were found intact, although bearing traces of the intense heat they had been subjected to. You are at perfect liberty to use this letter in any way you please, for we think you can never have had a more convincing proof of the excellent fire-resisting qualities of your Safes.—We remain, yours truly, ROBT. SANDS & SONS,

Late No. 119A, Bunhill-row, E.C.

DINNEFORD'S FLUID MAGNESIA.

KEATING'S

PERSIAN INSECT DESTROYING POWDER,
As supplied to Her Majesty's Government.

THIS POWDER is quite *harmless to animal life*, but unrivalled in destroying FLEAS, BUGS, BEETLES, MOSQUITOS, MOTHS IN FURS, and every other species of Insect. Sportsmen will find this an invaluable remedy for destroying fleas in their dogs, as also ladies for their pet dogs. This invaluable article has found so great a sale that it has tempted others to vend a so-called article in imitation. The public are therefore cautioned to observe that the packets of the Genuine Powder bear the autograph of THOMAS KEATING.

Sold in Packets and Tins, by all Druggists.

KEATING'S BON BONS OR WORM TABLETS,

A PURELY VEGETABLE SWEETMEAT, both in appearance and taste, furnishing a most agreeable method of administering the only certain remedy for INTESTINAL or THREAD WORMS. It is a perfectly safe and mild preparation, and is especially adapted for children.

TESTIMONIAL.

"To Mr. Thomas Keating. Harpenden, March 7, 1871.
"Sir,—My two little girls, aged respectively three and two years, showed symptoms of having worms, so I obtained some of your Worm Bon Bons from Mr. Busby, and they effected such a thorough cure—in fact, I think, saved their lives. The elder little girl had sixteen worms come from her. I think it my duty to acquaint you with the fact. "FREDK. WILLMOTT."

Sold in Tins by all Chemists and Druggists.

THOMAS KEATING, LONDON,
EXPORT CHEMIST AND DRUGGIST.

City Agency—3, Clement's-lane, Lombard-street.

ABRIDGED PROSPECTUS.

This Trust is created and registered under the Companies' Acts with limited liability, with the object of affording to all classes of the community a positively safe and profitable employment for their capital or savings.

The fundamental principle of the Trust is the exclusive investment of its capital and funds in the purchase of, or in mortgages on, good freehold and long leasehold property in England and Ireland, and heritable property in Scotland.

Associations embracing similar objects have for years past been in operation in Scotland, with highly profitable results, as may be instanced by the following:—Scottish Heritable Security Company (Limited)—paid, £1 dividend, 20 per cent., price £4 15s.; Heritable Security Investment Association (Limited)—paid £2 dividend, 15 per cent., price, £6 3s. 9d.; Standard Property Investment Company (Limited)—paid, £1, dividend, 12 per cent., price, £2 10s. Arrangements are now in progress with the view of constituting an influential Board in Scotland.

No property will be bought by this Trust which is not capable of yielding at the least a clear 5 per cent. on the purchase; but it is in the experience of the Board that by being constantly in the market, very valuable property, capable of yielding a far higher rate of interest, may very frequently be acquired.

This Trust can never be liable to those fluctuations and losses which are inseparable from mining, shipping, manufacturing and trading companies, or to the uncertainty of foreign bonds; on the contrary, its dividends will be regular and constant.

The rapidly increasing value of land and house property in and around cities and large towns is well known.

Shareholders will be paid a fixed rate of interest half-yearly at the rate of 5 per cent. per annum, and all further profits divided periodically by way of bonus, according to the system adopted by several of the largest and most successful Life Assurance Societies in England and Scotland.

The Trust will receive money on debenture bonds and on deposit.

It is confidently anticipated that the Trust will receive a large amount of money on deposit, at such rates as will permit of its immediate employment upon highly advantageous terms. This is the principle which has been so successfully adopted by the large banking institutions of the country, with this difference in favour of the Trust—that its funds will be exclusively employed in dealings with real property, while those of the banks incur the risks inseparable from all mercantile transactions. Under this system, and the proportionately small amount of dividend-bearing capital, the profits to be divided among the shareholders must necessarily be large.

As part of the business of the Trust, tenants will be offered the option of purchasing their residences by payment of rent for given periods, after which the houses become absolutely their own.

There are no promoters' fees, or founders' shares, nor will the Board receive any fees for their services until 5 per cent. per annum has been paid to the shareholders.

A large number of the shares having already been subscribed for, no application will be received after the 4th December for London, and the 6th December for the Country.

In the event of no allotment being made the deposits will be at once returned in full, or, where the number of shares allotted is less than those applied for, the surplus deposit will be applied towards payment of the amount due upon allotments.

Prospectuses and forms of application for shares may be had at the office of the Trust. The Memorandum and Articles of Association can be inspected at the offices of the Trust in London, or at the offices of the Solicitors, 6, Old Jewry, E.C., where also all other information can be obtained.

PRELIMINARY NOTICE.

THE CHINA TRANS-PACIFIC STEAMSHIP COMPANY

(LIMITED).

THE new, powerful, and handsomely-fitted iron screw steamers of this Company are intended to resume their trips between San Francisco, Japan, and China at an early date, when it is hoped that their reputation for speed, safety, and comfort will secure them a large share of the increased traffic of the North Pacific.

The "Vancouver" will probably be the first vessel to leave San Francisco, succeeded by the "Vasco de Gama." The "Columbus," to be launched in January, will proceed to Hong Kong and make her first voyage from that port to San Francisco, via Yokohama, and will be followed by other vessels in due course.

Further particulars will be published shortly.

BIRMINGHAM—Manufactory and Show Rooms Broad-street. Established 1807.

THE LATE REV. B. P. KEASBERRY,

OF SINGAPORE.

THE late Rev. B. P. KEASBERRY, whose sudden death occurred last month in Singapore, has left a widow and a family of girls almost wholly unprovided for.

It is almost unnecessary to remind old residents in The Straits of the faithful and disinterested services of Mr. Keasberry, in the teaching of the Christian faith, and the spread of education.

These services, which extended over a period of thirty-six years, it is proposed to recognise, to some extent, by the collection of a sum of money, to be placed in the hands of the Hon. R. Little, M.D., and William Adamson, Esq., of Singapore, as Trustees, leaving power to them to invest the whole or a part at their discretion, or to apply it wholly and at once for the benefit of Mrs. Keasberry and her daughters.

Cheques should be made payable to P. F. Tidman, 34, Leadenhall-street, by whom Subscriptions will be acknowledged.

THE MAILS, &c.

The P. and O. mail, bringing the advices dated as above, was delivered, *via* Brindisi, this morning, its due date. The next inward (French) mail, with a week's later dates, viz., Yokohama 26th, Shanghai 29th Oct., Hong Kong 4th, Singapore 12th Nov., which is due, *via* Marseilles, on Monday next, the 13th inst., left Suez on the 1st inst., two days early.

The lines of the Eastern and Great Northern Telegraph Companies are still out of order.

List of Passengers.

PASSENGERS INWARD.

By this mail to Venice, per P. and O. steamer *Hindostan*, arrived Dec. 5.—From Hong Kong: Mr. Fairhurst. From Singapore: Mr. B. Williams, Mr. Cohen, Mr. Scott. From Galle: Major Rutherford.

To Southampton, per P. and O. steamer *Nizam*, expected to arrive Dec. 12.—From Yokohama: Mr. O. Shigetoski. From Shanghai: None. From Hong Kong: Mr. T. Mitchell, Mr. Hill. From Galle: Mr. and Mrs. Pearson.

PASSENGERS OUTWARD.

Per French steamer *Anadyr*, from Marseilles, Dec. 5.—To Yokohama: Mr. and Mrs. Fanconnet. To Saigon: Mr. Alquier, Mr. Forestier. To Batavia: Mrs. Van Lawick, Mr. H. de Lyon, Comte Zichy, Mr. Frolke, Mr. and Mrs. J. Wust. To Singapore: Comte Herngasze, Mr. J. Ross, Mr. John Cameron. To Galle: Mr. Boustead, Mr. Northmore, Dr. Anthony, Mr. Walker.

Per French steamer *Djemnah*, from Marseilles, Dec. 19.—To Yokohama: Mr. Kreitmann, Miss Seymour. To Shanghai: Mr. Godeaux, Mr. Seul. To Hong Kong: Mr. and Mrs. Pelham Warren. To Batavia: Mr. J. H. Tromp. To Singapore: Mr. James Connell, Mr. Glass. To Galle: Mr. Strand. To Port Said: Monsr. de Lesseps and family.

Per French steamer *Ava*, from Marseilles, Jan. 2.—To Galle: Mr. Newman.

Per P. and O. steamer *Surat*, from Southampton, Dec. 2.—To Hong Kong: Mrs. J. Dixon. To Galle: Mr. V. Hamilton.

Per P. and O. steamer *Hindostan*, from Venice, Dec. 10.—To Singapore: Mr. and Mrs. MacVicar.

Per P. and O. steamer *Hindostan*, from Brindisi, Dec. 13.—To Hong Kong: Mr. D. Travers. To Singapore: Mr. A. Black, Mr. Fester, Mr. H. W. Uloth.

Per P. and O. steamer *Bokhara*, from Southampton, Dec. 16.—To Hong Kong: Mr. J. Barry. To Ceylon: Mr. E. Corvant, Mr. T. J. Jones, Sir J. W. Copley.

Per P. and O. steamer *Baroda*, from Brindisi, Dec. 27.—To Singapore: Rev. and Mrs. Aitken.

Per steamer *Crocus*, from London, Dec. 6.—To Singapore: Mrs. Aspinall and five children. To Singapore: Messrs. J. A. Hayman, Walter Grinter, David Davies, R. Abraham, Miss Knight, Miss Goodman, Mrs. Goldspink and child.

Per Noderland Company's steamer *Koning der Nederlanden*, from Nieuwediep, Nov. 27.—To Java: Mrs. A. H. Westenberg, Mrs. Van der Bent, Mr. and Mrs. T. H. Schluter, Messrs. E. H. Andriessen, V. A. Schuessler, Ch. de Roy van Zuydewyn, F. R. Seelig, E. Schuessler, T. Schussler. Mr. and Mrs. K. Rolff, Messrs. G. de Clercq, A. L. M. Bekking, W. A. Kneepkens, E. Verschooff, F. L. Bicker, Mr. and Mrs. P. C. Larssen and eight children, Mr. and Mrs. R. S. Thal, Mrs. C. G. Kotting de Hens and child, Messrs. T. C. de Bruyn, K. A. J. E. Jeckel, S. P. van Eeghen, F. de Beaufort, J. de Kock, C. S. Buys Ballot, A. W. Hultman, Mrs. M. Schlmacher and child, Messrs. A. Kupfer, H. H. Holle, G. H. de Kruyff, F. Daniels, M. Cohn, P. Vincent, Mr. and Mrs. A. H. C. van Leeuwen and five children, Mr. and Mrs. F. N. Kramer, Messrs. C. F. Michell, T. Gerritsen, T. T. Smits, J. J. Hessels, F. G. A. Wissel, J. F. A. Mattern, W. de Waardt, M. Flohil, W. Z. Ort, J. Kluit, Taale, J. Houtsmuller, C. Wakerlin, W. Schultz, J. P. Holst, C. Jongman, J. Duphuis, J. W. Meyer, jun., C. H. van Dorp, T. van Horn, H. Wiechert, Edwards, Todd, Robbertson, Mr. and Mrs. D. Schäfer, Messrs. A. J. O. Groeneveldt, J. F. A. de Rooy, F. W. Everts, P. A. le Maire, W. H. P. Mirandolle, F. Stam, J. H. van Batenburg, eight subaltern officers, 150 soldiers.

Summary of News from the Far East.

JAPAN.

The steamer *China*, from Yokohama 26th October, arrived at San Francisco on the 20th ult., and the subjoined summary of her advices has been telegraphed to New York:—

The *Japan Gazette* confirms the reported sale of the Pacific mail steamers to a Japanese company. It says the *Golden Age*, *Oregonia*, and *Costa Rica* have been purchased by a local company, the *Nevada* being detained as the property of the Pacific Mail Company until the expiration of the existing mail contract. Freight and passage rates are already raised 200 per cent.

The exchange of the Kurile Islands for the southern part of Saghalien Island has been officially effected, and the Russian and Japanese Commissioners have returned.

The *Japan Gazette* says:—"We are informed, in a quarter which we usually find reliable, that war with Korea is inevitable."

The weather has set in very cold. Snow had fallen in Yesso a month earlier than last year.

CHINA.

PEKING.

We are happy to learn (says the *North China Herald*) that the last difficulty which has delayed the despatch of the mission of inquiry to Yunnan has been removed, and that Messrs. Grosvenor and Baber are likely to proceed in the course of the next week or two on their journey. The details of the understanding arrived at between Mr. Wade and the Chinese Government have not yet become public, but it is understood that the points insisted upon have been satisfactorily obtained—not without some pressure on the part of the Governor-General Li Hung-

Digitized by Google

chang, it is shrewdly suspected. The necessity for a withdrawa of the British Legation from Peking, which at one time seemed imminent, has, as a matter of course, now disappeared. A further Imperial Decree on Treaty Rights and Foreign Relations was published in the *Peking Gazette* of the 9th October. The decree contains explicit reference to the Yunnan outrage, and to Li Han-chang's commission on the subject. Her Majesty's Minister has addressed to Mr. Medhurst, for publication, the following letter regarding the recent negotiations :—

I have to request you to state, for the information of Her Majesty's subjects at this port, that arrangements have been made which enable me to allow Mr. Grosvenor to proceed without further delay to Yunnan, in order that he may be present at the investigation of the circumstances of the attack on Colonel Browne's mission and the murder of Mr. Margary. Mr. Grosvenor's long detention, and the fact that I was known to be engaged in negotiations bearing more or less on the matter of his mission, have not unnaturally excited apprehensions which will, I hope, be set at rest by the announcement I have authorised you to make.

I should not here refer further to the negotiations in question, did I not conceive it expedient to set speculation on one point at rest. I hear it rumoured that I have signed a convention by which British trade was to be materially influenced.—This is not the case. I have availed myself of the opportunity to insist very earnestly upon the duty of more perfectly observing various Treaty provisions, in deference to what has been so frequently matter of complaint ; notably of those that bear upon the taxation of our trade. Were the conditions of the Treaty, as it stands, to be fulfilled, there would, of course, be no occasion for a convention. Were it shown to be expedient to modify the existing conditions of the treaty affecting trade a convention would be, doubtless, necessary. But no Convention could be operative that had been negotiated by myself or the representative of any Treaty Power single-handed. Foreign trade in China is a common property, changes in the regulation of which, to be effective, must have been duly considered and accepted by all alike. What I have striven to obtain, therefore, in this direction is a formal engagement on the part of the Chinese Government that inquiry should be made into the question of taxation of foreign trade, whether at the Consular Ports or beyond their limits, and that a report should be prepared on which, were it found otherwise impossible to rectify practices at present objected to, modification of existent conditions might be negotiated. An engagement by which I hope that the desired object may be attained has been conceded.

Two officers have fallen into disgrace for daring to send the Korean tribute by sea instead of by land. On the 29th July, a Manchu named En-fêng made his appearance at Moukden and reported that he had received the tribute as ordered, but, in consequence of the bad state of the roads, had determined to send it to the capital by sea, in charge of his colleague, while he himself came by land to report. Most people would have thought this an intelligent proceeding, but the Governor of Manchuria suspects crime in such a departure from precedent, and advises that En-fêng be stripped of his rank pending inquiry into the fate of the tribute. If the junk happens to have gone down with his colleague on board, it will be awkward. But probably it is at Peking ; and En-fêng will get his button back when the necessary amount of red-tape has been expended, and the authority of precedent has been vindicated.

The *Peking Gazette* of the 5th Oct. contains a memorial of some interest, in view of the attention that has been drawn to the Canton Customs by the proceedings of the Hoppo in the *Carisbrooke* case, and his general endeavour to blockade Hong Kong and Macao. A censor accused the existence of grave abuses through the Hoppo placing personal dependants in charge of Collectorates. But the Hoppo has been wiser in his generation than the Viceroy ; and the Governor-General, Governor and Taoutai all unite in praising his administration, and point to the great increase of Customs revenue as proof that the persons he employs "discharge their duty without connivance at contraband dealing for their own profit." Certainly not; whatever accusation can be brought against the present Hoppo's administration, it is not connivance at contraband trade. It is rather outrageous oppression of legitimate trade, confiscation of ships and goods pursuing a lawful calling, and not justly liable to interference.

The *Peking Gazette* of the 28th September contains an interesting memorial from the Acting-Viceroy of Nanking, with regard to lekin taxes. There has been a proposal, apparently, to reopen certain inland Custom-houses in the province of Kiangsu, but the Viceroy objects that it would be impossible to raise further Customs' taxes in addition to the lekin, which is already objected to as oppressive; and that to abolish lekin and substitute Customs' collections would simply confuse and worry people. It is interesting to learn that the province contributes Tls. 140,000 a month towards specific military expenditure, besides a host of other extraneous mulcts.

The *Peking Gazette* of the 29th September contains a quaint report of a Liu-Chiuan junk having drifted ashore on the Shantung promontory. Nothing extraordinary so far ; but it is curious to find the Governor of the Province reporting such an incident to the Throne, and apologising for having sent the junk straight home instead of *vid* Peking.

KIUKIANG.

The correspondent of the Celestial Empire writes from this Port as follows:—

The new hulk of the China Merchants' Steam Navigation Company arrived here on the 8th Oct., and is anchored a little ahead of the place where lie the remains of her predecessor, which was burnt last year. The Company are going to try and drag the wreck ashore, but it is no easy task to get her off her muddy bed. The day after the arrival of the new hulk a big junk got foul of her and carried away one of her masts in the endeavour to get free.

A few days ago a grand review was held here, by the Chen-tai, of the troops under his command, and I am bound to say that a finer body of Chinese soldiers it has seldom been my lot to see.

The Hankow Cricket Club have challenged us to a match, and we are going to Hankow to play them on the 25th Oct., so I leave you to imagine the daily practices that are progressing.

H.M.S. *Swinger* arrived here on the 10th Oct., and we are hoping that she will be stationed with us all the winter.

SHANGHAI.

The present mail brings advices from this port to the 22nd October ; the P. and O mail from London Sept. 3 was received on the 17th Oct. The following summary of news is from the *North China Herald* :—

The Volunteer Rifle Meeting has occupied four days of the past week. The prizes shot for on the 15th Oct. were won by members of No. 1 Company, the National Rifle Association Medal by Sergeant Sharp, with a score of forty-six, and the Municipal Challenge Cup by Private Hall with fifty. It will be seen that this cup has been won with a higher score every year since it was first offered. On the 16th the Officers' Cup was won by Private Wyatt (Miholoongs), and the Ladies' purse by Private Glover (No. 2 Company). On the 18th the Companies' match was won by the Miholoongs. Sergeant Bishop, No. 1 Company, and Sergeant Brown, No. 2 Company, tied for the Consolation Cup next day at the very fair score of thirty-one out of a possible forty. In shooting off, the latter made a bull's-eye against a centre, and won.

Training for the forthcoming Regatta goes on spiritedly. Sometimes six crews of eights are to be seen at work on the Creek of an evening, and this beautiful weather makes everything very lively. The Scotch crew are improving in form daily ; and their work is well done, with a long, steady stroke of thirty-two to the minute—the weight tells when they get fairly to work. The English are rowing a quicker stroke, but with less work ; they appear to lack catch at the beginning, and to have one or two passengers in the boat. The "Veterans" (men of ten years and over in China) are seen occasionally paddling weakly to the course and back, their opponents (two years in China and under) going in fine form. Then the Club Eights are practising steadily ; and of the men for the Sculls, Glass appears the favourite for the Senior, and Andrew for the Junior.

The poll taken at the China and Japan Marine Insurance Company's office on the resolution—That clause No. 7 of the Deed of Settlement, which is that "the Company shall continue for a period of 99 years from the date of these presents," be annulled, resulted in 1,555 votes being recorded for, and 1,237 against ; majority in favour of winding-up, 318. At the adjourned meeting of shareholders in the Company, a proposal that the Company be immediately wound up, was carried on a show of hands by 13 to 10. A poll was demanded, and was fixed by the Directors for the 15th November.

The Municipal Council Minutes which we publish this week would have delighted Talleyrand. Except the fact that the bridge over the Soochow Creek, opposite Szechuen-road, is to be built forthwith, they tell us nothing. A conference seems to have been had with the trustees of the General Hospital ; but the matter, of course, is, like the Peking negotiations, a State secret ; the public are in no way interested, and it would be impertinent to ask what passed. It is gratifying to be told that "the discussion with the trustees, which had taken place on the 1st inst., was under consideration." However, the Council have done such good service in explaining the position of the Hospital previously, that we can hardly complain of a reticence for which there is no doubt some reason. The matter of wharfage dues has been under consideration, and the matter was left in the hands of the Consuls. A question is recorded about the length of piles of the Kiangse-road Bridge, which it would have seemed reasonable to get answered by calling in the engineer and asking it, instead of wasting a week in having plans prepared with the chance that they may fail to show exactly what is wanted when they come. That the Council are prepared to buy land in Hongkew for a police station we knew by advertisement. That Tunsin is to be taken over on the 1st November was also known. If Mr. Haas's report on the progress made in arranging for the extension of the Markham and New Cemetery-roads had been published, it would have had some interest; but we are not even given an idea of its contents.

The Council's advertisement to borrow Tls. 28,000 on debentures elicited offers of Tls. 138,207, at various rates ; so that there must be some money left in the place still, if it is true, as we are told, that no Banks applied. The allotments were :—Tls. 18,000 at 105½, Tls. 2,000 at 105 1-20, Tls. 7,800 at 105.

Digitized by Google

The annual cricket match between the Racket and Cricket Club has been played; the former sending in a strong team, though still short two of their best men. The betting was considerably in their favour, and they won the match in one innings.

The rival steamer companies running to Japan appear to have come to an understanding at last, and advertise rates of passage-money rather more than 100 per cent. in excess of those which have prevailed for the last six months. The public will congratulate themselves that the understanding was not arrived at till after the summer. Chefoo hotel-keepers will hope that it may be maintained during next summer.

On the 16th Oct., as the M.B. steamer *Tokio Maru* was passing the steamer *Nestor*, which was lying at the wharf with eight or ten loaded ballast boats moored alongside, one outside the other, awaiting their turn to discharge, the wash from the *Tokio's* paddle-wheels caused one of the boats to capsize, two others being damaged, while several broke adrift.

The opium hulks *Ariel* and *Waterwitch* were towed from their moorings on the 16th October, Saturday, at noon, the former to the Old Dock and the latter to moorings below the shipping, preparatory to going to Chinkiang, for use as a hulk by the China Merchants' Company. The removal of these two ships has opened up the appearance of the Bund wonderfully.

Mr. A. Ferguson has bought the stock of the Shanghai Dairy, the business of which will be incorporated with that of the Farm. Excepting, perhaps, the Alipore farm at Calcutta, this will, we imagine, now be the largest institution of its kind in the East; and, judging from our experience of the products of the Farm, we feel sure that those who have been in the habit of getting supplied from the Dairy will have no reason to regret the change.

An important notification to mariners in the China sea has recently been issued by the Customs' Engineer-in-Chief:—A three cwt. fog bell has been fixed on the screw-pile tower recently erected near the *Lismore* wreck (Yangtsz-river, Shanghai district), which, in foggy weather, will be sounded at six-second intervals; the temporary fixed light now exhibited on Ockseu (Foochow district) Island, will shortly be replaced by a first order revolving one, showing white flashes at one-minute intervals; the works on Tsing-seu and Fisher Island (Amoy and Takow districts) are now nearly completed, and the lights will shortly be exhibited.

The British barque *England*, from Singapore to Shanghai, has been lost on the coast of Formosa, 60 miles south of Tamsui. The s.s. *Hailoong* had brought in the shipwrecked crew to Amoy, all lives being saved.

We take the following additional items of intelligence from the *Celestial Empire*:—

H.M.S. *Audacious*, the flagship of Admiral Ryder, arrived on the 20th October at Woosung, from Chefoo. Mr. Wade, Her Majesty's Minister at Peking, and Admiral Ryder arrived on the 17th October from Tientsin in H.M.S. *Vigilant*. His Excellency immediately addressed a letter to H.B.M.'s Consul on the subject of the relations of his Government with China, which has been issued in the form of a Consular notification to British subjects. Messrs. Grosvenor and Baber are to start for Yunnan on the 23rd October.

A very considerable improvement is noticeable of late in the share market. Not only have most stocks risen in value, but they are difficult to procure. It is not strange that there should be few sellers, seeing that holders as a rule cannot sell at a profit. Hong Kong and Shanghai Bank shares have risen from the lowest point to which they were ever depressed, thirty per cent. discount, to thirteen per cent discount. It is believed that the Bank is doing a good local business, and if the directors in Hong Kong confine their operations to legitimate banking business the shareholders have a fair prospect before them. Part of the present appreciation of the stock is probably due to an impression prevailing that some of those securities which have absorbed so much of the Bank's money are improving in value. We are surprised that S. S. N. S. do not improve more rapidly; they are, it is true, some Tls. 3 above their lowest point, but it is difficult to discover any reason for a fall of some 20 per cent. since their last report. As a glance at the Customs' Returns will show, there is a good traffic on the river, and it is understood that what benefits one company is equally profitable to its rival. There are good grounds for believing that the period of greatest depression in shares is past, and we trust it may prove to be so, as the total value of shares in the local joint stock companies gives a very high average per head to the number of foreign residents in China, something like $3,000. At the same proportion in the United Kingdom the investment of capital in joint-stock undertakings would represent 21,000 millions sterling.

We hear of private land sales of some magnitude. Lot No. 11B at the back of the Custon House, in the Hankow-road, has been sold for Tls. 30,000. The land cost, four years ago, Tls. 20,000, and as the Chinese hongs built upon it since must have cost more than Tls. 10,000, the transaction could not have been remunerative to the last seller. On the other hand, the property at the corner of the Maloo and Honan-roads, opposite the Fives Court, sold, with the Chinese houses upon it, for Tls. 45,000; it measures 5m. 2f. against 5 mow 8 fun the size of the other property. This latter is considered a very good sale, and serves to show that the vicinity of the Bund is not the most valuable site for Chinese property. We may therefore hope for a respite ere the parts of the Settlement once supposed to be retained for the residence of foreigners are completely covered with Chinese hongs.

A mysterious robbery has been committed upon somebody. Just outside the Fu-men of Soochow there is a Customs' barrier, and through it there attempted to pass the other day a small boat, having only two persons on board, besides the yuloh-man. It was boarded as usual by a couple of officers, who, finding nothing contraband in the afterpart of the boat, proceeded to search the place where the two men were sitting. Much to their astonishment, however, the passengers offered them two hundred dollars to leave them alone; while their perplexity was increased when, during a fit of hesitation as to whether they should or should not accept the bribe, the suspicious individuals themselves plunged into the water and made for the shore. The officers gave chase, and only succeeded in overtaking one of them; an unfortunate piece of success, for the clever thief, finding himself at bay, turned round, seized his captor by the nose, wrung it violently, and so brought him to the ground writhing in pain. On the boat being searched it was found to contain between four and five thousand dollars in silver and a box full of gold leaf to the value of a large sum. The spoil is now in the hands of the local mandarins, and the thieves are at present free.

With the cool weather the Masonic season has set in with its accustomed severity. The Ancient Landmark Lodge distinguishes itself by electing its officers betimes, and has installed Bro. W. W. Lovett in the Chair. The officers were also invested as follows:- S.W., Bro. G. H. N. Dryer; J.W., Bro. N. B. Hinckley; Treasurer, Bro. J. Shadgett; Secretary, Bro. Thomas Scott; S.D., Bro. M. H. Cook; J.D., Bro. A. Bruse; Tyler, Bro. Hore. No successor has as yet been appointed to Bro. Henry Murray as D.G. Master for China, or rather for North China, as it is hoped the district may be in future.

An addition has been made to the treasures of the Museum in the shape of a bear, which came originally in a sailing vessel from Korea. It found a purchaser on arrival who kept it in his country house for some time, as the Frenchman kept the pheasant which afforded him so much sport during the winter; but eventually shot it. The carcase is now being skinned by the taxidermist.

A Newchwang correspondent writes, under date 14th inst., that "The Chinese traders have returned from the third Korean fair of the year. They apparently realised good prices for Manchester goods, but complain loudly of the squeezes to which they were subjected by both Chinese and Korean officials." In reference to heavy Shirtings more particularly, he states that Chinese ingenuity and deceit—by counterfeiting chops, and the passing off of common for best qualities—have disturbed the Korean confidence in the honesty of the manufacturers. But doubtless the deception will sooner or later be discovered, when the genuine article will probably be placed in a better position than it has ever held before.

(FROM A CORRESPONDENT.)

The notification issued by Mr. Wade on the 17th inst. (Sunday) has taken every one by surprise here and disgusted many. It is a repetition of the old Roman fable of the "Mountain in labour, bringing forth a ridiculous mouse." After a delay of seven solid months since the murder of poor Margary, and the exposure of his head on a pole on the walls of Manwyne, we are now put off with the assurance that Mr. Wade is satisfied with the guarantees given by the Chinese Government. What guarantees? They have given none, except a bare assurance that they will inquire into the matter, nothing about punishing the murderers. Mr. Wade has the effrontery to notify to his countrymen three propositions, which are, to say the least of them, utter fallacies or falsehoods.

1. Mr. Wade says that his negotiations carried on for seven months bore more or less on the murder of Margary. More or less, what does he mean? Was not this the very point that his Government and his countrymen expected him to obtain satisfaction from the Chinese for? Yet he now intimates that it was merely a subordinate item. These are the puerilities on which Mr. Wade has been engaged all the time that his countrymen have been expecting him to demand and obtain satisfaction for a brutal and treacherous murder—a political murder.

2. Mr. Wade professes himself satisfied with the guarantees given by the Chinese Government, and proposes to send Messrs. Grosvenor and Baber to a miserable death by poison or violence in the remote regions of Yunnan, which it took Margary four months to reach by fatiguing and dangerous travelling. I assert that Mr. Wade has received no guarantees from the Chinese Government except verbal ones or written ones, which are both valueless, as Margary was murdered with their *written* protection in his pocket. Yet what did it avail him when it suited them to take his life?

3. Mr. Wade asserts that no agent of the British Government can negotiate a Convention with the Chinese Government without the consent of the other Treaty Powers. Now this is an idea and principle long sought to be established by the Chinese

Digitized by Google

and which Mr. Wade seems to have adopted from them. Did the British Envoy consult them on signing the Treaty of Tientsin? Certainly not. Such a proceeding would lower the position of England, which is an independent Power. The Treaty Powers, as they are called, are merely those nations who came in after we had conquered China, and took the benefit of the concessions we had extorted by force of arms, but what right they can have to dictate to us what we shall do or not do, is to me a profound mystery. The true solution of all this muddle is that the Chinese have been negotiating, and not Wade. He has been made a catspaw of, and he is now put off with specious promises which really mean nothing, and after a delay of another six months or a year some one with a head on his shoulders will have to take the matter up, and bring it to a conclusion.

This expedition to Yunnan is worse than folly, it is criminal. To trust two more valuable lives to Chinese treachery after one has been already basely sacrificed is more than any one could expect from Mr. Wade. But he does not seem to realise the danger he exposes those men to. They go as ordered by him, with their lives in their hands; but woe to him if they lose their lives, as poor Margary did, trusting to Chinese friendship, which has often proved a broken reed. Li Hoo Chang is brother of the man who murdered the rebel leaders after they had surrendered to Colonel Gordon on their lives being guaranteed to be spared. There was another guarantee, such as Mr. Wade is now satisfied with, and on which he relies for their protection. I ask, what did it avail the Wongs, or rebel leaders? what did it avail Margary? They were both cruelly murdered, and their heads stuck on poles for an admiring crowd to look upon. The Chinese Mandarin is the most cruel, rapacious, and treacherous of animals. Place any one in his power, and he is like the tiger, his real nature comes forth.

All English goods have to pay duty twice over on landing, and local squeezes every five miles all through China. Margary found near Yunnan that the people could not buy clothes, owing to the enhanced price caused by these illegal exactions.

To show the working of those lekin taxes, or local squeezes, I may mention the fact that in order to avoid them to some extent, goods intended for consumption in Shanghai or its neighbourhood are sent from Shanghai to Chinkiang, 150 miles distant, and thence brought back to Shanghai by canal, and thus disposed of. This may be denied, but is nevertheless the case, and the same system prevails all over China. When the squeezes become too oppressive on one route another is chosen, and this alone prevents the charges becoming prohibitory to all trade, and when, as Margary found, but one route exists, the exchange of commodities is virtually prohibited by excessive imposts, and the people are left without clothing or any of the comforts of life. It is only the want of leaders that keeps the Chinese quiet under such a Government, and the dread of being massacred by the desperadoes let loose on any offending district, who are accustomed to spare neither age nor sex, but kill indiscriminately men, women, and children. Witness Yunnan, as found by Margary without inhabitants and large cities depopulated. The same can still be observed near Shanghai, where the rebels overran the country. All that the rebels spared were killed by the Imperialists.

FOOCHOW.

The subjoined items of news from this port are taken from the *Foochow Herald*:—

We have not heard of any further arrests in connection with the mutiny and murders on board the German schooner *Anna*, but we understand that great efforts are being made to capture the remainder of the mutineers. The native authorities might endeavour at the same time to unearth the murderers of Mr. Blacklock; it cannot surely be a matter of much difficulty in a country like China. Rebels and other political offenders rarely escape the tender mercies of Chinese law. Why, therefore, should murderers—of foreigners?

H.I.G.M.'s gunboat *Cyclops* arrived in port on the 13th Oct., and anchored off the Settlement. She will, we understand, remain here for a short time, pending the official inquiry into the mutiny and murders on board the *Anna*.

Preparations for the approaching regatta will, we are informed, commence at once. There will be only two "fours" in training. In other respects we understand that the programme will be much the same as last year.

The s.s. *Naples*, a vessel of 3,000 tons capacity, now in port, has been overhauled in the Foochow Dock. We are informed that, notwithstanding her great draught and size, she was docked and undocked with the greatest ease.

HONG KONG.

Our advices by this mail extend to the 28th Oct.; the French mail from London Sept. 10 was received on the 21st Oct., and the following P. and O. mail of Sept. 17 arrived out on the 23rd Oct. The following items of news are from the *China Mail*:—

His Excellency the Administrator's Private Secretary has sent us the following:—"His Excellency desires me to inform you that he has received an official telegram of the settlement of the Chinese difficulties." The confirmation of the news from England that Mr. Wade has satisfactorily settled his negotiations respecting the Yunnan affair places its authenticity beyond doubt. Moreover, we learn that every item of his first demands has been adhered to and obtained. Whatever may be the future results, China and England are at this moment on terms of absolute peace. Mr. Grosvenor will proceed to Yunnan, and the other conditions demanded will be carried out. So far so good. But if we felt impelled, even while the eventual result of the negotiations was uncertain, to point out the peculiar difficulties under which China laboured, we still more strongly feel that it is now both our duty and our interest to fully acknowledge them. China has consented to punish the offenders, but beyond knowing this in general terms we know nothing more. It is of course premature to comment upon the terms of that consent until details are to hand. But we may be permitted to express a hope that, if China shows a real desire to punish the barbarous assassinators of Mr. Margary, she will receive every reasonable aid from ourselves. That aid can only be rendered by British troops sent to the Yunnan frontier, and their despatch on such an errand would be warmly approved both in England and China. A strict enforcement of every detail which the Chinese can carry out without assistance, and the granting of as much support as we can give them where the task is obviously beyond their strength, should be our policy. We have no fear that Mr. Wade will have failed to make arrangements in this sense, though it is more likely that aid has been promised in case of failure than that any pledge of immediate support has been given by him.

In the Supreme Court on the 21st Oct. Chun Ahung, Cheong Wong Tai, Chan Akow, Kwok Amui (female), Chan Mi Shing, Chan Sing Fat, To Alai, and Wong Yung Kwai (female), were indicted for piracy, in four counts; the first charging them with piracy and murder; second, with piracy and assault with intent to murder; the third count was framed under Section 6 of Ordinance No. 1 of 1868, charging the first four prisoners with having in their possession certain things piratically stolen; the fourth count was similar to the last one, the same charge being against the 5th, 6th, 7th, and 8th prisoners.

The Attorney-General opened the proceedings by impressing on the jury the importance of the case, which involved the life and death of the prisoners, and on the great necessity of the most careful consideration on the part of the jurors. After explaining the different counts against the prisoners he proceeded to narrate the facts of the case. On the 24th August last a junk named *Yow-lee*, trading between here and Hoifoong, a place on the East Coast of China, and owned by one Chung Afat, sailed from Hong Kong bound for Hoifoong. On that day she did not proceed farther than the taxing station outside the Lyeemoon Pass, whereat the junk-master paid all duties on the goods he had on board. There were 500 piculs of rice and about 100 pieces of piece goods. The junk remained at the Customs Station until the 26th August, when she proceeded on her way. About sunset that day, when she was more than three miles from the nearest main land, two junks were seen to bear down upon her, and the people on board the latter hailed them, but the response they received was the firing of musket shots at them. The two boats then came near, and the crew of one of them boarded the Yow-lee junk. There were eight or nine of the crew, amongst whom were one Leong Sai Mui, the wife of the prosecutor, one Cheong Apo, his son, aged twelve, and an infant, name unknown. There was also among the crew a man named Lam Alo, who formed the subject of the second count. Besides the crew there were a few passengers, but beyond the fact of prosecutor and the man Lam Alo being known to be alive, the rest were supposed to have perished with the junk, which had been scuttled by the pirates. When the pirates boarded, they drove the crew and passengers into the hold. The captain and his wife and infant were in the after-hold, while Tam Alo, with Cheong Apo, the captain's son, was in the fore-hold. Tam Alo then forced up the hatch, which had been nailed down by the pirates. When he got on deck he jumped into the water to save himself. He had the captain's son on his back, but the pirates struck at him with swords. One blow took effect on the boy, who then lost his hold, went down and was seen no more. Tam Alo got hold of a plank, and was finally picked up by a fishing junk. The Captain, Cheong Afat, jumped into the water, when he heard a cry by the pirates who proposed to kill every one. He was afterwards picked up by the same fishing junk. The two men then came on to Hong Kong. Among the articles stolen there was a remarkable pipe belonging to one of the passengers. The pipe was very peculiar, being made of cactus wood, and valued by the prosecutor at $25. One day a relation of the passengers went on board junk No. 721, and saw the first prisoner smoking the pipe. He at once recognised it and demanded its return. On this being refused, the first prisoner was arrested. While he was being led to the station, he was observed and recognised by the captain. Meanwhile a telegram was sent to Aberdeen to seize the junk in which the pipe was found. Another junk, No. 1,041, was also seized, and in her were found the other prisoners and the things in Court, recognised to have been piratically stolen.

After an elaborate summing up, which occupied nearly three hours, the Jury retired to deliberate on their verdict, and after an absence of about fifteen minutes returned into Court and pronounced the first three prisoners guilty on the first, second, and third counts. The Attorney-General entered a *nolli prosequi* against them on the second and third counts. The fourth prisoner, a woman, was found guilty on the third count, and the

Digitized by Google

fifth and sixth were guilty on the fourth count. The seventh and eighth, a woman, were not guilty, and were discharged. The usual sentence of death was then passed on the first three prisoners, who received the sentence with apparent indifference. The fourth prisoner was sent to five years' penal servitude. The fifth and sixth to ten years' penal servitude each. The seventh and eighth were discharged.

It will be of interest to learn that the first of the three prisoners condemned to death is the same man who was tried for being concerned in the piratical attack on the *Spark*, but was discharged for want of evidence. We may here note, by the way, that the Chinese authorities have shown a very laudable desire to bring the *Spark* murderers to justice, and only the other day one or two suspected men were arrested on the West Coast.

The following regulations under the Naval Stores Ordinance, No. 9 of 1875, made by his Excellency the Adminstrator in Council, are published in the *Gazette* for general information :—

1. The fee for each licence to use or exercise the trade or business of a dealer in marine stores, or a dealer in old metals, shall be $15 per mensem, payable in advance. 2. All persons who shall trade or deal in marine stores or old metals shall have their names with words "Dealer in marine stores, or old metals " painted distinctly, in letters not less than three and a half inches in length on a board to be hung up conspicuously in front of their shops. 3. The said houses may only be open from the 1st October to the 1st April from 6 A.M. to 6. P.M., and from 1st April to 1st October from 5 A.M. to 7 P.M. 4. No article of metal, or any marine store, shall be purchased from a child apparently under fourteen years of age. 5. The name of every seller the house number, name of street, and district in which he dwells, together with an intelligible description of the article and time at which it was sold, with price paid, shall be entered in the books of the shop, which shall be kept in the form and manner herineafter shown in form A—or in such other form as the Governor may direct. 6. No escapes through the roof of a licensed house shall be allowed. 7. No other trade or business shall be carried on in a licensed marine or old metal store.

The P. and O. steamer *Sunda* was raised on the 15th Oct. by the *Bombay*. As soon as she was raised the *Bombay* lashed her alongside, and towed her inshore, where she was beached. The hole in her bottom is twenty feet long by two feet broad. The *Columbian* was left in charge of her, H.M. gunboat *Hornet* being also present to assist in protecting her.

The Chinese authorities have shown their sense of the humanity of Captain Fraser of the P. and O. s.s. *Geelong*, who recently picked up eighteen shipwrecked Chinese and conveyed them to port, in a very gratifying manner. He has received, through H.M. Consul at Shanghai, a letter of thanks from the Taoutai, and a gold medal (kung-pao) specially made for the occasion, which H.E. Li, the superintendent of foreign trade, desires may be handed to Captain Fraser "as a reward and encouragement" for his services on the occasion.

An attempt to induce free emigration to Atchin on terms peculiarly favourable to the emigrants has failed, the Colonial Government discouraging it.

The Supreme Court has decided that the *Peng chao hai*, Chinese revenue steamer, is a "man-of-war," and entitled to the legal privileges of such vessels.

The Chief Justice has rules, in the case Melchers and others *v.* Osborne, that all returns made to agents by way of bonus are fraudulent.

Vice Admiral Ryder is expected here in about three weeks.

The Cosmopolitan Dock has been opened at Kowloong.

CANTON.

The feud between weavers has again broken out. The authorities are at their wit's end to know how to suppress it effectually. It breaks out now and again, and it is very baffling to the Namhoi magistrate. The guild men have a hatred against those who do not belong to the guild, hence the fights do not extend only to open battles in which large numbers are arrayed against each other, but to single individuals wherever they can encounter each other. On the 6th October two men were playing at chess at the side of a pond in Ho-kai, a place lying at the outskirts of Canton. They were observed by a man belonging to the other party ; this man fired at them from the opposite side of the pond, and it happened that a young lad was standing by watching the game of chess. He unfortunately was struck on the head and died instantaneously. The case was reported to the Namhoi magistrate, who despatched some soldiers to arrest the men of the guild to which the murderer belonged. They did not succeed in arresting any one, but they destroyed the lodging places of the weavers.

An important robbery has taken place in the Wong Kong village. The robbers have taken away property to the value of upwards of $2,000. The villagers turned out with the intention of beating them off, but the robbers fired at random, pouring forth bullets in such quantity that they were described to have dropped like rain. This had the effect of confining the villagers to their houses, so the thieves left with perfect ease.

Following the wake of the Hong Kong Government in its attempt to put down traffic in women for immoral purposes, the Namhoi Magistrate has issued a proclamation recently, reminding people of the consequences which follow this wicked trade. His Worship first of all deals with the evils, giving a short account of how such acts were carried out ; he next exhorts people engaged in this nefarious trade to desist from such practices, and finally he warns them of the consequences, observing that vicarious responsibility rests on the neighbours and relatives.

The new Provincial Commissioner of Examination has notified his intended assumption of office on the 16th Oct., when he will take over the seals of office from the Governor, who has been acting at Commissioner of Examination since the death of the last incumbent.

PHILIPPINE ISLANDS.

MANILA.

The *Diario* of the 16th Oct. furnishes the subjoined particulars respecting the Philippine exhibits to be forwarded to Philadelphia for exhibition :—

"We have been informed that at a meeting of the general commission to promote the exhibition of Philippine products at Philadelphia, the catalogue of the articles to be forwarded has been read, and that it includes what has already been received from the various provincial committees, and also a few other products which will have to be procured to complete the collections. The better prepared or more complete portions are, so far, those which proceed from official sources, such as a forest collection abounding in specimens of every kind of forest produce, and which has been prepared by the Inspectorate of that department; an assortment of all descriptions of leaf and prepared tobacco, which is a splendid one and has been carefully arranged in the central collecting office; other suitable assortments from the departments of mines, instruction, and public works ; collections of many sorts of raw fibrous materials from the silky *lupiz* to the tough and rough *cabo-negro*; of the various sorts of rice, of potherbs, and oil seeds; of drugs and other medicinal articles; of the many and varied manufactures of cotton, pine apple fibre, hemp, *jusi*, and mixed fabrics ; and a multitude of articles more or less curious, either the product of art and labour, or the spontaneous produce of this country. The same general commission has charged a sub-committee to draw up the definitive and detailed catalogue which is to accompany the articles when forwarded in the first days of January, and to see to the packing cases and other appropriate matters, because what was read the night before last, at the meeting of the commission, had been drawn in haste, as we believe. This catalogue is to be arranged in generic groups in the order fixed in the programme of the Exhibition at Philadelphia, and with the intention that it might be forwarded by next mail. in accordance with what is notified by the managing committee, perhaps in order to be widely diffused and translated into different languages. There is yet time to receive articles, and it is to be hoped that from this city, when, above all, the name of the person who is to go to Philadelphia with the aforesaid commission, if any be named, becomes known, valuable exhibits may be forwarded of those articles which their owners wish to see returned or sold on condition on security being given to them for their value, which is a very just claim. We say so, because we do not know yet whether there have hitherto come forward at Manila other than the aforesaid official departments, and some educational establishments. There are here many industries which are of great importance for the quality and special character that mark them out, for the value they represent, for the number of hands employed and the families supported by them. It is necessary that these manifestations of productive labour and intelligence should make their appearance on this occasion by claiming their due place in public notice, and which will enable them to avoid being injured by official measures taken in forgetfulness of their existence. Of this we had recently an example.

After alluding to a report that the Philippine products colected would be exhibited in Manila before being forwarded to Philadelphia, the *Diario* concludes by pointing out the necessity of sending as commissioner to the latter city a gentleman fully acquainted with the English language, and possessing local experience and general acquirements.

In the *Diario* of the 8th October there is the following regarding the Manila lottery drawing held in that month :—Part of the $3,000 prize of the last drawing fell to a Chinaman who last year was favoured with $1,500, for which reason he has gone to his own country, from which he had returned only a short time ago. The public does not yet know who is the happy mortal favoured with the $15,000 prize.

The British bark *Radee* caught fire at Manila on the 17th October, and was scuttled in five fathoms. The cargo, consisting of 10,000 piculs sugar and 4,000 bales of hemp, is a total loss. The ship is to be raised.

SIAM.

BANGKOK.

The Bangkok *Advertiser* has the following :—

A Siamese Museum is an accomplished fact ; we give an interesting article by Mr. Alabaster, furnishing a detailed description of this commendable Siamese Institution. As he is now in the Siamese Government employ, we can reasonably look for much that will be really useful and elevating, that will be the result of his superior skill, taste and talents.

Twenty-three images of Budh in commemoration of the birthdays of H.M. the present King, were placed in one of the throne rooms in the palace. Religious services were performed in honour of them, the priests went through their rehearsals, were

Digitized by Google

fed and received presents as usual, when these idols were dedicated. It will seem odd that so intelligent a Sovereign as the present King of Siam continues to pay homage to idols, when he has become enlightened enough to demolish prostrations and devotional adoration to living intelligent human beings.

Ayuthia, the old capital of Siam; by recent advices from this region, we hear that certain Chinese, claiming British protection and the possession of British licenses, are retailing, in small boats in various parts of the city, foreign and contraband spirits. That the bulk of the Chinese in Siam are unscrupulous enough to claim foreign protection, and, under shelter of that awe-inspiring protection, would dare to retail foreign and contraband liquors, we can readily believe, but we are not willing to entertain for a moment the thought that Mr. Knox, H.B.M.'s Consul will ever receive from such unscrupulous persons remuneration for licenses to engage in any contraband traffic. If there are such infractions of law in Ayuthia by Chinese who are registered, and are legitimately entitled to British protection, and who are subject to British jurisdiction when properly brought to the notice of H.B.M.'s Consul-General, the Siamese, we are sure, will receive substantial justice, if it is proved they are being imposed upon. The Siamese can hope for nothing, however, if it be proved that they are designedly striving to restrict the rights and privileges of British subjects.

JAVA.

—o—

(Translated for the *Straits Times*.)

The Batavia *Dagblad* contains the following Atchin news :—

"From the Colonel of infantry temporarily charged with the functions of civil and military commanding officer, the following telegram has been received :—'Hitherto the enemy have not given effect to their intention of attacking, they being probably deterred by our great watchfulness. The soldiers are vigorously working at the railroad. State of health favourable.'

"Our correspondent at Kotta Rajah writes to us as follows :—The enemy are becoming bolder every day and endeavour in every possible way to force their way through our line of outposts. A few days ago the Atchinese crept up to our fort at Blang Choot. They had approached it to within 30 paces before they were discovered. The circumstances were as follow. During a pitch dark night they began to fire upon the fort in front. When this fire became troublesome and gradually came nearer, they were answered by the whole garrison from the attacked front, whereby the other faces of the fort were left undefended except by the sentinels. Whilst the firing in front continued to be kept up, the enemy despatched another party to surprise us on the opposite side. This party marching round did not fire, and as the night was very dark, succeeded in approaching the fort to within 30 paces. The white head dresses of the persons composing it were then perceived by the sentinel, whereupon half of the garrison proceeded to the threatened face. After two hours' firing, the attack could be said to be beaten off."

The following account of a ferocious foray of fanatical desperadoes and assassins at Menado, Celebes, is given in the Java papers :—Three prahus covered with kadjangs arrived at Menado roadstead (Celebes) from the westward, and made for the beach, where forty-eight men all dressed in white, with red girdles and head dresses, and armed with spears and Klewangs, disembarked from them. After uttering a short prayer and performing a war-dance on the beach, this band entered the town dancing and shouting out verses from the Koran. The military commandant of Menado saw the war-dance from the fort there, but these above mentioned preliminary proceedings did not arouse his suspicions, owing to the frequency of visits to Menado by or on account of native rajahs. The objects had in view by the band first appeared when they killed and wounded several persons in the market place. All at once the cry of amok was raised, and a portion of the desperadoes was perceived marching upon the fort just in time for the commandant of the same and a medical officer to run to the gate of the fort and close it, and thus to avert the greatest danger. The assailants began then to batter in this gate, but being deterred by loaded cannon pointed at them, and being greeted with musketry by the garrison, they soon relinquished their design, and thereupon rejoined their comrades and repaired to the house of the Resident, shouting and uttering threats, and wounded several persons on the way thither.

On this subject the Batavia *Handelsblad* says :—"Three steamers are leaving for Menado with troops in order to chastise the disaffected and reiractory in the neighbourhood of that district. The Government has not let matters there pass unnoticed, and did well on this point, for it is reported that the state of things there is not so unruffled as many appear to believe."

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 4th Nov.; the P. and O. mail from London Oct. 1 was received on the 31st Oct. We take the following items of intelligence from the *Straits Times*:—

At the meeting of the Legislative Council on the 29th Oct. Sir William Jervois made his promised statement regarding the condition of Perak and Laroot and the policy of this Government in dealing with those States. This statement, which will be found in full in another part of this paper, explains at length His Excellency's recent action and the causes that have led to the adoption of a more definite control over the administration of the Government in Perak. It appears that the leading Perak chiefs, including the Heir-apparent to the Throne, and the people generally, tired of the misrule under which they have so long suffered, and anxious for the intervention of the British Government to relieve them from oppression and from that most degrading of all bondage, debt slavery, which we learn for the first time from H. E.'s statement prevails in Perak to such an extent that it has grown to be regarded by the people as a Malay custom. Although the important step that has been taken meets with the hearty approval of every one here, and must commend itself to all interested in the welfare of this Colony and of the Native States, it must be borne in mind that Sir William Jervois has so far acted in this matter without the authority of the Home Government; and although, while making this avowal, he says that retrogression or progression, according to the views of Her Majesty's Government, can without difficulty be effected, it is clear that any retrograde step will seriously embarrass this Government in its dealings with the Native States, and probably prove fatal to British influence over the native rulers. It is, therefore, of vital importance that his Excellency's action should receive the unqualified approval and support of the Home Government.

The question of the liability of this Colony for the half-salary of Sir William Hackett, Judge of Penang, while on extended leave of absence establishing a judicial system in Fiji, is exciting public interest here. The Secretary of State for the Colonies, in a despatch on this subject, has directed the payment of this money, and when the item came up for discussion in the Estimates for 1876, the unofficial members of Council made a formal protest against the vote, on the ground that it was diverting the funds of the Colony for Imperial purposes, and establishing a dangerous precedent. In assuming this position, the unofficial members but echo public opinion in the Colony; and the question has been raised whether one Judge is not sufficient for Penang.

Attached to the Minutes of the Legislative Council is a protest, signed by all the unofficial members, in reference to the Secretary of State's action in detailing the Judge of Pinang to the Fiji Islands. It is clear that Sir William Hackett, in drawing his half-pay, or whatever he does draw, from this colony while absent from his post, doing duty elsewhere and getting paid for it, is doing neither more nor less than obtaining money under false pretences, for which, as judge, he should be the first to sentence himself. We might say a good deal about the injustice to Pinang and to the puisne judge there, but we refrain. What Sir William Hackett ought to have done at the first, and what he should do now, or what he should be called upon to do without delay—Secretary of State's orders to the contrary notwithstanding—was and is to resign at once his appointment as Judge of Pinang.

An interesting letter appears in the *Penang Gazette* of 28th October from Captain Bowers, R.N.R., in command of a local steamer, in which he gives some valuable particulars of the newly created protectorate at Perak. He considers the system of thus affording protection to native Rajahs one of those doubtful measures that subsequent experience will prove to be an error. His reasons for thinking so are that the Perak Rajahs, being entirely ignorant of the very first principles of government and being unable to govern their own unbridled lusts and impulses, and holding but very crude and imperfect notions of right and wrong, and in addition, being imbued with the traditions and superstitions with which they have been associated and surrounded from their childhood, all these influences militate against the possibility of a successful Government carried on jointly by British officers and Malay chiefs. He speaks in much more hopeful terms of Pulu Pancore and the Ding Dings newly-acquired possessions, and notices the impetus which has been given to trade at Laroot from the excellent roads which have been made since it has come under British rule.

At the adjourned Criminal Assizes held this week, the thirteen coolies charged with piracy on board the British schooner *Hawk* were tried by a special jury, and found guilty on the first count. The prisoners had engaged, with others, to go to Deli, and having received an advance of wages after going on board the schooner, rose against the crew, and it is believed, murdered several, drove the rest overboard, and then ran the schooner ashore on the Johore coast. They were sentenced to fifteen years' penal servitude.

The first day's races of the Autumn Race Meeting were run on the 2nd November. The races are so far very good, and there is every prospect that the meeting will be a great success.

The Portuguese congregation of Singapore assembled in force on Sunday last at the Parochial House of the Portuguese Church of St. José, and presented an address to the Rev. Father Cus-

Digitized by Google

todio Marcal de Souza, who proceeds to Goa by the present mail, after a residence at Malacca of upwards of ten years as Coadjutor to the Vicar General of the Portuguese Mission in the Straits. The presentation of the address took place immediately after a special solemn High Mass.

The following notification appears in a *Government Gazette Extraordinary*:—

His Excellency the Governor has been pleased to appoint, in conformity with the terms of the Proclamation dated the 15th October, 1875, Mr. James Wheler Woodford Birch and Mr. James Guthrie Davidson to be temporarily Acting Commissioners of Her Majesty the Queen, to administer the Government of Perak in the name of the Sultan, and under his Excellency's instructions. In the absence of Mr. Davidson Mr. F. A. Swettenham will act temporarily as Resident in Salangore.

A cricket match has been played between the Royal Artillery, with Mr. Anson as captain, and the Singapore Cricket Club. Notwithstanding the absence of one or two during the first innings, the eleven of the Club won by six wickets.

The Singapore Rifle Association have held another lively competition at the Rifle Range. There were no less than 70 competitors, and the prizes distributed amounted to $30, of which $10 was contributed by Col. Crowe, V.C. The competitors had each five shots at 200 and five at 400 yards, and the highest possible score obtainable was 40 points, or 10 bulls' eyes, of which Sub. Lieut. Drennan scored 36, getting 8 bulls' eyes and 2 outers.

Two well-known sportsmen saw unmistakable footprints of a large tiger leading across the Seletar road, within about 200 yards of the police station at the 9th mile stone.

THE MURDER OF MR. BIRCH.—FIRST ACCOUNT.

(Penang Gazette.)

Late on the evening of the 3rd Nov. the steamer *Pluto* anchored in Penang harbour. Not being expected, some wondered what had brought her up; little did any one suspect, however, that she was the bearer of such terrible tidings as it turned out she was. The purport of these tidings did not become generally known till next morning, and they were to the effect that Mr. J. W. W. Birch, H.B.M.'s Resident, had been cruelly murdered on the Perak river, and great fears were entertained that Mr. F. Swettenham had met with the same fate. The following is all the information in the possession of the Government on the subject, as reported by the captain of the *Pluto*:—

It would appear that on the 30th October Mr. Swettenham proceeded up the Perak river from the Residency at Bandar Baru, with a number of proclamations (notifying to the inhabitants that the Government of the country had been undertaken by the British) for distribution in the upper part of the country. On the 1st Mr. Birch followed, accompanied by Lieutenant Abbot, of H.M.S. *Thistle*, a Malay interpreter, named Ashad, and a guard of policemen; in the afternoon the party anchored at Tanjong Esta, and Lieutenant Abbot went out shooting. The interpreter was ordered to post up some of the proclamations referred to above, which he did accordingly, while Mr. Birch was bathing in a floating bath house near the boat which conveyed the party, his servant was standing outside with his clothes, and he describes what next happened to be as follows:—Some Malays came up and told the interpreter not to put up the placards, and on being answered by the latter thrt he was obliged to obey the Resident's orders he was thereupon krissed at once. and falling back into the river from the bank he was standing on, he was got into the boat where he expired. The Malays then proceeded to the bath house, where they appeared to be krissing Mr. Birch the servant on seeing this jumped into the boat. In the meantime, Lieutenant Abbot, who was returning to the boat, was met by a Datu, who warned him that he had better not proceed further; he however took no notice of the warning, but went down to the river side, where he found the boat on the point of departure, with apparently nobody guiding it; he jumped in, not knowing what had happened, but as soon as he got into the boat shots were fired upon him from all sides, and all the way down to the Residency he was continually being aimed at from both banks of the river. He however escaped unhurt, taking with him the dead body of the interpreter and a few men who were seriously wounded (one has been brought up to hospital here); the boat which brought down the party is reported as nearly riddled by bullets. Captain Welner, of the *Pluto*, who was at the Residency, started for Penang immediately with the sad tidings, leaving Lieutenant Abbot in charge with four blue jackets, and as the *Pluto* proceeded down the river she sent up all the police guards stationed at the different stations to assist Lieutenant Abbot in case he was attacked. The s.s. *Kiddah* was sent to Laroot to warn Captain Speedy of what had happened. Nothing whatever had been heard of Mr. Swettenham. We now come to a sad part of the story. It would appear that Mr. Davidson, the Resident at Klang, had got an inkling of what was going to happen, for he sent an express boat with a despatch to Mr. Birch to inform him that disturbances had broken out in Klang, and that Rajah Masshoor, of that place, a supporter of the rebel Mahdie, was in Perak fomenting disturbances, and recommending his immediate arrest. This note arrived too late to catch Mr. Birch by about six hours. On its arrival, a party started from the Residency to overtake him, but they had scarcely got under way before they were met by the boat returning with the story of Mr. Birch's murder. Such is the brief history, as reported here, of this painful affair. To comment on it at present would be unbecoming and premature; but we cannot avoid stating that, among those who were acquainted with the Rajahs of Perak, the event was scarcely unexpected, as it is only in keeping with their proverbial treachery, and the natural consequences of a policy which treats ignorant and consequently faithless savages on a par with civilised men. The result of this policy being that we have encouraged them into the belief that we are afraid of them and consequently led them into committing murder.

There appears to be a deep rooted conviction that the Mantri of Laroot is seriously implicated in the disturbances in Perak, and it behoves the Government to spare neither trouble nor money, or waste a minute till they have made a searching investigation as to his complicity, and if anything can be proved against him he should be treated as an ordinary felon and not as a State prisoner, considering that he can lay no title to the privileges of a Sovereign Prince. Since the above was in type we are glad to be able to state that Mr. Swettenham is reported by Capt. Speedy to be safe at Qualla Kangsa.

Commercial Report.

(For dates see first page.)

IMPORTS.

HANKOW.—Business during the fortnight had been entirely confined to Grey Cottons, and of these sales of all kinds amounted to only 5,280 pieces.

SHANGHAI.—Piece Goods: There had not been much improvement in business. The aggregate was considerable, but the range had been limited, confined principally to 8¼ lbs. Grey Shirtings, Drills, and Velvets, and, on the whole, the buyers had had the advantage. Grey Shirtings, 8¼ lbs.: Some respectable transactions had taken place since last mail; the leading ones being 7,000 pieces of Mendel's Pillar at Tls. 1.68 per piece, 50,000 pieces Collie's Lion sound and mildewed at Tls. 1.71 proportion, and 10,000 pieces of Dewhurst's Eagle at Tls. 1.90 per piece. Besides, Lie Eagle and the commoner grades had been taken up, whenever found, mostly at the old quotations of Tls. 1.65 per piece.

FOOCHOW.—Lead was quoted at $8½ per picul cash.

HONG KONG.—There had been a fair business doing in yarns, especially Nos. 16 to 24, at a slight reduction in prices. Piece-goods were quiet, but prices were well maintained.

CANTON.—Lead: Prices for L B remained unaltered, small sales being made at $8.25 to $8.30; the quotations for W B was reduced to $8.30 to $8.35. Quicksilver: Prices had fluctuated during the fortnight, but closed at last quotation, $110 per picul.

BANGKOK.—18-24 Grey Yarns were in small supply, and were wanted for the time at 5 ticals advance. American Drills were also in some inquiry, while for Staple Grey and White Goods there was a very small business doing.

BATAVIA.—The "Exchange" Circular says:—Great dulness has again been the characteristic of our market for cotton goods during the past fortnight, and our remarks can be but little else than a repetition of last reports. Day by day a weaker feeling prevails, and even at a further reduction in rates no sales of any importance are practicable. Requirements for consumers appear to be extremely limited, and, owing to the impoverished state of the mass of the native population, no improvement can be expected for some time to come.

SINGAPORE.—Messrs. Boustead's Circular says:—Piece Goods: A moderate business was transacted for a few days after our last advices, but the market has since become extremely inactive. Grey Shirtings have been little dealt in, and quotations are easier. T Cloths are less inquired for, and stocks have increased. White Shirtings of fine qualities have continued fairly active. Medium reeds are still quiet, and stocks are excessive. White Cambrics are dull of sale. 40's Grey Yarn has been dealt in to some extent, but closes very quiet. In Woollens nothing of interest has been done. Iron continues in very limited request, and without change in prices. Copper Sheathing meets with very little demand. Yellow Metal has been more inquired for, and rates are slightly firmer. Zinc Sheathing and Roll Zinc have been quiet. Pig Lead and Sheet Lead are out of stock, but there is very little inquiry.

PENANG.—The market had continued without any improvement, the inquiry during the fortnight had been exceedingly slack, and the business done had been hardly sufficient to test prices.

EXPORTS.

—o—

TEA.

HANKOW.—The Chamber of Commerce Circular says:—Transactions for the fortnight have been on a limited scale; prices throughout have ruled steady. Settlements for the fortnight are 2,204 chests. Shipments on native account 4,226 chests. The prices paid are as follows:—Oonfaas and Oonams: Common to fair 10¼d. to 1s. 1½d. per lb., Seang-tams 9½d. to 10d. per lb. Oopacks: Common to fair 10¾d. to 1s. 1¾d.

KIUKIANG.—Black Teas: One chop of Ninchow had found a purchaser at Tls. 16¾ per picul. Total arrivals; 173,367 chests. Green Teas: Total arrivals 78,438 half-chests.

SHANGHAI.—Black: A steady inquiry for Congou during the for

Digitized by Google

ight had pretty well cleared the market. Teas, at Tls. 17 to 20 had, in some cases, been sold on easier terms. Settlements since last English mail had been 12,668 chests; stock, 6,000 chests. The following prices had been paid:—Oonams and Oonfaas, Tls. 13¾ to 17¼; Hohows and Ningchows, Tls. 14 to 21½. Green: The demand for country teas had been only moderate. Some purchase of medium quality showed a decline of Tls. 2 per picul, and there was certainly an average drop of Tl. 1 per picul on the value of such kinds. Finest chops were not cheaper. Pingsueys were not cheap, and there had rarely been more doing in them. Profits having been advised on some of the early shipments, buyers had lost nothing in replacing their purchases, though the quality offering was inferior. The stock of green teas continued large, and the market was weak. Settlements since last English mail had been:—Fychow, Teenkai, and Moyune, at Tls. 19 to 34½; Pingsuey, at Tls. 21¼ to 37¾; total, 24,287 half-chests; stock, 90,950 half-chests. Export to Great Britain (exclusive of lost cargoes):—

	1875-1876.		1874-1875.
Black	58,313,261 lbs.	against	59,940,073 lbs.
Green	3,247,363 „	„	5,249,104 „
Total	61,560,624 „	„	65,189,177

FOOCHOW.—Messrs. Olyphant and Co.'s Circular says:—A steady though rather smaller business has continued to be done in Congous, of which the further purchases reach 32,158 chests. All good common and flavoury chops have fully maintained previous values; ordinary and low common classes are however selling at from a half Tael to one Tael reduction in price, and, being in large supply, are not so very firm as the grades above. Arrivals for the fortnight are 25,850 chests; stock on offer, 70,545 chests. In Souchongs there has been no change of values. A fair business has been done at from Tls. 16.3 to 40.8 o. b.; the settlements amount to 2,000 chests, and the stock is reduced to 1,659 chests. Only cargo grades of Ooloong have been purchased in the interval. Settlements amount to 4,530 half-chests at Tls. 17.05 o. b. for common to Tls. 19.8 o. b. for Flavoury, showing in some cases rather better value. The stock is reduced to 8,969 half-chests, and further arrivals are likely to be of small amount. About 5,000 boxes of Scented Teas have been settled at rates which have lately shown a small advance. Eighty chests of Flowery Pekoe were taken at Tls. 19.8 o. b.

AMOY.—Amoy Oolongs, settlements of 10,000 half-chests of cargo grades had been made at reserved prices but supposed to be on a basis of $21 for good cargo, and $23 for superior. Amoy Congou: purchases of spurious mixed leaf had been made to a considerable extent at low rates and the remaining stock was almost entirely composed of this description. Formosa Oolongs—Settlements showed little change on previous purchases, but the market appeared somewhat weaker.

CANTON.—Messrs. Deacon and Co.'s report says, a fair business has again been transacted in Tea, and, as will be seen below, advanced rates have to be quoted for some classes. Teamen appear to have every confidence in the present firmness of the market, and have been eagerly buying leaf in the country at hardening prices. Scenting flower has, during the fortnight, been rather scarce and dear, but latterly milder weather has set in and fair supplies are now coming to hand. *Congous*: Contract teas have again formed the principal portion of the shipments; purchases on the market can be made on much the same basis as those of two weeks ago. *Scented Teas*: Capers continue in demand, and an active business has resulted, inquiry chiefly being for the better grades from Taels 20 and upwards, prices for these have advanced during the fortnight Tls. 2 per picul, while the lower classes can still be bought at last quotations. Although teamen are still demanding very high rates for teas with any quality, yet buyers at the close do not evince so much anxiety to continue operations at the advance recentlo paid. High prices have been ruling for fine Pekoes and choice parcels command extreme rates, good to fine teas, though we do not quote any change, have in some instances been bought on rather easier terms. The purchases reported below are composed entirely of "long leaf" kinds. *Canton Greens*: There have been no settlements. The following is a summary of the fortnight's business:—Congou, 7,100 boxes at Tls. 17 to 20 per picul; Scented Caper, 18,000 boxes at Tls. 16 to 27 per picul; Scented Orange Pekoe, 5,000 boxes at Tls. 20 to 38 per picul.

SILK.

SHANGHAI.—A steady but not active inquiry had existed, some 3,000 bales changing hands during the fortnight. Although most descriptions had participated in the demand, a preference had been shown for Common Tsatlees and Mid. to Common Kahing Tasaams, the latter on account of light supplies gradually improving in value. Unsold Stock estimated at 15,000 bales. The American mail steamer Oregonian, despatched on 14th Oct., took 372 bales Re-reels for the States, at prices ranging from Tls. 325 to 415 for Hainings, and Tls. 320 to 390 for Tsatlee descriptions. The present P. and O. mail steamer takes about 1,500 bales.

CANTON.—Messrs. Deacon's Circular says:—This article was in fair request in the early part of the fortnight, and over 600 bales were settled prior to departure of last French mail; since then the demand has considerably subsided, and only 260 bales are reported purchased during the past week. The greater part of the settlements have been Nos. 4 and 5 Tsatlee, but there have also been transactions in fine kinds. Prices for all sorts remain unaltered, and No. 4 is still quoted $322½ to $325 per picul. Sixth crop samples are expected in about ten days. A large proportion of yellow thread is looked for, and the yield is estimated at 1,000 bales. Loong-kongs: Only common sorts are in stock. The demand for fine Silk of this description has been so limited for some time past that the natives have taken to reeling it like Tsatlee; hence the scarcity of fair and fine staple. Long-reels have been bought to extent of 100 piculs and 50 bales for India. Re-reels: 1174 boxes are the only settlements reported, Stock is estimated as follows:—Tsatlee 1,000 bales, Loongkong 30 bales, Kowkong 100 bales, Cumchuck and Lucklow 100 bales, and inferior 200 bales. Waste: 200 bales have changed hands.

TELEGRAMS FROM THE FAR EAST.

THE DISTURBANCES AT PERAK.

(TIMES' TELEGRAMS.)

MOULMEIN, NOV. 30.—The Indian troops arrived at Penang on the 26th, and marched through Larut to Quallakangza, meeting the Perak force. Sultan Ismail probably will prove friendly. The General leaves with the Perak force for Quallakangza. On the 28th, the Governor of the Straits Settlement left Perak. He remains at Penang.

(REUTER'S TELEGRAMS.)

PENANG, NOV. 26.—The Governor of the Straits Settlements has gone to Perak. The British war vessels are blockading the coast, and the Malays are reported to be enduring great privations. It is not expected that the British troops will meet with any serious resistance.

RANGOON, NOV. 23.—General Colborne, with the troops from Hong Kong, has arrived at Perak. The Government of the Straits Settlements has issued a pacific proclamation. Hostilities are suspended pending the Chiefs' answer and the arrival of reinforcements from India.

PENANG, NOV. 29.—Graham, the man-servant of the late Mr. Birch, who was captured by the Malays after his master's murder, has escaped and returned to Perak. He reports that Rajah Lela is forming strong stockades higher up the river, and declares that the Malays will resist to the uttermost, and only yield from starvation. The Governor of the Straits Settlements is now at Penang. The preparations for attacking the Malays in force are actively progressing.

THE YUNNAN MISSION.

(REUTER'S TELEGRAMS.)

SHANGHAI, NOV. 26.—Sir Thomas Wade, the British Minister, has left here for Peking. A traveller arrived from Yunnan reports that on his return journey he met Mr. Grosvenor's mission, and warned the party that large bodies of troops were massed near Yunnan, and that resistance to investigation might be expected.

RUSSIA AND CHINA.

BERLIN, DEC. 4.—The native tribes in the Chinese province of Jli, on the banks of Lake Balkash, whose country was temporarily occupied by the Russians in their war with the Dungans, have petitioned the Czar for permanent annexation. The petition purports to be signed by all adult men of the tribes, and is couched in very ardent language. The petitioners say that Russia is a country of order and general prosperity, where robberies, plunder, murder, and the like are unknown. The tribes of Jli, if the prayer of the petitioners were granted, would form part of the great and happy Empire, and they promise to be orderly and submissive, and true to their new Sovereign.

CHINA MARKET REPORTS.

(REUTER'S TELEGRAMS.)

HONG KONG, NOV. 25.—Cotton goods very little doing. Grey Shirtings, 8¼ lb., $2.47½; 16-24 water twist, $103. Tea: Canton, fair inquiry; Foochow, quiet. Total exports from China and Japan to United Kingdom from 1st June to date, 138,000,000 lb. Exchange on London, six months' bank bills, 4s. 1d.

SHANGHAI, NOV. 25.—Cotton goods dull and drooping. Grey Shirtings, 8¼ lb., Tls. 1.9.0. Tea: little doing; good demand for fine; inferior medium neglected. Silk weaker; No. 3 Tsatlee, Tls. 390; blue elephants, Tls. 325. Exchange on London, six months' bank bills, 5s. 7½d.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BOWRING—On the 30th Nov., at 18, Robertson-terrace, Hastings, the wife of John C. Bowring, Forest Farm, Windsor Forest, of a son.

BRUCE—On the 15th Oct., at Singapore, the wife of Commander John Bruce, of H.M.S. *Fly*, of a daughter.

BOFFEY—On the 12th Oct., at Hong Kong, the wife of Mr. Wm. Boffey, of a son.

CALDWELL—On the 14th Oct., at the "Hermitage," Hong Kong, the wife of Daniel Edmund Caldwell, of a daughter, still-born.

CALLENDER—On the 25th Nov., at Summerhill, Didsbury, near Manchester, the wife of Arthur William Callender, of a son.

DUNLOP—On the 20th Oct., at Colombo, Ceylon, the wife of James Vetch Dunlop, of a son.

HILLIER—On the 28th Nov., at Eynsford Lodge, Upper Tulse-hill, S.W., the wife of A. Walter Hillier, prematurely, of a son.

HUTCHISON—On the 23rd Oct., at Canton, the wife of Alfred Hutchison, of a son.

LINES—On the 15th Oct., at Shanghai, the wife of Mr. Alfred J. Lines, of a son.

PIKE—On the 5th Oct., at Hankow, the wife of C. H. Pike, Imperial Customs, of a son.

PIRKIS—On the 1st Oct., at the British Legation, Peking, the wife of Albert E. Pirkis, of a son.

POTTER—On the 10th Oct., at Nagasaki, the wife of F. A. Potter, of a son.

SOLOMON—On the 29th Oct., at Jamestown, St. Helena, the wife of Saul Solomon, of a son.

MARRIAGES.

DEIGHTON-BRAYSHER—COLLETT.—On the 21st Oct., at the Cathedral, Shanghai, by the Very Rev. Dean Butcher, Charles Deighton-Brayshер, of H.I.C.M. Customs service, to Catherine Anne, second daughter of the late Rev. Woodthorpe Collett, Vicar of Brightwell, Suffolk.

GOULD—GLOVER.—On the 12th Oct., at the British Consulate, Shanghai, afterwards at Union Chapel, by the Rev. Jas. Thomas, John Gould to Kitty Glover.

HAWTREY—PARR.—On the — Nov., at Hong Kong, Montague Hawtrey, of Shanghai, second son of the Rev. Montague Hawtrey, Rector of Rimpton, Somerset, and Prebendary of Wells, to Constance Maude, youngest daughter of the late Captain Robert Parr, 54th Regiment.

JACK—WRIGHT-CASS.—On the 21st Oct., at Union Church, Hong Kong, by the Rev James Lamont, John Jack, to Hannah Keziah Wright-Cass, daughter of the late Thomas Cass, of Jersey.

MCDIARMID—HOSACK.—On the 2nd Dec., at Wallasey Church, by the Rev. Chancellor Espin, assisted by the Rev. R. B. Billinge, John McDiarmid, Prince's-park, Liverpool, to Minnie, eldest daughter of James Hosack, of New Brighton.

SPARKES—LEVICK.—On the 21st Nov., at the British Consulate, Suez, T. C. Sparkes, P. and O. Company's service, son of the late Capt. Sparkes, H.E.I.C.S., to Mary, third daughter of Henry Levick, H.B.M. Pacha et Agent, Suez.

TOWELL—HODGIN.—On the 24th Nov., at Christ Church, Waterloo, by the Ven. Archdeacon Jones, Rector, assisted by the Rev. H. Burrowes, Marcus Edwin Towell, Imperial Maritime Customs, China, to Mary Elizabeth (Minnie), only daughter of the late George Hodgin, of Ogden Hall, Cheshire. No cards.

DEATHS.

HOLMES—On the 17th Oct., at Shanghai, Charles William Vinton, son of Edmund R. Holmes, aged 1 year and 9 months.

LEWIS—On the 22nd Oct., at the Consulate, Penang, William Thomas Lewis, Siamese Consul at Penang, aged 85 years.

PETER—On the 24th Nov., at his residence, North Bank, Regent's-park, in the 76th year of his age, Robert Herries Peter, son of the late Sir John Peter, formerly Consul-General for the Netherlands.

SCHMIDT—On the 20th Oct., at Shanghai, Niels Christian Schmidt, of the Great Northern Telegraph Co.

STOPFORD—Previous to the 14th Nov., in China, of heart disease, Commander Grosvener Stopford, R.N., of H.M.S. *Hornet*.

THE MAILS.

PRESENT INWARD MAIL.—BRINDISI, DEC. 2.—The P. and O. Company's steamer Hindostan arrived here at 9 P.M. to-day with the homeward India and China mail.

HEAVY PORTION OF PRESENT INWARD MAIL.—PORT SAID, DEC. 4.—The P. and O. Company's steamer Nizam left here at 3, P.M. for Southampton, with the heavy India and China mails.

NEXT INWARD MAIL.—SUEZ, DEC. 1.—The Messageries Maritimes steamer Ava, with the inward French mails from China and Japan, left here to-day for Marseilles, where she may be expected on or about the 8th inst.

INWARD MAIL, DUE DEC. 20.—GALLE, NOV. 27.—The P. and O. Company's steamer Kashgar, from China, arrived on the 24th inst. The Poonah leaves for Suez to-day. Australian gold for Europe, £220,000.

INWARD MAIL, DUE DEC. 27.—GALLE, DEC. 3.—The Messageries Maritime steamer Tigre, with the homeward French mails from China and Japan, left here to-day for Aden, Suez, and Marseilles.

LAST OUTWARD P. AND O. MAIL.—SUEZ, DEC. 4.—The P. and O. Company's steamer Malwa left here at 9 A.M., and the Gwalior at 10 A.M. to-day, for Calcutta and Bombay respectively, with the India, China, and Australian mails, of the 18th—26th November.

DUTCH OUTWARD MAIL.—SOUTHAMPTON, DEC. 1.—The Nederlands Company's Royal Mail steamship Koning der Nederlanden sailed this morning for Padang, Batavia, Samarang, and Sourabaya, carrying the Dutch mails, specie, 95 cabin passengers, 150 Dutch troops, and a full general cargo.

OUTWARD MAIL OF NOV. 5.—GALLE, DEC. 1.—The Messageries Maritimes steamer Meikoing, from Marseilles Nov. 7, left here to-day for Singapore.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Dec. 1, at Rochester, from Rangoon, Maria, Rickmers ; at Ryde, I.W., from Bassein, for Bremen, R.C. Rickmers ; 3, at London, from Manila, Dorothea ; 4, at Liverpool, from Rangoon, Mic Mac ; 5, at London, from Shanghai, Quang-Se (str.), at Falmouth, from Java, Batavia.

DEPARTURES.—Dec. 1, from Cardiff, for Yokohama, Armanella ; Oct. 22, from Portland O., for Hong Kong, Portland ; Dec. 2, from Cardiff, for Singapore, Esperance ; from Liverpool, for Rangoon, Anglesey ; 6, from London, for Shanghai, Crocus (str.)

SPOKEN.—Birdstone, from Singapore, to Rio de Janeiro, Oct. — 34.35 S., 26.40 E. ; George, from Manila, to New York, Nov. 3, 30.43 S., 13.10 E. ; County of Forfar, from Glasgow, to Batavia, Nov. 16, 47.15 N., 12.10 W.; Estrella, Liverpool to Manila, Nov. 11, 14 N., 25.53 W.; Black Prince, Foochow to London, Dec. 1, 48 N., 6.30 W.

LAID-ON.—At Liverpool, for China and Japan, Stad Amsterdam (str.)

Digitized by Google

CASUALTIES.—St. Helena, Nov. 12, the Nieuwe Waterweg II., arrived here on the 1st inst. from Batavia, for Rotterdam, reports on Oct. 10, Cape Recife bearing N.W. five miles, experienced a terrific hurricane, throwing the ship on her beam ends for four hours, carrying away bulwarks, started deck seams, boats stove, and decks swept. New York, Dec. 2, the Lucy S. Wills, ship, from Ilo Ilo, for Boston, was spoken Nov. 14, in lat. 23 N., long. 62 W., leaky, with stern stove, and part of cargo jettisoned. Victoria, V.I., Nov. 1. The Nation's Hope, ship, of Sydney (N.S.W.), from Yokohama (ballast), arrived in Royal Roads, off Esquimalt Harbour, a few days ago, for orders, and, during a sudden gale, dragged and parted from her anchors and stranded on a beach fully exposed to the S.E. gale, where she now lies water-logged, with sternpost injured and some planking started below water-line. A survey was held on board immediately after the stranding, and the surveyor recommended that the vessel should be stripped of everything and lightened so as to admit of her being towed into harbour for repairs, which is being done, but the probability is that the cost o repairing and removing her from where she now lies will amount to more than she is worth.

MISCELLANEOUS.—Gibraltar, Nov. 30, arrived and proceeded, Cheops (str.), from London and Plymouth, for Shanghai. Table Bay, arrived Nov. 1, Oceana, from Akyab; Karikal, from Bangkok. St. Helena, Nov. 10, arrived, Marianopoli, from Akyab, for Falmouth; Noach II., from Batavia, for Rotterdam; Dewa, from Rangoon; 12, Doris Eckhoff, from Java, both for Falmouth, passed, Nov. 3, Dione, from Malacca Straits, for New York. Ascension; passed, Nov. 17, from Rangoon, for Falmouth, P.V.R.B.; 19, Mogul, from Singapore, for London; 20, from Samarang, for Amsterdam, N.B.C.F.; 15, from Batavia, for Rotterdam, Nieuwe Waterweg II. Port Elizabeth, Nov. 1.—The Ceylon, from Zebu to New York, at Algoa Bay, is discharging her cargo; some of the hemp is damaged, and 301 bales were sold by public auction on the 27th of October, when 207 bales realised £3 5s., and 31 bales (broken) £2 5s. per bale, duty paid; the vessel will in all probability be condemned. The Assyrian, arrived at Algoa Bay from Ilo Ilo, for Falmouth, has almost completed repairing, and will sail about 2nd or 3rd inst.; the cargo landed here has been reshipped in her, and the vessel is tight and strong. The Minister Fransen v. d. Putte, from Batavia for Rotterdam, has also commenced discharging, but nothing has yet been done regarding her cargo; a portion of it is damaged by sea water. Port Said.—Arrived, Dec. 3, Glengyle, from London, for Shanghai; Priam, from Liverpool, for Shanghai; Penedo, from Antwerp, for China; Governor-General Loudon, from Glasgow, for Batavia.—Suez, Dec. 3: Arrived, Glenearn, Nestor, from Shanghai, both for London. —Singapore, Dec. 1: The Rajanattiannhar (s) and the Bangkok), sunk near Menam Bar, are lying in a good position, apparently not much damaged, although full of water. The Burmese (s) from London, for Japan, was spoken off Cape Guardafui, Nov. 26.

Correspondence.

SUEZ CANAL PURCHASE AND TURKEY.

(To the Editor of the *London and China Telegraph.*)

SIR,—The bold stroke of Mr. Disraeli's Government of buying the Khedive's shares in the Suez Canal, has shown to the world that England is not on the decline, that she still has in the person of the Right Hon. the Earl of Derby a worthy pupil of "Old Pam." It has been said of late years that her power was on the wane, that she dared not move in the Denmark business in 1866, and that for the future she could only take the place of a third-rate Power in Europe. People were mistaken, and the greatest political event of the nineteenth century, simply requires the ratification of Parliament to *make it un fait accompli.*

The Suez Canal is the high road to India, and we could no more afford to let the opportunity pass than we could permit any Foreign Power to have possession of Gibraltar or Malta. I remember, at a Durbar held by Rajah Don Gaspar at Larantooka, on the East end of the Island of Flores, meeting Rajahs of Andomarah Frong, Leewyon, Lamakarah, and being cross questioned by them on European politics. They said, Mr. Englishman, your nation has had no foreign Minister since Palmerston; "How is this?" I could not answer. They then said, "they admired Palmerston because he made England respected abroad."

They admitted Napoleon III. was a great and wise man. Bismark they feared and consequently loved; they inquired particularly after him. I told them he was like Rip van Winkle, he conquered Denmark, then he slept for five years; he conquered Austria, and then slept another five; he was then fighting France, and after she was conquered he would sleep another five years; on his waking he would conquer Holland, and the Eastern (Dutch) Archipelago, and make Germany one of the first maritime nations of the world. At this they seemed much alarmed, and quite considered it useless to ask aid from England, similar to the protection they received in 1814, under the days of the First Napoleon. I am rejoiced that England has once more taken her stand amongst nations, and that for the future Englishmen who visit distant climes may not be taunted with the remark that England dare not do this or that, but must play second fiddle to Napoleons, Czars, and Bismarks. Let not our friends across the Channel be jealous, but rather let them confirm *l'entente cordiale de l'Empire*, by joining in a joint protectorate of Egypt, the Khedive meanwhile throwing off the yoke of Turkey. The late Emperor Nicholas was perfectly correct in his diagnosis of the Sick Man; and England and France foolishly wasted much blood and treasure in the Crimean war. Turkey is corrupt from head to foot—from the Sultan down to his meanest—and the sooner Turkey in Europe becomes a matter of history the better for all civilised nations—not even excepting the Sultan himself. We fought his battles, we "taught him how to borrow money"—and now we have repudiation—a very proper finale to the millions we have lent him so foolishly. By all means let Russia and Austria absorb Turkey conditionally on their guaranteeing our bondholders 10s. in the £. From Turkey they will get repudiation after repudiation and valueless paper for the balance, and they may think themselves very fortunate if they receive 10s. in the £ from any substantial Government. In Turkey in Asia he has a kingdom unrivalled in undeveloped wealth; let him shepherd a flock of sheep and rest at mid-day under the grateful shade of a cedar tree. Should his past experience of ruling in Europe have taught him any lessons, he might still become a mighty Sultan, able to pay 20s. in the £, and have a first-class credit on every Bourse in Europe. It is, I fear, useless to send out financiers to adjust or supervise his exchequer; we have heard of the Ottoman Bank—and what did their supervision avail? They simply gulled John Bull, and received a very handsome compliment for so doing! The Sick Man is beyond cure; the diseases (for their name is legion) are chronic, and the sooner he is dissected the better for all parties. There is no reason why we should be jealous of Russia and Austria absorbing Turkey. Already the fleet of the Czar rules the Black Sea and the Bosphorus, in *spite of us;* but let us make a conditional stipulation, fixing his boundaries to the North of Hindostan by a treaty which shall be binding for ninety-nine years.

These you will say, and the people of England will say, are radical changes, but they are the only cure; adopt them and you may protect the Sublime Porte in Asia, and he may yet be the head of a mighty nation; neglect them, and the Turkish Empire will gradually but surely melt away.—I am, &c.,

MATTA HAHREE.

Westminster, Dec. 2, 1875.

THE SHANGHAI POLYTECHNIC INSTITUTION.

(To the Editor of the *London and China Telegraph.*)

SIR,—You have on several occasions referred to the project of an Exhibition in Shanghai, resembling in its character the Exhibitions which have been held in Europe and America, but on a smaller scale; such an enterprise it appeared to me would be specially valuable in a country like China, where so little is practically known of the arts and industrial resources of foreign countries, and where the field for the introduction of improvements suited to the wants of the people is so extensive; on these points you no doubt expressed yourselves with some enthusiasm, but not with more than the circumstances of the case entirely justified. But the *North China Herald*, echoing the sentiments, we suppose, of that narrow circle of traders who prefer to keep the Chinese in leading strings in all such questions, instead of seeking to promote their enlightenment, has animadverted upon your remarks in a narrow and captious spirit, and discourages the idea, that any extension of commerce would be likely to follow the exhibition of the best wares, and most perfect devices of the most advanced countries of the world. The writer in the *North China Herald* appears to be also the Shanghai correspondent of *The Times*, in which paper these narrow and obstructive views have been re-asserted; and it is added, that the China trade being already bad, and the establishment of an Exhibition being likely to bring new trades into the field, the business would be thereby only rendered worse for those already engaged in it. According to this exalted view the welfare and the enlightenment of nearly half the human race, which the proposed Exhibition was intended to promote, is to be postponed to the trading interests of a few in Shanghai, who desire that Chinese purchasers should buy European goods only through them, and who are jealous of an Exhibition on the same principle on which a tradesman is jealous of a rival shop. That some such narrow spirit should exist among petty dealers was to be expected; but it certainly surprises me that any respectable or influential paper should condescend to be its exponent. The existing close-borough system has been tried, and has confessedly failed, the proof of which is that the trade is notoriously in a bad state. But because monopoly and restriction have been unsuccessful the demand is to perpetuate them, and to make them more stringent; I say, show the Chinese objects that will prove useful to them, and a demand for them will be created, and trade will be increased, besides which, the general good of the country will be promoted. The Shanghai clique say, show the Chinese nothing, else than they will be able to get from us. That such a sentiment should exist among obscure dealers in no way surprises me, but that it should be adopted as a principle of action by influential papers in matters of international concern, creates both surprise and disappointment, and affords grave ground for censure. *The Times* at least should look better after its correspondents. But it has not only been maintained that an Exhibition would be a superfluous and chimerical undertaking, but that you have misstated the design of the committee in seeking to establish such. It happens, however, that almost concurrently with the appearance of your contemporary's strictures the committee have published their report, and the following extracts from it will show that you have correctly interpreted their intentions. The pur-

Digitized by Google

pose of the undertaking was, as you stated, two-fold ; one a local and the other a general one. The latter was the scheme of an Exhibition, and as it was the only part of the design which could interest foreign countries, you naturally gave it your chief attention. On this subject the following remarks occur in the report which has just appeared :—

The Home Committee is now holding frequent meetings, and making the most strenuous exertions to forward the interests of the institution, especially the exhibition portion of it. Manufacturers have been applied to for exhibits, and philanthropists have been asked for subscriptions, not only in England, but in other countries. The efforts of such an influential committee cannot fail to bring about results which the committee in Shanghai dared not even to hope for when the scheme was first proposed. The surplus land belonging to the institution is quite large enough to admit an ornamental building for an Exhibition such as they propose, resembling those in Europe on a small scale. Such an Exhibition would be a most valuable adjunct to the institution, and could hardly fail to prove a success. Chinese members of the committee and officials who have seen or heard of the design are highly pleased with the idea, and think that great part of the funds could be obtained in China by subscriptions. Should this plan fall through, however, the home committee will still have rendered much valuable assistance and co-operation in procuring the necessary objects for display and for use in the polytechnic building.

It further appears that the Shanghai traders have so far given very little aid to the undertaking, and that it has been chiefly supported by the Chinese themselves. On this point the *Herald* says :—

On looking over the list of subscribers it is rather surprising to notice that only a small proportion of the subscriptions have been given by foreigners. The large donations from the high officials show that they take a lively and keen interest in the scheme ; and this is perhaps the most encouraging feature that could have been hoped for. Hitherto such plans as have been devised for the intellectual improvement of the Chinese have been almost entirely supported by foreign subscriptions, and have only been availed of by the lower classes as a general rule. But here we see some of the highest officials in the Empire coming to the front ond not only sending large subscriptions, but expressing openly their approval of a scheme started by foreigners. The replies of the two Viceroys, to whom memorials were sent by Mr. Hsü, are so highly satisfactory that they will be framed and suspended in the hall of the main building. Whether the middle and educated class will avail themselves largely of the benefits of this institution remains of course to be seen ; but there is every reason to believe that such will be the case. Passing events in China seem more than ever to show that now is the very time to make the experiment.

The necessary funds for carrying out the limited part of the undertaking have now been subscribed, and it is expected that the institution will be opened during the present month.—I am, &c.,

FREE TRADE FOR CHINA.

London, Dec. 3, 1875.

Naval and Military.

The Juno, screw corvette, Capt. Poland, from Sheerness for China, sustained a serious accident to her condensers after leaving the Medway, and will have to be docked at Portsmouth to have the defects made good. She will then sail with reliefs for the Kestrel, Frolic, and Mosquito, which vessels are to be recommissioned at Hong Kong. The Juno will relieve the Thalia, 6, screw-corvette, Captain Woolcombe. The latter ship was commissioned at Devonport, March, 1872, and on arrival of the Juno will return home to England to be paid off.

The Thames, hired screw steamer, sailed from Portsmouth on the 26th ult. for the conveyance of troops to Colombo and Singapore. For the former she embarked Sub-Lieut. Bellers, of the 57th Regiment, a bandmaster, four soldiers' wives and five children, and Sub-Assistant Commissary Purchase ; and for the latter Major Tucker, Lieut. Swinburne, eighty-five men, and six soldiers' wives, belonging to the 80th Foot, and two men attached to the Army Hospital Corps.

It is announced that, in recognition of the long and valuable services of Mr. James W. Lishman, paymaster R.N., the Admiralty have appointed him to the post of naval storekeeper and accountant at Yokohama, and that he has been ordered a passage in H.M.S. Juno.

Commander A. E. Dupuis (1870), late of the Rosario, on the Australian Station, will succeed to the command of the Frolic, which is to be re-commissioned in China.

Navigating Lieutenant W. B. Meade (1874), is appointed to the Kestrel, and Navigating Lieutenant H. J. Dockrell (1874) to the Frolic, on the China Station.

We regret to receive the announcement of the death of Commander Grosvenor Stopford, of H.M.S. Hornet, now stationed in China.

Lieut.-Colonel John Basset Prynne, Royal Marine Light Infantry, died suddenly last week of heart disease. The deceased officer served in the Baltic in July and August, 1854 (medal), was present in the China expedition of 1857-59, including the blockade of the Canton River, the landing before and capture of the city, and served also the campaign of 1860, including the action of Sinho, taking of Tonghoo, and storm and capture of the North Taku Fort, which he was one of the first to enter, shooting the Chinese General in command of it. He was mentioned in despatches for gallantry, and received a brevet majority and the medal with three clasps.

The following is a list of officers, &c., proceeding by the Himalaya from Malta :—Lieut.-Colonel Dickins ; Majors Brodigan and Emerson ; Adjutant Hinde ; Captains Thackeray, Ducat, Collingwood, Webb, Horniblow, Wither, Layard, Marsham ; Lieuts. Wilford, Moyers, Sherrard, Francis, Jacson, McCrea, Coghlan, Walker, Hughes, Newland, Lodwick : Sub-Lieut. C. H. Farmer, with 600 rank and file.

The Assistance, 2, iron screw troop-ship, a new ship of 2,037 tons, 1,300-horse power, was commissioned on the 1st inst. Her principal officers are :—Capt. F. M. Prattent, Lieutenants Emeric J. V. Pritchard, Lewis E. Wintz, and Edward B. Tinling, Navigating Lieutenant Walter W. Brown, Paymaster William W. Blayney, Chief Engineer Samuel Swan, and Staff Surgeon William R. Bennett.

The Avon, 4, double screw composite gunvessel, which recently returned from China, having had her old boilers taken out, has been towed out of the ship basin at Portsmouth and docked, to be made ready for new boilers and to undergo a thorough refit for commission.

FOREIGN TRADE OF JAPAN.

The Bureau of Revenue of Japan has issued a statement of the foreign trade of that country for the first half of the year 1875. It shows imports of the value of 15,046,008 gold yen (the yen being equivalent to the Mexican dollar), and exports of the value of 6,969,313 gold yen. The great inequality between imports and exports is partly owing to the first half of the year not being the season for the tea and silk trade. This being the first occasion on which a half-yearly return has been issued, there is none with which to compare it ; but the aggregate of the trade shows, so far, no diminution as compared with 1874. The export of coal reached the value of 547,561 yen in the first half of 1875, which is nearly as much as for the whole of the year 1874. The return shows that the large flow of coin from Japan continues ; treasure to the amount of 9,455,274 gold yen was exported, including 6½ millions new Japanese gold and silver coin, and 2¼ millions old coin, and the import of treasure was only 86,544 yen. A large shipment of treasure would seem to be required by the excess of imports over exports. The imports from Great Britain amounted to 7,127,226 yen, and consisted chiefly of manufactures, machinery, metals, and arms. The imports from the British Colonies amounted to 1,609,721 yen, including sugar to the extent of a million, and home manufactures upwards of a quarter of a million yen. The imports from China, which reached 2,744,568 yen, include sugar to the value of nearly a million, and foreign manufactures (chiefly British) to the amount of above 700,000 yen. On the side of exports, those to Great Britain are entered as of the value of 878,000 yen only, but some shipments on British account have probably been inserted under the head of exports to France, which are stated at 1,236,288 yen. Half the (548,052 yen) exports to the British Colonies consist of silk and copper, the former, doubtless intended for England. Tea to the value of 2,256,185 yen formed nearly the whole of the exports to the United States. Those to France consisted almost wholly of silk, to the value of 1,174,884 yen.

THE Secretary of the P. and O. Company has issued a circular to the shareholders, with copies of the letters, dated Nov. 24 and Nov. 25, addressed by him to *The Times* (which have already appeared in these columns), and also giving a further letter, dated the 2nd inst., which has not been inserted by that paper. The Company has certainly just ground to complain at the non-publication of this letter in the face of the false impression likely to be conveyed by the publicity given to Mr. BAIN'S misstatements. In the letter of the 2nd inst. the Secretary, after reiterating the arguments which go to show the absurd and unfounded character of the charge made that the directors had over-valued the fleet, points out that the broad facts of the Company's position have always been stated clearly in their reports, and are perfectly intelligible. They have been also explained in these letters to *The Times* with perfect openness, and although the directors consider that *The Times* has shown no justification for invoking Government inquiry as to the affairs of this Company, the directors may take the opportunity of stating that they offered more than once on a very recent occasion (viz., in arranging the terms of the contract of last year for passing the mails through the Suez Canal) to submit all their books and accounts to the Treasury and to the Post-office for their inspection, and that offer was not accepted, as neither the Treasury nor Post-office saw any reason to doubt the statements made by the Board.

THE Gallery of the Burlington Fine Arts Club, 17, Saville-row, is at present occupied by a rare collection of articles of Japanese lacquer, contributed for the most part by Mr. James L. Bowes, President of the Liverpool Art Club, and joint author with Mr. G. A. Andsley of the "Keramic Art of Japan."

The *New York Times* states that Arkansas has a colony of Chinese agricultural labourers, and the community is much pleased with their energy and intelligence. They are said to be well adapted to agricultural work, and only require watching lest they should kill the animals by overwork.

THE INTERNATIONAL POSTAL UNION.—The Indian Government having decided on joining the International Postal Union, the various postal administrations affected have been invited to a conference summoned for the 17th prox.

LONDON: MONDAY, DEC. 6, 1875.

CHINESE AMBASSADORS AND CONSULS.

SOME time back an announcement was made that at last China had been constrained to follow in the wake of Japan and establish legations and consulates, and people began to congratulate themselves that the mandarins had had the courage to take a step of such importance, and which must have cost them much anxious deliberation before they could decide to abandon their old restrictive ideas. Up to the present, however, the only confirmation of this welcome news is the appointment of the special Ambassador with reference to the murder of the late Mr. MARGARY, the few general observations made in the Memorial from the Tsungle Yamen on the subject, which we reprint elsewhere, and the rumoured delegation of a Chinese Consul to Hong Kong. Upon the last named point we commented recently in some remarks upon the Blockade Question, to which it is germane. A few observations upon the former point will not be unacceptable at the present time. If there were no arrangements with China with reference to the subject we should not have any reason to complain that she should send her ambassadors as she is obliged to do other things, that is, according to her own lights; but so far from this being the case, special arrangements were made in the Treaty with respect to ambassadors; and, although ever since 1860 we have had our Minister resident at Peking, China has not deigned to appoint a resident representative to any foreign country. We would, indeed, go so far as to say that even this might not be held a conclusive ground for objecting to her sending a special Embassy if this were the first occasion on which she was endeavouring to establish ambassadorial relations with foreign countries; but this is the third time on which she has resorted to this course of action, and she has had on the other two occasions ample opportunity of becoming acquainted with the nature of foreign Courts and the ordinary mode of establishing relations with them, but obstinately holds back from recognising outside countries to the extent of appointing resident representatives. The BURLINGAME Mission was almost officially declared to be the inauguration of a new state of matters in this respect. It is at least certain that the fact that it was only a preliminary step to the appointment of resident Ministers at foreign Courts was plainly given out both by Mr. BURLINGAME and his colleagues; but after the Mission had obtained what it wanted, namely a delay on our part in pressing for the fulfilment of Treaty stipulations, nothing more was heard of the improvement in diplomatic relations, the chance of obtaining which was one of the chief inducements we had had to give a favourable ear to the requests which Mr. BURLINGAME made. In the CHUNG HOW Mission we had a repetition of the BURLINGAME affair, but under circumstances which made that Embassy even more unlike what we expect in modern days, CHUNG HOW, who was at the head of it, being the person immediately responsible for the massacre.

The Embassy recently appointed truly resembles that of CHUNG HOW. Though it does not go the full length of sending the official actually at fault to plead his own cause, it is undisguisedly despatched merely to plead a cause—and certainly a very bad one—and ought to be received with the caution which is naturally evoked by a due consideration of its object. We do not go so far as to say that the Embassy should not be received, or, indeed, that it should not be courteously treated; but simply urge that its true nature should not be lost sight of; and that it should not be treated either as being in itself an Embassy, in the acceptance of the word in the present day, or even as indicating that such embassies will shortly be established. True, the Memorial of the Tsungle Yamen foreshadows such a step as possible; but it does so only in very vague terms; and the very fact that this allusion is made to the point, shows that the Chinese are themselves conscious that they are falling short of what they are properly called upon to do in this matter. However much we may desire to see China adopt the course which is now hinted at, it would be very sanguine indeed to imagine, after the experience of the BURLINGAME and CHUNG HOW Missions, that she has any immediate intention of doing so, or that the present Mission is designed with any other object than to gain time; and, if possible, be the means of getting her out of a difficulty, from which she finds it no easy task to extricate herself; and which, in all likelihood, would never have arisen had China recognised the importance of foreign nations to the extent of appointing resident representatives, as she promised to do, when the BURLINGAME Mission was despatched nine years ago.

BRITISH INTERESTS AT SARAWAK.

WE lately laid before our readers an extract from the *Sarawak Gazette*, complaining that the existence of that little State seemed almost forgotten by the British Government, and that years had elapsed since a British gunboat had been seen in the surrounding seas. Rajah BROOKE returned to his dominions some months ago. That he himself saw the paragraph referred to before it appeared in print it would, of course, be unsafe to affirm; but however that may be—whether the *Sarawak Gazette* spoke under official inspiration or no—there cannot be the smallest doubt as to the accuracy and truth of its remarks. Sarawak lies all on the way to China, and when we consider how frequently English men-of-war are passing and re-passing between Singapore and the Chinese coasts, it does seem a little remarkable that our interests, real and prospective, in the trade of Borneo should be altogether lost sight of. We by no means wish to overstate the case, or to appeal to those who direct the movements of our navy on exaggerated grounds; there are no marauding forces to be hunted out of the creeks and rivers contiguous to Sarawak. Piracy there has for many years back been unknown, and Rajah BROOKE has now gunboats of his own, available to punish wrongdoers, should the need arise. For all purposes of self-defence the Sarawak Government seems to be well enough able to get on without aid from outside; but the advantages of an occasional call from a passing British man-of-war are not to be estimated by the actual support she could render on an emergency; the gain is chiefly indirect, and though we can neither measure nor weigh it, we may trace its influence in many ways. The respect of the natives is thus maintained, the intrigues of discontented chieftains are kept in check, and commerce thrives and extends owing to the peace, good order, and security which the sight of our all-powerful flag promotes. Lord CARNARVON probably did wisely when he recently took occasion to pour cold water on a project for the colonisation of New Guinea; but the Government who thus went somewhat out of its way to check British enterprise from a fear of subsequent complications ought to be all the more careful to show itself zealous for our commercial interests in places where the prospects are more promising and the objections do not exist. The size and vast resources of Borneo, when coupled with the fact that in the settlement of Sarawak English trade has already secured a permanent footing and opened up for itself a channel which, given peace and encouragement, may be indefinitely enlarged, furnish our statesmen with abundantly sufficient reasons for paying exceptional attention to Rajah BROOKE'S little State. So far from doing this, just because the place is well governed, because there are no disturbances there, because, in short, it is a likely spot for developing a trade instead of an unpromising one, such as New Guinea, or some districts in Africa, where a good deal of money has recently been ex-

Digitized by Google

pended, our Government conveniently shelve it altogether; for is not a country least troublesome when we never hear of it at all? In order to place Mr. USSHER well beyond the risk of a new quarrel with Mr. POPE HENESSEY, the former gentleman has been transferred from Tobago to Labuan, and from the seat of this Government he will also discharge the duties of Consul-General for Borneo. This arrangement is no doubt the most economical one that could be devised; but, though we admit that there is not really very much actual official work for a Resident Consul to do at Sarawak, yet the avowed policy of the Foreign-office has always hitherto been to appoint a Consular Agent—that is, a Consular officer allowed to trade on his own account—in outlying places where there is no extra-territorial jurisdiction, but where a good deal may be done to develop a demand for British manufactures or to stimulate the supply of native products. For this reason, therefore, we regret that since the resignation of Mr. MARTEN no fresh appointment has been made.

OUR POSITION AT PERAK.

THE telegrams from Penang which we give in another column convey an unfavourable impression as to the duration of the conflict—we cannot call it war—with the Malays at Perak. The statement of GRAHAM, the servant of Mr. BIRCH, who had succeeded in making his escape to Penang, we may attribute to the circumstances which surrounded him, and we do not attach much importance to it. When the statement of the circumstances arrives in a connected form we believe that it will be shown that this unfortunate quarrel has not arisen from any premeditation, but through the indiscretion of the interpreter who struck the Malay for pulling down the proclamation. It was this act which precipitated the events which we have now to deplore. He should have known better than to strike a Malay. It is well known that they will not submit to this, and invariably have their kris ready to resent such an insult. The unfortunate man, whose name has not been given, paid the penalty instanter. In one of our articles on the subject we mentioned that an attack on British Residents by Malays was only known in one instance, and that was at Bencoolen, during our possession of Sumatra and Java in the early part of the present century. It is known to those who took a part in the administration of Sir STAMFORD RAFFLES, that of all the Residents appointed the only case in which the Malays wreaked their vengeance for supposed or real wrongs was that of Mr. PARR, at Bencoolen, and in his case there was great provocation. We therefore trust that Sir WILLIAM JERVOIS has not rushed into a war with the Malays, which will embitter them needlessly against us and our rule. As we have before said, we trust that hostilities have been confined to the immediate locality of the murder, and that negotiations will at once follow for the peaceable annexation of Perak by purchase from the native chiefs, in a similar manner to that adopted by Sir STAMFORD RAFFLES in the transfer of our present possessions in the Straits. In our opinion we shall never be able to conduct the government of Perak by means of a Resident while the rival Sultans ABDOOLAH and ISMAIL are there perpetually intriguing, and only waiting for an opportunity to try conclusions by an appeal to arms.

Since the above was in type we have received the *Penang Gazette* of 4th Nov., which contains a short account of the murder.

THE telegram with reference to the expedition of the Hon. Mr. GROSVENOR to Yunnan, given elsewhere, is not reassuring. There are no more disorderly men in China than Chinese troops, and they are always carefully avoided by travellers as more likely to cause disturbance than to afford protection. The Chinese must, however, know that they would make a second attack on a British official at their peril.

THE Postmaster-General has issued a notice that passengers by the outward P. and O. steamers from Brindisi can receive letters at that port if registered and addressed to the care of the Commander.

THE QUEEN has conferred a Civil List pension of £75 a year on each of the three orphan children of the late Mr. J. W. W. BIRCH, British Resident at Perak; and it is understood that the Secretary of State for the Colonies will make provision for the eldest son in the Colonial Service.

WE understand that the Russian Steam Company of Odessa intend to increase the number of steamers engaged on the China line. Negotiations are also in progress at St. Petersburg for a line to connect Saghalien with Yokohama and Shanghai.

REPORT OF THE DIRECTORS OF THE P. AND O. COMPANY.

THE COMPANY'S FLEET.

The usual tabular statement prefixed to this report contains particulars of the Company's Fleet to the latest date. The following information is required to bring up its history from the last report to the present moment. The *Simla*, built in 1853, and which, during her career, did excellent service to the company, has been sold to Messrs. Howden and Co., of Glasgow, in part payment of the new machinery and other alterations which the directors have contracted with that firm to supply to the *Tanjore*. The *Poonah*, *Bangalore*, and *Travancore* have been recently despatched to the East, after having received new machinery and other extensive improvements, which have been fully mentioned in previous reports. The work done in each case has been successful, and the results in point of economy of fuel and additional carrying capacity are satisfactory. The *Tanjore* is at present the only vessel laid up to receive new machinery, and it is expected that she will be ready for sea in February next. In detailing such incidents connected with the Company's Fleet as may be considered exceptional to the ordinary course of business, the directors regret to have to mention the accidents to the *Sunda* and *Deccan*.

PURCHASE OF NEW STEAMERS.

The directors, finding that in the depressed state of steam shipping it is cheaper to purchase than to build, have recently in this manner added three large steamers to the Company's fleet. Two of these steamers of 3,000 tons and 500 horse-power were built in 1872-3 by Messrs. Caird and Co., in their best style, and with all the latest improvements in machinery, for the North German Lloyd's Company, for the purpose of running a line to the West Indies, and being adapted for a tropical climate, require only a very little internal alteration to fit them for the Company's work. They have been named the *Assam* and *Siam*, and the former has been already despatched to India, while the latter will follow in the course of a few days. The third steamer purchased is being built by Messrs. Stephen and Son, of Glasgow. She had been originally contracted for by a new German-American Line, but this undertaking being absorbed by another company, they relinquished the contract for this ship. At the time of the purchase the construction of the vessel had merely advanced sufficiently to enable her to be adapted to any trade, and the contract made by the directors with Messrs. Stephen was to complete the work in every respect according to the Company's latest specification. This vessel, named the *Nepaul*, is 3,500 tons and 600 horse-power, and is expected to be ready early next year.

MAIL AND GENERAL SERVICES.

During the past year the directors have somewhat restricted the extra voyages of the Company's vessels, as the state of trade has offered little inducement to such employment. The Mail Service has now been carried on for upwards of a year under the Suez Canal contract, for which, as the Directors have always contended, the Company were unfairly mulcted in £20,000 per annum and rendered liable to excessive penalties. It is satisfactory to state that the working of the Mail Service in connection with this route has been attended by a general, and in some respects, an important acceleration of post throughout the area of the Company's operations.

DEBENTURE STOCK.

The proprietors are aware that the Company have £800,000 borrowed on Debentures, and that this amount has for a considerable number of years been invested in steamers, and otherwise virtually treated as part of the available capital for carrying on the general operations of the Company. These Debentures have never been issued in the public market, but were originally subscribed for, to a considerable extent, by proprietors, while the remainder was absorbed by banks, insurance offices and other capitalists, and in the hands of such investors they are at present chiefly held. It appears to the directors that the present is a favourable time for converting the Debentures into Debenture Stock, and that several advantages will accrue from this measure, more particularly in making the Company independent of fluctuations in the Money Market, to which they are now liable when renewing Debentures, and in rendering permanent an amount of necessary capital which is too considerable to remain always in the position of floating debt. The latter object could of course be attained by making calls on the new shares and paying off the Debentures as the latter fall due, but the directors consider that the conversion of the Debentures into Stock is, upon the whole, a preferable operation.

The directors being advised that a Supplementary Charter is necessary to enable the Company to carry out the proposed conversion, have made application in due form to Her Majesty's Government, and hope shortly to receive the requisite authority. It will, of course, be understood by the proprietors that no additional borrowing power or new capital is sought under this arrangement, and the Supplementary Charter will therefore strictly be confined to the object above specified. The conditions of the Charter will authorise the directors to raise £800,000 in Debenture Stock, bearing interest at the rate of 5 per cent. per annum, or at such rate as the directors may, at the date of such issue, consider necessary for the purpose aforesaid, and subject to the

Digitized by Google

express condition that the amount so raised shall be appropriated solely and specially to the conversion or redemption of existing Debentures of the like aggregate amount. As the present Debentures extend over a period of three years, the issue of Stock to replace the same may also, if considered advisable, be spread over that period. Due notice, will, however, be given to the proprietors of the terms of the proposed issue, in order that they may have the first opportunity of subscribing. The directors trust, therefore, that the Proprietors will approve of the acceptance of a Supplementary Charter based on the conditions aforesaid, and authorise the directors to create or issue such Debenture Stock, or any portion thereof.

UNDERWRITING ACCOUNT.

The directors are happy to state that no serious loss has to be charged to this account for the past year. Minor losses, arising from collisions and other accidents, entail a charge of £7,359, and the cost of insuring the Company's steamers between London and Southampton, and on voyages to the Clyde and other ports for the purpose of repairs, amounts to the further sum of £8,662, the balance remaining to the credit of this account being £113,977. From this sum the directors propose to pay to the proprietors a bonus at the rate of 1 per cent., carrying the balance of £86,227 to renewal account, and the necessity of doing so is explained in detail under that head of the report.

It may be here stated, however, that although the underwriting account is necessarily treated as a separate account in the Company's books, it never has nor can it ever be dealt with as an exclusive source of revenue and profit apart from the general working of the Company's business. While it has afforded the proprietors a distinct advantage as compared with the cost of insuring the fleet outside, it has been used in former years for the purpose of building up the reserve fund, which is, in point of fact, a depreciation and insurance fund combined, and latterly for the purpose of meeting the cost of extraordinary repairs and renewals consequent upon replacing old by new machinery, and of effecting other improvements. It will therefore be perceived that the sums charged against ordinary revenue for depreciation and insurance must, in case of need, be rendered equally available for the purpose of maintaining the Company's fleet in thorough efficiency.

RENEWAL ACCOUNT.

The amount to the debit of this account for the present year is very large, viz.: £278,773, but of this a very considerable portion appertains to ships which were still under repair at the end of the financial year. The directors have therefore no hesitation in carrying forward a portion of this debit. The general repairs account is for the past year £175,310, against £198,459 for the previous year. But as the supply of new machinery, combined with extensive alterations, involves a general overhaul, which every ship must receive at stated intervals, and which is properly chargeable as ordinary repairs, the directors have considered it necesssary to charge this account with a proportion of the expenditure standing in the first instance to the debit of renewal account. They have accordingly charged the sum of £80,000 to the general repairs account. Crediting this amount, together with the balance of the underwriting account, £86,227, there remains the sum of £112,545 to be carried forward to the renewal account in respect of ships not completed, or not at work during the past year.

In giving this reason for carrying forward so considerable an amount, the directors would state that in the accounts presented for this year they have actually charged the sum of £473,338 for repairs, renewals and depreciation, and are therefore doing ample justice to the maintenance of the fleet. The directors have before them the precedent of 1866 for employing the depreciation of the year to cover any extraordinary expenditure for repairs, and by acting in the same way it would be unnecessary to carry forward any balance of the renewal account. They do not, however, consider it advisable to adopt this precedent at the present time. In some cases the large addition made to the tonnage, and the radical alteration effected in several of the ships might have justified some portion of the outlay being placed to capital account, but in no instance has this been done, although the sum so expended during the last four years has been very heavy.

OPERATIONS OF THE YEAR.

In their report on the operations for the half-year ending March 31, the directors entered into a very full explanation of the circumstances which prevented them from declaring an interim dividend for that period. They stated that this unfavourable result was chiefly to be attributed to the depression of trade, and more especially to the utterly unremunerative freights ruling in the Bombay trade, in which the Company's stake was extremely heavy. That a further loss was entailed by the reduction in the amount of the Imperial and Colonial mail subsidies, aggravated in the case of the former by the deductions for heavy penalties for delay arising from bad weather and other causes of detention over which the Company has no control. It is unnecessary to repeat the facts adduced in the last report on these points, but the directors regret they cannot state that any improvement has taken place in the general conditions of the Company's trade during the latter half of the year. In some respects, as, for example, in homeward freights from Bombay, the returns are even less satisfactory than they previously were.

Under these circumstances it will scarcely cause surprise that the earnings for the financial year show a decrease of £87,328 as compared with the year previous, £28,313 of which is attributable to the reduction of subsidies and £59,015 to a falling off in general revenue. The latter is almost entirely in the department of freight, the passage money being within £5,000 of what it was the previous year. In point of fact, the earnings from passage money and freight result in a considerably more unfavourable net outturn than the traffic ought to show. The gross passage money of the present year is in reality considerably greater than in the previous twelve months, but both it and the freight are seriously affected by the unfavourable changes obtained on the Company's remittances from the East, a disadvantage which has been gradually increasing, but during the past year reached such an extent that the directors estimate the loss from this cause at upwards of £25,000, and this forms part of the general deficiency in receipts above referred to. On the debit side of the account the directors are glad to report a considerable saving of expenditure, which, to some extent, compensates for the diminished receipts, and enables them to recommend the payment of a moderate dividend. The directors feel confident that as far as economy in the Company's operations is concerned, a greater result will be attained during next year.

THE P. AND O. COMPANY.

(THE TIMES.)

We have received a further letter from Captain George Bain in reference to the affairs of the P. and O. Company. Other shareholders have also sent us papers and letters, all tending to show that much dissatisfaction exists among proprietors as to its present condition. But we cannot enter into the matter further. The shareholders' meeting is at hand, and it rests with them or with the Government, whose stake in the Company is a heavy one, either to obtain satisfaction or to rest content with matters as they are. It is impossible that the position of the P. and O. Company can be settled in our columns; we have done enough in drawing the attention of the proprietors to the alleged position of its affairs. The same limit must be put to the personal dispute between Captain Bain and the directors; but since we admitted a statement to the effect that he was dismissed because unworthy of confidence, we print that part of his letter which gives a different version of that dismissal. Further than this we cannot now enter into this dispute:—

Your issue of the 24th inst. published my letter containing grave charges against the board of directors of the P. and O. Steam Navigation Company, and their two letters of defence have appeared in *The Times*. Their chief defence is an allegation that I am unworthy of credence because they assert that I am a "discharged *employé*," and, "as a subordinate of the managing directors, proved himself unworthy of their confidence." This side issue acquires importance from your editorial description of me, prefixed to their first letter, where I am thus described:—"Mr. Bain was discharged by the Company after acting as London manager for six years because he was untrustworthy." This most grave charge of yours cannot possibly be a mere paraphrase of their words, and I doubt not you will do me the justice of inserting this refutation of it. I presume your information is part of the "statement shown to us privately" referred to both by you and them. During the six years I was a London manager of the Company I saved the shareholders many hundreds of thousands of pounds, and shall adduce a single case in support of that assertion. On the 18th of November, 1872, I wrote to the Board of Directors pointing out the discreditable manner in which the business had been and was conducted, and intimated my intention to lay that letter before the shareholders at the annual meeting in December. Their reply treated the announcement of that intention as an act of insubordination, for which insubordination I was to be dismissed the service within four days, if I would not withdraw that letter. I therefore removed the hollow plea of insubordination by applying for and receiving back that letter intact. I, on the 26th of November, sent the Board that identical letter, minus the insubordinate clause. I offered to prove all the charges before the Board, by extracts from documents then in the office. I was, however, refused all documents except such as the board chose to produce. The inculpated parties being directors, sat in judgment upon themselves and had the control of the documents which were evidence against them. I therefore resigned the service on the 9th of December, but that was seventeen days after I was threatened with dismissal for the insubordination, which consisted in either "doing in Rome as Rome did," and thereby obtaining the "confidence" of the managing directors, or, protecting the shareholders, which I have continued to do. My resignation was accepted immediately, this charge of insubordination being the first instance, which, during twenty years' service, I had incurred the censure of the board. The correspondence bearing out the above facts is recorded in a printed letter or pamphlet, addressed by me to the shareholders, dated the 15th of May, 1873, at pages thirty-seven to forty, and in another such printed letter (paragraphs 184 and 185), refuting the board's answer to my last letter of May 15, 1873, and which is dated November 8, 1873. The charge of "untrustworthiness" which you have brought against me is thoroughly disproved by the following quotation from a printed letter issued to the shareholders by the board, and dated May 30, 1873, as an answer to the charges in my letter of May 15, 1873. Less than a month before I wrote the letter of the 18th of November, 1872, the board decided to increase my salary, and, as they say in that letter at page five, "the company having entered into contracts for building, reconstructing, and repairing ships on the Clyde, involving an expenditure of £700,000, Mr. Bain was ordered to undertake the duty of superintending that work upon the spot." The same page confirms my description of my letter of the 18th of November, and the following page says with reference to what I have described as resulting in my resignation, "Mr. Bain, finding he had committed himself beyond hope, resigned the service to avoid being dismissed."

CHINESE AMBASSADORS AND CONSULS.

The Shanghai correspondent of *The Times* has forwarded the subjoined translation of an important memorial from the Tsungle-Yamen regarding the appointment of Chinese ambassadors generally, and of Kuo-Sung-Tao (the ambassador recently appointed in connection with the Margary affair) especially:—

Your Majesty's servants Yi-sin and his colleagues (the Prince of Kung and the Ministers of the Tsung-li Yamen), upon their knees, present a memorial. They enter with detail into the question of personal intercourse between the Chinese and the foreigner, and they pray a decree which, as a declaration from the Throne, may dissipate men's doubts, and hinder suspicions and misunderstandings.

Digitized by Google

In the fifth moon of the present year the Yamen of your servants presented a memorial, in which they prayed that a reserve might be formed of persons thoroughly conversant with foreign affairs. They had the honour to receive a decree approving this proposition ; and at a later period a second decree, directing Kuo Sung-tao, Expectant *shih hlang* (Vice-President), and Hsu Ch'ien-shen, Expectant *tao-tai* (Intendant), on the staff of the Province of Chih-li, wearing the insignia of the second grade, to proceed on a mission abroad.

Prostrate, your servants would observe that, when praying the formation of a reserve of persons thoroughly conversant with foreign affairs, the object they had in view was not simply the transaction of business in which Chinese and foreigners may be jointly concerned. Missions to foreign States and the question of intercourse lay equally within their prayer. Men's minds, in fact, must have free access to each other before angry collisions between them can be prevented. If there are to be no collisions they must thoroughly acquaint themselves each with the position of the other.

In the sixth year of the reign T'ung Chih (1867), Chih-kang and Sun Chia-ku (subordinates), in the Yamên of your servants, went as Envoys to different states.

On their return they mentioned that visits had been interchanged between them and the high officers of the different departments of the Foreign States (in question). Your servants have also been spoken to repeatedly upon the subject by the Ministers of Foreign States residing in the capital, their remark being, that as visits were never exchanged between the high officers of State departments and the Ministers of foreign nations in the capital, it was not astonishing that when their authorities kept thus aloof, the lower orders should make light of the officials and people of foreign nations.

You servants would observe that if visits have so far neither been paid nor received by the high officers of departments in the capital, their practice has been but in scrupulous conformity with the principle that officials have no intercourse (with foreigners). On the other hand, China has long since entered into friendly relations with foreigners ; missions are being sent abroad ; the circumstances of the past and present time are not the same ; and though it is not possible to treat (foreign) Envoys in every way as they are treated in foreign States, Eastern or Western, still it does not for all that appear necessary that there should be no intercourse with them whatever.

It is the duty, therefore, of your servants to pray a decree directing their Yamên to consider and decide with the high departments of State the (future) conditions of this intercourse, to the end that the motives suggesting it may be thoroughly comprehended, and that while, on the part of those entering into intercourse, any possible misgivings (on the subject of etiquette) may be more or less prevented, those not yet entering into intercourse may come to understand the relations of the Chinese with the foreigner.

Herein is the significance of intercourse between public servants, and it is indispensable that all, both native and foreign, should be made to understand it thus.

(There is another matter to be mentioned.) In the relations of Governments of equal dignity, no superiority is (asserted) on either side. But there is a point on which Foreign Governments are not duly informed. It constantly happens that when in copies of Imperial decrees words indicating this or that Government are seen to be in the body of the column (the foreigner) will suspect that the inferiority of his Government is implied. His Government, he fears, will consequently be looked down upon by the officials and people of China.

It has been again and again explained that in Imperial decrees, as these are commands addressed only to the officials and people of China. (no foreign Government's designation), can lawfully be raised above the column. So, in State Letters (of credence, &c.), words of the kind, are invariably elevated. In the letters, for instance, that have on different occasions passed between the Sovereigns of China and of States (the Ruler's designation) has been so elevated on both sides. The word designating the Government of the great Power addressed has also been elevated. The fact that in the treaties with foreign States the words are so printed is an additional proof (that their equality is admitted). Why, then, should a distinction as between superior and inferior be suspected ?

It will be difficult, however, notwithstanding the repeated explanations given, to convince every one, native and foreigner, of the truth, without a declaration from the Throne. It is also too possible that some ignorant person of bad character may make mischief of the matter.

Herein is the significance of intercourse between Governments, which it is indispensable that all, both native and foreigner, should be made to understand.

The two questions above submitted have been very carefully considered by your servants. They are seriously apprehensive lest on one side or the other motives may not be thoroughly appreciated. At the same time (there are practical difficulties to be met), and to carry a measure of formality by force, without due precaution against evils in substance that might ensue for it, would infallibly entail consequences of the most serious importance to foreign relations ; the point it was sought to approach being farther than ever removed ; the effort made to gain an advantage having resulted in loss.

(Under these circumstances your servants) venture to state their views detailedly and explicitly, and looking upward they implore your Majesty graciously to accord a declaration from the Throne, that may dissipate the doubts of the many, and render the great stake secure.

On their proposition, be its merits what they may, they, prostrate, beg the sacred glance of the Empresses (Regent) and the Emperor.

THE SAN FRANCISCO LINE.

The *New York Times* has the following on the Panama Railroad Company, and the proposal to establish a line of steamers between New York and the Isthmus, and on to San Francisco :—

Mr. J. G. McCullough, Vice President of the Panama Road, said that the project was honestly conceived and would be honourably carried out. The motion was not opposed by a single member of the board, and he believed the proposed line would, when in operation, prove a highly remunerative one. They were not at all opposed to the Pacific Mail Line, but they were of the opinion that by owning a line of steamers running in connection with and in the interests of their own road they would increase their revenue very considerably. They had made very careful estimates of what they thought the earnings would be, and, having a knowledge of the receipts on the Pacific Mail Line, they were in a position to make a fair calculation on the subject. Their road, owning their own wharves, machine shops, steam-tugs, and launches, were in a position to run a line of steamers from New York to San Francisco at a much cheaper rate than any other company. They expected to get a portion of the overland traffic and a large share of the freight which now went around the Horn. In 1874 80,000 tons of freight were sent by the overland route, 60,000 tons by the Pacific Mail Company, and 700,000 tons went around the Horn. They would in one sense, he admitted, be in opposition to the Pacific Mail, but as there would be sufficient business for both companies, there would be no competition to secure business by cutting down freights. As far as their company was concerned, it would, he said, simplify matters very much to have a through line from New York to San Francisco, as at present they were compelled to check off every parcel on being taken from the steamer at Aspinwall to their depot, and again to check the same off at Panama as they were placed on board for San Francisco- They were obliged to do this to protect themselves from being held responsible for parcels which did not come into their possession. He thought the public would favour the line, as it would be the shortest and quickest for freight. Regarding the allegations of stock-jobbing and of some of the directors being interested in breaking down Pacific Mail stock, Mr. McCullough said he had made inquiries respecting these allegations, and he believed there was no foundation for them. The directors assured him that they were not short of Pacific Mail stock, and he believed they did not speculate much in it any time. Respecting the temporary injunction granted by Judge Donohue restraining the company from building the proposed steamers, Mr. McCullough thought that they had a perfect right to run the steamers under their existing charter. They did, about the year 1860, run a line of steamers between this port and Aspinwall, at the time that Commodore Garrison and Mr. Vanderbilt were running their steamers, the former from San Francisco to Panama, and the latter from this port to Aspinwall. The *Baltic*, the *Pacific* and the *Adriatic* were among the vessels owned by the Panama Company at that time, and some of them were subsequently sold to the Pacific Mail Company. In conclusion, Mr. McCullough said that there was no law, at all events, to prevent them as private citizens from running any number of steamers between this port and San Francisco.

The reporter next had an interview with one of the most prominent men in the street, and who is a director both in the Union Pacific Railroad and Pacific Mail Company. This gentleman characterised the proposition of the Panama Company as a "wild-cat" scheme, and one which had been undoubtedly gotten up for stock-jobbing purposes, but which, instead of aiding their plans, proved disastrous to its promoters, as their own stock fell and that of the Pacific Mail rose. He said that if they should persevere in carrying out their plans they would be "snuffed out like a candle"—they had no right to run a line of steamers in connection with their road ; the New York Central or any other line had just as good a right to do such a thing as the Panama Road. It was, he said, ridiculous to think that a little line of forty-eight miles of road, already heavily mortgaged, could compete with such vast interests as were opposed to it. No line of steamers to San Francisco could pay without getting at least a portion of the freight to China and Australia, and as the Panama Line could not obtain any of that freight, he could not see how they were to make their steamers pay. It could not compete with Pacific Mail, supported by the Union Pacific Road and by subsidies, and if the promoters chose to build the steamers spoken of, he would be glad to take them off their hands at fifty cents on the dollar. The effect of the movement on the Panama stock would be, he said, to send it down to 75, should it be attempted to carry out the scheme.

THE MALAY PENINSULA.

Sir P. Benson Maxwell, late Chief Justice of Singapore, writes to *The Times* as follows :—

Our settlements in the Straits were transferred to the Colonial-office on the 1st of April, 1867. In the first year of his tenure of office the new Governor, Sir H. Ord, called upon the Rajah of the adjoining territory of Kedah to cede a portion of it for a rectification of frontier. The cession was unimportant, and if negotiated in a proper spirit would probably have been readily made; but the Rajah refused to sign the cession, and the Duke of Buckingham thought his refusal justified "by the suspicions which might not unnaturally rise in his mind on having presented to him a document which, both in form and substance, extended considerably beyond what he had agreed to." In the following year another cession was demanded, this time from the Malays of Perak. As far back as 1826 the local authorities of Penang negotiated an arrangement with the Sultan of that country, which was embodied in two papers, both dated the same day. By one of them the East India Company obtained an undertaking from the Perak people not to hold any communication with Siam or recognise its suzerainty, and promised to support them if attacked for observing the treaty. By the other the Sultan granted to the East India Company the island of Dinding Pangkor and the various islands to the seaward of it. The Indian Government expressly refused to ratify the former instrument, and for nearly forty years no action was taken on the latter, which remained a dead letter. It is beyond all rational doubt that when the one document was rejected the other necessarily fell to the ground. But, somehow or other, two or three years before the beginning of the Colonial *règime* the old document was discovered in a pigeon-hole in

Digitized by Google

the Government offices at Penang; and for a moment there was some talk of taking possession of our long forgotten possession. Nothing, however, was done beyond paying the little rock an official visit. The new Governor, however, not only asserted the validity of the cession, but contended, on the faith of a mistranslation, that it was wide enough to include a tract of the mainland as well as the island. Fortunately for the Perak Malays, the present Lord Stanley of Alderley, who had visited the peninsula some years before, and has always taken a generous interest in the welfare of the weaker races, wrote to Lord Granville, who was then at the Colonial-office, calling his attention to what was thus going on without his knowledge or sanction. Lord Granville demanded an explanation, and the explanation amounted to an abandonment of the scheme. Four years ago you allowed me to direct your attention to another affair with the Malays. A Chinese junk belonging to Penang was captured by some of its Chinese passengers, who murdered upwards of thirty persons on board and took the vessel to Salangore. Upon the demand of our local authorities the Malay chiefs of the place gave up to our police the vessel, the goods, and six men who were supposed to have been concerned in the piracy. But because they refused to give up a seventh man, against whom it does not appear that there was any evidence, a man-of-war was despatched by our Colonial officials to Salangore, not to demand the surrender of the missing man, if there was really any evidence against him, and the punishment of those who had wrongfully screened him, but to arrest both him and the Malay chiefs, and to punish them ourselves. The Malays resented the attempt to seize their head men on their own soil, and fired on those who attempted it, and Salangore was burnt down in consequence. Not satisfied with this, two of the Colonial officials (one of them the unfortunate gentleman who was lately murdered in Perak), hastened to the Sultan of the country on board the man-of-war *Teazer*, and compelled him, under threats of the most serious and immediate consequences, to appoint his son-in-law, Tunka Oudin, to be his Viceroy—in other words, to abdicate in all but in name in favour of a man whom he had learnt to suspect and fear, and who was in the highest degree disliked by the Salangore Malays. This Viceroy has been maintained in this position by us ever since. The most important of his acts have been to blockade his father-in-law in Langat, and to grant a monopoly of all the tin mines in the territory of Salangore to a Singapore gentleman, to whom he is considerably indebted and who is now the Resident there. I pass now to the circumstances which have led up to the present state of affairs in Perak. In May, 1871, the Sultan of Perak died, and a dispute arose as to the succession; Abdullah claimed it by right of birth, Ismail by right of election. At the same time a more formidable contest broke out in Larut, the northern district of Perak, adjoining our own Province Wellesley, between two clans of Chinese, to both of which the worthless Governor of the place, the Muntri, had successively sold the same mines. Sir H. Ord recognised the Muntri, who owed his appointment as the Governor of Larut to the deceased Sultan, as the ruler of the Province, and then used the power of prohibiting the export of military stores which was vested in him to enforce neutrality by confining the prohibition to one side, and allowing arms and provisions to be shipped to this Muntri. This step added fuel to the fire. The side which was not favoured was driven by sheer hunger to take to piracy. Large boats manned by sixty rowers and twenty-five riflemen carried terror along the coast; and both the Malays and Chinese against whom we thus took a part naturally regarded us as the allies of their enemies, and our visits up their creeks and rivers as threatening and hostile.

Such was the state of things in the peninsula when Sir Andrew Clarke succeeded Sir H. Ord at Singapore—in Salangore a chief imposed on the Sultan and people of the country against their will, and maintained by the countenance of our officials, by the frequent display of our power in the shape of men-of-war and gunboats—in Perak indescribable anarchy and bloodshed, a newly-born ill-feeling towards us for our one-sided intervention, and the fire so close to ourselves that it might spread to our own possessions at any moment. I abstain from going into the course pursued at Rambon and Sungie Ujong. The Malays were too weak and too ignorant of the first elements of rational government, even if they had not been distracted by their quarrel about the succession, to reduce the Chinese miners to order. It was open to Sir A. Clarke, no doubt, to confine himself to simple non-interference, and to modify the mischievous policy of his predecessors so far as it had departed from that principle; but he would have thereby permitted the infliction of a dreadful amount of human suffering on the combatants and their families, and have had to take more than the usual precautions for the preservation of order in the colony. I thought that he had struck out an admirable middle course, both wise and humane, when he got the Malay chiefs of Perak to determine in his presence at Pangkor which of the two rival claimants to the Sultanate they would obey, and also to receive a British Resident to be their guide, philosopher, and friend in the elements of government and finance. If his experiment has failed, let us, at least, before coming to any definite opinion, wait until we hear how and in what spirit it has been carried out. I have no desire to say a word against one who is no more; but I say nothing against Mr. Birch when I say that he had little or no knowledge of the Malays, of their language, character, feelings, or habits, and that his best friends might justly have felt anxiety at his appointment for the delicate task allotted to him. That the experiment did fail is unquestionable, and if Sir W. Jervois has adopted the more decided course of what seems to be virtually taking over the country from the Sultan Abdullah, he has had ample encouragement. Last year, when Lord Stanley of Alderley arraigned in the House of Lords the course adopted by Sir A. Clarke as foreshadowing, if not amounting to, annexation, Sir Andrew was defended by both Lord Carnarvon and Lord Kimberley. Sir W. Jervois might reasonably infer that if he was to move at all it must be forwards, not backwards; and move he must, for things were at a dead lock in Perak between the Resident and the chiefs. That the Chinese in Larut earnestly desire that the country should pass from the grinding tyranny of the Malay Princes to our rule I have no doubt, and I believe that the transfer would be a great gain to the peace and prosperity of the colony, without costing a penny to this country, and would be readily made by the Malay chieftains in return for moderate pensions. Whether it would be worth our while to take the rest of Perak as a present may be more doubtful; but I trust that we shall soon hear the last of our vexatious interference with Salangore. If we persist in maintaining an obnoxious ruler there we may expect to hear any day of some act of violence which will compel us to a fresh exhibition of force.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, NOV. 30.

The struggle between our Free Traders and Protectionists still continues to be the topic of the day. As you know, our Parliament resolved in 1873 upon the abolition of iron duties from the 1st of January, 1877, and since that time our Protectionists have made great efforts to shake the conviction of our leading politicians in this matter, You may believe that a great many petitions *pro* and *con* are addressed to the Reichstag, and this latter has elected a so-called petition committee, which has, firstly, to examine them before they are placed before the members. This committee has resolved not to consider all these petitions, but to pass to the order of the day—in other plain words, to maintain the abolition of the iron duties. Although the resolution of the Reichstag is still outstanding in this matter, you may rest assured it will be favourable to the Free Traders.

The past fortnight has been prolific in meetings of shareholders. The first meeting was held by shareholders of the Hamburg American Packet Company on the 20th of this month, with the result of an election of two directors. The board read on this occasion a satisfactory report. The freights from New York to Hamburg show a considerable increase, and give for the time the largest revenue. As for the West Indian line of this Company the freights have continued to be most remunerative, and it is intended to despatch, as already reported, a vessel twice a month from the 1st December. The steamer *Vandalia* has been chartered by the South American Steam Packet Company, and has left our port for the Brazils with a full cargo. The result of trading has, therefore, been this year generally favourable, but a dividend cannot be expected, as the losses of the past year, which are still to be provided for, have been too great.

The second of the above mentioned meetings of shareholders was that of the Commerce and Discount Bank, which took place on the 22nd of this month. You will remember that a number of shareholders of this establishment requested the directors to call this meeting with the intention to propose a reduction of the paid-up capital to the amount of sixteen and a half millions of marks. This reduction was agreed to by 1,572 against twenty-one votes. Another meeting during the past fortnight has been that of the shareholders of the Railroad Waggon Constructing Company, in Hamburg. The directors declare in their report (July 1, 1874, to June 30, 1875) a dividend not to be advisable, as the transactions during the year under review have only reached the sum of 2,933,652 marks, that is, not much more than a half of the transactions in 1873-74. Orders to the amount of one and three-quarter million of marks are carried over to the new year.

The German Transatlantic Steam Navigation Company held a meeting of shareholders on the 26th Nov., and has issued a report, which contains the following details. The association with the Hamburg American Packet Company, which had been resolved at the meeting of the 24th April, is now completed; the Transatlantic Company has delivered to this company six large steamers (the *Schiller* has been wrecked, it will be remembered), the steamer *Hoboker*, six lighters, several buildings in Hamburg and Gluerkstadt, together with provisions, coals, and other materials. The Hamburg American Packet Company paid for this:—

m.100,250	cash.
4,750,000	in 5 per cent. Preferred Bonds of the Hamburg American Packet Company.
6,474,750	in fully paid shares ditto.
m.11,325,000	and
173,332	cash for the above-mentioned provisions, coals, and materials.
m.11,498,339	
248,700	have besides this amount been realised for sold ground-property in Hamburg.

The directors propose a liquidation of the company, and a realisation to this effect was proposed at the meeting on the 26th inst., but this meeting was such a noisy one, and so many interpellations were made to the directors, that a second meeting has to take place, which is already called for December 16.

The East Siberian Trading Company has called a meeting of shareholders for December 16. The report and balance-sheet are not yet published.

During the night of Nov. 23 the Danish schooner *Victor*, from Altona to Copenhagen, whilst lying at anchor on the lower river near Brunshausen, was run into by the English steamer *Ouse*, and so severely damaged that she sank almost immediately. The crew with great difficulty saved their lives, but lost all their effects; the steamer received very little, if any, damage. Another case of collision, exactly similar, took place yesterday morning between the English steamer *Sultan*, for Hull, and the Danish schooner *Astrea*, for Helsingborg, with guano. The latter vessel, while at anchor at the same place as the *Victor*, sunk very shortly after the collision, the crew being saved, except one ordinary seaman.

Fears are entertained here that the steam fleet of Hamburg, which only recently had to complain of a considerable loss (that of the steam-collier *Altona*, which foundered off Sunderland in an easterly gale), has again suffered; the *John Sauber*, s.s., Captain Ohot, which left Sunderland on Nov. 19, with a full cargo of coals, for Hamburg, has

Digitized by Google

neither arrived here nor been heard of, and no doubt, in the recent gales, has foundered, with all hands. The *J. H. Love*, of Flensburg, from Cronstadt to Amoor, with provisions, &c. (Russian Government charter), proceeded on her voyage from Elsinore on Nov. 17, and perhaps may call at some port in China.

It is gratifying to state that the building of iron steam vessels in Germany makes good progress; this is especially the case at the yard of the Norddeutsche Schiffbau Artien Gessellschaft (Company for the Construction of Vessels) at Kiel, which company, from the 1st July, 1874, to the 1st July, 1875, besides a very reasonable allowance for diminished value of the yard, tools, &c., have been able to pay a dividend of 12.4 per cent. per annum, certainly a good result for such a dull period for all branches of the business as the present. The company has at present six steamers under construction, among which there are, besides the *Hesperia* steamship, 2,000 tons (for the Deutsche Dampfschiff Gessellschaft), two iron frigates for the German Navy. The Vulcan, another company at Stettin and Konigsberg, is also doing very well, and has also already built several vessels for the Imperial Government.

The newly-reported measures of the English Government, concerning the Suez Canal, has met here, as well as throughout the whole country, with uniform approbation. Certainly the unexpected news created some stir upon our Exchange, but calmly regarded, every one acquainted with the question finds that the step is the best way of securing a neutral character and good futurity to this great fairway.

As news very important to the shipping interest, especially for the North Sea trade, it is to be reported that the Government of Denmark has at last given hearing to many complaints made about the insufficient providing of the dangerous Horns-reep, on the Western Coast of Juteland with sea marks, and that this obstacle in future will be provided with a light vessel.

Regarding our communication with East India, China, &c., we only have to report the arrival of one vessel, the Carl and Augusta, from Leonka (Pacific Ocean), on Nov. 20. Of departures are to be reported the Terpsichore, on the 17th, for Wellington (N.S.); Frank Wilson, for Papeite; Orion, on the 22nd, for Enderburg; G. H. Wappaeus, on the same date, for Singapore; the Candare, on the 24th, for Yokohama; and the Zylland, on the 27th, for Hong Kong; the latter lost her martingale on the river, but was not retarded by this little mischance. On the berth are at present for the Far East the before reported vessels: Bellona (s.s.), to leave on Dec. 15; Therese Behn and Deutschland, both slowly filling up; the Gutenberg is advertised for Wellington (N.S.), on the 10th Dec.; and the Anna, for San Francisco. At the present rates of freight, I may quote heavy goods at 45s. to 50s. in full; measurement goods, 50s. and 10 per cent. for forty cubic feet (English) for steam; 15s. and 20s. respectively for sail, both for Singapore. Shipping in general goes on fairly, but for two days a rather severe frost (7 to 8 degrees at nights) has set in, and this morning there is much young ice in the river, which would soon obstruct the traffic at least for modern sailing vessels if the frost should keep on.

In regard to the affairs of the International Bank, no definite action has been taken. Dr. Mittelstruss, who represents the section of shareholders who advocate winding up, does not feel strong enough to challenge the board of directors who are opposed to it.

PRODUCE MARKETS.

The tone of our Produce Markets is without any animation, and transactions of importance are not the rule.

COTTON.—Business has been of a very limited character. Quctations for Surat and Bengal quite nominal.

SPICES.—Mace and Nutmegs in limited demand, the former are quoted m.6.20 to 6.60; the latter m.6.40 to 7.00 per kilo. Cloves maintained; Amboina m.172 to 175 per 50 kilo.

PEPPER: Quotations are reduced to m.53.50 to 54.00 for Singapore, and to m.40 to 50 per kilo. for Penang quality.

RICE has freely moved; quotations, Japan m.10 to 13½; Java, m.12 to 14; Java table, m.16 to 21; Bengal, m.11 to 15; Siam, Madras, Ballam, m.8 to 11; Rangoon, m.8¾ to 9; Bassein, m.8½ to 8¾; Arracan, m.8¼ to 8½; Maulmain, m.8¾ to 9; Saigon, m.8 to 8¼, per 50 kilo.

TEA quiet, and demand only for consumption; quotation per ½ kilo.: Congou, ordinary to good ordinary, 1.00 to 1.15 marks; ditto middling to fine, 1.35 to 4.00; Souchong, ordinary to good middling, 1.20 to 1.70; ditto fine, 2.60 to 4.00; Caper, 1.50 to 2.00; Souchong, 0.90 to 3.00; Pecco, ordinary to good middling, 1.80 to 2.40; ditto fine, 3.80 to 5.00; ditto orange, 1.25 to 3.40; Haysanschin, 0.90 to 1.80; Tonkay, 0.90 to 1.80; Younghaysan, 1.10 to 2.70; Haysan, 1.70 to 3.60; Imperial, country, 1.50 to 3.60; ditto, Canton made, 0.90 to 1.70; Gunpowder, country, —; ditto, Canton made, 0.85 to 2.60.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, DEC. 1.

"Much ado about nothing" may be said of a three days' debate which has taken place in the Second Chamber. It was a struggle for mastery, and the Liberal members did all they could to beat the Cabinet, but in vain. The result of the prolonged discussion was equal to nothing. It is a common error in politics to command means with ends, and the Liberal party took on this occasion a relatively insignificant question in order to overthrow the Cabinet. You will remember that the First Chamber passed, some weeks ago, a vote that the Ministry had not promoted the interests of the country by concluding a contract with the Dutch-Rhenish Railway Company for a junction at Rotterdam. In consequence of this fact the Premier and the Minister of the Financial Department tendered their resignations, but the King declined to accept them. The Ministers consequently remained in office. The members of the Second Chamber, however, resolved to pronounce their verdict upon the subject. But, as I have already stated, the endeavour was unsuccessful, inasmuch that no majority could be obtained for the resolutions which were brought forward. The Ministerial crisis is therefore once more delayed, and the majority must wait for another chance of overthrowing the Cabinet. It is by no means quite clear why such a policy is practised just now, and I can assure you that this opposition is not approved by the majority of the nation. Even Liberal papers criticise the behaviour of the majority in Parliament and demonstrate that the moment has not yet arrived to force the Ministers to leave office. It is of course a constitutional anomaly that a Cabinet having only a minority in Parliament at its command should take the reins of Government. But this became necessary because the Liberal party was so divided that several of its administrations were obliged by those who ought to have been its supporters to resign. And this division still prevails notwithstanding that Mr. Viruly—the mouth-piece of the Rotterdam clique—has stated that "We are quite ready to govern!" The general conviction is that the Liberals are not ready, and that it would be impossible at the present moment for them to take office. Moreover, the nation is quite content with the measures brought forward by the present Cabinet. What the end of this struggle for mastery will be is not quite clear. In the meanwhile the general discussions upon the Budget were opened yesterday, and singular to say—brought to an end, in only one sitting. Mr. Insinger protested that the country is not duly represented; inasmuch that while the Constitutional Law prescribes that there shall be eighty-three Members in the Chamber, there are in fact only eighty. Mr. Blusse made some sharp remarks about the state of our finances, and demonstrated that the Minister had not done all he might have done to increase the national revenue. The Minister defended his policy, and was backed by the Liberal member, Mr. de Bruyn Kops. An other Liberal, Mr. Van Eck, advocated once more that Java does not contribute to our treasury to the extent it ought to do. He was of opinion that the colony still owes to the mother country a large sum, and Mr. Kops maintained that all the favourable balances, resulting of course from the "squeezing" system, ought to be used for reducing our taxes. It is not enough that the Colonial revenue is employed to build *our* railways, *our* harbours, and *our* fortresses; we must also make the natives pay *our* taxes. These are now the glorious principles of our Liberals; but let me in justice add, that Mr. Van de Putte warmly protested against such a policy.

I just now said that people are quite content with the measures of the Cabinet, but it is necessary to qualify this by stating that there is no sympathy at all with the plan of the Minister, Van der Heim, for the reorganisation of our system of taxation. In my last letter I told you that he proposes to levy a tax of twenty-two cents per kilo. upon tobacco, whether manufactured or not, and this does not please either the trade or our smoking population. His project was scarcely known before a meeting was held in Rotterdam of "parties interested in the trade and consumption," in order to protest against the measure. It was scandalous, it was said, to destroy in this way our tobacco trade with Java, which in ten years has increased from 150,000 bales, representing eighteen millions, a year to 270,000 bales, of a value of twenty-five millions. Our cigar manufactories flourished; our cigars are sent to every country in Europe; a large number of acres of land are devoted to the growth of the plant; and the annual produce of the home grown crop amounts to 2,500,000 kilo. It may therefore be fairly accepted that tobacco is one of the best branches of our trade. All this the Minister will annihilate by his tax, which is even higher than that imposed in Belgium and Germany, and it would, moreover, be most unjust to the poorer classes, who would have to pay for their tobacco, now obtainable at eight or ten pence the pound, as much as the rich man for his Havana cigars. This evening a meeting will be held here, and we shall probably have a repetition of the same arguments. This anti-tobacco tax movement is very general, and it is highly probable that both Mr. Van der Heim and his plans will disappear at the same time.

Prince Alexander has started for Algiers. His health—it is stated—is very bad. The Queen has quite recovered, and she would have gone out if the weather had not suddenly become bitterly cold and wintry. The canals are frozen, and the streets are covered with snow.

It is stated that the Star Ball Line Company has given up the competition with the other East Indian Steam Navigation Companies. Its steamers, according to the *New Yorker Handels Zeitung*, will henceforth ply between New York and the Brazils.

A lull still prevails on the Bourse. There is the greatest want of confidence, and people decline to invest their capital. Money is very cheap. The new year will bring us a *nouveauté* in banking, viz., a Co-operative Bank, à *L'instar de Londres*. I do not know if it is quite safe to repeat the rumours which are current about this plan. All that I dare to say is that the public has not much confidence in those financial self-help-institutions.

PRODUCE MARKETS.

The Market for Colonial Produce has remained very dull, and private transactions have been of no importance.

COFFEE.—The Trading Company's auctions, at which 93,226 bales were offered, went off satisfactorily, especially for the green quality, which realised ½c. to 1c. above the valuations, the other sorts being sold ½c. to 2c. under the brokers' valuation. The market is now very quiet.

TEA looks rather dull, though some small parcels have changed hands; prices, though nominal, are firm.

SUGAR.—The market is not much altered; some days ago there was some improvement, but buyers disappeared again.

RICE quiet, without transactions; Java and Java table have met with a trifling demand.

SPICES.—A few small lots were brought into the market, and found ready buyers at, in some instances, former prices; pepper unaltered.

COTTON.—There is no speculative demand, notwithstanding that prices are very low.

JAVA TOBACCO has been quiet; several parcels Java and Sumatra have arrived. In December important lots will be offered by private tender.

JAVA INDIGO.—Except the 130 chests damaged ex Thomas Sorby no parcels of any importance have found buyers. Prices remain unaltered.

Monetary and Commercial.

Tenders for £700,000 in bills on India were received at the Bank of England on the 1st inst. The amounts allotted were:—To Calcutta, £376,900; to Bombay, 269,600; and to Madras, £53,500. Tenders on all the Presidencies at 1s. 9 7-16d. will receive about 9 per cent., above in full. These figures show a slight falling off in the demand for remittances to the East.

The allotment letters have been sent out of an issue of Six per Cent. Debentures for £150,000 of the Telegraph Construction Company, to replace Seven per Cent. Debentures falling due. The issue was made exclusively to the shareholders of the company; but from the amounts allotted the applications have been largely in excess of the issue.

The Eastern Telegraph Company (Limited) announce that their rules and regulations, based on the recent international Telegraph Convention of St. Petersburg, are now issued, and will come into operation on the 1st January, 1876. The Indo-European Telegraph Company (Limited) have also issued their tariff from same date.

The directors of the Eastern and Eastern Extension Telegraph Companies have decided to call their shareholders together on the 16th inst., to consider a proposal to duplicate their lines from Suez to Aden and Bombay, and from Rangoon to Penang.

Mr. Malet, C.B., Her Majesty's Secretary of Legation at Rome, attended on the 29th ult. at Macclesfield on behalf of the Foreign-office, to make inquiries as to the facts connected with the English silk trade which should guide this country in the negotiations with reference to the renewal of the Italian Treaty, which expires in June next. Mr. Brocklehurst, M.P., and some influential members of the Chamber, met Mr. Malet, but in the absence of any knowledge respecting the views of the Italian Government, the conversation was principally of a speculative character.

In reference to the statement in our last issue, in regard to Messrs. Peele Hubbell, and Co., of Manila, we understand that the meeting we announced was confined to the *depositors*, who willingly afforded the necessary time. The general mercantile business of the firm has not been disturbed by this event, which may be attributed to the panic caused by the failure of Messrs. Russell and Sturgis.

The total quantity of tea delivered from the bonded warehouses in London during the week ending the 27th ult. was 3,120,263lb., of which 2,088,641lb. was for home consumption, 775,990lb. was removed coastwise, 139,868lb. was exported, 111,702lb. was sent coastwise for exportation, and 4,062lb. was for ships' stores. The duty received amounted to £52,216, which, when compared with the £52,959 received in the previous week, exhibits a fall of about 1½ per cent.

The Market for Bar Silver has become slightly weaker, and the supply by the Pacific and West India steamers has been sold at 56¾d. per oz. for Spain and Paris. Mexican dollars, about £60,000 in value, have been sold at 55¼d. per oz. showing a reduction in price of ¼d. per oz. They have been taken partly for China. Exchange on India for Bank drafts at sixty days' sight is 1s. 9 1-16d. per rupee.

The amount of bullion per P. and O. steamer *Surat*, from Southampton on the 2nd inst. was: In gold to Galle, £2,158; to Penang, £2,000; to Singapore, £4,500; in silver to Penang, £20,000. Total in gold, £8,658; in silver, £20,000.

ARTICLES OF IMPORT.

TEA.

Messrs. Arthur Capel and Co.'s Circular says:—There is no improvement to notice in the tone of our market, which still continues to be very inactive, and the amount of business is much below that usual at the period of the year. Importers generally refrain from pressing sales, especially of the better kinds, but considerable sales have been made of common to good common Congous, both in red and black-leaf-kinds, from 9d. to 11d. per lb., showing a further decline of ¼d. to ½d. per lb. The public sales have consisted of 12,717 packages, the whole of which have been offered and sold without reserve. The stock in the United Kingdom on the 30th ult. was estimated at 97,009,000 lbs., against 80,672,000 lbs. last year, and the quantity afloat (advices by letter) at 11,373,000 lbs., against 31,192,000 lbs. of China tea, and 1,019,900 lbs., against 2,020,000 lbs. of India tea.

Congous.—Red-leaf kinds: Siftings being comparatively scarce, are in fair demand at previous prices. Sales of common to good common have been made from 9d. to 11d. per lb., being ¼d. to ½d. per lb. lower. Fair to good Kaisows meet only a slow sale at about previous prices. A few fine have been sold at previous rates. Pak Lin kinds show no alteration; the demand continues limited. In Black-leaf kinds sales have been made at auction and privately from 9d. to 10½d. per lb., being rather lower prices. Fair medium kinds from 1s. 1d. to 1s. 3d. are heavy of sale. There has been a moderate inquiry for good medium from 1s. 4d. to 1s. 5d. per lb. Good to fine show no material alteration; a few sales have been made from 1s. 6d. to 1s. 9d. per lb. Finest remain dull of sale in the absence of Export demand. Newmake kinds: Common have sold from 9½d. to 10d. per lb., being rather easier: other sorts showing but little change. Oolongs have sold at public sale at previous prices. In Souchongs there is no material alteration to notice.— *Scented Teas:* Canton Capers sell slowly at the decline last quoted. Orange Pekoes: long-leaf kinds have been difficult of sale at a decline of about 1d. per lb. Foochow Capers remain very unsaleable. Orange Pekoes: fair kinds have sold from 1s. to 1s. 1d., being ½d. per lb. lower; good to fine show no change, but there is not much inquiry for them.—*Green Teas:* The sales making are chiefly at public auction at low and irregular prices for common to fair Moyune kinds and nearly all grades of Ping Suey, the finer lines selling rather better.

Messrs. Thompson's Circular says:—The market has been extremely dull, and there has been almost a cessation of business, except the public sales, which have also been small in extent. The arrivals for the last month have been very heavy, and the stock in the United Kingdom is 97 millions, against 80 millions last year. Importers, however, are inclined to firmness, looking at the moderate amount still to come forward before the close of the season.—*Foochow Congous:* Siftings and broken leaf are not at present in over supply, and quotations are unaltered. Common to fair have been realised at auction at lower rates—9½d. to 11½d.; medium to fine are held for late prices, but are not in demand.—*Black Leaf Congous:* Common to good common continue to be pressed at auction at 9d. to 10½d. per lb., in some cases showing easier rates; fair to medium are dull at 11½d. to 1s. 4d. per lb., and good to fine, at 1s. 6d. to 1s. 10d., can only be realised at some concession in price, but importers generally are firm, and prefer withdrawing their Teas from the market.—*Souchongs:* Fair to medium are still wanted at 1s. 2d. to 1s. 6d. per lb.—*Scented Teas:* Canton Capers and Orange Pekoes are not inquired for, and prices remain nominally the same. Foochow Pekoes do not show any improvement, and fair to medium, well scented, sell at 11½d. to 1s. 3d. per lb.—*Green Teas:* There is not any change to notice in these descriptions.

	1875. lbs.	1874. lbs.
United Kingdom stock, on the 30th Nov., 1875, was estimated at	97,000,000	80,000,000
Cargoes of vessels arrived up to date, but not included in the above stock, with portion of other cargoes only partially included	4,000,000	7,477,000
Amount on the water advised by telegraph to 18th Nov., against actual shipments to same date last year	19,770,000	39,927,000
	120,770,000	127,404,000

SILK.

Mr. John Kershaw's Circular reports that the market has been without animation; there has been very little desire shown to purchase, and Importers have been throughout the month firm holders. In China Silk there has been a daily small business for the supply of wants, Tsatlees from 13s. 6d. to 14s. 6d. have been in most demand, but buyers have been very difficult to please; some recent arrivals of common Tsatlees have changed hands at 12s. 6d. to 12s. 9d., but the demand for the better class of No. 5 Silk seems to have ceased. Good Kahing Taysaams are still scarce, the few parcels which have come to hand having found buyers at 15s. 9d. for Chop "Gna Ling." Japan Silk is quite neglected, the low prices of Italians having apparently induced Manufacturers to supply its place with that Silk for a time. Cantons remain very dull; No. 4 Tsatlee reel is generally held for 11s., but at this price there are no buyers; a few parcels of choice No. 1 have changed hands, but the medium sorts are not inquired for. Bengal Silk is still quite out of favour. The Deliveries for November did not keep pace with importations, and there is therefore a slight increase in the stocks, but compared with this time last year figures show a diminution of nearly 12,000 bales, total Stock on 1st December being 30,088 bales, against 41,966 at same date in 1874, the whole of the reduction being in China Silk.

Messrs. Waithman, Hogg and Co.'s Circular says:—There is no improvement to notice in the position of the market, the business of the past month has again been on the most limited scale, and chiefly restricted to the supply of special requirements; importers, on the other hand, have been content to wait until a more general demand sets in, and as a rule are firm holders. Both Chinas and Cantons have been in very small request, transactions in the former being mainly in best Kahing Taysaams and good Tsatlees, and these have commanded full rates, but in other classes there has been little or no disposition to do business. Japan Silk has shared in the general inactivity. The deliveries continue on a fairly satisfactory scale, but owing to the larger arrivals of last month, there is a slight increase in the stock of Chinas, Cantons, and Japans.

Messrs. Durant and Co.'s Circular says:— We have to report a month of very small transactions in Silk. The deliveries are fairly good, and holders generally very firm. Buyers, too, make no attempt to induce reduction in price, but in the meantime they take only what they really require, unless tempted by some small parcel of special size or quality. Japan Silk is evidently feeling the competition of European Silk, which is much pressed for sale—otherwise the low prices at which it is offered would ensure a larger consumption. In Canton Silk there has been little general business, the better classes only attracting attention, the large deliveries being chiefly from the Silk sold in the public sales of the previous month.

CINNAMON.

The last quarterly auctions of the present year, which were held on the 29th ult., offered a total of 3,515 bales Ceylon, against 1,969 bales at the August sales, and 3,025 bales in November, 1874. The sales commenced flatly, and as biddings were only made at some reduction, a good portion was bought in. Importers afterwards met the market

Digitized by Google

freely, and nearly the whole of the remainder found buyers at an irregular decline; fine qualities, of which a larger proportion than usual consisted, showed the greatest decline, first sort and superior being 3d. to 5d. per lb. lower than the previous auctions, second sort was 2d. to 3d., and third and fourth sorts 1d. to 2d. cheaper, whilst coarse and jungle sold rather dearer; one case very superior selected sold at 4s. 8d. Of the whole about 2,550 bales were sold at follows:—

808	First sort, superior sold at...	3/2 to	3/9
	good to fine	2/8	3/1
	ordinary to medium	2/3	2/7
1,510	Second sort, fine and superior	2/7	2/11
	medium to good	2/3	2/6
	ordinary...	2/	2/2
895	Third sort, good to fine	2/4	2/6
	ordinary to medium	1/11	2/3
302	Fourth sort, good to fine	1/11	2/
	low to medium...	1/2	1/10

Of 374 bags Ceylon Chips offered about 240 bags sold at steady rates, middling to good at 4¾d. to 6½d., cuttings and broken quill at 11d. to 1s. 7½d. per lb.

The next sales are fixed for the 28th February.

COFFEE.—A larger supply has been offered than for many weeks past, the greater part consisting of plantation Ceylon, which met a steady demand, and sold at firm rates for coloury, but 6d. lower for grey. Other descriptions of East India have been mostly bought in. Plantation Ceylon has sold, triage at 87s. to 93s., grey to coloury small at 96s. 6d. to 102s., low middling at 103s. 6d., middling at 104s. to 106s. 6d., good middling and bold at 107s. to 110s., pea-berry at 118s. to 120s. 6d. The supplies of Native Ceylon have been nearly all bought in or withdrawn, fine ordinary at 94s., only 95 bags being sold, good ordinary at 93s., pea-berry at 102s.; of other East India 246 bags Singapore sold, mixed pale Bally kind at 88s., good ordinary pale 90s., good bold pale 97s. 6d.; 215 bags mixed Singapore were bought in at 83s.,and 200 bags Manila have been sold at 93s. per cwt.

CHINA STRAW PLAIT.—At auction 336 bales 3 cases met a moderate demand, and 130 bales and the cases sold, chiefly white ordinary to middling coarse, £7 17s. 6d. to £9 17s. 6d.; good middling to good qualities, £11 to £17 10s.; fine, £22 15s. to £29 15s.; one case superior, £39 10s.; ordinary (new) mottled, £6 7s. 6d. to £6 10s.; fair ditto, £10 5s. per bale.

CHINA PRESERVES.—At auction of 234 cases Ginger offered, 160 cases sold at 6¾d. to 8½d., large jars 9¾d. Twenty-six cases Chow Chow partly sold at 7¼d. per lb.

COCOANUT OIL.—The demand has been quiet; Cochin is quoted £41 10s., Ceylon £38 15s. to £39. Ceylon for future shipment is rather more inquired for, with buyers at £38 10s., and sellers at £39. Of 93 casks Cochin in public sale 4 casks fair sold at £40 10s., the remainder bought in at £40 10s. down to £38 for low. Of 166 casks Ceylon 18 pipes fine sold at £39, 11 puncheons at £39, and 45 hogsheads at £39, one lot £39 5s.

COIR GOODS.—At the public sales small supplies of Yarn at auction went off slowly for common kinds, and prices were rather lower, but good to fine, both dholls and bales, sold at firm rates. The few lots of Fibre, mostly in second hands, were partially sold at full prices. Rope was chiefly sold at rather irregular rates. 100 bales fine Ceylon Yarn sold at £43 15s. to £44 15s.; of 155 tons in dholls about 90 tons sold, very common to common at £24 5s. to £25 15s., good common to medium at £27 to £29, chiefly good even make at £32 10s. to £35 5s., fine at £37 15s. to £40.

COTTON.—The market maintains a steady tone, although the demand has been rather slow, and sales are moderate. The sales for the week ending last evening are about 7,200 bales. On the spot: Tinnivelly at 5¼d. to 5⅞d., fair to fine; Western Madras 4¾d. to 5¼d., middling fair to fine; Northern ditto 5⅝d. to 5⅞d., good fair to good; Scinde 5d., good; Bengal 3¾d. to 4⅝d., middling fair to good. For arrival: Tinnivelly 5½d. to 5 9-16d. December-January, good fair; Western Madras 4 13-16d. to 4¾d. December-January, good fair, 4 9-16d. fair; Coconada 4 13-16d. June sailing, fair red.

COLOMBO ROOT.—Of 38 bales offered 22 bales dull with some fair bright sold at 20s. to 21s. 6d., and 3 bales pink with tops at 1s. 10d. to 1s. 11d.

CANTHARIDES.—Four cases China have been sold at 3s. 7d. to 4s.

GALLS.—Privately 100 cases China have been sold at 62s. 6d.

GAMBIER continues slow of sale; about 200 bales have been sold at 26s. 9d. to 26s. 10½d. for whole bales.

HIDES.—At the periodical public sales yesterday there was only a moderate demand for East India. Singapore and Batavia Ox and Cow, of good quality, brought full rates, but Rangoon were inferior, and sold at low prices. There was hardly any bidding for Buffalo.

INDIA-RUBBER.—There has been a fair demand at auction for West India, but 172 cases Borneo were bought in at 9d. to 1s. 3d., except 21 cases, which sold at 1s. 2¼d. to 1s. 2¾d., ordinary 9d. per lb.

JAPAN TALLOW.—Of 179 tubs offered in public sale 147 tubs sold, very dark brown partly rather greasy and dregged to rather dark and dark fair bodied dregged at 40s. to 42s. 9d.

JAPAN WAX.—An offer of 140 boxes Japan, chiefly good slabs, was bought in at 49s. per cwt.

MUSK.—Of 50 caddies Tonquin offered 33 caddies sold, 1st pile, good shaped with a few rather skinny at 47s. 6d. to 50s., rough and bally with some fair shaped at 43s. to 43s. 6d., 2nd pile fair shaped at 23s. 6d. to 22s., rough and skinny partly bally at 16s. 6d. to 15s.; 7 tins good Cabardine sold at 14s. to 14s. 6d.; 3 tins pods bought in at 2s. 6d. to 7s. 6d.; 1 tin skins sold at 2s. 11d. Of 11 tins grain 5 tins rather dark and damp of rather indifferent flavour sold at 36s. 6d. to 37s. 6d., the remainder bought in at 65s. down to 30s. for inferior.

PEPPER.—*Black:* The public sales offered a total of 2,638 bags, consisting chiefly of Singapore, which was difficult of sale, and only a small part was disposed of at previous rates. Of 1,447 bags 400 bags sold, fair to fine at 5¼d. to 5⅞d., inferior mixed at 5d. Of 813 bags Siam 450 bags sold at 4¼d. to 4⅝d., the remainder bought in at 4¼d. Of 352 bags good Trang 20 bags sold at 5d. *White:* Only 129 bags were offered by auction, but all bought in, 31 bags good Singapore at 8d., and 98 bags Penang at 7⅝d. *Long Pepper:* 77 bagsSingapore bought in at 75s.

RICE.—The market has been quiet, with few transactions reported this week. Business has been done in new Rangoon, February and March shipment, at 8s. 4½d. A cargo of Rangoon off the Coast sold at 8s. for the Continent. On the spot, 250 tons broken Rangoon sold at 6s. 7½d. per cwt.

RATTANS.—At auction of 19,140 bundles (88 tons) offered only about 4,000 bundles sold, common £16 10s. to £16 17s. 6d., Penang £26 per ton.

SPICES.—*Nutmegs:* At auction 54 cases 21 casks Penang and Java, consisting chiefly of limed, met little demand, and were all bought in, average 96 nuts to the lb. at 3s., 106 to 121's at 2s. 10d., but mostly limed 190 to 96's at 1s. 2d. to 2s. *Mace:* The larger supply of 44 cases Penang met biddings only at some reduction, and the bulk was withdrawn or bought in, only 4 cases selling at 2d. decline, middling red at 2s. 2d.; 20 boxes ordinary Java bought in at 2s. per lb.

SAGO.—In public sale the good supply of 2,011 bags, consisting almost entirely of small, went off flatly, and only 1,000 bags sold at a decline of 3d. to 6d. per cwt., good bright small pearl at 16s. 6d. to 17s., grey to middling at 15s. 6d. to 16s., heated at 13s. 6d. *Flour:* 1,448 bags Borneo were all sold at 13s., a few lots at 13s. 3d.

SUGAR.—No improvement has been apparent in the market, and the inquiry being extremely limited, transactions have been scanty, no alteration in prices can therefore be reported. There has been a complete absence of business in East Indian descriptions.

TOBACCO.—In public sale 462 bales Japan sold at 6¾d. to 7⅞d., 999 bales Japan damaged 2d. to 7d., 176 bales China 7d. to 8d., 124 bales China damaged 5⅞d. to 7d., 37 bales Sumatra chiefly 1s. 5d. to 2s. 9d., 3 bales Java 1s. 11d. to 3s. 11d., and 1 bale Manila 3s. 7d.

TAPIOCA.—646 bags Singapore went off slowly, and only 100 bags sold, good small at 2¼d., the remainder bought in, fine at 2⅝d., old at 2⅛d.; also 316 bags old Penang at 2¼d. *Pearl Tapioca:* Supplies continue in excess of demand, and of 898 bags offered 524 bags sold at barely previous rates, chiefly good medium at 18s. *Tapioca Flour:* Of 698 bags Singapore 410 bags sold again easier at 1⅞d. to 2d., chiefly at the latter price.

TIN.—Messrs. French and Smith's Circular says:—Last month the news of the murder of the British Resident at Perak, a district in the Malay Peninsula from whence we draw an important supply of Straits Tin, and the consequent conflict between our troops and the Malays, caused some speculative buying, and prices advanced about £2 per ton; but shortly afterwards direct telegraphic communication with the Straits Settlements became interrupted, and both buyers and sellers refrained from entering into further engagements. The market became languid, and the advance was soon lost. Deliveries of foreign here and in Holland have been small as compared with previous months, but for English there has been an improved demand. Some attention has been drawn to a letter appearing in a public print, from which it would appear the production of the Straits has considerably increased; the actual figures may therefore be not uninteresting. Shipments from Penang and Singapore to America and Europe for ten months ending October 31st, 1875, were 9,071 tons, against 7,492 twelve months 1874, 6,963 twelve months 1873, 9,785 twelve months 1872, from which we infer that during 1873 and 1874 the yield fell off, owing to disturbances at the Laroot mines, and that during the present year production has regained its usual proportions. On the 30th ult. 23,041 slabs Banca sold at Dutch Trading Company's sale at average price of fl.50.60, equal to about £86 10s. laid down here. Quotations are, Straits on the spot £81 10s. to £82, afloat £82; Banca £86, Billiton £83 per ton.

Stock of	Dec. 1, 1875. Tons.	Dec. 1, 1874. Tons.	Dec. 1, 1873. Tons.
Foreign in London, estimated at...	5,950	2,698	1,537
Banca in Holland, Warrants ...	410	815	1,500
Billiton in Holland, ditto... ...	770	1,025	570

VANILLOES.—In auction an offer of Java frosted sold 5 to 5½ at 32s., 5 to 6 at 34s., 4½ to 5½ at 36s., slightly mouldy 4½ to 7 at 28s. 6d., 4½ to 6 at 28s., 4 to 4½ at 26s.

ARTICLES OF EXPORT.

MANCHESTER GOODS.

There has been no improvement in the demand for either Yarns or Goods, and the tone of the Market has been quite tame, with the tendency of prices in buyers' favour, still without any disposition on the part of producers to make reductions for the sake of further engagements.

METALS.

Iron.—Welsh: Rails, £6 10s. to £6 15s.; Bars, £7 5s.; Staffordshire Best: Bars, £8 15s. to £10; Nail Rods, £9 to £9 10s.; Hoop, £10 5s. to £12; Sheets, £11 15s. to £13; Scotch Pig, No. 1, £3 3s. to £3 18s.; Swedes, Bars, Hammered, £15 10s. to £16 10s.; Swedes, Steel in kegs, ½ and ⅝ in., £18 10s. to £19.

Yellow Metal.—Sheets, 4 by 4 ft., 7⅞d. to 8d.; Sheathing and Rods, 8d per lb.

Tin.—English Refined, £88. Tin Plates: Charcoal IC, per box, 26s. to 32s. Coke, 21s. 6d. to 26s.

Lead.—WB, £23 10s.; do., other brands, £22 to £22 5s.; Spanish soft, ex ship, £21 10s.; Sheet, £23 10s. to £23 15s.; Shot (kegs extra), £26 10s. to £26 15s.; White do., £29 10s.

Spelter.—Silesian, £26.

Quicksilver.—In bottles of 75 lbs. each, £13.

Messrs. French and Smith's Circular says:—The Metal Markets participate in the general dulness of trade, which is almost stagnation. Iron, for all description of manufactured, continues very depressed and more especially Railway Iron. Pig Iron is, however, in good demand. Copper: Nothing occurred during the past month to change the value of this metal, business being curtailed within the narrowest limits. Tinplates: The shipments continue large, but price rather lower. Lead: There has been a steady demand, and price advanced about 5s. per ton; it is now very firm. English Pig, £22 to £22 5s.; Spanish Soft, £21 10s. Quicksilver during the past month receded to £9 10s., or even £9 in some cases, per bottle, and is now quoted up to £13. The stock on the spot is small. Spelter may be quoted £1 dearer than at the commencement of last month. Zinc unchanged. Antimony without change.

Shipping Intelligence.

CASUALTIES.

ST. HELENA, Nov. 2.—The Loch Awe, arrived here from Batavia, reports:—October 4, off Cape St. Francis, came suddenly amongst a number of whales, striking one of them and sustaining damage to bows and cutwater; 7th to 11th Oct., off Cape Agulhas, experienced N.W. gales, lost longboat, coops, &c., started bulwarks and stanchions; vessel at the same time making water. The Evening Star, arrived here from Batavia, for New York, reports:—Experienced a succession of heavy W. gales from lat. 32 S, long. 37 E. to lat. 36 S. long. 23 E.; Oct. 10, encountered a terrific hurricane, with a tremendous high cross sea, lasting 48 hours, during which the vessel laboured and strained very much, breaking boats' skids, smashing water casks, and carrying away everything movable from decks.

SINGAPORE, NOV. 23.—The Bangkok (s.) and Rajanaltianuhar (s.) have been in collision near Menam Bar, and both sunk; no chance of saving cargoes. The latter vessel, owned by Messrs. Macgregor and Co., Leith, sailed from Glasgow, for Shanghai, on the 27th March last.

BATAVIA, NOV. 25.—The M'Gilvery, from Newcastle (N.S.W.), for this port (coals), was reported missing, but has since been heard of at Samarang, after being 113 days out.

MISCELLANEOUS.

ROTTERDAM.—Nov. 26: A private telegram states that the Marten van Rossem, hence for Batavia, which put into Plymouth Nov. 21, was damaged.

ELSINORE.—Nov. 17, passed, Jacob Hansen, from Cronstadt, for Amoor.

PORT SAID.—Arrived, and proceeded, Nov. 28, Glenlyon, from Shanghai, for New York; 29, Friesland, from Batavia, for Nieuwe Diep; Altona, from Hamburg, for Shanghai.

SUEZ.—Nov. 27, arrived, Madura, from Batavia, and left, for Naples and Nieuwe Diep; Dec. 1, Groningen, from Batavia, for Nieuwe Diep.

GALLE.—Passed, Nov. 23, Conrad (str.), from Batavia, for Nieuwe Diep.

ST. HELENA.—Arrived, Oct. 30, Evening Star, from Batavia, and sailed Nov. 1, for New York; Constance, Samarang, and sailed for Amsterdam; Nov. 2, Loch Awe, Batavia; William Jackson, Maulmain, both for Falmouth. Passed, Nov. 1, Blucher, from Saigon, for Falmouth; George Watson, Singapore, for London; Nieuwe Waterweg II., Batavia, for Holland.

LAUNCHES.

On the 30th ult. Messrs. Blackwood and Gordon launched from their yard at Port Glasgow a handsome iron screw steamer, of the following dimensions: Length, 320 feet; breadth, 36 feet; depth, 26 feet; tonnage, 2,200 tons. She has been built to the highest class at Lloyds to the order of Messrs. Burrell and Son, Glasgow, and is intended for the Eastern trade. She will be fitted with four powerful steam winches and two steam cranes, also an improved steam-geared windlass. Accommodation will be provided for fifty first-class passengers, in cabins arranged on upper deck. Her engines are to be compound, with boilers of large capacity, made by the builders. On leaving the ways she was named Strathleven.

NETHERLANDS-INDIA COMMERCIAL BANK, AMSTERDAM.

CAPITAL - - - - - - - - - - - - F.12,000,000

PAID-UP FIRST SERIES - - - - - - - - F.6,000,000

SECOND SERIES, F.6,000,000.

The Managers of the above-mentioned Corporation beg to advise that they are authorised by the Board of Control to

ISSUE the SECOND SERIES of the CAPITAL at F.6,000,000.

According to the right of preference alluded to in Article 6, the participation in this Emission is provisionally opened exclusively for holders of Shares of the First Series, and for holders of Certificates of Founders' Rights, pursuant to the Prospectus containing all the necessary details, to be obtained at the Offices of the Netherlands India Commercial Bank.

The said Right of Preference is only in force for a Fortnight from to-day, say till the 15th of December.

Amsterdam, Nov. 30, 1875.

TO PARENTS AND GUARDIANS.

AN ENGLISH WIDOW LADY, who has been residing many years on the Continent, is desirous of obtaining two pupils (English) to educate with her own daughters. She offers a comfortable home, and a mother's care, with all the advantages of the best professors and an excellent governess, combined with that of French, English, and German. Is now residing in the neighbourhood of Versailles which abounds with charming walks, where there is an English church, as well as similar cours or classes conducted by the same professors as at Paris. References exchanged.

Address, Madame E. H., Poste Restante, Versailles.

EDUCATION.

GERMANY.—BONN ON THE RHINE, 32, WILHELMSTRASSE.—The Fräulein KUNDE receive a limited number of Young Ladies for Education. Home comforts, best masters. References kindly permitted to Mrs. Gottlieb, in Singapore. For particulars apply to the Principals.

PRIVATE BOARDING HOUSE, conducted by Mrs. RANGEL (late of Hong Kong), 35, COLVILLE-SQUARE, BAYSWATER. Terms from Two Guineas, including Board, Bath, Piano, &c. Foreign languages spoken. References expected.

HONG KONG AND SHANGHAI BANKING CORPORATION.

Capital, $5,000,000. All paid up.
Reserve Fund, $100,000, at exchange of 4s. 6d.—£22,500.

COURT OF DIRECTORS AND HEAD OFFICE IN HONG KONG.

MANAGER—D. McLean, Esq., 31, Lombard-street.
BANKERS—London and County Bank.

BRANCHES AND AGENCIES.

Hong Kong	Hankow	Saigon
Shanghai	Yokohama	Singapore
Foochow	Hiogo	Bombay
Ningpo	Manila	Calcutta

The Corporation grant Drafts upon, and negotiate or collect Bills at any of the Branches or Agencies; also receive Deposits for fixed periods, at rates varying with the period of deposit.

The Corporation issue Letters of Credit and Circular Notes, negotiable in the principal cities of Europe, Asia, and America for the use of travellers.

They open Current Accounts for the convenience of constituents returning from China, Japan, and India.

They also undertake the Agency of constituents connected with the East, and receive for safe custody Indian and other Government Securities, drawing Interest and Dividends on the same as they fall due.

Dividends are payable in London in April and October, on receipt of the advice of meeting in Hong Kong, held in February and August.

BANK OF CALIFORNIA.—THE ORIENTAL BANK CORPORATION are prepared to ISSUE DRAFTS at sight on the Bank of California, San Francisco, the terms for which may be ascertained at their Office.

Threadneedle-street, 1875.

THE NATIONAL SAFE DEPOSIT COMPANY (Limited).

1, Queen Victoria-street, Mansion House, London.
Capital, £500,000. Subscribed, £250,000.

DIRECTORS.

J. H. Pulleston, Esq., M.P., Chairman.
Lawford Acland, Esq., Chairman Ceylon Company.
George Arbuthnot, Esq., Chairman Oriental Bank Corporation.
George W. Barnett, Esq., Barnetts, Hoares, Hanburys, and Lloyd.
Horatio S. Coulson, Esq., Director United Discount Corporation.
Lord Wm. M. Hay, Director Eastern Telegraph Company.
Hugh F. Sandeman, Esq., Director Scottish Union Insurance Company.

The Company is now ready to let to approved applicants Safes in their Fire and Burglar proof Vaults, at rents from £2 10s. to £30 per annum.

No insurance is necessary.

The main object of the Company is to provide the public with a perfectly secure, yet inexpensive repository for valuables of every description, and relieve them from the harassing and wearing strain occasioned by the personal care of such property. The Company take for safe custody all kinds of securities, valuable property, bonds, wills, marriage settlements, and other documents, and guarantee their value when required. Drawn bonds, coupons, &c., collected.

The Company undertake the duties of trustees, receivers, and executors, and act in other confidential capacities.

The Great Vault is superior to any building in the world intended for similar purposes. The utility of these Safes, which are entirely underground, is undeniable, as bankers are not responsible for deposit of valuables.

The loss of many kinds of securities is irreparable, the loser having no recourse against the Government or other party issuing them. A constant watch is kept both inside and outside the building. There is a room especially adapted and reserved for ladies. The premises can be inspected, and further particulars obtained on application. HENRY WEST, Manager.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, August 30, 1851.
PAID-UP CAPITAL, £1,500,000.
RESERVED FUNDS, £500,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Colombo, Foochow, Hiogo, Hong Kong, Kandy, Madras, Mauritius, Melbourne, Point de Galle, Port Elizabeth, Shanghai, Singapore, Sydney, Tellicherry, and Yokohama on terms which may be ascertained at their Office. They also issue Circular Notes for the use of Travellers by the Overland Route.

They undertake the agency of parties connected with India and the Colonies, the purchase and sale of British and Foreign Securities, the custody of the same, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named Dependencies.

They also receive deposits of £100 and upwards for fixed periods, the terms for which may be ascertained on application at their Office.

Office hours, Ten to Three; Saturdays, Ten to Two.
Threadneedle-street London, 1875.

THE AGRA BANK (Limited).

Established in 1833.

CAPITAL, £1,000,000.
Head Office:—NICHOLAS-LANE, LOMBARD-STREET, LONDON.
Branches in Edinburgh, Calcutta, Bombay, Madras, Kurrachee, Agra, Lahore, Shanghai, Hong Kong.

Current accounts are kept at the Head Office on the terms customary with London Bankers, and interest allowed when the credit balance does not fall below £100.

Deposits received for fixed periods on the following terms, viz.:—At 5 per cent. per annum, subject to twelve months' notice of withdrawal. For shorter periods deposits will be received on terms to be agreed upon. Bills issued at the current exchange of the day on any of the Branches of the Bank free of extra charge; and approved bills purchased or sent for collection. Sales and purchases effected in British and Foreign Securities, in East India Stock and Loans, and the safe custody of the same undertaken. Interest drawn, and Army, Navy, and Civil Pay and Pensions realised. Every other description of Banking Business and Money Agency, British and Indian, transacted.

J. THOMSON, Chairman.

COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1854, and 31st December, 1866.

Recognised by the International Convention of 30th April, 1862.

CAPITAL, fully paid up, £3,200,000.

Reserved Fund ... ... f.20,000,000 ... £800,000.

LONDON—Show Rooms, 45, Oxford-street, W.
BIRMINGHAM—Manufactory and Show Rooms Broad-street. Established 1807.

THE LATE REV. B. P. KEASBERRY, OF SINGAPORE.

THE late Rev. B. P. KEASBERRY, whose sudden death occurred last month in Singapore, has left a widow and a family of girls almost wholly unprovided for.

It is almost unnecessary to remind old residents in The Straits of the faithful and disinterested services of Mr. Keasberry, in the teaching of the Christian faith, and the spread of education.

These services, which extended over a period of thirty-six years, it is proposed to recognise, to some extent, by the collection of a sum of money, to be placed in the hands of the Hon. R. Little, M.D., and William Adamson, Esq., of Singapore, as Trustees, leaving power to them to invest the whole or a part at their discretion, or to apply it wholly and at once for the benefit of Mrs. Keasberry and her daughters.

Cheques should be made payable to P. F. Tidman, 34, Leadenhall-street, by whom Subscriptions will be acknowledged.

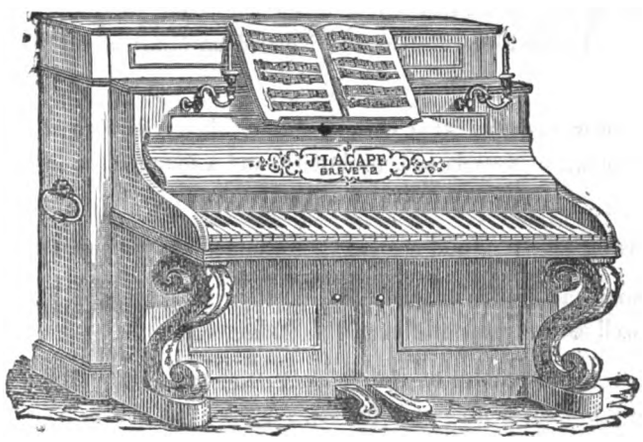
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

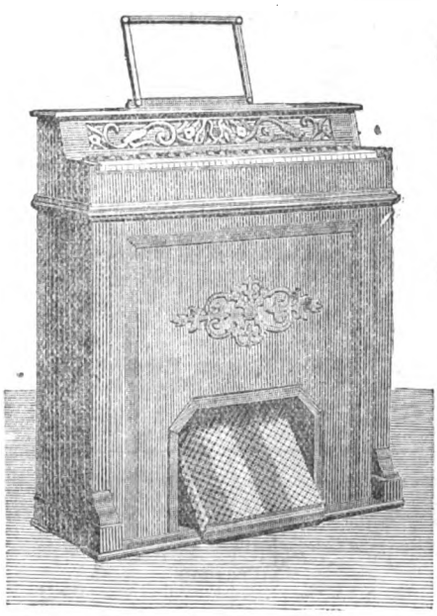
29, BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of even octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.



ALEXANDRE & FILS,

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette.*

Made simply with boiling water or milk.

Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,

HOMŒOPATHIC CHEMISTS,

Threadneedle-street, and 170, Piccadilly. Works:—Euston road and Camden Town, London.

Makers of Epps's Glycerine Jujubes (throat irritation).

TANJONG PAGAR DOCK COMPANY
(LIMITED).

VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all description of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

LONDON AGENTS.
Messrs. MACTAGGART, TIDMAN. and Co., 34, Leadenhall Street.

E. M. SMITH, Manager.

OVERLAND ROUTE via MARSEILLES and SUEZ CANAL.—Under contract with the French Government for the conveyance of the Mails to INDIA, CHINA, JAPAN, BATAVIA, REUNION, and MAURITIUS.

The MESSAGERIES MARITIMES COMPANY will despatch their steamers from MARSEILLES via the Suez Canal every alternate Sunday at 10 A.M., beginning on Sunday, the 5th of December.

*** Passengers eastward of Suez securing their berths in London are entitled to the conveyance of their luggage free to Marseilles, as explained in the Company's handbooks.

For Passage Rates and Particulars see the Company's handbooks, and apply at the Company's London Head Office, 97, Cannon-street, E.C.; or at the West End Sub-Agency, 51, Pall-mall, S.W.

PRELIMINARY NOTICE.

THE CHINA TRANS-PACIFIC STEAMSHIP COMPANY
(LIMITED).

THE new, powerful, and handsomely-fitted iron screw steamers of this Company are intended to resume their trips between San Francisco, Japan, and China at an early date, when it is hoped that their reputation for speed, safety, and comfort will secure them a large share of the increased traffic of the North Pacific.

The "Vancouver" will probably be the first vessel to leave San Francisco, succeeded by the "Vasco de Gama." The "Columbus," to be launched in January, will proceed to Hong Kong and make her first voyage from that port to San Francisco, via Yokohama, and will be followed by other vessels in due course.

Further particulars will be published shortly.

London, St. Michael's-buildings, 9, Grace-church-street, Nov. 20, 1875.

SHORT SEA ROUTE to AUSTRALIA, for First-class passengers only, via Marseilles and Singapore, by STEAMERS of the EASTERN and AUSTRALIAN MAIL STEAM COMPANY (Limited), under Postal Contract with the Queensland Government, leaving every four weeks.

Offices, No. 34, Leadenhall-street, London, E.C.

GLEN LINE OF STEAM PACKETS.—INDIA, CHINA, AND JAPAN.—The undernamed powerful Clyde-built BOATS, specially adapted for the India, China, and Japan trade, are intended to be despatched on these advertised dates for SINGAPORE, HONG KONG, and SHANGHAI, taking goods at through rates for SAIGON, YOKOHAMA, NAGASAKI, and HIOGO:—

Steamers.	Class.	Tons.	Horse-power.	Date of Sailing.
Quang Se	100 A1	2,788	490	Dec. 22
Glenartney	100 A1	2,106	330	To follow
Glencarn	100 A1	2,120	330	To follow
Glenlyon	100 A1	2,119	275	To follow

THE MAILS, &c.

The French mail, bringing the advices dated as above, was delivered, *via* Marseilles, partly on Saturday, and partly this morning. The Pacific mail from Yokohama 26th Oct., reached London *via* San Francisco on the 7th inst. The next inward (P. and O.) mail, with a week's later dates, viz., Yokohama 2nd, Shanghai 5th, Hong Kong 11th, Singapore 18th Nov., left Alexandria yesterday, and may be expected on Monday next, its due date.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Ava*, arrived Dec. 9.—From Yokohama: Messrs. Williams, Gibson, Westphal, Abell, Jacquemot, Schmell, Van Ewyk. From Shanghai: Messrs. Edwards (Secretary to the British Legation at Peking), Watson. Sim, Crawford, Hickling, Welch, Smith, Malteau, Wimmer, Moller, Lepper, Mr. and Mrs. Byrne, Mrs. Little, Mrs. Tisdall. From Hong Kong: Messrs. Anthony, Reeves, Finister, Macnamara, Haslam, Gepp, Hediger, Hartvigson, Mr. and Mrs. Deacon, Mr. and Mrs. Seaman. From Saigon: Captain and Mrs. Brown, Mrs. Boardman Miss Chapanet, Mr. Nidder, Mr. D'Hubert. From Batavia: Mr. and M Hetjen, Messrs. Godefroy, Fokker, Struik, Rouff. From Singapore: Messrs. Wilson-Lyon, Levesey, Bruyse, Pickenpack, Massey, Lagostera, Balasch, Gabory, Mrs Graham. From Galle: Mr. and Mrs. Naylor, Messrs. Elves, Cramer, Dowden, Lambert-Sim, Gondsticker.

PASSENGERS OUTWARD.

Per P. and O. steamer *Hindostan*, from Venice, Dec. 10.—To Singapore: Mr. and Mrs. MacVicar.

Per P. and O. steamer *Hindostan*, from Brindisi, Dec. 13.—To Hong Kong: Mr. D. Travers. To Singapore: Mr. A. Black, Mr. Fester, Mr. H, W. Uloth.

Per P. and O. steamer *Bokhara*, from Southampton, Dec. 16. To Hong Kong: Mr. J. Barry. To Ceylon: Mr. E. Corvant, Mr. T. J. Jones, Sir J. W. Copley.

Per P. and O. steamer *Baroda*, from Brindisi, Dec. 27.—To Singapore: Rev. and Mrs. Aitken.

Per P. and O. steamer *Australia*, from Southampton, Dec. 30.—To Singapore: Mr. and Mrs. J. H. Holberton.

Per P. and O. steamer *Baroda*, from Venice, Jan. 7.—To Ceylon: Mr. and Mrs. Delmige.

Per P. and O. steamer *Indus*, from Southampton, Jan. 13.—To Hong Kong: Miss Huffam. To Singapore: Mr. E. B. Gould. To Ceylon: Mr. J. L. Gordon.

Per French steamer *Djemnah*, from Marseilles, Dec. 19.—To Yokohama: Mr. Kreitmann, Miss Seymour. To Shanghai: Mr. Godeaux, Mr. Seul. To Hong Kong: Mr. and Mrs. Pelham Warren. To Batavia: Mr. J. H. Tromp. To Singapore: Mr. James Connell, Mr. Glass. To Galle: Mr. Strand, Mr. G. Walker. To Port Said: Monsr. de Lesseps and family.

Per French steamer *Ava*, from Marseilles, Jan. 2.—To Hong Kong: Mr. E. L. Dick. To Singapore: Mr. A. T. Black. To Galle: Mr. Newman.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present French and Pacific mails bring advices from this port to the same date, viz., the 26th Oct.; the P. and O. mail from London, Sept. 3, arrived out on the 22nd October. The *Japan Herald* supplies the following items of news:—

The principal topic of interest since the departure of the last mail has been the withdrawal of the P. M. S. Co. from their Shanghai line. The three steamers, the *Oregonian*, *Golden Age*, and *Costa Rica*, have been purchased by the Mitsu Bishi Company. The price paid for these ships has not transpired, but is said to be a fair one. The fourth steamer, the *Nevada*, will remain under the American flag; she has been simply chartered by the Japanese company. The reason for this is understood to be that the P. M. S. Co. being still under contract to deliver a monthly mail in connection with the San Francisco steamer, it will be necessary until the contract expires at the end of 1876 to carry the mails in an American steamer. Satisfactory arrangements have also been made between the two companies for the carriage of through freight, and the public will therefore enjoy the same facilities for their shipments as heretofore. As a result of this new working the branch agencies of the P. M. S. Co. at the way ports will be closed. Looking at the matter from a business point of view both companies are to be congratulated at this satisfactory settlement of, what must have been to both, a ruinous competition. But whilst all is thus arranged for the benefit of the two companies the public will not benefit, for there is a very heavy increase of fares. It was not to be expected that the late low tariff would remain in force, as, to any one conversant with steam shipping it was evident that passengers were carried at a loss; but still we think that the ones now advertised, although not equal to the old ante-competition ones, are rather high. For instance, $20 for a thirty-six hours' trip to Kobe seems more than a fair price, and the others are in proportion. We should have thought that the managers of the company, who must have noticed the wonderful incentive given to the passenger traffic by the late reduction, would have striven to still farther increase this by retaining the fares at the lowest remunerative rate, and to us it seems certain that a large portion of the Japanese who have lately been using the line will revert to their old plan of travelling overland, or not travel at all; as with the

Digitized by Google

majority of the natives a few dollars saved is of much more importance than the few days extra time wasted.

Nothing definite has transpired respecting the trouble with Korea; it is, however, stated that Moriyama was to leave Nagasaki on a mission to that country some days ago, and the names of Kido and Soyejima have also been mentioned as special envoys. Meantime the Government are in the market as purchasers of arms. Another vessel has been despatched to make inquiries as to the reasons for the late attack, and to bring away the few Japanese residents.

By a private letter, received here by last mail from Nagasaki, we learn that H.B.M.S. *Sylvia*, whilst surveying off the Korean coast, met with some disagreeable troubles to her captain, officers, and crew. It appears that the captain and some of the officers were invited on shore at a place where the vessel touched, the name of which is not given, and, after having been feted, had the greatest difficulty in reaching their vessel again. The unpleasant part of the business to the crew was that two boats' crews were chased by the Koreans, and had to row some eighty miles, during two days, before they regained their ship.

Owing to the short-sighted policy of the Japanese merchants, the silkworm-egg market remains inactive. The cause of this is not difficult to seek. The Japanese, desirous of forcing up the price of their goods beyond the market value, have combined together not to sell a single card under $1.50. The *graineurs* on the other hand, are innocent of any such combination, but the force of circumstances compels them not to give more than about one-fifth of the price above mentioned, and consequently there is a dead lock. It is impossible for the *graineurs* to offer anything like the price asked by the Japanese, for the simple reason that by so doing they would be incurring a certain loss. The few orders which have arrived here since we last wrote on this subject, state that purchasers in Italy will not pay more than five francs per card laid down there. Now, as the expenses average about three francs per card, without considering any profit to the *graineurs*, it is evident that the price of one dollar and a half is preposterous, and cannot for a moment be entertained. Anyone who gives more than from 20 to 30 cents, per card, must, therefore, as we have already said, submit to an undoubted loss; and the sooner the Japanese merchants look at the matter in a common-sense point of view, and make up their minds to the inevitable, the better for themselves, otherwise, as the time is getting very short (the departure of the *graineurs* being fixed for the beginning of November), they may, perhaps, find themselves with the entire stock left on their hands; and they may then wish that they had accepted the present offers, which must at any rate leave them a profit of from 25 to 50 per cent.

The editor of the *Yokohama Mainichi Shimbun* was on the 20th Oct. sentenced to pay a fine of 100 *yen*, and to be imprisoned for ten months, for having inserted in his paper a letter from a correspondent, in which the injustice of a provision in the Law of Libel, to the effect that the truth of a publication does not purge it of libel, was discussed. The editor had appended to the letter an announcement that he would take upon himself to pay any fine that might be inflicted upon his correspondent. He probably calculated that his temerity would cost him about 10 *yen*. The sentence seems to us to be severe beyond measure.

The out-turn at the Takasima coal mine at Nagasaki is said to have reached an average of about six hundred tons daily. The mine gives employment to about 4,000 men, who work night and day on eight-hour shifts. There is very little water to contend with. The disbursements for wages, &c., come to about $30,000 per month. At the price at which coal sells in Japan and China, the mine should yield great profits, a fact which ought to be sufficent to stimulate the Japanese to a vigorous prosecution of coal-mining enterprise, if they had capital enough, and the Government could be persuaded to leave industries of this kind entirely alone.

The country police have had orders from the Government to prevent foreigners from shooting within Treaty limits, and several parties of sportsmen have been required to desist from shooting, and their names, nationality, and addresses were taken down by the police, who persistently followed them from place to place; but beyond telling them that shooting was prohibited, did not attempt to take anybody into custody. The circumstances have been reported to the British Consul, and we apprehend that matters will soon be brought to a crisis. For years past shooting has been tacitly permitted within Treaty limits, though several attempts have been made, but without success, to frame regulations which could be approved of by all the foreign Ministers.

It is stated that the *samurai* of the Kioto *Fu*, who had formed a plot to seize the *Daijins* and Fukusawa, a learned professor whom they accused of a design to overthrow the present Government in order to establish a republic, have only been condemned to a small fine, instead of receiving a sentence of hard labour which the laws of the country inflict on conspirators.

The Government appears to be making spasmodic efforts at retrenchment, multitudes of officials from the various departments having been discharged. As, however, the majority of these appear to be immediately reinstated, it is difficult to see in what the saving consists.

In consequence of the refusal of the Japanese Governor of Kobe to come to any compromise respecting the rent of the race-course at that port, it would appear that the Race Club have decided to withdraw from their tenancy, as we learn from the *Hiogo News* that the Grand Stand, stabling, and rails were announced to be sold by public auction. Meanwhile we see that the club has made application to the Municipal Council to grant them a course round the outside of the Recreation Ground.

H.I.R.M.'s corvette *Vsadnick*, Captain Novosilsky, arrived on the 15th Oct. in our harbour, having on board the members of the Russian and Japanese Commissions for the transfer of Saghalien and the Kurile Islands. These gentlemen, in the course of their cruise round the former island, are said to have visited no less than seventeen Aino villages.

Shimadzu Saburo has once more resigned office. This is symptomatic of the dissatisfaction of the Satsuma clan with the existing order of things. This clan seems to be always in a state of chronic discontent; Shimadzu Saburo is perpetually resigning, and is being as constantly re-appointed to office. He is said to have sent to the Gen-ro-in several communications, in which the actions of the Government have been severely criticised. With respect to the Gen-ro-in itself, many members are very fitful in their attendance, whilst some absent themselves altogether.

The Settlement is at present suffering under a plethora of amusements, several troupes of singers, &c., being either here or on their way, whilst the autumn meeting of the Suisse Tir has just taken place, and that of the Athletic Association and the races will shortly came off. The amount received for entrance money at the autumn races is larger than to any previous meeting, amounting, including the Derby subscriptions, to $1,565.

The P. and O. s.s. *Orissa*, which had been delayed on her voyage from Hong Kong by very strong head winds, in steaming up to her buoy last night ran on the end of the spit. Having discharged part of her cargo into lighters, she floated off again at 10.30 this morning, without having sustained any injury.

General Williams, who has for some years been employed as adviser to the Finance Department, returns home by this mail. Previous to his departure he was honoured with a farewell interview with the Mikado.

The Russian flagship *Boyan* has arrived from Vladiwostock, and, on anchoring, fired the usual salutes.

Signora Palinieri will shortly give a concert in the Imperial Palace, in presence of the Mikado and Empress.

The following additional items of news are from the *Japan Mail*:—

The report in the *Hiogo News* about a boat's crew belonging to the *Sylvia* being chased by the Koreans is perfectly true. Whether they were fired upon we cannot say, and it may be presumed that they were thus chased only because they were unarmed. But the outside nations should either come to some practical resolve about Korea or agree to leave her alone. She is quite right to fire upon surveying parties, who would be permitted by no nation in the world to be taking soundings on their coasts. It is not fair that one boat's crew should be chased eighty miles, as was one of the *Sylvia's* boats, and that the lives of another crew should all be placed in the most imminent danger by being covered with the matchlocks and cross-bows of the Korean soldiery within a distance of ten yards.

A general meeting of the Asiatic Society of Japan was held at the Kaisei-Gakko on the 20th Oct.; the chair was taken by Sir Harry Parkes. The chairman opened the proceedings by drawing attention to a supposed ancient bell, presented to the society by the Kenrei of Hiogo; after which Professor W. E. Ayrton proceeded to read Dr. Geert's paper on "Useful Metals and Minerals of the Japanese." The meeting was then adjourned to the 20th Oct.

A certain Hayashi Jumpe, the writer of an offensive letter in a recent issue of the *Nichi Nichi Shimbun*, has been summoned to answer for an offence against the Press Laws at the *Kencho* of Kurushiki, in Bishiu, where he resides. This is a case of double-handed punishment, the editor of the journal in which the letter appeared having been already imprisoned.

A newspaper, to be printed exclusively in *Kana* character, will be published in Yokohama next month. The success of the *Yomiuri Shimbun*, printed also in *Kana*, which is largely sold in Yedo at a low price, would seem to have suggested the desirability of the new enterprise.

On the 15th Oct. the *Corps Diplomatique* was entertained at Hamagoten by H.I. Majesty's Ministers. Previous to the banquet a concert was given, in which Signora Palmieri, Signora Persiani, and Signor Palmieri, assisted by a few amateurs, executed some of their favourite *morceaux*.

A telegram from the *Kasuma Kan*, one of the Japanese men-of-war now in Korean waters, states that the Koreans are preparing for war. The marines from the ship had, it is said, been landed for the protection of the foreign settlers.

CHINA.

—o—

SHANGHAI.

The present mail brings advices from this port to the 29th October; the French mail from London Sept. 10 was received on the 27th Oct. The following summary of news is from the *North China Herald*:—

Now that negotiations have advanced sufficiently to permit the despatch of the Yunnan Mission, it is worth while putting together the information which has reached us from Peking, and seeing what has been really done during the nine months that have elapsed since Margary's murder. We shall, probably, have to wait for the appearance of a Blue-book to learn exactly what value is attached to the negotiations at Tientsin, of which so accurate a summary reached us in September, with a premature rumour that they had led to a settlement of the difficulty. Whatever may have been the explanation—whether Mr. Wade was under the impression that an agreement made with Li would be accepted by the Central Government, or whether he was only preparing the ground with the powerful Minister—it soon became clear that the negotiations had to be begun *de novo* at Peking, and the report of a settlement soon changed into a rumour of inevitable rupture. The date even of the withdrawal of the Legation was fixed, but the crisis was tided over, and then began to come information of points yielded one by one—in conformity with the Tientsin programme. Turning to the *Herald* of the 18th September, we find four of the points there named have been actually conceded, while the others have been under negotiation, and are more or less advanced towards settlement. The destined ambassador to England, Kwo Sung-tao, has been summoned to Court, and lately passed through Shanghai on his way to the Capital. Intercourse between the Legation and the State Departments at Peking has been yielded; and the fact, together with various other edicts and memorials relating to the negotiations, has been notified in the *Peking Gazette*. A letter from Mr. Wade in our last issue explained what had been done with regard to *lekin* taxation; and the despatch of the Mission of Inquiry to Yunnan is a preliminary step towards bringing the perpetrators of the outrage to justice. It is understood that Mr. Wade has exacted a guarantee from the Peking Government, that no inquiry shall be held without the presence of the British delegates, and we have hope that our resolve to exact justice has been sufficiently impressed upon the Government, to ensure a practical result from the inquiry. It is understood also that the opening of a trade route with Yunnan is secured, though on this point nothing authentic has transpired.

We are glad that Mr. Wade has adopted the course we have so often urged, of strengthening the Yunnan Mission. Mr. Davenport is also to take place on it, so that it will now consist of Mr. Grosvenor (2nd Secretary of Legation), Mr. Davenport (Vice-Consul), and Mr. Baber (Consular Interpreter). The Mission is still below the scale on which we should have liked to see it organised, but the addition of a Vice-Consul is a considerable gain; and Mr. Davenport and Mr. Baber are thoroughly good men for the work on hand. Messrs. Grosvenor and Baber, accompanied by the famous Sung Pao-hwa, have left for Hankow, where they will await Mr. Davenport, who starts on the 31st Oct. to join them. It is, we believe, intended to follow a different route from that taken by Mr. Margary, who went through the Tung-ting Lake across Honan and Kweichow. The present party intend following up the Yangtsze as far as they can go, by boat, and then taking the most suitable route Southward to Yunnan-foo, where the investigation will probably be held. It will be Sung's business to see to proper accommodation along the route, and to smooth the difficulties of travel. After the special business of the Mission is over, the members will pursue their way through to Burmah, if all goes as well as is hoped.

Shanghai, as usual at this time of the year, is in a whirl of amusements. A Racket Handicap is being played. The S. R. C. Spring Regatta has occupied two days, and three more will be taken up with the autumn races. Numbers of people are contemplating a trip up-country, and a perfect fleet of house-boats will probably start after the mail has closed. The German amateurs have given a successful theatrical performance at the Club Concordia, and the English A. D. C. announce one for the first week in November. According to custom, the three days of the approaching Race Meeting will be observed, as nearly as possible, as a general holiday. The banks will be closed to public business on each day, while the Consulate-offices and Custom-house will cease business at noon—an example that will doubtless be followed generally throughout the Settlements.

Yacht-racing, once so favourable a sport in Shanghai, has declined to such an extent that it has been found impossible to obtain sufficient entries to hold an autumn regatta, though, we are informed, most of the remaining yacht-owners have promised to race for the Champion Cup next spring, when probably some other prizes will also be offered. Various reasons are assigned for the non-success of the autumn meeting, the chief of which appears to be that several of the yachts are comfortably fitted as house-boats for up-country sporting trips. The owners, therefore, do not care to strip them for racing, and there do not remain a sufficient number to give spirit to a contest. In the spring field sports are of course over, and there is sufficient indication of coming heat to make yacht-racing both pleasant and interesting. The weather for the first day of the autumn regatta was all that could be desired, and we have seldom seen a more successful meeting. Events succeeded each other fairly quickly, and there was an absence of the dulness between whiles which is often noticeable on such occasions.

The weather was hardly so pleasant on the second day, but the attendance was again good. The most interesting race of the day—the most interesting indeed of the meeting after the International—was that between the Veterans and the Griffins. The men of the former crew averaged over fourteen years in China, while their opponents were new comers—supposed to be of only three years' residence, though in the case of two men this limit was exceeded. The race was a close one throughout, and resulted in favour of the juniors by a length. The other events passed off well, and we congratulate the Committee on the success of the whole meeting. It is gratifying to note that, although there were scores of seamen and marines ashore, from the numerous ships of war in harbour, only two ordinary cases of drunkenness calling for the interference of the police occurred. The fact is the more noticeable because the men were of varied nationality. The British tars chiefly turned their attention to pony riding, and the excellent seat displayed by many of them at a hard gallop or trot completely dispelled the old sarcasm about a sailor on horseback, further proving that in these days of innovation, when sailors are so often converted into foot soldiers, Jack might also be made a light cavalryman—there would be no doubt as to his dashing behaviour.

The French Municipal Council have decided to reduce the Chinese house tax in their settlement by 11 per cent.; to abolish lighting and nuisrnce rates between 10 and 15 cents; and to reduce by 25 per cent. those beeween $0.25 and $2. This will involve a total loss on the next budget of Tls. 3,840.—Messrs. Russel and Co. have given notice that they wish to reduce the sum they pay under the head of Commercial Tax (*i.e.*, the equivalent of the wharfage dues in the English settlement).—Four shroffs who had been bribed to conceal the existence of gambling houses on the Concession were discharged.—Consideration of the plans of the Yang-king-pang submitted by M. Henry, and of a letter from the English Council on the same subject, was adjourned.—Mr. Scott was elected Vice-President in the stead of Mr. Hennequin.

We learn further from the minutes that the General Hospital Trustees have suggested a new method of raising funds for a new building. They have proposed that the two Councils should advance Tls.22,000 between them, of which the French share should be Tls.7,500. The latter considered that this sum was disproportionate to the advantages which the municipality would derive from the hospital, but are willing to advance Tls.5,000. This would leave Tls.17,000 to be found by the community on this side the Yang-king-pang; and the sum is certainly less formidable than was first asked. But the objection has all along been less on the question of amount than of management; and we imagine the reduction will not incline ratepayers to depart from the principle expressed in the resolution passed at the last meeting.

Another little missionary difficulty is reported from Nanking. An American missionary and two ladies leased a house in that City, and were about entering on possession when the landlord professed himself unable to carry out the lease; he having been threatened by the mandarins with total annihilation if he ventured on such a course. Placards have also been posted in the neighbouring streets, objecting to the presence of the missionaries, in the usual courteous terms. It is suspected that the mandarins are cognisant of the agitation, though it is hardly likely that they would commit themselves, in Nanking, to open sympathy. We hear that a cry is also being got up against the Indian eye doctor whom our readers may remember as practising in the Maloo some time ago. He appears to have settled in Nanking for a time, and is charged with gouging out eyes, being an emissary from Kashgar, and other equally probable and horrible crimes.

A smart robbery has been effected at the shop of Ah-ling, corner of Foochow and Honan-roads. A cash-box that had been recently used was left for convenience on a side table in the shop, which happened to be nearly full of customers at the time. In a few minutes the box was missed, and investigation quickly showed that it had been stolen, though how or by whom in so short a time was a mystery. An alarm was raised, and the police communicated with, but all that could be ascertained was that a man was seen walking along the Canton-road carrying something like the box in que tion, and there all trace of him is for the time lost. The stolen box contained Tls. 50 in notes, $62, ninety-three half-dollars, five English shillings, and a half-sovereign, two orders for $5 each on the Hong Kong and Shanghai Bank, a bill for $8, five cheque books for native banks, &c. At night, when about closing the shop, a shopman found under the window-sill a bundle, tied up in a blue-pattern cotton handkerchief, containing the whole of the paper money, cheque-books, &c., the cunning of the thief showing him that their retention

Digitized by Google

would lead to his detection. Why he did not destroy them is a problem.

Robberies are again often occurring on board river steamers. As soon as a steamer arrives at a wharf there is of course much bustle in discharging and taking in cargo. This is the opportunity for the thieves, and they are not slow to avail themselves of it. Two native thieves were recently caught on board the river steamer *Hankow*. One of them had taken up his quarters in a bunk occupied by a passenger. The passenger turned him out, and he was quietly walking away, when it was found he had stolen a coat and 1,000 *cash*, which he had concealed in his capacious sleeves. He was detained on board and the police sent for. Later the same evening another fellow was seen walking round the saloon, and as he was recognised as an old thief he was also detained and handed over to the police. Both will be brought up at the Mixed Court. It was but the other day that the compradore's cabin on board the same boat was broken open and all his clothes stolen, no trace of the thief being left. On a previous day a clock and fixings were stolen from the steamer *Europe*, the robber again getting clear off. If a sharp look-out were kept while vessels are alongside the wharf, it is probable that prowlers and thieves would soon be distinguished from the natives having business or employed on board. A few such detections, followed by prosecution at the Mixed Court, would soon lessen, if not stop, these depredations.

A Municipal notification has been issued, requiring special attention to sanitary precautions at the present time, and advising people to be more than usually careful not to use water that has not been carefully purified. The precautions are called for by the occurrence of several cases of cholera in Shanghai, and the warning should induce householders to give some personal attention to the matter.

The British gunboats *Growler* and *Dwarf* have arrived. There are now seven British men-of-war in the river, the two just named, the *Audacious*, *Egeria*, *Swinger*, *Thalia*, and *Vigilant*; besides the French *Montcalm*, and *Talisman*; the U. S. gunboat *Palos*, and the North German frigate *Ariadne*.

A new steamer for Messrs. Russell and Co., and designed for trade on the Yang-tsze, now being built at the S.S.N. Company's Dock, appears to be rapidly approaching completion; already the A frame and the inner sides of the paddle boxes are placed in position, the lower part of the hull being almost completed.

By the steamer *Kashgar* we received (on the night of the 24th Oct.) Sydney papers of Sept. 25th. This is the quickest mail we ever remember from Australia, and if, as we presume, it came by the Torres Straits route, Melbourne and Sydney people had better keep to the latter for their China correspondence, and neglect the Galle line.

We hear from Hankow that H.B.M.'s gunboat *Mosquito* went out for a trip a few days ago, when a small junk, attempting to cross her bows, came into collision, and sunk. Captain Paul gallantly jumped overboard to save life, and by his efforts and those of the gunboat's crew all lives but one were saved. The crews of the native boats behaved disgracefully. They looted the wreck, and made no attempt to save life.

A race meeting is to be held at Tientsin on the 4th and 5th November. It had been feared that no races would be held there this autumn, but we are glad to find that the residents have thought better of it.

We take the following additional items of intelligence from the *Celestial Empire*:—

A very serious disturbance is reported from the neighbourhood of Shao-hsing, in the province of Chekiang, and about two hundred *li* from Ningpo. The people in the district have been for a long time past in the habit of selling salt without a license, and a few days ago the local mandarin swooped down upon them. The offenders however were too numerous to be dealt with *en masse*, and the yamén-runners contented themselves with pouncing upon one unfortunate man by way of example to the rest. But the general excitement was roused and a very threatening tumult followed. A large and infuriated mob stormed the yamên, and succeeded in forcibly rescuing the prisoner; whereupon the mandarin called out the aid of the military. A detachment of fifty soldiers was marched as far as an open piece of country whither the rioters had withdrawn themselves, and there a pitched battle took place, which resulted in the total discomfiture of the soldiers. The military mandarin in charge was a good deal hustled, and his horse was killed under him. Only one life however was lost,—that of a soldier; and the civil authorities, not being able to find the slayer, have arrested three individuals engaged in the riot, who will be held in durance vile until the true culprit is found.

Advices are said to have been received from Yunnan to the effect that the authorities have succeeded in catching nine men who were engaged in the murder of Mr. Margary, upon the persons of seven of whom were found various articles identified as having belonged to him. We give the rumour for what it may be worth, although it is difficult to avoid thinking that it sounds suspicious. But we never imagined that the mandarins of Yunnan would find any difficulty in having a batch of victims ready by the time Li Han-chang arrived. The chain of evidence will doubtless then be quite complete. The Yunnanites also have it that Suey, a former Taotai of Shanghai and subsequently Fu-t'ai of Soochow, is to arrive at Yunnan-fu the same time as Li Han-chang, in order to act with him in the judicial proceedings on foot. Another strange rumour reaches us from Yunnan through Chinese sources. It is said that Li Hsi-t'ai has been arrested by the authorities, and held in confinement to await the opening of the tribunal by which he is to be judged.

The unfortunate Liuchiuans who were cast away on the Shantung coast some weeks ago, and sent home again under convoy of a mandarin-boat by express command of the Empress Dowager, arrived on the 21st October *en route* for Liuchiu. One sailor had died on the voyage, of which formal notice has been given to the Taoutai, who requested the Che-hsien to inquire into the circumstances of his death. It was found that he had died from natural causes, and the body will be interred at the expense of a native charitable fund in the presence of eighteen of his late comrades.

Now that the actual bonds of the Chinese Imperial Loan are issued, and that the first instalment of interest is paid, we suppose the loan will obtain a quotation on the London Stock Exchange. The debentures are printed in English, signed by the chief manager of the Hong Kong and Shanghai Bank as authorised agents for the Loan, and bear the seal of the Fan-t'ai of Foh-kien. They are surrounded by twenty coupons, one for each half-yearly dividend.

We note with concern the appearance of Asiatic cholera, of which scourge there have been already several cases and some few deaths. At present there is no panic, which is a good thing, as there is no greater incentive to the spread of cholera than fright; and we must hope that the plague will be stayed.

HONG KONG.

Our advices by the present mail extend to the 4th November; no later mail had arrived out. The following items of news are from the *Hong Kong Daily Press*:—

The Memorial from the Yamén of Foreign Affairs on the relations between China and Foreign Powers, published in the *Peking Gazette* of the 8th October, is perhaps the most valuable concession Mr. Wade has been able to wring from the Peking Government. It must have gone sorely against the grain for Chinese statesmen to be compelled to word such a document for official publication. It is interesting to note how, while formally advocating intercourse with foreigners as a disagreeable necessity which has grown up, the memorialists carefully abstain from really admitting foreign Powers to any equality with the Central Kingdom. The desirability of preventing misunderstandings is insisted upon as a cogent reason for admitting Foreign Ministers to intercourse with the high officials of the Chinese Government at Peking. The argument of the foreigners is duly quoted in favour of this concession. The Foreign Ministers resident in Peking, the memorialists proceed, "have repeatedly conversed with your servants on this subject, and have observed that owing to the entire absence of intercourse between the representatives of foreign Powers and the high officers of the Chinese Government at the capital, it is no matter for surprise if the people, in view of such distance (or estrangement) on the side of public functionaries, should fail to hold foreign officials and subjects in respect." As a sort of excuse for China not having yielded this point before, they state that in refraining from having relations with foreigners, "the heads of the different departments of State have, in fact, done no more than adhere faithfully to the principle of 'non-intercourse with those under a foreign rule.'" To this principle they have clung only too closely for the good of foreigners and for the promotion of the best interests of their own country.

The Registrar-General's return of births and deaths for the third quarter of this year, ending September 30th, is published in the *Gazette*. It states that during the quarter a total of 423 births and 856 deaths has been registered in Victoria and the four districts of Shau-ki Wan, Stanley, Aberdeen, and Kowloon. Of this number 50 births, being those of 26 boys and 24 girls, occurred amongst persons other than Chinese. The deaths in this class number 45, of whom 13 were non-residents, and the remainder are thus distributed as regards nationality:—British, 12; Portugese, 8; Indian, 9; Malay, 3. The births and deaths amongst the Chinese were distributed as follows:—Victoria, 716; Kowloon, 30; Shau-ki Wan, 41; Aberdeen, 19; Stanley, 5. The death-rate of the quarter amongst the British and Foreign Community is 28·03, and amongst the Chinese 28·07 annually for every thousand persons living. For the whole population of the colony the rate is 28·06 per thousand. If the deaths of the non-residents be deducted, the death rate of the British and foreign community is only 25·74 per thousand annually.

The gunboat *Tejo* returned to Macao on the 23rd Oct. from Canton, with Senhor Scarnichia and suite on board. As yet nothing is known of the result of his mission, which was with reference to the difficulties which had arisen out of the action of the Chinese Customs Port and Revenue cruisers. The commission is reported to have been well received by the Viceroy, who also, in return, paid a visit to the *Tejo*, and partook of refreshments on board. It is believed that the Governor will shortly

Digitized by Google

publish the report of Senhor Scarnichia with regard to the mission.

The *Chung Ngoi Sun Po* gives the following instance of an attempt to squeeze returned emigrants :—Two cargo junks which ply regularly between Hong Kong and Cheung-Sai and Tick Hoi, on the Canton river, sailed from Hong Kong on the 22nd October with upwards of 400 returned emigrants from Cooktown and San Francisco. When the junks arrived at Shuey How barrier station they were thoroughly searched and duties levied, and to this they duly submitted. On their arrival at Kim Shan Fou station, however, a boat came alongside, and the officials in it wanted to search the junks before permitting them to proceed. The master of the junks refused to allow this to be done, on the ground that the duty had been paid and the junks already searched, and were strongly supported in their denial by the passengers. The petty officer in charge of the Customs boat insisted, however, on searching the junks, and, accompanied by some of his satellites, boarded one of them and rigorously inspected it. Failing to find any contraband goods, he declared his intention to take the junks in custody to Canton for the captain's refusing to allow them to be searched in the first instance. He ordered the passengers on shore, but would not permit them to remove their luggage. As, however, many of the passengers possessed considerable sums, the savings of years in America, and others were returning with hard-won gold from Queensland, they were roused from their wonted fear of officialdom, and assumed a most threatening and angry demeanour. One of them seized the officer and would, in his indignation, have done him some personal injury, had not the captain of the junk, in response to his piteous appeal, interceded for him. He then, in great alarm, returned to the guard-boat, and the junks weighed anchor. They had scarcely started, however, when the Customs boat fired upon them. The passengers returned the fire with their revolvers, but no injury was received on either side. It is owing to the obstacles that were placed in their way, in the shape of exactions like that contemplated by this Customs officer, that so few trading junks have visited Hong Kong latterly.

A scratch harbour race has been sailed, between the yachts *Naiad*, *Wave* and *Naomi* over the usual course, from the centre of the harbour round Cow-ee-chow and the Channel Rocks, three times, and back to starting point. The yachts got away a little before 10.30 A.M., very evenly, *Wave* being the leeward boat, a little behind the others. The breeze freshened as they ran to the westward, and soon after rounding the stake-boat a heavy squall struck the *Wave* and her topmast went over the side, the clip hooks having drawn. This naturally threw her behind, but by great energy on the part of her crew another topmast was got up, and sail set by the time she reached, in the next course, the scene of the former disaster. The ground she had lost, however, she found it impossible to regain, and *Naiad* came in an easy winner. The stakes were a purse of $40 to first boat, second boat $10. Entrance fee $3. *Naiad* seems to be determined to hold the place she earned last year, and it will require careful sailing and no moderate slice of good luck to dispossess her of it.

A match is to be played between the Hong Kong Cricket Club and H.M.'s 80th Regiment. We believe the teams are very strong on both sides, so a good display of cricket may be expected.

The steamer belonging to Kwok Acheong, having undergone the necessary repairs, has made a satisfactory trial trip. It is intended to run her between Hong Kong and Canton.

A parade and inspection of the Government and Volunteer Fire Brigades has taken place at the bottom of Queen's-street. The engines, to all appearance, work satisfactorily. A new feature was introduced on this occasion ; two extinctuers, one on the French and the other on the American principle, were used. A barrel of coal tar was taken down with other combustibles, arranged on the Praya, and set fire to, when the extincteurs were set to work and proved very successful in immediately extinguishing it. The chemical in the water operated to prevent the flames from igniting again wherever it touched. It is intended to form a brigade solely to work the extincteurs.

There was a grand ball on the 31st Oct. at Government-house, Macao, to celebrate the birthday of the King of Portugal. More than five hundred invitations were issued by the Governor to residents of Macao and Hong Kong. The drawing-rooms of Government-house were richly decorated and got up for the occasion.

A boat accident has occurred near the Police Chop. A two-oared gig containing two of the Royal Artillery suddenly turned over. One of the occupants of the boat could not swim, but he was held up by his companion until the arrival of the police, who were quickly on the spot, and both were rescued.

A few days since a junk laden with hay from Kowloon caught fire in the harbour. The Harbour Master's boats and the Police Chop Fire Engine at once put off to render assistance, and the junk was ultimately towed by the launch belonging to the *Victor Emanuel* to Yow-mah-tee Bay. The junk sustained considerable damage.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present French mail brings advices from this port to th 12th Nov.; the French mail from London Oct. 8 arrived on on the 8th Nov. We take the following items of intelligence from the *Straits Times*:—

We have received from the Colonial Secretary the following summary of Perak news, which we publish verbatim :—

On the news of Mr. Birch's assassination being received at Penang, a party of sixty men of the 1-10th Regiment were despatched to Perak, accompanied by Captain Innes, R.E., 1st Assistant Colonial Engineer, as Civil Commissioner. Captain Innes reported that he had arrived in the Perak River on the 29th Oct., and it seems probable that he had reached Durian Sabatang, about fifty miles from the mouth, the highest point at which the river is navigable for the *Pluto*. He further reported that it was his intention to march the next day to the Residency at Bandar Bahru, about eight miles further up, to the relief of Lieut. Abbot, R.N., and Mr. Swettenham, who were surrounded by a large body of Malays. Nothing definite has been heard of what happened on the 30th, but it is conjectured that the force was successful, and the Residency relieved. On the 31st the force under Captain Innes appears to have proceeded further up the river to the place where Mr. Birch was murdered, where a stockade was found and attacked. The attack was repulsed, with the result that Capt. Innes was killed, Lieuts. Booth, Elliott, and eight men of the 10th wounded, and one man missing. The troops then seem to have fallen back, but whether to the Residency only, or to the ships, does not appear. They brought with them the bodies of Captain Innes and Mr. Birch. The Governor called at Malacca and Klang on the way to Perak, and found all well at those places. He no doubt arrived at Perak on the 1st Nov., the day after the repulse, and was about to proceed up the river about thirty miles, as far as Bata Rabit, the Residency of the Sultan. By directions received from the Secretary of State, the Indian Government have been requested by this Government to send troops to Penang, and they may shortly be executed. [*Sic.*—Ed. S. T.] This prompt action on the part of the Secretary of State will probably render it unnecessary to obtain reinforcements from Hong Kong, as had been previously contemplated.

We by no means agree with the Colonial Secretary in his deductions. Five hundred men from Calcutta will no doubt be a valuable reinforcement, but if the Secretary of State for the Colonies and the Home Ministry desire to support this Government in the struggle, and to strengthen the Colony in a serious crisis, we think five full regiments would not be too much. In addition to what the Colonial Secretary communicates, we understand H.M.S. *Modeste*, now expected here hourly from Labuan, will be ordered at once to Perak. We hear, also, unofficially of course, that a telegram has been sent to Hong Kong for reinforcements, and that 300 men of the 80th leave for Singapore by the next mail steamer. It was said, also, that 1,000 troops instead of 500 are to be sent from Calcutta.

The serious nature of the news from Perak and Salangore suggests some reflections. We do not think there is any man in Europe of any weight who will not say, first, that Mr. Birch's murder must be avenged, and at once. We feel sure that the Governor will have the hearty support of every man of common sense in the three Settlements, in taking the severest and most peremptory measures in this matter. It is the colony's quarrel ; very well, the colony will settle it. We say this because we apprehend that the Home Government may possibly intervene. Nobody can say now-a-days what a British Government may do ; but we distinctly think that the colony should, on its own responsibility, do what is right and proper, and, above all, *do it quickly*. With such an able Colonial Secretary as Earl Carnarvon the Colonial-office will in all probability approve of *anything actually done*. We think it right, therefore, to put on record that it is nearly the unanimous opinion of everybody that "short and sharp" is the word here. If the Government want volunteers there is not a man in the place who will not volunteer. Furthermore, if the Home Government show any signs of shrinking in this most righteous quarrel, then this colony will rebel, as it once very nearly did before, not against Her Majesty the Queen, but Her Majesty's ignorant and misguided Government.

The Maharajah of Johore has ordered his gunboat, the *Pantie*, to Perak. We think this an act of extreme impolicy on the part of the Maharajah, and we are surprised that his advisers should have sanctioned it. There are reasons, apart from the supreme one that England wants or should want no help from anybody, why the Maharajah should not mix himself up in this matter. His own position is assured. His Highness should keep quietly aloof.

On the 5th November the Governor embarked from Johnston's Pier to proceed to Perak in the steamer *Minister Van Staat Rochussen*, which has been chartered by Government for the purpose at the low rate of $300 per day. His Excellency was accompanied by Captain Paton, A.D.C., Lieutenant McCallum, Private Secretary, and Major Dunlop, R.A., Inspector General of Police, who having some knowledge of the country, will be of great assistance to H.E., and should the reported murder of Mr. Birch prove true will very probably be temporarily left in charge as Commissioner. This steamer also took down twenty men of the Royal Artillery, with two field pieces.

Digitized by Google

By the N.I.S.N. Co.'s steamer *Banda*, which arrived here on the 5th November, from Batavia, we learn of the loss of the Co.'s steamer *Wm. Kroon Prins der Nederlanden*, which left Singapore on the 3rd November with the mails and passengers for Batavia. About 11 o'clock on the night of the 5th, when about 70 miles from Batavia, she came in collision with the Co.'s steamer *Atjeh*, which vessel was on her way to Singapore. The *Kroon Prins* was struck abreast of the mail room, and sank in about 15 minutes afterwards, the mails and cargo being totally lost. All the passengers and crew were saved by the *Atjeh*, but 3 Chinese and 1 Javanese are missing; these are, however, said to have gone in a boat, and will probably be heard from soon. The *Atjeh*, which had no cargo at the time, was on her way to Singapore to be docked. She returned at once to Batavia, but on examination does not appear to have been seriously injured, and will be sent to this port for repairs.

The question having been brought before Government of the validity of title deeds held and transfers of land and real estate made by aliens, a short Bill has been prepared, and will probably be passed this session, declaring their right to hold such property, and the validity of all previous transactions of this nature. The raising of this question had struck consternation among property holders, a large portion of the real estate of Singapore belonging to or having been purchased from aliens, and when the present Bill becomes law they will be relieved from the fear of vexatious lawsuits and possible loss of title to valuable estates.

The stewards of the Sporting Club have held a meeting, and decided to postpone indefinitely the Race Ball which was to be given on the 15th Nov., in consequence of the grave news from Perak. In taking this action we think it will be generally agreed that the stewards have shown both good taste and good feeling.

The average note circulation of the local banks during October was—

Oriental Bank	$229,662
Chartered Mercantile Bank of India, London, and China	470,740
Chartered Bank of India, Australia, and China...	629,670

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—During the interval transactions had been altogether on a most limited scale. Yarns appeared quite neglected, and though a few sales of Shirtings had been made, the market was entirely devoid of animation. As regards other goods, small sales of 7 lb. T-Cloths, Drills, Prints, Cotton Sateens and Turkey Reds had been made, but Velvets and Taffachelass were neglected. In Woollens, only good Black Lustres and Crape Mousselines were fairly saleable. The position of the Cloth market was worse and worse. The improved demand for metals had continued, though for assorted Bars and Nail-rods no material advance in price had been obtained.

HIOGO-OSAKA.—The Chamber of Commerce Circular says:—The native dealers appear to have completely satisfied present requirements by their purchases last month, and, since the 1st instant especially, it has been difficult to induce offers, even at lower rates. Cottons.—Grey Shirtings: The large settlements have been almost exclusively confined to Peacock and other common chops, imported from Shanghai by Chinese. The market closes weaker for all qualities. Turkey Reds: Considerable sales of these goods have been made, and a slight advance was at one time established; this has since been lost, and they are now difficult of sale. In Taffachelass a fair business has been done. Chintzes and Velvets have declined. Worsteds and Woollens: Black Orleans have been in less demand throughout, and close with a downward tendency. Black Lastings of good quality are saleable. Plain Mousselines de Laine continue in fair inquiry at an advance; Figured and Printed are weaker. Some settlements of Cloth are reported, but quotations are maintained with difficulty. Pig Iron is in large supply, and prices nominal.

CHINGKIANG.—Messrs Spencer and Wolff write from this port on the 27th October:—During the week under review a fair demand has existed for most kinds of Grey Goods, at prices which in some instances compare favourably with those current at Shanghai. Grey Shirtings: The market is almost bare of common kinds, the demand having run almost entirely on such goods. Sales are reported of 7 lbs. Green Lion at Tls. 1.46 per piece, and Horse and Jocky, at Tls. 1.47 per piece; 8¼ lbs. Green Lion, Tls. 1.64 to Tls. 1.66; Red Pheasants, Tls. 1.62 to Tls. 1.66 per piece; Lion on Globe, Tls. 1.58 to Tls. 1.59 per piece. T-Cloths; Business has been confined to common and medium qualities 7 lbs. Cloth; the settlements include Shield Chop at Tls. 1.34 per piece; Silver Dragon at Tls. 1.33 per piece, Gold Globe at Tls. 1.32 per piece, and various other chops at Tls. 1.25 to Tls. 1.30 per piece. English Drills continue in demand at Tls. 2.34 to Tls. 2.37 per piece for 14 lbs., and Tls. 2.38 to Tls. 2.41 per piece for 45 lbs.

SHANGHAI.—The market had exhibited great depression, with little, if any, prospect of improvement.

MANILA.—Messrs. Smith, Bell, and Co.'s Circular says:—After the despatch of last mail a little more demand was observable for Coloured Goods, while Plain Staples became quieter. Values, with few exceptions, continue unremunerative, owing in a great measure to the low rates now ruling for produce, and until these show some signs of advancing, we fear we cannot look for higher prices for Piece Goods.

SAIGON.—Piece Goods remained difficult to move, and there were no signs of improvement in the market. Quotations: Grey Shirtings. 8¼ lbs., $2.10 per piece; do. 7 lbs., $1.87½; T-Cloth, 6 lbs, 1.46; do., 5 lbs., $1.15; do. 4 lbs., $0.98.

EXPORTS.

TEA.

YOKOHAMA.—The market had in a measure recovered from the inactivity recently reported, native holders having yielded, especially in good common and medium grades. Settlements since 8th Oct. amounted to piculs 7,000, showing a decline of $3 to $4 per picul on low grades, and about $2 on better classes. Quotations:—Common, $16 to 19 per picul; good common, $20 to 22; medium, $23 to 25; good medium, $28 to 30; fine, $32 to 34; finest $36 to 39; choice, nominal.

HIOGO-OSAKA.—During the month the settlements had been on an unusually limited scale, aggregating but 3,800 piculs. Prices notwithstanding showed little decline, and scarcely sufficient to compensate for the deterioration in the quality of Teas on offer. Total settlements to the 16th Oct. had been 43,625 piculs, against 40,000 piculs for the corresponding period last season. Stocks were estimated at 4,200 piculs, consisting principally of undesirable lots of low class leaf.

SHANGHAI.—Black: The market had been quiet, and only a few settlements are reported. The stock had been somewhat increased by arrivals of inferior quality. Settlements for the week, 2,964 chests at Tls. 13 to 24; stock, 6,900 chests. Green: A fair business had been done at the decline quoted last mail, but the demand was not at all general; the bulk of the settlements being amongst two or three houses. Stocks of country Tea continued large, but those of Pingsueys were much reduced. Settlements for the week:—Fychow, Teenkai, and Moyune, at Tls. 22½ to 33; Pingsuey, at Tls. 14 to 39; total settlements, 25,876 half-chests; stock, 87,140 half-chests. Export to Great Britain to date (exclusive of lost cargoes):—

	1875-1876.		1874-1875.
Black	58,520,149 lbs.	against	61,152,024 lbs.
Green	3,457,411 „	„	5,496,540 „
Total	61,977,560 „	„	66,648,564

SILK.

YOKOHAMA.—A large business had again been done; transactions had been chiefly in medium and common Hanks, prices for which had been steady at previous quotations. Coarse Oshius (Hamatski) had been in much request, and rates were higher. Arrivals had been good, and stocks were augmented. Settlements from 1st July to date, 5,600 bales; against corresponding period, season 1874-5 4,800; do. 1873-4 5,680; do. 1872-3 7,140; stock, 1,300. Silkworms' Eggs: Total arrivals to date 710,000 cards. The market had scarcely opened, only 20,000 cards having passed into the hands of buyers, of which a very small portion had been actually settled. A few purchases were reported at $1.30 to $1.65 for good cards.

SHANGHAI.—An active business had been done during the week, resulting in settlements of about 2,000 bales. Prices generally showed no material change on those ruling last mail, but in a few cases an advance of Tls. 2½ had been established. The bulk of purchases consisted of No. 5 Tsatlee, costing Tls. 280 to 295, and Kahings had also been dealt in to a moderate extent, and the latter being in small supply, had further advanced in value. The market closed very firm; the unsold stock was estimated at 15,000 bales.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BOWES—On the 10th Dec., at Streatlam Towers, Liverpool, the wife of James L. Bowes, of a son.
FAIRBAIRN—On the 1st Nov., at Greenmount, Hong Kong, Mrs. John Fairbairn, of a son.
GODFREY—On the 23rd Oct., at Tokio, the wife of J. G. H. Godfrey, of a daughter.
JAMIESON—On the 24th Oct., at Chefoo, the wife of G. Jamieson, H.B.M. Consulate, of a daughter.
LINES—On the 15th Oct., at Shanghai, the wife of Alfred J. Lines, of a son.
SCHEIDT—On the 23rd Oct., at Yokohama, the wife of F. Scheidt, of a son.
SOUZA—On the 19th Oct., at Hong Kong, the wife of E. F. de Souza, of a daughter.
WHEATLEY—On the 21st Oct., at Ningpo, the wife of Edmund Wheatley, of a son.
WORTHINGTON—On the 6th Dec., the wife of G. H. Worthington, of Hollinwood, near Manchester, of a daughter.

MARRIAGES.

CUTHBERTSON—ANDERSON.—On the 9th Nov., at St. Andrew's Cathedral, Singapore, by the Rev. R. J. French Smith, Thomas Cuthbertson to Margaret Maxwell, third surviving daughter of the late John Anderson.
LOFF—DE VOS.—On the 3rd Nov., at Singapore, Capt. T. D. Loff to Johanna Christiana Louise, widow of the late D. de Vos.
PETO—HARDING.—On the 7th Dec., at St. Augustine's Church, by the Rev. R. R. Chope, Vicar, S. Arthur, fourth son of Sir S. Morton Peto, Bart., to Ellen C., fifth daughter of R. P. Harding, of 88, Queen's-gate, Hyde-park.

DEATHS.

FRYER—On the 1st Dec., at Somersham, William Fryer. Friends are requested to accept this intimation.
MACKENZIE—On the 4th Dec., at Westray, Orkney, Francis James Mackenzie, fourth son of the late Thomas Mackenzie, of Applecross.
MAPPIN—On the 6th Dec., at Blackheath-park, Kent, Horace Adrian, infant son of John N. Mappin.
M'CANCE—On the 21st Oct., at Yedo, Alexander M'Cance, aged 60 years.
REEVES—On the 24th Oct., at Shanghai, Diana, wife of George Reeves, aged 31 years.
SHEPHERDSON—On the 4th Nov., at Malacca, John Edward Francis, son of Robert J. Shepherdson, aged 4 years.
STUART—On the 8th Dec., at Bahia, Charles J. F. Stuart, chief manager Oriental Bank Corporation.

TELEGRAMS FROM THE FAR EAST.

THE SPANISH MINISTER AT PEKING.

SHANGHAI, Nov. 27.—Senor Fraldo, Spanish Minister at Peking, is dead.

THE YUNNAN MISSION.

HONG KONG, Nov. 30.—Placards censuring the Chinese Government for arranging terms with Sir Thomas Wade have appeared at Peking. They were immediately removed by the authorities. An uneasy feeling prevails among the native officials regarding the recent negotiations. Fresh information implicating the Momein authorities in Mr. Margary's murder is stated to have been received.

*** A private telegram has been received in London from Peking which says the "Legation arrangements (are) proceeding, and Ministers appointed to the United States, Peru, and Japan." There is no date to the telegram. It was forwarded from Shanghai to Penang, and thence by steamer to Moulmein or Galle.

CHINA AND KOREA.

SHANGHAI, DEC. 9.—A body of drilled Chinese troops is to be despatched to the province of Korea, in order to repel any invasion that might be attempted by the Japanese.

CHINA MARKET REPORTS.

(REUTER'S TELEGRAMS.)

HONG KONG, DEC. 2.—Cotton goods dull, and drooping. Grey Shirtings, 8¼ lbs., $2.42½; 16-24 water twist, $103. Cotton: Fair medium Bengal $14; Tea: Foochow active.

SHANGHAI, DEC. 2.—Cotton goods stagnant. Grey Shirtings, 8¼ lbs., Tls. 1.8.9. Tea: No change to report. Silk: No change to report; some inquiry for America. Exchange on London, bank bills, six m.s., 5s. 7⅞d.

Shipping Intelligence.

ARRIVALS.

At YOKOHAMA.—From London, previous to Dec. 7, Venice (str.), Cathaya; from New York, Oct. 21, Fleetwing.
At HIOGO.—None.
At SHANGHAI.—From London, Oct. 26, Glenfinlas (str.); Nov. 23, Viking (str.); from Liverpool, Achilles (str.)
At HONG KONG.—From Liverpool, Oct. 30, Eastern Monarch; from Philadelphia, Nov. 1, Caprera; from Liverpool, Nov. 30, Anchises (str.); from London, Dec. 1, Montgomeryshire (str.); from Cardiff, Carrick Castle, Prince Louis; from London. Dec, 10, Hopewell; from Liverpool, Ajax (str.); from Antwerp, Shingvalla (str.),
At MANILA.—From Barcelona, Oct. Esplorado; from Boston, 24, Sooloo.
At SAIGON.—From Bordeaux, Oct. 12, Madeleine; from Marseilles, 20, Belle Justine; from New York, Nov. 2, Confluentia.
At SINGAPORE.—From London, Nov. 29, Glenroy (str.); from Liverpool, 26, Amsterdam, Ajax (str.).

DEPARTURES.

From YOKOHAMA.—None.
From HIOGO.—For London, Oct. 11, Satsuma; Dec. 6, Coulnakyle.
From SHANGHAI.—For London, Oct. 23, Nestor (str.).
From HONG KONG.—For London, Oct. 30, England's Glory; Nov. 2, Nestor (str.).; for San Francisco, 1, Weymouth, Theodore Korner.
From MANILA.—For Liverpool, Oct. 19, Corea; 20, Seaton; for Channel, f.o., 23, Scindia.
From SAIGON.—For Falmouth, f.o., Oct. 12, Aldebaran; for Rio Janeiro, 16, H. and L.; for Mauritius, 23, Bayonnaise; for Monte Video, Nov. 4, Ernest.
From SINGAPORE.—For London, Nov. 4, Lorne (str.); 8, Nestor (str.); Dec. 7, Glenfalloch (str.).

Naval and Military.

The Admiralty, having had various plans and proposals submitted to them for raising the Vanguard, have resolved on throwing the operation open to public competition, and they are prepared to receive tenders for raising the ship and delivering her in dock. Their lordships have laid down several conditions, the principal of which are that all parties tendering shall furnish satisfactory evidence of their financial ability to undertake the work; that the parties tendering shall undertake to deliver the ship either in a dry dock or at the entrance of one of Her Majesty's docks in such a state that she may be docked, and the delivery is to be considered incomplete till she is safely docked. The ship is to be raised and delivered whole, and not in pieces; no payment is to be made to the contractors, or any claim to payment

Digitized by Google

arise, until the delivery is complete; the contractors are to be responsible for any infringement of patent rights; the time by which the parties tendering propose to begin operations and the probable date of completion are to be stated in the tender; the parties whose tender should be accepted will sign a contract, to be prepared at the Admiralty, binding them to give effect to their tender on the conditions. All tenders are to be for a lump sum, to cover all charges, and not for a percentage on the value of the ship, but their lordships state that they will not bind themselves to accept any tender.

The following officers, whose last term of service was on the China Station, have received appointments as under:—Commander A. T. Poulett (in the Avon, from the 23rd of January, 1874, to 1875), to the Spiteful, 6, paddle-sloop, Cape of Good Hope; Lieutenant A. H. Boldero (in the Thistle, from 1870 to 1875), to the Juno, 8, screw-corvette, China; Sub-Lieutenant E. P. Aske (in the Cadmus, from 1872 to 1874), to the Pearl, 17, screw-corvette, Australia; Sub-Lieutenant J. Casement (in the Ringdove, 1875), to the Sealark, boys' training-ship; Sub-Lieutenant W. R. H. Edwardes (in the Cadmus, from 1871 o 1874), for the Research, 4, armour-plated-sloop, Mediterranean; Sub-Lieutenant A. J. Horsley (in the Cadmus, from 1870 to 1874), to the Pearl; Sub-Lieutenant H. B. Jackson (in the Cadmus, from 1871 to 1874), to the Liberty, 8, tender to the Ganges, Falmouth; Mr. David Grant, engineer (in the Elk, from 1872 to 1875), to the Vivid, tender to the Royal Adelaide, Devonport; Mr. H. Macdonnell, staff surgeon (in the Iron Duke, from 1871 to 1874), to the Warrior, coastguard ship at Portland; Mr. A. Miller, boatswain (in the Salamis, from 1871 to 1873), to the Malabar, Indian troop-ship.

An important Royal warrant on the pay and promotion of the non-commissioned officers of the army has been issued. It is but the first part of the long-expected scheme for improving the position of the non-commissioned officers, but it has been received with much satisfaction, inasmuch as it displays a serious intention on the part of the Government of dealing with the question. Any increase in pay, allowances, or pensions is left to be dealt with in a future order, but in the present warrant Her Majesty sanctions an entire reclassification of the several grades of non-commissioned officers before fixing the emoluments of each class. Staff-sergeants and others having special duties to perform requiring more than ordinary intelligence or application are elevated to a higher relative position, in some cases rising two classes at a step, and the general effect of the warrant is to elevate the whole body of non-commissioned officers. As soon as the new classification is sufficiently understood the consolidated warrant fixing the amount of pay and allowances may be expected.

Herr Krupp, the German gun manufacturer, has, it is stated, intimated to his Government that he is prepared to produce a 150-ton gun of forty-six centimetres calibre, or about 18½ in. Not being able to appreciate the system adopted by England of building up guns by coils of wrought-iron which may be increased in size to any extent without being rendered liable to burst, he proposes to use his favourite steel, even for this enormous weight; the difficulty, however, is that he will have to make the tube or body of the gun in two pieces. The gun is said to be already commenced.

It is notified that the Queen has approved of a memorial from the Lords of the Admiralty sanctioning the grant at their discretion of special Greenwich Hospital pensions of £3 8s. a year each to all warrant officers and others who, while serving in the Royal Navy or Marines, contributed to the funds of that institution for full five years previous to the 1st day of January, 1830, provided they are not in receipt of any other pension chargeable to the said funds, are not maintained in any hospital at the expense of Greenwich Hospital, and are not inmates of workhouses.

"Plimsoll's mark," as the sailors call it, has been placed on the hull of Her Majesty's steam storeship, Earl de Grey and Ripon, employed principally in the conveyance of War Departmemt stores between the Royal Arsenal, Woolwich, and the various depôts in the South-West Coast and in Ireland. The mark consists of a short yellow band, painted amidships, about six inches below that which has been always regarded as the ship's water-line; and it will make a considerable difference in the amount of the cargo which it will be lawful for the ship to carry.

Rear-Admiral Richard Purvis, on the retired list, died at his residence, Alverstone, near Gosport, on the 4th inst. This gallant officer, who was born in 1826, entered the Royal Navy as midshipman on board the *Blonde*, 42, frigate, commanded by Captain—afterwards Admiral—Sir Thomas Bouchier, K.C.B. While in the *Blonde* he assisted in storming the heights of Canton, acting on this occasion as aide-de-camp to his captain. He was wounded in the attack on the Woosung batteries, his name being twice mentioned in the despatches.

The six frigates composing the Detached Squadron under the command of Rear-Admiral Lambert will very shortly leave the East Indian station for the Mediterranean, instead of remaining there until March, as previously arranged. The ships will come through the Suez Canal, being the first instance of a whole squadron of men-of-war having passed through the Canal in company. The combined crews of the squadron amount to more than 3,000 men.

The Vulture, 3, double-screw gun-vessel, Commander Arthur T. Brooke, left Malta on the 1st instant for England, to be paid out of commission. She was commissioned at Sheerness February, 1872, and left the same month for the East Indian Station, *vid* the Cape of Good Hope.

The Rover, iron corvette, is to be commissioned on the 14th inst. by Captain Barnardiston for the North American and West Indian station. She is to have a compliment of 325 officers and men.

A vote of £10,000 will be asked for next session for the defensive works at the naval anchorage of Bermuda. The works, when completed, will have cost £395,000.

Captain Thomas Brandreth has been appointed Naval Aide-de-Camp to the Queen, vice Captain Alexander, deceased.

The Philomel, gunboat, left Bombay on the 11th ult. for Penang and Singapore.

SHIPS OF WAR AT HONG KONG.

Her Majesty's ships of war in harbour are the Ringdove and the Lapwing. The Modeste left on the 31st of October for Singapore, to relieve the Thistle, and would call at Manila and Labuan on her passage down. Admiral Ryder, Commander-in-Chief of the China Station, was at Shangahi on the 28th of October, as were also the flagship Audacious, the Egeria, the Swinger, the Thalia, the Growler, the Dwarf, and the Vigilant. Major Twemlow, 80th Regiment, arrived at Hong Kong by the Ocean Steamship Company's steamer Antenor, on the 2t9h of October, and took over the command of the 80th Regiment.

THE MURDER OF MR. PARR, RESIDENT AT BENCOOLEN.

In recently commenting upon the murder of Mr. Birch at Perak, we observed that it was necessary to go fifty years back to find a precedent for a similar act in the Malay peninsula. In the life of Sir T. F. Raffles, published by Murray in 1830, details of this unfortunate occurrence are given, from which it appears that the circumstances which led to the murder were chiefly that on Mr. Parr's arrival at the Residency he effected great economical reforms, making large reductions in the public establishments, and so throwing numbers of people out of employment, and reducing some actually to starvation. He was also somewhat indiscreet and arbitrary in other acts, and the result was that meetings were held, oaths administered, and the country in short was in a state of revolt. Mr. Parr was unfortunately blind to the danger and the Government-house was surrounded, the guard overpowered, Mr. Parr murdered, and his head struck off. As showing, however, that the indignation of the natives was only against Mr. Parr himself, they left his wife unharmed.

THE MURDER OF MR. BIRCH.

The following is an extract from a private letter from Penang, dated November 4:—

The *Pluto* came in yesterday evening from Perak, bringing the news that Mr. Birch had been murdered by the Malays. The Governor, during a recent tour in Perak, arranged with the Sultan and some of the chiefs that the government of the country should be undertaken by Commissioners on behalf of the Sultan. The latter and all the chiefs of Perak were to receive pensions of various amounts. A proclamation announcing the change duly appeared in the Government *Gazette*, and Mr. Birch and Mr. Davidson were gazetted as Commissioners (acting temporarily). Copies of the Governor's proclamation translated into Malay were sent to Mr. Birch to be circulated in Perak, and on Monday last, November 1, the Malay "Hari Raya," or festival after the fasting month (Ramzan), he seems to have been at a village on the Perak river for the purpose of placarding the proclamation. This was considerably higher up the river than the Residency. At the latter place there is a guard of forty or fifty Sikhs. Mr. Birch had with him only three or four Sikhs, his servant, and an interpreter. The interpreter who posted the notices reported to Mr. Birch that the Malays were much excited, and were tearing the proclamation down. He sent the man to post them up again, and went to the river to bathe on a little stage or platform, such as Malays generally use when they live on the bank of a river. The person bathing is partly concealed by a low attap (palm-thatch) screen. The unfortunate interpreter, while putting up the proclamation again, was stabbed in the stomach, and the Malays then rushed down to the river, wounded Mr. Birch's few attendants, and speared him through the attap. It is not yet known what became of him. It is said that he was seen to fall, and there can be no hope that his life was spared. He was not seen again, alive or dead. An officer of the *Thistle* (an English gunboat), named Abbott, who had accompanied Mr. Birch, was out shooting when all this occurred. He returned immediately afterwards, and was advised by a Malay to take to the jungle. He did not do this, however, fortunately for himself, but got into a canoe with one man and paddled down the river to the Residency. He was fired at repeatedly from the banks, and the boat was hit more than once, The matter had evidently been deliberately planned, and the day fixed on. If it had been a mere chance scrimmage arising out of a sudden quarrel, the other villages lower down the river would not have fired upon Abbott. It is said that there has been some disturbance in Sangalore also, where Mr. Davidson is Resident, and that he wrote to warn Mr. Birch. His warning either arrived too late or was disregarded. The *Pluto*, which was in the Perak river, came at once to Penang for assistance. She left again this morning (Thursday, Nov. 4) with an expedition, who go to take charge of the Residency, &c. Captain Innes, R.E., goes in charge, with sixty-five rank and file of the 10th Regiment, under two lieutenants, and thirty-five policemen. Innes is the best man they could have to be in command.

A correspondent of *The Times* writes as follows:—

On the 3rd Nov. news arrived at this island that the Hon. J. W. W. Birch, the Political Resident of Perak, Malacca, and Mr. F. A. Swettenham, his Assistant, had been treacherously murdered. Perak lies about twelve hours' journey by steamer from Penang, and is situated south in the Malacca Peninsula. From the vague and hasty reports that have been sent in it has been gathered that Mr. Birch had gone out to a small hut he had erected a few miles from the town and on the banks of the river. While he was bathing he was suddenly attacked by a party of Malays, armed with spears. He was in his dressing-room at the time. His servant and interpreter fled towards the boat they had arrived in. The interpreter, however, was speared and killed just as he got to the boat, but the servant managed to escape, although wounded severely. The boatmen immediately pulled as hard

Digitized by Google

as they could down the river with the servant and the body of the interpreter. They had to run the gauntlet of missiles hurled at them by the Malays from the shores, but arrived after two hours at Perak. The last that was seen by the boatmen as they fled was Mr. Birch's house surrounded by Malays, who were thrusting their spears through the mat walls, while others were bursting the door open to get in. There is little doubt as to his fate, although at present nothing more definite has been heard of him, for all communication ended with the flight of the boatmen.

Perak had been under British protection, with Mr. Birch as Political Resident, for some time, he having been appointed during last year; but had been lately ceded entirely to the British by the petty Rajahs of the district. In furtherance of this last arrangement proclamations had been issued and fixed in the villages announcing the fact of the cession. Mr. Birch is said to have received intelligence of these proclamations having been torn down, and was *en route* to investigate the matter when he met with his untimely end. Mr. Swettenham had been sent on before by Mr. Birch, and had not been heard of for five days, but I am glad to report that news has just come in that he is safe at Qualla Kangza, though I have not been able to gain particulars.

THE CHINA AND JAPAN MUTUAL MARINE INSURANCE COMPANY.

A provisional committee, consisting of Messrs. Hugh Sutherland, George Siegfried, J. M. Ringer, A. J. Little, and Emil Bode (the present directors of the above company), has issued a prospectus with reference to forming a new mutual association of those willing to support it with their business. This scheme has been set on foot in consequence of the majority of the votes at a recent meeting having been cast in favour of liquidation by fifteen to twelve; and the directors feeling that the shareholders are divided into two distinct parties; one party, almost entirely non-supporters of the company, wishing to realise their investment, another party, from whom the company derives its main support, wishing to carry on, consider it manifestly contrary to the interest of either that they should remain united, and have, consequently, taken the course above named. They propose to pay off the present shareholders their shares in the capital and reserve fund as they were on 30th June last, leaving the working account as it stood at that date to go to credit of the new association. The company is to be formed (either under a contemplated Order in Council, enabling joint-stock companies to be formed in Sanghai, or with a head office in London or Hong Kong) as a limited liability company, with a subscribed capital of Tls. 1,200,000, and a paid-up capital of Tls. 240,000; and interest at 10 per cent. upon the capital shall be a first charge upon the profits, and any sum remaining to profit of working account after such interest has been paid shall be divided, two-thirds being paid to contributing shareholders, and one-third passed to reserve fund. The provisional committee confidently recommend the reconstruction of the company on the above basis, believing that they are thus putting themselves in possession of a good working business under exceptionally favourable conditions.

THE THIRD INTERNATIONAL CONGRESS OF ORIENTALISTS.

The November number of the *Russiche Revue* gives some account of the proceedings of the Organising Committee of the next Oriental Congress, which is to commence its sittings on the 1st (O.S., our 13th) of next September, at St. Petersburg. The members of the committee are Professors Grigorief, Patkanof, and Chwolson, and Mr. A. Kuhn; Professor Grigorief being the president. The Congress, it is stated, will pay special attention to Asiatic Russia, dividing it into four districts, viz., 1, Siberia; 2, Central Asia, including the independent khanates of West Turkestan; 3, the Caucasus; 4, Transcaucasia. The rest of the East will be arranged in the following groups: 5, East Turkestan, Mongolia, China, and Japan; 6, India, Persia, and the islands of the Indo-Chinese Archipelago; 7, Turkey and Arabia. Each of the seven sections devoted to these subjects will discuss the geographical, historical, philological, and literary questions which will come before it. But there will also be two special sections; the one, No. 8, devoted to the Archæology and Numismatics; and the other, No. 9, to the Religions and Philosophies of the East. Not only professed Orientalists are invited to attend the Congress, but also all persons who are interested in Oriental questions, especially travellers and explorers, as well as official residents in Asia; in fact, every one who can in any way forward the ends of the Congress.

One of the objects proposed by the Committee is to draw up an account of what has already been done in Russia with regard to the matters which the Congress will discuss. Considering that no more acceptable present can be offered by the Orientalists of that country to their western colleagues and guests than a summary of Russian research in Asia, the committee propose to print, before the opening of the Congress, a historico-bibliigraphical account of what Russian scholars and travellers have written about the East. A meeting was held in May, which was attended by about forty Oriental authorities, moft of whom promised to co-operate with the committee in the task of preparing such a report. Ssberia will be represented by MM. K. Staritsky, M. Venyukoff, and P. von Helmersen; Central Asia, by Baron A. von Kaultars and Professor Grigorief; Transcaucasia, by Professor Patkanof, who will devote himself to Armenia, and by A. Zagareli who will take Georgia as his subject. The cartography and ethnography of Mongolia will be treated by P. von Helmersen. Baron E. von Osten-Sacken will give an account of Russian geographical and ethnographical researches concerning China; and I. Sakharof of those of a linguistic and historico-literary nature. Professor Lerch will deai with Russian Iranian studies, P. Savaitof with Russian travels to Palestine and the neighbouring lands, and Baron V. von Rosen with Russian collections of Oriental MSS., &c.

The committee have also taken steps towards organising an exhibition of such Oriental objects as may enlist the interest and forward the studies of the members of the Congress. By it will be specially illustrated the archæology, palæography, ethnography, and literature of the East. The public collections in outlying districts will be laid under contribution for this purpose, especially those in Siberia, Turkestan, and the Caucasus. But an urgent appeal is made also to private collectors, whether they are travellers, or servants of the State who have resided in the East, or untravelled Russians who have acquired specimens of the Oriental treasures which have so often been discovered in Russia, and which are constantly being brought to light by the plough or the spade of the railway excavator. To collectors of the latter class it is generally hinted that they may, by contributing, not only confer a benefit upon science, but also turn an honest penny. What the committee chiefly desire are (1) Oriental inscriptions on stone or metal; (2) Oriental MSS.; (3) old maps of Asiatic countries; (4) portraits, landscapes, &c., collected by travellers in Asia; (5) clothes, weapons, domestic utensils, &c., now used by Orientals; and (6) memorials of the past life, public and private, of Eastern peoples, whether found in Russia or brought thither by Russian travellers in the East;—everything, in fact, which Russia can contribute towards the elucidation of Eastern questions. The English corresponding member of the committee, we may mention, is Professor R. K. Douglas, of the British Museum.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Dec. 8, at New York, from Padang, Osseo; 9, at Liverpool, from Manila, Emiliano (str.); off Queenstown, from Manila, for London, City of Halifax; 10, at London, from Shanghai, Teviot (str.); from Foochow, Olympia (str.); from Manila, Ludovic and Charles; 9, at New York, from Penang, Enrico Dandolo; at Boston U.S., from Ilo Ilo, Lucy S. Wills; 6, from Rotterdam, for Java, Krimpen v. d. Lek; 12, at London, from Foochow, Flintshire (str.); from Canton, Osaka, off Scilly, from Rangoon, Iris; 11, at London, from Shanghai, Patroclus (str.); 12, Black Prince; at Falmouth, from Akyab, Era; at Liverpool; from Manila, Admiral Tegethoff; from Rangoon, Star of India; 12, at Liverpool, from Manila, Bato.

DEPARTURES.—Dec. 8, from Cardiff, for Manila, Innocenta; 4, from St. Nazaire, for Reunion, Chittagong; 10, from Liverpool, for Manila, Buena Ventura (str.); for Singapore, Gem; from Sunderland, for Penang, Empress; 9, from Shields, for Singapore, Compagnée Generale; 10, from London, for Shanghai, M. A. Dixon; 10, from Sunderland, for Rangoon, Alastor; 9, from Bordeaux, for Saigon, Georges; 11, from Liverpool, for Anjer, Agate; for Penang, Invincible.

PASSED SUEZ CANAL.—Dec. 9, J. B. Walker, from Southampton for Batavia; 10, Cheops, from London for Shanghai; 10, Thames, from London, Colombo and Singapore; 11, Fleurs Castle, from Shanghai for New York; 11, Naples (str.), from Shanghai, for London; 11, Holland, from Southampton, for Batavia.

SPOKEN.—Lochleven Castle, Liverpool to Yokohama, Oct. 23, 5 N., 21 W.; County of Stirling, Glasgow to Batavia, Nov. 4, 5 N., 27 W.; County of Argyle, Batavia to Rotterdam, Nov. 4, 28·27 S., 6·54 E.; Mora, Yokohama to New York, Oct. 30, 35·7 S., 24·11 E.; County of Berwick, Java to Holland, Nov. 6, 28·43 S., 7·16 E.; Ellen Browse, London to Shanghai, — 4·48 N., 24·14 W.

CASUALTIES.—St. Helena, Nov. 22.—The Signe, arrived here Nov. 17 from Java, experienced very heavy weather, lasting two days, between Algoa Bay and Cape Agulhas; lost and split sails, and was thrown on her beam ends, remaining in that position for some hours. The Sarah Watson, which arrived here on the 19th inst. from Singapore, experienced a succession of hard gales from the 19th to the 26th Oct.; on the latter day, in lat. 35 S., long. 28 E., encountered a terrific gale from W.N.W., with a tremendous sea, which struck the ship on her port bow, breaking two stanchions, and carrying away a quantity of bulwarks, and doing other damage. Cadiz, Dec. 3.—The St. Aubin, from Cardiff for Singapore, was in collision with a steamer (supposed to be English) on the night of the 1st inst. off Cape St. Vincent, which caused damage to bowsprits and bulwark, and she put into port to have same repaired, a survey will be held.

THE Messageries Maritimes Company's steamer *Ava*, with the present inward mail, arrived at Marseilles on the 9th inst. She brings ninety-eight passengers and a general cargo, including 750 bales of silk, 5,422 packages of tea, 291 packages sundries, and specie to the value of £2,715 for London, which part of her cargo will be forwarded to its destination per Company's steamship *Gange*, due in London on or about the 29th inst.

SIR WALTER BARTTELOT, M.P., speaking at Horsham, expressed his approval of the purchase of the Suez Canal shares, but he thought Parliament ought to have been immediately called together to vote the money. He also held it to be the duty of England to preserve a free highway to China through the Straits of Malacca. The hon. member added that he was not satisfied with what the Government had done in regard to local taxation.

M. FRANCISQUE SARCEY, one of the wittiest and best known of French critics, is about to appear before the Tribunal Correctionnel of Paris, in answer to a charge of libel brought against him by some Catholic society, for converting infidel Chinese.

THE Russian Government is about to ask China for permission to send her caravans to the Celestial Empire, not only by Kalgan, but also by the Joki-gate to Tungchow and Tientsin.

KEASBERRY TESTIMONIAL FUND.—To those gentlemen who purpose adding their names to the list in our advertising columns we would quote the proverb *Bis dat qui cito dat*. The hon. treasurer is anxious to close the account, if possible, during the present week.

The Rotterdam Lloyd steamship Torrington, Captain R. Blacklin, sailed from Southampton yesterday, with mails, passengers, and cargo for Padang, Batavia, Samarang, Surabaya, and other ports in Java.

Literature.

The Eastern Seas; a Narrative of the Voyage of H.M.S. *Dwarf* in China, Japan and Formosa; by Captain B. W. BAX, R.N. London: John Murray, Albemarle-street.—This is a pleasingly written narrative of the commission of H.M.S. *Dwarf* in the Eastern Seas, during a period of three years and eight months. It will be read with interest in China and Japan, by many residents acquainted with Captain Bax; and to home readers it will give a good idea of many important facts in connection with those countries. One of the most valuable sections of the work is that relating to the Russian ports in the Eastern Seas, of which at present very little is known. As Captain Bax justly observes, many at home will doubtless be surprised at the large strides made by that Power on the Sea Coast of Tartary, and her possession there of splendid harbours capable of holding large fleets, and of being made almost impregnable, such, for example, as the harbour of Vladivostok, which is about to become the head quarters of the naval forces in Eastern Siberia. The description of the savage inhabitants of Formosa is also of much interest, and the remarks made with reference to the war between Japan and Formosa are well considered and weighty. Captain Bax observes that although to the casual observer small results were apparently obtained, the real effect has been to compel the Chinese to acknowledge their responsibility for the conduct of the tribes on the East Coast of Formosa towards shipwrecked people.

A to Z, being Twenty-six Notes on a Soldier's Trumpet. By Surgeon-Major F. E. SCANLAN. London: Houghton and Gunn, 162, New Bond-street; and Hatchard and Co., 137, Piccadilly.

Residents in Japan will hail with pleasure this series of military caricatures from the pencil of Surgeon-Major Scanlan, who was attached to the 10th Regiment during its stay in that country and China. They will easily recognise—

A was an Adjutant,
Ride a cock horse;

and the public of Hong Kong will not be slow to discover whom—

C a Controller,
Laden with gold,

is meant to represent. The "noisy Artillery Corps" will awaken many a memory—pleasant, perhaps, on the principle of "forsitan hœc et olim meminisse juvabit"—of unearthly disturbance in the early morn. The expression of mingled delight and trepidation on the artilleryman's countenance is extremely clever; and throughout the work we may fairly say that we have seldom seen the powers of seizing character and bringing it out with a few strokes of the brush better displayed—indeed, some of the portraits will compare favourably with the inimitable characters in "Vanity Fair." But apart from this local colouring, the book must be accepted on its merits as being one of the very highest class of caricatures. Its finish is excellent in the extreme, and both author and publishers deserve the greatest credit for its production.

The Journal of Lieut.-Colonel Sosnovsky, who recently made an expedition to China, has been published in French at St Petersburg. He gives some interesting particulars concerning the Chinese army, and especially of the troops engaged at Siang-jangfoo, during Colonel Sosnovsky's stay in that town. They were placed in ten camps: seven of infantry, armed with European guns, two of cavalry, and one of militiamen, armed after the old Chinese fashion. Each infantry camp consisted of 500 men, and each of the cavalry was intended for 250 troopers; but none of the latter were under canvas, as, according to the commander, they were posted in the neighbouring villages. The Thi-Doo (Camp Commandant) let Colonel Sosnovsky witness various military evolutions by these troops. The words of command used were English, and the Chinese were drilled by English instructors, who had been in the employ of the Chinese Government for nine months, and received as wages 600 laens (£250) a month. In spite of such good instructors the Chinese soldiers have learned nothing, and, according to Colonel Sosnovsky, the troops drilled under the old system are better than the other. In the Sang-jang-foo camps slow marching is very much in vogue, as well as the "square" formation. When firing the soldiers sit down. They keep their guns very negligently, and when Colonel Sosnovsky directed the attention of the commander to one of these guns he was assured that the guns had been received from Tientsin, and after having been kept in boxes for a long time, had been issued to the troops only on the previous day.

In our last issue we noticed that the Gallery of the Burlington Fine Arts Club, in Savile-row, is at present occupied by a rare collection of articles of Japanese lacquer, contributed for the most part by Mr. James L. Bowes, President of the Liverpool Art Club, and joint author with Mr. G. A. Audsley of the "Keramic Art of Japan." The art, which is a very old one, and unique, is stated by the Japanese to have reached its development about three hundred years ago. From the very excellent catalogue, written by Mr. G. A. Audsley, we take the following interesting items:—There are three sections, viz.: "The Raised," "the Incrusted," and "the Flat." Of the raised the drum box seems most worthy of notice, which is of the finest gold lacquer, representing one of the flat drums used by the Japanese, and consists of a ring of wood with parchment tightly stretched on both sides, and cemented and secured by metal nails to its rims. Next a sweetmeat box. This fine specimen is the form of the outline of a Japanese boat, with sail set and heavily laden with treasure. Of the incrusted lacquer we would call attention to a writing-case, being highly ornamented both inside and out with various beautiful scenes. The third section, or flat lacquer, should not be passed unnoticed, a portion of which is a cabinet sword stand, in deep crimson clouded lacquer, decorated with elegant and refined devices. There are also a large number of other objects exhibited, which are too numerous to mention.

The following is from the *Academy*:—

Mr. Louis de Zoysa, Mudeliar, the Librarian of the new Government Library at Colombo, and chief translator to Government, has made from time to time several reports to Government on the result of his inspection of the libraries attached to the Buddhist monasteries in Ceylon. These reports have now been made public, and, while confirming our fears of the total destruction of the most ancient Simhalese or Elu literature, show that the Mudeliar has succeeded in discovering several important works whose existence was hitherto unknown. Among them the following are especially noteworthy:—*Daladā pūjāwaliya* and *Daladā sirita*, two old Simhalese books on the History of the celebrated Tooth-relic, the authenticity of which was discussed in the *Academy* of September 26, 1874; the *Kesa-dhātu-vansa*, or History of the Hair-relic, MSS. of which were quite unknown (this work is the more interesting as it is mentioned in the thirty-ninth chapter of the *Mahāvansa*, translated by Mr. Rhys Davids for the last volume of the *Journal of the Royal Asiatic Society)*; the *Lalāta* or *Nalāta-dhātu-vansa*, the copy of which in the University Library at Cambridge is the only other copy known: the Paris Library has a copy of a Pāli commentary upon it. The *Sāsana-vansa*, or History of Buddhism, and the *Rajadhirāja-vitāsini*, a History of Burma, are both Burmese Pāli works of unknown date, but are expected, like the others above-mentioned, to contain much important historical matter.

There are also a number of works on Buddhist ethics and metaphysics, among the most interesting of which is an old Elu commentary on the *Dhammapada*, so well known in Europe through Mr. Fausböll's edition, and Professors Max Müller and Weber's translations. It dates from the tenth century, and is possibly the oldest Simhalese prose work now in existence. Among grammatical works the most important is the *Pada-sādhana-tīkā*, a very ancient Pāli commentary on the oldest Pāli grammar, that of Moggallayana, of which M. Senart has lately published an edition in the *Journal Asiatique*. Most of the important MSS. discovered will probably be copied or purchased from the Colombo Library, the usefulness of which would be very greatly increased by the annual expenditure of a small sum in copies of its best MSS. to be deposited in one of the London libraries. The promoters of the Ceylon Library have done a good work by placing in permanent security trustworthy MSS. of Ceylon literature, which is so important for the history of Buddhism and of India; but their labours must remain comparatively useless unless copies of those MSS. are placed where there are scholars of sufficient attainments and leisure to use them. Unfortunately, Ceylon not being under the India Office, the India Council has refused opportunities of acquiring Ceylon MSS., but the Ceylon Government might well devote £50 or so annually, in order to secure the full advantage of what they have already done.

The German papers report the death of Herr Karl Julius Milde, of Lubeck, director of the schools and manufactories for glass-painting, established by the Imperial Crown Prince in connection with the works for the Cathedral of Cologne. Karl Milde, who was born at Hamburg in 1803, early acquired a reputation as a designer and painter, and to his literary and artistic efforts Lubeck is indebted for the preservation and restoration of many of its most interesting historical remains, of which he published a series of valuable reports between 1843-1848. His best glass-painting is the window of the baptistery-chapel in the new church of St. Peter's, at Hamburg, and at the time of his death he was engaged, in conjunction with Herr Achelius, of Lubeck, in completing the large window, forty-seven feet in length and twenty-seven in width, representing the Last Judgment, which is designed for the Cologne Cathedral.

We have received a copy of the "Treaty Rights of the Foreign Merchants and the Transit System in China," by the late Baron Von Gumpach. This volume has been published subsequent to its author's death, at the office of the *Shanghai Courier*, under the auspices of Mr. Fred. H. Balfour, the editor of that journal. The work gives a large number of interesting

Digitized by Google

facts in connection with the subject treated, and shows clearly the manner in which the Chinese have been allowed gradually to depart from the terms of the Treaties with reference to the transit dues, which have always been at the bottom of our commercial difficulties with China. Although there are perhaps not many who will agree with the well-known strong views of the late Baron Von Gumpach in their entirety, the work under notice is well worthy of perusal, as containing much that is sound in argument, as well as many important documents and facts bearing upon the subject treated.

Macmillan's Magazine for December contains the usual excellent collection of stories, essays, &c. Mr. Henry M. Trollope contributes a paper on the French Stage under Louis XIV., which deals with the subject in a light and interesting manner, the object in view being to convey an idea as to the working of the theatres and the material condition of the actors. The "Drinking System" is treated by Mr. P. Whittaker; and the "Organisation of the Unorganised Classes" by the Rev. C. E. Maurice. A very thoughtful and valuable paper upon "English Falck Laws" is contributed by Mr. F. W. Rowsell. Among the lighter articles is a most amusing one entitled "Diversions of a Pedagogue," by Mr. G. H. Raven, M.A. A feeling and well-written tribute to the memory of the late Commodore Goodenough appears from the pen of Miss Jane Morseby.

Scribner, Armstrong, and Co. announce the first volume of Mr. Bryant's *History of the United States* as in type, and promise that it will be out on the first of the new year. It is said that $20,000 have already been expended on this work, and that it will cost $10,000 more before the first volume is out. When complete it will comprise four octavo volumes, of over 600 pages each. Mr. Sidney Howard Gay is the collaborator of Mr. Bryant in this work. The plan of the history was drawn up by Mr. Bryant, who wrote the introduction, and revises every line written by his assistants. Mr. Bryant is now in his eighty-second year, and is in the enjoyment of excellent health. The publishers of this history must be sanguine of its success, ior it will have cost them $100,000 by the time it is completed.

An Oriental series, entitled "Bibliothèque de l'Ecole des Langues Orientales," has just been commenced under the auspices of the French Ministry of Public Instruction, which contributes a very liberal subsidy to the undertaking. The first work of the series is an edition of Mir Abd-ul-Kerim's "Description of Afghanistan, Bokhara, and Khiva," by M. Charles Schefer, official interpreter to the French Government. The Persian text, which for typographical reasons has been printed at Bulak, in Egypt, is ready for distribution. The French translation has just gone to press, and will fill about three hundred large octavo pages; it will be accompanied by a handsome map of Central Asia. The publisher of the series is M. Ernest Leroux.

M. Alphonse Derenne, the publisher of the new periodical just mentioned, is desirous of showing the utmost perfection that can be realised by French typography, and for this purpose he is about to issue a poem of a hundred verses by M. Stéphane Mallarmé, entitled "L'Après-Midi d'un Faune," printed in elzevirian type, made expressly, and on the richest paper. The illustration and artistic ornamentation are confided to M. Edouard Manet, whose designs, *culs de lampe*, *fleurons*, &c., executed in two tints, black and rose, will be done in imitation of Japanese methods not hitherto attempted in Europe. The number of copies of this literary and artistic curiosity is to be very limited.

Dr. Edkins writes to the *Academy* with reference to three original letters of the late Stanislas Julien, published in the fourth volume of "Chips from a German Workshop," and containing a denial of the identity in many Chinese and Mongol words, advocated by Dr. Edkins in the Journal of the French Ethnological Society, as well as in a letter to Professor Max Müller himself. He states that Julien did not look at the question with a steady eye; and, in proof of this assertion, notices what he holds to be several mistakes in comparison of Chinese and Mongol words made by him; and he also considers it unfortunate that Julien should not have thought it necessary to make any research on the old sounds of the Chinese characters.

The *Geographical Magazine* for December notes that the Abbé Desgodins has sent to the Paris Geographical Society a map of a portion of Indo-China, where the frontiers of Tibet, Burma, Yunnan, and Patang march together. This will be of special interest at the present time, when the question of the trade route to India, *vid* Burma, is under consideration. As our contemporary observes, we know little concerning this country beyond what was told us by Mr. T. T. Cooper, in his attempt to penetrate into India from China. Father Desgodin's notes are unfortunately very brief, owing to the fact that he was hurrying away from Chinese persecution at Yerkalo and seeking an asylum with two brother missionaries at Tseku.

Messrs. G. P. Putnams' Sons, of New York, have in the press a most unique volume, in the shape of a Japanese romance, entitled *Chinshingura; or, the Loyal League*, translated by Mr. Frederick V. Dickens, with notes, and an appendix containing a metrical version of *The Ballad of Jakasago*. The book will contain specimens of Japanese text in the original character, and will be profusely illustrated by full-page tinted plates drawn and engraved by Japanese artists and printed on Japanese paper. This novel is founded on historical fact, and shows pretty thoroughly the manner of life and thought in Japan, where devotion to clan seems to exceed that of Scotland in its earliest history.

The *Friend of China* (organ of the Anglo-Oriental Society for the Suppression of the Opium Trade) for December publishes three addresses to the Society from Chinese Christian Churches, urging the suppression of opium smoking as a "fruitful source of robbery, theft, and all kinds of villainy." The new Indian Opium Act is noticed, and a complaint is made that it will not touch the Bengal monopoly or affect our treatment of the opium grown in the native States of Central India, its aim being to bring the whole of British India under one uniform law as respects opium, and to secure to the Government power to deal with it at its own discretion, in all parts of India, which are directly under British rule.

An excellent descriptive Handbook of the Short Sea Route to Australia has been issued by Messrs. Mactaggart, Tidman and Co., agents of the Eastern and Australian Mail Steam Company. It will not only be invaluable to intending travellers, but forms a very interesting description of our rising colonies in that part of the world. The illustrations are capitally executed, and altogether the book compares well with more pretentious publications, and has the advantage of being of an entirely practical and reliable character.

Chambers's Journal for November 27 contains a story of an adventure in Macao. There is nothing very striking in it to those already familiar with the corruptions attaching to the farming of the gambling-houses in that colony—a system from which Hong Kong was happily released in consequence of the earnest protests of the community—but the state of matters is brought out with considerable art, in the account of the little adventure. We notice that a pleasing allusion is made to the late popular Captain Carrol.

Messrs. W. D. Spence and A. S. Harvey have received certificates from the Commissioners of Legal Education of having passed an examination in Roman law. Both gentlemen have obtained extension of leave of absence in order to keep their Trinity term 1876. Messrs. E. H. Parker and T. L. Bullock have joined the Middle and Inner Temples respectively, and have kept their first term. Mr. Hewlett at the Middle Temple, and Messrs. Satow and Enslie at Lincoln's Inn, have also kept their Hilary term.

The prospectus has been issued of a new illustrated journal, to be called the *London and Provincial Illustrated Newspaper*. It is designed to supply a good illustrated sheet at the price of threepence, it being believed that a paper containing really well executed engravings worth preserving at that price will be bought by a large class of people who are not disposed to pay so high a price as sixpence.

Dr. Dudgeon, of Peking, is at present in town, and, it is said purposes to deliver a series of addresses to his numerous friends from China, now in London, with a view of laying before them the present condition and future prospects of hospital and other work in that Empire. Dr. and Mrs. Edkins leave for Peking in January, accompanied by two assistants.

The *Academy* has the following:—"The first part of the volume relating to the anthropological portion of the voyage of the Austrian frigate, the *Novara*, has recently appeared. It forms a fine book, devoted to a description of the *Novara* collection of Crania, by Dr. Zuckerkandl, of Vienna."

Professor de Gubernatis has been named Corresponding Member for Italy of the Congress of Orientalists, which is to take place at St. Petersburg.

Lieutenant Chas. E. Reynard (1873) and Sub-Lieutenant James S. Muggeridge (1871) are appointed to the Kestrel, and Lieutenants Powell C. Underwood (1874) and Horace H. Barnard (1872) to the Frolic, on the China Station. Three corporals and four gunners, R.M.A., and twenty-two privates, R.M.L.I., will proceed in the Juno for China, to fill vacancies in the Kestrel, Frolic, and Mosquito.

The Juno will probably leave Portsmouth on the 17th, and we shall then give a complete list of her supernumeries, &c.

THE P. AND O. MEETING.

THE statements made by the CHAIRMAN and by Mr. SUTHERLAND, the managing director, at the meeting of the P. and O. Company on the 7th inst., completely dissipate any unfavourable impression which may for the time have been produced by the unwarrantable comments of Mr. BAIN, and which obtained publicity in *The Times*. In an ordinary way we should certainly not consider it necessary to notice any assertions emanating from this source, as all acquainted with the affairs of the Company are fully aware of their value. But, in consequence of their having unfortunately on the present occasion obtained publicity through so important a channel as the columns of the leading journal, they acquired a meretricious importance; and it is therefore necessary in a few words to notice the refutation of the charges which was made at the meeting. Stated shortly, Mr. BAIN'S accusations were that the directors of the Company had endeavoured in some way to steal a march upon the shareholders by making arrangements for increasing the capital of the Company by the issue of Debenture Stock; and that for some reason they had overstated the value of their vessels. The first point was conclusively disposed of by the CHAIRMAN, who showed that Mr. BAIN, in his letter to *The Times*, had carefully refrained from stating what was clearly set forth in the advertisement, namely, that the proposed Debenture Stock was to be a substitute for the Debenture Bonds already in existence—a fact which totally alters the complexion of the measure. This disingenuousness unfortunately misled *The Times* completely; who were led into the impression that the directors intended to create new capital, which is entirely contrary to the facts. The second point was ably and clearly dealt with by one of the managing directors, Mr. SUTHERLAND. He showed that so far from the present directory having increased the stated value of the vessels, the contrary had been the fact. They had taken over a legacy of 80,000 tons, valued at £30 17s. net per ton, and had increased the fleet to 117,000 tons of vessels far more efficient and far more adapted to the present requirements of the service, which stood at £26 1s. in the books. At the same time he frankly admitted that he would prefer, although he considered the vessels worth what they were placed at, that they should be at a lower figure, and no doubt the Board will, as far as practicable, use its endeavours in this direction.

These explanations are so clear that no one can fail to feel that the CHAIRMAN was fully justified in designating the statements of Mr. BAIN as unscrupulous perversions of facts; and the manner in which that gentleman was received by the meeting showed unmistakably the light in which almost the whole of the proprietary regard his unsolicited care for their interests. The CHAIRMAN, at the opening of the proceedings, had wisely advocated that they should be conducted with "good humour," and that the dignity and decorum which had hitherto always characterised their proceedings should be preserved; but, much as we are averse to any unseemly demonstrations at public meetings, we must confess to some sympathy with those who were indisposed to listen to a detailed written statement being read before them by Mr. BAIN. Still it is satisfactory that after some objection he was allowed to read his paper, as this was beyond question the best method of refuting what he had to say. The manner in which it was received by the shareholders showed what, but for the accidental publicity it obtained, nobody would for a moment have doubted was its true value—nothing. Mr. BAIN was an unpleasant and annoying interlude in the meeting—"vox et prœterea nihil."

Leaving this portion of the subject, and passing to the more practical part of the proceedings, we see good reason to congratulate the shareholders upon the manner in which their interests are at present being guarded. Mr. SUTHERLAND hit the point exactly in noticing the great difference in the whole nature of the Company's business which has resulted from the opening of the Suez Canal. It must be evident to everyone that the directors have taken the only steps—however difficult and ungrateful they might be—which will enable the Company to hold its own in the altered circumstances. They have greatly reduced the expenditure; they have introduced the most recent improvements into their steamers, the most important being the "compound engine," which is the means of effecting so large a saving in coal; and they have done their best to meet the public taste in all details connected with the passenger traffic. In a word, they have fully recognised that they can only hold their own in the present day by "modernising" their system; and taking into consideration that they have had the difficult task not merely of organising a new fleet and service in accordance with the altered state of things, but of doing away as quickly as practicable with all that was unsuitable or too expensive in the old system, they may be congratulated upon the extent they have succeeded, and we may look with confidence upon their completing the task which they have undertaken with so much wisdom and resolution.

THE APPEAL FROM THE STRAITS.

THE last number of the "Privy Council Reports" contains a decision of some interest to the native inhabitants of the Straits Settlements. It relates to an appeal from a judgment of Sir WILLIAM HACKETT, in which, following an earlier decision of Sir BENSON MAXWELL, at Singapore, he held that a bequest by a Chinaman for performing religious ceremonies to himself after death was void. The Privy Council says:—"Their Lordships think it was rightly held by Sir P. BENSON MAXWELL, Chief Justice, in the case of CHOAH CHOON NIOH *v.* SPOTTISWOODE, that while the English Statutes relating to superstitious uses and to mortmain ought not to be imported into the law of the colony, the rule against perpetuities was to be considered a part of it. This rule, which certainly has been recognised as existing in the law of England independently of any Statute, is founded upon considerations of public policy, which seem to be as applicable to the condition of such a place as Penang as to England; viz., to prevent the mischief of making property inalienable, unless for objects which are in some way useful or beneficial to the community. It would obviously be injurious to the interests of the island if land convenient for the purposes of trade, or for the enlargement of a town or port, could be dedicated to a purpose which would for ever prevent such a beneficial use of it. The law of England has, however, made an exception, also on grounds of public policy, in favour of gifts for purposes useful and beneficial to the public, and which, in a wide sense of the term, are called charitable uses; and this exception may properly be assumed to have passed with the rule into the law of the colony. . . . The devise to be considered is the dedication by the testatrix of the Sow Chong house for the performance of religious ceremonies to her late husband and to herself. It appears to be the usage in China to erect a monumental tablet to the dead in a house of this kind, and for the family at certain periods to place, with certain ceremonies, food before the tablet, the savour of which is supposed to gratify the spirits of their deceased relatives. This usage, with the accompanying ceremonies, is minutely described by Sir P. BENSON MAXWELL in his judgment in the case of CHOAH CHOON NIOH *v.* SPOTTISWOODE. Although it

Digitized by Google

certainly appears that the performance of these ceremonies lis considered by the Chinese to be a pious duty, it is one which does not seem to fall within any definition of a charitable duty or use. The observance of it can lead to no public advantage, and can benefit or solace only the family itself. The dedication of this Sow Chong house bears a close analogy to gifts to priests for masses for the dead. Such a gift, by a Roman Catholic widow, of property for masses for the repose of her deceased husband's soul and her own, was held in WEST *v.* SHUTTLEWORTH not to be a charitable use, and although not coming within the statute relating to superstitious uses, to be void. The learned judge was therefore right in holding that the devise, being a perpetuity, was not protected by its being a charitable use. . . . Their lordships' decision on this bequest accords with the judgment of Sir P. BENSON MAXWELL in the case already referred to. It appears to them that in that judgment the rules of English law, and the degree in which in cases of this kind regard should be had to the habits and usages of the various people residing in the colony, are exactly stated."

THE ADMIRALTY.

EVERY now and then it becomes the fashion to abuse some one, or some class, heartily, and when this spirit has once been aroused, it is hopeless to expect either moderation or justice in the remarks which are made. The cause of this peculiar state of public feeling is generally to be found in the occurrence of something which can be thoroughly appreciated by everybody. It may or may not be of great importance, but to produce the effect abovenamed it must be easily comprehensible. Thus the late Government were, perhaps, more heartily abused for Mr. LOWE'S proposed match-tax than they were for hundreds of measures of far greater importance, and which were much more serious as indicating a want of administrative power. But only a limited number could understand grievous mistakes as to foreign policy and other like errors; but everybody could understand a tax upon a box of matches. In something of the same spirit as that which inspired the howl on this subject, it has of late become the fashion to hurl unlimited reproaches at the Admiralty; but, unfortunately, the abuse in the present instance is of a far more serious bearing than in the former, as it tends to bring a service which it is essential to keep in a high position in the public estimation into grievous and unmerited disrepute. The cause of the existing state of feeling is easily understood, and is to be found in the sad loss of the *Vanguard*. This was an occurrence which appealed to the understanding of everyone, and it was unfortunately one which went in its main bearings greatly against the Admiralty. So it became the fashion to abuse in unmeasured terms everything connected with the navy, and no limit whatever was put upon the vituperation thus universally indulged in. No doubt there were some grounds for animadversion in the unfortunate incident which first drew public attention prominently to the Admiralty; and, so far as such remarks are within reasonable bounds, we do not object to them, even though we may not fully agree with them; but when the leading journal goes so far as to suggest the resignation of the First Lord of the Admiralty, before there has been any opportunity of official explanation of the matters upon the basis of which it makes the suggestion, we cannot commend either the temperance or the soundness of such criticism. Several of the statements against the Admiralty in connection with recent disasters have been grossly exaggerated, if not entirely false; and no doubt this will be shown authoritatively when Parliament re-assembles. Many of the accidents, too, which have happened, have been precisely similar to those which repeatedly occur in private steamers, and concerning which little or nothing is heard; and it is unreasonable to expect that the Admiralty alone shall be beyond the reach of those calamities which are recognised as in the ordinary course of events in other directions. A large number of the statements which are industriously circulated against the conduct of those in the Navy are thus discovered on investigation to be completely without foundation, and to be got up by persons who ought not to have confided to them so important a trust as that of making reports upon a great service, and who are too apt to write sensational articles in order to raise a cry against those who they know cannot reply to them in the public prints. This state of matters is hardly creditable to the leading journal, and the result which must follow it is clear. The discipline of the service will be broken down; officers will become disgusted and will lose all zeal in their duties and all pride in their position; while no one will be willing to take responsibility or continue to feel any special interest in the service, of which he has hitherto been justly proud. Such a result cannot but be detrimental to the best interests of the country; and however desirable, therefore, it is that the Navy as well as all other branches of the public service should be freely criticised, those who have the responsibility of forming public opinion should be careful in their remarks to avoid holding it up to undeserved derision and contempt, and thus undermining the interest, zeal, and *esprit de corps* which are essential elements in its efficiency and strength.

JAPAN AND KOREA.

ALL who are anxious for the true progress of Japan will regret that there seems some reason to fear that that country may become involved in war with the Korea. It appears that a difficulty has arisen between the two countries —who have long been upon unfriendly terms—in consequence of a Japanese gunboat off the coast of Korea having been fired into. A sharp retaliation was at once effected, the gunboat attacking the fort whence the shot came, taking it and burning a neighbouring village. This, however, is not considered sufficient by the warlike party in Japan, who are desirous that the matter should be taken up further and made a *casus belli*. It would be well, however, that Japan should hesitate before she proceeds to ulterior measures. War is easily entered upon, but it is often much more difficult to bring it to an honourable conclusion; and Japan cannot look for terminating a war with the Korea as quickly and with as much *éclat* as she did with that of Formosa. It is also not to be overlooked that she would run considerable risk internally should she adopt that course at the present time; as there is sufficient discontent to make rebellion possible, and her finances are not such as could bear the strain which a war would put upon them. The news received by telegram this morning to the effect that a body of drilled Chinese troops is to be despatched to the Korea to repel any invasion that might be attempted forms an additional reason for Japan hesitating to take a step which may seriously involve her with her neighbours generally.

THE FIRST RAILWAY IN CHINA.

OUR readers are aware that a company has been formed in London for the purpose of introducing railways into China, and that the first experimental line will be between Shanghai and Woosung, a distance of nine and a half miles. We are now enabled to state that a contract has been entered into between the Woosung-Road Company (Limited) and Mr. JOHN DIXON, of London, for the construction of the line, and that the materials for the permanent way have already left for Shanghai. The engineer of the company went out some time since, and will be on the spot to commence operations as soon as these shipments arrive. It is expected that the line will be completed and in full working by next July, when the novelty of seeing railway trains actually running over the distance in a few minutes may be considered certain to attract a large amount of Chinese passenger traffic. The line being avowedly experimental, is constructed on the narrow guage of two feet six inches; the funds at command would not admit of anything more. It is no doubt the case that this will be found inadequate to the requirements of a large traffic; but the first thing to be done is to prove railways in China a success, and if the enterprise of the company is able to make this small line a paying concern, there can be little doubt that funds will be forthcoming in this country to provide railway communication between the more important centres of commerce in China, when future extensions of the system can be equipped with every requisite to carry the largest traffic in passengers and merchandise that it would be reasonable to expect for years to come. We believe that the promoters of this

Digitized by Google

enterprise will effect more real good in our relations with China and the Chinese than all the treaties and conventions we can obtain.

THE STRAITS ASSOCIATION.

A CORRESPONDENT of the *Straits Times* lately commented on the inactivity of the Association. We thought at the time that his remarks were wanting in force, because the Association in London has never adopted a "huddle and muddle" policy, but has confined itself to watching over the interests of the Colony, and has made its voice heard only when glaring abuses had to be remedied, or when the action of the Government seemed to call for co-operation and approval. Under the unfortunate administration of Sir H. ORD the Association was compelled to be almost always in opposition, and when a new policy was introduced by Sir A. CLARK, they did not wait long to endorse it publicly. Nor are there now any signs of their abandoning their position as the accredited representatives of the Colony in this country. A crowded meeting was held on the 7th inst. (the President, Mr. NAPIER, being in the chair), to consider the recent outbreak at Perak, and the measures subsequently adopted by Sir WM. JERVOIS. His statement to the Legislative Council was before the meeting, and although, in the absence of reliable information as to the immediate cause of the outbreak, it was felt that a full discussion of it must be postponed by the Association, a resolution was unanimously passed expressing general concurrence in the policy of Sir A. CLARK and its development by Sir WM. JERVOIS, and declaring the same to be well worthy of the support of Her MAJESTY'S GOVERNMENT. The Association have done the right thing at the right time, and Lord CARNARVON is, we believe, resolved to defend the interests of British subjects in the Peninsula, and to support a policy which is approved by the peace-loving people in Perak; but it may strengthen his hands to find those in this country who are best acquainted with the subject coming forward to endorse what has been done by the Governor of the Straits.

THE telegrams which we publish in another column with reference to the recent negotiations at Peking are somewhat inconsistent the one with the other; as while the first would appear to evidence the uprising of a dangerous feeling among the natives, the second states that matters are progressing favourably. It cannot be denied that at home there is a considerable feeling of anxiety with reference to the result of despatching the GROSVENOR Commission, and it will be an immense relief to many to hear that it has safely accomplished its object. Judging from Sir THOMAS WADE'S letter to Consul MEDHURST at Shanghai, he seems perfectly contented on the subject; and we presume we must rest in the assurance that he possesses more information than we do on the subject. We only trust he will be fully borne out in his expectations, and that the Mission will have a safe convoy to Yunnan by the Chinese authorities, and from thence to Birmah they will be protected by the Indian Government, but with reference to the latter we have not been able to obtain any information.

MARINE INSURANCE PRACTICE AND ABUSE.

(ECONOMIST.)

Last February the Foreign-office addressed twenty-four questions on the law and practice of marine insurance to the principal commercial nations, inviting replies: and a Parliamentary Paper has just been issued, giving replies received from France, Austria, Sweden, Norway, Holland, Belgium, Italy, Germany, and the United States. Before examining these, however, it should be clearly ascertained to what extent the facilities which the present system of English law affords to shipowners to over-insure, or, in other words, to benefit by a disaster at sea, really affect the safety of life and property. In the late movement with which Mr. Plimsoll's name is associated, the question of life is very naturally pre-eminent; but many may not be aware that losses and damages at sea of all kinds for one year represent probably a sum of from six to eight million pounds sterling (nearly all covered by insurance) of dead loss to the nation.

Shipowners, like any other body of men, are of all characters—good, bad, and indifferent; and it is wrong to suppose, and we have no reason to suppose, that rogues are more frequently to be met with in that class of the community than in any other class—say, city merchants or manufacturers. Is there any reason, then, why the law should specially indifferent in a shipowner's management of his affairs? There are cases in point in which the law does now interfere for the protection of life and property. The manufacture and transit of explosives are regulated by law, because they endanger the lives of the people and the safety of property. Manufactories are superintended by inspectors, and if necessary, interfered with if the machinery they employ is dangerous to their workpeople—so that the principle of interference is not new; and although in practice there may be more difficulty, there seems to be no more reason why a manufacturer should be forced to fence his machinery than why a shipowner should be forced to caulk his ship. It may be safely asserted that the case of a shipowner sending a ship to sea, well covered by insurance, for the express purpose of being lost, is of the rarest occurrence—much rarer, it may be assumed, than the case of a man setting fire to his house or shop—as the case of the shipowner requires much greater premeditation and more careful laying of a plot. The ordinary criminal law is quite sufficient to cope with deliberate attempts at fraud, and any alteration in the law of insurance would place but an insignificant barrier in the way of carrying out such crimes.

It may be here stated, that if a shipowner effects an insurance on hull or freight, and it is specified in his policy that the hull or freight, as the case may be, is valued at a certain amount, it is not permissible, under English law, that underwriters, in case of loss, can raise any question as to whether that valuation is fair or not. If the value is once admitted in a policy (and nearly all policies on hulls and freights are valued), it is binding, unless the underwriters choose to raise the plea of fraud, or of the valuation being so grossly excessive as to approach to fraud—a defence which underwriters seldom dare to set up. When a shipowner proposes to an underwriter an insurance on a ship—say on a voyage from London to Calcutta—it is virtually a matter or his (the shipowner's) consideration alone to fix what values he pleases, and to effect what amount of insurance he pleases. The underwriter refers to a register of vessels, where he finds her age, her tonnage, when last repaired, and general character. But this information, although it enables him to fix a rate of premium, is not nearly sufficient to enable him to judge whether the proposed value is excessive or not. It may be safely asserted that a vessel worth £30,000 could, with the greatest ease, be covered by insurance at a value of £40,000, without raising the slightest suspicion on the part of an underwriter that the loss of the vessel (her freight will be referred to presently) would make her owner a richer man by £10,000.

But if this is true about the insurance of the hull of a vessel, what about her freight? The gross freight of a vessel to Calcutta is, say, £5,000. This amount the shipowner may either receive in cash before his ship sails from London, without any liability to refund it in the event of the vessel not completing her voyage, or if he does not receive it in cash, he may insure by a valued policy £5,000, and if his vessel is lost in the Thames the day she sails, he can recover legally under his policy the whole of this sum, which, had his vessel arrived at her destination, might have been represented by perhaps £1,000 net profit, or perhaps have been turned into a loss. More than this, supposing his vessel was under charter to go from London to Calcutta, and thence to the West Indies, an owner can insure the gross freight of this second voyage before the vessel leaves London, and by her loss in an early part of the voyage, say in the Thames or in the Channel, he might find himself a gainer by the following amounts:—

Insurance on hull in excess of real value		£10,000
Gross freight, London to Calcutta		5,000
Gross freight, Calcutta to West Indies		8,000
		£23,000
Less expenses incurred in loading and starting vessel from London	£1,000	
Premiums of insurance	1,500	
		2,500
Net gain		£20,500

These figures seem large, but a case is said to have occurred not long ago, in which a vessel grounded on a rock, and the owner, in addition to having the hull covered by insurance to a fair value, had £15,000 insured on its outward and homeward freight. He had certainly not expended more than £2,000 or £3,000 towards earning this freight when he found himself in the position that he would be by £10,000 a richer man if she remained on the rock than if she came off. It is too much to expect that human nature will pump very energetically when a successful attempt to remedy a disaster means a personal loss of such an amount. An owner who strains every nerve to make his vessels go right, and has confidence in his own management, will not find himself in such a position—for, believing as he does that he can avoid disasters the premiums of insurance on these amounts, which exceed what is actually at risk, will be a loss to him. It really comes to be a question of premium, as in the case of a shipowner who on being asked for a high rate of premium on his ship, might reply—rather than pay such a rate I will put two or three extra men on her, and a donkey-engine to pump her if she springs a leak, and I will bring her home at my own risk. These extra precautions for safety will cost less than such a high rate of premium.

The question arises—can anything be done, by altering the law of insurance, so that a shipowner may indemnify himself if he chooses, but that in no circumstances should he be placed in a better position than he would have been had his ship been safe? Without exception, the nine commercial nations, to whom the questions forwarded by the Foreign-office were addressed, reply that the principle of their respective laws is, that contract of insurance is a contract of indemnity merely, and not to be made a source of profit to the assured, although practice does not always carry out this principle. As in English law, a policy is void when fraud is proved, but the real point of importance is found in question No. 1, which is admirably stated thus:—"In the case of a policy on a ship where the value is fixed by agreement and valuation of the policy, can the insured, in case of total loss, recover from the insurer the amount fixed in the policy, although greater than the actual value of the ship at the commencement of the voyage, or at the time of loss?" and the same inquiry ismade in regard to freight.]

THE P. AND O. COMPANY'S MEETING.

The thirty-fifth annual general meeting of the shareholders of the above named Company was held on the 7th inst. at the offices of the Company, Leadenhall-street, and was numerously attended; Mr. P.D. HADOW, the Chairman of the Board of Directors, in the chair.

The report of the directors having been taken as read,

The CHAIRMAN said the report was a very full and comprehensive one, and it was therefore not necessary that he should say much upon it. It was a source of great disappointment to the directors that they could not give them a better dividend, but they could not do wonders, and they must be guided by circumstances, and the shareholders would not be surprised at the poor results, when they considered the extreme depression of trade during the past six months. The capital account called for very little remark. The total amount stood at £4,652,886. The capital received from the proprietors was £2,900,000. The debentures stood the same as last year, £800,000. Then the liabilities of the company were £526,762, which, added to the other items, made £4,220,762, showing a surplus in favour of the company of £432,123. Of the revenue account he was sorry to say he could not present them with so favourable a picture as he did last year. He need not go into the cause of it. The depression in trade had rendered it quite impossible for them to realise the same amount as they had done in previous years. The gross revenue for the year amounted to £2,099,334. Last year it was £2,186,662. In stating this, he felt a certain amount of disappointment, because he did hope last year, when he showed them that things were so bad, that they might turn, and become a little better this year: but he regretted to say that instead of becoming better they had become worse. Therefore it was rather a satisfaction that in these unfavourable circumstances they had been able to scrape together enough to declare a small dividend. He was glad to say that by the last advices things were looking a little better; and he would only make this remark, that they must use the interval for the purpose of putting themselves in such a state that when the good time came they could take full advantage of it. When he mentioned the fact that an increase in the freightage of 10s. a ton would give them £100,000 a year, they would see that there was room for great improvement. One portion of the report, that relating to debenture stock, had a great deal of interest for the proprietors. Since the last meeting they had had the matter under their serious consideration. It had been suggested whether they might convert the existing debentures into a perpetual debenture stock. They had never experienced any difficulty in issuing their debentures, but there might arrive a time when they could not renew them except on higher terms, and they therefore thought it would be advantageous to the company to convert the debentures into debenture stock, and they had determined to petition the Queen in Council, through the Board of Trade, to give them the power to issue debenture stock in substitution of debentures. Nevertheless, a gentleman well known to them there, who had shown great hostility to the company, and great unscrupulousness in the means which he had taken to injure it, went to the Board of Trade, and presented a petition, in which he stated that they had applied for power to raise £800,000 additional capital, and he had written a letter to *The Times* in which he stopped short of the material point in the advertisement of the company, that the debenture stock was to be created in substitution of the debentures. (Cries of "Shame.") *The Times* had inserted two letters from the Board on the subject, but in consequence of some remarks made in the money article on the second letter, and of some criticisms on the report, they had addressed a third letter to the editor, which had not been inserted, and in consequence the Board had published the three letters, *in extenso*, which had been circulated among the proprietors. He would not detain them on that portion of the report which went into the operations of the year, but he would advert for a short time to a more pleasing topic, and that was their fleet. They had a fleet of fifty steamers, and he would venture to say it was the finest fleet in the world belonging to a commercial company. During the year they had added three to the number by purchase, and he thought the proprietors would say in doing this they had acted beneficially for their interest. Forty-one out of the fifty were fitted with the best compound engines, which effected a great diminution in the consumption of coal, a diminution which was beginning to show itself in the expenditure of the Company. Another matter to which he should call their attention was that they had diminished their establishments during the last year to an amount which would effect a saving of from £40,000 to £50,000 a year. They had not yet felt the full benefit of this, because they had had to make compensation to some extent to the parties who were affected by it. A portion of this —about £12,000—was charged in the accounts this year, and a further amount would be charged next year. When they had paid the compensation their expenditure would stand them at from £40,000 to £50,000 a year less than formerly. He believe they had now reduced it to the lowest possible point, and they had got a staff in every department, whether at sea or on shore, which was unequalled. With regard to the fleet, he must pursue that a little further by saying that they had not had much loss this year. He had been in hopes that he would be able to say they had had no loss at all, but just at the close of the year came a telegram that the *Sunda* had struck upon a rock on the coast of China, and then came another that she was off. The *Sunda* was commanded by one of their most experienced captains, and they could not at present tell the cause of the mishap. They had had a curious accident also with the *Deccan*. The *Deccan* had gone out full of passengers, and there were a number of important people on board, including special correspondents, who had gone out hoping to get to Bombay before the Prince. After getting a certain distance from Gibraltar she stopped, and it was found that the screw and boss had become separated from the ship and had gone to the bottom of the ocean. She was taken back to Gibraltar, and the *Pekin*, though dismantled at the time, was got ready in less than forty hours and despatched to Gibraltar, where she took in the passengers of the *Deccan*, who arrived in Bombay three days before his Royal Highness. This, he thought, reflected the highest credit on their marine executive, and he was glad to speak of it because it gave him an opportunity of complimenting Captain Black, one of their most valued servants, and those under him, who worked with a will. In conclusion, he moved that the report be adopted. (Applause.)

Mr. GIBBINS seconded the adoption of the report, and complained of the action of the Post-office towards the Company. It was strange that the omnipotent *Times* had supported the one-sided statement of Captain Bain, and the circumstance would very much lessen the respect he had hitherto entertained for that journal. (Hear.)

Mr. D. DAVIS observed that although in 1871 the revenue was £70,000 less than it had been during the past year, the directors then declared a dividend of 6 per cent., against only 2½ per cent. now. In 1873 and 1874 the dividends were 8 and 7 per cent. respectively. This discrepancy required some explanation, and he would further like to see more explicit accounts produced by the board. He was glad that the directors intended to convert their debentures into debenture stock, that being a measure which he advocated six years ago. If, however, the board had intimated to the proprietors that they contemplated such a step the controversy which had arisen would have been avoided. (Hear.)

The CHAIRMAN stated that the subject was only mooted after the last meeting of the company, and the exercise of the power proposed to be obtained would entirely depend upon the approbation of the proprietors.

Mr. DAVIS alluded to several matters of account, and concluded by saying that the depreciation of Peninsular and Oriental shares showed that there was a want of confidence in the company out of doors.

Mr. A. HOVENDEN complained of the guarded language the auditors had appended to the balance-sheet, and inquired whether they had really examined the accounts. (Cries of "Oh!")

The CHAIRMAN stated the words were precisely the same as those which had been used for a long series of years; and no such question had hitherto been asked.

Mr. HOVENDEN further complained of his inability to obtain information respecting the accounts on applying for it at the office of the company.

Mr. T. SUTHERLAND, managing director, replying to a string of questions put to him by Mr. Hovenden, said that if that gentleman had exercised common courtesy he would not have had any difficulty in acquiring the information he wanted. The £112,000 spent on the fleet had not been charged to the capital account. The revenue account had £470,000 charged to it for repairs, renewals, and depreciation, and they were quite justified in carrying a part of the renewals forward to next year, such a course being by no means unusual. If the item had been charged to the expenditure account this year the proprietors would simply have had no dividend at all. The directors were the best judges as to whether the expenditure belonged to this or to next year. Several stations had been abolished, and as many of the *employés* had been in the company's service for a great number of years, there was no alternative but to give them from six months' to a year's pay each. (Hear.) When he attempted to explain that at the office, Mr. Hovenden said he ought not, as a new shareholder, to have his profits taxed for what the company derived benefit from twenty years ago. (Laughter and cries of "Shame.") Half of the £23,000 which the directors had expended under that head was charged against this year, and the remainder would probably be charged next year. If the *Simla* had been put up to auction she would not have fetched as much as had now been realised. The £13,000 loss on her was charged against the revenue of the year in the depreciation account. There was, no doubt, a heavy loss on the sale of old ships, but in charging it against the depreciation of the year they were making the remainder of the fleet more valuable for all practical purposes.

Mr. HOVENDEN: Do you start with any insurance fund for 1876?

Mr. SUTHERLAND: We start with as much as we ever have.

Mr. HOVENDEN: What is that? Nothing at all? (Cries of "Order.")

Mr. SUTHERLAND: The reserve fund is both an insurance and a depreciation fund.

Mr. HOVENDEN: Excuse me, that cannot be the fact. It is an impossibility. (Renewed cries of "Order.")

Mr. SUTHERLAND: During the last twenty years our insurance has cost us 1⅞ per cent. on the amount insured. That being the case, the average loss per annum does not exceed £60,000.

Mr. HOVENDEN: You really have no insurance fund at all. (Cries of "Chair.")

Mr. HURST said that after the explanations the directors had offered he had a better opinion of the future prospects of the company than when he entered the meeting.

Captain BAIN said he rose to ask for information respecting the accounts which had been submitted to the meeting, and also to point out certain facts necessary for the information of shareholders present and absent. He had committed his remarks to paper, and should read them so as to prevent any misunderstanding. (Disturbance.) The printed accounts present a view of the company's assets totally different from that disclosed by the manuscript balance-sheet which he had inspected in the board-room. The former showed merely a certain amount of tonnage (fifty ships), representing as assets £3,727,000. The manuscript suppressed the separate valuations of each ship, but it furnished the following information: forty-seven ships, 117,473 tons, £3 496,000 value; average, £29 15s. per ton; the *Assam*, 3,033 tons, bought for under £59,600, average, under £20 per ton; the *Siam*, 3,033 tons, bought for under £59,060, average, under £20 per ton; the *Nepaul*, 3,500 tons, £10,000 paid on account. The total was fifty ships, of 127,039 tons, as per report. The barges, tugs, &c., &c., represented 2,864 tons, and a value of £105,634, making a grand total, as per report, of £3,729,634. (Uproar.)

Mr. MAINLAND (interposing): I protest against this; Captain Bain has already done quite sufficient to damage the reputation of the company. If you order one of the porters to put him out you will only be doing what is right. (Hear, and cries of "Order.")

The CHAIRMAN: We can hardly adopt so summary a process as the hon. proprietor recommends, however agreeable it might be to the

Digitized by Google

meeting. (Great laughter.) I am entirely in your hands. Captain Bain is transgressing the ordinary rules by reading documents instead of making a speech; nevertheless I have no disinclination to hear all he has to say if you will be patient. (Cries of "Read on.")

Mr. Mainland: He has no interest in the company at all. (To Captain Bain:) We all know the value of ships as well as you do.

A Shareholder: He has as much right to speak as you have. (Uproar.)

The Chairman: It is necessary for me to exercise proper discretion in the matter. The feeling of the meeting is against Captain Bain reading his lengthy statement of figures; I shall, therefore, object to his doing so. If he wants to speak, let him. (Confusion.)

Captain Bain: It would only take ten minutes to read.

The Chairman: You are bound as a proprietor, though a very small one, to desist. (Applause and dissent.)

Captain Bain: You object to my reading the statement? (Cries of "Go on.")

The Chairman: I do. (Applause.)

Captain Bain: If I read, I know what I say; otherwise I should have no check. (Hear.)

The Chairman: You must act in consonance with the feelings of the majority of the meeting. (Cries of "Read" and "No.")

A Shareholder: If you suppress Captain Bain's statement, will the public not think there is something wrong? (Hear.)

The Chairman here stated that if the meeting desired it, it would certainly be better that the paper should be read.

Captain Bain was then allowed to proceed, and he went over the grounds of his charges against the directors.

Dr. Schuloff considered the act of Captain Bain, in over and over again reiterating such statements as he made, a gross piece of impertinence, and an insult to the common sense of the proprietors. (Cries of "Oh!" and "Hear.") He could take care of his interest as well as Captain Bain could for him. He was sure that if the tonnage of their ships had been over-valued, Captain Bain had enormously over-estimated his capacity for putting the company right. (Great laughter, and cries of "Oh!") At the same time, he thought it would be advisable that the directors should present more explicit accounts. (Hear.) He entered into some details respecting the rates of passage and the accommodation on board, and said, from what was stated to him in various quarters, he was afraid that the effect of their recent policy had been to make passages too dear for poor travellers, and that rich ones had received too little for their money.

Mr. Nicholson thought that so large an operation as converting the floating debentures into stock ought to have been mentioned to the shareholders before the close of the last meeting, and that, had this been done, a good deal of the unpleasantness which had occurred might have been avoided. He did not understand the item of £27,000 for loss in exchange, and suggested that the cost price or value of the vessels should be set against each. He desired to know if the change of discharging ships in London instead of at Southampton had proved a pecuniary success.

After some remarks by Mr. Lambert, Mr. Jones, and Mr. Gliddon, Sir George Campbell, M.P., said that it appeared to him that really the turning point in the matter had not been touched upon; and he would ask the question how and by whom the company's fleet had been valued.

Mr. T. Sutherland said he was not going to use hard terms with regard to a certain person who had given the meeting the benefit of a terrible document. The board had been surrounded, more or less, by spies and calumniators, but the very utmost that had been discovered was a question as to whether the company's fleet had or had not been over-valued. He admitted frankly that, although he considered the vessels valuable at the amount at which they stood in the books, he would be very glad indeed to see them at a lower standard. In 1868 the present Board of Directors had taken over a legacy of 80,524 tons of shipping at £30 17s. net, but at the present moment there were 117,000 tons, far newer in comparison, and far more efficient, at £26 1s. (Hear.) If they had contented themselves with keeping only 80,000 tons, they would have only built at the rate of 4,000 tons per annum; but instead of that they had been building at the rate of 10,000 tons per annum. It was absolutely necessary on the opening of the Suez Canal to replenish their fleet, adding an enormous amount of tonnage in order to carry cargo at lower rates. In 1871 their revenue went down £300,000 in consequence of the opening of the Canal, although they carried more freight and passengers. Last year the passage money was exactly the same as in 1871, notwithstanding that in the meantime they had reduced their rates, and they had maintained the same annual revenue from passengers, in spite of enormous competition. But whilst that was so, their freight rose £120,000 simply and solely because they increased the cargo tonnage, that money being gained in spite of the fact that the cargo was being carried at one-tenth the rate they formerly received. Consequently, so far as the directors were answerable, he considered they had done wonders by substantially increasing the value of the fleet and reducing its book value to the company. (Hear.) He was not certain that he did not agree with those who affirmed that the form of presenting the accounts might be amended and extended. (Hear.) They had not considered any particular form, but there was one thing must certainly be guarded against, and that was putting forward information which might be made use of by persons opposed to the company. (Hear.) A question had been raised as to the loss of £25,000 in exchange. Their rates were based on 2s. for the rupee, and 4s. 4d. for the dollar, and the payments for passage and freight made abroad on this basis now produced, in consequence of the great fall in exchange, much less, and the result was a loss of nearly 6 per cent. on remittances from foreign stations. He stated, in reply to a question which had been put, that it was necessary to carry iron and dead weight in their steamers, in order to get anything like freight; and if they did not do that the proprietors would not be paid even 2½ per cent.

Captain Bain: What about the red bills of lading?

Mr. Ward observed that that question was discussed long ago, and a strong feeling against its having been reiterated was generally manifested.

Mr. Sutherland went on to say that the company would give anything to return to Southampton; but if they were to go back at the present moment they would lose £100,000 a year.

The report was then adopted without dissent, as was also a resolution declaring a dividend of 2½ per cent. for the year ending the 30th September last, and a payment of 1 per cent. on the underwriting account.

Mr. T. S. Cowie and Mr. J. R. Engledue were re-elected directors, and Mr. J. S. Godfrey and Mr. W. S. Deacon auditors.

Votes of thanks to the Chairman for presiding and to the *employés* for the attention they had paid to the business of the company terminated the proceedings, which had lasted nearly three hours.

HIGH COURT OF JUSTICE.—ADMIRALTY DIVISION.

The "Deerhound."

This was a cause of salvage. The barque *Deerhound*, on a voyage from London to Shanghai, with a general cargo, took the ground off Dungeness early on the morning of the 29th of November, 1874. About an hour afterwards the tug *George Peabody* came up and agreed to tow the *Deerhound* into the Downs for £100. The tug towed at the *Deerhound* till about four A.M., but without moving her, when another tug, the *Charles Dickens*, came up. The two tugs towed at the *Deerhound* several times, breaking their hawsers, and coming into collision with each other; and about one o'clock they succeeded in towing the *Deerhound* off the sand. One of the engines of the *George Peabody* was disabled, and she had to leave, and the *Charles Dickens* alone towed the *Deerhound* to the Downs about 4 P.M. The *Deerhound* was making water, and the luggers *Early Morn*, *Gipsy King*, and *Gipsy Queen*, with twenty-eight men, put off from Deal to assist her, and sixteen of the men went on board about 5.30 P.M. of the same day, and began pumping the *Deerhound*, and continued to do so all the night and the next day, when it was agreed that the *Charles Dickens* and another tug, the *Washington*, should tow the *Deerhound* to Gravesend, for £110. About 3 P.M. they commenced towing the *Deerhound*, and arrived at the East India Dock about 1 P.M. of the 1st of December. The men continued pumping all this time and till about 8 P.M. of the same day, when the *Deerhound* was berthed. The defendants entered into court for services the sum of £1,100. The value of the *Deerhound*, her cargo and freight was about £14,500.

Sir R. J. Phillimore was of opinion that the services rendered were valuable services, and that the circumstances had wholly altered after the time when the agreement was made with the *George Peabody*. He also considered the sum entered insufficient, and awarded £400 in addition to the sum paid into Court.

SUNDAY SCHOOLS FOR THE CHINESE.

The *Vallejo* (California) *Chronicle* says:—"It may not be generally known that there are two Chinese Sunday-schools that meet regularly in this city, one connected with the Presbyterian and the other with the Baptist Church. Evidence shows that the Chinese attend the Sunday Schools, not because they are thirsting for religious instruction, but for the reason that it is a good chance to get an English education; and they are indulged in their preference, for labour spent in impressing upon them the truths of Christianity would be thrown away while teachers and pupils have no common medium of language. The method of instruction adopted is not the teaching of pupils to translate from one language into the other, as languages are usually taught in the public schools; but, beginning with the alphabet, the written language is taught in the same way as to young children in the primary schools. Most of the Chinese display great, not to say wonderful, aptitude for learning the alphabet and the first reading lessons, and acquiring correct pronunciation. It is pretty well known that an educated Chinaman will pronounce English better than almost any other foreigner, which is the result of certain similarities in sound of English and Chinese. In learning lessons which must be committed to memory the Chinese display the greatest quickness, which, however, is not so surprising when it is known that the acquirement of a Chinese education, according to the native method of teaching, is a mere exertion of the memory. Thousands and perhaps tens of thousands of words are memorised before the student is informed what they signify. For persons who have had such a discipline as these Chinamen have, it is not a performance that need create surprise to learn their a b c's and a-b abs in two or three lessons of an hour's duration; neither is it surprising that their after progress, when mastering difficulties which require an exercise of judgment, is slower. But if learning to read and speak English is an object of earnest desire with the Chinese, learning music is none the less so. They learn to sing by ear with precision after a short practice, and evidently take great pleasure in exercising their musical powers."

Death of Mr. C. J. F. Stuart.—We regret to announce the death, at Bahia, of Mr. Stuart, chief manager of the Oriental Bank Corporation, who left this country last month for the benefit of his health. Mr. Stuart has been connected with the Bank for over thirty years, including the time when it was styled the "Bank of Western India," with its head office at Bombay, where he served previous to relieving Mr. S. J. D. Campbell in 1848, the manager of the branch at Hong Kong. After managing and establishing several branches, Mr. Stuart finally succeeded Mr. W. W. Cargill as chief manager in London, where he has long been regarded as a tower of strength to the Bank. In addition to a very sound knowledge of banking and commercial affairs, with its various ramifications, he possessed great discriminating ability, and what is so very important in a bank manager, the power of saying "No." During the past ten years the trade of India and China has gone through many bad phases, but the Oriental Bank has been well guided.

Monetary and Commercial.

The Hong Kong and Shanghai Banking Corporation, as agents for the Chinese Imperial Government Eight per Cent. Loan of 1874, notify that they have received a portion of the definitive bonds signed by the Imperial Commissioner, and they will be prepared to deliver the same to the holders of provisional certificates in London, at the offices of the Corporation, on and after the 15th inst.

Telegrams have been received announcing that Messrs. Russell and Sturgis, of Manila, have completed the formal arrangements necessary for resuming business. The depositors allow three years' time for payment.

Attention is called to the continued large export of quicksilver to China and Japan from California, the O. and O. steamship *Belgic* carrying nearly 3,000 flasks. More would have been purchased for the same destination, but the supply for the moment was exhausted, although the present production of California mines is now about 5,000 flasks per month, or for the year 1875 say 50,000 flasks.

A prospectus has appeared of the Odessa Tramways Company with a capital of £360,000, the first issue to consist of £200,000, in shares of £10 each. The object is to acquire a concession for working tramways in the city and suburbs of Odessa.

An interim dividend has been declared by the directors of the Bank of British North America of £2 10s. per share, being at the rate of 10 per cent. per annum, for the current half-year.

The directors of the National Provincial Bank of England have declared a half-yearly dividend at the rate of 8 per cent. per annum and a half-yearly bonus of 6 per cent.

The directors of the Cape Copper Mining Company have declared a dividend of 20s. per share, free of income-tax.

The directors of the Western and Brazilian Telegraph Company have issued their report for the past year. They state that the receipts show that £10,000 can be passed to reserve account, and a balance carried forward to the next account. An interim dividend is proposed of 5s. per share.

The *Stad Amsterdam* (str.), loading at Liverpool, for Singapore, Shanghai, Yokohama, and Hiogo, is expected to sail about the 18th inst. Her cargo, besides general merchandise, includes about 500 tons of iron, shipped at Newport, for Japan. Three foremen coal-miners went out in the *Crocus*.

It is announced that the cost of duplicating the lines of the Eastern Telegraph Company from Suez to Aden and Bombay will be about £750,000, which it is proposed to raise by the issue of Six per Cent. Preference Shares. The reserve fund of the Eastern Extension Company will probably cover the outlay upon their duplicate line from Rangoon to Penang. On this subject *The Times* says :—

This step har been taken, we believe, with a view to checkmate the threatened opposition from merchants who are incensed at the Eastern Company's ruinous exactions, and who intend to lay a cable of their own. Under these circumstances, and bearing in mind that the present capital of the Eastern Telegraph Company is something like £4,000,000, this proposal would seem to be remarkably ill-timed. As double cables can afford little hope of relief to merchants on the score of tariffs, it is not likely that these will desist from their intention, and if the scheme is carried out the position of the Eastern Company's shareholders will not be enviable.

The Eastern Extension, Australasia, and China Telegraph Company (Limited) propose to duplicate the Rangoon-Penang section of their system by laying a new cable to be paid for chiefly out of revenue. The directors estimate that the cable will cost about £170,000, and to meet this demand they have in hand, it appears, a sum of between £70,000 and £80,000 from the existing reserve fund, and a further sum of about £20,000 balance of unissued debentures, which are authorised for the construction of the New Zealand cable. The directors estimate that a reduction of the dividend for the current half-year to the rate of 5 per cent., which, with the 3 per cent. already given for the preceding half-year, would make a dividend of 5½ per cent. for the year, and would yield a further sum of about £50,000; thereby, nearly covering the total cost of the cable. The remaining small balance could easily, the report adds, be met at the commencement of the ensuing year out of the sum that will be available for reserve. By these means the whole cost of the cable can be met out of the revenue, without raising additional capital.

It is notified that the Great Northern Telegraph Company's cable between Wladiwostock and Nagasaki having been repaired, direct communication is again re-established by this company's route with all stations in China and Japan as well as with Singapore, Java, Batavia, Australia, &c.

A discussion is still going on upon the question of the changes which are announced to take effect on the 1st of January, 1876, in the method of transacting the business of the Ocean Telegraph Companies. The effect of these changes will be that the rates per word will be raised as follows :—To and from India, from 4s. to 6s. 9d. ; to and from China, 6s. to 12s. 6d. ; to and from Japan, 7s. to 17s. 9d. On this subject *The Times* says :—

Any direct or indirect attempt to suppress the code system should certainly be resisted with all the influence the mercantile community can bring to bear. Whatever may be the meaning of a number of letters or figures does not concern the company in the slightest degree. They charge so much for certain signs, and there their business with these signs ends.

A scheme for the liquidation of the estate of Fothergill, Hankey, and Co. has been issued to the creditors. An effort is being made to save the Aberdare Ironworks and the Plymouth property which comprised that estate for the use of the creditors. A company has been formed, we believe, by the bankers and others interested, to which it is proposed that the property shall be transferred. This company will issue debentures bearing no interest to unsecured creditors for the full value of their claims, and will undertake the existing mortgages. In order to sanction this scheme a meeting of creditors will be held under the Bankruptcy Act on the 14th inst.

The failure has been announced of Messrs. William Spotten and Co., linen manufacturers and bleachers, of London and Belfast, a firm established about a quarter of a century. The partners, however, lost a large sum in May, 1874, by the stoppage of Messrs. Lowry, Valentine, and Kirk, and their operations have since been considerably reduced from want of credit. The liabilities amount to about £300,000, and the estate will produce, it is thought, about 10s. in the pound.

In the Bankruptcy Court a sitting has been held for the public examination of Charles Carnie, described as a merchant, recently carrying on business at New Broad-street. The adjudication was made in October last, the London and Westminster Bank being the petitioning creditors. The statement of affairs shows liabilities £57,736, and £421 19s. 10d. assets. The trustee offered no opposition, and the bankrupt was allowed to pass.

Owing to a heavy snow-storm railway communication between Paris and Marseilles has been interrupted. The departure of the Messageries Maritimes steamer *Anadyr*, with the last outward mail, was delayed for thirty hours.

Mr. Sam Mendel, well known for many years in commercial circles at Manchester, and now resident in London, has joined the board of the Alliance Bank (Limited).

Bar Silver has been placed at 56⅝d. per oz. The orders for Spain, &c., having, for the present, been completed, the market has become weaker, and the amount now offering will probably go at a slightly lower rate. Mexican Dollars, owing to a decline in the China Exchange, and also in sympathy with the Silver Market, have become flatter, and a slight reduction will have to be submitted to. Exchange on India for Banks' drafts at sixty days' sight is 1s. 9⅜d. per rupee.

Messrs. Page and Gwyther's Circular states that the total shipments of specie to China and the Straits Settlements from the 25th ult. to the 10th inst. were :—Gold, £6,500 ; Mexican dollars, £20,000.

THE BOARD OF TRADE RETURNS.

The Board of Trade returns for November have been issued, and in some respects show a rather better state of affairs than those of October. This change does not amount, however, to any indication that the current of trade has altered, but may be taken to mean, rather, that the weather of November has been more favourable to shipping than the month before. There is still an increase of imports, coupled with a decrease of exports, and the increased importation is, as before, due to an increased inflow of articles of consumption. The declared value of exports in the month of November was £18,356,689, against £18,746,623 in the corresponding month last year, or 2¼ per cent. less, but over 7 per cent. diminution on November, 1873. The total for the eleven months is £206,197,027, against £221,606,059 in 1874, and £235,925,820 in 1873. The declared value of the imports was £31,110,706, against £28,347,798, and £29,929,271 in November, 1874 and 1873 respectively, being 10 per cent. more than the former, and 4 per cent. more than the latter. For the eleven months the figures are for this year £341,821,641, being fractionally higher than in the same period in 1874. In the exports cotton yarn decreased 4 per cent. in quantity and 9 per cent. in value ; cotton piece goods increased 5½ per cent. in quantity and 3½ per cent. in value; linen yarn increased 16 per cent. in quantity and 32 per cent. in value; linen piece goods decreased 1¾ per cent. in quantity, but increased 2½ per cent. in value; woollen yarn showed no change in the quantity, but the value decreased 1½ per cent.; woollen cloths increased 25½ per cent. in quantity, and 11¼ per cent. in value; worsted stuffs decreased 12 per cent. in quantity, and 11¾ per cent. in value; iron and steel decreased 8 per cent. in quantity, and 21⅜ per cent. in value; and coal, fuel, &c., increased 10¾ per cent. in quantity, but decreased 11¼ per cent. in value. In the imports, corn increased 53 per cent. in quantity, and 63½ per cent. in the total value, which amounted to £2,992,246; raw cotton decreased 10 per cent. in quantity, and 15¾ per cent. in value; flax increased 23¼ per cent. in quantity, and 40 per cent. in value; raw silk decreased 14¾ per cent. in quantity, and 13 per cent. in value; wool increased 2 per cent. in quantity, but decreased 4½ per cent. in value. The total value of tea increased 36 per cent., and the quantity entered for home consumption decreased 8 per cent. Coffee increased 33⅓ per cent. in the total value, but the quantity entered for home consumption was about the same as last year.

ARTICLES OF IMPORT.

TEA.

Messrs. Goddard and Co.'s Circular says :—There is very little business to report for the week, and auction sales have been small. The low quotations made for both Red and Black leaf Congou induced some slight inquiry for these grades, but without leading to much business. Importers, as a rule, are refraining from pressing or even offering fresh parcels, and prices are without change. Some Scented Capers at sale have realised rather dull prices. Green Teas of last season have also made very low quotations. Public sales.—China sorts : 6,739 packages, "without reserve." Prices show little change from last week's quotations. Common Red leaf sold from 9½d. to 10d.; preferable common to medium, 10¾d. to 1s. 0½d.; old season's Green Teas, rather coloury, sold at very low rates. 1,400 boxes Canton Scented Caper obtained 9¼d. to 11d. Deliveries in London, from 1st to 6th inst., inclusive, or five days, 1875, 2,692,514lbs., against five days, 1874, 2,920,363lbs. Imports, deliveries, and stocks in London, from January 1 to December 1 :—

	1874.	1875.
Imports	139,971,225	175,316,723
Deliveries	157.123,981	164,610,498
Stocks	72,175,542	89,941,910

Messrs. Arthur Capel and Co.'s Circular says :—There has been a rather better tone in our market this week, with a slight improvement in the amount of business transacted, the chief inquiry being for good medium black-leaf Congous from 1s. 4d. to 1s. 5½d. per lb. The low prices ruling for common red-leaf has also led to some demand, and prices for these are a shade dearer. *Congous :* Red-leaf kinds : Siftings still meet a ready sale at former prices. Common to good common have sold at rather better rates. Fair to good Kaisows have been sold from 1s. 1d. to 1s. 5d. per lb. In good to fine a few sales have been made at previous prices, but there is but little doing in finest. Pak Lin kinds remain dull of sale in the absence of Export orders. In black-leafs kinds, common to good common show no improvement. There has been rather more inquiry for fair medium from 1s. 1d. to 1s. 3d. per lb., good medium from 1s. 4d. to 1s. 5½d. have been fairly saleable, prices being slightly better. Good to fine show no alteration, finest con

Digitized by Google

tinuing difficult of sale in the absence of export demand. New make kinds: Common have sold at previous rates; fair to good have sold from 1s. to 1s. 6d. per lb. The few sales of Oolong have been at fully former prices. Good medium Souchongs remain in demand at previous rates; in fine there is but little doing. *Scented Teas:* Canton Capers have sold at a further reduction, some common at public sale selling without reserve at 9¾d. per lb. The better kinds are also less readily taken. Orange Pekoes show no improvement, the demand being limited. Foo Chow Capers are only saleable at low prices. Orange Pekoes: fair quality has been sold from 1s. to 1s. 1d. per lb. being previous prices. In other sorts there is no change to notice. *Green Teas*: Finest lines of Moyune Gunpowder have realised full prices; all other kinds sell irregularly and only at low prices.

The Circular of Messrs. Thompson says:—During the past week there has been rather more inquiry, especially for the medium to good classes of Congou; but so far, the extent of business has been very limited. Foochow Congous: Siftings and broken leaf have been sold at rather easier rates. Common to fair remain at late quotations, say 9½d. to 1s.; medium to good, 1s. 6d. to 1s. 8d. per lb. The grades from 1s. 4d. to 1s. 6d. are more inquired for than the better kinds. Black Leaf Congous: Common to good common, 9d. to 10½d., are not in demand. For fair, at 1s. 1d. to 1s. 3d., only a few transactions are reported. Medium to good are in better demand at 1s. 5d. to 1s. 8d. per lb.; fine neglected. Souchongs and Oolongs are dull at late quotations.

Mr. J. D. McKenzie's New York Circular says:—Since the 20th October the transactions have been on a more extended scale, but at constantly lower rates for all kinds except Black Teas, which have been dealt in more freely at higher rates; this is especially the case in old cargo grades of Oolong Tea. Green Teas do not meet with favour, and it would almost seem unwise for any one to import them, and hope to receive back cost and charges, especially at the prices demanded and obtained by the Chinese dealer. Japan Teas have evidently supplanted them, but even this sort are now selling at much less than cost, simply because they are in excessive supply. If the dealers in Japan could have been contented with making a crop of say not more than twenty millions, instead of twenty-five millions for this country, we should have a different condition of market. An excessive supply of any article makes of necessity low prices. The large and numerous failures during the past two or three months, not only of important jobbers, but of importers also engaged in the Tea trade, has had a depressing influence on prices, but importers are less willing than heretofore to sell their Teas, except for cash or on credit to parties of undoubted responsibility. A few parcels are forced off in the auction room.

SILK.

The position of the Market is unaltered; buyers still hold aloof, and importers refrain from any attempt to force sales. Prices, in the meanwhile, have undergone little or no change:—Deliveries, 1st to 8th inclusive, China, 823 bales; Canton, 112 bales; Japan, 129 bales; Total, 1,064 bales.

Messrs. Arles, Dufour, and Co.'s Lyons Circular says:—European sorts, which have been neglected by consumption since the opening of the season, have lost again f.3 to f.5, and remain much offered, especially from Italy. Chinas have better maintained their ground, owing to the larger share they have in the manufacturing of goods, but the cheapness of European Silk becomes more and more threatening. Cantons, being plentiful, and not in favour this season, have been entirely neglected, and quotations are nominal. Japans are particularly threatened by the competition of Italian Silk; special sizes alone attract some attention.

Messrs. B. Richardson and Son's Circular, dated New York, November 22, says:—We have had a fairly active market for Raw Silk for the past month, and prices have been well maintained. Manufactured goods, however, have been very dull of sale, and manufacturers are not inclined to increase their stocks. The imports for October are 955 bales, inferior grades being still in excess. Good sorts have been sold freely on arrival. R.R. Cantons still come very slowly. Usual reeled Chinas are inactive. In Japans nothing to report. China quotations continue high.

COFFEE.

The improvement in the market noted last week has not been maintained. Although the demand for Plantation Ceylon has been fairly well sustained, the increased supplies at public sale have been slightly in excess, and prices have gradually given way, resulting in a total decline of 3s. per cwt., middling closing at 103s. 6d. to 105s. Native has been dull of sale at 92s. 6d. to 93s. for good ordinary, and 1,038 bags in auction were only partly sold; of 1,464 bags garblings, &c., 450 bags sold at 12s. 6d. to 27s. The closing prices of Plantation Ceylon are, triage and ordinary 82s. 6d. to 97s., common grey to coloury small 97s. to 102s., fine ordinary to fine ordinary pale grey, 99s. to 101s. 6d., low middling grey 102s. to 103s., middling 103s. 6d. to 105s., good middling to fine middling 105s. 6d. to 108s., good to fine bold 109s. to 113s., pea-berry 116s. to 122s., Native ordinary 90s. to 91s., good ordinary 92s. 6d. to 93s., fine bold 100s., black and brown garblings 12s. 6d. to 27s.; of other East India 300 bags Indian Manila have been sold at 91s. 6d. to 93s.; 500 bags Macassar, fine yellow at 98s. 6d. to 100s., fine brown at 99s. 6d. to 100s., and 1,100 bags Singapore, chiefly picked Bally at 87s. to 90s., bold pale Palambang at 93s., fine bold pale at 97s. 6d.

SUGAR.

The market has remained in an extremely dull state throughout the fortnight, the demand for all descriptions being of the most limited character, and transactions are also very light: at the same time there has been an absence of pressure to sell, and no decided change in prices can be reported. The landings at the four ports in the fortnight were 28,641 tons, against 28,597 tons in 1874; the deliveries were 31,908 tons, against 28,608 tons, and the deficiency in the stock is 21,900 tons. In East India the sales have been confined to 2,700 bags sundried Manila at 16s. 9d., and 50 tons China at 15s. per cwt.

COCOA-NUT OIL.—No improvement has taken place in the demand, and quotations remain at £41 10s. for Cochin and at £38 10s. to £39 for Ceylon. In the public sales 187 casks Cochin offered were withdrawn; 748 casks Ceylon were bought in, yellow to fine at £37 10s. to £39, hogsheads old to fine new at £38 10s. to £39 5s. per ton.

CHINA PRESERVES.—At auction 434 cases Ginger all sold at 6¾d. to 8¼d., small jars 9½d. to 9¾d., and 46 cases Chow Chow partly sold at 7¼d. per lb.

CUTCH is quiet, but prices are about sustained. At auction 500 boxes new Pegue of the mark G.W.& Co. were withdrawn. Landings, deliveries and stocks of Cutch for the first eleven months of the three years:—

	1875.	1874.	1873.
Landed ... ... tons	2,694	778	4,597
Delivered	2,558	3,173	3,540
Stock, Nov. 30	3,047	2,448	4,958

CAMPHOR.—A small business has been done in China at 69s. per cwt.

COIR GOODS.—Small supplies of Yarn at the auctions went off slowly for common kinds, and prices were 10s. to 20s. lower, but good to fine, both dholls and bales, sold at firm rates. The few lots of Fibre, mostly in second hands, were partially sold at full prices. Rope was chiefly sold at rather irregular rates. 129 bales fine to superior Ceylon Yarn sold at £43 15s. to £51 5s.; of 193 tons in dholls about 100 tons sold, low coarse to common at £23 5s. to £25 15s., good common to medium at £27 to £30, chiefly good even make at £32 to £35 5s., fine at £37 15s. to £40 per ton.

CUBEBS are scarce and firmly held; no transactions reported.

COLOMBO ROOT.—Steady, but quiet; of 38 bags offered two-thirds sold at 20s. to 21s. 6d. per cent. for fair but wormy.

ESSENTIAL OILS.—*Anniseed* again easier; 70 cases sold spot at 8s. 9d. down to 8s. 6d., afloat offering at less. *Cassia* steady, retail sales at full rates. *Nutmeg* steady but quiet, and of 9 cases offered 2 sold at 7d. per oz. *Cinnamon* quiet. *Citronelle* a shade lower; 30 cases sold afloat at 1¼d., subsequently 75 cases at auction were chiefly sold at the same figure. *Lemon Grass* quiet; 65 cases retired.

GUMS.—*Benjamin:* Siam very firm and rather scarce; of 4 cases offered half sold at £27 10s. for good tear, and £13 10s. siftings in block; Sumatra steady, of 42 cases half sold at 84s. to 86s. for Palumbang thirds. *Copal* quiet; 402 cases at auction chiefly retired, but mostly subsequently sold, together with several other parcels, at 25s. to 27s. for fair to good, being rather easier. *Damar* firm and rather higher. *Gamboge* quiet, and 9 cases retired.

GALLS.—China are quiet at 62s. 6d., at which 100 cases have been sold, and for arrival 170 cases unworked at 57s. 6d. ex ship. At auction 141 cases China bought in at 65s. Movements of China and Japan Galls for the first eleven months of the three years:—

	1875.	1874.	1873.
Landed ... ... boxes	5,181	5,246	6,688
Delivered	4,799	4,453	6,474
Stock, Nov. 30	799	456	1,801

GAMBIER.—The market continues dull, and only small transactions are reported, including about 500 bales block on the spot at 26s. 9d. to 26s. 10½d. for whole bales, chiefly the former price. For arrival 50 tons December shipment have been sold at 25s. 6d., ex ship. At auction 712 (mat) bags fine pale free cubes bought in at 40s., since partly sold at 39s. Imports, &c., in the first eleven months of the three years:—

	1875.	1874.	1873.
Landed ... ... tons	4,725	3,849	9,369
Delivered	4,621	4,574	5,391
Stock, Nov. 30	363	349	1,391

GUTTA-PERCHA.—Market dull, and auctions have embraced 1,672 baskets, &c., only a very small proportion sold at 10¾d. to 1s. 4½d. for fair and good, and 5d. to 6¼d. common. A parcel fine sold at 2s. 4d., and more inquiry.

GALANGAL ROOT.—The market continues quiet; 100 bales at auction have been sold at 20s. 6d. to 21s. for fair quality.

HIDES.—Messrs. Dyster, Nalder and Co.'s Monthly Report says:—Without any notable improvement in prices, a better feeling has prevailed in the market generally, nearly all the fresh parcels offered in the public sales have been cleared, and a moderate business transacted by private at fully corresponding rates, the only exception being in those of inferior character, which, together with parcels frequently put before the trade, failed to find buyers. Singapore, Penang and Rangoon, &c., Ox and Cow Hides.—Singapore and Penang Hides have sold freely at full rates. The Rangoon Hides sold at public sale were of inferior quality, and brought low prices. The sales are 1,952 Singapore and Penang; light, first 13½d., seconds 10d. to 12½d., thirds 8d.; heavy, seconds 8½d. to 9½d., extra heavy 4¾d. to 7d.; small, seconds 10d. to 11½d., thirds 7d. per lb. 9,699 Rangoon: Light, thirds 5¾d., fourths 4d.; heavy, seconds 7¼d., extra heavy 7d. to 6¼d.; small, seconds 10d., thirds 6d. per lb. Singapore, Penang, &c.—Buffalo Hides have been in moderate request without change in value. The sales are

Digitized by Google

5,060 Singapore, &c.: Fair to good, 1st heavy, average 19¼ to 27½ lb., 5½d. to 6½d.; 2nd heavy, average 18⅝ to 22¼ lb., 5⅜d. to 5⅞d.; 1st light, average 11¼ to 11⅝ lb., 6¼d. to 6⅜d.; 2nd light, average 8⅜ to 10⅜ lb., 5d. to 5⅜d.; thirds 5¼d.; ordinary, 1st heavy, average 32⅞ to 44 lb., 5d. to 5⅜d.; 2nd heavy, average 31⅜ lb., 4⅞d.; light, average 13⅜ to 17½ lb., 6d. per lb. Java Hides.—No Ox and Cow have been offered. Few Buffalo Hides sold, and prices are unaltered. The sales are 996 Batavia: Unshaved, 1st heavy, average 23⅝ lb., 7⅜d. to 7½d.; 2nd heavy, average 18⅝ to 27 lb., 5⅞d. to 6⅝ per lb.

HEMP.—Few inquiries have been made for Manila, and only a small business has been done. The small quantity at auction met little demand, and only a small part sold at previous rates.

INDIA-RUBBER has been in more active demand at a general slight advance. Privately good Singapore has sold at up to 1s. 8½d., and Borneo 1s. 3d. Auctions have embraced 172 cases Borneo, partly sold at 1s. 2⅜d., and 218 packages Rangoon, a few sold at 1s. 5½d. for good ball.

JAPAN WAX continues dull, but small private sales have been effected at 49s. for fine hard quality, and 45s. to 46s. per cwt. for good.

JAPAN TALLOW.—8 casks sold, fine at 47s. 6d., rather dark 44s. 3d.

MUSK.—Tonquin Pod has advanced 2s. to 3s. per oz., and of 50 caddies offered about 30 sold at 43s. to 50s. per oz. for fair to fine selected flat pods; 15s. 6d. to 23s. 6d. middling to very good even well shaped, rough, and false packed; 7 tins Cabardine realised about the previous value, viz., 14s. to 14s. 6d., and 11 tins Grain about half sold at 36s. 6d. to 37s. 6d. for middling damp dark.

PLUMBAGO.—At auction 424 barrels Ceylon met a good demand, and fully 150 barrels were disposed of, chiefly lump, at a further advance; good clean small to fine bold selling at 17s. to 23s., superior ditto up to 26s., chips 10s. 6d. to 13s. 6d. per cwt.

PEPPER.—*Black* has been very quiet at a slight further reduction, and privately the business has been very small, both for Singapore and Penang, the former at 5¼d. to 5⅜d., the latter at 4⅛d. to 4¼d.; of 3,763 bags at auction a few lots only sold, Singapore, first-class damaged of good at 5d., Penang at 4⅛d. to 4¼d. per lb. Afloat 150 tons sold at 5d. down to 4⅞d. for Singapore. *White* is also dull, and of 435 bags at auction a small proportion sold at 7¼d. to 7⅜d. for fair but dullish.

RICE.—There has been an almost total absence of demand, both on the spot and for arrival, and sales have been very small, but no change can be reported in prices. On the spot only 2,500 bags white Bengal have been sold at 11s. to 12s., 2,000 bags Rangoon at 8s. 3½d., and 1,700 bags Siam at 7s. 6d. For arrival about 500 tons yellow Bengal have been sold, *vid* Canal, at 9s. 3d. to 10s., *vid* Cape at 9s. to 9s. 6d. The floating cargo, per Conte G. Szapary, 802 tons Rangoon, off coast, has been sold at 8s. for the Continent.

RATTANS.—At auction of 117 tons only about 4,000 bundles sold, common £16 10s. to £16 17s. 6d., Penang £26, ditto with all faults £20 15s. to £21 7s. 6d.

RHUBARB.—The value of China is unaltered and less offers. Of 48 cases at public sale, about half sold; bold, bright sort, fair fracture a little wormy at 2s. 2d. to 2s. 4d.; fair high dried 1s. 3d. per lb.

SAPANWOOD scarce, but demand limited, and no transactions of importance can be recorded; of 18 tons Manila offered a very small proportion sold at barely previous value, viz., £9 2s. 6d. to £9 7s. 6d. per ton.

SAGO is rather easier, and of 3,130 bags offered, two thirds sold at 15s. 6d. to 17s. for fair to very good bright small, 14s. to 14s. 6d. dirty and dull and brownish, and 17s. good medium; 100 boxes also offered and retired. *Flour* generally firmly held, but quiet; of 1,450 bags offered part sold at 13s. for fair Borneo.

SOY is scarce, and holders on the spot are asking 3s. 6d. per gallon for China, but there are sellers afloat at 2s. 9d. per gallon.

SHELLS.—The periodical sales were held on the 7th inst. *Mother-o'-Pearl:* Supplies, although less extensive than at the preceding, were generally in excess of the demand, and the sales went off flatly for all descriptions, and only a small portion sold; Manila at steady rates, but other kinds at a decline. Of 69 cases 35 baskets Manila 37 cases 35 baskets sold, good bold at £12, chicken at £9. Of 27 cases 7 baskets Macassar 11 cases sold, bold at £12 2s. 6d. to £12 5s., chicken at £9. *Tortoiseshell:* Unusually large supplies went off slowly, but the greater part were disposed of. West India at full rates for choice, but from previous rates to a further decline of 2s. for all other qualities; East India also sold rather cheaper. Of 19 cases (1,403 lb.) Singapore about 12 cases sold, pickings at 7s. 6d., medium shell 13s. to 14s. 6d., good to fine 15s. 6d. to 18s. 6d., 6 cases (787 lb.) Macassar withdrawn. *Ear Shells:* Little demand prevailed, and the large supply of 447 cases 649 bales 29 casks and 18 tons loose Japan Silver was all bought in or withdrawn, excepting 40 packages 8 tons, which found buyers at easier rates, untrimmed mixed and defective (in bales) £11 10s., good bold (loose) £18 to £18 10s., and 2 cases superior trimmed at £46 per ton. *Green Snail Shells* were again in large supply, and of 690 baskets and 6,850 loose 90 baskets and the loose sold at a decline of ½d. to ¾d. for small and medium, and 1½d. to 2d. each for bold, very small and small 1⅞d. to 2d., small and medium 3¾d. to 4d. good to fine bold 6½d. to 7d. each.

SPICES.—*Cassia Lignea* continues quiet, with retail trade only, at 54s. to 55s., but larger sales reported at 52s. 6d.; 983 cases brought to public sale were all retired. *Nutmegs:* At auction 48 packages Penang chiefly found buyers as follows: Brown, more or less mouldy, bold sizes, 67 to 57's, 4s. to 4s. 4d.; 82 to 75's, 3s. 4d. to 3s. 6d.; small and low rough limed, 2s. 2d. to 2s. 3d. per lb. *Mace:* 9 cases Penang found buyers at rather lower rates; common red at 2s.; chips at 1s. 2d. to 1s. 6d. per lb. *Cloves:* At the public sales 10 cases Amboyna sold at 1s. 6d. to 1s. 6⅝d. per lb. for fair, being lower. *Cinnamon:* 40 boxes China, consisting of dark Quill in bundles, withdrawn at 1s. per lb.

TOBACCO.—In public sale 176 bales China sold at 7d. to 8d., and 104 bales Japan at 6⅞d. to 7⅞d. per lb.

TIN.—Straits has slightly declined since last mail, the current quotations being £81 on the spot and £81 10s. afloat, but the market at the close is very firm. Banca is quoted £86, and Billiton £83 per ton, showing no change.

ARTICLES OF EXPORT.

MANCHESTER GOODS.

Without any improvement in the demand, this Market has continued to wear the same dull and inanimate tone reported last week, the inquiry from all quarters being slack. On the other hand producers, generally, show no disposition to tempt business by giving way, seeming confident that holding is the best policy. It is only where large stocks are accumulating, or orders running out, that prices show slight irregularity. The Market at the close is a shade more steady, with renewed inquiry for common makes of Shirtings.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 28s. To Singapore: 14s. To Batavia and Sourabaya: 20s. To Galle: 18s.

CASUALTIES.

CADIZ, DEC. 4.—The St. Aubin, from Cardiff, for Singapore (coal), has put in here leaky.

NEW YORK, DEC. 2.—The Lucy S. Wills, ship, from Ilo Ilo, for Boston, was spoken Nov. 14, in lat. 23 N., long. 62 W., leaky, with stern stove, and part of cargo jettisoned. The Glenartney (str.), arrived here Nov. 26, from Shanghai, reports:—Oct. 14, had a violent gale, with heavy cross sea, lasting two days; since leaving Gibraltar a continuation of gales from the westward; Nov. 22, lat. 37.44, long. 58.20, encountered a terrific gale from N.W., in which lost foresail out of the gaskets, split trysail, and carried away the fore and mizen gaffs. The Pyrmont, arrived here, 26th ult., from Hong Kong, reports, Sept. 8, lat. 36, long. 22, after several days of heavy gales, veering from N. to W., had a cyclone, lasting 18 hours, from N.N.W. veering to S.W., with heavy sea from S.E.; on taking observation after the storm found we had drifted 180 miles to the S.W.

VICTORIA, V.I., NOV. 1. — The Nation's Hope, ship, of Sydney (N.S.W.), from Yokohama (ballast), arrived in Royal Roads, off Esquimalt Harbour, a few days ago, for orders, and, during a sudden gale, dragged and parted from her anchors and stranded on a beach fully exposed to the S.E. gale, where she now lies water-logged, with sternpost injured and some planking started below water-line. A survey was held on board immediately after the stranding, and the surveyor recommended that the vessel should be stripped of everything and lightened so as to admit of her being towed into harbour for repairs, which is being done, but the probability is that the cost of repairing and removing her from where she now lies will amount to more than she is worth.

ST. HELENA, NOV. 12.—The Nieuwe Waterweg II., arrived here on the 1st inst. from Batavia, for Rotterdam, reports on Oct. 10, Cape Recife bearing N.W. five miles, experienced a terrific hurricane, throwing the ship on her beam ends for four hours, carrying away bulwarks, started deck seams, boats stove, and decks swept. The master of the Constance, arrived here from Samarang for Amsterdam, states that from the 10th to the 12th Oct., encountered a hurricane, during which lost sails, bulwarks, &c., had seams of deck and waterway sprung, and made more water than usual; after making temporary repairs, the vessel proceeded for her destination.

BATAVIA, DEC. 1.—A fire broke out amongst the coals on board the Utrecht, from Newcastle for Samarang; jettison was made of about 300 tons; the fire is extinguished, and vessel has proceeded.

MANILA (VIA HONG KONG, DEC. 1).—The Lyaspi (? Legaspi, s.), hence for Ilo Ilo, was totally wrecked on the 31st Oct. on Samar Island. Captain and part of crew saved.

SYDNEY, N.S.W., DEC. 3.—The Sanda, from Newcastle for Singapore, put in here Nov. 14 in distress, with spars and rigging gone.

MISCELLANEOUS.

GIBRALTAR, NOV. 30.—Arrived and proceeded, Cheops (str.), from London and Plymouth, for Shanghai.

MALTA, NOV. 25.—Arrived, Teviot (str.), from Shanghai; 26, Flintshire (str.), from Foochow, and both left for London.

PORT SAID, DEC. 3.—Arrived, Glengyle, from London, for Shanghai; Priam, from Liverpool, for Shanghai; Penedo, from Antwerp, for China; Governor-General Loudon, from Glasgow, for Batavia; Groningen, from Batavia, and proceeded for Flushing; 5, Glenearn, Nestor, both from Shanghai, and left for London.

SUEZ, DEC. 7.—Arrived, Agamemnon, from Shanghai, for London; Conrad, from Batavia, for Nieuwe Diep.

NEW YORK, NOV. 25.—The Favorita, which arrived at Boston, Nov. 20 from Batavia, reports that on Oct. 1, in lat. 18 S., long. 71 W. (?), saw large vessel on fire; ran down to her, but she sank five minutes after the Favorita reached her; cruised about for two hours, but could not discover any trace of the crew, nor learn anything to establish the vessel's identity. The J. A. Brown, Greenish, from Batavia for Boston, which put into St. Thomas Nov. 11, with loss of bowsprit and all attached, leaking in topsides, and with bow chafed, had not discharged on the 13th; expected to discharge a few tons of cargo to examine bow.

ASCENSION, NOV. 17.—Passed, from Rangoon, for Falmouth, P.V.R.B.; 19, from Singapore, for London, Mogul; 20, from Samarang, for Amsterdam, N.B.C.F.; 15, from Batavia, for Rotterdam, Nieuwe Waterweg II.

ST. HELENA, NOV. 10.—Arrived, Marianopoli, from Akyab, for Falmouth; Noach II., from Batavia, for Rotterdam; Dewa, from Rangoon; 12, Doris Eckhoff, from Java, both for Falmouth, passed, Nov. 3, Dione, from Malacca Straits, for New York.

TABLE BAY, NOV. 1.—Arrived, Oceana, from Akyab; Karikal, from Bangkok.

ALGOA BAY, NOV. 5.—Sailed, Juno, for Batavia; 6, Assyrian, from Ilo Ilo, for Falmouth. The Ceylon, from Zebu to New York, is discharging her cargo; some of the hemp is damaged, and 301 bales were sold by public auction on the 27th of October, when 207 bales realised £3 5s., and 31 bales (broken) £2 5s. per bale, duty paid; the vessel will in all probability be condemned. The Ceylon continues discharging. A further sale of hemp was held on Nov. 2, when 300 bales were disposed of at prices varying from £3 5s. to £1 10s. per bale, duty paid; 201 bales of hemp, ex the above vessel, sold at auction, were shipped per Danube (s.), for Southampton, and 166 bales hemp, per the American (s.), for the same port. About 700 tons of cargo have been landed ex Minister Fransen v. d. Putte, from Batavia, for Rotterdam, and a further quantity will have to be taken out; the vessel continues to leak in bad weather; a portion of her cargo is damaged by sea water. The cargo landed from the Assyrian, from Ilo Ilo, for Falmouth, has been reshipped in her, the vessel being tight and strong

SINGAPORE, DEC. 1.—The Rajanattianuhar (s) and the Bangkok, sunk near Menam Bar, are lying in a good position, apparently not much damaged, although full of water.

AMOY, OCT. 18.—At a naval court assembled to-day at the British Consulate, for the purpose of inquiring into the loss of the Hector, the master, Captain Robinson, was adjudged to have his certificate suspended for fifteen calendar months,

NOTICE TO MARINERS.

CHINA—SHANTUNG PROMONTORY.—Information has been received of the existence of a rock (Rodney rock) just awash at low water spring tides, lying four cables from the shore, off the north-east point of Shantung promontory, and in a direct line between the centre of the lighthouse and the eastern extreme (within the reef) of Alceste island. The following bearings were taken from a boat alongside the rock, viz.: North-east promontory, S.E. by S.; Abrupt bluff, West; Western extreme of Alceste island, N.W. by N. 1 6-10 miles.—Hydrographic Office, Amiralty, London.

GENERAL FREIGHT REPORT.

The tonnage loading on the berth for India, China, and the Cape of Good Hope amounts to 48,819 tons, and for Australia and New Zealand to 42,952 tons. Outward berth freights to Australia, China, and the East generally continue unchanged since our last report. There is very little activity in coal freights, and notwithstanding the low rates, the amount of the export of coals for the past month appears to have fallen considerably below that of the same period of last year. Homeward chartering is restricted; there is a little better inquiry for steamers from the East.

WEST INDIES.—Both outward and homeward freights remain as quoted last week, the amount of tonnage still offering exceeding the demand. Wales—Havana, 9s. 6d.; St. Thomas, 9s.; Jamaica, 9s.; Demerara, —; Martinique, Barbadoes, —; Santiago de Cuba, 11s.; Cienfuegos, 11s.; Tyne to Moule, —. Troon to Demerara, 14s. Homewards—Trinidad to U.K., 45s.; Continent, 47s. 6d.; St. Lucia, 42s. 6d.; Barbadoes, 42s. 6d.; St. Kitts, 43s. 9d.; Jamaica to U.K., 35s.; Continent, 36s., logwood; Minatitlan to U.K., 60s., mahogany; Laguna, 42s. 6d., logwood, to a port between Havre and Hamburg; Hayti to U.K. or Continent, 45s. to 45s. 6d., logwood; Santo Domingo to U.K., 60s., mahogany, to go out in ballast.

BRAZIL.—London to Rio Janeiro, 23s.; Bahia, 19s.; Pernambuco, 19s. on d.w. Wales to Rio, coals, 22s. large, and 23s. small; Santos, 24s.; Rio Grande do Sul, 35s.; Maranham, 16s., Para, —; St. Catherine, 25s.; Pernambuco, 17s.; Bahia, 17s. Tyne to Rio Janeiro, coals, £23, coke, £13, all coals £23. Santos,—; Para,—; Rio Grande do Sul, —; Liverpool to Rio Janeiro, 18s.; Rio Grande do Sul, —; Cape Verds to Rio Janeiro, 18s.; Santos, 19s.; Cette or Trapani to Rio salt), 20s. to 21s.; Lisbon or St. Ubes, 19s. to 20s.; Bahia, 19s.

RIVER PLATE.—London rates for berth loading remain nominal at 25s. 6d. Monte Video, and 27s. 6d. Buenos Ayres, on d.w. Wales to Monte Video 22s. large ships, and 27s. 6d. for small, with option Buenos Ayres 30s., and Rivers 35s., Newport, coals to Ensenada 26s. Tyne to Ensenada or Buenos Ayres 27s.—400 tons coals. Home from Monte Video 27s. 6d., option Buenos Ayres 30s., Rivers, 35s., wet salted hides and (or) tallow, 350 tons d.w. forward ships.

AFRICA, &c.—From London to Table Bay 30s., Natal 57s. 6d., Port Alfred 65s., East London 67s. 6d. per register ton; Wales to Cape Town, 22s.; Algoa Bay, 27s. 6d.; Cape Verds, 10s.; Tyne to Cape Verds, 11s.; Madeira, 11s., 600 tons coal.

UNITED STATES.—London to Philadelphia, 4s.; New York, 5s. chalk. Cardiff (s.), Montreal, iron, 18s. Homeward rates are 6s. 3d. orders, New York, 6s. direct; Philadelphia 6s. 9d. orders, and 6s. 6d. direct; Baltimore, 6s. 9d.; Baltimore, Philadelphia, and New York, 8s. per qr. wheat for steamer; Bull River, phospate to United Kingdom, 28s. 6d. Montreal, 9s. 6d. and 9s.

WEST COAST OF AFRICA.—Wales to Callao 20s., Valparaiso 20s., Coquimbo 16s., Caldera 20s. Tyne to Valparaiso 18s., Callao —, San Francisco —. Liverpool to Valparaiso 19s., San Francisco 32s. 6d. San Francisco to United Kingdom 50s., Portland to United Kingdom, iron ships 70s. orders, 5s. extra Contingent, 2s. 6d. off direct port. Sept. 15 to Jan. 31 loading. Nitrate ports to United Kingdom, 57s. 6d. for backward ships, and 60s. for December loading.

THE NATIONAL SAFE DEPOSIT COMPANY (Limited).

1, Queen Victoria-street, Mansion House, London.
Capital, £500,000. Subscribed, £250,000.

DIRECTORS.

J. H. Pulleston, Esq., M.P., Chairman.
Lawford Acland, Esq., Chairman Ceylon Company.
George Arbuthnot, Esq., Chairman Oriental Bank Corporation.
George W. Barnett, Esq., Barnetts, Hoares, Hanburys, and Lloyd.
Horatio S. Coulson, Esq., Director United Discount Corporation.
Lord Wm. M. Hay, Director Eastern Telegraph Company.
Hugh F. Sandeman, Esq., Director Scottish Union Insurance Company.

The Company is now ready to let to approved applicants Safes in their Fire and Burglar proof Vaults, at rents from £2 10s. to £30 per annum.

No insurance is necessary.

The main object of the Company is to provide the public with a perfectly secure, yet inexpensive repository for valuables of every description, and relieve them from the harassing and wearing strain occasioned by the personal care of such property. The Company take for safe custody all kinds of securities, valuable property, bonds, wills, marriage settlements, and other documents, and guarantee their value when required. Drawn bonds, coupons, &c., collected.

The Company undertake the duties of trustees, receivers, and executors, and act in other confidential capacities.

The Great Vault is superior to any building in the world intended for similar purposes. The utility of these Safes, which are entirely underground, is undeniable, as bankers are not responsible for deposit of valuables.

The loss of many kinds of securities is irreparable, the loser having no recourse against the Government or other party issuing them. A constant watch is kept both inside and outside the building. There is a room especially adapted and reserved for ladies. The premises can be inspected, and further particulars obtained on application. HENRY WEST, Manager.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, August 30, 1851.
PAID-UP CAPITAL, £1,500,000.
RESERVED FUNDS, £500,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Colombo, Foochow, Hiogo, Hong Kong, Kandy, Madras, Mauritius, Melbourne, Point de Galle, Port Elizabeth, Shanghai, Singapore, Sydney, Tellicherry, and Yokohama on terms which may be ascertained at their Office. They also issue Circular Notes for the use of Travellers by the Overland Route.

They undertake the agency of parties connected with India and the Colonies, the purchase and sale of British and Foreign Securities, the custody of the same, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named Dependencies.

They also receive deposits of £100 and upwards for fixed periods, the terms for which may be ascertained on application at their Office.

Office hours, Ten to Three; Saturdays, Ten to Two.
Threadneedle-street London, 1875.

THE AGRA BANK (Limited).

Established in 1833.

CAPITAL, £1,000,000.
Head Office:—NICHOLAS-LANE, LOMBARD-STREET, LONDON.
Branches in Edinburgh, Calcutta, Bombay, Madras, Kurrachee, Agra, Lahore, Shanghai, Hong Kong.

Current accounts are kept at the Head Office on the terms customary with London Bankers, and interest allowed when the credit balance does not fall below £100.

Deposits received for fixed periods on the following terms, viz.:—At 5 per cent. per annum, subject to twelve months' notice of withdrawal. For shorter periods deposits will be received on terms to be agreed upon. Bills issued at the current exchange of the day on any of the Branches of the Bank free of extra charge; and approved bills purchased or sent for collection. Sales and purchases effected in British and Foreign Securities, in East India Stock and Loans, and the safe custody of the same undertaken. Interest drawn, and Army, Navy, and Civil Pay and Pensions realised. Every other description of Banking Business and Money Agency, British and Indian, transacted.

J. THOMSON, Chairman.

COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1864, and 31st December, 1866.
Recognised by the International Convention of 30th April, 1862.

CAPITAL, fully paid up, £3,900,000.

Reserved Fund ... ... f.20,000,000 ... £800,000.
HEAD OFFICE—14, Rue Bergere, Paris.
AGENCIES AT—Lyons, Marseilles, Nantes, Mulhouse, Roubaix (France), Brussels (Belgium), Alexandria (Egypt), Calcutta, Bombay, Hong Kong, Shanghai, Saigon (Cochin China), Bourbon (Reunion), and Yokahama (Japan).
LONDON BANKERS.—Bank of England and Union Bank of London.
LONDON AGENCY.—144, Leadenhall-street, E.C.
MANAGER.—Theod. Dromel.
SUB-MANAGER.—H. DUVAL.

The London Agency grants Drafts and Letters of Credit, and purchases or collects Bills payable at the above-named places.

The Agency will conduct Banking business of every description with the Continent, India, China, &c., upon terms to be ascertained at the Office

Capital, $5,000,000. All paid up.
Reserve Fund, $100,000, at exchange of 4s. 6d.—£22,500.

COURT OF DIRECTORS AND HEAD OFFICE IN HONG KONG.
MANAGER—D. McLean, Esq., 31, Lombard-street.
BANKERS—London and County Bank.

BRANCHES AND AGENCIES.

Hong Kong	Hankow	Saigon
Shanghai	Yokohama	Singapore
Foochow	Hiogo	Bombay
Ningpo	Manila	Calcutta

The Corporation grant Drafts upon, and negotiate or collect Bills at any of the Branches or Agencies; also receive Deposits for fixed periods, at rates varying with the period of deposit.

The Corporation issue Letters of Credit and Circular Notes, negotiable in the principal cities of Europe, Asia, and America for the use of travellers.

They open Current Accounts for the convenience of constituents returning from China, Japan, and India.

They also undertake the Agency of constituents connected with the East, and receive for safe custody Indian and other Government Securities, drawing Interest and Dividends on the same as they fall due.

Dividends are payable in London in April and October, on receipt of the advice of meeting in Hong Kong, held in February and August.

Large 8vo., pp. 724, cloth, 8s., post free; or in half morocco, 12s. 6d.,

THE HOMŒOPATHIC DOMESTIC PHYSICIAN.

JAMES EPPS & Co., Homœopathic Chemists, 48, Threadneedle-street, and 170, Piccadilly.

THE LATE REV. B. P. KEASBERRY, OF SINGAPORE.

THE late Rev. B. P. KEASBERRY, whose sudden death occurred last month in Singapore, has left a widow and a family of girls almost wholly unprovided for.

It is almost unnecessary to remind old residents in The Straits of the faithful and disinterested services of Mr. Keasberry, in the teaching of the Christian faith, and the spread of education.

These services, which extended over a period of thirty-six years, it is proposed to recognise, to some extent, by the collection of a sum of money, to be placed in the hands of the Hon. R. Little, M.D., and William Adamson, Esq., of Singapore, as Trustees, leaving power to them to invest the whole or a part at their discretion, or to apply it wholly and at once for the benefit of Mrs. Keasberry and her daughters.

Cheques should be made payable to P. F. Tidman, 34, Leadenhall-street, by whom Subscriptions will be acknowledged.

BAISS BROTHERS & CO.,

DRUG MERCHANTS, &c., GOVERNMENT CONTRACTORS FOR CHEMICALS, &c.,

JEWRY-STREET, LONDON, E.C.

AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29 BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of even octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.

ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

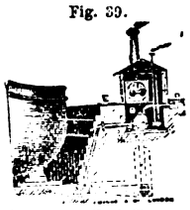
GWYNNE and Co., Hydraulic and Mechanical Engineers,

ESSEX STREET WORKS, STRAND, LONDON, W.C.

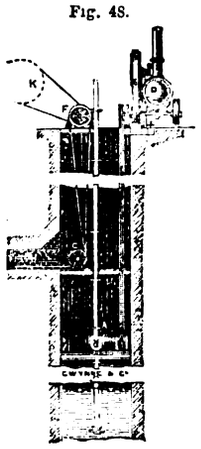
Fig. 39.



GWYNNE & CO 'S PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.

The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be given.

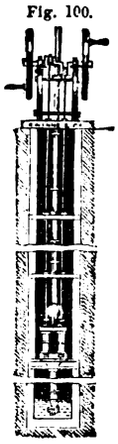
Fig. 48.



GWYNNE & CO.'S IMPROVED PATENT CENTRIFUGAL PUMP.

Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of water.

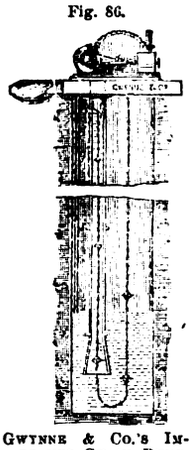
Fig. 100.



GWYNNE & CO.'S IMPROVED DOUBLE-BARREL DEEP WELL PUMP.

For Hand-power, adapted for ordinary wells of any depth, of most careful construction, and on the most approved system.

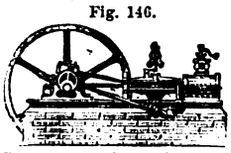
Fig. 86.



GWYNNE & CO.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.

These pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.



GWYNNE & CO.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.

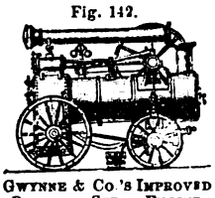
With or without Expansion Gear, for economical working.
From 4 to 100 horse power.

Fig. 154.

GWYNNE & CO.'S IMPROVED COMMISH BOILERS WITH DOUBLE FLUES.

These boilers are simple and compact. They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler.

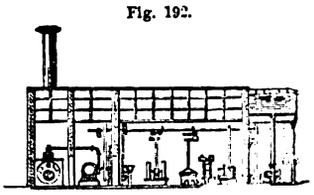
Fig. 142.



GWYNNE & CO.'S IMPROVED PORTABLE STEAM ENGINE.

Light, simple in construction, durable, and economical, and very superior to "Agricultural" Engines.
From 2½ to 30-horse power.

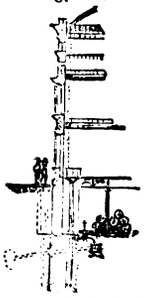
Fig. 192.



GWYNNE & CO.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES, FAT, &C., &C.

The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motive power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added, to lift water, or any purpose required.

Fig. 193.

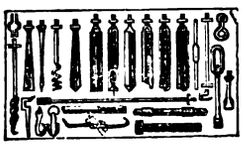


GWYNNE & CO.'S IMPROVED HYDRAULIC LIFTS.

Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine or other produce, into or up from cellars; or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.

Prices on application.

Fig. 121.

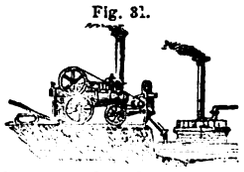


GWYNNE & CO.'S BORING TOOLS.

Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.

G. & Co. can confidently recommend these as the best in the market.

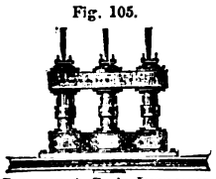
Fig. 31.



GWYNNE & CO.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.

In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made in all sizes.

Fig. 105.



GWYNNE & CO.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.

These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principle.

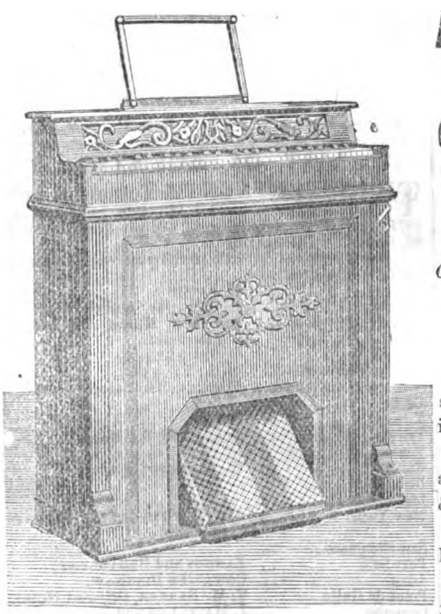
Fig. 207.

GWYNNE & CO.'S IMPROVED DREDGING MACHINERY.

The boat can be constructed so as to draw only 18 inches of water if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable.

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue, with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the World.



ALEXANDRE & FILS,

106, RUE RICHELIEU, PARIS,

ORGAN AND HARMONIUM MANUFACTURERS.

MEDALS AT ALL THE EXHIBITIONS.

Constructed especially for exporting to Hot Climates.

FROM £3 UPWARDS.

No. 19 of the Catalogue is an instrument suitable for a school or a small church. Price, in oak, £3 8s.

No. 75 is an instrument with percussion action, eleven stops, suitable for music halls, &c. Price £30.

No. 52 expresses the sound of a flute, voice, horn, &c. Price, in old oak, £15.

No. 138 imitates the sound of human voice, flute, horn, clarinet, bell, &c. Price £55.

List of prices and specimens of goods to be found at, and orders received by the Agents of the China and Japan Agency.

GRAND HOTEL COMPANY.

HOTEL DE LA VILLE, TRIESTE.

PASSENGERS to and from INDIA CHINA, and JAPAN will find the above Hotel well fitted in every respect. Hot, Cold, Fresh, and Salt-water Baths.

Restaurant, Cafe, and Reading Room with English, French, and German papers, and the *London and China Express*. Omnibus attends the trains.

CHARGES MODERATE.

HOLLOWAY'S OINTMENT

Mr. J. T. COOPER,

In his celebrated TRAVELS IN CHINA, published in 1871, says:—

"I had with me in my travels a quantity of "Holloway's Ointment. I gave some to the people, "and nothing could exceed their gratitude: and, in "consequence—milk, fowls, butter, and horse-feed "poured in upon us, until at last a teaspoonful of "Ointment was worth a fowl and any quantity of "peas, and the demand became so great that I was "obliged to lock up the small remaining stock."

This fine OINTMENT is invaluable in the cure of BAD LEGS, BAD BREASTS, OLD SORES, wounds, ulcers, gout, rheumatism, and all skin diseases.

The MESSAGERIES MARITIMES COMPANY will despatch their steamers from MARSEILLES via the Suez Canal every alternate Sunday at 10 A.M., beginning on Sunday, the 5th of December.

*** Passengers eastward of Suez securing their berths in London are entitled to the conveyance of their luggage free to Marseilles, as explained in the Company's handbooks.

For Passage Rates and Particulars see the Company's handbooks, and apply at the Company's London Head Office, 97, Cannon-street, E.C.; or at the West End Sub-Agency, 51, Pall-mall, S.W.

PRELIMINARY NOTICE.

THE CHINA TRANS-PACIFIC STEAMSHIP COMPANY (LIMITED).

THE new, powerful, and handsomely-fitted iron screw steamers of this Company are intended to resume their trips between San Francisco, Japan, and China at an early date, when it is hoped that their reputation for speed, safety, and comfort will secure them a large share of the increased traffic of the North Pacific.

The "Vancouver" will probably be the first vessel to leave San Francisco, succeeded by the "Vasco de Gama." The "Columbus," to be launched in January, will proceed to Hong Kong and make her first voyage from that port to San Francisco, via Yokohama, and will be followed by other vessels in due course.

Further particulars will be published shortly.

London, St. Michael's-buildings, 9, Gracechurch-street, Nov. 30, 1875.

GLEN LINE OF STEAM PACKETS.—INDIA, CHINA, AND JAPAN.—The undernamed powerful Clyde-built BOATS, specially adapted for the India, China, and Japan trade, are intended to be despatched on these advertised dates for SINGAPORE, HONG KONG, and SHANGHAI, taking goods at through rates for SAIGON, YOKOHAMA, NAGASAKI, and HIOGO:—

TO PARENTS AND GUARDIANS.

AN ENGLISH WIDOW LADY, who has been residing many years on the Continent, is desirous of obtaining two pupils (English) to educate with her own daughters. She offers a comfortable home, and a mother's care, with all the advantages of the best professors and an excellent governess, combined with that of French, English, and German. Is now residing in the neighbourhood of Versailles which abounds with charming walks, where there is an English church, as well as similar cours or classes conducted by the same professors as at Paris. References exchanged.

Address, Madame E. H., Poste Restante, Versailles.

Harding, Mr. W. Ricketts, Mr. J. F. Ricketts, Mr. J. Monicorn, Mr. W. Webber, Mr. W. W. Madden, Lieut. Deacon, Captain and Mrs. Petrie and child. From Singapore: Mrs. Gillingham and three children. To Gibraltar: Mr. J. Gras.

Per steamer *Patroclus* (Holt's line), arrived Dec. 11.—From Hong Kong: Miss Pollock, Mr. F. Schjoth.

PASSENGERS OUTWARD.

Per P. and O. steamer *Bokhara*, from Southampton, Dec. 16.—To Hong Kong Mr. J. Barry, Mr. F. A. Surton. To Ceylon: Mr. E. Corvant, Mr. T. J. Jones.

Per P. and O. steamer *Baroda*, from Brindisi, Dec. 27.—To Singapore: Rev. and Mrs. Aitken.

Per P. and O. steamer *Australia*, from Southampton, Dec. 30.—To Hong Kong: Mr. and Mrs. Samuels. To Singapore: Mr. and Mrs. J. H. Holberton.

Per P. and O. steamer *Baroda*, from Venice, Jan. 7.—To Ceylon: Mr. and Mrs. Delmige.

Per P. and O. steamer *Indus*, from Southampton, Jan. 13.—To Hong Kong: Miss Huffam. To Singapore: Mr. E. B. Gould. To Ceylon: Mr. J. L. Gordon.

Per P. and O. steamer *Poonah*, from Southampton, Jan. 27.—To Hong Kong: Mr. W. C. Johnston. To Ceylon: Mr. H. Heelis.

Per French steamer *Djemnah*, from Marseilles, Dec. 19.—To Yokohama: Mr. Kreitmann, Miss Seymour. To Shanghai: Mr. Godeaux, Mr. Seul, Mr. and Mrs. de Pratt. To Hong Kong: Mr. and Mrs. Pelham Warren. To Batavia: Mr. J. H. Tromp. To Singapore: Mr. James Connell, Mr. Glass, Mr. George Smith. To Galle: Mr. Strand, Mr. G. Walker. To Port Said: Monsr. de Lesseps and family.

Per French steamer *Peiho*, from Marseilles, Jan. 2.—To Hong Kong: Mr. T. Dick. To Singapore: Mr. A. T. Black, Mr. L. R. Glass. To Galle: Mr. Newman, Mr. Austin.

Per French steamer *Tigre*, from Marseilles, Jan. 16.—To Yokohama: Mr. Shinagawa. To Shanghai: Mrs. and Miss Bradfield. To Hong Kong: Mrs. Beazley.

Per French steamer *Hoogly*, from Marseilles, Jan. 30.—To Hong Kong: Mr. and Mrs. Manson.

Per French steamer *Iraouaddy*, from Marseilles, Feb. 13.—To Shanghai: W. A. Turnbull, Mrs. Turnbull. To Hong Kong: Mr. K. Adams. To Batavia: Mr. Chavannes, wife, and family.

Per French steamer *Meikong*, from Marseilles, March 12.—To Hong Kong: Mr. and Mrs. Fairhurst.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present mail brings advices from this port to the 2nd November; the French mail from London Sept. 10, arrived out on the 30th October. The *Japan Mail* supplies the following items of news:—

The *Japan Gazette* states that a telegram has been received from the *Kasuga-kuwan*, at Fusan, stating that the Koreans are raising an army and collecting provisions for war, and that the Japanese residents are protected by the Imperial Marines. On the 14th Oct. a meeting of the *Daijin* and *Sangi* was opened in the Imperial palace, the Mikado presiding in person. Kido was charged with a commission to China to inquire into the Korean question. It is reported that he will leave for China in a few days. One cannon, two matchlocks, four lances, three flags, one sword, one drum, and other things, captured from the Korean fort in the Bay of Koka, have been presented by the *Rikungunsho* to the *Sei-in*.

The resignations of Shimadzu Saburo and Itagaki, recently tendered to the Government, have been accepted. The former has been intriguing to displace the present Prime Minister as head of the Satsuma party, but the Government has resisted his demands and pretensions, and he has accordingly retired from the Cabinet. He is understood to maintain as strongly as ever the anti-foreign views with which his name has been so long associated. The retirement from the Cabinet of these two ministers is the event of the week. Other resignations are spoken of, but without certainty of their truth. Tokio is in a state of disquiet, the police have been increased in number, and certain houses are said to be specially watched and guarded. Civilisation, development, and enlightenment have not yet banished from Japan the idea—not unknown elsewhere, indeed—that assassination is one of the legitimate weapons of political opposition, and so deeply rooted does the custom seem in this country, that it must be many years before the leading men of the nation can feel perfectly safe during even such a crisis as the present. This is a subject to which the newspapers might fairly turn their attention when the present commotion has somewhat subsided.

A number of sportsmen have been stopped by the police in the neighbourhood of Yedo and had to turn back. The police per-

Digitized by Google

formed their unpleasant office with perfect civility but with such firmness as to indicate the resolution of the Government to initiate at once repressive measures. There are grounds for thinking that the right of shooting within Treaty limits may be pleaded by reason of antecedent regulation made by the Government and recognised custom. But the expediency of pressing as a right, and thus placing beyond the reach of regulations, very necessary to prevent its abuse, a privilege which has become such rather through the absence of regulation than by reason of it, is at least an open question. We do not think it well that the Japanese should feel that a privilege liable to grave abuses in thoughtless hands—take the present condition of the country for instance, the paddy full of grain, and the fields swarming with harvesters—should be exercised without their having the power of saying a word about it. This seems to us a violation of natural justice, and all good sportsmen would condemn it as well.

An article appeared in the *Hochi Shimbun* a few days ago accusing the British minister and the British community generally of fomenting the idea of a war with Korea for their own personal and national advantage, as well as a translation of the declaration which appeared this morning in the same journal of the falsehood and slander contained in the charge. A more shameful and absolutely unwarranted attack never was made upon a minister or the community he represented.

The haste of the people of Osaka to adopt the customs of civilisation would seem to have drawn down upon them the serious attentions of a paternal Government. The fluctuations of the rabbit market, it appears, have lost all fascination to speculators. In its place, however, they recently found the requisite excitement in the game of European billiards. But so great has been the spirit of gambling evoked by this dangerous game that it has been found necessary to interdict it altogether.

A company of native *artistes* in the capital have announced their intention of offering a Japanese musical entertainment to Signora Palmieri as a mark of their appreciation of her ability. An extensive hall in Yedo has been selected for the purpose.

The Imperial war-ship *Tsukuba Kam* will shortly proceed to San Francisco, in order to give the cadets of the Naval Department an opportunity of gaining practical experience of their future duties.

A considerable fall in the price of rice in the southern markets indicates not only the possession of an ample harvest, but that peaceful counsels have prevailed.

According to the *Hochi Shimbun*, one of the *sangi* is about to proceed to China on a special mission, having reference to the Korean difficulty.

Several Japanese merchants of Yedo have been arrested for having sold silk worms' egg cards which did not bear the Government stamp, to an Italian dealer.

(LATER INTELLIGENCE, VIA SAN FRANCISCO.)

The steamer *Gaelic* arrived at San Francisco on the 5th inst., with Yokohama advices to the 11th Nov. The subjoined summary of news has been telegraphed to New York:—

A Japanese frigate, commanded by Capt. Ito, has just started on a cruise in American waters. She touches first at San Francisco.

No immediate action will be taken by Japan against Korea. The Government resists the pressure against a sudden assault, but holds itself bound to exact redress in due season, and by a regular and measured process. War, therefore, is not imminent, but possible in the future.

Mori, Vice-Minister of Foreign Affairs, has been appointed as the head of a special Embassy to China, and sails this month. During his absence Sameshima, Envoy to France, now at home on leave, will act as Vice-Minister.

The British Minister in Yedo is making strenuous efforts to prevent the selection of Americans for positions of trust under the Japanese Government.

CHINA.

CHEFOO.

A correspondent of the *North China Herald* writes from this port as follows:—

The British schooner *Catherine Marden* put in here a few days ago to repair damages to her bowsprit, &c., caused by collision with a junk. She brought in some twenty of the junk men, who had taken advantage of the contact to tranship themselves to the English flag. A Court of Inquiry was held at Her Majesty's Consulate on the 25th October, and the facts there elicited showed that the collision took place about sixty miles north of Chefoo, during a dark and rainy night. No light was visible from the junk, and the first warning of danger was the shouts of the junk people right under the vessel's bow. A collision was then inevitable, but as neither was going above three knots, the shock was not serious, and the real damage was caused by the pitching and bumping while the vessels were entangled. The junk-men who got on board the *Catherine Marden* declare that they left because their vessel was more than half full of water, and was sinking, while on the other hand the evidence of the foreigners goes to show that she could not have been injured in the hull, and that she sailed away before the wind, and showed a light burning till it was lost in the distance. Anyhow, they parted company in the darkness and confusion, and the fate of the junk is uncertain. The Court acquitted the captain of all blame, and held the collision to be solely due to the junk not having any proper light. A claim for Tls. 15,000 damages was talked of, but the Taoutai is said to have advised the claimants to go to Shanghai and consult their owners.

Most of the Home papers have a notice of the attack on Mr. Henderson and others at the Promontory, and consider that reparation will, of course, be demanded. Perhaps it will interest your readers to know what reparation has actually been made. Two of the villagers have had twenty blows of the light bamboo, and two others, constables, for not being able to keep the peace, have had forty. The offence of the two latter probably consisted in their having allowed the foreigners to stray outside the lighthouse enclosure at all. It was satisfactorily proved before the *Wei-yuen* who was sent to investigate, first, that the affair was entirely the fault of the foreigners, secondly, that none of the villagers, except these two who had got into a sort of street brawl, had lifted a hand. We were told some time ago, in explanation of the delay in local action, that Li-Hung-Chang had promised H.M.'s Minister that the matter would be properly investigated and settled. If this is his Excellency's notion of a settlement under the very nose, so to speak, of our authorities, it is not difficult, reasoning from small things to great, to make a guess at the probable result of the Yunnan inquiry.

SHANGHAI.

The present mail brings advices from this port to the 5th November; the P. and O. mail from London Sept. 17 was received on the 29th Oct. The following summary of news is from the *North China Herald*:—

We do not know whether Mr. Wade is really contented with the decree published by the Chinese Government about foreigners travelling in the interior; but to our ear, the language in which it is couched is not satisfactory. Issued under the circumstances following the murder of Margary, it might naturally have been expected that the decree would have spoken of the crime with honest blame, and would have urged on the officials of the Empire, in emphatic language, their clear duty as such to maintain order and protect from wrong those living or travelling within their jurisdiction. But so far from this being the case, one cannot help inferring from the tone that it is issued *pro formâ*, in deference to Mr. Wade's wish, but without appreciation of the gravity of the crime to which it casually refers. By an ingenious display of shuffling, the purport of the notification is so twisted that the necessity of foreigners possessing passports and being respectable people, is presented almost more forcibly than the duty of the mandarins to give effect to the Treaty under which those passports are issued. If Mr. Wade knew the Chinese less well than he does it might be supposed that he had overlooked this very important feature of the case. But he does know them, and especially official Chinese, and, under those circumstances, it would have been better if he had insisted on some more explicit statement of the obligations imposed by the treaty; or, better still, the verbatim publication of the full text of the Treaty itself.

We recognise even what has been published as a step gained; the intense disinclination of the Chinese to mention foreigners, or foreign affairs at all, in the *Gazette*, is a proof that they think such recognition will materially affect our status. And we believe the Government does mean its subordinates to read the edict as an order to be more careful of foreigners in future. The consequences of Margary's murder have been so serious that it would willingly avoid further trouble. It is because of this, and because we think these edicts have political importance, that we regret a tone of subdued impertinence not easy to describe, but which leaves a decided feeling of irritation in the mind of the foreign reader, and will certainly not persuade the Chinese that the edicts arise from honesty of purpose, however much political expediency may have rendered necessary their promulgation and observance.

Letters from Hankow state that Mr. Grosvenor's party was to proceed by junk up to Ichang, escorted by two Chinese gunboats. The object of the authorities in sending these vessels is not clear, unless it is intended as an earnest of their desire to show proper attention to the mission. Without any express declaration on the subject, they appear to have allowed it to be understood that the Chinese Government is anxious about its safety and comfort. There had been rumours before Mr. Grosvenor's arrival of serious disturbances along both routes, especially the southern. A town in the province of Kwei-chow was said to be in the hands of rebels. Mr. Grosvenor's line, however, is through Sze-chuen, and according to the latest advices from the interior, it would seem that strict ordors had been issued to the officials of both provinces, Kwei-chow and Sze-chuen, that every attention should be shown him. This is well, so far as it goes.

People have been either intent on racing or away on shooting excursions since the last mail left, and we have consequently

Digitized by Google

very little general news to record. The Race Meeting can hardly be called a successful one; there were too many certainties for good sport. *Teen Kwang* won everything he ran for, in a canter; and by his performances at this and the Spring Meeting has earned for himself a place in Shanghai racing history which is hardly likely to be eclipsed. But several other of the events for which he did not enter, were also won too easily. The third was the best of the regular days, and the "off" fourth day probably the best of all for real amusement. The weather, which was fine and warm on the first day, changed during the night, and the second was cold and wet. It cleared, however, on the following day, and the third and fourth days were dry though chilly.

The annual dinner of the members and friends of the Shanghai Rowing Club took place at the Club on the 27th Oct. About forty were present, the chair being taken by the Commodore, Mr. E. W. Batt, and the vice-chair by Mr. D. Glass (hon. sec.). After an excellent *menu* had been disposed of, the following toasts were proposed—"The Shanghai Rowing Club," by Mr. Batt, responded to by Mr. Westall; "English Crew," by Mr. Eames, responded to by Mr. Lewis; "Scotch Crew," by Mr. Lewis, responded to by Mr. Clarke; "Our Guests," by Mr. Scott, responded to by Mr. MacClymont; "The Ladies," by Mr. Pollock, responded to by Mr. Andrew; "New Members," by Mr. Batt, responded to by Mr. Dowdall; "The Veteran Crew," by Mr. Muller, responded to by Mr. Macleod; "The Three Year-Olds," by Mr. Clarke, responded to by Mr. Sharp; "Sub-Committee," by Mr. Batt, responded to by Mr. Brewer. Two or three other toasts, including that of "The Press," were afterwards given. The room was decorated with festoons of evergreens, and in the centre of the T-table was displayed the Dent Challenge Cup—a massive and appropriate ornament. The toast-list was got through, in consequence of commendably brief speeches, just as the witching hour was about to strike. As usual on such occasions, the speeches were eminently complimentary, tending, as the Chairman pithily expressed it, solely to self-glorification, though, in the case of those before him, glorification well-earned.

Miss Jenny Claus has given her second concert at the Lyceum. The audience was not a good one, but probably this is to be accounted for by the fact of its being the concluding official race day, the evening of which is usually devoted to the interchange of conviviality. The music played by Miss Claus was again of the excellence so fully described in our notice of her first appearance here, and left nothing to be desired by the most fastidious. She was "assisted" vocally by a gentleman amateur, whose singing was very effective.

A cricket match between Kiukiang and Hankow elevens was played at Hankow on the 25th Oct. There was not time to play it out, but Hankow had the best of it, having scored 149 in one innings, against Kiukiang 115 with four wickets down in the second.

A meeting of members of the Shanghai Paper Hunt Club has been called to elect stewards and frame rules for the coming season.

H.M.S. *Egeria* has left for Ningpo.

FOOCHOW.

The subjoined items of news from this port are taken from the *Foochow Herald*:—

It is very satisfactory to learn that every effort towards securing the capture of the remainder of the crew of the *Anna* is being made. Two of the mutineers are in custody, and we understand that the authorities have offered a reward of $600 for the arrest of the other four. The island and village of Se Yang, where the vessel was plundered and destroyed, is in the district of Foo Ning-foo; and we are informed that the provincial officials have been asked to instruct the local officers at Foo Ning to make strict inquiry into the case, with a view to ascertaining what blame, if any, rests with the local mandarin at Se Yang; and, if possible, to identify the islanders who participated in the outrage. This, we understand, has been done. We further learn that the German gunboat *Cyclop* left this port yesterday morning, for a point on the coast near to Foo Ning, to co-operate with the officials instituting the necessary inquiry. The commander of the gunboat has been supplied with duplicates of the orders issued by the superior mandarins at this port.

On the 30th Oct. there was considerable stir amongst the native population, the occasion being the half-yearly procession of devils. These harmless monsters, after having been duly paraded, were installed in their respective temples, where they will remain, we understand, until the approach of the hot weather suggests to their custodians the propriety of giving them a bath and a little fresh air.

The triennial examination of military aspirants for the Chinese service, to the number of over four thousand, is now going on under the presidency of H.E. the Viceroy. The examination commenced on the 4th day of the Chinese moon, and will conclude, so far as the South Camp is concerned, on the 6th Nov., after which date the exercises will be continued in another place set apart for the purpose.

The German gun-boat *Cyclop*, which has recently visited us, is, we believe, the first war vessel flying the German flag that has anchored at the Settlement. She is a vessel of 350 tons, drawing only eight feet of water, and has been specially built for service on the China coast. Her armament consists of four "Krupp" guns and two "Balloon" guns (invented during the siege of Paris, to act against balloons.) She carries a crew of sixty-five men (all told) including the officers—seven in number. The arrangements for the comfort of both officers and men are very effective, taking into consideration the size of the vessel. We may mention that the small-arms consist of new, and greatly superior "Mauser" rifles.

The total number of soldiers present at the South Camp is one thousand, viz.—500 foreign drilled troops, and 500 Gingal men. All the Honan and other troops have been removed. On the 1st Nov. an alarm of fire was given at about ten P.M. at the Camp. No 4 company of Capt. McMahon's troops were called out, but for some unexplained cause were not allowed to attend, and the Gingal "Fire Brigade," with their buckets, &c., were sent in their stead. We did not hear the result of their operations, but judging from their general warlike appearance, they are not likely to have been great fire-eaters.

In connection with the Customs Notification in regard to the Ockseu Lighthouse, we may mention that the s.s. *Hailoong* was chartered a few days ago by the Commissioner of Customs at Amoy to convey the new apparatus from that port to Ockseu, and we understand that the Engineer-in-Chief will personally superintend its erection.

It has been decided by the committee of the Foochow Rowing Club to hold a regatta on the 18th November. The racecourse is now in the hands of the stewards, but training has not been fairly commenced.

The Chinese corvette *Yang Woo* has arrived here, under the command of Captain Tracey, R.N. It is understood that after visiting Shanghai, Chefoo, and Tientsin, she will proceed to Japan.

HONG KONG.

Our advices by this mail extend to the 11th November; the French mail from London Sept. 24 was received on the 6th Nov., and the following P. and O. mail of Oct. 1 arrived out on the 8th Nov. The following items of news are from the *China Mail*:—

A telegram was received on the 10th Nov. from Amoy by Messrs. Butterfield and Swire, the agents of the steamer *Glengyle* (Captain Carnell), announcing the total loss of that vessel at 9 A.M. on the 9th Nov. She was bound to Swatow, and struck on an unknown rock in Three Chimney Bluffs Passage, S.E. of Namoa Island. The rock is supposed to be the same as that the *Madras* struck on. The captain third officer and fourth engineer are missing. The rest of the crew and passengers made for Swatow. The vessel sank in seven minutes from the time of striking, in fifteen fathoms water, her topmast heads alone showing where she lies.

The loss of the *Glengyle* affords another illustration of the necessity upon which we have so often insisted of a thorough resurvey of the coast. The natural distress caused by such a disaster is aggravated by the intelligence that three lives have also, in all probability, been sacrificed,—lives which, together with a valuable vessel, would have been saved had somewhat more attention been paid by the most anti-progressive of departments to the strong representations made by the British and American Naval Commanders-in-Chief on the Station, the Chambers of Commerce, and the public press. It is but a few weeks since we had occasion to write in a similar strain regarding the striking of another fine steamer on an unknown rock in Haitan Straits. This fresh disaster but confirms what we then wrote — that the coast of China is not yet properly surveyed, and that frequent losses may be looked for until it is. There is, we know, a difficulty in getting up anything like public action on most matters in Hong Kong, but we think we can offer a suggestion which will effectually secure a very strong movement on the part of the public. Let the insurance offices double their rates until a proper survey is taken in hand, and we are much mistaken if a few memorials on the subject would not very speedily find their way to the home Government. Over half-a-dozen unknown rocks on the coast between this and Shanghai bear the names of vessels sacrificed in almost every case to ensure their discovery. Taking the mean value, with cargo, &c., in each case to be £100,000 —a decided under-estimate—the cost of this way of surveying is, it will be seen, considerably in excess of the expense of maintaining a couple of surveying ships for the necessary period. We say nothing of the loss of life, as we are putting the matter only from a commercial point of view. But it is possible—we hardly venture to say probable—that this consideration may have some weight in urging forward a speedy and effective survey.

An anonymous placard was posted on the walls of the Chinese town on the 6th Nov., stating that one Chung Shun Yee had been fraudulently obtaining coolies in order to sell them; that he had secretly collected over 500 men and lodged them at Sai-

Digitized by Google

yingpoon ; that these men, though ostensibly intended for Tonquin, were in reality for transhipment at that place and transmission to elsewhere as Chu-chais ; and that foolish people were induced to leave their homes and ship in a vessel that was to leave on the morning of the 7th Nov. The anonymous writer appealed to the Tung Wah Hospital in most sympathetic terms, begging the members thereof to rescue the 500 odd souls. This placard was brought to the notice of the Chinese Hospital late on the evening of the 6th. The next morning at seven A.M. a few of the committee had an interview with the Hon. C. C. Smith and the Registrar General, the result being some action taken by the Government. The Assistant Harbour Master, assisted by the officers necessary, examined the emigrants, and, as alleged, found everything in order. This was deemed to be perfectly satisfactory ; and as the vessel (the steamer *Fyen*) had been cleared on the 6th, the steamer was about to leave. The unusual action taken, however, seems to have frightened the Chinese passengers, and most of the emigrants finally left the steamer, and refused to go. The *Fyen* is consequently detained from prosecuting her voyage, and further difficulties may thus be raised on the part of her owners, Messrs. Landstein and Co.

It has been ascertained that two men (as alleged by the coolies themselves)—one Chung Shun Yee, an employé in the Yuen Fat Hong, and the other Woo Lin Tak, an employé in the Wo Tai Hong—were the prime movers in this scheme of emigration. The two men, however, positively denied that they had any knowledge of the whole affair or of the coolies. The masters of the two hongs also denied any complicity or even connivance in the matter. It has also appeared that the sub-agents employed by their principals in obtaining the men ran away the moment they heard of any trouble being likely to follow. One of them had $5,000 entrusted to him by his principals, for distribution to the emigrants as advances after embarkation but prior to the departure of the steamer, disappeared with the money. The coolies said they were engaged for Tonquin at $6 a month for two years ; that contracts were to be entered into after the steamer had set sail; that they were to have $10 advanced, but that they understood the advance to be $16, and they believed those engaged in the business would get the balance as profits. The coolies, according to their story, were furnished with money to buy food during the time before they were embarked.

Intelligence of the murder of Mr. Birch at Perak has been received. H.M.'s ship *Ringdove* has, we learn, gone in the first instance to Manila, where she will hand despatches to H.M.S. *Modeste*, and that vessel will accompany her to Perak. H.M.S. *Egeria* was to leave at daylight on the 11th Nov. for the last-named place, and 300 men of the 80th Regiment, with Major-General Colborne, C.B., Captain Huskisson, A.D.C., Majors Amier and Tyler, Captains Creagh and Howard, Lieutenants Walmsley, Cole, Sheppard and Prior, Surgeon L'Estrange, and Commissaries Johnston and Skinner, go forward by the present mail steamer.

The s.s. *Albay*, owned by Messrs. Russell and Sturgis, of Manila, which came to grief near Lapraik's Wharf in the typhoon of 1874, made a trial trip on the 6th, for the purpose of testing her engines. The vessel has been repaired under contract by the Hong Kong and Whampoa Dock Company for the sum of $32,000, the contractors having engaged to renew all cabin fittings, &c., in a most substantial and tasteful manner. That this undertaking has been faithfully carried out is a credit to the Dock Company and its employés, and proves that Hong Kong is probably the best and cheapest market for such work of any place outside of Europe. A new stern-post was forged for the *Albay*, as well as a new propeller. The ceilings and skin of the hull had to be cleaned and painted ; the whole of the internal fittings had to be renewed, after the manner of the home building yards. The engines had to be taken to pieces and refitted, all missing and damaged portions being replaced or repaired ; a new funnel had to be provided, and the original engines restored to their former state of perfection.

On the 6th Nov. it became necessary to let the water into the Hope Dock at Aberdeen, where the *Alva* is being repaired. She rose quietly off the blocks before the caisson rose up. All seemed to be going on properly, but presently she began to list over to port as the water lifted her higher up, and she gradually went on to her beam ends as far as her yards would allow. She then filled and rested on the dock steps. It is not supposed that much damage is done; some stores and provisions, &c., were spoiled by the water, and the false keel was damaged, but she is still on the dock blocks. It will only cause a little delay, and the Dock Company will make the damage good.

The British barque *Gloucester* on her arrival on the 29th Oct. anchored close ahead of the Water Police Chop. As it was blowing hard at the time she drifted down on the port bow of the chop, her anchor not having held properly. She smashed the chop's cathead, head gear and one of the boats on the davits; she was then got clear with but little damage. The steam-tug *Pilot Fish* towed her off to her berth.

In the list of passengers who left by the last French mail we notice the name of Mr. Richard Deacon, so long and so popularly known in Hong Kong. Few residents have a larger circle of well wishers, and we can heartily add our own hopes that he will have a pleasant passage home. The Canton Steamboat Company's wharf was decorated in honour of the occasion.

Three recently built verandahs at Nos. 297, 299, and 301, Queen's-road West came down on the 29th Oct. with a crash. Thanks to the intelligence of the Sikh and Chinese policemen on duty, the numerous passers-by had timely warning, and nobody was injured. The constables in question should have some notice taken of the good sense they displayed.

The following was the average amount of Bank notes in circulation in Hong Kong during the month ending Oct. 31, as published in the *Gazette* :—

Banks.	Average Amount.	Specie in Reserve.
Oriental Bank Corporation ...	$489,875	$200,000
Chartered Mercantile Bank of India, London, and China ...	580,078	200,000
Chartered Bank of India, Australia, and China	512,858	175,000
Hong Kong and Shanghai Banking Corporation	1,455,598	500,000
Total	$3,038,409	$1,075,000

On the night of the 29th Oct. a house situated in one of the by-lanes in Yan Tsai Tai Kai, Canton, the street in which Dr. Kerr's Hospital is also situated, was attacked by a party of armed men, who were reported to have numbered as many as thirty. They broke into the house and carried away everything portable. The missing property was estimated at $600. A man was arrested, but it is believed he was not the actual thief.

We hear that the Hoppo of Canton has, within the last six months, seized over 200 Chinese junks, and realised something like $800,000 from their confiscation, together with their cargoes and from fines in lieu of confiscation in some cases. A nice pile o make indeed, in a few months !

The examination for the military degree of *Chu jen* is now going on at Canton. The examination for the civil degree of *Siu-tsai* takes place simultaneously. Consequently the population in the provincial city is greatly augmented at the present moment.

Considerable comment has been excited by the action of the Tung Wah Hospital Committee in stopping the passenger traffic to Haipoong (Tonquin) by means of their representations. The action of the Committee is generally thought to savour of an undue interference with the authority of the local government.

The Norwegian and Swedish vessels in port were tastefully dressed on the 4th Nov. with flags, in honour of the sixty-first anniversary of the ratification of the union of the two kingdoms.

The attempt to induce free emigration to Atchin has been abandoned.

SIAM.

—o—

BANGKOK.

The Siam *Advertiser* says :—We learn that another detachment of Siamese forces, under the command of H.E. Chow Phya P'utarapai, has left Bangkok. All parties in Siam can feel no other than an earnest desire that this expedition to put down the disturbers of the peace in the North may prove a complete success.

Capt. A. J. Loftus, in the Siamese Government, employed as surveyor, is under orders to proceed soon to Ligore to complete his survey of the Siamese coast on the Malayan Peninsula. We wish the expedition every success.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present P. and O. mail brings advices from this port to the 17th Nov.; the French mail from London Oct. 15 arrived out on the 14th Nov. We take the following items of intelligence from the *Straits Times* :—

On the 11th Nov. the Governor returned from Perak in the steamer *Minister van Staat Rochussen*, accompanied by Captain Paton, A.D.C., and Lieut. McCallum, H.E.'s private secretary. We learn that on H.E.'s arrival at the mouth of the Perak River Sultan Abdullah and the Lacksamana voluntarily came on board to assure him that they had had no part in the attack on Mr. Birch, and knew nothing about it until after it had taken place. From all that can be learned, it would seem that the assassination of Mr. Birch was unpremeditated. He, accompanied by his interpreter and a small body-guard, had been posting up the proclamations printed in the Malay language, all the way up the river, until he came to Rajah Lelah's place, where, as usual, he sent Arshad, the interpreter, to post up copies of the proclamation. Rajah Lelah had all along shown a spirit of hostility to the British Government, but there seemed no reason to apprehend immediate danger, and Mr. Birch had dined in his boat, afterwards going to bathe in a floating bath. Meantime, Arshad had posted up one of the proclamations, which was torn down ; he then posted another, which being also torn down by a Malay, he struck the man with a cane. This so enraged the Malay that he drew his kris and stabbed Arshad in the stomach. This act of open hostility by

Digitized by Google

one of their number aroused the dormant passions of the crowd, and a rush was at once made for the bath, where, the sentry being overpowered, Mr. Birch was murdered. Lieutenant Abbott, of H.M.S. *Thistle*, who went with Mr. Birch, had gone out shooting, and had been absent three hours, when as he was about to return he met a Malay, who told him that there was a disturbance, and advised him to secrete himself. Lieutenant Abbott instantly determined, however, not to desert a friend in peril, and made the best of his way towards the village, but in order to save himself was obliged to spring into a boat and put out into the river, where he was fired upon from the banks for a long distance on his way down, luckily without effect. He saw Mr. Birch's boat, with the dead body of the interpreter in it, the remainder of Mr. Birch's party having evidently pushed their boat out into the stream at the first outbreak. Mr. Swettenham had been further up the river, also posting proclamations, but coming down past the village and stockade was providentially hidden from view by a fog, which settled over the river, enabling him to pass without being observed.

The body of Malays assembled about the Residency when Captain Innes and the party of troops arrived from Penang proved not to be hostile, being forces collected by Sultan Abdullah and the Lacksamana, who came up with proffers of support to Mr. Swettenham and Lieut. Abbott. These officers, however, rightly deemed the presence of so large a body of Malays about the Residency unadvisable, as, though then friendly, a rebellious spirit might at any time manifest itself among their followers, and at all events speedy information of everything that was going on would be sure to be conveyed to the hostile party. They therefore succeeded in inducing the leaders to withdraw their forces and return to their homes. Captain Innes, with his little force, after getting into the Residency, went up the river to the place where Mr. Birch was murdered, with the object of making a show of force and of recovering Mr. Birch's body. They found a stockade, which Captain Innes decided to storm. He therefore landed his force and led the attack in person, but while waving his sword and leading on his troops he was shot through the heart; Lieutenants Elliot and Booth were also shot down, and eight men of the 10th were wounded. The Malays must have had keen marksmen among them, who singled out the officers of the storming party with such effect. Being thus without a leader, the party of troops had no option but to retire, taking care, however, to carry off the body of Captain Innes, and the wounded men. The Malays seem to have lost heart also, probably fearing some further manœuvre, for at the same time the troops were retiring they evacuated the stockade. Lieut. Elliot was severely wounded, but we are glad to learn was progressing favourably when H.E. the Governor left. When the *M. V. S. Rochussen* left, the residency was garrisoned by the force sent from Penang and Singapore, and the two gunboats *Thistle* and *Fly* were anchored some miles lower down the river, communication being kept up by means of steam launches.

H. E. the Governor at once telegraphed from Penang to Hong Kong and home, with the result that Major-General Colborne and 300 officers and men of the 80th have arrived here from Hong Kong by the present mail steamer, and H.M.S. *Ringdove* and *Egeria* have been ordered from China to this station, the Naval Force being further strengthened by H.M.S. *Modeste*, just arrived, which with the *Thistle* and *Fly*, now at Perak, will make a very respectable show of strength. We learn by telegraph that 1,000 native troops are also under orders from Calcutta, and an auxiliary force of natives is being recruited here. There are no means as yet of learning the extent of the revolt, but the treacherous and sudden attack upon Mr. Birch, and the subsequent death of Captain Innes and wounding of the officers, shows that it is useless to attempt to do anything without a sufficient force to overawe the turbulent and piratical chiefs, who appear to think they can make and break treaties and murder British officers according to the whim of a moment. It is therefore intended to make an imposing demonstration, and to prepare for a regular campaign, the necessity for which will very probably be averted by the completeness of the arrangements.

The manner in which the Governor has acted on this occasion, the immediate despatch of all available force, and a personal visit to Perak as soon as he received the intelligence, have met with the warmest appreciation here. He has taken the quickest method to convince the whole Peninsula in an unmistakable manner that former forbearance was no proof of inability to act, and the interests of the public of this colony are too much bound up in the success of his enterprise not to render all the aid and encouragement in their power.

Consequent upon the murder of Mr. Birch, considerable anxiety was felt for Mr. J. G. Davidson, the Resident at Klang, who had gone into the interior of Langat in pursuit of some evil-disposed persons who were endeavouring to foment disturbances, and had not been heard from for some days. On the 15th Nov., however, despatches were received from Mr. Davidson, who gave a very encouraging report, he having succeeded in arresting a ringleader without opposition. He had, moreover, been supplied with provisions by a Rajah who had been suspected of antagonism.

The telegraph cable between Singapore and Batavia has been undergoing repair for some days, a break in the communication to repair one fault being only followed by another to repair other faults. Before the repair of this cable was completed there was a complete break between Penang and Madras, at once cutting us off from telegraphic communication with India and Europe. The rapid deterioration of the cables in these waters is due to the ravages of insects or worms, of what description is unknown, which penetrate through the wire and inner coating and eat away the gutta-percha core of the cable, exposing the electric wire to the water. The land lines, which are also laid under ground, are destroyed in a similar manner by white ants. The destruction of the submarine cables by insects offers a capital opportunity for inventors to discover an antidote.

Scarcely has the *Hawk* coolie mutiny case been disposed of before we have to chronicle another similar case, with the difference that this time the crime of murder will be added to the charge. On the 5th Nov. the schooner *Liberty* left this port with twenty-eight Chinese coolies, who had been engaged through a mercantile firm here for service in Delhi, advances on their salaries being paid to the contractor and acknowledged by the coolies. The schooner was brought back to Singapore, but half of the crew (three Arabs and two Klings) were missing. It now appears that the Nacodah and the missing five men have been murdered. Inspector Richards was sent down to Batu Pahat, in the steamer *Johore*, to make inquiries, and learning that some strange Chinese had gone into the jungle, went in search of them. He succeeded in getting six of them, who were taken in charge by the Johore police, and their extradition will be applied for by this Government. On his way back to Singapore Mr. Richards overhauled a tongkang, in which he found two of the recreant Chinamen secreted, and took them in charge. Another has been arrested in Singapore. One of the prisoners confesses that the Nacodah and four men were murdered and their bodies thrown overboard.

CEYLON.

(FROM A CORRESPONDENT.)

The whole of Ceylon is astir in expectation of the early visit of H.R.H. the Prince of Wales. Twice has his arrival date been put forward, owing to alterations in the programme of his tour. First, he was to be here on Dec. 11, remaining till 18th, visiting Kandy and Trincomalie after Colombo, and doing some shooting in the interior; then Trincomalie was to be dropped, and we were only to have him five days. Now we are told that his plans are again changed, and he is to arrive here about the 2nd proximo, and remain till probably the 12th or 15th, not certain which. Meantime Trincomalie, the finest harbour in the world, is to be left unvisited. Madras is also to be left out in the cold, as it seems cholera is raging there, and it would never do for the heir to the greatest empire under the sun to incur the risk of falling a victim to such a foul disease. The Prince's visit being thus anticipated has put vigour into the preparations for his reception, which will be a very brilliant affair; for although our small island cannot cope with the large and wealthy presidency towns of India, or with the pomp and glitter of barbaric Oriental nations, not a more loyal people will be met in all his travels, nor will a warmer reception be accorded him. White-washing of houses, ornamentation of streets, erection of arches, and pandals, and splendid illuminations are in store for our Royal visitor. A procession, consisting of upwards of 100 tame elephants, is to be held in his honour in the ancient capital of the Island. The interval between the 3rd December, when he is expected to reach Kandy, and the 10th, when he returns to Colombo, is to be spent among the elephants and other wild beasts about Ruanwelle. It is expected he will have in that quarter some excellent sport, besides witnessing, if time permit, an elephant kraal. At Colombo he will lay the foundation stone of the new harbour, and altogether during his short visit to the Spicy Isle his time is expected to be very fully occupied. In Kandy the Chetties have assessed themselves 35s. each boritigul, to provide their share of the expenses, and of which fund they have undertaken the ornamentation of the drive round the Kandy Lake and Esplanade. The Moors have taken another portion of the streets, and the Kandyans are showing their usual adaptness at the the erection of some very showy pandals. The self assessment system among the Chetties, I believe, has by custom gained the force of law; and our Chetty, though he may be poorer than his neighbours, dare not refuse to pay the sum his brethren have assessed him at. Then our ambulations consist chiefly of bamboo arches on both sides of the roadway, with an upright round post between every two arches. This upright post is covered in ribbon form with strips of red, white, and blue calico. In fact, they look as like barber's poles as anything we can imagine, while the arches are being adorned with mosses, flowers, and evergreens. It is not difficult getting evergreens here, where growth is perpetual and where every plant, shrub, or tree is always green. These arches and other surroundings of the lake and principal streets will have during the day a very picturesque effect; while at night the illuminations, both public and private, are expected to be very fine. There is to be in the ancient capital took a reception given to the Kandyan Chiefs, for which pur-

Digitized by Google

pose a temporary addition to the former audience hall of the knights—now the Supreme Court—has been erected. There cannot be a doubt but it will be a very exciting time; for the whole of the island is agog with expectation, and the native population are especially agape to witness the arrival of the first British Prince that ever trod their soil or paid them a visit. The more highly will they appreciate the honour that he is a Prince who in all human probabilities will one day sway the sceptre over the extended territory now under the blessed and benign sovereignty of good Queen Victoria.

Commercial Report.

(For dates see first page.)

IMPORTS.

TIENTSIN.—Common Shirtings and T-Cloths were in slight demand, other goods remaining very dull.

HANKOW.—The business has been trifling, 8¼lbs. Grey Shirtings had changed hands at a slight decline. A few T-Cloths had also been sold. Woollens nominal, except Long Ells, of which a small sale had established a lower rate.

KIUKIANG.—Black Teas: No settlements reported. Total arrivals, 177,038 chests. Green Teas: Total arrivals, 110,404 half-chests.

SHANGHAI.—The Chamber of Commerce Circular says:—Cottons generally have declined in value with a very small business doing. During the past week there have been partial holidays, and most offices have been more or less closed. Common Grey Shirtings have been in slight demand, and lower quotations have been established. For better classes the price is nominally the same, but scarcely any sales are reported. White Shirtings: Small sales have been made at from previous prices to a slight decline. American Drills are weak, with little demand. American Jeans are out of stock and quotations nominal. American Sheetings very quiet at previous rates. English Drills: The stock of good makes is low, and prices are nominally unaltered, but commoner qualities are lower, with little inquiry. In English Jeans, some sales have been made at a considerable decline on previous prices. For Sheetings there is no demand. Dutch Drills are saleable at lower quotations. Dutch Jeans are unchanged in price, but transactions reported are unimportant. T-Cloths of all weights are weaker, with an inactive market. Fancy Cottons: Dyed Assorted Spots and Brocades are reduced in value. Turkey Reds being also rather cheaper. Other Fancy Goods are nominally unchanged, but transactions are confined within the smallest possible compass. Woollens: Lastings are easier, other Woollens being quoted about the same rates as at the departure of the last English mail. Sales have been chiefly at auction.

HONG KONG.—The demand for Yarns last noted had continued, and prices were firm. In Piece Goods there had been little doing, and there was scarcely any demand.

BATAVIA.—Owing to the occurrence of the Native New Year holidays business had been at a standstill.

SINGAPORE.—Business in imports had again been upon a comparatively limited scale—some improvement in demand had nevertheless been observable, compared with the preceding fortnight, and this especially towards the close. Quotations were very little changed; importers had made some efforts to obtain better prices for various staple goods, but whenever a demand of any moment had appeared there had been willing sellers at rates quite as low as last reported.

PENANG.—During the fortnight the market had been extremely depressed, with scarcely any demand for any description of goods; sales had been meagre and prices were weak.

EXPORTS.

TEA.

HANKOW.—Messrs. Evans, Pugh and Co.'s Report says:—We issued our last Report on the 1st Oct. During the four weeks that have elapsed since that date the business transacted at this port has been on a trifling scale, only about 5,000 chests having been settled on this market, and about 11,000 chests shipped to Shanghai on Chinese account. There is now but little more Tea to come forward, and the season being practically at an end, we shall discontinue the issue of this Report. Prices during the past month, in consequence of advices of high rates paid in Shanghai, have advanced fully a tael a picul. The quality of the Teas now offering being, as usual at this late period, very inferior. The export of Hankow Teas per Customs Returns is now 54,749,255 lbs., against 53,660,000 lbs. in 1874 to date, and 54,134,467 lbs. at the close of that season. Quotations are:—For second and third crop Oopacks Tls. 12 to 15, against Tls. 12.50 to 15 at same date last season, and Oonahms Tls. 10 to 11, against Tls. 11.50 to 13. Settlements to date are 412,605 chests, against 334,476 chests in 1874, exclusive of Ningchows, say about 138,020 half-chests; this against 133,600 half-chests last year. The following is a comparative statement of the export hence:—1875-76, 63,835,647 lbs.; 1874-75, 61,969,393 lbs.; 1873-74, 60,405,056 lbs.; 1872-73, 59,515,039 lbs.; 1871-72, 59,069,006 lbs.; 1870-71, 47,003,320 lbs.

SHANGHAI.—Black: Settlements for the fortnight had been small; full prices had been paid; stock, 9,200 chests. Green: A fair demand had existed for Country Teas at prices which were much the same as those last reported. Arrivals from the country had kept the stock well replenished. A large business had been done in Pingsueys, considering the time of year. The following were about the prices paid:—For Country Tea, 16,921 half-chests at Tls. 22.5 to 33 per picul; Pingsuey, 13,397 half-chests at Tls. 14 to 37 per picul; Local-packed, 439 half-chests at Tls. 20.25 per picul. Stock, 97,000 half-chests.

AMOY.—Amoy Oolongs: Transactions had been confined to the settlement of 1,800 half-chests Cargo Grades at previous prices. Amoy Congous: The purchase of 8,000 half-chests inferior leaf at $11¼ to 13 had almost cleared the market, and the season for this description was considered as virtually at an end. Formosa Oolongs: Settlements aggregated 8,502 half-chests; fine to choice quality had commanded full rates, while cargo grades were in less request. Arrivals to date are, Amoy Congou, 74,761 half-chests; Amoy Oolong, 90,409 half-chests. Settlements, Amoy Congou, 71,804 half-chests; Amoy Oolong, 22,024 half-chests.

CANTON.—Messrs. Deacon and Co.'s report says:—Ttansactions in tea, during the fortnight, have been on a more moderate scale, business having been restricted in a great measure by the extreme demands of teamen. Congous: A few settlements are reported on this market at former rates; shipments still go forward from Macao, and comprise many low common teas. Scented Teas: Capers have continued in demand, but it has been most difficult to do business owing to the excessive prices asked by teamen; holders of leaf are firm in their endeavours to recoup themselves for the high cost in the country, and are unwilling to realise at such prices as will enable teamen to pack the leaf to sell in accordance with the offers made by foreigners. Prices of a fortnight ago have been well maintained, and we can quote no decline in any grades, but rather a hardening tendency. A few settlements of "long leaf" Pekoes are reported at unaltered rates; "new make" kinds are still in very scanty supply. Canton Greens: The only transaction to report is 740 boxes Imperial. The following is a summary of the fortnight's business:—Congou, 1,000 boxes at Tls. 18 to 19 per picul; Scented Caper, 11,000 boxes at Tls. 19 to 26 per picul: Scented Orange Pekoe, 2,000 boxes at Tls. 21 to 30 per picul; Imperial, 740 boxes at Tls. 18 per picul.

SILK.

SHANGHAI.—The Chamber of Commerce Circular says:—The business for the fortnight has been on a fair scale, the bulk of it having been transacted in the earlier week. Holders have had rather the advantage of buyers, and purchases show somewhat worse value, although not sufficiently so, to necessitate any change in quotations. The stock shows some diminution, and arrivals are now coming in on a small scale, so that the belief gains ground that the export will be decidedly under that of last year. The bulk of the business has been in market Tsatlees from Tls. 295 to 310, but Kiahings continue to be regarded with much favour, and Li-kung-mow has sold his Eagle Chop at Tls. 330 for No. 1, and Tls. 310 for No. 2. Woosieh Taysaams have been taken at Tls. 235, and, amongst the market chops of Tsatlees may be mentioned Yellow Elephant at Tls. 302½; SSS Dollar chop, Tls. 295; Buffalo chop, Tls. 330, and Pagoda, Tls. 322½. Settlements for the fortnight, Chinas, 3,400 bales. Total settlements since June 1, 1875, 44,200 bales, against 1874-75, 53,500 bales; 1873-74, 38,800 bales. Comparative unsold stock on this market, at date 1875, 13,000 bales; 1874, 13,000 bales; 1873, 7,500 bales. The present steamer is expected to take 700 bales.

CANTON.—At no period of the present season had there been such inactivity. 220 bales were purchased for French mail, and only 34 bales had since been taken. The apathy of foreigners had not yet affected the tone of the market, and quotations for all descriptions were nominally unchanged. About 100 bales of sixth crop had arrived from the country. As regards quality generally, the Silk compared favourably with that of previous yield, but the size was evidently rather full and mixed.

SHIP REPORT.

Captain Branthwaite, of the ship Belted Will, 812 tons, from London Nov. 12, for Hong Kong, with a general cargo, reports:—On Sunday, the 21st, at noon, tide being half flood, weather thick, with hail and sleet, wind N.E., blowing a strong breeze, the ship had arrived off the Tongue Sands. The vessel was in charge of Mumford, Trinity pilot, who had taken charge of the vessel from the commencement of the voyage. Deponent was on deck at the wheel. The pilot was stationed on the poop deck. All hands were on deck working the vessel. She was under topsails, foresail, jib, spanker, and maintopgallant-sail. From the position where the pilot was stationed he had a clear view over the vessel's bows and all round the horizon. There were no sails or gear to obstruct his view. The vessel was on the port tack. At about 11.55 A.M. the pilot ordered the lead to be hove. Deponent hove the lead, and reported four fathoms. The sea was running very high. The Tongue Lightship was in sight, bearing about N.E., nearly abeam, and a quarter to half a mile distant. Objects could be seen from about two to three miles distant, At about 11.45 A.M. the pilot had directed the second officer, R. Davidson, to prepare for tacking the vessel. Almost immediately after the lead was hove the pilot gave orders to put the vessel about, and deponent put the helm hard down. The vessel, however, missed stays, her head fell off to the southward, and she struck the ground, dragging over the sands into twelve fathoms water. She bumped heavily four times in passing over. The pilot informed deponent that the vessel had passed over the extreme end of the Tongue Sands. All sails were taken in, the starboard anchor let go, and veered to 45 fathoms. The pumps were sounded, and two feet of water found, and she made about 4 inches an hour. The steamtug Lord Warden crme within hailing distance, and agreed to tow the vessel back to Gravesend for £250. When the tow-line was secured, the cable was hove in to the 45 shackle, abaft the windlass. As the vessel was in a dangerous position, and pitching heavily, it was deemed prudent to slip at the shackle, and she then proceeded in tow to Gravesend, being subsequently towed to London, arriving in the South West India Docks at about 8 P.M. on the 22nd. The cargo has been discharged, and the vessel is now undergoing repairs.

TELEGRAMS FROM THE FAR EAST.

THE CHINESE EMBASSY TO ENGLAND.

SHANGHAI, DEC. 12.—The Chinese Government has determined to postpone sending an Embassy to England until next summer.

THE DISTURBANCES IN PERAK.

(COLONIAL-OFFICE TELEGRAMS.)

PENANG, DEC. 14.—Gallant attack on 7th by 80 10th Regiment, 80 irregulars, 40 police, on Malays who had invaded Sungie Ujong, and fortified themselves by stockade within five miles of Residency. Number of Malays variously estimated from 400 to 800. After hard fight our force charged enemy, who fled routed, 60 to 80 killed and wounded; of 10th, 2 killed, 13 wounded; irregulars, 5 killed, 10 wounded; police, 1 killed, 2 wounded. Malacca and Sungie Ujong reinforced by Ghoorkas and artillery. General Colborne moving up Perak River with 300 men, between Passir Sala and Blanja, leaving 200 at Bandar Bahru and a detachment Passir Sala. Brigadier Ross from India at Qualla Kangsa and thereabout with 600. In Perak troops at present meeting with no opposition. Maharajah Lela said to be at Blanja. Salangore quiet. No more troops wanted at present.

PENANG, DEC. 17.—Troops and blue-jackets moving up Perak River, reached Blanja 13th without opposition. At every place white flag hoisted on our approach. Ismail and his party had left Blanja for Kinta by jungle-path; troops followed. When three miles from Blanja Dr. Randall shot through thigh. Result of advance on Kinta not yet known.

(TIMES' TELEGRAM.)

PENANG, DEC. 18.— Brigadier Ross's column's were stopped for want of transport. Two hundred of the Buffs proceed to Malacca. There is no official news concerning Ismail's stronghold. The Chinese report it taken. Brigadier Ross received a note from General Colborn asking for reinforcements to attack Ismail. Provisions are scarce. General Colborne has retired to Blanja, awaiting provisions and reinforcements.

THE CHINESE MARITIME CUSTOMS.

SHANGHAI, DEC. 15.—It is reported that Mr. Robert Hart is about to retire from the post which he holds under the Imperial Government as Inepector-General of Maritime Customs, and will be replaced by a native official.

THE MISSION TO YUNNAN.

SHANGHAI, DEC. 16.—Mr. Grosvenor's mission to Yunnan has passed Ichang safely, and has, so far, been everywhere respectfully treated.

THE AMERICAN MINISTER AT PEKING.

WASHINGTON, DEC. 17.—Mr. G. F. Seward, Consul-general at Shanghai, has been appointed Minister Plenipotentiary of the United States at Peking.

CHINA MARKET REPORTS.

(REUTER'S TELEGRAMS.)

SHANGHAI, DEC. 12.—Cotton goods dull; 8¼ lbs., Grey Shirtings Tls. 1.8.8. Tea: good demand for fine, inferior, and medium neglected. Silk: steady, red peacock, Tls. 315.

HONG KONG, DEC. 16.—Cotton goods very little doing. Grey Shirtings, 8¼ lb., $2 42½; 16-24 water twist, $102. Tea: at Canton and Foochow quiet. Freights to London by steamers £2 10s.

THE MAILS.

PRESENT INWARD MAIL.—BRINDISI, DEC. 15.—The P. and O. Company's steamer Baroda, with the homeward India, China, and Australian mail, arrived here at 9, and the mail left at 10 A.M. for London.

HEAVY PORTION OF PRESENT INWARD MAIL.—PORT SAID, DEC. 13.—The P. and O. Company's steamer Poonah, with the India, China, and Australian heavy mails, leftat 10 P.M. for Southampton.

NEXT INWARD MAIL.—SUEZ, DEC. 15.—The Messageries Maritimes steamer Tigre, with the inward French mails from China and Japan, left here to-day for Port Said and Marseilles, at which latter port she may be expected on the 23rd inst.

LAST OUTWARD P. AND O. MAIL.—SUEZ, DEC. 19.—The P. and O. Company's steamers Zambesi and Surat, with the outward India and China mail of the 2nd—10th inst., left at 3 A.M. for Bombay and Calcutta respectively.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Dec. 15, at London, from Colombo, Blenheim (str.); 13, at Plymouth, from Singapore, for London, Nore; 15, from Batavia, for Amsterdam, Ary Scheffer; 14, at Portland, from Batavia, for Amsterdam, Christina; 16, at Falmouth, from Batavia, Charlotte Lange; 17, at London, from Singapore, George Watson; 15, off the Start, from Batavia, for Rotterdam, County of Ayr; 18, at London, from Penang, Zehlina; from Hankow, Nankin (str.); from Shanghai, Glenearn (str.).

DEPARTURES.—Dec. 15, from Shields, for Singapore, Trevanion; 16, from Cardiff, for Manila, W. L. Lewis; 14, from Amsterdam, for Sourabaya, California; 17, from London, for Shanghai, Lord of the Isles (str.); from Liverpool, for Singapore, Dreadnought.

SPOKEN.—Maria D, Cardiff to Singapore, Oct. 23, 5 N., 22 W.; Bali, Newcastle to Batavia, Nov. 27, 47 N., 13 W.; Jungfrau, Cardiff to Singapore, Nov. 11, 8.40 N., 26.22 W.; Lima, Cardiff to Singapore, Nov. 22, 46.14 N., 13.20 W.

CASUALTIES.—Malta, Dec. 13.—The Surat (str.), from Southampton Dec. 2, with China mail, when leaving port yesterday, grounded, but got off without damage, after discharging part of cargo, and proceeded to-day.—Hong Kong, Dec. 12.—The Louise, Dutch ship, from Amsterdam, for Sourabaya (general cargo), stranded on Bali Island, and will become a total wreck; part of cargo saved in bad order; two of the crew lost. Falmouth, Dec. 18.—The Loch Awe, from Batavia, has arrived here leaky, and with other damage.

MISCELLANEOUS.—Manila, Oct. 29.—A contract has been made for raising and discharging the Roodee, for London, which took fire here on the 17th inst.; the work is now being proceeded with.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

CORNABE—On the 26th Oct., at Chefoo, the wife of W. A. Cornabe, of a daughter.

GRANT—On the 13th Nov., at Swatow, China, Mrs. Cardross Grant, of a son. (By telegram, delayed in transmission.)

GUTTERRES—On the 1st Nov., at Shanghai, Mrs. E. B. Gutterres, of a son.

JAMIESON—On the 24th Oct., at Chefoo, the wife of G. Jamieson, H.B.M. Consulate, of a daughter.

OWEN—On the 12th Dec., at 2, The Residences, South Kensington Museum, the wife of P. Cunliffe Owen, C.B., of a daughter.

RICKARD—On the 29th Oct., at Hong Kong, the wife of G. P. Rickard, Royal Naval Yard, of a son.

VOGEL—On the 30th Oct., at Shanghai, Mrs. Edward Vogel, of a son.

WHEATLEY—On the 21st Oct., at Ningpo, the wife of Edmund Wheatley, of a son.

MARRIAGES.

BISHOP—WRIGHT.—On the 15th Dec., at Christ Church, Ealing, by the Rev. George Godsell, Vicar of St. Andrew's, Plaistow, assisted by the Rev. Thomas Wright, B.A., John B. Bishop, of the Chartered Mercantile Bank of India, London, and China, to Fanny Wright, youngest daughter of William Wright, M.A., of Newmarket.

CARPENTER—BLACK.—On the 30th Oct., at Shanghai, the Rev. S. Carpenter, D.D., to Mildred, youngest daughter of the late Rev. W. H. Black, F.S.A., of Mill Yard, London.

GIQUEL—LAVISON.—On the 14th Dec., at Paris, Prosper Giquel, of Foochow, to Mdlle. R. de Lavison.

HOWELL—HOPKINS.—On the 16th Dec., at St. Stephen's Church, Hampstead, by the Rev. J. Kirkman, M.A., Vicar, William James Howell, Hill-side, Muswell-hill, and 25, Osborn-street, E., to Emily, widow of the late William Hopkins, Pomfret House, Highbury New-park, and youngest daughter of Brown Hearn, Carisbrook Castle, Isle of Wight. At home after the 25th Jan.

MCNUTT—KENNEDY.—On the 1st Nov., at the Cathedral, Shanghai, by the Very Rev. Dean Butcher, H. McNutt, to Mrs. E. Kennedy.

DEATHS.

CARPENTER—On the 7th Oct., at sea, William Addison Carpenter, commanding ship *Southern Belle*, aged 40.

HANDLEY—On the 8th Nov., at Hong Kong, E. R. Handley, aged 40.

LOUREIRO—On the 4th Dec., at Marseilles, Edwardo Jose da Silva Loureiro, Consul-General for Portugal in Japan, aged 41.

OSWALD—On the 15th Dec., suddenly, after a short illness, Edith Annie, aged nearly six years, youngest and dearly-loved daughter of T. R. Oswald, of New Place House, Southampton.

OXENHAM—On the 8th Dec., at Wentworth Rectory, Ely, the Rev. H. T. Oxenham, aged 51.

STUART—On the 8th Dec., at Bahia, Charles J. F. Stuart, chief manager Oriental Bank Corporation, in his fifty-ninth year.

DEATH OF MR. AVERY, THE UNITED STATES MINISTER AT PEKING.

(To the Editor of the *London and China Telegraph*.)

SIR,—I have heard of the death of Mr. Avery at Peking. He only received the appointment in 1874, and arrived at his post in October of that year, unfortunately but ill-prepared in health to stand the rigour of a Peking winter, followed by the still more trying heat of what has there been an exceptionally hot summer. On his arrival, however, Mr. Avery earnestly took up the duties which, during the interregnum between his coming and the retirement of his predecessor, the Hon. F. F. Low, had devolved on Dr. S. Wells Williams, as Chargé d'Affaires; and on the 29th November, a few weeks after he reached Peking, he had an audience of the now also deceased Emperor. The brevity of Mr. Avery's career in China must prove a disappointment to his friends in California, who hoped that the ability which had distinguished him as a journalist and politician at home would be usefully exerted in improving the diplomatic relations of his country, and the commercial interests of the Pacific Slope, among those distant neighbours across the broad Pacific with whom their intercourse has become so frequent and so important.

At the time Mr. Avery was nominated, Mr. Hamilton Fish, the then Secretary for Foreign Affairs, pointed out that Mr. G. F. Seward, who has long and ably discharged very important duties as United States Consul-General at Shanghai, was fairly entitled to the higher appointment at Peking. President Grant, however, regarding the patronage of the post as proper to the Pacific Slope, gave it to Mr. Avery, although Senator Sargent, by whom Mr. Avery's claim had been put forward, admitting the preference which should attach to Mr. Fish's recommendation, as well as to Mr. Seward's claims, offered to accept for his candidate the Consul-Generalship, which would be rendered vacant by Mr. Seward's well-merited promotion.—Yours, &c.,

PEKING.

London, Dec. 16, 1875.

THE MISSIONS IN CHINA.

During the past week Dr. Dudgeon, of the London Missionary Society, now home on furlough from Peking, has been addressing several meetings in London. On Wednesday, at the Young Men's Christian Association-rooms, in Sloane-street, he interested a good number of young people, and not a few of their seniors, gathered together by Miss Butler, the zealous lady who has formed the Children's Medical Missionary Association; and the same evening he addressed a meeting at the Presbyterian Church in Belgravia. On the 16th a numerous company of medical students and other guests accepted the hospitality of Dr. and Mrs. Farley Clarke, at Harley-street, Cavendish-square, to whom Dr. Dudgeon gave a brief history of medical missions in China, a most amusing account of Chinese medical science, or rather nescience, which provoked explosions of laughter, and a short description of his work at Peking, necessarily curtailed by the lateness of the hour. On Friday, the 17th, Dr. Dudgeon met a few Members of Parliament and friends of the Anti-Opium Movement at the offices of the Anglo-Oriental Society for the Suppression of the Opium Trade, before whom he laid most important statements, not only as to his observations upon the effect of opium in China, but as to the opinions and intentions of the leading statesmen of Peking, with many of whom the Doctor has had intimate acquaintance. We hope that next year Dr. Dudgeon will repeat his visit to the metropolis, and have the opportunity of laying some of his vast store of information before larger audiences.

THE NEW RULES OF THE ST. PETERSBURG TELEGRAPH CONVENTION.

Reuter's Telegram Company (Limited) have issued a circular giving the new rules agreed to at the recent Telegraphic Convention, and which will come into force at the commencement of 1876. The maximum length of words is fixed at ten letters. All "dictionary" words will be accepted. If words exceed ten letters, the excess to be charged for as an extra word. Abbreviated or wrongly-spelt words, or combinations of letters not forming words in dictionaries or gazetteers, will not be accepted. Figures will be charged at the rate of five to a word, but if used for code purposes, the whole message in which this is done will be charged as a cipher message.

THE RUSSIAN EXPEDITION TO KHOKAND.

M. Arminius Vambery, writing in the *Allgemeine Zeitung* on the official reports of the Russian expedition to Khokand, comes to the conclusion that the campaign was, "on the whole a misfortune for Russia." "The result of the expedition may be regarded as satisfactory by General Kauffmann and his officers, who were doubtless glad of the opportunity of distinguishing themselves and obtaining decorations; but it came at a very inopportune moment for Russian policy. The Court of St. Petersburg did not want Khokand either for strategical, political, or commercial reasons, since Khudojar Khan was the obedient instrument of its will, being allowed in return to extort money from the Khokanders at his pleasure. When, however, his tyranny drove the people to insur-

Digitized by Google

rection, Russia was obliged to interfere, as the insurgents were supported by the Kiptchaks, who threatened her own territory. This race (says M. Vambery), whose warlike deeds are celebrated throughout the whole of Central Asia, occupy much the same position in the north-east of Turkestan as the Turcomans in the north-west. "The only difference is that, while Turcoman bravery has always manifested itself only in plunder and in interrupting the traffic between Persia and the territories on the Oxus, the Kiptchaks never interfered with peaceful travellers, but played an important part in the political revolutions of the last two centuries." The Kiptchak, like the Kara-Kirghiz, besides being naturally brave, is hardened by the wild life of his native mountains; the Russians rightly call him "diko kamenni Kirchiz" (the wild and stony Kirghiz). As to General Kauffmann's bulletins, M. Vambery observes that the General's theatrical and sensational style is notorious in Russia, and that his high-flown accounts of the victories gained by the Russians over the townspeople in Khokand should be taken with a considerable grain of salt. The inhabitants of the towns are "vicious and cowardly;" "no one can have an idea of their degraded state who has not become personally acquainted with them;" and "a single Russian would be a match for a hundred of them." There could have been no real fighting, notwithstanding the "great victory of Mahram," until the Russians attacked Endidjan, the head-quarters of the Kiptchak rebels, and the birthplace of the famous Sultan Baber. The resistance here seems by the official reports to have been most obstinate, and the losses of the Russians (twelve dead and thirty-five wounded) are, thinks M. Vambery, evidently understated. He further points out that it appears from General Kauffmann's last report that after the capture of Endidjan the Russians received a check which forced them to retire—an incident which may be of great importance in confirming the general belief of the invincibility of the Kiptchaks, and in foiling the designs of the Russians against Yakoob Khan. "The fighting at Endidjan has shown Russia that the Kiptchaks are formidable foes; and, assuming that there are at least 100,000 of them, it may be a question whether Russia will not have to moderate her ambition if these brave mountaineers should be taken into the pay of the astute and energetic Ameer of Kashgar."

THE MURDER OF MR. BIRCH.

The following details (dated Penang, Nov. 19) of the operations in Perak subsequent to the murder of Mr. Birch have been received by Reuter's office:—

Mr. Birch's mutilated corpse was brought in from the jungle by a Buggise, and was buried on the 6th inst. at the back of the Residency. On the following day a small force, in number about sixty men, went from the Residency up the right bank of the river with the intention of destroying a stockade which was known to exist, though its actual position had not been ascertained. Proceeding in single file, which was the only mode of progress the nature of the jungle would permit, they came unexpectedly upon the stockades, from which the Malays at once opened a well-directed fire. Captain Innes fell, shot through the heart. The native police were useless; some of the white troops assert that they were fired into by the Seikhs in the confusion. The other two officers, Lieutenants Booth and Elliott, were both badly wounded. Nothing was left but to order a retreat, which the men unwillingly effected with perfect order. Captain Innes and a private who was killed now lie buried by the side of Mr. Birch. In consequence of this disaster more troops were sent for, and the Governor left Singapore for Perak, remaining there but a few days. The mouth of the Perak river was blockaded by the police steam-launch, and at Dorian Sabatang, about forty miles up the river, the highest point to which large vessels can go, the gunboats *Fly* and *Thistle* were also blockading the river. Preparations were made at the Residency for a strong expedition against the stockades, which the Malays had considerably strengthened in the meantime. The expedition, which was planned by Major Dunlop, Queen's Commissioner, Captain Stirling, of Her Majesty's gunboat *Thistle*, and Captain Whitlr, of the 10th regiment, started about four o'clock on Monday morning, 15th inst. and proceeded up the river in boats poled by most unwilling coolies to within a mile of the stockade, when the troops were landed, and both forces, naval and military, proceeded towards the stockade, the first rocket being fired from the boats at 9.30 A.M., drawing an immediate reply. The Malays at first made a stand, but the rockets and shells proved too much for them, and when the artillery, under Lieutenant Monckton, brought up their 12-pounder and fired two shots, the Malays fled, carrying their dead and wounded. The resistance at the next two stockades was so slight as not to be deserving of the name. Burning every house along their line of march, the troops proceeded towards Passir Sala, where the Maharajah Lila was supposed to be, the boats also advancing along the river. A well-directed fire, but, luckily harmless, was commenced by the rebels, the boats replying with shells and rockets, of both of which the practice was admirable. The resistance here was brief; the troops rushed forward with a cheer into the now deserted stockade, the blue-jackets landing about the same time. A small stockade surrounding the Maharajah Lila's house was fired at by the artillery, and his house also was bombarded. Looting and burning was then permitted. Most of the houses had already been emptied by the owners. Mr. Birch's boats, papers, and personal effects were recaptured. Campony Gaja, where Datoo Taga lived, on the left bank of the river, was burnt after a slight brush with a few Malays, in which one of our party, Inspector Lagis, was badly wounded with a spear; this, including two men hurt by bamboo spikes, makes up the list of casualties on our side. The Malay loss was unknown. Six cannon, with a quantity of small arms and some ammunition, were captured. The troops returned the same night to the Residency.

The British force, including blue-jackets, marines, and military, amounted to about 240 men. The boats carried two rocket tubes, a mortar, and four guns, seven and nine-pounders. The Artillery on shore had their 12-pound howitzer. More troops are now arriving, but the impression prevailed at the Residency that it would be difficult to induce the Malays to make a further stand. It is rumoured that an overland expedition will be sent via Larut, so as to catch the rebels at both ends. Kota Stea, not far from the mouth of the river, and Quallah Kongsa, higher up the river than Passir Sala, are spoken of as strongholds where a determined stand is possible.

(THE TIMES.)

Mr. Richard Barker [writes:—Sir P. B. Maxwell, whose letter you recently published on this subject, is in error on one or two important facts, and, in justice to the dead and the living, I beg leave to point them out—firstly, with regard to Sir P. B. Maxwell's statement "that the late Mr. Birch was ignorant of the character, feelings, or habits of the Malays," I maintain he was the most competent official in the Straits Civil Service for carrying out any negotiations or treaties with the native Chiefs. Sir P. B. Maxwell knows perfectly well that the Sultan of Salangore is a perfect slave to the opium pipe, and that he is intoxicated with this deadly narcotic twenty hours out of the twenty-four. Therefore it was necessary and unavoidable that some one should be appointed his Wakkeel, or Viceroy, to carry on the government of the country in his name. This, I think the late Chief Justice will admit, was a wise and humane act in order to prevent the state of anarchy, piracy, and bloodshed which existed among the inferior Rajahs. The visit of the *Teazer* to Salangore, to which the late Chief Justice refers, reflects the greatest credit on the memory of the late Mr. Birch, as it is the only way in which civilised nations can first deal with an imbecile and wavering Chief, open to the bad advice of the various parties who are always intriguing at his Court. It is a pity the *Teazer* or *Hornet* was not at the Residency in Perak when the proclamations were posted in Ismail's country. Had this been done, poor Birch would still have been alive and well. Secondly, as to the appointment of his Highness the present Viceroy. Toonku deya Oodine is the brother to the Sultan of Queddah and heir-apparent to that throne, and had no occasion to trouble himself about a turbulent State like Salangore. As one of the gentlemen who signed the Malacca Treaty in reference to the Salangore tin mines, to which Sir P. B. Maxwell is pleased to refer, I beg to inform him that I have seen conclusive proof that Toonku deya Oodine was three times invited by the Sultan to act as his Wakkeel before the *Teazer* ever saw Laugat; that he gave him his daughter to wife as an evidence of his goodwill. That appointment of Wakkeel was confirmed by the various Rajahs assembled in council at Laugat, and bears their signatures; therefore I do not see how Sir P. B. Maxwell can possibly make out that the Sultan "was compelled to appoint a man in the highest degree disliked by the Salangore Malays." If Sir P. B. Maxwell had been appointed himself, he would have soon found out that, as the representative of law and order, he would have been equally disliked by pirates and marauders like Mahadie and Zyed Massahore. I made it my business to inquire into the *locus standi* of the present Viceroy before signing the treaty, and can assure the late Chief Justice that I have seen all the documents referred to above. I further fearlessly assert that Toonku deya Oodine is a man far in advance of his nation—a gentleman in all his actions, and a man of very refined tastes. I stayed some considerable time at his Court, and had the opportunity to observe his rule of his people. More even-handed justice I never saw; no Court at Westminster could be more careful in its decisions than he, and, though he had no Acts of Parliament, the *adat negri* was as sacred as ever Acts of Parliament were in England.

THE TELEGRAPH TARIFF.

The Times of Friday says:—It is an unfortunate circumstance that new telegraphic rules and regulations, some of which the mercantile community evidently decidedly object to, should be coming into force at a time when the profits in trade are so very small. At the present moment the merchants and banks doing business with the East are exerting all their powers of ingenuity to cut down their expenses, and it is well known that the cost of telegraphing is a very serious item. The movement among the merchants to lay a wire of their own, to which we called attention a few days since, has received considerable support, and we have reason to know that it only awaits countenance in one or two further influential quarters to give it a good chance of being laid. It is, therefore, for the companies to decide whether in present circumstances it is their intention to force their present supporters into taking a line of action which may be irretrievably disastrous.

"Chamber of Commerce, Manchester, Dec. 15.

"Sir,—I am instructed, in reply, to thank you for the full explanation given to the Chamber, but it is unable to see that the remonstrances addressed to you, in regard to the special hardships of the altered rules sanctioned at the St. Petersburg Conference, have been satisfactorily met. The Chamber has already recognised the propriety of the companies placing a limit on the length of words, as a means of checking the abuses to which you refer; but would again remark on the injustice of refusing intelligible abbreviations of long proper names, of ships, &c., which are of necessity used in business communications. These manifestly cannot be codified as you have proposed. This difficulty may be removed by the companies making exceptions in these cases, in the spirit of liberality which it is satisfactory to observe is promised in interpreting the rules. Merchants cannot dispense with the use of figures (or substituted letters) in telegraphy; and, even admitting that their transmission entails more trouble on the telegraph manipulator, compensation is derived under the restriction in such cases to a limit of five in the place of ten letters or figures. It is important to observe that by the use of figures or substituted letters a special check for accuracy is obtained—viz., by the employment of one figure as an indicator, representing the unit of the sum of the others. Repetition is, therefore, non-essential, or it should be left to the discretion of the sender. While objecting altogether to the principle of compulsory repetition, in common fairness it ought to be enforced only on the use of the individual groups of figures and not on the other part of the message, which should pass without

Digitized by Google

repetition. The adoption of this modification would, it is believed, go far towards allaying the strong feeling of irritation which has arisen since the publication of the new rules, and the other charges and restrictions would thereupon be probably acquiesed in—at least as regards India. "I am, &c., THOMAS BROWNING, Secretary.

"W. Andrews, Esq., Indo-European Telegraph Company."

REPLY.

"Sir,—In your communication of yesterday's date, on behalf of the Manchester Chamber of Commerce, you suggest that the lines should accept 'intelligible abbreviations' and adopt a 'modification' of the system of charging fixed by the Convention for figure ciphers. The Telegraph Convention, however, is in the nature of a treaty binding without modification for three years from the 1st of January, 1876. The signatory Powers are the Governments of Europe, Egypt, Persia, India, Brazil, &c., and the States concerned impose the observance of the rules and regulations of the Convention upon companies whose lines traverse their territory or land upon their shores. You will see, therefore, that it is quite beyond the power of the companies, and, indeed, of the Governments themselves, without the consent of every Government concerned, even if then, to modify the regulations laid down. In addition, however, to the difficulties regarding abbreviated words already pointed out, proper names are used largely, not as proper names, but as code words, and it would, I fear, be impossible to distinguish in code messages in which sense they were used. The company must admit that, considered apart from the general question of the great facilities afforded to telegraphic communication with India, and beyond, over this company's line, by the exceptionally low tariff and the privilege of using code, &c., there does appear some hardship in subjecting the whole message to the charge for repetition, because there may be one or two or more groups of ciphers with a secret meaning. (The signals for figures cannot be simplified, because the simplest, contrasting best with letter signals, have already been selected.) The clause imposing this regulation evidently had in view the inexpediency of introducing the complication of a 'mixed message;' a proportion being marked as cipher and a proportion being treated as code, coupled with the multiplication of unpaid service indications which this treatment would necessitate.

"The company, however, thinks that the Chamber, upon this particular question has shown reasons why the rule should be reconsidered, and will certainly, at the next Conference, represent the expediency of modification in the direction pointed out, which appears to be fair and reasonable. If figure codes were kept within the strict limits of necessity, code words being substituted wherever practicable, so as to bring about an approach as nearly as possible to the former comparatively limited use of cipher groups, this company would feel quite disposed to revert to the old regulation. In any case, the company sees no reason to fear an inaccurate transmission of unrepeated figures over its own lines; and, if the merchant checks his own figures by the means stated, matters respecting figure transmission will, in practice, probably remain pretty much as at present. If, as suggested, competing lines were established they must be worked under the Convention; there would in this respect, therefore, be no change, and as the present traffic is insufficient fully to employ the existing lines, an unnecessary addition to their number, not justified by the amount of traffic existing or reasonably to be anticipated, would entail increased working charges and auumented capital: these items could only be provided for by an increase of tariff, which would be the inevitable ultimate consequence. It may not be inexpedient to refer to my letter to you of the 8th March, 1872, upon this subject.—I am, &c.,

"W. ANDREWS, Manager and Secretary.

"Mr. Thomas Browning, Secretary, Chamber of Commerce, Manchester."

Literature.

It may be interesting at the present time to call attention to a valuable pamphlet which is to be found in the library of the Royal Geographical Society, entitled "The Result of a Political Mission to Perak, Salangore and Colong in the year 1818, by John Anderson, Malay Translator." This work demonstrates that the origin of our intercourse with those provinces extends as far back as the date above-named, when the merchants at Penang called the attention of the Government to the extensive intercourse carried on by the Dutch in that quarter, and recommended the Governor to enter into alliances with the chiefs of those countries, and that this request was acceded to. It will be seen from this that the policy of taking some steps to protect our trade in those parts is one which was from the earliest times recognised as a necessity.

It is stated that Mr. Clements Markham, in the course of his researches in connection with the forthcoming work on Tibet, which he is engaged in editing under the orders of the Secretary of State for India, has succeeded in unearthing, at Middelburg, in Holland, particulars respecting a great Dutch traveller named Samuel Van Del Putte, the only European who has ever made his way from India by way of Tibet to China.

Mr. James Bulgin proceeds by the steamer *Oxfordshire* to Hong Kong to take the post of Editor of the *China Mail*. Mr. Bulgin has had considerable experience on the Press in London, and we think will be found to possess an aptitude for colonial journalism.

Miss Jane Moresby writes us that she is not the authoress of the lines on the late Commodore Goodenough, which appeared in *Macmillan*, but Mrs. John Moresby, wife of Captain Moresby, R.N.

A Collection of Chinese Proverbs, by the Rev. W. Scarborough, has been issued by Messrs. Trübner and Co., but we have not received a copy for review.

Naval and Military.

Commander the Hon. E. S. Dawson, of H.M.S. Dwarf, has written an interesting account of the naval and military services of China, from personal observation and information gathered on the spot. The account has been forwarded to the Admiralty.

The Juno, 8, screw corvette, Captain J. A. Poland, has completed her repairs at Portsmouth, and sailed for Singapore and Hong Kong on the 18th inst. with the officers and crews of the gunboats to be re-commissioned at Hong Kong. The following are the names of the officers proceeding by the Juno:—

Horace H. Barnard, lieutenant, Herbert J. Dockrell, navigating-lieutenant, Samuel E. Lark, assistant-paymaster, Henry Onions, engineer, William H. Nicholson, engineer, and William C. Tarrant, acting gunner, additional, for Frolic, when recommissioned; William B. Meade, navigating-lieutenant, Otway P. Browne, surgeon, Richard Olivey, assistant-paymaster, William Landells, engineer, and Louis Evans, acting gunner, for Kestrel, when recommissioned; Thomas O'Sullivan, surgeon, Thomas Summers, engineer, and Emanuel Foster, acting gunner, for Mosquito, when recommissioned; Charles Windham, lieutenant, additional; James W. Lishman, paymaster, additional, as storekeeper at Yokohama; Russell Hill, paymaster, Victor Emanuel, additional, for service at Shanghai Yard; E. B. D'O. Aplin, sub-lieutenant, Vigilant, part complement; William Jennings, assistant-paymaster in charge, Dwarf, part complement; James Bradley, staff surgeon, Lily, part complement, East Indian station.

The Sheldrake, 4, screw composite gun-vessel, has been commissioned at Devonport Dockyard by Lieutenant John B. Haye, with a complement of fifty-nine men, for the China station.

The troop ship Himalaya has left leave Malta for Singapore and Hong Kong with the 28th regiment.

Legal.

HIGH COURT OF JUSTICE.—QUEEN'S BENCH DIVISION.

WHITE V. THOMPSON.

The plaintiff is a shipbroker in the City, and the defendant a shipbuilder at Sunderland, and the action was brought to recover 2½ per cent. commission on the sale of two steamships. The defendant pleaded not indebted, and that he had not employed the plaintiff as his broker.

It appeared that in 1873 the defendant entered into a contract to build two steamers for a Mr. De Bussche. Their construction proceeded, but there being some default in the payment of one of the instalments, it was arranged that the defendant should take a mortgage on one of the ships, and that she should proceed on a voyage, and in the case of the other ship the contract was cancelled. It was stated that plaintiff, hearing the vessels were in the market for sale, communicated with Messrs. Matheson, and the result was the sale. On the part of the plaintiff it was contended that it was through his introduction, and the information he communicated, that the purchase was brought about, and that the usual commission was due to him. Several steamship brokers in the City were examined in support of the plaintiff's case as to commission being due to him. Counsel for the defendant said that his client had already had and paid a broker in respect of the building of the ships, and that he had not employed the plaintiff. He also submitted that in other respects it would be unreasonable to make the defendant liable.

The Chief Justice said the plaintiff claimed in respect of the sale. The contract to build was a different engagement. He really thought it was an undefended case. After some further discussion it was arranged to take a verdict for plaintiff for £1,250—half commission on one vessel and the full commission on the other.

BANKRUPTCY DIVISION.

IN RE SHAND AND CO.

This was an application on behalf of Mr. Donald Matheson, of Glasgow, that the trustee of the estate of these bankrupts should be directed to endorse and deliver to him a bill drawn by Messrs. Arbuthnot and Co., at Madras, on Messrs. Arbuthnot, Latham, and Co., of London, for £250, as being specifically appropriated to meet a shipment of cotton sent to London. Counsel on behalf of the applicant stated that Messrs. Shand and Company were merchants, carrying on business in London, Liverpool, Madras, and Ceylon, and failed in July last for £341,000. The applicant in this case was Mr. Donald Matheson, who carried on business at Glasgow, in partnership with Mr. J. R. Alston, under the firm of Matheson and Alston. For several years the firm had had business together in the shape of consignments of coloured cotton goods to the firm of Shand and Company at Madras, for sale on the joint account of Messrs. Matheson and Alston, and the London firm of Shand and Company. The yarns were supplied at an agreed price, and the expenses of packing, shipment, freight and insurance, &c., was provided for by bills of exchange drawn by the Glasgow firm upon the London firm of Shand and Co., specially against the shipments; which bills the Glasgow firm were in the habit of discounting to keep themselves out of cash advance, and the arrangement and agreement between the parties was that each bill should be renewed in whole or part as might be required until the proceeds of the yarns, which the bills were drawn against, had been remitted from Madras, and that the proceeds of each shipment as sold from time to time should be remitted specially

Digitized by Google

to Shand and Co., of London, and be applied by them in payment or reduction of the bill drawn against the same shipment, and this course of business was adopted and carried out by Shand and Co. down to the time of the failure. The present bill was sent to meet twenty bales of yarns supplied in September, 1874, and valued at £687 7s. 4d.; before the bill of exchange for that amount was taken up a letter was received acknowledging a remittance bill of £250, and stating that it had been handed over to the trustee in the regular course. This bill was the subject of the present application, and it was contended that it was a remittance in part payment of that particular bill for £687 7s. 4d. He now asked that the bill should be handed over, and that the trustee should pay the costs of the application.

The Registrar made an order for the early handing over of the bill, and for the payment of the costs out of the estate.

Miscellaneous.

JAPANESE COLLECTION.

Messrs. Branch and Leete have sold at Liverpool an interesting consignment of Japanese porcelain and *faience* procured by a private collector during a nine years' residence at Yedo. A large temple vase of the finest period of Satsuma ware, most important in its size, twenty-four inches high, taken from a temple near Kioto, the palatial residence of the first Tycoon, 1570, and supposed to have been a votive offering, is of a cream-coloured paste, boldly crackled, with two large medallions containing mythological subjects and saints with golden nimbi; it sold for the enormous sum of 400 gs. A pair of Satsuma vases, nineteen and a-half inches high, with Buddhic subjects, 300 gs.; two other vases of the best period of Satsuma *faience*, cream-coloured paste, crackled glaze, the decoration consisting of twelve open fans painted with various subjects, £126, and its companion for the same price. Other vases of old Satsuma sold at 110 gs., 80 gs., and 50 gs. Of the Kioto *faience*, a fine old vase, probably a votive offering, with mythological subjects and saints with golden nimbi like the 400 guinea Satsuma vase, sold for £75. An oblong dish of the same ware, ornamented with a golden pheasant and chrysanthemum, in high relief, in red enamels, and gold, £39, a bowl of ancient Kioto *faience*, buff paste and crackled glaze, with archaic figures, 35 guineas, and another £30, a large vase with figures, in medallions, red enamels and gold, £56., and the companion, £50; perfume burner, with dragons and clouds in relief, the cover formed of a curled dragon issuing from the waves of the sea, yellow and green, £4 12s.; a pair of crackled basins of Hizen porcelain, decorated with fans in gold, and powdered with the mallow-leaved crest of the Tycoon, £33; basin of Tokio, painted in imitation of Satsuma, £5 10s.; pair of flower vases, Awata *faience*, 19 guineas, and another, 21 guineas; a teapot of fine modern Kaga ware with figures delicately painted on a ground of burnished gold, 30 guineas; large Kaga basin elaborately decorated with medallions of figures and flowers in red and gold, £4 15s., and others, £8, £5, and £4 15s.; a pair of hand-finished ancient bronze figures, representing Japanese divinities, Force and Justice, £90; [vase of Chinese cloissonné enamel, £50. The sale realised £3,134 1s. 6d.

THE MAHOMMEDANS IN CHINA.

The Hong Kong correspondent of the *Cologne Gazette* writes:—The different provinces of China contain hardly 1 per cent. of Mahommedans. They are generally tranquil subjects, dress like the Chinese, trade, and are admitted to the literary examinations and to places in the public service. Where they live closer together, in the south-west, Yunnan, and in the west, Turkestan, they are inclined to rebellions. In Eastern Turkestan the bold Mahommedan chief, Yakoob, has already taken the title of Khan, conquered the towns of the country, and expelled the Chinese garrisons. Nearly every Mantchu Emperor of China, down to Tau-Kwong, has been obliged to reconquer this province with many sacrifices. The question is now, whether the armies of the Emperor Kwangsu will be able to master the present rising, or whether Eastern Turkestan is lost for China. The Russians would then be the probable next heirs. For the present the brigand tribes would like to form an independent Mahommedan State, and have demanded help from the Sultan. The Turkish journal *Sadayat* accuses the Chinese of persecution of the Mahommedans, and the news has arrived here that the Sultan intends to send an embassy to Peking. The Chinese would not like to receive it, for they fear from it a reinforcement of the agitated Mahommedan elements. At all events it would be interesting for the diplomatists at Peking to receive a Turkish colleague.

THE ATTACK ON PERAK.—The following letter has appeared in the *Standard*:—Sir,—In your impression of Dec. 16 you speak of the Malays having entrenched themselves "five miles from the Residency at Penang." Permit me to put you right: Sungie Ujong, where the stockade was carried, as stated in the telegram from Sir W. F. D. Jervois, is more than 150 miles (certainly) from Penang, and on the mainland of the Malayan Peninsula, whereas Penang is an island. Sangie Ujong is a native State governed by the "Datu Klava," with whom we have a resident, Captain Murray, with a detachment of the 10th Regiment, 25 men and a subaltern in command, and lies far to the south of Perak, from which it is separated by the native State of Salangore.—I am, &c., R. T. F. STAMMERS, Brevet Major, 10th Regiment.

THE NEW YORK AND SAN FRANCISCO STEAM LINE OPPOSITION.

The directors of the Panama Railroad, says the *New York Times*, at their last meeting, unanimously adopted the report of their Special Committee, recommending the purchase of ships necessary for a tri-monthly line connecting with the company's railroad between New York and San Francisco, and the line between Panama and Central America. The committee consisted of C. K. Garrison, E. C. Franklin and J. M. Burke. They were appointed October 27th to consider the matter, and gave it close attention. In their report they state that ten steamers will be necessary. Three vessels are to ply between New York and Aspinwall, five between Panama and San Francisco, two between Panama and Central America. Eight steamers will run on the through line between New York and San Francisco, to cost $425,000 each, and to be capable of accommodating two hundred cabin and three hundred steerage passengers, and 2,500 tons freight each. Each steamer between Panama and Central America to be small, and to cost $200,000. A profit of $1,800,000 per annum is expected to accrue from the use of these vessels. To provide for paying the cost of the vessels it is proposed to issue $4,000,000 of bonds, bearing seven per cent. interest, $400,000 of the bonds to be made payable January 1st, 1880, and a like amount, each year after. The gentlemen of the Company expressly stated that the action of the Company is in consequence of no hostile feeling toward the Pacific Railway, but that the step is in the interest of the Panama Company alone. Proposals from John Roach and Son, and William Cramp and Sons, ship and engine builders, are appended to the report. The company hopes to be able to make one trip each month on the new line on and after next June, two trips in September, and three trips in December of next year.

THE AMERICAN MAIL SERVICE.

The latest American papers just received at Cork contain the report of the Postmaster-General on the subject of the mail service. The following is an extract from it:—The fact that but one line of steamships carrying our flag is employed in conveying mails across the Atlantic and none whatever to South America is humiliating to the just pride of every American citizen. This line makes regular weekly trips from Philadelphia to Liverpool, and carries a small mail in a satisfactory manner for the postages as compensation for the service, but the great bulk of our mails for Europe is carried by steamers under foreign flags, sailing from the port of New York on Tuesdays, Wednesdays, Thursdays, and Saturdays of each week. As a matter of national pride, as an aid to the revenue of American commerce, and as a means of supplying efficient steam marine available for immediate use by the Government in case of emergency, provision should be made for transportation of our mails on important ocean routes in steamships officered and manned by our own citizens and sailing under our own flag. It is believed that the payment of a moderate mail compensation in excess of the postages now allowed under the provisions of the general law would enable our citizens to establish and maintain steamship lines across the Atlantic and to South American ports, which would prove remunerative to the proprietors and promote the general prosperity of the country. A reasonable allowance for a line to the West Coast of South America would assure regular mail communications by American steamers with our sister Republics on that coast, and a moderate mail compensation for a line to Japan and China will doubtless continue the mail service to those countries in American ships after the termination of the existing subsidy contract, which will expire on the 31st of December, 1876. I think it safe to say that the sum of 500,000 per annum now granted as a subsidy to the China and Japan line for a single monthly service on that route would, in addition to the postages on the mails conveyed, be quite sufficient, judiciously apportioned between the respective routes, to maintain an efficient mail service by steamers sailing under our flag on all the important ocean routes which should be occupied by American steamers.

IT will be remembered that in February last the Pacific Mail Steamship Company entered suits at law by their attorneys, Messrs. Bell Bartlett, J. Wilson, and A. G. Riddle, against the following persons, to recover back certain sums of money alleged to have been paid to them as follows, by R. B. Irwin, to secure their services in aid of securing the Congressional subsidy:—Charles Abert, $7,000; J. G. Berrett, $10,000; E. H. Cormick, $5,000; A. B. Corwine, $3,600; H. G. Fant, $12,000; J. H. Hersey, $11,000; Donn Piatt, $5,000; W. B. Shaw, $15,000; and John Boyd, $4,500. The plaintiffs' attorneys have discontinued the cases against Messrs. Berrett, Shaw, and Hersey, and it is understood that the same course will be taken as to the other cases.

COMPLAINTS have been made by the German Consulates at Bangkok and other Eastern ports that German vessels are there entrusted to the management of persons not properly qualified, and who have not passed the examination required of masters of merchant vessels at home. In consequence of these reports the German Foreign-office has issued instructions to the Ambassadors in the countries concerned investing them with fresh powers, which they are moreover authorised to to delegate to Consuls and Vice-Consuls in their respective districts, to stop vessels improperly officered by application to the local authorities.

THE MISSION SCHOOL AT BLACKHEATH.—The annual gathering of the friends of this institution took place on the evening of the 15th Dec., under the presidency of Mr. and Mrs. Waite, who have recently taken charge of the school. The entertainments were chiefly confined to an illustrated lecture with the magic lantern, embracing France, Italy, and Switzerland. At intervals the scholars gave some excellent glee and part singing; and the programme concluded with a couple of acts from the "Merchant of Venice." The evening was enjoyed by everyone.

A CASE has been heard in the Probate Court, in reference to the will of the late Mrs. Morrison. The plaintiff and defendant are the two sons of the deceased, Robert Morrison, who was employed in Lord Elgin's mission to China, and George S. Morrison, who was pensioned for his services while on the Consular Staff in Japan. The will, by which the testratrix bequeathed the whole of her property to Robert, was opposed by George Morrison, and the jury returned a verdict in his favour.

IT is stated that the Siberian local authorities have despatched an official to China to engage workmen for the construction of barracks in the provinces of Amour and Ussuri.

The *Japan Herald* announces the arrival at Yokohama, from San Francisco, of Sir Charles Dilke, M.P., Mr. Eustace Smith, M.P., and Mrs. Eustace Smith.

THE Eastern and Australian Company's steamer *Singapore* left Singapore for Brisbane on the 13th inst. with the London mails of the 12th ult.

LONDON: MONDAY, DEC. 20, 1875.

OUR OPERATIONS AT PERAK.

THE first instalment of the news from the Straits, which we have for some days past been anxiously expecting, has now come to hand. A signal defeat was inflicted on the Malays, who had mustered some 600 or 800 strong behind a stockade in Sungie Ujong, and though the strife is still far from ended, Sir WILLIAM JERVOIS is able to report that the forces already on the spot will be amply sufficient to restore order in the disturbed districts. Eight or ten deaths have occurred on our own side, but the names of the slain will probably only reach us when the mail steamer brings the next chapter of news. If, however, success is now certain, there is nothing in the latest telegrams to indicate that the fighting is all over; and it would therefore be premature to comment with any fulness on a campaign which is incomplete, and of which very slender details have yet come to hand. In the meantime much has been written both at home and in the Straits which sheds light on the recent course of events in the Malay States, and something also which helps us to a correct conclusion as to the line to be adopted in future. Thus we find the *Straits Times* declaring its views in strong language, as for example, "We do not think there is any man who will not say that Mr. BIRCH'S murder must be avenged." "Short and sharp is the word here." "If the Home "Government show any signs of shrinking in this most "righteous quarrel then this colony will rebel against . . "Her MAJESTY'S ignorant and misguided Government." These be strong words; but the advice thus given, and the threat held out, are wholly needless. The Malays who were foolish enough to take our Representative off his guard, and cut him down when he was naked and defenceless, will find very good reason to repent of their rash deed; several thousand soldiers have not been hurried up to Perak to look at the place and leave it again. There has already been a heavy reckoning, and the disaffected party have had rather a rough time of it behind their stockades. The only genuine ally which these miserable natives really had was that unlucky direct telegraph cable, which might have brought counter orders from the Colonial-office authorities, and thus stopped some bloodshed; but the cable broke, and so no doubt operations have been carried out "to the bitter end."

If, however, we are in search of some views or arguments which may really tend to inform the public mind as to the proper course to pursue, when the actual strife is over, something which shall guide the Ruling Spirits at home to a clear understanding of what ought to be done, we must turn from the fiery columns of the *Straits Times* to the letter from Sir BENSON MAXWELL, which was lately republished in our columns. Sir BENSON has a good deal to say about our relations the last few years with Larut, Perak, and Salangore. He strongly condemns General ORD'S policy, and points out blunders committed from time to time by our authorities which entailed very mischievous consequences. As to Larut, he thinks that if it should pass from the grinding tyranny of the Malay princes to our rule, the transfer would be a great gain to the peace and prosperity of the colony, without costing a penny to this country, and would be readily agreed to by the Malay chieftains in return for moderate pensions. This is putting the matter in a very sensible light. Larut is, properly speaking, subordinate to Perak; but the struggle between the Mantri who rules Larut and the rival chiefs in Perak has become irreconcilable, and no peace can be expected until this difficulty is effectually settled. The Mantri has for years been a rebel, but a successful one. The Malay inhabitants of Larut suffer miserably in consequence of the disturbances, and the Chinese immigrants have been turned from peaceful miners into freebooters by the Mantri's double dealing. If the Mantri can be got to accept a pension in lieu of an authority which he usurped in the beginning and has since misused; if the restoration of Larut to Perak would lead to nothing but prolonged disturbances, and is not even demanded by the Perak chiefs; if the Chinese immigrants one and all desire our peaceful administration; if the Malay population would gain thereby; if riot and bloodshed can only be stopped, and commerce restored by our intervention; if the annexation would impose no new burdens on the taxpayers at home—it is really hard to see what there is to say against our making Larut as much British territory as Province Wellesley or Penang. Objectors will no doubt urge that Larut is a Malay district, ruled by Malays, and that to justify such a step as annexation we must prove that the bulk of the people prefer our rule to that of their own chiefs. The answer is a simple one; if the people, most of them, desire Malay rule, *and could get it*, we would gladly let them enjoy it; but in Larut they can't get it; what they can get and have been getting for years past is Malay misrule—a mere prolonged civil war. They may like this, they may even prefer it to British intervention; but we don't, and for very good reasons of our own, we wish to see the country pacified. A Malay Government to be a Government at all must be an effective Government, and in Larut there has been no effective Government for years. If the Malays could form a Government for themselves in Larut, or if we could set one up permanently for them there we should be content; but both plans have been tried, both have failed, and that is why the annexation of Larut—undeniably beneficial to Malay, Chinese, and British interests—is also morally justifiable as the only wise course left. But the Mantri and his family must not be forced to yield up any rights without corresponding compensation by way of pension or otherwise.

When we turn from Larut to Perak we find our case there as nearly unanswerable. It is in Perak that the actual hostilities between ourselves and the natives began, and our future course as respects that State may, therefore, be influenced greatly by the incidents of the warfare, by the turn of events which have not yet come to pass. Sir BENSON MAXWELL says that "it may be more doubtful "whether it would be worth our while to take the rest "of Perak," Perak, that is, as distinct from Larut; but we know already that some of the principal chiefs of Perak requested Sir W. JERVOIS to undertake to administer the Perak Government for them and in their name; this proposal was agreed to, and it was over the business of proclaiming the political change to the populace that the fatal squabble between Mr. BIRCH'S party and the natives took place. Whether the great majority of the native population desire British protection, or whether they side with two or three disaffected chieftains who seem to have got up the disturbance we are not yet informed; but the view we take is, that, though the mere assassination of Mr. BIRCH by some turbulent Malays does not in itself form a sufficient reason for making Perak an integral portion of British territory, yet it is the outcome of political conditions which make it impossible for us to administer the Perak Government through our own Residents and in the chieftain's names, which was the last scheme proposed, and which led to disturbances.

The rivalry between Sultans ABDULLAH and ISMAIL could never be really kept in check under such a system, and the only plan open to us is therefore to make terms with all these chiefs, purchasing their rights and their territories from them in exchange for handsome pensions, which most assuredly they will only be too glad to accept, and then taking Perak and all who dwell within its borders permanently under our own care. If, on the other hand, we were to clear out from Perak alto-

Digitized by Google

gether when our troops have done their work, we should simply leave the province, which is close to our own borders—to be once more the theatre of continual struggles between rival claimants to an insignificant throne. And after thus sacrificing our own commercial interests, and the property which our subjects have acquired in the place, we should some day have to step in again and annex it in order to put a stop to piracies, and disorders once more become intolerable. We should like to have said a word as to Salangore, for there, too, as it seems, we have been pursuing a mischievous policy; but Salangore has not yet risen in arms against us, and its case may therefore well be dealt with when the more pressing matters in Perak and Larut have been settled.

The real danger to be feared is lest public opinion at home should not support our Colonial Minister in a strong policy. Sir WILLIAM JERVOIS, when he issued his proclamation and took over the administration of Perak, was probably going further than the strict letter of his instructions warranted; and if this be the case, a Government which will have to be put on its defence in Parliament on a very great many other matters may perhaps find itself unable to carry a high hand as to the Perak question, and the policy of the Straits Government. For this reason we rejoice to see that the Straits Association in London are already on the move, and are doing what they can to inform public opinion at home as to the true bearing of this Malay States question. The annexation of those two unfortunate provinces cannot any longer seem objectionable, except to those who do not understand the case.

THE YUNNAN MISSION.

WE are glad to be able to state in reference to the anxiety felt for the safety of the members of the Mission to Yunnan-foo that arrangements have been made for an escort to accompany them to Manwyne from Yunnan-foo, and that if it is decided to proceed on through Birma they will have another escort to conduct them through the Shan States. Mr. GROSVENOR has been instructed to recover the body of Mr. MARGARY at Manwyne, and he has also discretion given him to return to China if he deems it best. A telegram announces his arrival at Ichang all well; from thence the route is to Chungking, and across Kweichow to Yunnan-foo. Taking all the circumstances connected with the negotiations in reference to the murder of the late Mr. MARGARY into consideration, we are scarcely surprised that the Chinese Government has decided to postpone the despatch of the proposed mission to England. Until something is done to show that they are in earnest in investigating the matter, and have taken the proper steps to secure the punishment of the malefactors, there is nothing for them either to promise or to explain. What they would be asked by our Government is, to see justice done; what they might have to explain would be that they had failed to do it. At present they are attempting to hunt out and punish the malefactors. Should they succeed in doing so to our satisfaction the Mission will not be wanted; should they fail, through carelessness or design, it will be useless. Only on one condition, namely, that there has proved to be some unavoidable obstacle in the way of the Commission sent to Yunnan, can they have anything to urge upon our Government in regard to which there is a reasonable probability of their obtaining a hearing.

A TELEGRAM through REUTER'S Shanghai Agency reports the resignation of Mr. HART, the Inspector-General of Customs at Peking, and that he will be succeeded by a Chinese official. This we take to be the beginning of the end of the whole system of foreign Customs. No people know better than the Chinese how to make use of people and cast them off when done with. With the introduction of native officials in place of the foreigner we shall soon see a return to the old order of things—smuggling and bribery—with a large decrease in the amount paid into the Treasury. We should add that the report is not credited in well-informed quarters here.

MESSRS. JOHN BOURNE and Co., of London, are at present constructing for the Chinese authorities winding-engines and other coal plant, such as is employed in mining coal in European countries. They are also sending out rails for a short railway in connection with the same. The rails are being rolled for them by Messrs. DAWES, of the Milton and Elsecar Ironworks, Barnsley. The rails are now ready for shipment, and the winding machinery and other coal-mining plant will be ready for shipment in about two months. This is the first coal-mining apparatus, we believe, of the European type that has been sent to China. Messrs. BOURNE have also received orders for two blast furnaces.

THE REV. R. S. COPLESTON, D.D., who is to be consecrated to the Bishopric of Colombo on the 28th inst., at Westminster Abbey, will leave for his Diocese on the 30th inst. by the *Duke of Sutherland*.

THE SUEZ CANAL PURCHASE.

MR. CHARLES MAGNIAC, of Messrs. MATHESON and Co., has addressed to *The Times* a lengthy and well-considered letter with reference to the commercial and political bearing of the recent purchase of one half of the shares in the Suez Canal by the British Government. He points out that commercially the subject may be dismissed with a few words, as it is notorious that the same shares were offered to and refused by a group of Paris financiers, on much more favourable terms; and he also points out that the purchase will not give the British Government any great influence in the management of the Canal, as by the statutes no individual holder, whatever his holding, can have more than ten votes. Passing to the political bearing of the subject, Mr. MAGNIAC calls attention in a very forcible manner to the likelihood of our having obtained this influence in Egypt arousing a spirit of jealousy on the part of France, and thus tending seriously to lead to political complications; and he concludes by urging that Mr. DISRAELI will be called upon to give a very full explanation to Parliament of the reasons which induced him to take so unprecedented a step. We subjoin the major portion of this interesting letter:—

But if we consider the position of these shares in the hands of the British Government a serious question arises. The French contend that such a sub-division as has been described would be an immoral use of the purchase; that the provision in the statutes limiting the individual voting power to ten votes was inteuded to prevent an overpowering influence cumulating in one hand, and that to act in such a way would be an evasion of the statute. It is probable that such a limitation could not be upheld upon legal grounds, because the title to the shares is the qualification for the vote, and there are no means of following ownership beyond registration; but it is evident that when the claim of a Government is contested by private persons on grounds of morality, for which much can reasonably be urged, the proposal to subdivide must be abandoned. Hence the voting power vested in these shares must be held in any case limited to ten votes, which for all practical purposes of influence upon a division is manifestly useless. But the right to even these ten votes is contested in France, upon the ground that the owner of the shares having relinquished his right to dividend, his interests in consequence, and those of the owners of other shares, are conflicting. They urge that his interest lies in the direction of a large present expenditure out of present revenue for the permanent benefit of the property, while holders of dividend-receiving shares want present returns. The question will to some extent depend upon French law, for it must be remembered that this is a French company, domiciled in Paris; but on general grounds the contention cannot be sustained. The holders of the delegations have purchased from the Khedive the dividends which he receives from the undertaking as a shareholder. It is his duty to receive those dividends and to pay them over, and whether the payment is made by the company through him, or for convenience under his authority direct to the delegation holders, nothing can override the statutory right of those identical shares to receive the dividends short of a dissolution and reconstruction of the company. And further, as it is the duty of the owner of the shares to receive and pay over the dividend, whatever it may be, so it would be manifestly a fraud upon the persons who have bought them to diminish them by improperly influencing the management of the company I think it may, therefore, be held that our Government has a right in respect of its shares to ten votes, which for any practical commercial purpose are useles. If these are the commercial rights conferred by our purchase, what are the responsibilities? Again, if the purchaser were a private individual, they would be no greater than those of the other shareholders. But the purchaser is the great, the rich, the squeezable British Government, who have bought the shares, as we have seen, to a great extent irrespective of their market value and, as they did not hesitate to avow, for political purposes. What, then, is the inevitable result? The British Government, as up to the present has been the case with the Pasha, will be looked to to supply the financial shortcomings of the company. But they have none, it may be said. Is that so sure? For some time past it has been pretty generally rumoured that the Canal needs repairs, and considering the financial straits which the company has constantly endured, it is but reasonable to expect that the expenditure out of revenue for renewals has been kept within the strictest possible limits.

Digitized by Google

However that may prove to be, the first news had scarcely been discussed before we heard suggested the necessity for doubling the width of the Canal to admit of "a free flow of traffic," and half-a-dozen newspapers contained urgent appeals for a reduction of tolls so as to make the route "universally accessible." It is only human nature that such appeals should be made. They already had been when an impecunious State and a not too prosperous company were involved. What will it not be when a country that can borrow at 3¼ per cent., and goes into a joint-stock speculation for a political object, is to be the paymaster? Every two-sous print on the Continent will ring with the niggardliness of the Government of a nation of shopkeepers that allows pounds, shillings, and pence to stand in the way of international brotherhood and intercommunication. It is idle to ignore the certainty that such questions will arise; and since by their own action the Government have no commercial standpoint from which to resist them, the more necessary is it to define their political position as soon and as precisely as possible.

It is impossible that so unheard-of a transaction should have failed to arouse politically, also, the most extravagant expectations. If in the language of the Stock Exchange it was described as the endorsement of the Khedive, so diplomatically, the only applicable word is an "ultimatum." For a Government so cautious and so timid to have so acted, is it surprising that we are considered to have shown our hand? Exit the Turk, enter the Egyptian. Unquestionably it is so regarded in the East. We hear that consternation prevails at Constantinople, and Egyptian Stock has risen 30 per cent. M. John Lemoinne buys a new inkstand, and a sharp-pointed pen, and the *Moscow Gazette* expresses, in its own peculiar language, its surprise that any nation should presume to make a political move except Russia.

In short, our Government announces by its action that the Canal with Egypt, or Egypt without the Canal, is henceforward tabooed. Was it wise to do so in this form? I have shown that the Canal is the culminating point of a French edifice built up in a long series of years. Do not let us be deceived by the present attitude of France. She is at present engaged in the process of national reconstruction. The day will come when her hands will be less tied than they are now; and when it does come we shall find that there is an objective bone of contention between us which will always stand in the way of mutual harmony. I not only do not contend that we might not have been forced to limit her influence in Egypt. It is evident that we should. But have we not chosen an inconvenient subject? As things now stand we are at a great disadvantage. France will fight (of course I mean morally) upon the battle-field of her own choosing at her own time. The interests she will ostensibly defend, and which she will make use of as instruments of offence, will be the private ones of her subjects, which she can support or let sleep at her convenience. Our interest being a national one will admit of but one mode of treatment—viz., a national one, from which there can be no retreat without national dishonour; and before what tribunal shall we find ourselves? One of our own deliberate choice by this act of ours. An undefinable bit of England located in Egypt, subject to the laws of France. M. de Lesseps *versus* the British Nation before a Court of First Instance in Paris with an appeal to Aix and the national prejudices of every Frenchmen, and the well understood political influence of the French Government in the background.

Then Russia. If there are undefined ideas in France connected with the Mediterranean and the East, is it not notorious that they are exceeded by those in Russia? The very violence of the *Moscow Gazette*, representing as it does the opinions of a powerful influence, shows that we shall have to meet, not only justifiable national reserves, but unjustifiable individual jealousies. Between the lines of the utterances of that journal is to be read in large print, "You have taken Egypt; we shall take our Egypt wherever we may select it." Are we prepared to open the Dardanelles? I believe not; for if we do, there is but one course open to us in case of war—to close one end or other of the Canal; and with how many other nations will not that mean war also?

And will the possession of ten votes in the Suez Canal Company confer upon us any public right of nterference which we did not possess before? I believe not. Our national interest far outnumbers that of any other nation, and the statutes of the company, which secure equal treatment for every comer, entitle the interference of our Government in case of need in its most direct and legitimate form.

Our right is that three-fourths of the tonnage using the Canal should pass without let or hindrance alongside of one-fourth belonging to every other nation.

The figures have been published. I will repeat them.

Traffic in 1874.

	Tons.		
English	1,797,000	Italian...	63,000
French	222,000	Spanish	50,000
Dutch	103,000	German	39,000
Austrian	84,000	Others various ...	

These figures speak for themselves. The only justification for the action of our Government has been tersely and precisely stated in your columns—"What would have happened if the shares in question had fallen into the hands of a foreign company?" Mr. Disraeli will have to show Parliament that the consequences would have been such as to justify the measure he has adopted to avert them.—Your obedient servant,

Lombard-street. Charles Magniac.

THE NEW MAIL SERVICE FOR AUSTRALIA AND NEW ZEALAND.

The *Zealandia*, Captain Ferries, the first of the new line of steamers between San Francisco, Australia, and New Zealand, left the Docks for Melbourne and Sydney on the 15th inst., with a full cargo and about 140 passengers. The *Zealandia* is a magnificent steamer of 3,000 tons, 600-horse power nominal, 376 ft. in length, and 38 ft. beam, built by Messrs. John Elder and Co., of Glasgow. The engines are compound, with two cylinders of 62 inch, and one of 45 inch, with 4 feet 3 inch stroke; consumption of coal, 35 tons per day, on a speed of 11½ knots. Her saloon and passenger accommodation are excellent, especially the former, which is remarkably light and airy, and being placed forward of the funnel escapes the heat and smoke of the engine-room. An excellent luncheon was given on board on the 13th, at which about forty sat down, including Sir James Fergusson, late Governor of South Australia, and of New Zealand; Lord Richard Grosvenor, M.P.; Hon. C. Hanbury Tracy, M.P.; Mr. Donald R. Macgregor, M.P.; Mr. John F. Ure; Mr. Dutton, Agent-General for South Australia; Mr. Young, Secretary Royal Colonial Institute; Mr. Thomas Russell, Postal Commissioner for New Zealand; Captain Jopp, representing the Agent-General for New South Wales; Colonel Cargill, representing the Agent-General for New Zealand; Captain Lawrence; Mr. Clark; Captain Ferries, of the *Zealandia*, and others.

Mr. Ure, of Messrs. John Elder and Co., after the preliminary proceedings, proposed the health of the Queen, which was heartily responded to.

Mr. Donald McGregor, M.P., then followed with the health of one who was far away, the Prince of Wales, coupling with it the Princess of Wales and the Royal Family.

Sir James Fergusson then said that he was of opinion that the undertaking was in a fair way to prosper. There were two good gentlemen who sat at the head of the table who had devoted much of their time and energy to the enterprise. He had no doubt it would make a speedy mail service and a good route. He gave success to the vessel, and coupled with it the names of Mr. McGregor and Mr. Ure.

Mr. Ure, on rising to respond on behalf of the builders, said they had made it their aim to build the best vessels they could. There had been several failures in that direction before. He had been tempted to try the experiment, and hoped it would prove a source of profit. He was glad to see that the railways of America had taken an interest and increased the speed of the trains between New York and San Francisco. The journey from Liverpool to New Zealand is now performed in forty-two days, at a cost of £75, while freight will be taken at a through rate of £10 per ton, out of which the American railways will receive 1c., or a halfpenny per mile. He concluded by saying he hoped that a good venture had been made.

Mr. McGregor then proposed prosperity to the colonies of New Zealand and Australia. He was sure it would be well received, as he felt he could assert that everybody present had some relation or friend there. People were constantly emigrating to the colonies, and he was glad to say they were the right sort of people. He would give the toast to the colonies, and with them Mr. Russell, Captain Jopp, and Mr. Russell's daughter, who had so ably christened the vessel.

Mr. Russell, replying on behalf of the colonies, said he wished them all success, and hoped everybody would support them as far as possible. The enterprise he considered was likely to succeed; the subsidy began with £15,000, and increased to £40,000, and now, when New South Wales came to the rescue, it was raised to £90,000. In his opinion the route far exceeded any other. There was large accommodation for passengers, but great as it was, he considered it would be more than full at times.

Captain Jopp remarked that he was not personally interested, but it is a saying that on-lookers see the most of the game, and the enterprise was undoubtedly pushed by able men, to which the mail service owed its present success, but he hoped it would rise higher. He wished to add Mr. Clark's name in connection with the arrangements completed in London.

Mr. Clark (of Messrs. Lawrence, Clark, and Co.) said he thought his partners ought to be with him, though certainly accidental circumstances had thrown him more prominently forward than them. The two vessels they had were fine ones, and he had no doubt the vessels building in America were of similar construction, the speed and passenger accommodation being the same; the railway companies would give their support to them; and he felt sure the service would now be such as to satisfy the Colonies, the Mother Country, and the United States.

Mr. Ure then gave a vote of thanks to the gentlemen who had honoured the ship with their presence.

Mr. McGregor proposed the health of Captain Ferries, whom he described as one of the best men in the mercantile service.

Captain Ferries thanked Mr. McGregor and the company for their toast, and said that he hoped to make his passengers comfortable, and accomplish a quick passage.

JAPANESE PROGRESS.

(New York Times.)

It was said in our foreign despatches, a few days ago, that one of the causes of the impending war between Japan and Korea was the appearance of Japanese officials, dressed in foreign costume, at Korean ports. This may not be strictly correct, but it is partly so. The account of this new international difficulty, as given in the Japanese newspapers, is worth passing notice. It appears that a Japanese man-of-war, bound on a cruise of observation, put into a Korean harbour. While engaged n taking in supplies the vessel was visited by a party of officials, who

Digitized by Google

manifested great rudeness. Among other inquiries put by these functionaries was this: "As you are Japanese, how is it that your dress and your ship are foreign?" The commander of the ship, resenting this and kindred impertinences, ordered the officials into their boats. Subsequently, negotiating with the higher authorities of the province, the Japanese commander informed them that his Emperor, "by his transcendent genius, noted the condition of the world, and the result was the institution of numerous reforms, and the reorganisation of the State." He proceeded to say that the strengthening of the Navy and the adoption of certain foreign customs was "an enlargement of knowledge." "What will Heaven say," asked this devout naval officer, "if we are unacquainted with the civilisation of the world?"

This admirable reply did not please the Koreans, who refused water and provisions to the Japanese; and when their ship had passed a couple of forts the Koreans opened fire upon them from the shore. The Japanese landed, put the native soldiers to flight, plundered the fort, burned the castle, as it was called, and sailed away in triumph. The result of this sudden collision is very likely to be serious. Generally speaking, the Japanese native newspapers are against war. Some of them, curiously enough, recall the Simonoseki affair, in which their forts fired on American and English vessels; and they argue that as England and America took time and used diplomacy to adjust that quarrel, Japan should not now be in haste to go to war about a similar occurrence. One journal says that since this insult came from Asiatics Japan should take no notice of it. That is to say, "new Japan need not resent an injury from uncivilised, low-down Asiatics." This is a singular instance of the objection to the Japanese to be classed as Asiatics; and, added to the fact that they are regarded by the Koreans with some such derision as that which the fox with his tail cut off met with among his comrades, it shows what a strange revolution is going on in that remote quarter of the world. Not only have the Japanese lost caste with their half-civilised neighbours, but they are elsewhere imitating the adventurous example of that American naval commander who, not long since, opened Japan to the world.

The *New York Journal of Commerce*, in giving the official returns of Japanese Commerce for 1874, observes that if anything were necessary to demonstrate that commerce is one of the most potent elements of civilisation, it is afforded by statistics of the rapid increase in the business intercourse between Japan and Europe and the United States. It seems but a few years since the barriers of Japanese exclusiveness were overthrown, and yet her foreign trade has attained to proportions that would not be discreditable to some European nationalities which lay claim to a much higher civilisation. The state of society in the leading commercial capitals, or open ports, appear to differ in no very essential particular from that of the average commercial capitals in other parts of the world, at least so far as the foreign portion of the population are concerned. The public journals of Yokohama are filled with much the same kind of news we find in our New York newspapers. In point of fact, Japan has already adopted many of the virtues and also some of the vices of the "outside barbarians," which, perhaps, is the best evidence that can be afforded of the progress of "enlightened ideas." There is every reason to believe that this progress will be much more rapid in the future than it has been in the past, not only in Japan, but throughout the Far East. The very fact that Japan and China have commenced the education of their youth in Europe and the United States affords the strongest kind of presumptive evidence of their desire to participate in the advance in the arts and sciences, and in commerce, which they see going on so rapidly in the Western World. The Japanese Government is represented in this city by an intelligent native consul, who is using his best efforts to promote commerce between the two countries, and his success thus far has been very gratifying, though this commerce is destined to increase many fold at no distant period.

SHORTENING THE ROUTE TO CHINA.

(NEW YORK TIMES.)

The Commission appointed by the Secretary of the Navy to investigate the merits of the various ship canal routes for connecting the Pacific and Atlantic Oceans has prepared a preliminary report, which will be presented to the President. General Humphreys, of the Army, Commodore Ammen, of the Navy, and Captain Patterson, of the Coast Survey, constitute the Commission. The problem of connecting the two oceans has occupied the attention, as the report says, of statesmen, navigators, and mariners for at least 375 years. The enormous saving of distance, time, cost, and risk which it would give to the world has been carefully tabulated. There remains nothing to show but the feasibility of the route. This, the Commissioners' report claims, has been done in the surveys made upon the Nicaragua route. The commission examined all the reports of surveys that have been made Under the Darien route there are several distinct surveys: the Nap-pi recently reported in these despatches by Lieut. Collins; the Caledonia, the Sasardi, and the San Blas. Besides these are the reports upon the Tehuantepec, the Nicaragua, and the Panama routes. The surveys of the Panama and Nicaragua routes were made by Captain Lull, of the Navy. Captain Schufeldt, of the Navy, surveyed the Tehuantepec route, and Captain Selfridge, of the Navy, the others. All these gentlemen were before the Commission in its recent examination, and with maps aided in the explanation of the reports made by them. Upwards of sixty thousand dollars has been already expended upon these surveys. It is now regarded as of the highest importance that the United States take some action at once to carry out the feasible plans of the ship canal, in order to prevent either France or England from coming in and reaping the honour and profit of this great enterprise.

The result of this work cannot be fully estimated. The great saving in the carrying trade and the facilitating of the connections between Eastern Asia and Western America with Europe cannot be readily surmised. When the canal is completed nearly one-half of the carrying trade of the world will be revolutionised. The Commission has made a most thorough examination of all the evidence before them, and warmly urge upon Congress the need of speedy action. Besides the testimony of the naval officers who have made the surveys, they had also the testimony of a civil commission made up of Messrs. Walton and Ammen, and Major McFarland of the Army Engineer Corps, who have examined carefully the feasibility of a ship canal. In examining the various reports objections of an almost insurmountable nature were found in all but the Nicaragua route. It is a longer route than any of the others, with the exception, perhaps, of the Tehuantepec route, but its other advantages more than make up the bad feature of length. It is the only route where the climate is not dangerous to health. In the lower routes the malaria would destroy the greater portion of the workmen before the canal would be completed. It is the only route where a proper supply of water could be found, Lake Nicaragua upon this route being capable of furnishing a constant and uniform supply of water. The other routes are very defective in many other ways. They extend through a worthless waste of country that is impossible of development. The route through Nicaragua is represented as the paradise of Central America, and would return untold wealth under proper development.

The cost of the ship canal *via* the Nicaragua route is thus recapitulated by A. G. Menocal, Chief Engineer of Captain Lull's expedition. The total distance from the harbour of Greytown, or San Juan del Norte, is 18 26-100 statute miles. The cost for the canal for this distance is thus summarised:—

Western Division...	$21,680,777
Middle Division	715,658
Eastern Division	25,020,914
Harbour of Brito...	2,337,739
Harbour of Greytown	2,822,630
Total	$52,577,718
Add twenty-five per cent. for contingencies	13,144,429
Grand total	$65,722,147

For the comparatively small sum of sixty odd millions the Commission claims, an enormous return would be made. One item alone, it is thought, would make the expense of building the canal a good investment, and that is the shipment of California products to Europe and the ports upon the Atlantic coast, but more especially to Europe. California ships large quantities of wheat to the European markets at present. All of this wheat has to go around by Cape Horn, meeting the dangers of that stormy passage and encountering a long delay and expense that would all be obviated by the canal.

To allow any foreign Power to build this canal and we pay tolls to them for its use is a thing which the Commission thinks the people of this country will not tolerate. The report advances arguments sustaining the Nicaragua route, the principal among which is that the climate through which the route passes is favourable to the construction and operation of the canal.

JAPAN AND KOREA.

(THE HOUR.)

Korea is a nominal dependency of the Chinese Empire, and has refused intercourse with any other nation, referring all seekers for trade and intercourse to Peking. They send an Embassy to the Chinese Emperor every winter to give and receive presents, and so far as known their relations with the Chinese Government are friendly. A few years ago an American trading vessel, the *General Sherman*, adventured upon the coast of Korea for commercial intercourse, but the overture was received in a very unfriendly manner, and several of the adventurers were killed, and others imprisoned and maltreated. The United States Minister in China took up the matter with some warmth, and accompanied a portion of the fleet of his Government in Chinese waters to the coast of Korea, for the purpose of obtaining satisfaction, but they were repulsed, and gained neither military nor diplomatic advantage in the controversy with the Koreans, and so the matter has rested without further pressure. The Japanese recently sent an Embassy to Korea to remonstrate against the ill treatment of some Japanese seamen who had been cast ashore in Korea and were maltreated by the natives, but the ruler of Korea refused to receive the Japanese Embassy, reproaching them with having abandoned the costume of their ancestors and adopted European dresses and customs. The result of this rebuff was a threatened invasion from Japan to chastise the Koreans for their inhospitality and incivility. The Koreans naturally applied to the Chinese Government for protection, hence the proposed despatch of Chinese troops for the Peninsula. The population of Korea is estimated at 8,000,000, but as they have absolutely prevented any intercourse with foreign nations up to the present time very little information can be obtained of their condition or resources. Their fortresses on the sea coast were sufficiently strong to repel the American attack made some years ago. The Ambassadors who visit Peking annually are clothed in cotton gowns of their own manufacture, wear straw hats of the sugarloaf pattern, and bear the evidences of cultivation and refinement; they are perfectly independent of the rest of the world, and produce in their hermetic peninsula all that they require. Ever since the emergence of the Japanese from their exclusiveness, they have been "spoiling for a fight" with their Chinese neighbours, and in their recent invasion of the Island of Formosa the Japanese exhibited but little respect for the Chinese Sovereinty. The threatened attack upon the Korean Peninsula is a continuation of Japanese aggression, and, as they have a superior fleet, the Chinese would not at present be able to compete with them in maritime warfare. In addition to this the Japanese, by the adoption of foreign customs, arms, and military drill, have acquired the friendship of foreigners, and in any conflict with the Chinese over the Korean Peninsula would have the good will and assistance of foreign fleets in Japanese waters, especially of the Russians and Americans. An invasion of Korea by the Japanese would tend to open

Digitized by Google

relations with that secluded people, and as foreign nations, especially the Americans, forced open the hermetically sealed ports of Japan to foreign intercourse, no complaint can be made if Japan in return should attempt to force the gates of the Peninsula. The grievance of the Japanese is precisely the same as the grievance of foreign nations against Japan—the imprisonment and mistreatment of shipwrecked seamen—and as Japan has been admitted into the family of nations, she surely has the right to protect her subjects upon the adjacent coasts. As China has held proudly aloof from friendly intercourse with foreign nations, she can expect neither sympathy nor alliance in any contest in which she may become involved with Japan. On the contrary, the humiliation of China, by the wresting of the Korean Peninsula from her control, by her warlike neighbours, the Japanese, would be looked upon with complacency, if not with favour, by foreign nations; at least, the chastisement of the Koreans for their inhumanity to shipwrecked Japanese is a a duty forced upon Japan by her new position as a maritime power; and we have no doubt she will acquit herself well of the obligation, notwithstanding "the drilled Chinese troops which are to be despatched to Korea to repel any invasion that might be attempted by the Japanese."

THE RAILWAY IN CHINA.

(DAILY TELEGRAPH.)

China, the last stronghold of Conservatism, is on the eve of being stormed. We are told, on the authority of the *London and China Telegraph*, that a company has been formed in the British metropolis for the purpose of introducing railways into the Flowery Land, and that the first experimental line will be made between Shanghai and Wosung, a distance of nine and a half miles. Let not the modesty of the project be sneered at. Our first experimental railway starting from the metropolis was only between London and Greenwich; the next was merely from London to Croydon. The promoters of the first Chinese railway are clearly in earnest, since our contemporary goes on to state that a contract has been entered into between the Shanghai and Wosung Road Company (Limited) and a well-known English contractor, and that the materials for the permanent way have already left for the Middle Kingdom. The engineer of the company went out to China some time since, and would be on the spot to commence operations as soon as these shipments arrive. It is expected that the railway will be completed, and in full working order by next July, when the novelty of seeing trains actually running over the distance in a few minutes is considered by the promoters of the scheme as certain to attract a large amount of Chinese passenger traffic. The line being avowedly tentative, will be constructed on the narrow guage of two feet six inches, the funds at present in command not admitting of a greater width. Such a guage, it is obvious, would be found quite inadequate to meet the requirements of a heavy traffic, but it is cogently pointed out that the first object to be accomplished is to prove Chinese railways a possibility, and a successful one. Thus if the enterprise of the Shanghai and Wosung Road Company is able to make this small line a paying concern, there can be little doubt that ample funds would be forthcoming in this country to provide railway communication between the more important centres of commerce in China. A qualified assent may be given to the opinion that if the projectors of this enterprise succeed in attaining satisfactory results the undertaking would effect more real good in our relations with China and the Chinese than all the treaties and conventions we have ever entered into with the Government of Peking. It must not, however, be forgotten that so long as the creeds and the customs of the Chinese retain the force which they at present possess there will always be one very serious, if not fatal, obstacle to the popularisation of railways in a country and among a people which seem to be wholly impervious to the influences of modern civilisation, and who have a supremely ancient civilisation of their own which renders them more difficult to deal with than the most benighted of barbarians. The Flowery Land is a country not only of canals, pagodas, paddi-fields, silkworm farms, tea plantations, and potteries, but of extramural and intramural cemeteries. It is the largest graveyard in the world; and the filial piety of the Chinese for the bones of their ancestors has converted an inconceivably extensive area of the empire into holy ground, from which the railway surveyor would be solemnly warned off either by imperial or provincial authorities, or by the inveterate prejudices of the natives themselves. The burial-places are generally on the side of a hill, which is cut in terraces one above another; and a most picturesque appearance do the white and black marble tombstones present, with their inscriptions in letters of gold, amid the trees and shrubs which are planted about them. When the time arrives for the performance of the commemorative rites, all the male population of the towns and villages repair to the place of interment, carrying with them wine and meats, sticks of incense, and paper offerings, to burn at the tombs, which they sweep very carefully before they make their sacrifices. Every wealthy family has, moreover, a temple or large building, called the Halls of Ancestors, in which are placed tablets of stone or wood, bearing the names and ages of all deceased relatives for many generations, with the dates of the days on which they died, and the occupation each had followed in this world. Again, a son will sometimes retain the body of his parent in his house for years enclosed in a varnished coffin, usually very richly ornamented. This is placed in the best apartment, and on commemorative occasions candles are lighted and incense burnt before it. This uncomfortably ceremonious people have likewise the habit of maintaining small domestic intramural cemeteries of their own. Their back gardens and summer-houses are full of ancestral relics neatly stowed away in tea-chests or earthern jars; in fact, in the more populous districts of this extraordinary country the feet of the traveller, like those of Friar Laurence in "Romeo and Juliet," "stumble at graves."

THE MURDER OF MR. BIRCH.

(THE TIMES.)

The intelligence from the Malayan Peninsula, on the authority of the Colonial-office, is very satisfactory. Sir William Jervois, in his telegraphic despatch to Lord Carnarvon, is not only able to report a considerable military success, but to remove the apprehension of a formidable political peril. The British Forces in the Peninsula received reinforcements with great promptitude, both from Hong Kong and Calcutta; and a few days ago an attack was made upon the only body of the enemy which seems to have presented a seriously hostile organisation. Nowhere else in Perak does it appear that there is any substantial opposition. The brief intimation that "no more troops are wanted at present" may be taken, we suppose, to signify that the danger of any general movement on the part of the Malays has passed away, if it ever was really threatening. Nevertheless, the precautions which have been opportunely taken in garrisoning Malacca itself and some other posts with Ghoorkas—the wiry little hill-men who do such admirable service in our Indian Army—and in providing additional artillery are by no means unnecessary. A sudden attack either of mere pirates or of fanatical Malayan Chiefs would do much mischief at a very delicate crisis if we were not able to repulse anything of the kind successfully and immediately against whatever point it might be directed. When, however, our little army has done its work as effectively as we have a right to expect, and when Sir William Jervois is able to report to the Colonial-office that Perak is pacified, we cannot evade the question which it was necessary to set aside until the task of re-establishing the credit of our Government in the Eastern Seas had been accomplished;—Are we to retain or to extend the administrative authority over the State of Perak which the Sultan, set up by Sir Andrew Clarke in 1874, ceded to the Governor of the Straits Settlements a couple of months ago, and which the Governor accepted in a formal Proclamation? If we are, we must understand that we take upon ourselves all the responsibilities of ruling a turbulent and passionate people who have certainly shown no affection for our rule. The Proclamations issued in October by Sultan Abdullah and Sir William Jervois conveyed explicitly to British officers nominated by the Straits Government the supreme judicial and administrative authority in Perak. In form the transfer may be only temporary, and may reserve the sovereign rights of the protected Prince; but in fact the State was annexed to the Straits Settlements by the acts of the Sultan and the Governor. But an addition to our dominions of this character and extent is a very serious operation. That the cession is in terms temporary does not make it less important, for we know by many embarrassing experiences that it is far easier to take responsibilities of government upon ourselves than to get rid of them afterwards. The difficulty of receding from a position such as that which Sir William Jervois assumed in Perak a couple of months ago is plainly considerable; yet, if the Colonial-office comes to the conclusion that we cannot beat a retreat, it must determine to carry out energetically the organisation of government, the preservation of order, and the enforcement of justice among the Malays. This is a large enterprise, and not a welcome one. Some time ago, when attention was first drawn to the scope of Sir William Jervois's arrangements with Sultan Abdullah, the Colonial-office hastened to assure the country that no instructions tending to encourage annexation had been sent to the Straits Government; but, whatever were the principles on which Sir William Jervois was directed to act, the practical result of his acts is that we stand committed to keep the peace, dispense justice, and raise revenue in a territory of which we know little more than the outline.

It may be, of course, that Sir William Jervois acted under the compulsion of circumstances, and that he could not avoid assuming the authority which the Sultan of Perak offered to delegate. But, if this be so, the necessity ought to be made clear. This country has no desire to add new provinces to her vast Empire, and though sometimes we are morally bound not to decline the responsibilities which gravitate to an Imperial race, we do not accept them, except after full reflection and free discussion. The advance the Straits Government has made in the Malay Peninsula had certainly not received any adequate share of reflection and discussion in this country, and we have been officially assured that it was not deliberately approved by the Colonial-office. The state of things is at the least peculiar. There can be no doubt that the steady opinion of the great majority of Englishmen is that we have no business to take upon ourselves new burdens of ruling, yet it is equally clear that the progress of English commerce imposes upon the Imperial Government an undefined, but universally recognised, obligation to secure to the lives and property of Englishmen in semi-civilised countries a fair measure of protection. Then comes the difficulty of intervening to enforce order and honesty on barbarians or half barbarians, without applying our superior power in such a way that dominion must fall to us. It seems to have so fallen to us in Perak; but there must be an error in policy or a defect in system somewhere when such a revelation comes upon the country with a shock of bewilderment.

(STANDARD.)

There seems little room for doubt now that the cause of the outbreak is to be found in the proclamations to which we have referred. Those proclamations apparently reduced the Sultan of Perak to a position of absolute dependence on the British, just as the Dutch have reduced the native princes of Java and the greater part of Sumatra to a similar dependence on themselves. It was natural that the chiefs and people of Perak should resent such a policy and attempt to resist it, and it would be especially natural that Sultan Ismail, the competitor of Sultan Abdullah for the throne, should do so. It was the state of anarchy into which the rivalry of these two princes had plunged Perak that brought us first into the principality. This anarchy was aggravated by a kind of civil war which the Chinese miners had raised in the neighbouring State of Laroot. To put a stop to the piracy springing out of these conflicts Sir A. Clarke interfered about two years ago, and induced the contending factions to submit to his arbitration. He had placed Sultan Abdullah on the throne, stipulating

Digitized by Google

that a British Resident, with a right to give advice in all emergencies, should be received both at Perak and Laroot. Mr. Birch was appointed Resident at Perak, but apparently he found Sultan Abdullah unable to carry out the advice which he thought it requisite to give. Whether Ismail raised difficulties we do not yet know. But it would, at least, not be surprising if he opposed to the utmost of his power the transference of authority to Mr. Birch. It would appear, however, from the telegrams as if in Penang he is believed to be innocent of the murder of Mr. Birch, and not to have cast in his lot with the insurgents. As regards the policy of the proclamations, it would obviously be unjust to pass a decisive verdict in the present lack of information. The instructions sent to Sir W. Jervois, the Governor of the Straits Settlements, are to punish the murder of Mr. Birch in an exemplary manner and to restore order in Perak, but to avoid everything like a policy of annexation. There can be no doubt that these instructions harmonise with public sentiment in the matter. It would seem, however, that only a part of the Perak population is hostile. One of the latest telegrams from Penang expressed a hope that Ismail would prove friendly, and it is expressly stated that some chiefs had refused to join the insurgents. This seems to prove that the disturbance has no religious origin, and that there exists no fanatical hatred of the British. It is still more important to note that none of the neighbouring States have declared against us. Laroot is quiet; the Chinese miners there, indeed, have offered to aid us if necessary. In Salangore, also, another principality in which we have a Resident, all remains peaceable. It seems clear then the outbreak is merely local, and it is extremely probable that it was provoked by the proclamations vesting all power in the British Resident, and, consequently, that it was unpremeditated. But the cause of the outbreak is now less important than its suppression. The first thing to be done is to punish the murderers of Mr. Birch, to reassert British authority, and restore order. When these objects are attained the time will come for inquiring into the causes of the crime and the insurrection that has followed it. The interruption of telegraphic communication has prevented us from hearing from the scene of the disturbances for more than a fortnight, but from Moulmein we ought soon to have intelligence, and we do not doubt that it will be to the effect that the strong force which, when last heard of, was marching against the insurgents had already accomplished its purpose.

DEATH OF THE HON. BENJAMIN P. AVERY, U.S. MINISTER AT PEKING.

We regret to announce the death of Mr. Avery, at Peking, on the 8th Nov. The announcement comes to us from New York, and it is strange that no direct telegraphic intelligence of the event has been received. However, there appears no reason to doubt its correctness, and we presume that the U.S. Government have engaged with Dr. S. Wells Williams, who has so long held the post of Secretary, and who is now in New York on leave, to proceed with all despatch to fill the post of Minister. We know that it is difficult for the American Government to put the right man in the right place, but we hope on this occasion that President Grant will show his independence of party and lobby influence. Mr. Avery has had only a short term of office at the capital of China, and his career there has been comparatively uneventful, but he has earned the credit of always co-operating in a courteous and hearty manner with his colleagues, and will be much regretted both as an official and an individual by all who have come into contact with him. He was a very quiet man, and not much heard of, but when the usual correspondence is published at Washington, we expect Mr. Avery will be more appreciated for his ability.

Since the above was in type a telegram has been received announcing the appointment of Mr. G. F. Seward, Consul-General at Shanghai, as successor to Mr. Avery.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, DEC. 14.

The struggle between our Protectionists and Free Traders, to which I referred in my last letter, is now—as regards the intended abolition of the iron duties from the beginning of the year 1877—at an end. The Reichstag, in its sitting of the 7th inst., determined, after long and fatiguing debates, to maintain the intended abolition. A Bavarian member, Herr Bamberger, in plain words declared it to be nonsense if any body expected a flourishing of our iron trade by the maintenance of import duties; as the depression of this industry is the consequence of over-speculation and over-production during the last three years, and is not attributable to the intended abolition of the duties. As the principal consequence of this resolution of our Parliament must be considered the maintenance of Free Trade principles, first promulgated by the Prussian Government in 1848, and followed by the German Empire since its ereccion.

The trade in German coals at Hamburg, Berlin, &c., has increased very much during the last four or five weeks. Formerly there was only one or two extra coal trains a day in these directions, but now I hear of twice that number. The number of waggons in the ordinary coal trains has increased from twenty to twenty-four to forty a day.

The Board of Trade at Hamburg has just issued its annual statistics and some of the items may have an interest for your readers. First I may give you the number of the emigrants from here to Transatlantic ports, which have been:—

	1872.	1873.	1874.
Direct passage	53,223	44,578	30,625
Passage via England ...	21,183	24,598	12,818
Total	74,406	69,176	43,443

You will see by this decrease—40 per cent. in two years—that the Transatlantic steamship companies have probably had their day, and such prosperity as has been the rule will hardly be likely to return. The above-mentioned 43,443 emigrants in 1874 have been forwarded directly in 138 steamships (27,738 persons), and 58 sailing vessels (2,887 persons), while the rest of 12,818 persons went per steamer via England.

Subjoined are statistics concerning the number of vessels hailing from Hamburg:—

	Sailing vessels.		Steamships.		Total.	
	Number.	T.R.	Number.	T.R.	Number.	T.R.
1870...	402	152,061	37	32,444	439	184,510
1871...	366	138,726	40	37,351	406	173,077
1872...	340	125,347	62	54,247	402	179,644
1873...	335	123,099	82	78,413	417	201,512
1874...	339	127,486	103	88,258	442	215,744

Remarkable is the continued decrease in the number and tonnage of the sailing vessels, while the steamers have nearly constantly increased, as well in number as in capacity.

The total imports into Hamburg amounted to:—

	Netto cwt.	Value excl. Specie.	Specie.
1871...	68,175,000	1,546,809,000m.	262,923,000m.
1872...	73,072,000	1,712,373,000 „	304,857,000 „
1873 ..	68,641,000	1,714,407,000 „	229,660,000 „
1874...	72,055,000	1,686,518,000 „	65,878,000 „

From the United Kingdom was imported in:—

	Value.	Per cent. of the total import.
1872...	554,263,000m.	32.4
1873...	503,500,000 „	29.4
1874...	510,312,000 „	30.3

From China and Japan:—

	Value.	Per cent. of the total import.
1872...	5,769,000m.	0.3
1873...	5,512,000 „	0.3
1874...	5,825,000 „	0.3

From the East Indies and sundry ports of Asia:—

	Value.	Per cent. of the total import.
1872...	6,094,000m.	0.4
1873...	8,475,000 „	0.5
1874...	7,194,000 „	0.4

The Post-office asks the public to inform their correspondents abroad to address letters to Germany not only with the name of the receiver and the name of the town, &c., where he lives, but to give, in addition, the name of the street and the number of the house, or any similar particulars, otherwise it will be impossible to the Post officers to distribute the arriving letters immediately, and in the shortest time. In explanation of this I subjoin the number of letters received in Hamburg alone during the last three years:—

1872...	10,375,560
1873...	14,024,332
1874 ..	14,281,501

It is evident that owing to such a rapid development the distribution must be greatly retarded if the address is not given in a very clear and distinct manner.

It is no longer doubtful that the coal steamer *John Sauber*, already reported as missing, has foundered with all hands; the more so as a metal plate, on which the building number of the steamer, name of the building yard, year of construction, &c., had been engraved, and which had been fixed to the mizen mast of the *John Sauber*, has been found, together with a stump of the mast, on the coast of England, near Filey. The case is the more melancholy as out of nineteen men on board twelve were married, thus leaving twelve widows and twenty-eight orphans. The benevolent and charitable character of the inhabitants of Hamburg showed in this case again its well-known activity, and as soon as the news arrived here that the above plate had been found, a committee was formed for supporting the helpless families, and in less than three days about 10,000 marks (£500) were subscribed, certainly a good commencement, although not enough to afford a lasting help to the poor widows.

Just a week since the first telegram came in announcing the melancholy loss of the well-known and splendid steamer *Deutschland*, Captain Brickenstein, on the Kentish Knock, at the mouth of the Thames. The steamer, bound for Southampton and New York, had left the Weser river on Sunday, Dec. 5, at nine o'clock in the morning, and at five o'clock next morning ran aground. It is satisfactory to know that in this case neither the company to which the steamer belonged, the Nordd. Lloyd at Bremen, nor the captain who commanded her are in any way to be blamed. The steamer was furnished with every appliance for the saving of life, the captain was an old and experienced sailor, and everything on board was of the best quality, so that the wreck must be attributed solely to the bad weather, and to an accident which it was not in the possibility of any human being to avoid, viz., the loss of the screw at the moment when it was most needed. About the particulars of the disaster I need not give any information, as the case has been sufficiently discussed in England and the English papers.

The two above named fatalities were shortly afterwards followed by another great catastrophe, which, remarkable enough, happened to the same company to which the *Deutschland* belonged. The steamship *Mosel*, 3,000 tons, was lying in the basin at Bremerhaven bound for New York, when on Saturday morning, the steamer being ready to leave the dock to proceed on its voyage, the signal was given for the passengers to come on board. The whole of the quay was crowded with labourers, spectators, officers of the company, and friends of the passengers, &c., and the moment of bidding farewell had arrived, when alongside of the ship an explosion took place, which in violence and destructiveness exceeded anything hitherto known here. Human bodies were torn limb from limb, and arms and legs were strewn about, and sixty to seventy, if not more, lives were lost, and besides a great many wounded. A box or cask filled with dynamite or nitro-glycerin had exploded, a hole six to seven feet deep was made in the quay, and the steamer itself was so much da-

Digitized by Google

maged that she had to postpone her intended departure. The exploded cask had belonged to a first cabin passenger, a Mr. Thomas, of Dresden, who, when he saw the horrible sight, endeavoured, though unsuccessfully, to commit suicide. The depression in Bremerhaven, of course, is very great.

The Deutsche Nordpolar-gesellschaft, a company founded for the prosecution of the whale and seal fishing in the North Polar regions, has resolved to sell its vessels, in consequence of which, some days ago, three steam whalers, viz., the *Greenland*, *Norwegen*, and *Spitzbergen*, were brought to public sale at the Exchange-hall, but all three were withdrawn, as the bids did not at all come up to the reserved prices.

The Hamburg-American Packet Company announces the rates of freight for their extra steamer to the Philadelphia Exhibition at $7 gold, measurement, or per 1,000 kilo. weight at the Company's option, free to the Exhibition building. The steamer is to leave here about the middle of February.

Shortly after my last letter the frost set in here rather sharply, the river was soon filled with ice, and there was every appearance of an ice blockade, especially as four steamers, unable to force their way through, got fast in, close to Altona. But the Eisbrecher (icebreaker) gallantly cleared away all the obstacles. Coming up from the lower river it first freed the four steamers mentioned, then steamed up to the harbour, and down again, and kept the river so well open, that steam traffic has gone on all the time almost entirely undisturbed, although we have had as much as twelve degrees of frost several nights. Since Saturday last the weather has changed, and now there is scarcely any ice visible in the river.

As regards our communication with the East Indies and China, neither arrivals nor departures are reported, and rates of freight are on the same scale as last reported. The *Bellona* steamer will leave in a few days for Singapore, &c., and being only of middling size, will be a full ship. The *Therese Behn*, for Singapore, *viâ* Penang, and the *Deutschland*, for Hong Kong, are slowly filling up.

PRODUCE MARKETS.

There is quite a lull in our market, partly in consequence of the approaching Christmas and partly in consequence of the prevailing coldness, as supplies are very scarce, because the navigation of wooden-ships has almost ceased.

COTTON in moderate demand, and pretty firm in tone; quotations are quite nominal.

SPICES.—Mace and Nutmegs are quiet, the former are quoted M.6.40 to 6.60 per kilo.; the latter M.6.40 to 7.00 per kilo. Cloves are changing owners pretty freely, quotations for Amboina quality M.170 to 172 per 50 kilos.

PEPPER neglected: Quotations for Singapore quality, M.53.50 to 54.00; for Penang quality, M.48 to 49 per 50 kilos.

RICE.—The market for cleaned quality is very firm, but transactions have been moderate in consequence of the limited supply. Quotations for raw quality: Java, M.12 to 14; Java table, M.16 to 21; Bengal, M.11 to 15; Siam, Madras, Ballam, &c., M.8 to 11; Rangoon, M.8¾ to 9; Bassein, M.8½ to 8¾; Arracan, M.8¼ to 8½; Maulmain, M.8¾ to 9¼; Saigon, M.8 to 8½, per 50 kilo.

TEA is quiet, and transactions are of no importance. Quotations per half kilo.:—Congo, ordinary to good ordinary, M.1.00 to 1.15; ditto middling to fine, M.1.35 to 4.00; Souchong, ordinary to good middling, M.1.20 to 1.70; ditto fine. M.2.60 to 4.00; Caper, M.1.50 to 2.00; Pouchong, M.0.90 to 3.00; Pecco, ordinary to good middling, M.1.80 to 2.40; ditto fine, M.3.80 to 5.00; ditto orange, M.1.25 to 3.40; Haysouschin, M.0.90 to 1.80; Tonkay, M.0.90 to 1.80; Youmghaysan, M.1.10 to 2.70; Haysan, M.1.70 to 3.60; Imperial, country, M.1.50 to 3.60; ditto, Canton made, M.0.90 to 1.70; Gunpowder, country, —; ditto, Canton made, M.0.85 to 2.60.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, DEC. 8.

Up to this moment the greatest dulness has characterised the Budget debate, and it cannot be said that the members of the Second Chamber are wasting the national time. The question with Venezuela—of course the principal matter—was for two days discussed with closed doors, and though it is a secret what was said *intra muros*, some rumours are current thereabout. Thus it is whispered that the Minister was sharply taken to task about the *modus quo* on which the negotiations have been conducted. Mr. Van der Does de Willebois, it was said, had not behaved himself well as a *dipiomate*. It is further asserted that the Ministry was blamed for not having forwarded an ultimatum to Carracas, stating that if our claims were not conceded by the President Guzman Blanco, the squadron, now stationed in the waters of Curaçao, should at once be ordered to blockade the Venezuela harbours. This is, it is said, a *secret de palichinelle*, but I think that it will be safe to accept it with the necessary reserve. After this important question had been considered the discussions became very quiet. Some members asked for information about the customs treaty between Holland and Belgium, and the Minister, of course, answered that it was governed by our system of customs duties and commercial treaties, and it ought to be remembered that these were very hard times for free-traders, because the old ghost of protectionism had been revived in several parts of Europe, and at the same time the prospect that we should succeed in having the surtax in America abolished, was not so promising as last year. Some members urged the necessity that measures should be taken to prevent English unseaworthy ships being smuggled amongst our merchant fleet, so that, contrary to the Plimsoll Bill, these "coffins" should be permitted to remain afloat. The reply was that such measures had been prepared, but I think that there is reason to believe that this answer was not strictly correct, and that many months may elapse before the introduction of such a measure. By 53 against 3 votes, the Budget was passed. Mr. Van Lynden, who to everyone's surprise has replaced Mr. Heemskerk as *premier* in the Ministerial Council, had a still easier task to defend the Budget of the Department of Justice. Mr. Wintgens made an *oratio pro domo* against swindling on the Bourse, and asked for measures to prevent the public being made the *dupe* of financial adventurers. In other countries laws had been passed for this purpose, and Holland ought to follow the example. The Minister seemed, however, disinclined to interfere in this social struggle for life. The law, he said, cannot button peoples' pockets, and the public must themselves be more cautious.

About the other questions with which some members dealt, the discussions of last year were revived without bringing the matters in question one step nearer to their resolution. Mr. Kappeyne, however, brought forward a matter of high importance, and proved in a very able speech that our Church-laws ought to be revised and improved. We enjoy, he said, liberty of religion; everyone has the same right of protection, but still the rights of the State must not be encroached upon. Therefore he urged some measures to protect these rights should be taken. He invited the attention of the Minister to the Monasteries. It is, indeed, quite in accordance with the law that they exist, but in the meantime some precautions he considered are necessary in order that they should not obtain too much influence, and thus prove hurtful to the common interests. It is not quite clear whether the Minister intends to listen to this advice or not. The question of the *Phœnix* (the Danish steamer which was stopped by our authorities in the mouth of the Scheldt) was dealt with incidentally, and Mr. Van Lynden stated that the authorities were fully empowered to act as they had done. It has created here some surprise that this question caused a somewhat noisy and anything but amicable debate in the Belgian Chamber. This section of the Budget was approved of unanimously. What the fate will be of the Budget for Home affairs it is impossible to foretell. The debate began yesterday, and perhaps I may find opportunity to give you some particulars by a later post. I limit myself for the present to stating that Mr. Kuyper made a vehement and most eloquent attack on our representative system, which, according to his opinion, brought the constitutional *régime* into discredit.

The First Chamber has voted, almost without discussion, the East India Budget, with reference to which, however, Mr. Duymaer Van Twist, brought a new matter forward. He urged the passing of a law about the culture of coffee, containing the following stipulations: maintenance of forced labour by the natives to the Government; abolition of the extra burdens which now press on the people, a regulation of prices in such a sense that the labourers would be able to make some profits; and giving the right to the natives to sell their coffee-gardens under approbation of the Government. Mr. Van Twist said he would have no objection to some alterations which might become necessary for the benefit of local interests. But it was just this rock on which the law *in spe* would stand, as the Minister stated; the exceptional cases would be so many, that stipulations by the law would become an utter impossibility. Mr. Cremers advocated the necessity that a fixed sum would be named as a yearly contribution of the East India Colonies to the Dutch treasury. The expenses in the interest of the colonies became higher and higher every year, and the only buoy on which we can keep ourselves afloat is coffee. And what ought to be done if this support failed. The Minister, however, is not inclined to propose a fixed contribution, and I think he is quite right, in the interest of the colonies. After having passed this Budget the Chamber took recess.

The opposition against the proposal of Mr. Van der Heim to levy a tax on tobacco increases daily. In almost every town of importance meetings are being held in order to concert measures to prevent the introduction of such an unpopular impost.

I told you in my last letter that the "Star Ball" Company would discontinue their service between Rotterdam and Java. This, however, is not quite correct. The stoppage will only be for a time, because the company has lost one of its steamers, the *Thomas Sorby*, and because freights are not remunerative.

A dinner has been given at the Hague to Mr. Von Bult Zinglowen, in recognition of his excellent services in Atjeh as a member of the Red Cross Society.

In consequence of the very sharp winter which has set in so early, trade is quite stopped. Our water-ways are frozen, and communication by rail is difficult. Deep snow covers the country, and it is by no means extraordinary that even the railways are blocked. The Bourse has somewhat improved, and it seems that confidence is returning, but transactions in all stocks remain very limited in extent. The shares of the Steamship Company Nederland are quoted lower, in consequence of the fact that the High Court has pronounced a verdict which may prove to be hurtful to the interests of the shareholders. This verdict related to the well-known question "Muller *v.* the Nederland Company." The company will now be obliged to indemnify for losses incurred by shippers by the steamer *Willem III.*, which was burnt at sea.

AMSTERDAM, DEC. 15.

The Budget debates have not been completed without some warm discussions. The Chapter of the Department of Home Affairs has given the Opposition an opportunity to say something about the Ministerial Policy. The result, however, was but a storm in a teacup, although, if Mr. Heemskerk had been less dexterous, he might have succumbed. He defended his position in a masterly way, and I am glad to state that this is even acknowledged by his political opponents. Of course, much antipathy prevails amongst the Liberals towards the present Cabinet, for what special reason is an enigma. The Ministry has not taken one single measure showing illiberality. The principal question to resolve is that of education, and it must be said that it has been too long delayed. It was quite clear that the Cabinet did not know how to treat the distinctive claims of the Clericals and the Liberals. But a decision was most imperative, both parties being determined that, if Mr. Heemskerk did not lay a Bill before the members, they would take the initiative. The position of the Cabinet is strengthened by the fact that Mr. Heemskerk's budget was approved of by 52 against 24 votes. In my next letter I will send some further particulars about the debate which has just closed.

Digitized by Google

For some years past our Geographical Society has intended to contribute towards a project to make the geography of our last Indian possessions better known than has hitherto been the case. It is indeed a sad fact that we know nothing about what we have for more than a century called our own territory, and as it may well be supposed that these unknown districts will prove to be rich sources for increasing the national wealth, the Society has resolved to take the initiative. It is quite true that the population of Sumatra, which deserves, next to Java, the most attention, is not as extensive as that of the last named island, but the soil is as productive and the mines are richly abundant in all sorts of minerals and metals. The plan of the society is to explore the centre of the island, and especially that district which is watered by rivers, making communication with the sea easy. Not only is this thought to be the best district from a geographical point of view, but also for political reasons. The territory of the river Djambi, including the rich Korintja-valley is bounded by friendly States. The expedition to explore these parts of the island will start as soon as the necessary funds are contributed, and though the sum is not yet complete, it will undoubtedly be subscribed without delay.

Trade remains dull, but the weather is less wintry. The frost is all gone, and in a few days the waterways will be again open for the shipping. On 'Change the greatest quietude prevails, especially in our home stocks. The shares of the East India Trading Bank have fallen 4 per cent., in consequence of the new loan being brought into the market. The managers have announced that the extension of capital was required in consequence of the fact that the business has increased so enormously. They further state that the condition of the bank, both here and in Java, is most favourable, and that a new undertaking in the colony just now entered into gives a profitable opportunity to invest a part of the new capital. The future of this company is, according to the prevailing opinion, likely to be an excellent one. The Money Market is well provided, and large sums can be obtained very cheaply.

At Paris a "Blue-book" has been published by Messrs. Jouby et Roger, which is of much interest to this country. It contains the documents relating to the difficulties which now prevail between Holland and Venezuela, and they have been published at the order of the Venezuelan Government. They are fourteen in number, and run from the 4th of May till October the 19th, when our representative, Mr. Van Brakel, was recalled.

Monetary and Commercial.

We understand that advices have been received confirming the rumour that the Japanese Government had purchased the land at Yokohama on which the Hong Kong and Shanghai Bank had advanced a considerable sum to Messrs. Walsh, Hall, and Co. This will improve the result of the bank's balance-sheet for the current half-year, and we hope will aid in giving a dividend, the stoppage of which has been of such great inconvenience to shareholders. In connection with this bank we hear that an agency has been opened by Mr. Harris at San Francisco.

Telegrams from Shanghai announce that the poll meeting, on the 14th inst., of the shareholders in the China and Japan Marine Insurance Company, ended in a resolution to wind up. We presume that the scheme noticed in our last for re-organising the office did not succeed.

The following letter has been sent from the Wholesale Tea Trade Association to the Government:—"Gentlemen,—I am requested by the Committee of the London Wholesale Tea Trade Association most respectfully to inquire whether the examination of tea on and after the 1st day of January next will be confined to the cargoes imported only, or whether it will apply to the tea then in bond, in addition to that subsequently imported. —I have, &c.—FRED. MORRISON, Secretary. To Her Majesty's Commissioners of Customs, London." In reply the annexed communication was received:—"Customs House, London, 16th December, 1875. Sir,—In reply to the inquiry contained in your letter of the 11th inst., I am desired by the Commissioners of Her Majesty's Customs to acquaint you, for the information of the Committee of the London Wholesale Tea Trade Association, that the examination of tea by officers of this department will, in accordance with the provisions of the Act 38 and 39 Vic., cap. 63, sec. 30, be confined to such tea as may be imported into the United Kingdom from and after the 1st January next.—I am, Sir, your obedient servant, J. B. HALE, Secretary."

Tenders for £700,000 in bills on India were received at the Bank of England on the 15th inst. The amounts alloted were: To Calcutta, £400,100; and to Bombay, £299,900. Tenders on all the Presidencies at 1s. 9 7-16d. will receive about 13 per cent., above in full. These figures show a falling off in the demand for remittances to the East.

It is announced that the Oriental Bank Corporation will pay the coupons of the Japan Seven per Cent. Loan of 1873, due on the 1st proximo, on and after that date.

At a meeting Thursday of the Eastern Extension, Australasia, and China Telegraph Company (Limited) a resolution was passed authorising the duplication of the Company's line between India and the Straits Settlements, by the construction of a line of telegraph between Rangoon and Penang. The estimated cost is about £170,000; to meet that demand the directors have in hand a sum of between £70,000 and £80,000 from the existing reserve fund, and a further sum of about £20,000, balance of unissued debentures; they also estimate that a reduction of the dividend for the current year, to the rate of 5 per cent., will yield a further sum of about £50,000, thereby nearly covering the cost of the cable.

A meeting of the shareholders of the Eastern Telegraph Company (Limited) was also held Thursday, when, after a long and animated discussion, authority was given to the directors to duplicate the Company's line from Suez to Aden, and from Aden to Bombay, and to raise the necessary amount of capital by the issue of Six per Cent. Preference Shares, bearing a cumulative dividend.

The interest on the shares of the Great Northern Telegraph Company, at the rate of 5 per cent. per annum, will be paid by Messrs. C. J. Hambro and Son on and after the 1st proximo.

The report of the Bank of New Zealand gives the net profit for the half-year ended the 30th September last at £47,103, which, with £16,974 brought from the March half-year, made the amount available for division £64,077. This has been appropriated by paying £30,000 as a dividend of 10 per cent., £15,000 as a bonus of 5s. per share, and by carrying £19,077 forward.

The National Bank of New Zealand (Limited) announce an interim dividend at the rate of 6 per cent. per annum, free of income-tax, for the six months ended September 30.

The Brazilian Submarine Telegraph Company (Limited) has declared an interim dividend at the rate of 5 per cent., free of income-tax, for the quarter ended September 30, 1875.

The report of the Ceylon Company (Limited), for presentation to the meeting on the 21st inst., states that nearly the whole of 1874-75 crop of coffee has been sold, and realised a satisfactory profit; but as the 1875-76 crop will be comparatively short, and an unusually dry period in Mauritius has prejudicially affected the yield of the sugar-canes, the directors propose to declare an interim dividend at the rate of only four per cent. per annum, payable on the 23rd inst.

The report of the London and River Plate Bank (Limited) has been issued to the meeting on the 16th inst. After providing for bad and doubtful debts, the directors are enabled to recommend a dividend of 5 per cent. for the half-year ended 30th September, which, with that paid in June, equals a distribution of 10 per cent. for the year, carrying forward £4,128.

The report of the Lebong Tea Company (Limited) announces the proposed payment of an interim dividend at the rate of 6 per cent. per annum, free of income-tax.

The Merchants' Bank of Canada (Montreal) have declared a dividend for the half-year ending 30th of November at the rate of 8 per cent. per annum.

The Board of Trade have received, through the Foreign-office, a copy of a despatch from Her Majesty's Ambassador at St. Petersburg, enclosing a draft of a notice which has been prepared by his Excellency, calling the attention of British merchants to the risks and inconveniences to which they are exposed in Russians ports through inaccuracies in their bills of lading. Subjoined is the notice referred to:—

In consequence of the frequency of fines and penalties inflicted by the Custom-house authorities in the ports of Russia on British merchants for errors as to weight in their bills of lading, they are hereby warned of the risk and inconvenience to which they may be subjected, by not giving due and careful attention to the insertion of correct weights in their bills of lading.

The total quantity of tea delivered from the bonded warehouses in London during the week ended the 11th inst. was 3,400,391 lb., of which 2,159,029 lb. was for home consumption, 850,050 lb. was removed coastwise, 227,605 lb. was sent coastwise for exportation, 154,313 lb. was exported, and 3,394 lb. was for ship's stores. The duty received amounted to £53,976, which, on comparison with the £54,184 received in the preceding week, shows a decrease of about $\frac{3}{8}$ per cent.

The Great Northern Telegraph Company's traffic receipts for the month of November were—this year, f.269,838; last year, f.369,387. The total receipts, from January 1 to November 30, were—this year, f.3,843,870; last year, f.4,118,312.

The amount of bullion per P. and O. steamer *Bokhara*, from Southampton, on the 16th inst., was:—In silver, to Shanghai, £4,210; to Hong Kong, £71,979 3s. 4d.; to Singapore, £40,280; total, £116,469 3s. 4d.

Bar Silver has again declined in value. At the beginning of the week sales were made at 56½d. per oz., and subsequently a few small arrivals were placed at 56 7-16d. per oz., which may be taken as the current quotation. Mexican Dollars have been sold at 55d. per oz., showing a reduction of ¼d. from previous arrivals.

ARTICLES OF IMPORT.

TEA.

Messrs. Goddard and Co.'s Circular says:—We have little to report for the week, only a small business having been done without change in value; the arrivals have been considerable, but importers have only shown samples to a very small extent. The telegram gives a greater deficiency in the Export as against last year, with not much stock on hand; but the increase in Calcutta Exports of Indian Tea is large. Both importers and dealers seem to be now holding off for the turn of the year, although the latter have shown a disposition to make offers, but rather at a low range of value. Green Teas are still offered at auction, but not to a large extent. Public Sales.—China Sorts: 6,154 packages "Without Reserve." Red leaf Congou sold from 9d. to 1s., and Moning 1s. to 1s. 1¾d. Green Tea sold without change. Souchong

Digitized by Google

in half-chests, obtained 1s. 7d. to 1s. 7¼d., and boxes 1s. 8¼d. to 1s. 8½d. Canton Scented Caper, 10¼d. to 11d. Deliveries from London, from 1st to 13th inst., inclusive, or eleven days, 1875, 6,105,000 lbs., against eleven days, 1874, 6,297,778 lbs. Imports, deliveries, and stocks in London, from January 1 to December 1 :—

	1874.	1875.
Imports...	139,971,225	175,316,723
Deliveries	157,123,981	164,610,498
Stocks	72,175,542	89,941,910

Messrs. W. J. and H. Thompson's Circular says :—There is not any change to notice in the market. A moderate inquiry still exists for the medium to good grades of Congou, but all common kinds are dull and difficult of sale. The public sales have also been small. *Poochow Congous :* Common to good common are not saleable over 9½d. to 10½d. per lb. Fair are little inquired for at 11d. to 1s. 1d. per lb., and the sales of medium to good have been few at 1s. 4d. to 1s. 7d. per lb. *Black-leaf Congous :* Common, 9d. to 9½d. ; good common to fair, at 10½d. to 1s. 1d., have been little dealt in ; medium to good are firm at 1s. 5d. to 1s. 8d. per lb., and there has been some demand for these classes. *Tayshan Congou :* 9d. to 1s. 1d. for common to fair, in boxes. *Souchongs* and *Oolongs* unaltered. *Scented Teas :* Canton Capers, dull ; common to fair, 9¾d. to 11½d. ; medium and good are quiet at the late reduction in prices. *Green Teas :* In these descriptions there is no improvement generally, but some parcels of good quality, only slightly coloured, sold at better rates.

	1875. lbs.	1874. lbs.
United Kingdom stock, on the 30th Nov., 1875, was estimated at	97,000,000	80,000,000
Cargoes of vessels arrived up to date, but not included in the above stock, with portion of other cargoes only partially included	11,445,000	12,318,000
Amount on the water advised by telegraph to 25th Nov., against actual shipments to same date last year	17,950,000	39,901,000
	126,395,000	132,219,000

SILK.

The general market is very dull ; there is a small business doing in Tsatlees about 14s., but the lower and better grades are neglected. For Canton Silk there is no demand, and lower prices will have to be taken for No. 4 Tsatlee reel in order to make business. Japans remain as before ; no inquiry. Deliveries from 1st to 15th Nov. are :—China, 1,372 ; Canton, 181 ; Japan, 293 ; Bengal,'65. Total, 1,911 bales, against 2,011 bales in the corresponding period last year.

COFFEE.—On the 14th inst. the light supplies at auction contained the first instalment of the new crop of Plantation Ceylon, which was readily disposed of at fully the relative value to extreme rates for bold ; old crop in second hands also brought firm rates. Of 91 casks 1 tierce offered 40 casks of the new crop sold as follows : small at 102s. 6d. to 103s., middling blueish at 104s. 6d. to 106s., good middling at 108s. to 108s. 6d., fine bold at 114s. 6d. to 116s., pea berry 122s., the remainder second-hand parcels sold, low middling grey at 101s., middling at 103s. 6d. to 105s. Of 996 bags Singapore offered, about 500 bags sold, ordinary mixed 74s. to 76s. 6d., chiefly pale picked Bally at 88s. to 90s., fine ditto 93s., greenish Pari Pari at 90s.

COIR GOODS.—Small quantities of Yarn at the auctions went off slowly at previous rates for common, but fine sold well. Fibre was partly sold at former rates. An unusually large supply of Rope met few offers, and was all bought in. Of Yarn 20 bales damaged fine Ceylon sold at £40 to £45 5s. ; of 65 tons in dholls 38 tons sold, common to medium at £25 15s. to £30, good medium to good at £31 to £35, fine at £37 15s. to £40 5s. ; of 32 tons common short red Ceylon Fibre 19 tons sold at £12.

CHINA STRAW PLAIT.—At auction 280 bales met a restricted demand, and only about 60 bales new were disposed of at late rates, white, ordinary coarse to medium qualities, £8 to £10 15s. ; good fair to good, £12 15s. to £17 5s. ; fine, £27 to £34 ; 1 bale very superior up to £40 ; mottled £7 per bale.

COCOANUT OIL has been steady but quiet ; Cochin at £41 to £41 10s., and Ceylon at £38 10s. to £39 per ton.

CHINA PRESERVES.—At auction of 184 cases Ginger offered only a few cases sold, small Chyloong brand at 9½d., the remainder and 44 cases dry ditto bought in at 10d. per lb.

COTTON.—A renewal of good demand has led to sales of some extent, and a slight downward tendency has been fully recovered. Tinnevelly is quoted at 5 9-16d. to 5⅝d., Western Madras 4 15-16d., Coconada 4 13-16d., Bengal 4⅝d. to 4¾d.

HEMP.—A further decline of about 20s. per ton has taken place in Manila, about 1,000 bales good fair to good having been sold at £29 to £29 10s.

HORNS.—At the periodical public sales held to-day, Ox and Cow horns were mostly sold at full rates ; Madras Buffalo sold at a decline of 1s. to 2s., heavy Bombay were 2s. to 5s. lower, while light ditto brought full prices, Siam sold at about late rates. Calcutta were all bought in. Deer horns were in demand, and the whole found buyers at full to dearer rates. Of Buffaloe 41,636 (50 tons) Siam sold, average 785 to 716 horns at 40s. to 42s., 714 to 581 horns at 43s. to 45s. ; 2,359 (2 tons) Manila sold, average 896 horns at 36s. Of Deer 13,035 (7 tons) Ceylon sold at 40s. to 90s. per cwt.

INDIA-RUBBER has been in rather less demand, and at auction of 501 cases Borneo 60 cases fair new sold at 1s. 3d. to 1s. 3½d., being barely former value, the remainder bought in, low to good 10½d. to 1s. 4½d.

JAPAN WAX.—Of 130 boxes squares offered 20 boxes sold, good pale at 47s. per cwt.; and Thursday there was a further sale of 21 cases worked saucers stained at 39s. 6d. to 40s., but 113 boxes unworked slabs good partly stained were bought in at 50s.

PEPPER.—*Black :* The market remains flat, and although only 1,344 bags were offered at the auctions few biddings were made and only a small part at a further decline of fully ½d. per lb. for Singapore. 511 bags Penang were bought in at 4⅜d. Of 833 bags Singapore 200 bags sold, sound at 5d. *White :* The large supply of 1,075 bags Singapore at auction went off without competition, although a further reduction of ¼d. per lb. was submitted to. about 700 bags being sold at 7d. to 7⅛d., with damaged at 6⅞d. to 7d.; 10 bags Penang withdrawn.

RICE.—Two cargoes of Rangoon have sold at 8s. to 8s. 6d., according to conditions, one of Necrancie off the coast at 7s. 1½d.; one of about 1,000 tons arrived, at 7s., and one off the coast at 7s. 7½d.; also a cargo of Siam, 1,450 tons, at 7s. 6d. ex-ship, and 400 tons Askoolie, December to January shipment, at 10s. to 10s. 3d. per cwt.

SUGAR has continued dull, with a declining tendency. By private contract, about 5,000 bags Penang have sold at 15s. 6d. to 15s. 9d.; and 5,500 bags low China at 14s. 6d., with a portion at 15s. To arrive, 620 tons Zebu Manila have been sold at 14s. 6d., landed terms.

TIN.—Direct telegraphic communication with the Straits Settlements having been interrupted, both buyers and sellers here have been exercising unusual caution in dealing; values therefore show but little variation. The current quotations are Straits on the spot and afloat £81 10s., Banca £87, Billiton £85 per ton.

SPICES.—*Nutmegs :* Only 15 cases Penang, &c., offered, and 4 cases from Bombay sold, 96's at 2s. 11d., 110's at 2s. 8d., 134's at 2s. 5d., the remainder bought in. *Mace :* Of 4 cases Penang 2 cases pickings sold at 1s. to 1s. 2d. per lb.

SAGO.—In auction 438 bags small Pearl went off slowly at about previous rates, 250 bags finding buyers, good small at 17s., middling at 15s. 6d., heated at 13s. 6d. 20 boxes fine bright small sold at 18s. 6d.

TAPIOCA.—303 bags Singapore, Malacca kind, sold at easy rates, fair grey at 1⅞d., extra bold at 2d. *Pearl Tapioca :* Of 170 bags offered 130 bags medium sold at 17s. 6d. to 18s., being about previous rates, the remainder, small, bought in at 19s.

ARTICLES OF EXPORT.

METALS.

IRON.—Welsh : Rails, £6 10s. to £6 15s. ; Bars, £7 5s. ; Staffordshire Best : Bars, £8 15s. to £10 ; Nail Rods, £9 to £9 10s. ; Hoop, £10 5s. to £12 ; Sheets, £11 15s. to £13 ; Scotch Pig, No. 1, £3 5s. to £3 18s. ; Swedes, Bars, Hammered, £15 10s. to £16 10s. ; Swedes, Steel in kegs, ½ and ⅝ in., £18 10s. to £19.

YELLOW METAL.—Sheets, 4 by 4 ft., 7⅞d. to 8d. ; Sheathing and Rods, 7⅞d. to 8d. per lb.

TIN.—English Refined, £87. Tin Plates : Charcoal IC, per box, 26s. to 32s. Coke, 21s. 6d. to 26s.

LEAD.—WB, £23 10s. ; do., other brands, £22 5s. to £22 10s. ; Spanish soft, ex ship, £21 15s. to £22 ; Sheet, £23 15s. ; Shot (kegs extra), £26 15s. to £27 ; White do., £29 10s.

SPELTER.—Silesian, £26.

QUICKSILVER.—In bottles of 75 lbs. each, £12 to £13.

Messrs. French and Smith's Circular says :—The Metal Market, remain inanimate. Iron without change. Copper : Charters from the West Coast, for first fortnight of this month, are advised as 1,400 tons and holders are asking rather higher rates on the strength of this news. Tin Plates : Makers are rather better supplied with orders. Lead is in good demand, and prices have a hardening tendency. Quicksilver easier.

MANCHESTER GOODS.

There has been a more steady feeling, and the tone of the Market has been decidedly firmer, consequent on the larger sales and hardening prices of Cotton; business has been, however, slightly more active. The feeling in the Market at the close is very steady, and prices are firmly maintained under the moderate inquiry that still exists.

CASUALTIES.

BREST.—Dec. 11, the Bremontier, from Manila, for Falmouth (general cargo), has put in here with loss of bowsprit and damage to stem; she is in charge of the mate, the master having died during the voyage.

ST. HELENA.—Nov. 22, the Signe, arrived here Nov. 17, from Java, experienced very heavy weather, lasting two days, between Algoa Bay and Cape Agulhas; lost and split sails, and was thrown on her beam ends, remaining in that position for some hours. The Sarah Watson, which arrived here on the 19th inst. from Singapore, experienced a succession of hard gales from the 19th to the 26th Oct.; on the latter day, in lat. 35 S., long. 28 E., encountered a terrific gale from W.N.W., with a tremendous sea, which struck the ship on her port bow, breaking two stanchions, and carrying away a quantity of bulwarks, and doing other damage.

MISCELLANEOUS.

GIBRALTAR.—Passed, Dec. 11, Nankin (str.), from Hankow; 13, Glenearn (str.), from Shanghai, both for London.

CADIZ.—Dec. 8, the St. Aubin, from Cardiff, for Singapore, which put in here leaky, on the 3rd inst., through collision, is discharging, in order to ascertain the extent of damage.

THE NATIONAL SAFE DEPOSIT COMPANY (Limited).

1, Queen Victoria-street, Mansion House, London.
Capital, £500,000. Subscribed, £250,000.

DIRECTORS.

J. H. Pulleston, Esq., M.P., Chairman.
Lawford Acland, Esq., Chairman Ceylon Company.
George Arbuthnot, Esq., Chairman Oriental Bank Corporation.
George W. Barnett, Esq., Barnetts, Hoares, Hanburys, and Lloyd.
Horatio S. Coulson, Esq., Director United Discount Corporation.
Lord Wm. M. Hay, Director Eastern Telegraph Company.
Hugh F. Sandeman, Esq., Director Scottish Union Insurance Company.

The Company is now ready to let to approved applicants Safes in their Fire and Burglar proof Vaults, at rents from £3 10s. to £30 per annum.

No insurance is necessary.

The main object of the Company is to provide the public with a perfectly secure, yet inexpensive repository for valuables of every description, and relieve them from the harassing and wearing strain occasioned by the personal care of such property. The Company take for safe custody all kinds of securities, valuable property, bonds, wills, marriage settlements, and other documents, and guarantee their value when required. Drawn bonds, coupons, &c., collected.

The Company undertake the duties of trustees, receivers, and executors, and act in other confidential capacities.

The Great Vault is superior to any building in the world intended for similar purposes. The utility of these Safes, which are entirely underground, is undeniable, as bankers are not responsible for deposit of valuables.

The loss of many kinds of securities is irreparable, the loser having no recourse against the Government or other party issuing them. A constant watch is kept both inside and outside the building. There is a room especially adapted and reserved for ladies. The premises can be inspected, and further particulars obtained on application. HENRY WEST, Manager.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, August 30, 1851.
PAID-UP CAPITAL, £1,500,000.
RESERVED FUNDS, £500,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Colombo, Foochow, Hiogo, Hong Kong, Kandy, Madras, Mauritius, Melbourne, Point de Galle, Port Elizabeth, Shanghai, Singapore, Sydney, Tellicherry, and Yokohama on terms which may be ascertained at their Office. They also issue Circular Notes for the use of Travellers by the Overland Route.

They undertake the agency of parties connected with India and the Colonies, the purchase and sale of British and Foreign Securities, the custody of the same, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named Dependencies.

They also receive deposits of £100 and upwards for fixed periods, the terms for which may be ascertained on application at their Office.

Office hours, Ten to Three; Saturdays, Ten to Two.
Threadneedle-street London, 1875.

THE AGRA BANK (Limited).

Established in 1833.

CAPITAL, £1,000,000.
Head Office:—NICHOLAS-LANE, LOMBARD-STREET, LONDON.
Branches in Edinburgh, Calcutta, Bombay, Madras, Kurrachee, Agra, Lahore, Shanghai, Hong Kong.

Current accounts are kept at the Head Office on the terms customary with London Bankers, and interest allowed when the credit balance does not fall below £100.

Deposits received for fixed periods on the following terms, viz.:—At 5 per cent. per annum, subject to twelve months' notice of withdrawal. For shorter periods deposits will be received on terms to be agreed upon. Bills issued at the current exchange of the day on any of the Branches of the Bank free of extra charge; and approved bills purchased or sent for collection. Sales and purchases effected in British and Foreign Securities, in East India Stock and Loans, and the safe custody of the same undertaken. Interest drawn, and Army, Navy, and Civil Pay and Pensions realised. Every other description of Banking Business and Money Agency, British and Indian, transacted.

J. THOMSON, Chairman.

COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1854, and 31st December, 1866.
Recognised by the International Convention of 30th April, 1862.

CAPITAL, fully paid up, £3,200,000.

Reserved Fund ... ... f.20,000,000 ... £800,000.
HEAD OFFICE—14, Rue Bergere, Paris.
AGENCIES AT—Lyons, Marseilles, Nantes, Mulhouse, Roubaix (France), Brussels (Belgium), Alexandria (Egypt), Calcutta, Bombay, Hong Kong, Shanghai, Saigon (Cochin China), Bourbon (Reunion), and Yokahama (Japan).

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

CHINESE IMPERIAL GOVERNMENT EIGHT PER CENT. LOAN OF 1874.

THE

HONG KONG AND SHANGHAI BANKING CORPORATION,

As Agents for the above Loan issued in Hong Kong, beg to notify that they have received a portion of the

THE Coupons due 1st January, 1876, on the Bonds of the above Loan will be paid on and after that date at the Office of the ORIENTAL BANK CORPORATION, 40, Threadneedle-street.

Coupons must be left three clear days for examination previous to payment.

Oriental Bank Corporation,
40, Threadneedle-street, E.C.,
15th December, 1875.

THE LATE REV. B. P. KEASBERRY, OF SINGAPORE.

THE late Rev. B. P. KEASBERRY, whose sudden death occurred last month in Singapore, has left a widow and a family of girls almost wholly unprovided for.

It is almost unnecessary to remind old residents in The Straits of the faithful and disinterested services of Mr. Keasberry, in the teaching of the Christian faith, and the spread of education.

These services, which extended over a period of thirty-six years, it is proposed to recognise, to some extent, by the collection of a sum of money, to be placed in the hands of the Hon. R. Little, M.D., and William Adamson, Esq., of Singapore, as Trustees, leaving power to them to invest the whole or a part at their discretion, or to apply it wholly and at once for the benefit of Mrs. Keasberry and her daughters.

Cheques should be made payable to P. F. Tidman, 34, Leadenhall-street, by whom Subscriptions will be acknowledged.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette.*

Made simply with boiling water or milk.

Sold in packets (in tins for abroad) labelled:—

*Indus ...	3,470	500	Jan. 18	Mediterranean, Aden, Ceylon, Madras, Calcutta, Straits, China, Japan, and Australia.

* Taking passengers for Bombay also by branch steamer from Suez.

OVERLAND ROUTE and SUEZ CANAL.—Under contract for the conveyance of the Mails to the Mediterranean, India, China, Japan, and Australia.

The PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY despatch their steamers from Southampton, via the SUEZ CANAL, every Thursday, from Venice every Friday, and from Brindisi, with the Overland Mails, every Monday.

Offices:—122, Leadenhall-street, E.C., and 25, Cockspur-street, S.W.

OVERLAND ROUTE via MARSEILLES and SUEZ CANAL.—Under contract with the French Government for the conveyance of the Mails to INDIA, CHINA, JAPAN, BATAVIA, REUNION, and MAURITIUS.

The MESSAGERIES MARITIMES COMPANY will despatch their steamers from MARSEILLES via the Suez Canal every alternate Sunday at 10 A.M., beginning on Sunday, the 5th of December.

"*" Passengers eastward of Suez securing their berths in London are entitled to the conveyance of their luggage free to Marseilles, as explained in the Company's handbooks.

For Passage Rates and Particulars see the Company's handbooks, and apply at the Company's London Head Office, 97, Cannon-street, E.C.; or at the West End Sub-Agency, 51, Pall-mall, S.W.

PRELIMINARY NOTICE.

THE CHINA TRANS-PACIFIC STEAMSHIP COMPANY (LIMITED).

THE new, powerful, and handsomely-fitted iron screw steamers of this Company are intended to resume their trips between San Francisco, Japan, and China at an early date, when it is hoped that their reputation for speed, safety, and comfort will secure them a large share of the increased traffic of the North Pacific.

The "Vancouver" will probably be the first vessel to leave San Francisco, succeeded by the "Vasco de Gama." The "Columbus," to be launched in January, will proceed to Hong Kong and make her first voyage from that port to San Francisco, via Yokohama, and will be followed by other vessels in due course.

Further particulars will be published shortly.

London, St. Michael's-buildings, 9, Gracechurch-street, Nov. 20, 1875.

GLEN LINE OF STEAM PACKETS.—INDIA, CHINA, AND JAPAN.—The undernamed powerful Clyde-built BOATS, specially adapted for the India, China, and Japan trade, are intended to be despatched on these advertised dates for SINGAPORE, HONG KONG, and SHANGHAI, taking goods at through rates for SAIGON, YOKOHAMA, NAGASAKI, and HIOGO:—

Summary of News from the Far East.

CHINA.

SHANGHAI.

The present mail brings advices from this port to the 12th November; no later mail from London had been received. The following summary of news is from the *North China Herald*:—

Amusements continue to occupy a leading place in the week's programme. A meeting of members of the Gymnasium has been held, to discuss the advisability of continuing the annual athletic sports. It was resolved to hold a meeting during the current month; the following were selected as the committee:—Messrs. Harvie, Mackenzie, Groom, Pryer, Maitland, and Oehlricks. It was left to the committee to fix the date, a suggestion being, however, made that it would be advisable for the sports to be held on or about the 29th Nov. A programme has since been issued fixing that date. It includes fourteen competitions, and should the weather be fine there will doubtless be a successful meeting.

A meeting of the Shanghai Paper Hunt Club has been held. There was a pretty good attendance of members. The Chairman congratulated the meeting on the success of the last season, and on the prosperous condition of the Club, which now consisted of ninety-seven riding members. After discharging the liabilities the accounts showed a small balance in hand. A ballot was taken for the election of stewards, the result being that the gentlemen who performed the duty last season were re-elected, viz., Messrs. E. G. Low, A. R. Burkill, W. Howie, A. McLeod, S. Walker, and E. H. Gore Booth. Mr. E. G. Low, was unanimously re-elected Master of the Hunt.

The usual sale of racing ponies and griffins after each meeting has taken place at the Horse Bazaar. There was a numerous attendance, and at times the bidding was spirited. Wild Oats had been previously sold privately, and Sea Star, Jamborino, and Hussar were withdrawn. Sinecure was bought in at Tls. 180. Mr. Meller was the auctioneer. The following is a list of

Digitized by Google

the ponies sold, and the prices realised, in Tls.:—Muldoon, 45 ; Gallavanter, 40 ; Caractacus, 95 ; Cæsar, 105 ; Balfour, 55 ; Legislator, 45 ; Statesman, 90 ; Seamew, 60 ; Sea Bird, 100 ; Sea Breeze (a griffin), 200 (for Hong Kong); Seaman (a griffin), 45 ; Sea Foam, 100 ; Fleeting Moments, 55 ; Fleetwing, 50 ; Chenapan, 45 ; Voltigeur, 120 ; Kurassier, 70 ; Ajax (griffin), 45 ; Achilles (do.), 100 ; Agamemnon (do.), 75 ; Spate (do.), 70 ; Spray (do.), 250 ; Sinecure, 180 ; Light Brigade, 105 ; Guniea Pig (griffin), no bid ; Ghillie, 75 ; Piastre, 50 ; Cardinal, 45 ; Trident, 65 ; Feiyen, 110 ; Feiyuen, 50 ; Crumbs, 95 ; Flageolet, 60 ; John Barleycorn, 40 ; Saggamore (griffin), 25 ; 1 griffin, 45 ; 1 do., 15 ; 1 do., 25 ; 1 do., 10 ; 1 do., 55 ; 1 do., 60 ; 1 do., 20 ; 1 do., 20 ; 1 do., 7 ; 1 do., 15 ; 1 do., 17.

A rifle match between sixteen members of the Shanghai Volunteer Corps and the like number of men of H.M.S. *Thalia* has been shot, and resulted in favour of the Volunteers. The shooting was in teams of eight each, firstly, volley firing, and secondly, one minute's independent file firing, at 400 yards. A match at football, between fifteen of the navy and the same number of residents, has been played on the Base Ball Ground. Neither side obtained a goal ; but the residents succeeded in getting two "touch-downs." Miss Claus has given two more concerts, which were both well attended and well appreciated by the audience.

The Municipal minutes record a grant of Tls. 400 for widening Foochow Road and rounding off the corner of the Foochow and Szechuen Roads. No money is better spent than in improvements of this kind. A contract has been made for a new iron bridge over the Yang-king-pang, at the bund, for £1,600. Various sites have been offered for a new Police Station in Hongkew, and the selection has been left to the Works Committee, subject to the confirmation of the ratepayers. Alterations to the Tunsin property have been sanctioned, to the extent of Tls. 6,000. The sanitary condition of the Settlement was referred to, and is not considered at all alarming.

The Temperance Society appeal for subscriptions to enable them to increase the number of beds, and to make necessary alterations in the new hall they have taken in Nanking-road. They hope to put up forty beds, and purpose charging only ten cents for a night's lodging if the required funds are contributed.

The New Central Hotel on the Bund was opened on the 3rd of November, and from its position, number of excellent rooms, and other facilities, rises far superior to anything hitherto produced in hotel accommodation in Shanghai. The dining-room, though stinted in width, is a comfortable room, and breadth of idea in the *cuisine* will soon reconcile one to the narrowness of the chamber. The billiard room is supplied with three modern tables and a bar. A private dining-room looks cosy and tempting. Upstairs are a sitting-room and bed-room connected, very enticing for a bachelor who does not want the cares of housekeeping ; a drawing-room provocative of the idea of a dance, and several commodious bed-rooms, which will doubtless be always well filled by visitors. The upper flight contains bed-rooms only, and here we fancy residents will take up their quarters. The management is under the care of Mr. F. E. Reilly, whose experience in Shanghai and elsewhere will, we doubt not, enable him to suit and gratify the peculiar wants of residents and travellers.

Considerable anxiety was felt for several days as to the safety of H.B.M.'s gun-vessel *Hornet*, Commander O. S. Cameron, which left Foochow for this port about a fortnight ago, but fortunately all doubts were set at rest by her arrival in port.

News has been received of the total loss of the British brigantine *Alexandra*, while on passage between Swatow and Tientsin.

His Excellency Shen Pao-chen, the new Viceroy of Nanking, arrived here from Foochow last week. As our readers are aware, Ting Jih-cheng, formerly Taoutai of Shanghai, and subsequently Governor of Kiangsu, has been for some time waiting his advent at the Kiangnan Arsenal, of which, as well as of the Foochow Arsenal, Ting has been appointed chief. To him Shen will here hand over charge of the latter establishment. The new Viceroy, with his retainers, arrived in two Chinese gunboats which carried various flags, and was received with all due ceremony by the local authorities.

Mr. Man's report on the trade of Newchwang contains a very interesting account of the growth of opium manufacture in Manchuria. The picture he draws of the activity with which the industry is spreading will surprise even those who have given most attention to the subject. Practically, no hindrance seems to be now offered by Government to the growth of the poppy; in some cases it is legalised by taxation ; while the profits of the new industry are inducing large immigration and rapid extension of the cultivation.

The Yunnan Mission started from Hankow on the morning of 5th November, with a fine day and fair wind to help them on their way. The community turned out to give them a cheer, and the gunboat manned her rigging as they passed. We wish them success and a safe journey.

HONG KONG.

Our advices by this mail extend to the 18th November ; no later mail from London had arrived out. The following items of news are from the *Hong Kong Daily Press*:—

Most, if not all, of the Italian *graineurs* leave (says the *Japan Gazette*) by the outgoing mail for Europe, having completed their purchases. The native holders of silk worms' eggs reduced their extortionate demands, principally, it is said, through representations made to them from the Japanese Consul in Italy, who plainly proved to them that the prices they wanted could not be paid by the foreign buyers. We have heard of one batch of 30,000 *cartons* being sold at the low rate of 7½ cents per *carton*.

There has been a commotion among the Hong Kong washermen. They struck work on Monday, and stated as their reason that a tax or rent was to be imposed upon them by the Government for using the hillsides for the purpose of drying the clothes. We have now to state, however, that so far as the Government are concerned, it is not contemplated to impose either rent or tax on them. A short time ago it was proposed that these men should take out a squatter's licence for the land which they occupy on the banks of the nullahs, the same as all other squatters in the Colony, but this has been abandoned for the present.

A letter from Canton says :—Five of the ringleaders in the hostile demonstration recently made against Dr. Kerr by the Kuk-fow flower boat people have been arrested, and sentenced to one hundred and twenty blows each with the heavy bamboo. They were further informed that they would be held responsible for any future riot of the kind. The attention of the authorities was directed to the matter by the foreign consuls, on the representation of the various missionaries.

Robberies are still as frequent as ever. Bands of marauders sally forth as soon as night falls, and under the cover of darkness they carry on their nefarious business. Scarcely a night passes but some burglary is committed. It is rarely, indeed, that any of the thieves are captured.

Mr. F. E. Smith, M.P., and Sir C. W. Dilke, M.P., arrived from Shanghai in the French mail steamer yesterday.

At the Peak the maximum temperature during the past week was 68·0, the minimum 56·5 ; at the Harbour-master's office, Praya West, the maximum was 74·0, the minimum 64·0. No rain fell during the week.

We learn that the Chinese officials at Canton are bestirring themselves with respect to the proposed emigration of Chinese from Hong Kong to Atchin. The Viceroy has written, or is about to write, to Sir Brooke Robertson asking him to convey to the Hong Kong Government his best thanks for what they have already done in the matter, and requesting their co-operation in putting down any attempt at resuming the emigration. Orders have been also issued to all the magistrates in the adjoining province asking them to use every effort to prevent it. The Namhoi Magistrate has issued a proclamation offering a reward of $100 to anyone who shall give such information as shall lead to the apprehension and conviction of any of the leaders of the movement, and $30 for the apprehension and conviction of anyone who has been accessory to it. The proclamation states that a certain sum of money has been put aside for the purpose of these rewards. The mandarins, in the meantime, have communicated with their brethren at Swatow so as to prevent any emigration taking place from there.

The P. and O. steamer *Sunda* has arrived. As is already known, she was beached soon after her accident on the south side of the Haitan Straits, where divers from H.M. Naval Yard here, in conjunction with Mr. F. Stuart, the Hong Kong diver, and Mr. Stewart, of the Kowloon Docks, incessantly worked to get her afloat. After much trouble they succeeded in caulking the lower deck and bulkhead over the forefoot compartment, where the holes in the vessel were, and which kept the vessel full of water. The powerful steam-pumps on board, however, soon pumped her dry, except the fore compartment, which was full. She floated at 11.20 A.M. on the 13th instant, when the engines were got into working order and steam got up. At 11.40 A.M. on the 14th she shaped a course for Hong Kong. Fortunately she had fine weather, excepting on the night of the 14th, otherwise the steam-pumps, powerful as they were, would not have kept her afloat. On this night the wind freshened, and a high following sea caused her to make more water than could be pumped out, and matters looked precarious. The morning, however, brought fine weather, and she arrived safe at the Kowloon Docks yesterday morning. The steamship *Columbian*, with the steamtug *Saada* in tow, kept company with the *Sunda* throughout the voyage. She is much injured, and will require considerable repairs.

EXECUTION AT THE GAOL.

The Chinaman named Chun Ahung, one of the prisoners found guilty of piracy and murder at the last Criminal Sessions, was executed outside the gaol. The facts of the crime are so fresh in the minds of the public that it is scarcely necessary here to recapitulate them. A junk called the *Yau-li* left Hong Kong on the 24th of August last for Sam Kai, in the district of Hoi Foong, on the east coast of China. She had on board a crew of nine or ten persons, and seventeen passengers. About sunset on the 26th of August, when out at sea, two junks were seen bearing down on the *Yau-li*, and they hailed her. Some shots were exchanged, and one of the junks ran alongside, and a dozen armed men went on board. They murdered the wife of the captain and his two sons, and after driving all on deck below, they battened down the hatches, plundered the *Yau-li*, and sank

Digitized by Google

her. Seven men and two women were apprehended and tried for the offence. Three men were found guilty on the capital charge and sentenced to death, and Chan Ahung was one of them. The unhappy culprit, since his sentence, has manifested the most stolid indifference as to his fate, but has never admitted his guilt. Several Catholic priests have attempted to administer spiritual consolation to him, but he steadily refused to have anything to do with them. There has been no chance whatever of a reprieve for him. The death warrant was read over to him on the 11th inst. Since then he has taken his meals regularly, and generally slept well. He was awake, however, the most of Sunday night, and about six o'clock yesterday morning he was got ready to meet his fate. A new scaffold had been erected in the Magistracy Compound, the usual place, and a detachment of police was stationed beside it, as well as a number outside on Arbuthnot-road. In addition to Acting Sheriff Sangster, the Colonial Surgeon, and the gaol officials, a number of Europeans were in the compound to witness the execution, and there was also a fair assemblage of foreigners and natives in Arbuthnot-road. The culprit was pinioned in the usual way inside the gaol, and was then led to the scaffold by two of the prison warders. The hangman on the occasion was the same European who performed the duty at the last execution, and who is now undergoing a term of imprisonment in gaol. When the unhappy man was handed over to him but a very short time elapsed, and all was over—life being quite extinct about three minutes after the drop fell. About half-past seven the body was cut down. Dr. Ayres then examined it, and gave the usual certificate of death, and it was subsequently buried at Mount Davis, the usual place of interment for the bodies of local criminals. Deceased was a fisherman, and belonged to Tunkun, near Canton. There were very good grounds for supposing that he was one of those concerned in the *Spark* tragedy, but the charge could never be brought home to him.

FOOCHOW.

The chapel of the American Methodist Episcopal Mission in the prefectural city of Yen-ping was destroyed by a mob. The preacher and his family found refuge with a neighbouring shopkeeper; but his assistant was caught, and bound by the mob, who at first threatened to kill him, but afterwards contented themselves with beating him severely, and taking him to the Prefect's yamen, whence he was sent out of the city, under the escort of policemen.

Intelligence has reached Foochow to the effect that the American missionaries at Yen-ping have had some little trouble with the natives. Yen-ping is situated on the Min, about 123 miles distant from here.

The American man-of-war *Ashuelot* is now in port, and the German gunboat *Cyclops* is also still here. The *Ariadne* is expected shortly.

The Arsenal gunboat *Chi Ngan* arrived from Shanghai, bringing the Imperial Commissioner Ting Jih-chang, who has come to take charge of the arsenal at this port.

The gunboat *Hai Ching* also arrived from Taiwan, Formosa, with the Governor of this province on board.

PHILIPPINE ISLANDS.

MANILA.

The Manila *Comercio* of the 12th Nov. gives the following particulars of the seizure of a German vessel from Singapore for breaking the blockade of Sooloo:—"Another seizure has just been effected by the Navy in the Sooloo waters. The commander of the *Vencedora* having been informed when there of the presence of a blockade runner among the islands of that Archipelago, despatched two gunboats to search for her. These gunboats had the good fortune to find her in Siassi passage, discharging and receiving cargo. The vessel was discovered moored amongst the mangroves and covered with branches of trees. Her captain surrendered without resistance. The vessel in question is German, comes from Singapore, and is named the *Minna*."

With reference to the suspension of the firm of Russell and Sturgis the *Diario* of the 7th Nov. says:—The sensation caused by this event in our city is indescribable. Messrs. Russell and Sturgis, during the fifty years' existence of the firm, had succeeded in making their commercial establishment become an institution closely connected with all the ramifications of public wealth, and all the elements of labour. Their firm was a savings bank for small amounts, which there became increased by the accumulation of interest and by economy. It was the lever which from that fulcrum gave motion to the productive power of the country, by convening to the provinces the stimulus of capital.

The *Comercio* of the 8th Nov. states that, on the previous day, a meeting of the principal creditors of the firm was held, with the following result:—"A sub-committee was named to examine the books and balances, and to give an account to the general committee of the actual financial condition of the firm, in order, within the limits allowed by the law, to determine upon what might be deemed expedient in the interests of those whom it represents."

On the 30th of October, and for several days subsequently, stormy weather prevailed at Manila; which proved to be connected with a terrific hurricane which was raging at the same time in some of the neighbouring provinces, and which caused great destruction of life and property both at sea and on land. To judge from the details given in the *Commercio* and *Diario*, the hurricane seems to have been felt most severely in the province of Albay. The devastation caused by it in that province is thus summed up in the *Diario* of the 10th of November:—"The province of Albay has just been suffering from a calamity which has filled the measure of the misfortunes which could afflict it. The hurricane raged there with the full fury of such atmospherical disturbances, and caused floods which, within living memory, have had no equal in extent and violence. In a few hours these floods carried away several villages, and to which there fell victims in such extraordinary numbers that they are calculated to amount to about one thousand persons. There were destroyed flocks and herds, fruit trees, and other marketable articles to large amounts—and lastly, in a province the soil of which is so easy of removal from its sandy and volcanic nature, annihilated the hemp plantations; that is, the last hope of the cultivators, making extensive tracts useless for cultivation for a length of time."

A correspondent, writing to the same journal from Albay, says, that up to the 3rd Nov., 147 corpses of human beings who had perished were buried, and that upwards of 700 more had been buried since; and also that besides the estimated number of 1,000 corpses, there are a great many more underneath heaps of sand brought down by the floods. The tale of houses destroyed reaches 2,544, leaving more uncounted. Amongst the vessels lost was the coal laden British ship *Formosa*, the crew of which, however, came safe to land. During the hurricane a shock of earthquake was felt at several places where it was raging.

JAVA.

BATAVIA.

In the Batavia *Indier* of the 1st Nov. appears the following remarks regarding the loss of the Dutch steamer *Willem Kroon Prins der Nederlanden*:—The steamer had been vainly expected here with the Europe mail of the 1st October. At length, we learned that on the arrival of the *Byron Mackay*, on Nov. 5, the *Atjeh* and *Willem Kroon Prins der Nederlanden*, the former on a voyage from Batavia, and the latter conveying the mail from Singapore, came into collision, and the mail boat had sunk within thirty-five minutes, only the top of her rigging remaining above water. A native stoker and three Chinese passengers lost their lives. The mail bags, eighty chests of opium, $30,000, and the remainder of the cargo have been lost. The disaster is the less explicable, because the navigable channel was wide, and the two vessels had been in sight of each other from a great distance, while both commanders are known to be qualified and prudent seamen.

A commission of inquiry is to be held, and the case being an exceptional one, because both vessels belong to the N.I.S.N. Company, the Vice-Admiral and Chief of the Marine Department, seeing fully the importance attached by the public to the subject, has nominated Naval Captain de Vrieze and First Naval Lieutenant Dyserinck to constitute the commission, along with the harbourmaster and two experts, Messrs. Swart and Jones, whose decision is to be made public as soon as possible.

STRAITS SETTLEMENTS.

SINGAPORE.

The present French mail brings advices from this port to the 25th Nov.; the French mail from London Oct. 22 arrived out on the 23rd Nov. We take the following items of intelligence from the *Straits Times*:—

There is no news of importance from Perak. There have been no further active hostilities, troops were strengthening their position. Nothing more had been seen of the enemy, and we understand no immediate operations were intended. The Governor left on the 19th November in the *Pluto* for Perak, accompanied by Capt. Paton, A.D.C.; Lieut. McCallum, Private Secretary; Major-general Colborne, and the Hon. Mr. Philippo, Attorney-general and Acting Puisne Judge. H.M.S. *Modeste*, which has been so long expected from the China sea, is now anchored in the roadstead, and will leave for Perak after coaling. H.M.S. *Fly* has arrived from Perak, having coming up for stores, and will return immediately.

The official announcement in the *Government Gazette* of the death by assassination of the Hon. James Wheeler Woodford Birch, our Colonial Secretary, at Passir Sala, in Perak, on the 2nd Nov., affords us an opportunity, which we willingly avail, of paying a tribute of respect to his memory. He had just been one year in his new office when he was treacherously assassinated while employed in the discharge of his public duty—a duty which he had been appointed to perform at the special

Digitized by Google

request, if not of his actual murderers, of the Chiefs of the country, who should at least have taken care that the valuable life of a British official, who was endeavouring to replace anarchy and bloodshed in their country by order and prosperity, should not be in the slightest degree endangered. In private life Mr. Birch was a most warm-hearted friend and genial gentleman. As Colonial Secretary he was a most able and energetic Executive officer. In the Legislative Council he was a fluent speaker and a ready as well as keen debater. Always courteous in demeanour, easily accessible, and free from official hauteur, he did a great deal, during his short term of office in these Settlements, to remove the general feeling of distrust and the want of harmony between officialdom and the general community which had gradually grown in strength during the first eight years of colonial rule. Mr. Birch made many friends here and in Penang, who deplore his sad and untimely end. By his death the Queen has lost a good servant and the community a most capable official.

Another valuable life has been lost by the death of Captain Innes, R.E., who was killed on the 7th Nov., whilst gallantly leading the attack on the stockade at Passir Sala, where Mr. Birch had been murdered. The circumstances of his death are not of such a distressing nature as those of Mr. Birch's. He died a soldier's death, sword in hand, and whilst attempting to avenge his fellow countryman's cruel assassination, and uphold his country's flag. None the less is his premature fall to be mourned. Captains Innes was first Assistant Colonial Engineer, and although he had not seen such long service as Mr. Birch, and had not been very long in the colony, he was a young officer of exceeding promise, popular with all who knew him, and he has left his mark on some of the Public Works of Singapore and Penang, notably in the re-arrangement of the gaols of the two Settlements. His death is a sensible loss to the colony.

Shortly after the receipt of the news from Perak of the murder of Mr. Birch the announcement that the Maharajah of Johore intended to despatch his gunboat *Pulai* to Perak River occasioned some surprise and unfavourable comments in our columns. We have since ascertained that his Highness's action in the matter has been entirely misunderstood, his motives misconstrued, and altogether great injustice done to his good faith and intentions. We deem it right, therefore, in common fairness, to put our readers right in the matter by laying the real facts of the case before them. The Maharajah's gunboat *Pulai* was sent up to Perak with the approval and at the wish of the Governor, the object being that some of the Maharajah's officers might be able to cross over from Laroot to Upper Perak in order to ascertain beyond doubt, as only Native officials could, the real state of feeling there towards the British Government. For this good service it must be confessed that the thanks of the community to the Maharajah have been of the scantiest.

We now learn that the Maharajah has just rendered the Colony another good service. The whereabouts of Rajahs Mahdie and Mahmoud, of Salangore notoriety, have been the subject of inquiry since the Perak disturbances began. It has been generally rumoured and believed that both were at the bottom of these disturbances and that both had gone or were on the way to Perak to take part in the fighting. This is an entire mistake, at least so far as Rajah Mahdie has been concerned. For some time back he has been living quietly up at Padang, a place close to Batu Pahat, between this and Malacca, and not far from the Moar river. There being some apprehension entertained of what he might do, the Maharajah of Johore sent up his gunboat, either the *Pantie* or *Pulai*, to persuade him to show his good faith by coming down to Johore, and we are informed that Rajah Mahdie, although sick, consented and came away in the gunboat, and there is no reason to believe that he has had anything to do with the Perak rebellion, or that he has been trying to revive disturbances in Salangore. In this matter again it must be acknowledged that his Highness of Johore has shown his good will to the British Government, and for this he should receive all credit. With regard to Rajah Mahmoud, he is said to have aided the escape of Mr. Swettenham when on his way down to Perak river, just shortly after Mr. Birch's assassination.

There has been some stir in the Square and on 'Change by the report of the discovery of a forgery for a considerable amount on one of the banks. It transpired that the bank had discounted more than two months ago three promissory notes purporting to be due by three different Chinese hongs to another well-known Chinese hong. The promissory notes were duly stamped, and seemed all in regular business order, with the chops of the debtor and creditor. To European eyes Chinese chops seem all much alike, but the chops on these promissory notes appear to have passed the scrutiny of the bank's cashier and Shroff. So it is said. One of the promissory notes became due, and was repudiated as a forgery, both chops on it being declared forged. The other two promissory notes were then examined, and also pronounced to be forgeries. The total amount of the three promissory notes is put at $20,000. It is clear, therefore, that there are some clever rogues amongst us.

The British steamer *Ban Yong Seng*, Captain Darke, which has arrived from Bangkok, brought news of a collision having occurred between two steamers, the *Bangkok* of this port, and another British steamer, from Hong Kong, the *Rajanattianuhar*, as they were both crossing the bar of the Bangkok river, outward bound. The *Bangkok* was leading, and when on the bar slackened speed. The *Rajanattianuhar* did not do so, but kept on, and ran into the stern of the *Bangkok*, and both vessels sank on the bar. They are of course in shallow water, the decks of both are visible, and hopes are entertained that they may be raised.

There seems to be fatality attending steamers at the present moment in these seas. Scarcely a day passes without some casualty being heard of among them. A short time ago news came of the loss of the *Willem Kron Prinz der Nederlanden* near Batavia. Another Dutch steamer, the *Salak*, is now reported as missing, and supposed to be totally lost. She left Batavia about twenty-four days ago, with 250 troops on board bound for Atchin, and has not since been heard of.

From the *Siam Weekly Advertiser* of the 11th Nov., we learn that official news has been received from the North to the effect that the Siamese Expeditionary Force had on the 30th September attacked the Cheen Haus, stormed their fortresses at Seetahn and Wat-chan, and put them utterly to flight. The Cheen Hau Commander-in-chief, Liew See Koh, was slain, as was also his second-in-command, Lee See Poh, and Liew See Koh's younger brother, Kwahn Sai, was taken prisoner with a number of Cheen Haus. The campaign would appear therefore to have been a short and sharp one.

The Stewards of the Sporting Club have held a meeting, and, upon full consideration, unanimously decided that, under existing circumstances, it would be inappropriate to give a ball. There will, therefore, be no Race Ball, as usual, to wind up the autumn meeting.

The *Government Gazette* notifies the appointment of Captain Vaughton, 1-10th Regiment, to be a Police Magistrate and Commissioner of the Court of Requests at Malacca, and a Justice of the Peace of the Straits Settlements.

The subjoined appointments have been made temporarily during the present crisis in the State of Perak :—

The Hon. Major J. F. A. McNair, R.A., to be Senior Commissioner attached to Her Majesty's Forces during the operations in Perak.

Mr. W. E. Maxwell to be Deputy Commissioner under the Hon. Major J. F. A. McNair, R.A.

Major S. Dunlop, R.A., to be a Commissioner attached to Her Majesty's Forces during the operations in Perak.

Mr. F. A. Swettenham to be Deputy Commissioner under Major S. Dunlop, R.A.

Mr. F. H. Gottlieb will perform the duties of Magistrate, Province Wellesley, during the absence of Mr. W. E. Maxwell in Perak.

Capt. B. Douglas will perform the duties of Assistant Resident, Salangore, during the absence of Mr. Swettenham.

ARRIVALS.

At YOKOHAMA.—From London, Dec. 18, Flying Spur, Montgomeryshire (str.).

At SHANGHAI.—From Liverpool, Nov. 6, Antenor (str.); 9, Chinaman.

At FOOCHOW.—None.

At HONG KONG.—From Liverpool, Dec. 22, Sarpedon (str.), Deucalion (str.); from Cardiff, Amstel; from Hamburg, Gustav Adolf, Picciola; from Portland O, Garibaldi.

Att MANILA.—From Liverpool, Oct. 30, Remus.

A SINGAPORE.—From London, Dec. 18, Burmese (str.); from Liverpool, Leon (str.); from Cardiff, Star of the South, Europa.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—None.

From FOOCHOW.—For Channel, f.o., Nov. 7, Catherine Ocean.

From HONG KONG.—None.

From MANILA.—For Liverpool, Oct. 29, Whitehall, Nov. 6, Elizabeth Ann; for Channel, f.o., Oct. 19, Mariner; For Cadiz, 31, Vicenta; for New York, Nov. 5, Charmian.

From SINGAPORE.—For Liverpool, Nov. 20, Aurrera (str.); for Hamburg, Bussorah.

TELEGRAMS FROM THE FAR EAST.

THE DISTURBANCES IN PERAK.

(COLONIAL-OFFICE TELEGRAMS.)

PENANG, DEC. 19.—Ismail left Blanja just before arrival of troops; never intended negotiation. Force since advanced seven miles towards Kinta, twice fired on. Malays dislodged by guns and rockets. Strong stockade recently evacuated occupied. Maharajahs left with Ismail. Chinese riot at Malacca; have sent 200 men of the 3rd Regiment there.

PENANG, DEC. 23.—Combined force took possession Kinta, without loss, 17th, after three days' severe march from Blanja, through twenty miles jungle; no serious opposition. Malays quickly dislodged by guns and rockets. Ismail and Maharaja Lela fled towards Patani, taking regalia with them.

(ADMIRALTY TELEGRAM.)

KINTA, DEC. 18.—After firing rockets and guns upon Kinta, combined forces took possession without loss; met resistance; encamped here for the present. Naval Brigade very healthy.

(REUTER'S TELEGRAM.)

CALCUTTA, DEC. 23.—The latest advices received from the Malay Peninsula state that the British force was approaching Kinta. Blanja had been deserted and Ismail had left. The retreating Malays had fired on the advance guard of the British force, seriously wounding Dr. Randall. When this news left the British troops were replying with artillery and rockets.

BOMBAY, DEC. 23.—The latest intelligence received here from Penang is of the 15th inst. General Colborne and Brigadier Ross were respectively progressing north and south of the Perak River. Ismail had gone to Pahang. He had obtained co-operations and complications with other Malay States were probable. Particulars of the attack made on the 7th by a detachment of the 10th Regiment upon the stockade near Sungie Ujong state that the British forces were commanded by Lieutenants Hinxmans and Peyton. The stockade contained 400 Malays, who made a determined resistance, but the position was carried at the point of the bayonet. The British loss is given at 13 killed and 10 wounded, and the loss of the Malays at 21 killed and a considerable number wounded. Matters were considered serious. Anson remained at Malacca.

SINGAPORE, DEC. 22.—Intelligence received here from Perak announces the arrival of the British troops before Kintah, where Ismail and Maharaja Lela oppose them with a large force. Telegraphic communication has been established between Perak and the Cabut (?) river district. General Colborne has asked for reinforcements.

(TIMES TELEGRAM.)

PENANG, DEC. 24.—General Colborne reports that Kinta has been taken without loss. Ismail, with Maharajah Lela, fled to Palane (?).

SHIPPING POSTSCRIPT.

CASUALTIES.—Singapore, Dec. 21, the Seaton, from Zebu, to Liverpool, is ashore near Billiton. Hong Kong, Dec. 22, the Fontenaye, from Bangkok, Oct. 27 (timber and rice), encountered heavy gales, during which she was thrown on her beam ends and shifted cargo; made jettison of part of her cargo. The schooner Franz, from Sydney, arrived here with coal, sprung a leak in lat. 10 S., lon. 169 E. She jettisoned about 25 tons. The Admiral Dervaux (French ship), from Whampoa for London, has been totally lost in Sunda Straits.

MISCELLANEOUS.—Batavia, Dec. 11.—An attempt has again been made to save the specie on board the Willem Kroonprins der Nederlanden upon the usual terms, but it did not succeed, in consequence of the continuance of bad weather. Bangkok, Dec. 2.—The Rajanattianuhar is safe; her damage has been temporarily repaired; will dock at Hong Kong.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

CHEETHAM—On the 20th Dec., at 12, Chesterfield-street, Euston-road, London, the wife of J. C. Cheetham, late of Nagasaki, of a son, who only survived his birth a few hours.

MARRIAGES.

BOXER—CRICHTON.—On the 16th Dec., at Holy Trinity, Sydenham, by the Rev. H. Stevens, M.A., Commander J. A. Boxer, R.N., to Georgina Augusta, youngest daughter of G. A. S. Crichton, of The Brae, Dartmouth, Nova Scotia.

Miscellaneous.

LIBELLING A MISSIONARY SOCIETY.

The case mentioned in our issue of the 13th inst. has been brought before the Tribunal of Police at Paris; plaintiff the Abbé de Girardin, defendants MM. Edmond About and Francisque Sarcey, who presumed to attack the Sainte Enfance in the columns of the *XIXme Siècle*, and hint at a misappropriation of funds. The Sainte Enfance was created in favour of the Chinese infants, to save their lives, and to bring them up in the true faith. The defendants throw doubts on the veracity of those clerical sheets which represent infanticide as carried to a fearful pitch in the populous Celestial Empire, and cite numerous authorities, both lay and clerical, in order to annihilate the assertions of the Sainte Enfance. They conceive that so large an Asiatic Power as China, though unrepresented at Paris, should not be gratuitously insulted in order to allow Catholic missions to flourish. It appears that the revenues of the Sainte Enfance amount to about 2,000,000f. a-year, most of which sum is collected by the clergy in sous, and comes from the pockets of little boys and girls impressed with the idea that five sous will save a new-born Chinaman from being thrown to the pigs. M. Edmond About, after examining the budget of the Sainte Enfance, finds that very little more than half the money collected for the little Chinese goes to China. Nearly a million of francs is distributed by the central council between fifty-five apostolical vicars, a dozen apostolical prefects and sub-prefects, superiors, auxi-

Digitized by Google

liary ladies of souls in purgatory, sisters of Nazareth, and other female orders. The Jesuits alone receive 405,300f. In fact, 906,000f. go to Siam, Japan, Burmah, the Sandwich Isles, Galilee, and other places where there are no Chinese to be rescued. Calcutta gets 4,000f., Central Bengal, 18,000f., the Bight of Benin 8,000f., Sahara 15,000f., Hudson's Bay 7,000f., &c. These figures are taken from the journal of the Sainte Enfance. M. Sarcey condemns this appeal to French charity for several reasons. He thinks charity should begin at home, and end there. He points to "the abominable and cruel realities" extant in France, where from 80,000 to 100,000 infants per annum fall into the hands of the Assistance, 50,000 of whom perish during the first year. These are the known cases. A work on this painful subject further states that "not an hundredth part of the infanticides committed come before the courts." One of the reasons for this lamentable state of affairs is that the "tours" where new-born children could be placed have been suppressed in France. In China these "tours" have existed for nineteen centuries, and one is still to be found in every district. In France they were suppressed for the sake of economy. In an official report concerning Marseilles we learn that in the first six months of this year seventy-six children were born dead, that "crime oozes through the pale leaves which pass under my eyes," and that wretches engage to make the victims disappear at a reduced price. Then why should the Sainte Enfance not confine its efforts to France? Why excite the charity of French children by the narration of fables and by pictures in which a violet pig is seen devouring a little Celestial, whilst a young abbé is carrying off a rosy cherub in green to be baptised? M. Sarcey quotes in one of his articles a very moderate and witty letter, written by the Emperor of China with his vermilion pencil, on the subject of the French missions. His Majesty seems to think that the barbarians are really throwing away their money, and that they would act wisely in looking after their own children. Several of the lay and clerical writers cited by M. Sarcey, and especially the Père Huc, speak in terms far more severe than those employed by the *XIXme Siècle* of the calumnies to which the Chinese have been subjected. It is mentioned as a strange fact that the children educated by the Jesuit and other fathers in China are not taught to speak French, but only Latin. The tribunal sentenced M. Sarcey (the originator of the polemic which has been carried on in the newspapers on this subject), M. About (manager of the *Dix-Neuvième Siècle*), and the printer to pay jointly f.1,000 as damages. MM. Sarcey and About were, moreover, fined f.300 each, and the *Dix-Neuvième Siècle* was ordered to publish the sentence.

THE THREATENED RISING IN RANGOON.

The *Pall Mall Gazette* says:—Some weeks ago, before the Burmese and Chinese difficulties were finally disposed of, a somewhat alarming rumour reached this country of a plot, barely detected in time to avert some perilous consequences, for the overthrow of the British Power in Rangoon. According to the Indian papers, the report caused much excitement; but in the capital of British Burmah itself "matters were kept quiet, and no general alarm experienced nor interruption of trade." Nevertheless, it seems the story was not a baseless one. On the night of November 12, the town magistrate, acting on "information received," placed several natives under arrest. "Some ringleaders," it is said, "have confessed that a rising was projected for that night under Moung Bwa, a political refugee from Ava, but was abandoned owing to the failure of arrangements. The results of the inquiry have not yet been made public, but it is known that the means at the disposal of the conspirators were ludicrously insufficient, though a large number, including the Chinese, were implicated." A local newspaper, the *Rangoon Mail*, does not consider the project disproved by its manifest absurdity. "There is no crime or folly which Burmese will not be mad enough to commit, providing they have some leader who promises largely. His promises may be made on the most shallow foundation, but so long as he utters his falsehoods with sufficient vehemence and energy he will never want for followers in the large class of vagabonds and bad characters with which this town abounds. We believe the police intend to charge the men who have been arrested with the prosaic crime of attempting to commit dacoity, and with preparation to commit mischief by fire; for the burning of the well-to-do portions of the town, was, it is said, included in the programme of a change of dynasty. It is rumoured that some Burmese loogyes, whose partiality to British rule was thought to be undoubted, are mixed up in the conspiracy."

THE CRUISE OF THE "GOSHAWK."—The topsail schooner *Goshawk*, Mr. G. T. Heskett, owner, left Cowes Roads on the 21st December, 1874, calling at Cadiz, Algiers, Malta, Port Said, and passing thence through the Suez Canal and the Red Sea to Point de Galle, Ceylon, Batavia, Singapore, Bangkok, Manila, the Pellew and other Islands in the Indian Archipelago, and Australia. Intelligence has just been received of her arrival, all well at Sourabaya, Java, from Port Darwin, Australia, on the 26th of October, and that she was to sail for England during the second week in November, round the Cape of Good Hope. She may be looked for in Cowes Roads in February. The voyage has been as successful and interesting as it was enterprising.

THE Rev. Dr. Moffat completed his eightieth year on the 21st inst. Accordingly a deputation from the Congregational Board of Ministers in London waited on the venerable missionary at his residence, and presented to him an affectionate fraternal address of congratulation, signed by 140 members of the Board. Dr. Moffat was deeply affected by the kindness of his brethren, and said it never occurred to him while working among the Bechuanas that his labours should obtain the applause of men. He never thought of anything but to do his work for his Lord, and for the souls of the poor Africans. Had he a thousand lives he would live them all over again in the same good and holy cause.

THE will of Mr. Robertson Gladstone, late of Liverpool, has been proved by Arthur Robertson Gladstone and Robertson Gladstone, two of the sons of the deceased, the acting executors, the personal estate, including leasehold property, being sworn under £120,000. The testator bequeaths £5,000 to be divided between the Liverpool charities and Protestant schools; to his eldest son, Arthur, £5,000; and the residue of his estate, real and personal, to be divided between all his children in such a manner as that each of his sons will receive half as much again as each of his daughters.

THE will of Mr. John Bowman (a partner in the firm of Messrs. Forbes, Forbes, and Co., East India agents, formerly of Bombay, has been proved by Sir Charles Forbes and Messrs. William Steven, Horace B. T. Farquhar, John Christie M'Nair, and Alexander Anderson Weston, the executors, the personal estate being sworn under £140,000. The testator bequeaths to each of his executors £500; to his adopted daughter, Miss Elizabeth Charlotte Dowling, £10,000; to his brother Robert and his sister, Miss Jane Bowman, £4,000 each, and other legacies.

THERE was a large attendance at the meeting of the East India Association, at its rooms in Great George-street, Westminster, on the 21st inst., at which a paper on "The Present Position of Turkey in Relation to Indian Interests" was read by the Rev. Charles Long, of Calcutta. In a discussion which followed, on the subject of Russian approaches towards India, Sir Charles Wingfield, the chairman, expressed his opinion that years and years must elapse before Russia can make its conquest of Central Asia the basis of operations.

A NUMBER of groups of Japanese figures, of life size and in comical attitudes, have just been added to the attractions of the Crystal Palace. In fairness to the Japanese, however, one group should be added representing an average Japanese man and lady without distortion, not only for the purpose of heightening the effect of the humorous groups, but to illustrate the fact that the ladies of Japan are in reality not less fair or less graceful than those of the western world.

THE members of the Blackheath Golf Club played a match on the 21st inst. for a handsome silver filigree cup, presented by the Calcutta Golf Club through Mr. Mudie. The winner was Mr. Richardson, a promising young player. We hear that Mr. Joseph Purvis, an old Singapore resident, has presented a silver cup to the same club, which will be competed for shortly.

WE understand that the committee appointed by the subscribers and members of the Thatched House Club have arranged all the difficulties in which the Club was found to be some months ago, and that new members need be under no apprehension of a "Whip."

IT is stated that the British Government and a French combination, headed by M. de Lesseps, are rival bidders for the Khedive's founder's shares in the Suez Canal, M. de Lesseps having, it is reported, offered f.45,000,000.

Naval and Military.

The command of the 75th Foot has become vacant by the retirement of Colonel Thomas Milles, on full pay, with the rank of major-general. Colonel W. T. L. Patterson has retired on half-pay from the command of the 88th Connaught Rangers. Major and Brevet Lieut.-Colonel F. A. Smith, V.C., has been promoted to the command of the 42nd Light Infantry, vice Colonel Colville, C.B., retired on half-pay. The consequent promotions have all been given in the regiment, the command of the Connaught Rangers being given to Major William Lambert, who served with the 88th in the Crimea, was severely wounded at the storming of the Redan, went through the Indian Mutiny, and has been unfortunate in his promotion, having been three times passed over, when the command fell vacant, by Colonels Burnside, Hughes, and Patterson. The command of the 75th Regiment is expected to pass to Major Richard Wadeson, V.C., who won the Victoria Cross and his commission, under circumstances of exceptional valour, at the siege of Delhi.

The work of excavating the third and last basin of the Chatham Dockyard Extension is making notable progress. About 1,500 convicts are engaged upon the undertaking, which is being carried out mainly by means of convict labour, under the direction of Mr. E. A. Bernays, the civil engineer in charge. This fitting out basin will be much larger than the factory and the repairing basins, which were completed a considerable time back, and are now in use, the basin being constructed having an area of no less than forty acres. A number of new workshops and factories are to be constructed near the various basins. At this moment several convicts are engaged in erecting a large iron structure which will be used as a boiler-shop; other buildings for mechanical works have been constructed and have been fitted with machinery.

The 81-ton gun is being put into a new lathe in rear of the gun turnery at the Royal Arsenal, in order to have the bore enlarged. The lathe is ninety feet in length, and adapted for guns considerably larger than any yet contemplated. Another of a similar kind is to be placed beside it, and the two will be used for boring purposes, while a third lathe now being manufactured at the Royal Gun Factories will be employed in the rifling process. The machinery will at first work in the open air, as the workshop which is to contain it is not yet erected, but a temporary shed will be put up over the lathe as soon as the gun is fixed in its place. The new 160-ton travelling crane and other powerful machinery will be fixed in the workshop with these lathes.

Vice-Admiral Charles Frederick died rather suddenly on the 23rd inst. He entered the Navy in June, 1810, as first-class volunteer on board the Temeraire, 98, Captain Edwin Henry Chamberlayne, flagship, off Cadiz and in the Mediterranean. In consideration of his services in the Yang-tsze, where he was present at the capture of the city of Chin-Kiang, and at the pacification of Nanking, Captain Frederick was rewarded with post rank 23rd December, 1842, shortly after which he retired on half-pay. He became rear-admiral 20th May, 1862, and

Digitized by Google

vice-admiral 18th October, 1867. The deceased officer was eldest surviving son of Colonel Thomas Frederick, and claimed the baronetcy on the death of Sir Richard Frederick, but his claim was not substantiated.

Lieutenant-Colonel W. H. Goodenough, Royal Artillery, will succeed Colonel Reilly, C.B., as Assistant-Director of Artillery and Stores at the new office. He served in the Indian campaign of 1857-58, including the action of Pandoo Nuddee, siege and capture of Lucknow, attack and capture of Fort Birwah—severely wounded (three times mentioned in despatches, Brevet of Major, medal with clasp). Colonel Goodenough passed out of the Staff College in December, 1864, since which time he has been constantly employed on the Staff. First, he was Brigade-Major of Artillery at Aldershot, then Military *Attaché* at Vienna, and recently he was appointed to the Woolwich District as Assistant Adjutant-General.

Brevet Major W. F. Butler, C.B., half-pay, late 69th Regiment, who has just returned from special service with Major-General Sir Garnet Wolseley, G.C.M.G., K.C.B., in Natal, has been appointed Deputy-Assistant Quartermaster-General at head-quarters, vice Lieutenant-Colonel Baker, C.B., 18th Royal Irish, appointed Assistant Adjutant-General. Major Butler served in the 69th Regiment with the field force which repelled an incursion of Fenians into Canada, in May, 1870; served throughout the Ashantee war, from October, 1873, and was employed as Special Commissioner to the Western Akims (mentioned in despatches, promoted to a substantive Majority, C.B., medal with clasp).

The Orontes, troop-ship, has been floated out of dock at Messrs. Laird and Co.'s yard at Birkenhead, where her engines have been altered to the compound principle, and the ship herself lengthened 50 feet. She was built in 1862 for the navy by this firm on the same "lines" as the Himalaya, which latter ship, originally built for the P. and O. Company, and designed by Mr. Scott Russell, was bought into the service at the time of the Crimean war. She is still actively employed, and has proved the finest troop-ship in existence. As now altered, the Orontes will carry with ease and comfort upwards of 1,200 troops, in addition to her own crew.

Sir Frederick Haines, K.C.B., the new Commander-in-Chief in India, has offered his Military Secretaryship to Colonel Robert Coope Stewart, half-pay, late 2nd Queen's, Adjutant-general of the Madras Army. Colonel Stewart has, however, declined the appointment, and it is probable that Colonel Martin Dillon, C.B., C.S.I., of the Rifle Brigade, who has been Military Secretary to Lord Napier of Magdala during the whole of his term of command in India, and was on his Lordship's staff in China and Abyssinia, will be asked to remain in his present appointment.

The naval prison at Lewes having been found hardly capable of accommodating the seamen committed to it, the Lords of the Admiralty have determined to establish a prison at Portsmouth for men who are sentenced to a short term of imprisonment. It is not yet decided whether to erect a building for the purpose or one of the old wooden men-of-war as a prison hulk. In the event of building a place, the site will be found in connection with the dockyard extension works, but it would be much cheaper to convert an old liner into a floating prison.

Major E. Markham, Royal Artillery, will succeed Lieutenant-Colonel Goodenough as Assistant-Adjutant General at Woolwich. Major Markham served in the Eastern campaign of 1854, and up to January, 1855, including the affair of M'Kenzie's Farm, battles of Alma and Inkerman, siege of Sebastopol, and repulse of the sortie on October 26, 1854 (medal with three clasps, Knight of the Legion of Honour, and Turkish medal). He also served in India in 1858, and was present at the action of Secundra, January 23 (medal).

The iron-clad turret-ship Independencia, built by Messrs. Dudgeon and Sons, of Cubitt-town, for the Brazilian Government, still remains in one of the graving docks at the Dockyard, Woolwich, but nothing is being done to her at present in the way of completing her for sea. The work of repairing the damages she received at her launch has been undertaken by another shipbuilding firm, on behalf of the Brazilian Government, but operations will not be commenced until the days are longer.

Great supplies of armour-plates for the ships ouilding at Chatham Dockyard are now arriving from the manufacturers at Sheffield. The plates are very large, weighing ten and twelve tons each. The plates come by railway to Chatham station, and are thence drawn to the yard by means of a powerful traction engine. It is expected that 500 or 600 tons of these plates will be sent to Chatham in the next few weeks.

The Lieutenant's Naval Pension of £50 a year, vacant by the death of Retired Commander George Marriott, has been awarded to Retired Commander Charles G. Fegen. The Paymaster's Greenwich Hospital Pension of £50 a year, vacant by the death of Mr. Henry South, Paymaster-in-Chief, has been awarded to Mr. James W. Uzzard, Paymaster-in-Chief.

It has been decided to build at Pembroke dockyard two armed despatch vessels, double screw, with engines of seven thousand horse-power, indicated. They will each carry ten guns and have a displacement about three thousand seven hundred tons. The probable cost of these vessels will be £100,000 each.

The precedent having been established in the case of Major-General Walker, C.B. (Berlin), that military attachés need not vacate their appointments on obtaining the rank of major-general, Major-General Morris, C.B., remains at Vienna, as also Colonel Conolly, C.B., in Paris, on obtaining that rank.

The Swallow, double screw gun vessel, Commander Drummond, has been ordered home from the North American station without waiting for her relief. She was commissioned in March, 1872.

It has been determined to furnish each of the troopships Malabar, Euphrates, Crocodile, Serapis, and Jumna with four of Berthon's collapsible lifeboats, at a total cost of some £6,000.

It is expected that the Duke of Edinburgh will take command of the ironclad Monarch, and serve his time in the Mediterranean squadron next spring.

The Admiralty intends to erect, at a cost of £2,500, a drill-shed in each town where a battery of the Royal Naval Artillery Volunteers is established.

Lieut. McKellar of the 25th Regt., reported as having died at Aden will be remembered as a Sub.-Lieut. in the 80th Regt.

Legal.

HIGH COURT OF JUSTICE—PROBATE, DIVORCE AND ADMIRALTY DIVISION.

MORRISON V. MORRISON.

This was a probate cause in which the plaintiffs propounded the will of the late Mrs. Elizabeth Morrison, who died in 1874. The will is dated the 12th of September, 1872, and is opposed by the defendant, a son of the testatrix, on the grounds of informal execution, incapacity, undue influence exercised over the testatrix by the plaintiff Morrison, and that she did not know or approve of the contents of the will. It appeared that the testatrix was an elderly widow lady, her husband having died many years ago. She had a family of five children, but only two of them now survived—Robert, the plaintiff, and George, the defendant in the present suit. Robert was stated to have been employed in the late Lord Elgin's mission to China, but had received no pension. George had been on the consular staff in Japan, and retired with a pension of £360 per annum. He appeared to have given some trivial offence to his mother respecting money matters, but the crowning offence in the old lady's estimation was his having married a lady whom she did not like, contrary to her wishes, and of whom she always entertained an unfavourable opinion, which was said to have been reciprocated by the son's wife, who entertained anything but affectionate feelings for the testatrix. In consequence of this state of feelings there was said to have been no communication between George, the defendant, who resided with his wife at Brighton, and the testatrix and the rest of the family, who resided at Binfield, near Bracknell, in Berkshire. The testatrix seemed to have in her own right a sum of £3,000, which she had invested in railway debentures. She had also a life interest in a sum of £4,000, which on her death was to go to her children then living and the representatives of those who might be dead. The old lady, from the state of her relations with her son George, and considering also that he was pretty well provided for by his pension, had always expressed her intention of leaving the bulk of her property to her son Robert, the plaintiff. In June, 1872, the testatrix left Binfield for Brighton to spend a few weeks there. The day after she arrived she had a paralytic seizure, which deprived her of the use of her right side. Her mental faculties remained, however, unimpaired, and on the date stated she executed the will now propounded, by which she gave the whole of her property to her son Robert, the plaintiff; in the event of Robert's predeceasing her to his daughter, and failings, both the reversion was to go to her son George, the defendant. This will that gentleman opposed on the grounds stated —The plaintiff and others were called, who gave a detail of the family differences, and the relationship existing between the defendant, his wife, and his mother, which was of no public interest whatever. They also spoke as to the competency of the testatrix at the time the will was executed, and as to the absence of any pressure being brought to bear upon her on that occasion. It was also in evidence that besides the interest of the £7,000 already stated, which the testatrix had to live upon, she was allowed from the Crown a pension of £100 a year in consideration of her husband's services as a missionary to the East, and as being the author of a Chinese dictionary and the first translator of the Bible into the Chinese language.

On the conclusion of the case for the plaintiff, Mr. Inderwick, Q.C., opened the case for the defendant against the will, and expressed his regret that the case, involving as it did so many family matters of a disagreeable character, should have come before a public-court. It would have certainly been much better could the matters between the parties have been arranged, but as that had not been done the case must be fought out. The learned counsel then went over the evidence which had been adduced on the part of the plaintiff, and contended that as the will he propounded was altogether different from the previous intentions, as expressed in testamentary documents, it was an unnatural will, and showed that it did not express the real intentions of the testatrix. By a will the testatrix executed in 1859 she left her property to be divided equally among her children, and by another, prepared in 1871, if not actually executed, she left the defendant £1,000, while by the present will she cut him off altogether.

Sir James Hannen summed up the case, telling the jury that the only question they had to decide was as to the state of the testatrix's mind at the time the will was executed, and as to which they had ample evidence. They had nothing to do with the family squabbles which had been imported into the case.—The jury, without leaving the box, at once gave a verdict for the plaintiff in favour of the will on all the issues. —Sir James Hannen, in accordance with this verdict, pronounced for the will, and stated that as the opposition to it was utterly unfounded, and arose from ill-feeling and disappointment, he should condemn the defendant in costs.

COMMON PLEAS DIVISION.

NIEMANN V. DAVISON.

The plaintiff in this case was a merchant in Mincing-lane, and the defendant, who was a shipowner at North Shields, was the owner of a vessel named the *Duchess*. There was shipped on board this vessel for the plaintiff, at Java, ten casks of arrack. These casks were placed upon the skin of the ship, and a large quantity of sugar, in bags, was placed over it. Some parts of the casks started, and a great quantity of the spirit escaped. The plaintiff now claimed to recover for the

Digitized by Google

loss so sustained, his case being that it arose from improper stowage. On the other hand, it was said that there was no improper stowage, and that the mischief arose from the shifting of the cargo during heavy weather.

The verdict was for the plaintiff for £158.

MARINE INSURANCE.—SANDERS AND OTHERS V. BARING AND ANOTHER.

This was an action upon a policy of insurance upon cargo and freight, and the defendants paid £600 into Court. The plaintiffs were merchants in London and Liverpool, and in February, 1873, they shipped on the German vessel *Marianna* 725 tons of coal, to be carried from Cardiff to Yokohama. In October following they put into Hong Kong with both vessel and cargo very seriously damaged. The plaintiffs claimed to recover £1,650, upon the ground that there had been a constructive total loss of the cargo. The defendants admitted a total loss of ship and cargo, but objected to the mode in which the average statements had been made up, and to the Average Adjuster at Hong Kong having allowed *pro rata* freight for the conveyance of the cargo to that port. The only questions, therefore, were questions of law, and the facts being admitted, they were placed on his Lordship's notes, and some correspondence was put in.

In the end a formal verdict was taken for the plaintiffs for the amount claimed; but it was reserved for the full Court to determine whether the defendants were liable for any, and what amount beyond the sum paid into Court.

BANKRUPTCY DIVISION.

IN RE E. M. DE BUSSCHE.

This was an application to confirm a scheme of arrangement. The bankrupt, who is described as a steamship proprietor, of Ryde, Isle of Wight, was adjudicated some time since, and the statement of affairs filed shows total unsecured liabilities £183,177, against assets £19,250. The proceedings were originally instituted in the Newport County Court, but have since been transferred to London. The scheme come to by the creditors is for the acceptance of £7,500 in discharge of all liabilities and the payment of the costs. The money is to be paid in six equal instalments in twelve months, security being given and the bankruptcy annulled. It appeared, however, that there were some matters of detail to be arranged, and a short adjournment was ordered.

IN RE NEROUTSOS AND CO.

This was an application to register a resolution liquidating by arrangement the estate of this debtor, who is a merchant carrying on business at East India-avenue and Manchester, and who failed in October last. The statement of affairs produced at the meeting shows liabilities £22,771, against assets £13,023. An objection was taken in the liquidation office to the registration on the ground that several of the creditors had not been served with the usual statutory notice of the meeting, but it appeared with regard to seven of them, that although wrongly addressed, the notices had reached them, and they themselves had no objections to offer. With regard to seven others it appeared that their joint indebtedness only amounted to the small sum of £196, which would not affect the majority. Upon the application of counsel for the debtor, the Registrar directed the registration.

The estate will be liquidated by arrangement, with a trustee and committee of inspection.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, DEC. 22.

We are once more involved in a Ministerial crisis. Mr. Enderlein, the chief of the War Department, has tendered his resignation, because the Second Chamber refused by a majority of only one vote to grant the necessary money to build the proposed new fortresses. His Budget had been previously carried, but, nevertheless, the Minister regarded this as a vote of want of confidence, and he at once resolved to go the way of his predecessors. Within five years we have had no fewer than eight Ministers of War. They all come with the best intentions and the best plans, but they fail to realise them. The worst of the question is that the organisation of our military forces and of our means of defence remain uncompleted. The papers now advise the Government to abandon the appointment of colonels and other military officers as Ministers of War, and to try a civilian, assisted by a sort of council of military men. This much is certain, that something must be done to improve our means of defence, and it has been fully proved that our military specialists know quite well how to do their duty, but as statesmen they are not worth a penny. Their reputation as orators is so bad that not one of the members troubles himself to listen to their speeches. Mr. Heemskerk was very lucky in the defence of his Budget, and he knows how to deal with the Chamber. His tactics were to take and to give, and he succeeded in passing the rocks on which it was foretold his vessel would undoubtedly strike. He is, perhaps, the best Minister of the Home Department we have had for some time. It is very singular that the chief of the Naval Department should have succeeded in obtaining a majority for his Budget. If this vote means that our navy is in a satisfactory state, then I must acknowledge that I do not understand why former Ministers were obliged to resign office. The last day of the Budget debate was rather interesting, not only because the endeavour of Mr. Nierstrasz failed to induce the Minister of the Colonial Department to publish the documents about the Atchin war (which would be, it was said, detrimental to the interests of the mother country), but because Mr. Fransen Van de Putte made a speech, in which he demonstrated that if he closed his eyes when the Minister, who is a Conservative, spoke, he should imagine that he was himself speaking. This, of course, affords a most eloquent proof that our colonial policy has broken both with Conservatism and Liberalism. There is no difference between them, and the question is whether the Tories have become Whigs, or the Liberals have become Tories. Both have watered their wine, but I think the Liberals diluted the most, while they ought to have been the most earnest to keep their wine pure. The Budget was approved by a very large majority—59 against 3—and the members will disperse to-day or to-morrow to enjoy their Christmas holiday. They will not meet again before the last half of February. The First Chamber will make a beginning with the Budget debate about New Year's-day. As soon as the recess is over the education (lower class) and the plan of Mr. Vander Heim to partially reorganise our system of taxation will be brought forward. The intention to subject tobacco to taxation meets with more and more opposition, but it must be said that most of the opponents are brokers, merchants, agents, and shopkeepers, who gain a living by this article, of which this year there has been imported from Java alone an amount of fifty millions of guildera. The principal objection is that if this article is taxed there is much probability that the trade will seek a *refuge* in Antwerp or Bremen. It is more than probable that the project will not gain the consent of Parliament. Another question is that of Customs Treaty between Holland and Belgium, and this was discussed when the Budget of the Department of Finances, which was approved, was dealt with. The idea which finds promoters, both in Belgium and in our southern provinces, meets with anything but sympathy in the Cabinet. There are many difficulties in the way of a Convention being concluded between the States.

There are some papers urging the necessity that the Prince of Orange should follow the example given by the Prince of Wales in visiting India, but there is little chance of such a voyage being undertaken. According to the *Amsterdamsche Courant*, there is much question just now of a marriage between Prince Alexander (who has artived safely at Algiers) and Princess Beatrice, the youngest daughter rf Queen Victoria. This assertion is not officially contradicted, but oi is thought to be most improbable. Perhaps you may know more than we do. The King has returned from his seat *Het Loo* to the Hague. It is said that the Queen will start for a watering-place in Southern Europe in order to restore her health.

The *Staatscourant* contains the following *entre filet*:—"According to a telegram from the Japanese Government, addressed to the Japanese ambassador at Vienna, dated Tokio, December the 8th, a Portuguese, named De Roza, had tried to defraud the Dutch Company at Yokohama (query the Dutch Trading Company) out of a sum of three millions of dollars by means of a false letter of credit, said to be drawn by the Japanese Government, on a pretext that men-of-war were to be bought for Japan. The endeavour has miscarried, and he has fled to America or Europe, and perhaps intends to try his luck there by the same means. The ambassador hereby warns all persons against this man."

A few weeks ago the High Court gave a verdict in the law-suit "Muller *versus* the Steamship Company Nederland," in consequence of which the Company has to pay the damages, because the master of the ship has not been able to prove that there was *force majeure*. This verdict has greatly frightened our underwriters and shipowners, and it must be acknowledged that their position is a most hazardous one. In a few days a meeting of members of the Chambers of Commerce will take place, in order to deliberate whether it is not advisable to induce the Government to alter the law so as to make such verdicts impossible for the future.

The Regent of Malang, Raden Adhipati Arjo Noto Dinang Rat, has been created a Knight of the Order of the Netherlands Lion.

The greatest dulness prevails on Change, so that there are no transactions of any importance to report. The issue of the new loan of the Netherlands India Trading Bank has proved a success; 20,000 shares being subscribed here, in addition to those placed in Java.

PRODUCE MARKETS.

A thaw having set in there has been some revival of trade, and prices in general are well maintained.

COFFEE.—Some small parcels of private import have found buyers at prices which were kept secret. Holders are not inclined to operate and nothing can be bought under 58½c. under good ord. The market closes firm.

TEA.—Prices are unaltered, and, some small parcels excepted, nothing of importance has changed hands.

SUGAR.—The market has remained unchanged, though some cargoes were sold at prices fluctuating from f.½ to f.1 under those of October. A good demand has prevailed for white and fine quality. The sales comprise about 10,000 mats.

RICE.—No business doing.

SPICES.—Nutmegs and Mace, ordinary quality, have met with a good demand, but other articles under this head have been very dull.

TOBACCO.—For Java and Sumatra some demand has prevailed, and a few small parcels have been sold by private tender. About 12,000 bales Sumatra, 1874 crop, have arrived in the course of this year, of which 11,645 bales were sold. The stock is 10,544 bales Java, and 799 bales Sumatra.

COTTON has met with a limited demand, but the market has remained firm. Bengal has sold readily for export, but it is rather difficult to find buyers for American on the spot.

TIN has been very quiet, the price of Banca, however, being well maintained at f.50 to f.50½, and some parcels have found buyers at this quotation. Billiton is offered only in small lots, and the nominal quotation is f.49½.

RATTANS.—One hundred and eighty piculs ex County of Elgin found buyers at prices that did not transpire.

DRUGS.—Only small lots sold in the second hands.

ARRACK.—One hundred casks Batavia, ex County of Sutherland, were sold at prices that did not transpire.

THE RISING IN PERAK.

(THE TIMES.)

The despatches received by the Colonial-office from Sir William Jervois and by ourselves from Penang report further successes of our troops against the Malays of Perak. The advance up the Perak river had proceeded without a single check, and the little army under General Colborne's orders has made its way to Blanja, where we heard some days ago that the Maharajah Lela was awaiting events. This chief seems to be the moving spirit of the resistance to the British

Digitized by Google

power, and apparently accompanies, or carries about with him, Ismail, the Pretender to the Perak Throne, whose claims Sir Andrew Clarke rejected in favour of those of Abdullah. The troops and blue-jackets, according to Sir William Jervois's despatch of Saturday, reached Blanja on the 13th inst. without opposition, the Malays everywhere hoisting a white flag to intimate that they abandoned resistance. But the British approach had driven Ismail and his adherents into the jungle, to his stronghold at Kinta, where the troops have pursued them. The results of this advance were not definitely known at Penang when the news was telegraphed by our correspondent, but probably there were some desultory attempts to check it, for we are told that "when three miles from Blanja Dr. Randall was shot through the thigh." Such resistance as was made would, however, appear not to have been as yet very sustained; for the despatch to the Colonial-office must be read as intimating that the Maharajah Lela had by that time, with Ismail, quitted Kinta also. It will be seen from the very interesting letters of our special correspondent which we publish that during the earlier operations against the stockades lower down the Perak river the troops received the most valuable assistance from the gunboats improvised for their service by the officers of the vessels sent to secure the waterway. No doubt the same aid was available all the way up from Passir Sala to Blanja, but now, when the enemy whom our men are pursuing has plunged into the jungle and turned aside from the course of the river, the help of a little navy must be dispensed with. It is, therefore, possible, notwithstanding the triumphant advance to within seven miles of Kinta, that the further progress of the expeditions may be exposed to greater difficulties than any which have appeared since the early successes described by our correspondent.

It is therefore very necessary that the inland operations should be conducted with all the prudence and thoroughness of preparation for which our correspondent gives credit to the officers concerned in the capture of the stockades between the Residency and Passir Sala. Since those positions were forced there has been no organised resistance to the progress of our troops in Perak, for the account of the sharp fighting on the 7th inst. which was telegraphed some days ago refers to an outbreak, not in the neighbourhood of the Perak Residency, but of our Residency in the insignificant State of Sungie Ujong, on the inland border of the Province of Malacca. This is certainly an outbreak in a new part of the Peninsula, and so far contradicts the expectation that the dissatisfaction of the Malays had been localised. But it had been so promptly checked by the action of the 7th, and its development had, we may hope, been so completely nipped in the bud by the Ghoorka reinforcements despatched to garrison Sungie Ujong and Malacca, that we shall possibly hear no more of disturbance in this quarter. The attack on the stockade without artillery was, perhaps, an act of rashness, for the disaster of Captain Innes's storming party might easily have been repeated. But, after all, a bold course was for many reasons advisable, and the experience of the troops on the Perak River, whose exploits against the stockades are described by our correspondent, proves that the Malays are as quickly disheartened by defeat as they are encouraged by unexpected victories. The improbability of any immediate connection between this outbreak near Malacca and that in Perak is increased by the fact that the territory of Salangore, which lies between them, was in profound quiet at the date of the last despatches. Nevertheless, the fact may be taken to prove that Malay discontent is not confined to Perak, which, indeed, is likely enough for several reasons. We have interfered in the affairs of other States besides Perak, and especially in those of Sungie Ujong, where the trade in tin is very considerable, and has been interrupted, to the great discontent of Malacca traders, by the lawless practises of semi-independent chiefs on the Lingie River. Sir Andrew Clarke interposed to secure the free navigation of the Lingie, and pulled down some stockades there in May, 1874. It may be that some of the chiefs whose interests were then affected have now thought that the occasion was come for recovering their piratical power when the British forces were drawn away to Perak. But it can hardly be that the danger in this quarter is very serious, since at the time of Sir Andrew Clarke's operations the stockades were deserted. The Governor, however, took care to have a "sufficient force" with him, and, as he told the Legislative Council at Singapore afterwards, "it is very important that this should always be the case.

The Malays, in fact, like other semi-barbarous races, are reduced to submission not so much by actual fighting as by the display of civilised strength so imposing that the rude imagination is weighed down and cowed. This is very strikingly illustrated in our correspondent's descriptions of the operations against the stockades near Bandar Bahru and Passir Sala. The Malays evidently accepted the repulse of Captain Innes's badly disciplined and imperfectly armed force as typical of our powers in warfare, and, naturally enough, they were not afraid to meet us. But as soon as they experienced the pressure of a skilfully devised attack by troops kept well in hand they fell back rapidly into despondency. The first stockade was defended more obstinately than the rest, and soon the defence ceased altogether, and at every place that the troops approached the white flag was hoisted. The rockets and shells, of which the Malays had never seen anything before, not only inspired terror by the destruction they dealt, but by the strange and seemingly magical manner in which they dealt it. These admirable weapons for jungle warfare with savage races must have almost as paralysing an effect on those who are only acquainted with smoothbores and muzzle-loaders and ordinary round shot guns as the arquebuses of the Spanish invaders had upon the Mexicans. It is not likely that the Malays will have the obstinate courage to familiarise themselves with these novel dangers of war, for they continue to decline a deliberate encounter even behind the ramparts of a stockade. The careful blockade of the Perak River and its creeks by the Queen's ships that were fortunately at hand will also embarrass and terrify them, for they are not a provident race, and they can hardly hope to obtain large stores of ammunition in the interior. On the side of Larut they have nothing to hope. The large Chinese population employed in the tin mines, outnumbering the Malays, according to our correspondent, by twenty to one, are bitterly hostile to their nominal masters, and most willing to co-operate, if necessary, with the British in subduing the lawlessless of the Malayan Chiefs. It i fortunate that Larut is thus disposed, for a diversion in that quarter might prove far more formidable than anything which could be attempted in the more southern principalities.

It cannot be disputed that the Malays of Perak, and probably of every State where the Straits Government has interfered to establish order, are bitterly hostile to the British intruders. Even when the capture of the stockades below Passir Sala had frightened the enemy into retreat or submission, our correspondent speaks of the "scowling faces" with which the advance of the Expedition was watched by the natives who appeared on the banks of the river. The restraints of law are intolerable to people like the Malays, who resemble the Highlanders of Scotland a hundred and fifty years ago in their passion for fighting and for plunder. A Government that insists on the preservation of the public peace and on respect for the rights of property must be to such a people an intolerable yoke, which assuredly they will never voluntarily accept, and which must be imposed upon them, if at all, by superior force. It is, therefore, not at all surprising that the Malays of Perak resented the reforms which the British Resident attempted to introduce, and were still more suspicious of the turn affairs might take if they permitted the transfer of the supreme judicial and administrative power to the Queen's Commissioners. These considerations are quite sufficient to account for the tearing down of the proclamations at Passir Sala and the attack on Mr. Birch. But we do not as yet know all the facts, and other causes may have contributed to bring about an explosion. Our correspondent recounts some proceedings of a civil officer during the operations of last month which seem to point to an absence of tact, judgment, and circumspection in some at least among the civil officers employed by the Straits Government in their dealing with the natives. The orders given to burn the villages of the Malays who had not offered the slightest resistance to the troops, who had hung out the white flag, and against whom there was no evidence of any complicity in the offences of the Maharajah Lela and the Sultan Ismail, were clearly objectionable on every ground of principle and policy. They involved the assumption that the whole of the native population was hostile, which is not true, and which it was politically a mistake to suggest, and they tended to provoke vindictive feelings which might have seriously hampered our military schemes. But the ill-treatment of a poor Chinese shopkeeper on the absurd ground that he did not try to prevent or avenge Mr. Birch's death—as to which he gave valuable information—in the presence of a fierce crowd of Malays was a more grotesque piece of injustice. How can we hope to make our rule respected, not to say beloved, while such errors are possible? Yet even more indispensable han sound judgment and tact in dealing with wild natures are other moral qualities, which, it may be, are not always secured. Whatever may be the nature or duration of our rule over the Malays, we must take precautions, by careful selection of officers and rigid supervision, to set up examples of integrity and purity of life to the subject race. If our representative men fall short in this particular, they will assuredly endanger the power of England, as well as imperil her good fame. Sir William Jervois, in proposing to his Council a few weeks ago to place in the hands of British officers the whole Government of Perak, assumed that competent and trustworthy men for a peculiarly delicate work could easily be found, nor do we doubt the fact. Only it is well to bear in mind that the greater the difficulty of the task on which we have chosen to enter the more needful is it to exercise discretion in the choice of those who are to carry it out on our behalf.

(THE HOUR.)

We are sorry that an attempt is being made to censure the line of action followed by Sir William Jervois and Sir Andrew Clarke. It is alleged that Sir W. Jervois has exceeded his instructions, and that it was an error in the first instance to interfere in the feud between Sultan Abdoola and Rajah Ismail. We are not of this opinion. It is true that peremptory orders have been given not to annex Perak, and it is true also that the establishment in that region of a British Protectorate some twelve months ago was the ostensible cause of the recent outrage. But it should be remembered that Colonial Governors ought to be allowed a wide discretion. As on the field of battle, so in the field of civil administration, it is sometimes a duty to transgress or overstep the orders of a superior. Sir W. Jervois and his immediate subordinates were probably the best judges of the way to keep order in Perak; and if the formation of a Protectorate was popularly regarded as a prelude to complete absorption into the British Empire, neither he nor Sir A. Clarke are responsible for this erroneous inference. We take it that the question of the annexation of Perak is simply postponed, and not definitely answered in the negative. Its rich mines can only be advantageously worked by European speculators, who will never be attracted thither so long as life and property are insecure, and society in a semi-barbarous condition. Moreover, the industrial importance of the Chinese coolie influx into Perak can hardly be over-estimated. As on the western seaboard of North America, so in the Malay district, the Chinese make excellent workmen, but the Malays hate them, half, we suppose, from race antipathies, and half from trades' unionism, as John Chinaman undersells the market. It is very easy to turn round on Colonial Governors and saddle them with accountability for every *émeute* or insurrection. Sir W. Jervois acted according to the best of judgment, and is known as a firm and able administrator. The time may not be ripe for the incorporation of Perak into the Empire, but our ultimate Imperial destiny in that region cannot be mistaken. By a curious coincidence an assertion was made not long ago in the columns of a journal well known for the rashness and truculence of its statements, that Mr. Wade, our Minister at Peking, had fallen into disgrace. A response to this ill-natured and ungenerous imputation was shortly afterwards given. The Queen made Mr. Wade a Knight Commander of the Bath. It is very easy to attack political and diplomatic agents. But justice requires in the case of the British officials at the Straits Settlement that they should be defended against hasty sarcasms and crude theories as to the wisdom of their discretionary acts, the moment that a black cloud has flitted across the horizon. It would be an error to imagine that every

Digitized by Google

ting is tranquil in the Malay Peninsula. The natives have been alarmed by the guns and rockets, but though there is no real ground for apprehension, it must not be supposed that the "Pacification of Perak," desirable as would be the operation, is absolutely at an end.

(PALL MALL GAZETTE.)

The operations of the expedition sent to punish Mr. Birch's murderers, commencing though it did disastrously with the lamented death of Captain Innes, R.E., will, we cannot doubt, prove successful. With the details of the expedition it is not our present intention to deal. There is a political question, however, which deserves consideration. What is to be the result of the policy which has been forced upon us by the incapacity of the Malays of Perak to manage their own affairs? We can put up no longer with turbulence and disorder in a petty native State intimately connected with our own settlements by its propinquity and its commerce. It is hopeless to think of expecting good government under any Malay ruler, and the political system of Perak with its infinity of petty chiefdoms is one not deserving of a second attempt to prop it. Under British Government the country will in a few years become like our other possessions on the Peninsula —peaceful, wealthy, and populous. The undeveloped wealth of the mines and forests of Perak will be opened to the English capitalist. Annexation to the colony of the Straits Settlements seems to be the only mode of preventing a recurrence of the evils from which Perak has long been suffering. We should have no reason for regret in the long run, probably, if this were only a stepping-stone to a policy which would make another Ceylon of the Malay Peninsula; though it is obviously possible enough, even in these late days, to have more responsibility of this sort forced upon us than is altogether agreeable.

THE OPERATIONS AT PERAK.

("THE TIMES" CORRESPONDENT.)

BANDA BARU, PERAK, NOV. 17.

The *Pya Pekhet* steamed out of Berabet at 4 A.M. on Sunday, the 14th inst. I had come down from Banda Baru the night before to give her my English letters to take to Singapore. While on board we heard the sharp ping of bullets striking the water, and the next morning I hailed the sentry of the gunboat *Thistle* to inquire the cause. He answered that some boats had been trying to run the blockade, and had been fired upon. He also said that Captain John Bruce, with Lieutenants Forsyth and Ross, Surgeon Lloyd, thirty blue-jackets, and eight marines of the *Fly*, with the same number of men under Lieutenant Lowe from the *Thistle*, had started about an hour before for the Residency. We overtook them at Kota Lomat village. Here the stream is so shallow that launches drawing more than 18in. are unable to proceed further, and the boats were cast off. The sailors poled them the remainder of the journey. These boats are made from the hollow trunks of trees, with the sides pressed out until they nearly become flat bottomed. No one appeared in the villages on the banks, but here and there a scowling face peeped at us from the jungle, and quickly disappeared. A few resolute men, armed with rifles, could have easily picked us all off, but since Lieutenant Abbott had stockaded the Residency no interruption to communication with the mouth of the river had been attempted. On our arrival at 10 A.M. we heard that Major Dunlop, the official Resident, in conjunction with Commander Stirling, of the *Thistle*, and Captain Whitla, Her Majesty's 10th Regiment, had determined to make a reconnaissance in force on the morrow. Every available man had been brought up. Spies had reported that Rajah Lela's house was strongly stockaded at Passir Sala; that other stockades had been built, and the old ones strengthened, and that they had cannon and 1,000 men in the first stockade, where Innes's party had been repulsed; but that their provisions were running short. and they were expecting more arms and ammunition. It was a happy thought that suggested the blockade of the rivers by the boats of the *Fly* and *Thistle*. This duty had been well performed under Commander Bruce, and arms and several barrels of gunpowder had been captured on their way to the enemy. These captures had an important result in diminishing the amount of resistance afterwards offered. The Residency at Banda Baru is merely a mat house, with four rooms and verandahs. In these were squeezed all the officers as they arrived, while the men were sent into temporary sheds and tents close by.

All Sunday the sailors were engaged making platforms on the boats for the guns. As each one was finished it was floated into the stream to be tried. One of the men requested Lieutenant Abbott's permission to take a large dyspeptic-looking monkey, who had taken up his position under the Residency, and seemed to spend all his time in attempting to sit upon the upturned half of a cocoanut shell. The man alleged, as a reason for the request, that the poor animal might feel melancholy if left behind. Permission was immediately granted. As I passed the animal I saw him viewing with a critical air the movements of a sailor opening a cartridge-box. He appeared as if he knew the favourable result of the negotiations, and was, accordingly, interesting himself in the arrangements for next day. By sundown the guns were all ready and in the boats. Such was the care and foresight with which the arrangements were planned that even the tubes for the guns were tried, to see that they were sound. In one seven-pounder, under Lieutenant Abbott's special care, six tubes were tried, and each missed fire. It transpired that they were portions of a number sent up by the Colonial Government, who had taken them over from the Indian Government, with some "antediluvian mortars and other fossil remains," as a bystander remarked. They were condemned, and Admiralty tubes substituted.

At 9 P.M. the enemy's evening gun sounded so much heavier than usual that a general impression arose that their works had been pushed closer, but this proved not to be the case. The Havildar of the Sikhs, who were reported to have so ignominiously fled, came to Major Dunlop, and begged that he might be allowed to pick out a few men and join the expedition. It had first been resolved that no Sikh should be allowed to go, but Major Dunlop very wisely granted his prayer. They went with the advanced guards, and were in the first stockade with the leading troops. He told me with tears in his eyes that the whole of his people had eaten dirt, and they were charged with being as women. That, although he himself with a few others had been drilled as soldiers, the majority were mere boys, many not Sikhs at all, and some did not know how to put a cartridge into a Snider. Then when Innes was killed there was no one with the force that could speak a word of their language, and when he spoke to a soldier the only answer he received was, "D—d fool." He averred that he and some of his men were close up to the stockade, near the Hon. H. Plunkett. He also said that when Innes was killed his Sikh guard were unprepared, had not their muskets loaded, and five of them were then killed and wounded before they retreated. I have been unable to find any public mention of the latter fact, but, as far as I am able to ascertain from Mr. Plunkett and others, the main points of the story are true. It is singular that, while the Sikhs were branded to the world as perfectly useless, a full account of their killed and wounded does not appear to have been equally promulgated for public information.

On Monday, November 15, at three A.M., the small force quietly filed into the boats. The sailors manned the gun-boats, and poled themselves up the stream. The soldiers' boats were poled by Chinese coolies pressed into the service. It was daybreak before the whole of the force had embarked. The river is about 300 yards wide. On the opposite bank rose cocoanut, palm, and other trees, while lower down to the water's edge the elephant grass waved its tall feathery tops in the morning breeze. The rising sun shot its rays down the river as the boats lay in line in the middle—first upon the blue-jackets and their sombre guns; then on the marines, with their burnished arms sparkling; then upon the picturesque red coats and white helmets of the 10th, as they sat side by side holding their muskets; and lastly upon a motley group of Chinese, Sikhs, and hospital orderlies. I had been able to obtain a good rowing boat, and, accompanied by Reuter's agent, followed the troops. The stream was shallow, and boats were continually grounding. A disposition was also shown by many of the Chinese coolies to disappear the nearer they approached the scene of action. At last, at nine A.M., we arrived at the landing place, called Passu Panga. The land force then disembarked, and was told off in the following order:—

Mr. Swettenham, Assistant Governor, with some Malay allies and their chief, Rajah Mahmoud, as scouts; the advanced guard, under the Hon. H. Plunkett, Superintendent of Police, Penang, consisting of fourteen marines and a few Sikhs. The main body and rear guard comprised two companies of the 10th, under Lieutenants H. Meyrick and F. Louth, and was accompanied by twenty artillerymen and one howitzer, under Lieutenant R. E. Monckton, R.A. The whole land force was commanded by Captain Whitla, and barely mustered 190 men.

Major Dunlop accompanied the column as official Resident; Surgeons Orton and Randall also marched with the troops. There were left in the boats about seventy sailors, with four guns, one mortar, and two rocket tubes. Commander John Bruce, H.M.S. *Fly*, commanded the gun division, but the whole river force was under Commander Sterling, of H.M.S. *Thistle*.

Lieutenants Ross and Lowe, Abbott and Forsyth commanded gun and rocked detachments, and Paymaster Harrison accompanied Commander Stirling in his little steam gig.

It had been arranged that the guns should first clear the jungle for the troops on the right bank of the river, and that they should then advance skirmishing parallel to it. I followed the gunboats, keeping them in sight as well as the military so far as the jungle would permit. The action opened with a rocket, which fell into the jungle. Now and then I could see the skirmishers beating through the long grass and trees. A Sikh or Marine would appear on the bank, crawl along, get behind a tree, discharge his musket, and then disappear. Behind them the white helmets of the 10th glistened through the foliage, a conspicuous mark for the enemy. This dress is the worst for jungle work possible. The Sikhs in their Kaki suits were hardly recognisable from the foliage. I believe, however, that the men had nothing else to wear, as they were sent so hurriedly to Perak. When within about a mile from the first stockade a large round shot skimmed the surface of the water, followed by discharges of grape and canister from the enemy. At the same time the rattle of musketry was heard in the jungle, and for half an hour a heavy fire was sustained. The troops, however, skirminishing, kept up with the gunboats. Two 24lb. rockets were kept steadily at work, and we could hear the yells of the Malays as the rockets came whizzing and bounding in among them. On shore Lieut. Monck-

Digitized by Google

ton's howitzer could be heard, also bombarding the stockade. I landed to see the main body of troops advancing, and was conversing with Lieutenant Meyrick, when a round shot passed close to us, cutting down a tree and burying itself in the earth beyond. We had arrived at the spot where Captain Innes was shot, and I found some of the men crouching behind trees, preparing for an assault. Monckton's gun was blazing away into what appeared to be high elephant grass and plaintains, with here and there jungle bushes and small trees; but it was too dense to see any stockade. A man of the F Company of the 10th, who was near me, complained that his Martini rifle had become fearfully hot, but that the regiment liked the weapon much better than the Snider. As we were waiting we heard the peculiar whizz of the rockets and a cheer from the sailors, and then a most despairing cry from the stockade, followed by a cessation of firing. Then the advance was sounded, and the men rushed forward, followed leisurely by myself. Soon I heard their cheers and came upon the stockade evacuated. It was a ditch twelve feet deep and about the same width, with pointed pieces of bamboo stuck in the bottom so closely as to prevent any rush over them. The earth had been piled up, and stakes had been driven on the top, making it a very ugly place to storm. Unfortunately for the Malays, they had not finished fortifying the river bank, and as the stockade was at right angles to the river, a rocket had been sent with so true an aim that it enfiladed the mark, and killed and wounded twelve men. Monckton's shell also burst at the same time at the base of the stakes, smashing them, about 100ft. from the river. This probably caused the Malays to evacuate the stockade. A Chinaman who was in the stockade witnessed the occurrence and afterwards reported it. The Malays, however, managed to hide their killed in the jungle before we entered, and the only traces that I could see of the fight were the blood-bespattered leaves and ground, the smashed palisades, and the general destruction that the rockets and shells had made. All the huts were burnt, and the troops being re-formed, they proceeded through the jungle, the Naval Brigade clearing the way, as before described. Occasional shots were heard in front, but the two following stockades were evacuated after a bombardment. In the first stockade I noticed the Malays' dinner prepared, but the cooking utensils had been smashed by a shell, and their rice was lying about, showing that they must have been surprised.

Passir Sala, the fourth stockade, and the place where Birch was murdered, is about one mile and a half further up on the same side of the river. Rajah Lela is the head of the village, and it is alleged that he ordered the murder. This stockade mounted four cannon, and as soon as the boats came into view they began to play upon them and the jungle. The Malay practice, however, was bad. One of the guns burst, and the remainder were silenced by our effective fire. The troops were soon inside, and Rajah Lela's house was sacked and burnt, as was every house between it and the first stockade. We had started at sunrise, and it was now about 5 P.M., so the men were halted, and rations served out. While they were resting I visited the mat bathing-house in which Mr. Birch was murdered. It was built on a raft of four big logs of wood, as described in my former letter. A Sikh who was present at the murder showed how the "Sahib" took off his revolver and handed it to his orderly, who was standing on one of the logs just outside. The murderers immediately rushed down. The orderly fired two shots, and fell backwards into the water. The news had got abroad that this was the house, and it was soon cut adrift from the bank, fired, and sent floating down the river. The flames flared high as the tide quickened the passage of the raft.

Within Rajah Lela's village a Chinaman kept his shop. He had witnessed the murder of Birch, and, under the excuse of going to buy rice for Rajah Lela, he had escaped from the place and had came to the Residency. He had been examined as a witness, and apparently told the whole story truthfully. He, however, was confined more as a criminal than as a witness. When the torches were applied to the thatches of the several dwellings a pause was made at this Chinaman's shop, but a young civil officer ordered it to be burnt, alleging as a reason that the Chinaman had stood by and seen Birch's murder without trying to prevent it. It seemed hard for the Chinaman, considering that he was a resident in the village and entirely in Rajah Lela's power, that he should have his house burnt down, when his own life would have been the penalty if he had attempted a rescue, which must have been unsuccessful. The flames, however, soon devoured the little shop, with all its tables and accessories. The Chinamen have acted well towards the British all through the disturbance, but such injudicious acts as the above will tend to estrange them from us, and if witnesses are treated thus there will be the greatest difficulty in getting evidence in important cases.

There had been no trouble with the left bank of the river; no troops were landed on that side, neither were the houses or property hitherto touched. I had noticed a man come down to the river bank and affix a white flag to a pole, at a village belonging to Datu Saga. He had been expected with ex-Sultan "Ismail" to join Rajah Lela against the British. He probably would have done so if Rajah Lela had beaten the troops off a second time. Whatever his guilt, it would have occurred to many people that an undefended village with a white flag flying would be spared at any rate, unless the owner of it was actually found in arms. But a party went across and fired it. In one house there was a woman and child, but she was turned out and the torch applied. Two men thereupon appeared, and one threw a spear, which wounded a policeman in the stomach. The spearman was immediately shot dead. Until the torch had been applied no resistance had been offered. It is said that Datu Saga was present at Birch's murder, and that there was evidence to implicate him. He probably deserved punishment, but it grates against one's ideas of justice when a man's village is burnt down in his absence because he is alleged to have been present at a murder. He might possibly have prevented it, but there is no proof that he was in actual arms against us, and he had no opportunity given him to make his defence. His punishment might easily have been left for the civil authorities to deal with hereafter. No blame can be cast on the troops for this. They naturally would be guided by the civil power, and they were led on to do these two last acts by an officer supposed to know the district. The hatred with which the Malays view us will be intensified when acts such as these are noised abroad.

It was dark as the troops re-embarked; but the tide was in their favour, and the boats easily floated down the river. The banks were lit up by the glare from the burning houses, which sent up their crackling sparks high into the night air and gave a solemn and grand effect to our departure. The men arrived at the Residency about 8 P.M., having worked well and taken six guns and four stockades. With the exception of a few scratches from the pointed bamboos, there was but one man seriously wounded. The loss to the enemy must have been great. There is no doubt but that this well-timed and well-planned expedition crushed in the bud what promised to become a serious war. Those chiefs who have been wavering will now probably submit, unless driven into desperation by any injudicious acts on the part of the local authorities. The ex-Sultan "Ismail," to whom Rajah Lela sent Birch's boat, returned it when he heard of our preparations. This looks as if he did not wish to become our open enemy. The only fear is, that when our men go into the jungle again they may come unprepared upon a stockade. As long as the Malays now in arms have a stockade behind them they will gradually retreat until they come to the last, when a warm action may be expected.

Fortune generally smiles upon well-planned and well-executed undertakings, and occurrences seem to dovetail in to assist success. I have mentioned the round shots I saw bounding on the water. At the first stockade I inspected the gun which belched them forth. It was well pointed to rake the river, but was lashed on a rough frame so clumsily that it could not be easily moved. The marksman, secure of his aim, must have waited for the boats' appearance, but fired a second to soon. The shot fell close before the boats. When the next shot was fired it fell behind them, as they had progressed in the meantime. Just the same with the grape, they only once got a fair range, when the bullets flew under the awning of Commander Stirling's little pinnace and pitted the water in fountains around it. I had seen Surgeon Lloyd aground in his boat, and had offered him a lift. Immediately he saw the grape he ordered my boatmen to pull to Stirling's boat, as he feared some one was hit. He told me it was his duty to be in the first line of fire to attend to the wounded. We rowed up to the Commander's boat, and I was very glad to leave him there.

To one like myself, who did not feel bound to be exposed, the reason why all our officers were killed or wounded in the first skirmish was clearly explained. I noticed Bruce in the first line aiming with his rifle, disdaining to kneel down in the boat. I heard Whitla calling to Meyrick not to rush on so far ahead of his men, and I saw the little steam-launch, with Stirling and Harrison in it, plying about while the two guns from the stockade were playing at them. The enemy did not make such a stand as was suspected they would. But I think they were astonished and cowed by the magnificent artillery and rocket practice. Probably they had never seen or heard of rockets, and the infernal din they made as they fizzed and bounded here, there, and everywhere in the stockade and jungle must have disheartened them. Often was heard a wail of pain, not of one person only, but of many people. The shouts of defiance rang in a different key on the ear and could easily be distinguished from their yells of pain. Almost every rocket did its duty, and the cheers of the sailors waxed louder and louder as the missiles dropped on, in, and around the stockades. For clearing jungle of the enemy they appeared to me to be the best weapon discovered. Stockades hid in jungle are good as ambuscades, but the small number of wounded may be attributed to the fact that the troops knew where the stockades were and had deep cover with trees almost to the ditch, and the enemy evacuated before an assault was made. The troops behaved splendidly, but had it not been for the way in which the affair was planned and executed I might have had to append a long list of casualties to this intelligence. I believe the plan was jointly concocted and carried out by Major Dunlop, Commander Stirling, and Captain Whitla. Lieutenant Booth, who had been badly wounded in the first engagement, was left with fifty-five Sikhs and Police to guard the Residency.

LONDON: MONDAY, DEC. 27, 1875.

THE MALAY OUTBREAK.

The Times correspondent describes Captain SPEEDY at Laroot, and Mr. BIRCH at Perak, as having commenced reforms "with the inherent energy of JOHN "BULL, stopping piracies, cutting roads, making gaols, "and virtually taking the whole power out of the hands "of the Malay chiefs." These changes, he thinks, "might be acceptable to the poorer classes, but not to the higher," who suddenly found their wings clipped, their claws pared, and themselves constrained to lead dull quiet lives, very different from the excitement which had become to them a second nature. This state of things favoured the intrigues of the discontented and disappointed party who supported ex-Sultan ISMAIL, and matters were already ripe for a disturbance when Mr. BIRCH published a proclamation of the greatest importance in a most incautious way. Those who have resided in the Straits, those who know the Malay character and understand how far it differs from or resembles that of other Asiatic races, will readily agree with us that *The Times* correspondent is neither wholly right nor yet wholly wrong. Sultan ISMAIL and some few other nobles were no doubt sore; but for this our Government can hardly be blamed. Wherever there is a struggle there must needs be two parties to it; and in taking upon ourselves to decide between the rival claimants and restore order, we know that the hostility and resistance of the unsuccessful side were factors which could not be left out of the account. The thing to be really regretted is that the Straits Government, being aware of all this, sent its representatives to look after an unsettled province without a gunboat at their backs, or a guard sufficient to keep the peace until all excitement should have passed away. The greatest error of all, however, lay in that ill-timed overzealous display by Messrs. BIRCH and SPEEDY of "the inherent energy of JOHN BULL." The disaffected chiefs could have done but little harm if the people themselves had not been tormented with a course of busy and in their eyes needless innovations. "Whirr, whirr, everything by wheels; whizz, whizz, everything by steam." This is precisely the notion Asiatics have of our rule and manner of life; and they hate it; they are contented to be as they have always been, basking in the sunshine, loitering, smoking, doing as little work as possible, paying few taxes and taking their ease. To the expulsion of pirates they will readily assent, for pirates are a social nuisance, a disturbing element; but why these new roads all in such a hurry, entailing more tribute, and a good deal of forced labour? Why more gaols, and those other and hitherto-unheard-of worries implied in the general term "reforms?" This is the Malay spirit; we do not praise it, but it is a great fact, and when the pirates had been got rid of, and life and property had been made secure, every other step should have been taken slowly, tentatively, cautiously; it should have been remembered that Mohammedan Malays cannot change their nature as a regiment changes front at the word of command; and when an alien to their race and creed, taking the control from the native rulers, attempts to crowd more reforms into a twelvemonth than we have been able to introduce into Baroda, for example, in seventy years, he is doing the very thing to precipitate a catastrophe. Let us, then, be warned by what has happened; and should Perak and Larut pass wholly into our hands, as we hope will be the case, let the officials who undertake to administer those provinces remember that the natives are eager enough for trade if they are not stroked the wrong way, and that mining operations and commerce will be surely and steadily developed if no artificial obstructions are created by hasty attempts to force a multitude of uncomprehended changes down the throats of unwilling natives, as mothers do medicine with a long spoon. To make the people sulky and discontented is to lay bamboo-spikes along the somewhat jungly path of trade in Perak and Larut, which will block the road against enterprise and capital for a generation.

Equally reprehensible, equally unjust, and no less ruinous to all the best interests of commerce is the tendency to confound the innocent with the guilty, to visit with indiscriminating punishment every native who chances to cross our path during our angry moods. This was what happened during the Indian Mutiny; soldiers hurried from England to relieve Lucknow saw a Cawnpore murderer in each mild Hindoo; and we all know the famous incident—a day's march beyond Calcutta—when the Colonel tied up two suspicious characters whom he noticed lurking near his tent, and was told in the evening when he wanted his mattress, that "Master finish gib order dis morning hang up bed-coolies." So now again we hear from the Straits melancholy reports which probably have been exaggerated, and *may* be altogether untrue. Let Lord CARNARVON look to it at once, and wire out the most stringent orders, so that no injustice may be unguardedly perpetrated which we may afterwards have good reason to regret. The statements, we say, possibly will turn out unfounded, but they are too detailed to warrant us in wholly setting them aside. What, for example, means this account of the sack of Rajah LELA'S Malay village, where, by the express order of a young civil officer, a Chinaman's house was deliberately burnt down? "The flames soon devoured the little shop with all its tables and accessories," and all because this Chinaman, who himself brought us news of the assassination, "stood by and saw BIRCH fall without trying to prevent the murder." His house, in fact, was burnt *pour encourager les autres*. The officer who gave that order knew nothing of Chinese character; or, if *he* was right, then not a Chinaman on the globe ought to have a house left standing. We seem also to have fired an undefended campong, where the owner had already hoisted the white flag, and when he appeared to make fight in defence of his wife and child, whom we had turned out of the doomed homestead, he was of course shot down. Other similar incidents have been spoken of. The *Times* correspondent says of them, that when they get noised abroad they will intensify the hatred with which Malays regard us; and we may add what is equally important, they will excite the more persistent animosity of the Chinese. We protest, and protest stoutly, in the interests of commerce as well as of justice, against any violence or bloodshed not of proved necessity; and we press this the more urgently because it is quite clear that British soldiers are always well in hand, their discipline and order in times of war are exemplary, and there is therefore no difficulty in preventing excess. The foe is a piteously weak one, there are little or no riches to tempt a spoiler, and no disorganisation can be pleaded as an excuse for any unmerited outrage by our troops.

TRADE AT THE PORTS AND IN THE INTERIOR.

IN the course of his report upon the trade of Kiukiang for the year 1874 Mr. KOPSCH, the Commissioner of Customs at that port, makes some very pertinent remarks bearing upon the question of trade with the interior of China. With an amount of thoughtfulness for which we are ready to give him every credit, he recognises the fact, too often overlooked, that the history of trade at the River ports forms a practical indication of what would be the results of extending trade to the interior in other directions; but while carefully reviewing the circumstances connected with the trade of his port upon the above assumption, he draws from them an inference which is to our mind precisely the opposite of that to which his hypothesis and facts directly lead. Mr. KOPSCH cites

Digitized by Google

Kiukiang as an example of the results which follow the opening of inland ports and as demonstrating the fallacy of the theory so long entertained that ports of shipment near the producing districts would resuscitate trade in foreign hands, lessen the cost of tea, and establish a market for the sale of manufactures. Neither of the two latter results, he says, has been attained. Tea has become dearer the nearer we got to the districts, and the anticipation of a ready sale for imports kept on the spot has not been realised to the extent that was anticipated. This is unfortunately only too true; and the fact has long been recognised by those who have paid attention to this subject as proving that those who have been inclined to consider that a great improvement in trade must necessarily result from the mere opening of marts further in the interior, have overlooked an essential element in such opening, namely, that it be made in such a manner as will reduce and regulate the internal dues which press so heavily upon both the import trade and the export trade. It was assumed by those who discussed this subject some years back — that is before the nature of Chinese internal taxation was as well understood as at present—that the opening of new ports would at once and necessarily put an end to excessive levies; but experience proves that this is not the case, and that a new port may be opened without any material improvement being made in this direction. On the other hand, it has been demonstrated equally by experience that the opening of new ports does tend—often, no doubt, slowly and after much opposition, but nevertheless in a degree, which in the course of years becomes plainly and unmistakably marked —to diminish these artificial restrictions, and that in proportion as this result has been brought about trade has improved. This, in point of fact, is the lesson to be actually deduced from Mr. KOPSCH'S statements, when taken as a whole, with respect to the trade at Kiukiang. In one part of his report he states an enigma, but in other parts he gives us the solution of it. With respect to the increased price of tea, he shows that no advantage has been obtained by the transit passes in consequence of the imposition of a new tax. Such being the case, the increase in price on approaching the producing districts is easily understood as a necessary result of increased competition. "In consequence," he says, "of the imposition of the "'growers' tax,' it is cheaper to pay lekin on exports than "to obtain a transit pass to protect them from taxation *en* "*route*, the half tariff duty and growers' tax amounting "to more than the lekin." As respects the import trade, Mr. KOPSCH is equally clear. He states, "Each year's "statistics afford further proof that the system of for- "warding goods inland on payment of the half im- "port duty, as prescribed by the Treaty of Tientsin, "is being availed of more extensively year by year, "and that it is of inestimable advantage to traders, "where local taxation is so heavy and variable," and he concludes with the following noticeable admission:— —"Had the system been brought into operation on the "opening of the port, it would have acted as a powerful "stimulant towards the development of the import trade." Here, then, we see that the facts at Kiukiang are precisely in accordance with the conclusions arrived at by those best able to judge of the bearing of the opening of new ports upon the furtherance of foreign trade; that is, that the existence of the new depot itself will be of little advantage, but that it will be a benefit so far as it tends to remove restrictions, and in a large number of instances this result may be quietly and legitimately brought about, as the native dealers become acquainted with the immunities as to internal taxation to which they are entitled in regard to foreign goods according to the Treaty, and find means of forcing the local officials to respect them. This result is more easily produced in connection with imports than exports; and as it happens that our chief interests in China lie in the direction of furthering trade in our manufactured goods, the working of the opening of new ports, as set forth by Mr. KOPSCH in his able report, so far from giving cause for disappointment, is, when all the circumstances are taken into consideration, in every respect encouraging.

IT is with some regret, and some surprise, that we learn the determination arrived at by the Royal Humane Society in regard to the services rendered by several Hong Kong residents in saving shipwrecked life during the severe typhoon of 1874. That no medal is to be given is certainly unfortunate. We will not now recapitulate the story of how Messrs. MCEWEN, BAIRD, PRIOR, and the TAUFER brothers were the means, at the imminent risk of their own lives, of saving the crews of the *Albay* and *Lenore*, nor with what satisfaction the Government and residents of the colony looked upon the case. The matter was fully represented to the Royal Humane Society, with the result—brought about, no doubt, by the necessary rigour of the society's rules—that the brothers TAUFER receive a medal of thanks, and the others nothing. Why a distinction has been made in the services of the gentlemen we cannot guess. No one will, we feel sure, decry the official recognition thus given to Messrs. TAUFER, but as the others shared the like perils and exhibited the like pluck, we are sorry that the services of all have not been found to be equal. Though late in the day, we trust that the local Government of Hong Kong will not overlook the services of the others; those on the spot will appreciate more fully the good work rendered.

THE difficulty which has long existed in comprehending matters connected with China, in consequence of the small number of persons who have been able to master the language, has of late years been greatly dispelled by the increasing number who have entered upon that valuable but certainly somewhat uninteresting study; and, as a consequence, sources of information hitherto closed are now open to all who desire to inform themselves with reference to what is going on in that part of the world. Among the means thus placed at our disposal, one of considerable importance is the translation of the decrees, &c., in the *Peking Gazette*—the official organ of the Chinese Government—which are regularly given in the columns of the *North China Herald*. To those at home who desire to form accurate views as to political affairs in China we commend the perusal of these documents. They are reprinted in pamphlet form at the end of each year, and thus supply a valuable record of the doings of the Chinese Government. We should like to see similar efforts made in other directions. Translations of important proclamations by provincial and local officials would be only subordinate in interest to those of decrees emanating from the capital, and would often give a useful insight into matters which are dealt with in a somewhat summary, not to say evasive, manner, by the "high authorities" who surround the Dragon Throne.

IT is announced that Mr. W. F. B. PAUL, who has for the last three years held the appointment of Civil Commandant at Accra, on the West Coast of Africa, is now under orders from Lord CARNARVON to proceed to Singapore for general service in the Straits Settlements, his acquaintance with the Malay race and language, obtained by service under the late Sir JAMES BROOKE, specially fitting him for the place.

A TELEGRAM from Mr. HART, the Inspector-General of Customs at Peking, has been received at the London Agency, stating that CHEN-LAN-PIN and YUNG-HENG have been appointed Ministers to Washington. It is difficult to see why two Ministers should be appointed to one place.

REPORTS ON TRADE AT THE TREATY PORTS OF CHINA FOR 1874.

The usual valuable reports upon trade, issued annually by the Inspector-General of Customs, have been published for 1874. Though somewhat late—of which, however, seeing the tardiness of our Government in publishing the Consular Returns we can hardly complain on this side—they contain a great deal of information of a permanently useful character, of which we note the salient points.

TIENTSIN.—Mr. James Twinen, Acting Commissioner at Tientsin, reports a slight improvement in opium, 5,331 piculs having arrived for local consumption, against 4,957 piculs in 1873. In regard to the native-grown opium, he says it is impossible to speak with much certainty, but speaking generally, he reports "very large crops" in Shêng-king and Kansuh; "large" in Szechuen and Yunnan; "fair" in Shangtung, Shansi, and Kan

Digitized by Google

suh, and "small" in Chili. Of cotton piece goods there was a larger importation than that of any year since the port opened, with the exception of 1871, when the extraordinarily large quantity of 1,279,955 piculs T-cloths was imported, against 694,515 in the year under review. Woollens show a falling off in almost every article. Summing up the trade of the year, Mr. Twinen says:—"Taking everything into consideration, it cannot be said that the trade of Tientsin has at all retrograded, and yet there is but little hope that it will greatly develop until the day arrives when openings shall be made for fresh enterprise."

CHEFOO.—Mr. E. B. Drew, Acting Commissioner, states that the trade of the year 1874 presents no remarkable contrasts or extraordinary features. The import of opium at this port has been very great, and consequently the revenue shows a high total. The amount of opium was 4,156 piculs, against 3,103 in 1873.

NEWCHWANG.—Mr. Man, Commissioner at Newchwang, reports that the year 1874 was a period of depression in the trade of his port, but there was good reason to conclude at the date when he wrote (March, 1875) that it would rapidly pass away. Opium showed a decline of 1,093.84 piculs as compared with the previous year; a fact which Mr. Man attributes to a great extent to the increase in cultivation of the native product. All over Shêng-king, though as yet at respectful distances from the large garrisons, the poppy may be seen, and every town in the province is amply supplied from its yield. Mixed in a certain proportion with the Indian, the use of the native drug is spreading among the gentry, while the resort to it pure gives the humblest peasant an opportunity of obtaining a longed-for and otherwise impossible luxury. Mr. Man adds that successful efforts have been made to improve the quality of the native drug, and to this in a great measure is to be attributed the increase in its consumption. Passing to manufactured goods, the Commissioner notes a decline in T-cloths in favour of drills, jeans and other more durable goods, and makes some very sensible remarks upon the suicidal policy of adulterating the cottons themselves, and also of false packing, which are fast detracting from the *prestige* of British manufactures.

HANKOW.—Mr. Jas. Mackey, Assistant in Charge, reports that the net value of the trade of Hankow shows a slight falling off as compared with the preceding three years; but against this there is an increase in the export of native produce of local origin. There has been an increase in grey shirtings, but other descriptions of cotton goods have declined. The import of cotton is considerably lower than the previous year, being only 182,704 piculs, against 350,000 piculs. This is accounted for partly by the want of rain having made the Shanghai crops short, while fine weather in Szechuen made a heavy crop there. In opium there is no noticeable variation as compared with 1873. Mr. Mackey gives a terse and almost comical account of the opening of the tea market in 1874. He says:—"The market opened on the 19th May, at an advance of Tls. 3 over last season's rates. This advance was considered due to speculative boldness on the part of the buyers, as gratifying to the astonished teamen as it was the reverse to the foreign operator, and the ball once set rolling, high rates were at first maintained and a fair business done." The export of tea direct to foreign countries was 192,473 piculs, against 133,618 piculs in 1873. Mr. Mackey, who in the opening of his report, disclaims any ambition of "seizing the opportunity which the subject affords for rhetorical display, in order to win his literary spurs," concludes as follows:—"If the present year falls within the category of a backward one, although only in a slight degree, it is but fulfilling its proper destiny and holding its natural place in that universal and onward, though slow march towards perfection in the far off immeasurable distance of time, the goal to which all things else are tending."

KIUKIANG.—Mr. Kopsch, Commissioner, reports an augmentation in receipts far exceeding that of previous years. This has been brought about by a variety of circumstances: the absence of floods along the Yangtsze, tranquillity in the province, a harvest of fully average yield, the gradual recultivation of rich Tea districts overrun by rebels, and an unusually fine spring for the growth and preparation of the leaf. The gross trade of the port amounted to Tls. 13,960,953, or Tls. 1,825,112 over 1873. The increase in imports is mainly in cotton goods and opium—the business in the former having increased six-fold in ten years. The quantity of opium imported has been 2,905 piculs, against 2,365 the previous year, and is the largest quantity yet imported; the shipment of black teas exceeded that of 1873 by 16,395 piculs; and that of green teas by 3,336 piculs. Mr. Kopsch considers it incomprehensible that merchants should have almost abandoned Kiukiang, after all the capital laid out, and all that has been written as to the desirability of gaining access to the producing districts. He adds that it is admitted now that the trade of this port has been greatly neglected, and that two firms will be re-established there this year. A very gratifying feature is noticed in the report, namely, that each year's statistics shows that transit passes on payment of half import duties as commutation for internal dues are being yearly more availed of for forwarding goods into the interior of the country.

CHINKIANG.—Mr. Novion, Acting Commissioner at Chinkiang, reports that the trade of the year 1874 does not present any peculiar features; on the whole, it has been satisfactory, an increase being shown in most of its branches, and the fears expressed last year not being realised. The increase of one million taels per annum which occurred successively in the years from 1870, to 1873, is not apparent in 1874, and this fact is considered to show that the trade has resumed its regular channel, and reached its maximum of twelve million taels—an amount one million in excess of what was anticipated last year. An increase in the imports of opium, of 1,371 piculs, is ascribed to the same causes as last year, the principal one being the facility purchasers find in evading the Lekin duties. It is stated, however, by the commissioner, that the merchants engaged in the opium trade object to this secret conveyance of the drug as being prejudicial to their business, by making it more or less dependent on the luck of the smugglers. A decrease of 175,000 piculs in piece goods is stated not to be a falling off, but to be attributable to the large stocks left unsold at the end of 1873.

SHANGHAI.—Mr. G. B. Glover, Commissioner at Shanghai, notes an increase of 40 per cent. in the total revenue of the port, namely, from Tls. 2,310,000 to Tls. 3,250,000 in 1873. More than three-fourths of this increase is in the import duties, and that on opium is 30 per cent. over the previous year. There has been a large increase in the export of silk to the Continent, as, owing to the increased banking and telegraphic facilities, continental purchasers now obtain the principal part of their supplies direct from China instead of going to the London market for their requirements. The total import of opium into Shanghai was 57,563 piculs, against 55,453 piculs the previous year. The trade in opium during the past eight years is reported not to have risen in proportion to that in other articles, and Mr. Glover attributes this to the increased production of native opium, which he says is gradually but surely interfering with the consumption of that from India. The returns do not give a fair indication of the amount of native opium brought into Shanghai, as nearly all the import is surreptitiously brought down the Yangtsze by Chinese employed on the river steamers, and it neither pays freight to the steamers nor duty to the Customs. The native dealers estimate that from 2,500 to 3,000 piculs of Chinese-grown opium are consumed yearly in Shanghai. The total import of grey shirtings has more than doubled since 1867, and the import of T-cloths, drills, and jeans has increased in a greater degree. On the other hand, there has been a considerable falling off in the import of woollen goods, especially camlets, lustres, orleans, long cloths, and broad cloths. The business done in the article of matches is noticeable, the amount received in 1867 being valued at Tls. 12,000, whilst last year's import was Tls. 100,000.

NINGPO.—Mr. Detring, Acting Commissioner at Ningpo, reports the total value of the trade carried on under the supervision of his office in 1874 to have been Tls. 14,546,310, against Tls. 15,653,032 in 1873. The total net value of foreign goods imported was Tls. 5,998,926, or Tls. 303,720 less than in 1873. The decrease in the import of cotton goods is attributed to the extraordinary cheapness of raw cotton consequent upon an abundant crop. The cotton crop of 1874 was most abundant. Towards the end of the year the stock on hand was so great that it caused prices to fall lower than they had been for the last fourteen years.

TAMSUI (FORMOSA).—Mr. Hobson, Commissioner, reports the total opium deliveries to have been 1,706 piculs, against 1,708 in 1873; and that the total export of coal was 672.181 piculs, which is short of the 1873 shipments about 5,165 tons. This falling off is ascribed first to Japan cargoes competing favourably in the Shanghai market, and secondly, to the prohibitive rate of duty which is still enforced. Referring to the Japanese visit to Khelai, Mr. Hobson says that whether it was or was not a success so far as their own interests were concerned, the fact remains that it has worked for good, and that greater security is now insured to coast traders; a large field is opening for the industrious Chinese emigrant, and in his track a style of civilisation will certainly follow, which if crude when judged by a Western standard, will still be infinitely preferable to the state of utter savagery which has hitherto existed.

TAKOW (FORMOSA).—Mr. Henry Edgar, Acting Commissioner, states that although the trade of this port during several months of the year was to some extent unfavourably influenced by the presence in Southern Formosa of a large body of Japanese troops, and the consequent possibility of a rupture at any moment in the relations of China and Japan, its net value for the whole period of 1874 is greater than that of any year since the opening of the port, and exceeds that of 1873 by $722.874. In opium there has been an increase in the import of 500 piculs, 28 per cent. on the amount in 1873. The export of brown sugar has been unprecedented, amounting to no less than 672,677 piculs.

AMOY.—Mr. George Hughes's report on Amoy contains many interesting details, the most important general fact being that the transit pass system has again been availed of with satisfactory results, foreign goods to the value of $150,687 having been sent into the interior under their protection. There has been a slight increase in the import of opium, but in other imports trade was for the most part dull.

SWATOW.—Mr. J. L. Hammond, Commissioner at Swatow, reports that there has been a considerable increase in the trade

Digitized by Google

as compared with 1873. The importation of cotton goods during 1874 was more than 50 per cent. over that of the previous year, grey shirtings having increased from 77,000 to 130,000 pieces, and other goods in proportion. The total exports of sugar in foreign bottoms in 1874 amounted to very nearly a million piculs. Since 1859 cargoes have been sent to the Continent, Great Britain, and the United States by sailing vessels and steamers, but Mr. J. L. Hammond notes that it is only in case of a very short crop in the West Indies and South America that Chinese sugar would find a remunerative market in Europe, and that the distance is so great that the chances are the market would be supplied from some other source before sugar ordered from China could be received.

CANTON.—Mr. Kleinwächter reports that a considerable decrease is noticeable in the total trade for 1873 and 1874 as compared with 1872, but that the purely foreign trade of 1874 shows a slight increase over that of 1872. The chief decrease during the year in imports has been in cotton yarn and raw cotton. Referring to the export of spurious teas Mr. Kleinwächter says that, in consequence of the great outcry in England about the adulteration and admixture of foreign substances other than leaf, strong representations were made and steps taken by both foreign buyers and native hong merchants, and so far, at least, it is satisfactory to notice the result, that as a rule now only clear and pure teas are brought to market, and it is to be hoped such may always continue to be the case. An elaborate description is given of the steps taken by the Hoppo for the protection of his revenue, and it is stated that at the six duty stations around Hong Kong and Macao the sum of Tls. 443,500 ii collected. Mr. Kleinwächter enters into a very elaborate disquisition upon the question of the cruisers, and holds that the only manner in which the evil complained of can be cured is the establishment of a branch of the foreign inspectorate of the Chinese Maritime Customs at Hong Kong.

HIGHER EDUCATION IN CHINA.

(To the Editor of the *London and China Telegraph.*)

SIR,—Your valuable paper carries your readers very pleasantly every week to China, and shows us the multiplying points of interest in that important country. We rejoice in the construction of the first railway, and eagerly look for news of its completion and success. We are still more anxious to hear of the result of the petition to the Chinese Government that Western learning should be placed on a footing with that of the Chinese at the national examinations; also we wait to know whether the proposed appointment of the learned missionary, Dr. Legge, to the Professorship of Chinese at Oxford has been really carried out. In connection with these latter questions, I have found while on furlough in this country that a number of thoughtful people are increasingly impressed with the importance of promoting education in China, and probably others would be so if the subject were brought before their attention. The *masses* of the Chinese people are grossly ignorant. This is shown by the vacant look with which they meet the introduction of a subject unfamiliar to them, and by their painful inability to apply their minds to any abstract question, or any matter requiring a little thought and concentration. Through the difficulty of the language, those who have had some schooling are yet often unable to understand what they read; others, again, know their own written language only so far as their business or occupation is concerned; while the principal object aimed at in the ordinary native schools is the culture of the memory, so that even the literary Chinaman is unable for reasoning and argument. Hence, with the limited number of subjects taught, and the limited knowledge of these subjects also, with the native conceit for everything Chinese, and the fearful mental depression which must result from the immoralities and wickednesses of heathenism, it is not to be wondered at that such gross and distressing ignorance should prevail. Formerly, many friends of missions, like our Liberal Government, expected impossibilities from the Orientals. Forgetting the long ages of training enjoyed in this country, they seem to have imagined that their great work was simply to go and preach (as that term is commonly understood), and that instantly moral and mental reformation would be the result. That there are astonishing improvements of this kind is an incontestable fact, but, just as education is felt to be increasingly important in this country, so, in order that the Christian Church in China may attain its proper standard of influence and usefulness, the growing sentiment seems happily to be that of a leading friend of missions in a letter to me, "I do rejoice in the interest taken in higher education in China, we cannot sustain the cause without it." Again, "Surely the time has come, seeing education has done so much for India, for similar benefits to be given to China." These are not empty statements. The writer of one of them, the well-known Miss Baxter, of Dundee, has shown her earnestness in the matter by giving £200 to the London Mission at Amoy, to purchase a suitable building for a college for the training of native ministers and schoolmasters. The directors of the London Missionary Society, encouraged by this act of liberality, have suggested, that friends interested in the mission should be invited to do more than formerly, to make the education of these men something more than primary, by providing scientific instruments, and apparatus for teaching various branches of important knowledge.

No one acquainted with China will question that there are numerous incentives to work of this kind. While the people are grossly ignorant, as compared with Europeans, they are possessed of very considerable mental ability and capacity,—perhaps more than is possessed by any other heathen nation. When employed as sailors, they are said to take precedence of the Hindoos, and others. The manner in which they succeed at home, and in America, in all trades and occupations is extraordinary. Their respect for learning and the learned—their selection of rulers from the literary class, their school (such as it is) in almost every village, their system of examinations, and degrees of literary merit, are notorious. They make shrewd merchants and business men generally. Translations of scientific and other works do not fail to find readers. The eagerness to obtain newspapers, provided in certain places, is such, that it has been said to me, "Without my newspaper I feel as if in a wilderness," and the desire to come to this country and learn our improvements is so strong, in some men, that I had a difficulty to evade the responsibility of a Chinaman's passage to and residence in this country for this purpose. There are thus a variety of encouragements to lead the friends of missions to be persevering in efforts to give to qualified natives a liberal education, and thus enable them to be centres of intelligence to all who come under their influence.—I am, &c.,

AN AMOY MISSIONARY.

London, Dec. 27, 1875.

REVELATIONS IN JOINT-STOCK COMPANIES.

A case is being heard by Sir Andrew Lusk, M.P., at the Guildhall Police-court, in connection with the charge against a Mr. Thomas Beesley, of Islington, of starting a bubble company, and of obtaining sums of money from various persons on the strength of the false representations made in the name of an undertaking and of a board which had no real existence. Mr. Beesley is charged with obtaining several sums of money by false pretences, and the directors of the company—Colonel O. Mahon, D.L., J.P., 27, Eccleston-street; Mr. R. W. Crowe, of the Civil and United Service Club; Major-General Louis, of Charles-street, St. James's; the Hon. H. Turnour, of Shillinglee Park, Sussex; Mr. Obid Edom Barker, of Hendon; Captain Richard B. Freeman, of Hornsey; and Mr. W. F. A. H. Russell, the secretary, are summoned on the charge of conspiring, together with Mr. Beesley, to defraud several persons of sums of money varying from £50 to £100. The company was to be named "The London Saw Mills and Short-Length Timber Company (Limited)," its capital was to amount to £25,000, in 5,000 shares of £5 each, its premises were to be extensive; and clerks, cashiers, time-keepers, office-keepers, &c., were invited to apply for situations in the new establishment, the invitation being always, however, accompanied by the intimation that the applicants must make a substantial monetary deposit as a guarantee of their honesty. Several did so, and were accordingly losers. Mr. G. Lewis, in stating the case for the prosecution, said that the articles of association did not authorise the company to take money on deposit and pay interest for it, but that had been done in this case. The company opened an account at the Metropolitan Bank with £15, and never had a shilling except what came from these poor people. He would be able to prove that sometimes they had £1 at the bank, sometimes 4s. 6d., and sometimes nothing at all. The directors knew all this, and were perfectly well aware that the company was being carried on without capital. The only shares taken up in a *bona fide* way did not amount to more than £100, and yet they kept on advertising for clerks, timekeepers, storekeepers, and other servants. One poor man who had lost nearly £100 by them went to Cornhill, and saw all the directors and Colonel Mahon in the chair. He told them his tale—that he and his wife were strangers in London, and were actually starving, and he begged of them to do something for him. They asked him to retire for a quarter of an hour, and Colonel Mahon went out by one door and Captain Crowe by another. When he returned to the room there were only two directors there, the Hon. H. Turnour and Major-General Louis. In his indignation he struck the latter, and was then seized by several people and removed. Some evidence having been given Sir A. Lusk adjourned the further hearing of the case. He refused to take bail for Beesley, but allowed Russell, the secretary, to go on his own recognisances in £500, and the other defendants on bail in two sureties of £250, and themselves in £500 each.

THE LISBON STEAM TRAMWAYS COMPANY.

(THE HOUR.)

The Lisbon Tramways Company was started in 1871 with a share capital of £200,000. The Duke de Saldanha—then, and now, the Ambassador for Portugal—was chairman, and the other directors were all men of note, viz.:—His Excellency Field-Marshal the Duke of Saldanha (Envoy Extraordinary from the Government of Portugal), London, Chairman; John Chapman, Esq. (Chairman of the Great Southern of India Railway Company), London, Deputy-Chairman; Lord Henry G. Lennox, M.P. (Director of the National Bank), London; Charles J. Appleby, Esq. (Deputy-Chairman of the Buenos Ayres National Tramways Company, Limited), London; William Dent, Esq. (Chairman of the Oude and Rohilkund Railway), London; Capt. C. E. Mangles (Chairman of the Royal Mail Steam Packet Company), London; Francis Tothill, Esq. (Director of the Monmouthshire Railway Company), London. We propose on a future occasion to give a history of this company, but at present we wish to confine attention to the case of "Twycross v. Grant," the decision in which was given on the 20th inst. by the full Court of Queen's Bench. According to the statement of the case, Mr. Albert Grant was to receive £40,000 in

Digitized by Google

cash and £5,800 in fully paid up shares, as a promoter. Now this is a pretty good haul for one man out of a capital of £200,000; but even that is not all, for there was another agreement between the contractors and the Duke de Saldanha. For certain concessions the contractors were to pay the Duke de Saldanha a sum of £22,000 in cash and shares. So that out of a capital of £200,000 Mr. Albert Grant and the Chairman were to divide between them £67,800, or rather more than a third of it! One would have thought no law knowledge was necessary, but that mere common honesty would have made it apparent that such contracts as these ought to have been disclosed to the shareholders, who were invited to subscribe their money by the prospectus. But Mr. Albert Grant, the contractors, and the Duke de Saldanha thought otherwise, and kept this little arrangement to themselves. The affair, however, not having answered the expectations of the shareholders—the fact that the law did not take the same view about disclosing such agreements as Mr. Albert Grant, &c., was brought to the attention of the shareholders; and accordingly they applied to the Courts for remedy under the 38th Section of the Companies Acts, which specially provides that such agreements shall be disclosed on the prospectus, or that the prospectus shall be deemed fraudulent.

So far the case seems simple enough to such ordinary intelligence as a shareholder might be supposed to possess; but Mr. Albert Grant proved equal to the occasion. Having made "commission" out of capital, he sought to make capital out of "commission," and accordingly argued that the payment of £67,800, a third of the whole capital, had but little to do with the failure of the company, and applied to the Court for a "commission" to examine witnesses at Lisbon to show "the true causes of the failure of the company." And what has happened? The Court of Queen's Bench has granted the application. We can well imagine how promoters will chuckle over such a decision, but we know not how shareholders will regard the setting aside of the 38th section, in order to make way for such a wide field of preliminary inquiry as "the true cause of the failure of the company," we cannot pretend to say; all we can do is to draw attention to the fact. The truth is that if judges do not see it—the common sense of the outside world sees that these costly "commissions" are merely one of those many processes to which promoters resort when they seek to stave off the day when they must meet their victims face to face in a Court of Justice, and the hopes that they may, by the use of such processes, tire out the shareholders, are the straws to which drowning promoters cling, and seeing this, we press the question upon the attention of our readers whether it is for the public weal that our Courts should let them have these straws to catch at.

THE FOREIGN AND COLONIAL GOVERNMENT TRUST.
(THE HOUR.)

The fifth and last issue of this Trust was made in December, 1872, and was for the amount of £750,000, in certificates of £100 each, bearing interest at 5 per cent. per annum, the price of issue being £88 each. The annual report for the year ending the 15th of December, 1874, shows investments to the nominal amount of £939,054 in 32 several kinds of Foreign Government Securities, on which interest to the amount of £42,011 3s. 10d. was received during the past year, and £37,415 paid out as interest to the certificate holders, a balance of £79 8s. 3d. was brought forward from the previous year, and £4,863 12s. 10d. received for drawn bonds, £2,267 10s. was charged for cost of management, and £7,400 applied to the redemption of seventy-four certificates at the price of £100 each, carrying forward a balance of £31 11s. 1d. to the next account. A reference is made in the report to the continued default on certain Spanish bonds, but the amount of the investment therein is not named. In the list of Securities held by the Trust, Peru figures for £70,000, Turkey for £108,460, and Uruguay for £9,600. The report on this issue of the Trust differs in one essential particular from all the preceding ones, inasmuch as it states that "The income received from the securities of the Trust has proved sufficient to pay the interest on the certificates and all expenses, and shows *a surplus of nearly £2,500 on income account available for drawings.*" The charge which we have to make against the trustees of the Foreign and Colonial Government Trust is a very serious one. The object of this Trust was declared by them to be the investment of the funds raised by the sale of certificates bearing a fixed rate of interest in the bonds of Foreign and Colonial Governments, bearing on the average a higher rate of interest, and that out of the profit made thereby the cost of managing the Trust should be paid, and the surplus applied to the redemption of the certificates at par. Any act of the trustees in contravention of this principle and this statement renders the trustees amenable to the consequences. It is only in the annual report on the fifth issue for the year ending the 15th December, 1874, that the operations of the year show a surplus over expenses; but even in this case the trustees caused certificates to be redeemed to the amount of £7,400, when they had only £2,500 properly applicable for that purpose.

On glancing over the varied character and amounts embraced in this Trust, it will be seen what an enormous power was entrusted to the following gentlemen:—Lord Eustace Cecil, M.P., G. M. W. Sandford, Esq., M.P., G. W. Currie, Esq., and Sir Philip Rose, Bart. That they may have innocently erred in selecting many of what have since become defaulting trusts for investment, everyone would be disposed to allow; but the subscribers for certificates were told that, by accepting a moderate rate of interest for their money, they might rely upon its being paid with the utmost regularity; but this has been rendered practically impossible—first, by the manner in which the trustees have invested the funds entrusted to their charge; and, secondly, by permitting the redemption of certificates out of capital instead of out of revenue only. On this latter ground we say, with pain and regret, these gentlemen have not been faithful to their trust.

The troop ship Himalaya left Malta for Singapore and Hong Kong on the 19th inst. with the 28th Regiment. As it appears that the troops at present in the Straits Settlements are amply sufficient for service at Perak, the Himalaya will proceed with her original programme of transport service.

Monetary and Commercial.

A sketch prospectus has been issued of a new Telegraph Company, styled the "Indian and China Merchants' Telegraph Association," for the purpose of connecting India by telegraph *via* Messina, Alexandria, Serakim, Aden, and Bombay, at the rate of 3s. per word.

The Eastern Extension Australasia and China Telegraph Company's Madras-Penang cable having been repaired, is reopened for traffic; messages are now forwarded as usual, direct to Singapore, Java, Aussralia, China and Japan by this route.

The traffic receipts of the Eastern Extension, Australasia, and China Telegraph Company (Limited) for the month of November, 1875, amounted to £13,501, and to £17,728 for the corresponding period of 1874. The Madras and Penang section has been interrupted since the 13th November.

Representations having been made to the Admiralty that the telegraph ship Agnes, belonging to the Eastern Extension Company, is missing, orders have been telegraphed to the naval officer in command of the China station to despatch one of Her Majesty's ships to look for her. The Company have since heard of her safety.

The following joint-stock companies have been registered:—

Aberdare and Plymouth Company (Limited)—Capital £1,250,000, in £20 shares.

North Wales Collieries Company (Limited)—Capital £80,000, in £10 shares.

Parana Merchants (Limited)—Capital £10,000, in £100 shares.

Holwell Iron Company (Limited)—Capital £14,000, in £100 shares.

Odessa Tramways Company (Limited)—Capital £360,101, in £10 and £1 shares.

Improved Gas Company (Limited)—Capital £25,000, in £25 shares.

General Warehousing, Auction, and Banking Association (Limited)—Capital £50,000, in £1 shares.

William Jessop and Sons (Limited)—Capital £40,000, in £50 shares.

Nant-Hir Colliery Company (Limited)—Capital £8,000, in £50 shares.

Thomas Unsworth and Company (Limited)—Capital £75,000, in £10 shares.

Manchester Sectional Boiler Company (Limited)—Capital £100,000, in £10 shares.

Britannia Mills Company, Huddersfield (Limited)—Capital £40,000, in £5 shares.

Smith's Vacuum Brake Company (Limited)—Capital £60,010, in shares of £5 and £1.

The tenders for the £1,000,000 of 4½ per cent. debentures of the East Indian Railway Company were opened at their offices on the 20th inst., and the applications are understood to have been large and numerous. Tenders at £101 and 6d. per cent. will receive in full, and at £101 in the proportion of 20 per cent.

The Crown Agents for the Colonies invite applications on behalf of the Government of the Cape of Good Hope for debentures to the amount of £1,000,000 as the first instalment of a loan for £4,000,000 authorised by an Act of the Colonial Parliament for the construction of railways. The debentures will bear interest from 1st January next at the rate of 4½ per cent. per annum, and will be allotted to the highest bidders, provided the rates offered are not below the minimum price. The loan is secured on the general revenues of the Government of the Cape of Good Hope, and will be repaid at par by annual drawings.

The half yearly report of the Land Mortgage Bank of India (Limited) has been issued. It deals with the bank's operations from the 1st of January to the 25th of November of the present year, but is not accompanied by any balance-sheet, that being rendered only at the annual meeting. The statements of the Board represent the state of affairs as satisfactory, all things considered. The principal business of the bank is tea cultivation—and the yield of manufactured tea for the season 1875 is estimated at about 761,000 lb., against 606,160 lb. in 1874. Of this 232,417 lb. have been sold at the average price of 1s. 11d. per lb. The expenditure on the estates was £42,840 up to the 31st of October, which is not considered excessive. In view of the difficulty of finding good investments for money in India, power is to be asked from the shareholders to make temporary investments in England.

The directors of the Colonial Bank have decided to declare at the half-yearly general meeting, to be held on the 6th proximo, a dividend upon the paid up capital of 7½ per cent. for the half year ending the 30th of June last.

At the meeting of the Canada Company, to be held on the 30th inst., the directors will recommend the payment out of the assets in hand of 10s. per share, free of income-tax, as dividend for the half-year ending the 10th prox., as well as a further sum of £1 per share as a fourteenth instalment in repayment of the paid-up capital of the undertaking.

The directors of the Peel River Land and Mineral Company (Limited) have decided to recommend to the proprietors a dividend of 2½ per cent., free of income-tax, making the distribution for the year ending 30th June last 5 per cent.

The directors of the Mysore Coffee Company have declared a dividend of 2½ per cent.

A first dividend of 1s. 6d. in the pound is payable to the creditors of Messrs. N. Alexander, Son, and Co., East India mer-

Digitized by Google

chants, who were adjudicated bankrupts on the 8th of September last. A dividend of 20s. in the pound has also been declared on the separate estate of Mr. B. H. Pearse, a partner in that firm.

The total quantity of tea delivered from the bonded warehouses in London for the week ended the 18th inst. was 3,061,982lb., of which 1,997,911lb. was for home consumption, 689,171lb. was removed coastwise, 245,232lb. was exported, 125,906lb. was sent coastwise for exportation, and 3,762lb. was for ships' stores. The duty received amounted to £49,948, which, when compared with the £53,976 received for the preceding week, exhibits a decline of rather more than 7¼ per cent.

Telegrams from Shanghai announce that the poll meeting, on the 14th inst., of the shareholders in the China and Japan Marine Insurance Company, ended in a resolution to wind up. We presume that the scheme for reorganising the office did not succeed.

We understand that advices have been received confirming the rumour that the Japanese Government had purchased the land at Yokohama on which the Hong Kong and Shanghai Bank had advanced a considerable sum to Messrs. Walsh, Hall, and Co. This will improve the result of the bank's balance-sheet for the current half-year, and we hope will aid in giving a dividend, the stoppage of which has been of such great inconvenience to shareholders. In connection with this bank we hear that an agency has been opened by Mr. Harris at San Francisco.

The *Candia* and *Simla* steamers, originally of the fleet of the P. and O. Company which were lately sold out of the service, are to be despatched for China by Messrs. Macgregor, Gow, and Co., on account of the present owners, and on arrival out will be offered for sale.

The *Glenearn*, from Shanghai, has again headed the mail advices with bills of lading, and considerable confusion and trouble has arisen through the omission of shippers to forward bills of lading by the steamer.

Bar Silver is weaker, and transactions have been effected at 56¼d. per oz. Mexican Dollars: Over £100,000 value of this coin by the St. Nazaire steamer has been sold at the price of 55d. per oz.

SUNDRIES PER "STAR OF THE WEST," FROM NEW YORK FOR SHANGHAI, Nov. 29.

2370 bls. domestics	1,544,616 yds.	40 kegs nails	4,000 lbs.

ARTICLES OF IMPORT.

TEA.

Messrs. Goddard and Co.'s Circular says:—In consequence of the near approach of Christmas, the market has been very quiet, and even the few samples put forward have met with no attention; prices have remained stationary. Some small inquiry has existed for common red leaf kinds, and a few have changed hands at full prices. Public sales have been small. Green Teas show a slight improvement. In public sale 8,940 packages, without reserve, have been disposed of during the week. Moyune Green Teas obtained slightly higher rates, Gunpowder selling up to 3s. 7½d., and Young Hyson to 1s. 11d.; 1,200 boxes new-make sold from 9¾d. to 11¼d.; common black-leaf Congou sold at 9¾d. to 10¼d., and red-leaf from 10¼d. to 1s. 0½d. No further catalogues are advertised. Deliveries from London, from 1st to 20th inst., inclusive, or seventeen days, 1875, 9,046,000 lbs., against seventeen days, 1874, 9,249,456 lbs. Imports, deliveries, and stocks in London, from January to December 1:—

The Circular of Messrs. W., J., and H. Thompson says:—The Tea market continues extremely quiet, and transactions have been very limited at late quotations. Importers are generally holding back, anticipating a better market in January. The China sales have only consisted of 6,030 packages. Indian, 4,800 chests.

	1875. lbs.		1874. lbs.

	130,895,000	...	137,320,000

SILK.

Business is still very limited, for although there is an increased inquiry, the ideas of buyers are so low that in most instances holders decline to sell. Prices of Chinas are unaltered, while those of Cantons and Japans are a shade easier. The deliveries are fairly satisfactory; being from 1st to 22nd inst. inclusive:—China, 1,846; Canton, 262; Japan, 460 bales; total 2,568 bales.

COFFEE.—Early in the week a rather large, although relatively moderate, quantity of new crop Plantation at auction was diposed of on nearly the same terms obtained last week, but subsequent further supplies met less demand, and prices gave way 6d. to 1s. per cwt. All pale and foreign kinds offered have been difficult of sale, and the greater part was bought in. Closing prices of Plantation Ceylon are, triage 90s. to 99s. 6d., grey to good small 98s. 6d. to 101s. 6d., low middling 102s. to 103s., middling coloury 103s. 6d. to 105s. 6d., good middling 106s. to 107s. 6d., good to fine bold 109s. to 113s. 6d., pea-berry 120s. to 121s. 6d. As regard other East India 629 bags Singapore (chiefly picked Bally) have been bought in at 89s. 200 bags Indian Manila at 94s. and 302 bags fine pale Manila at 95s. per cwt.

COTTON.—Quite an active demand prevailed early in the interval, resulting in a larger business than for some time past, and prices were in most instances 1-16d. higher. Subsequently a renewal of the previous dulness has checked business, and the recovery has been lost. Western Madras, owing to unusually heavy arrivals, has been pressed for sale, and prices are rather cheaper than a fortnight ago, fair selling at 4⅜d., and good fair at 4 15-16d. to 5d. Good fair Tinnivelly has been steady at 5⅜d., and fair Coconada at 4¾d. For arrival good fair Tinnivelly, after advancing to 5⅜d., has returned to 5 9-16d., Western Madras and Coconada to 4 13-16d., but there is little disposition to buy even on these terms at present.

COCOANUT OIL moves off slowly; Cochin at £41 to £41 10s., Ceylon £38 10s. to £39. At auction 468 casks yellow to fine Ceylon were bought in at £38 15s. to £39 10s., except a few hogsheads good, which sold at £39.

COIR GOODS.—Only small quantities of Yarn were offered at the weekly sales; the better qualities sold at steady rates, but common in dholls was dull of sale and chiefly bought in. Fibre sold at previous rates, and Rope cheaply.

CHINA.—Straw Plait: At auction 50 bales mottled sold at about the previous value, coarse £6 17s. 6d., ordinary to middling from £7 2s. 6d. to £9 5s., good £11 10s. to £17.

CUTCH.—A moderate business has been effected, chiefly in fine Pegue at 25s. 6d. to 26s., Elephant 26s. 6d.

GAMBIER is rather lower, business having been done on the spot at 26s. 3d. to 26s. 4½d. for whole bales. For arrival sales have been made of December-January shipment at about 24s. 7½d. ex-ship.

GALLS.—The market for China remains quiet, and only small sales have been made on the spot at a further fall in value, at 61s.; also about 700 cases for arrival, ex Osaka (off coast) at 60s., but chiefly November-December shipments by steamer at 57s. 6d. per cwt.

HEMP.—Only small supplies were offered at the auctions, and nearly the whole was bought in; 210 bales Manila sold, a few bales sound at £26 5s. to £26 10s., the bulk damaged of indirect import at £24 to £27 5s., 65 bales Quilot were bought in at £46.

ISINGLASS.—At the periodical auctions a good part again consisted of Brazil, which went off slowly, and prices were in most instances rather lower. 35 cases 6 bags Penang sold, fine bold clean tongue at 4s. 1d. to 4s. 4d., chiefly at the latter price, middling at 3s. 9d. to 3s. 11d., ordinary at 3s. 3d., good to fine pale leaf at 4s. 6d. to 5s. 4d., ditto pickings at 2s. 1d. to 2s. 3d., cake at 1s. 6d. to 2s. 1d.; 9 cases Singapore tongue were bought in at 3s., and 6 bales Saigon cake at 1s. 3d.

JAPAN TALLOW.—In the public sales 21 tubs sold, good at 47s. 6d., dark rather dregged 44s. 6d., very dark rather weak 37s. 6d.

PEPPER.—*Black:* The market remains quiet, with sales of about 400 bags on the spot, chiefly Penang, at 4½d. In auction 1,068 bags Penang were bought in at 4⅛d., excepting 40 bags damaged, which sold. Privately about 300 bags have been sold, West Coast Penang at 4⅛d. For arrival sales of 75 tons Singapore, December-January shipment, have been made at 4⅝d., and 10 tons ditto at 4½d., also 25 tons Penang, distant shipment, at 4⅛d. *White;* Small sales of Singapore have been made at 7d. to 7⅛d.

RICE.—The demand has been slow for both old and new crop soft grain, although there are sellers at former prices. On the spot the landed cargo per Quattro, 15,000 bags Rangoon, has been sold at 8s. 1½d., and landed cargo, consisting of 1,070 tons Rangoon, per Fel Chiozza, at 8s. 1½d. The floating cargo per Beneditto M, 894 tons Bassein, has been sold for the Continent, price not reported, but supposed at about 7s. 9d., also the floating cargo per Duke of Northumberland, 637 tons Bassein, off coast, at 8s. 4½d. Liverpool quay terms, and the Gerhard, 1,211 tons Necransie, off coast, at 7s. for the Continent. For arrival a cargo of 600 tons field Siam, December-January steamer, has been sold at 7s. 6d. ex-ship London.

SUGAR.—Extreme quietness has continued to prevail, and transactions in all cane descriptions are restricted, but previous rates are maintained.

TIN continues steady. There is very little now offering for forward delivery. Quotations: Straits on the spot and afloat, £81 10s.; Banca, £86; Billiton, £85 per ton.

ARTICLES OF EXPORT.

MANCHESTER GOODS.

Last week closed with a firm feeling and a good inquiry, but this week, consequent on the diminished activity in the Liverpool Cotton Market, and near approach of the Christmas holidays, the tone has been quieter. A moderate demand, however, still exists for both Yarns and Goods, and producers hold steadily for their quotations.

CASUALTIES.

FALMOUTH.—Dec. 18, the Loch Awe, from Batavia, has arrived here leaky, and with other damage.

QUEENSTOWN.—Arrived Dec. 19, Hougoumont, Singer, from Penang for London (general), with rudder head damaged and deckhouse washed away.

MARSEILLES.—Dec. 18, the Robertus Hendrikus, from Batavia, arrived here on the 15th inst. very leaky.

NEW YORK.—Dec. 11, the Fasan (Nor.) Sanberg, which sailed hence, Nov. 30 for Hong Kong and Manila, put back 5th inst., with loss of fore and main topgallantmasts.

MISCELLANEOUS.

ROTTERDAM.—Dec. 19, 213 blocks of tin, ex Thomas Sorby (str.), from Batavia, for Rotterdam, which stranded Oct. 6th, at Oosterbank, have been taken to Brouwershaven.

NAPLES.—Dec. 16, sailed Conrad (str.), from Batavia, for Nieuwe Diep, and reports having towed into Messina, on the 15th inst., the Portuguese man-of-war India, having fallen in with that vessel near Canada in distress with 400 people on board, and towed her 400 miles.

MALTA.—Passed Dec. 14, Milton (str.), from Singapore, for London; 18, Crocus (str.), from London, for Shanghai; 21, Torrington (str.), from Rotterdam, for Batavia.

NEW YORK.—Dec. 11, the James A. Brown, Greenish, from Batavia, for Boston, which put into St. Thomas Nov. 11, in distress, remained in port, Dec. 1, repairing. She had not discharged any cargo, and would be ready for sea in a few days.

NATAL.—Sailed Nov. 8, Rio de la Plata, for Java.

PORT ELIZABETH.—Nov. 20, the following cargo ex Ceylon; from Zebu to new York, at Algoa Bay, sold on Nov. 15, 1,200 bags sugar; and Nov. 18, 1,500 bags sugar. A survey has been held, and temporary repairs are recommended to the extent of £600 to enable the vessel to take on the remainder of her cargo. The Min. Fran. Van der Putte, Batavia to Rotterdam, also at Algoa Bay; is restowing the remainder of her cargo. She is now making no water, and will be caulked over all. The following of her cargo has been sold, on Nov. 15, 626 bags coffee, 44 packages sugar, 223 hides, 180 bags pepper, and 129 barrels tobacco; on Nov. 18, 440 bags coffee, 71 packages sugar, 240 hides, and 214 barrels tobacco.

NEW STEAMER.—The City of San Francisco, new iron steamer, for the Pacific Mail Steamship Company, arrived at San Francisco on the 26th ult., after making the quickest passage on record from New York, sixty-two days. She is one of three, the others being the City of New York, and City of Sydney, built on the same model at Chester, Pennsylvania, and intended for the Australian trade. This vessel was launched on Sept. 9, and is of the following dimensions:—Length 353 feet, breadth 40¼ feet, depth 39¼ feet from the hurricane deck, and 31 feet from the spar deck; tonnage 3,750 tons; is barque-rigged, and spreads 17,000 square feet of canvas. The City of New York was launched one month later, and the City of Sydney is nearly ready. The amount of coal consumed during the trip was twenty-seven tons per day. The City of San Francisco was to leave San Francisco on Dec. 6 for Australia, her first voyage, and afterwards at regular intervals; her crew numbers eighty-eight all told, and she will be commanded by **James J. Waddell.**

THE NATIONAL SAFE DEPOSIT COMPANY (Limited).

1, Queen Victoria-street, Mansion House, London.
Capital, £500,000. Subscribed, £250,000.

DIRECTORS.

J. H. Pulleston, Esq., M.P., Chairman.
Lawford Acland, Esq., Chairman Ceylon Company.
George Arbuthnot, Esq., Chairman Oriental Bank Corporation.
George W. Barnett, Esq., Barnetts, Hoares, Hanburys, and Lloyd.
Horatio S. Coulson, Esq., Director United Discount Corporation.
Lord Wm. M. Hay, Director Eastern Telegraph Company.
Hugh F. Sandeman, Esq., Director Scottish Union Insurance Company.

The Company is now ready to let to approved applicants Safes in their Fire and Burglar proof Vaults, at rents from £2 10s. to £30 per annum.

No insurance is necessary.

The main object of the Company is to provide the public with a perfectly secure, yet inexpensive repository for valuables of every description, and relieve them from the harassing and wearing strain occasioned by the personal care of such property. The Company take for safe custody all kinds of securities, valuable property, bonds, wills, marriage settlements, and other documents, and guarantee their value when required. Drawn bonds, coupons, &c., collected.

The Company undertake the duties of trustees, receivers, and executors, and act in other confidential capacities.

The Great Vault is superior to any building in the world intended for similar purposes. The utility of these Safes, which are entirely underground, is undeniable, as bankers are not responsible for deposit of valuables.

The loss of many kinds of securities is irreparable, the loser having no recourse against the Government or other party issuing them. A constant watch is kept both inside and outside the building. There is a room especially adapted and reserved for ladies. The premises can be inspected, and further particulars obtained on application. HENRY WEST, Manager.

COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1854, and 31st December, 1866.

Recognised by the International Convention of 30th April, 1862.

CAPITAL, fully paid up, £3,200,000.

THE LATE REV. B. P. KEASBERRY, OF SINGAPORE.

THE late Rev. B. P. KEASBERRY, whose sudden death occurred last month in Singapore, has left a widow and a family of girls almost wholly unprovided for.

It is almost unnecessary to remind old residents in The Straits of the faithful and disinterested services of Mr. Keasberry, in the teaching of the Christian faith, and the spread of education.

These services, which extended over a period of thirty-six years, it is proposed to recognise, to some extent, by the collection of a sum of money, to be placed in the hands of the Hon. R. Little, M.D., and William Adamson, Esq., of Singapore, as Trustees, leaving power to them to invest the whole or a part at their discretion, or to apply it wholly and at once for the benefit of Mrs. Keasberry and her daughters.

Cheques should be made payable to P. F. Tidman, 34, Leadenhall-street, by whom Subscriptions will be acknowledged.

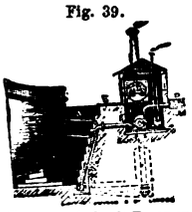
GWYNNE and Co., Hydraulic and Mechanical Engineers,

ESSEX STREET WORKS, STRAND, LONDON, W.C.

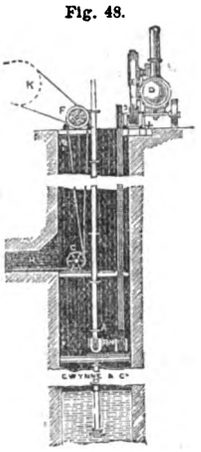
Fig. 39.



GWYNNE & CO 'S PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.

The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be given.

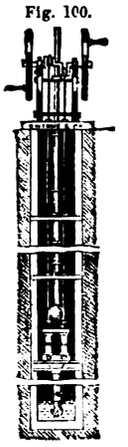
Fig. 48.



GWYNNE & CO.'S IMPROVED PATENT CENTRIFUGAL PUMP.

Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of water.

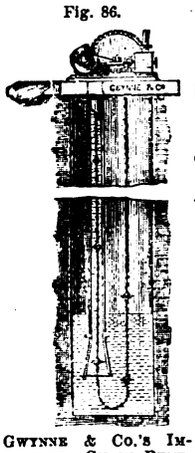
Fig. 100.



GWYNNE & CO.'S IMPROVED DOUBLE-BARREL DEEP WELL PUMP.

For Hand - power, adapted for ordinary depth of wells of any most careful construction, and on the most approved system.

Fig. 86.



GWYNNE & CO.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.

These pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.

GWYNNE & CO.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.

With or without Expansion Gear, for economical working.

From 4 to 100 horse power.

Fig. 154.

GWYNNE & CO.'S IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.

These boilers are simple and compact. They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler.

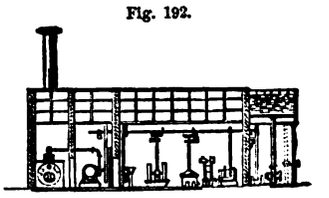
Fig. 142.

GWYNNE & CO 'S IMPROVED PORTABLE STEAM ENGINE.

Light, simple in construction, durable, and economical, and very superior to "Agricultural" Engines.

From 2½ to 30-horse power.

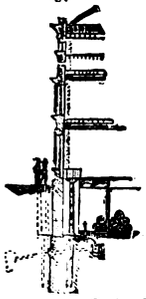
Fig. 192.



GWYNNE & CO.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES, FAT, &C., &C.

The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motive power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added, to lift water, or any purpose required.

Fig. 193.

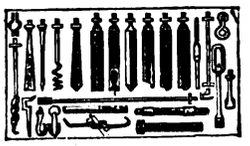


GWYNNE & CO.'S IMPROVED HYDRAULIC LIFTS.

Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine or other produce, into or up from cellars; or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.

Prices on application.

Fig. 121.

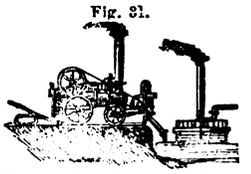


GWYNNE & CO.'S BORING TOOLS.

Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.

G. & Co. can confidently recommend these as the best in the market.

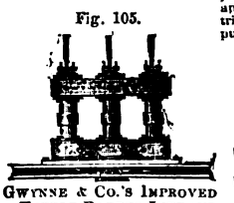
Fig. 31.



GWYNNE & CO.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.

In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made in all sizes.

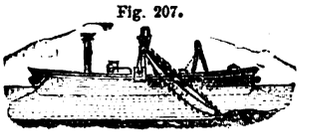
Fig. 105.



GWYNNE & CO.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.

These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principle.

Fig. 207.



GWYNNE & CO.'S IMPROVED DREDGING MACHINERY.

The boat can be constructed so as to draw only 18 inches of water if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable.

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue, with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the World.

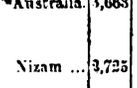
* Taking passengers for Bombay also by branch steamer from Suez.



OVERLAND ROUTE and SUEZ CANAL.—Under contract for the conveyance of the Mails to the Mediterranean, India, China, Japan, and Australia.

The PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY despatch their steamers from Southampton, via the SUEZ CANAL, every Thursday, from Venice every Friday, and from Brindisi, with the Overland Mails, every Monday.

Offices:—122, Leadenhall-street, E.C., and 25, Cockspur-street, S.W.

OVERLAND ROUTE via MARSEILLES and SUEZ CANAL.—Under contract with the French Government for the conveyance of the Mails to INDIA, CHINA, JAPAN, BATAVIA, REUNION, and MAURITIUS.

The MESSAGERIES MARITIMES COMPANY will despatch their steamers from MARSEILLES via the Suez Canal every alternate Sunday at 10 A.M., beginning on Sunday, the 5th of December.

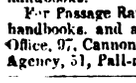
*** Passengers eastward of Suez securing their berths in London are entitled to the conveyance of their luggage free to Marseilles, as explained in the Company's handbooks.

For Passage Rates and Particulars see the Company's handbooks, and apply at the Company's London Head Office, 97, Cannon-street, E.C.; or at the West End Sub-Agency, 51, Pall-mall, S.W.

PRELIMINARY NOTICE.

THE CHINA TRANS-PACIFIC STEAMSHIP COMPANY

(LIMITED).



THE new, powerful, and handsomely-fitted iron screw steamers of this Company are intended to resume their trips between San Francisco, Japan, and China at an early date, when it is hoped that their reputation for speed, safety, and comfort will secure them a large share of the increased traffic of the North Pacific.

The "Vancouver" will probably be the first vessel to leave San Francisco, succeeded by the "Vasco de Gama." The "Columbus," to be launched in January, will proceed to Hong Kong and make her first voyage from that port to San Francisco, via Yokohama, and will be followed by other vessels in due course.

Further particulars will be published shortly.

London, St. Michael's-buildings, 9, Gracechurch-street, Nov. 20, 1875.

TO PARENTS AND GUARDIANS.

AN ENGLISH WIDOW LADY, who has been residing many years on the Continent, is desirous of obtaining two pupils (English) to educate with her own daughters. She offers a comfortable home, and a mother's care, with all the advantages of the best professors and an excellent governess, combined with that of French, English, and German. Is now residing in the neighbourhood of Versailles which abounds with charming walks, where there is an English church, as well as similar cours or classes conducted by the same professors as at Paris. References exchanged.

Address, Madame E. H., Poste Restante, Versailles.
